2. Millepora. This is also a genus of white corals, in which the animal is a hydra or polype, growing in a branched form, and covered with tubulate pores. There are thirty-four species, some of which are very beautiful, of various forms, and of a large size, appearing in the form of round cells, some with thin, others with yellow or blue-grey. They inhabit the Indian and American seas, the West Indies, Mediterranean, and European seas, generally adhering to rocks, or other firm substances. A species of this genus is delineated in the above-mentioned plate, at fig. 3.

3. Flustra. The animal belonging to this genus is a polype, proceeding from porous cells, often so closely as to appear like a mass, when one of the species, of which there are eighteen, acquired the name of horseshoe. They are delineated under the article Flustra, vol. vii. p. 473, and delineated in the engraving adapted thereto.

4. Tubularia. The animal belonging to this genus is a polype, proceeding from porous cells, often so closely as to appear like a mass, when one of the species, of which there are eighteen, acquired the name of horseshoe. They are delineated under the article Flustra, vol. vii. p. 473, and delineated in the engraving adapted thereto.

5. Sertularia. In this genus the animal grows in the form of a tube, frusta with it protrudes its tentacula, and withdraws them at pleasure; so that its quiescent state it has only the appearance of a small dry cylinder. There are twenty-six species now ascertained, which inhabit the rocks in the West Indies, on the shores of America, the Norway and Greenland seas, the Mediterranean, and Indian ocean. One of the most curious of the genus is delineated in the annexed engraving at fig. 8.

6. Corallina. This is a genus of small corals. The animal grows in an herbaceous form, fixed by its stem, and the branches are calcareous, and mostly jointed. There are thirty-eight species, which are found adhering to rocks, stones, and shells, on the sea-shore of most countries, and are often mistaken for corals, or sea-weeds. All the known species are described under the article Corallina, vol. i. p. 189-192; and many curious specimens are exhibited in the engraving adapted thereto.

7. Antipathes. This genus contains thirteen species, the animal growing in a plant-like form, some of which are extremely curious; as may be seen by consulting the article Antipathes, p. 773, and the correspondent engraving, in our first volume. There are considered as black corals, but of an inferior class; the true black coral being a gorgon. They inhabit the Indian, Mediterranean, and North seas. One of them is delineated in the annexed Helmthology Plate V. fig. 5.

8. Gorgonia. This is the most elegant genus belonging to the whole order of zoophytes. The animal grows in the form of a plant or shrub, bearing polipiles with beautiful filaments or pores, differing profusely over the branches, which are of a bony or glairy texture, covered with a soft cellular jelly, which becomes loose and friable when dry, leaving the interior bone naked, which is the coral. There are forty-one species, affording the most beautiful black and red corals; all of which are enumerated under the article Gorgonia, vol. viii. p. 655, 656; and the most elegant specimens of them are delineated in the four Engravings adapted to that article.

9. Alcyonium. In this genus the animal resembles a vegetable, fixed at its base, and mostly growing in a globular or rounded form. The flesh is gelatinous and spongy, befit more or less with polypile-bearing stellate cells or pores. There are twenty-eight species, which are described under the article Alcyonium, and correspondent engraving, vol. i. p. 255. See also a beautiful specimen in the annexed Helmthology Plate V. fig. 6.

10. Spongia. The genus of sponges is not the least curious or interesting. The animal is fixed, flexible, torpid, of various forms, composed of reticulate masses of fibres or spines, covered with a gelatinous flesh, full of small mouths on its surface, by which it absorbs and rejects the water. There are forty-nine species, which more or less inhabit all seas, growing at the root of rocks, stones, or any firm substance. One of the species is delineated in the annexed Engraving at fig. 7.

11. Alcyonium. In this genus the animal resembles a vegetable, fixed at its base, and mostly growing in a globular or rounded form. The flesh is gelatinous and spongy, befit more or less with polypile-bearing stellate cells or pores. There are twenty-eight species, which are described under the article Alcyonium, and correspondent engraving, vol. i. p. 255. See also a beautiful specimen in the annexed Helmthology Plate V. fig. 6.

12. Spongia. The genus of sponges is not the least curious or interesting. The animal is fixed, flexible, torpid, of various forms, composed of reticulate masses of fibres or spines, covered with a gelatinous flesh, full of small mouths on its surface, by which it absorbs and rejects the water. There are forty-nine species, which more or less inhabit all seas, growing at the root of rocks, stones, or any firm substance. One of the species is delineated in the annexed Engraving at fig. 7.

13. Tubularia. The animal belonging to this genus is a polype, proceeding from porous cells, often so closely as to appear like a mass, when one of the species, of which there are eighteen, acquired the name of horseshoe. They are delineated under the article Flustra, vol. vii. p. 473, and delineated in the engraving adapted thereto.

14. Sertularia. In this genus the animal grows in the form of a tube, frusta with it protrudes its tentacula, and withdraws them at pleasure; so that its quiescent state it has only the appearance of a small dry cylinder. There are twenty-six species now ascertained, which inhabit the rocks in the West Indies, on the shores of America, the Norway and Greenland seas, the Mediterranean, and Indian ocean. One of the most curious of the genus is delineated in the annexed engraving at fig. 8.

15. Corallina. This is a genus of small corals. The animal grows in an herbaceous form, fixed by its stem, and the branches are calcareous, and mostly jointed. There are thirty-eight species, which are found adhering to rocks, stones, and shells, on the sea-shore of most countries, and are often mistaken for corals, or sea-weeds. All the known species are described under the article Corallina, vol. i. p. 189-192; and many curious specimens are exhibited in the engraving adapted thereto. See also one of the species in the Helmthology Plate V. fig. 9.

16. Sertularia. In this genus the animal grows in the form of a tube, frusta with it protrudes its tentacula, and withdraws them at pleasure; so that its quiescent state it has only the appearance of a small dry cylinder. There are twenty-six species now ascertained, which inhabit the rocks in the West Indies, on the shores of America, the Norway and Greenland seas, the Mediterranean, and Indian ocean. One of the most curious of the genus is delineated in the annexed engraving at fig. 8.

17. Pennatula. This singular genus, from the similarity of several of the species in their growth and form to that of a quill-feather, has acquired the popular name of sea-pen. The animal is not fixed, as in the preceding genera, but has the faculty of moving, supported by a bony part within, naked at the base, the upper part more or less charged with lateral ramifications, producing polypiles from tubular pores, some of them very beautiful, efflorescing like a panicle of flowers. There are eighteen species, a small one of which is exhibited in the last-mentioned engraving, at fig. 11.

18. Hydra. This is the last genus of the order, and contains the polypes, properly so called. There are five species, all very similar, and equally endowed with the power of reproduction. The animal is minute, linear, contractile, and furnished with a number of feta-
ecous tentacula or feelers, as shown in the annexed copper-plate at fig. 12; but more particularly described under the article Hydrea, where the species are correctly delineated in an appropriate Engraving. They principally inhabit stagnant pools, and gently-flowing streams, in England, and most parts of Europe.

-The Helminthology Plate V. is given to illustrate more satisfactorily this order of zoophytes. Fig. 1, represents the tubipora serpens, composed of short rows of circular parallel tubes, of a white or rosy colour, creeping or multiplying upwards; which, in this species, appears to be its mode of generation, till they become deciduous, and fall off at the top, in order to plant or propagate new colonies. This curious species is very minute, being often attached to the filaments of fungi, and with them washed on shore. In the engraving it is much magnified.

Fig. 2, is the madrepora cruenta, of the natural size, showing its foliaceous construction, with rows of staves impressed in the centre, which are its mouths, and all equally furnished with tentacula. The lamellae or gills are of a finely hardkeen, which confluence the coral, formed of the gelatinous matter continually thrown out by the animal, and of which the whole mass is formed. This is occasionally found of a pale blue grey, or shining light straw-colour, or white streaked with pale red.

Fig. 3, the milepora truncata, a beautiful white coral, growing erect, with dichotomous truncate branches, at the ends of which the pores or mouths of the animal are placed. This is often variegated with a tint of yellow or orange, highly polished, and appearing as if varnished.

Fig. 4, is a species of red coral, the isa coecina, of a beautiful branched form, covered with small scarlet prominent cells, occupied by oviparous polypes.

Fig. 5, a small branch of the antipathes ulex, a species of black coral, found in the Indian Ocean, of various magnitudes, furnished with numerous ovate yellowish-brown vehicles, lodged upon the branches, and supposed to be the ovaries.

Fig. 6, the alcyonium lyncirium, from the Cape of Good Hope. It is a beautiful species; globular, car-tilaginous, and tuberculate, beset with polype-bearing stellarate cells. They adhere very firmly to pieces of rock; and are about the colour and size of an unripe orange.

Fig. 7, is a very delicate species of sponge, (Spongia efformins,) found adhering to the bafes of the Norwegian rocks. This is of a light orange or lemon colour, slightly branched, and thickened round the pores.

Fig. 8, the tubularia magnifica; a species lately discovered in the West Indies, and by far the largest and most splendid of the genus. Like the rest of its tribe it has the faculty of drawing its tentacula within the tube, and the tube within the rock on which it resides. It seems to connect in some measure the genera Tubularia and Amphitrite, having the anulated wrinkled tube of the former, and the retractile radiated tentacula of the latter. It is most probably oviparous. At e, is shown another branch, supposed to be a young animal of the same species.

Fig. 9, the corallina officinalis; already described under that article, but no figure of it is there given. This is commonly used in medicine as an helminthic, but probably without the smallest success; for it appears to have been first recommended as a specific for worms only on account of its supposed likeness to the maw or thread-worm.

Fig. 10, furtoria geniculata; taken at first by Mr. El- lis for a coralline; but it has all the characters of a true furtoria; and is furnished with vehicles or ovaries in a kind of cup-shaped denticles placed on the branches, containing eggs, or the living young. The polypes have a numerous series of exsertile tentacula, but feature-

ly visible to the naked eye. This figure is considerably magnified.

Fig. 11, gemnula felfera, a small species of the fea-urchin. It is furnished with solitary polypes towards the tip, placed on empty denticles, and generally thickened, and obtuse beneath. It inhabits the Northern Seas; and is generally of a flesh-colour. Some of the species emit a very splendid phosphoric light in dark nights.

Fig. 12, hydra grisea, a true polype in its expanded or active state, retaining its prey. These wonderful animals, which are found in our ponds and ditches, are of a slender form, furnished round the mouth with from eight to twelve filiform tentacula, which they can wholly contract, or let fall to a great length. When in quest of food, they cement themselves by the base or tail to any convenient substance, and then expand their tentacula for the purpose of seizing their food, which, when taken hold of, they draw it up to the mouth, situated at the base or root of these thread-like arms or feelers. The mouth is possessed of an expansive power, adapted to the size of its prey; and which, when swallowed, enlarges the natural size of the trunk or body, exactly similar to that of a serpent after swallowing an animal much larger than itself. It also contains a number of small water-worms, (gordius aquaticus,) and monoculi, vulgarly called the water-flea. These entangle in their feelers, which they contract by twisting them in a spiral form, and thus by degrees draw them up to the mouth. This curious artifice is correctly represented in the engraving; where a small water-worm is seen placed on opposite sides of them, being sometimes covered; another is seized by different tentacula; and on the opposite side a monocus also; each of which the little voracious polype will greedily swallow in turn; and, when fasted, retracts its tentacula, and retires to ret in its quiescent state, appearing like a bit of green jelly. Its young are produced by a sort of buds issuing from its sides, appearing at first like minute papillae, till, increasing in size, they assume the appearance of the parent polype; and then, dropping off, immediately shift for themselves. But its most wonderful faculty, is, that of reproducing its parts when broken off; or, if cut in pieces, each piece grows into a distinct polype.

The two genera in this order which are mosty fought after as affording the fine red and black coral, are Isis, and Gorgonia; and these constitute a valuable source of commerce. Next to them are the Tubipora, Madrepura, Millepora, and Tellepora, which produce the white coral, denominated Lithophyta, because in the coral or bone of the animal is external or naked, whereas in the other genera it is clothed with a fleshy epidermis or bark.

The seacoast for fishing coral is from April to July; the places are the Persian gulf, the Red sea, coasts of Africa, the islands of Majorca and Corfo, and the coasts of Provence and Catalonia, Medina, &c. Spallanzani particularly described that which is carried on in the strait of Messina. This fishery extends from the entrance of the Faro to the part of the strait opposite to the Church of the Grotto, being a tract five miles in length, and to the distance of three miles from Messina. The rocks which produce the coral are Situated almost in the middle of the strait, at different depths, from 350 to 650 feet. The bottom and caverns of the rocks are the places from which they endeavour to bring up the coral with their nets; and it is a constant observation, that every branch is perpendicular to the plane on which it grows, without ever turning on one side. Coral, as it is laid, grows more plentifully in places situated to the east than in those to the south; it is rarely found to the west, and never to the north. In the first situation it is generally
HELMINTHOLOGY.

generally larger, and of a finer colour, than in the second and third; which two valuable qualities are likewise found in that which is brought from a deep level, compared with that which is fished up much deeper. The greatest height to which it grows is near a foot, and its usual thickness is that of the little finger, and sometimes that of a man's thumb. The coral of Barbary; but the latter are exceeded by the Meffinefs in vividness of colour. These differences, according to the account of the fishermen, arise from their coral being produced in a sea which is kept in continual agitation, from the surface to the bottom, by the current and the winds. The fishermen divide the tract in which they fish into ten parts. Every one of these parts, and do not fish in it again till ten years are elapsed. This interval they think necessary for the coral to acquire its full growth in height and confidence. When they transfix this law, they find the coral smaller, and of less confidence; and the intensity of the colour is always in proportion to the number of years they have refrained from fishing. When the ten years have elapsed, they believe that the coral no more increases in height, but only in thickness; which, however, has its limits. In fact, they have observed, that the coral fished up near San Stefano, a place where none had been fought for in the memory of man, though it was not very vulgar, was of a different colour, and of the same ordinary coral, though it exceeded it by one-third in thickness. The number of ships usually employed in this fishery is eighteen or twenty, each of which is usally managed by eight men. The quantity of coral procured, amounts annually to about twelve Sicilian quintals.

In the cortical and solid parts of the white corals, Spallanzani observes, the orifices of the cells being oc- to-radiated like thofe in the red, appears to be a proof that the polypies in both are of the fame structure. That the deeper- they defcend into the water, the finer is the coral. Donati observes, that the orifices of the cells being oc- to-radiated like thofe in the red, appears to be a proof that the polypies in both are of the same structure.

From thefe facts Mr. Hatchett concludes, "that the varieties of bone, shell, coral, and the numerous kinds of zoophytes, analogous to bone in all other animals, but the thophagus worms, mentioned by Vitaliani and Marsigli. Their nets had frequently brought them up, either from the bottom of the sea, from caverns, or the sides of rocks; and these perforated corals were found sometimes broken in the trunk, where the perforations are most frequent; and at other times attached to fome fpecies, which were flung them as a bait. They were of opinion that thofe corals were thus perforated, because they were dry; and this dryness, they imagine, proceeds either from age, or their having been broken from their root by some fish, or by a part of a rock falling on them; or possibly by the coral nets, which do not always bring up all the branches of coral they loofen from the rocks.

In order to ascertain the true nature of the substance wherewith corals are formed, and their approximation or affinity to shell and bone, C. Hatchett, Esq. F. R. S. has recently subjected several of the genera to chemical investigation. The zoophytes to which his analysis and enquiries were applied, were several species of Madrepore and Millepora, one species of Tubipora, the Fluftra foliacea, the Corallina opuntia, two species of Ifis, several of Gorgonia, two of Antipathes, and several of Sponges, and also of Alevionum. The firft object was to ascertain, in thofe animal substances, the preference of carbonate and phosphatize of lime, which are the materials employed by nature to communicate rigidity and hardness to shell and bone; and then to examine how the hardening or ossifying principles are secreted and deposited.

The hardening substance of the Madrepores and Mil- lepores, (with only one exception,) appears to be carbonate of lime; and they refemble shells in being formed of a membranaceous fubftance, thus hardened. The only difference is in the mode according to which these materials are employed. The Tubipora musca refem- bles the fore-mentioned fubftances. With respect to the Fluftra foliacea and Corallina opuntia, only a fmall portion of phosphatize is found, mixed with the carbonate of lime. The Ifis ochracea and hippocus are formed of regularly organized membranaceous, cartilaginous, and horny, fubftances; hardened, in the lat species, merely by carbonate of lime, and in the former with the addition of a very fmall portion of phosphatize of lime. The hardening fubftance of the Gorgonia nobilis is found to be carbonate of lime, with a small quantity of phosphatize; and the fubftance of the fpecies of Gorgonia which was partly gelatinous, and partly folid, seems to have been formed, so as to cover the firm in the manner of a tube. The other Gorgonia, viz. the ceratophyta, Flabellum, fuberofa, peciniata, and fcotoa, are composed of a fhh ftem, and a cortical fubftance, by which it is coated. The fpecies afford a quantity of phosphatize of lime, with scarcely any trace of carbonate, and the cortical part consists principally of carbonate of lime, with little or none of the phosphatize.

The Antipathes are found to be little, if at all, different from the fpecies of the Gorgonia; and the various sponges are completely formed by the fame membranaceous or fhoray fubftance, varied by modifications of a more delicate contrufion, rather than by any effential difference in composition. The Alevionum are found to be composed of a soft flexible, membranaceous fubftance, similar to the cortical part of the Gorgonia fuberofa, and in like manner slightly hardened by carbonate, mixed with a fmall portion of phosphatize of lime. From these facts Mr. Hatchett concludes, that the varieties of bone, shell, coral, and the numerous tribe of zoophytes with which the laft are connected, only differ in composition by the nature and quantity of the hardening or ossifying principle, and by the state of the fubftance with which it is mixed or connected."

Thus, then, it is evident that coral is the bone of zoophytes, analogous to bone in all other animals; but the
the most surprising circumstance to the natural philosopher is the rapidity with which this material is formed, and the magnitude with which it is presented, in the formation of coral rocks; which rise spontaneously out of the sea, and become by length of time sufficiently capacious to be inhabited by man. Such are the Friendly Islands, and several others in the Indian Ocean; for the interesting particulars of which we beg to refer the curious reader to the article Coral, vol. v. p. 138.

INFUSORIA, OR WORMS GENERATED IN INFUSIONS.

The individuals of this order are commonly denominated animulcules, because they are in general so extremely minute, as not to be cognizable to the naked eye; but have been chiefly made known to us by the powers of the microscope. By means of this noble instrument we are as it were introduced into a new world; and made acquainted with an order of beings which, from their extraordinary minuteness, must otherwise have for ever escaped our knowledge and observation. And how many kinds of these invisibles there may be, is quite unknown; for they are observed of all sizes, from those which are barely invisible, to such as reach even the action of the microscope, and under the strongest magnifying instruments appear only as moving points. There are those which inhabit the waters; for, though animals equally minute, or perhaps more so, may inhabit the atmosphere, or creep upon the earth, yet it is scarcely possible to obtain a view of them; whereas, water being transparent, and confining the creatures within it, we are enabled, by applying a drop of it to their proper cover, to discover the great part of its contents, and, in a space barely visible to the naked eye, often perceive a thousand little animals full of life and vigour.

But in the examination and prosecution of this curious and delicate research, how many requisites are necessary, and what a variety of favourable circumstances must be possessed, so as to enable us to conduct it with success! — A habit of observation acquired by long practice, suitable leisure, rigorous attention, persevering mental exertion, and, above all, inexhaustible patience! — We must be able to manage the microscope with more than common adroitness and care, so as not to crush the little creatures, so feeble in strength, that we are acquainted with so often, in spite of all our vigilance, elude themselves from our view. Still, to judge of their habits and economy, to ascertain their figure, and demonstrate their genera and species in the scale of animated nature, we must examine them in many different ways, in various situations, and at different intervals of motion and repose, at the same time we must be correct definers, and able to trace with fidelity and exactness, whatever the powers of the magnifier may present, as their genuine features and organization.

The animulcule infusoria take their name from their being found in all kinds either of vegetable or animal infusions; if feeds, herbs, or other vegetable substances, be water, it will forever be filled with an infinite number of these minute creatures. There is a prodigious variety in their forms; some appear bell-shaped; others round or oblong, without any apparent members; some resemble a bulb with a long taper tail; others are nearly spherical; the greater part are vascular and transparent. Thioe most generally found in ditch-water are like inflated bladders, with a small trace of intestines in the centre; the next are a flat kind, with a number of legs under their belly. In all of them motion seems to be their chief delight; they pervers with equal ease and rapidity, and in all forms and directions, the dimensions of a single drop of water, in which they find ample space for their various progressions, sometimes darting straight forward, at other times moving obliquely, then again circularly; they know how to avoid with dexterity any obstacles that might obstruct their progress.

Among animulcules, as in every other part of nature, there is constantly a certain proportion preferred between the sexes of the individuals, and different degrees of organization are always fewest among the larger kinds, but they increase in number as they diminish in size, till of the last, or lowest to which our powers of magnifying will reach, there are myriad to one of the larger. Like other animals, they increase in size from their birth till they have attained their full growth. When deprived of food, they grow thin and perished; and different degrees of organization are to be discovered in their structure. The birth and propagation of these microscopic animulcules is also as regular as that of the largest animals of our globe; for though their extreme minuteness prevents us, in most cases, from seeing the germ from which they spring, yet we are well assured, from numerous observations, that the manner in which they multiply is regulated by constant and invariable laws.

It is unquestionably an object of the highest admiration to have invented means for bringing creatures so imperceptible as these animulcules under our cognizance and inspection. One might well have deemed an object that was a thousand times too minute to affect our vision, as perfectly removed from human discovery, yet we have extended our sight over animals to whom these would be mountains. The naked eye takes in animal beings from the elephant to the mite; but below this, commences a new order, referred only for the microscope, which comprehends all those from the mite, to those many millions of times smaller; and this order cannot be said to be exhausted, if the microscope be not arrived at its ultimate state of perfection. In fact, the greater number of microscopic animulcules are of so small a size, that through a lens, whose focal distance is the tenth part of an inch, they only appear as so many points; that is, their parts cannot be distinguished, so that they appear from the vertex of that lens under an angle not exceeding the minute of a degree. If we investigate the magnitude of such an object, it will be found nearly equal to one third of a square inch. Supposing, therefore, these animulcules to be of a cubic figure, that is, of the same length, breadth, and thickness, their magnitude would be expressed by the cube of the fraction \( \frac{1}{100000} \), that is, by the number of parts of a cubic inch, that is, each animulcule is equal to \( \frac{1}{100000} \). This contemplation of the animulcules has rendered the idea of indefinitely small bodies very familiar to us; a mite was formerly thought the limit of littlenes; but we are not now surprised to be told of animals many millions of times smaller than a mite. These considerations are still further heightened, by reflecting on the internal structure of animulcules; for each must have all the proportion, symmetry, and adjustment, of that organized texture which is indispensably necessary for the several functions of life; and each must be furnished with proper organs, tubes, &c. for secreting the fluids, digesting its food, and propagating its species.

Minute animals proportionally exceed the larger kinds in strength, activity, and vivacity. It is well known that the spring of a flea vastly outstrips any thing animals of a greater magnitude are capable of; the motion of a mite is much quicker than that of the swiftest horse. M. De L'Isle, Hist. Acad. Scienc. 1711, p. 23, has given the computation of the velocity of a little creature, so small as to be scarcely visible, which he found to run three inches in a second; supposing now its feet to be the fifteenth part of a line, it must make five hundred steps in the space of three inches, that is, it must shift its legs five hundred times in a second, or in the time of the ordinary pulsations of an artery. The rapidity with which many of the water insects skim the surface
power of dilating and contracting its body, which is de¬
colleting every discovery made by his cotemporaries in
nder the following genera: viz.
There are twelve fpecies, one of which,
There are thirteen fpecies; one of which,
known. One of these, *Buraria dupplex*, is represented at fig. 15. It is of an elliptical figure, with the edges folded over, leaving a narrow longitudinal cavity; bright blue, found on duckweed.

**Gonium.** This genus contains five species, which are either of a quadrangular or orbicular figure, filled with spheroidal molecules, set in a pellucid membrane like diamonds in a ring. The species are described under *Gonium*, vol. vii. p. 67; and a figure of one of them is given in the Engraving adapted to that article.

**Codium.** This is a pellucid flat worm, of which there are seven species. One of them, *Codium eucialis*, is exhibited in the annexed Engraving at fig. 16. It is of an ovate figure, with an irregular margin, the top bent into a kind of beak; the membrane pale blue, filled with about twenty-four bright molecules: found in vegetable infusions.

**Paramecium.** This is also a genus of flattened worms, containing seven species; one of which, *Paramecium caryophylis*, is correctly represented in the Engraving at fig. 17. It is longitudinally plaited on the fore-part, and obtuse behind; the margins filled with opaque globules, which are the ovaries or embryos of this tribe of infusoria; found in putrid salt water; pale red.

**Cycidium.** The worms of this genus are either ovate or orbicular, flat, pellucid, and very simple. There are seven species; some of which are so excessively minute as to elude the powers of the strongest magnifier in defining their parts. The *Cycidium pellicula* is ascertained to be a white gelatinous worm, found on the *Hydra vulgaris*. This polype, in its quiescent state, is delineated *fuscus*.

**Vibrio.** This genus contains worms equally if not more minute than the preceding. They are chiefly linear or filiform, and posses a kind of serpentine form and motion. Twenty species have been ascertained, and each of them further explained, and illustrated with Engravings, under their respective titles in this Encyclopaedia.

**Vibrio glisunis,** appears as a pellucid greenish yellow membrane or halo, filled with circular molecules; moves slowly about a quarter of the circle from right to left, and then back again from left to right; found in stagnant waters.

**Monas.** This genus is supposed to contain the minutest of all the worms hitherto investigated by naturalists. They are seen as a moving point in the water, no matter in which the animal has the power of expanding and changing into various positions, parallel to each other; but which the animal has the power of expanding and changing into various positions, parallel to each other; but which the animal has the power of expanding and changing into various positions, parallel to each other; but which the animal has the power of expanding and changing into various positions, parallel to each other; but which the animal has the power of expanding and changing into various positions, parallel to each other; but which the animal has the power of expanding and changing into various positions, parallel to each other. They are found in vinegar, and other mild acids. It is of a greenish yellow: found on duckweed. Another Species is Shown at fig. 22.

**Vibrio aceti,** found in wheat or other grain. Another Species is given, more particularly as a moving point in the water; and it was a long time before their animation could be satisfactorily ascertained. There are five species, one of which, *Monas atomus*, is represented in the Engraving at fig. 28. It has the appearance of a bright green halo, filled with numerous pellucid atoms, with a black dot in moveable positions; and is found in lea-water after it has been kept a considerable time. *Monas lente*, is the most minute of the genus; being so extremely small and transparent, as to elude the most highly magnifying powers in endeavouring to render it visible, so much does it blend or assimilate with the water in which it swims.

The numerous species contained in each of the preceding genera, are described under the article *Animalcula*, vol. i. p. 717-729; where the reader will also find explained the several hypotheses of *Leeuwenhoek*, *Hurtzloecker*, *Buffon*, and others, concerning the doctrine of *organic particles*, and *spermatic animalcula*. Since the arrangement was drawn up by O. F. Müller, in the above-mentioned article, Dr. *Gmelin* of Gottingen has named and delineated the whole, of all the species is given; in which he has separated many individuals from Müller's classification, that are mere varieties of the same animal; and others which belonged to different or distinct genera. There are each of them further explained, and illustrated with Engravings, under their respective titles in this Encyclopaedia.
way to new discoveries. In medicine he contributed powerfully to overthrow the Galenical doctrine of humours and qualities, which he attacked by many strong and sensible arguments. He may be regarded as one of the first who attended to the living principle in bodies, which he designated by the name of archeus, as an ens distinct from the body and soul, and the intelligent ruler of the animal frame. To its various affections he attributed morbid motions in general, supposing its favour to be excited in order to expel noxious matter. Much of his doctrine on this subject has been fostered down in the schools to the vis medicatrix. The works of Van Helmont were first published collectively by his son, in 1638, 4to. Elzev. and many subsequent editions have appeared in various places.

HELM'SDALE, a river of Scotland, in the county of Sutherland, which runs into the German Ocean two leagues south-west of the Ord of Caithness.

HELMLEY, or HELMSLEY-BLACK-A-MOOR, a small town of the North Riding of Yorkshire, seated in Ry-da, or the Vale near the river Rye, and has a rivulet running through it called Borrow-be. The houses are built with stone, and covered with tile. It had formerly a castle, which was supposed to be one of the strongest inland castles in England; it was built by Sir Robert de Rof, (hence called Rof-castle,) from whom it descended to a branch of the family of Manners, and now belongs to the duke of Rutland. It was well fortified, and the moat was supplied with water by three springs, one from the remains of the Paraclete. It was besieged by general Fairfax for Cromwell; he endeavoured to batter it down, but, through the strength of the building, his efforts proved abortive. Search was then made to find by what means the moats were supplied with water, which, being discovered, the moats were let dry; and the enemy now began to undermine the building, performed the service of the day in the market on Saturdays; fairs, May 19, July 16, October 2, and November 6.

HELM'SMAN, f. The man who stands at the helm, and directs the course of the ship.

HELMSTADT, a town of Germany, on the Rhine: fourteen miles south-east of Heidelberg, and fourteen north-west of Heilbronn.

HELEN [Hebrew.] A man's name.

HE'LO, name of a woman.

HE'LOISE, the ardent lover, admired wife, and affectionate widow, of Abelard. She is supposed to have been born about the year 1120, and to have been a priest's natural daughter. She was brought up by her maternal uncle, Fulbert, a canon of Paris, who gave her an education suitable to the uncommon talents for learning which she very early displayed. When the misfortunes had occurred, which are related in the biographical sketch of Abelard, it was determined that she should take the veil, and quit for ever the gay and pleasing scenes of a Parisian life. She made her profession at Argenteuil, before she had attained her twentieth year; and devoted herself to the devotions of the times, soon enlarged its possessions; and Heloise and her community acquired general respect and regard. She inspired them with a love of learning, that, according to a contemporary writer, without being Syrians, Greeks, or Romans, they spoke the different languages of these countries as well as their native tongue; and on certain days of the year sang the offices of the church in Hebrew, in Greek, and in Latin. Her felicity was so great, that when Abelard, on the death of Heloise, in 1142, whose remains at his request were conveyed for interment to the Paraclete, the residence of his beloved wife; and the heavenly consolations of religion enabled her to pass through the scene with due composure. She survived him twenty years; and conducted herself with that zealous austerity natural to one who had relinquished the world and all its attachments; hence the constitutions which she drew up for the rule of her convent are in the extreme of rigour. The tale of her declining life is thus told by the abbot of Cluni: "Her tears had long since destroyed her beauty; a sad melancholy took place of her native vivacity; her eyes lost all their fire, and her whole frame was broken down by grief. She looked upon herself as the difconsolate widow mentioned by St. Paul, whose only occupation is to weep and lament. After the death of Abelard she hardly ever went into the monastery but to attend the offices of the church; and, except at the times of her attendance in the choir, when she had done a service, she retired to her cell at prayers, or was upon her knees before the tomb of Abelard." She died in May, 1163; and by her direction was laid in the tomb by the side of her revered Abelard. In testimony of her extraordinary learning it is affirmed, that for many years after her death the nun of the Paraclete, at the feast of Whit, recited a poem on the death of Heloise, in which language Heloise had been particularly attached.

HE'LO'NE, [Hebrew.] A man's name.

HE'LON, [Hebrew.] A man's name.

Helonias. 1. Helonias bulbosa, a spear-leaved helonias: leaves lanceolate, nervet. Root perennial, composed of many thick fleshy fibres; leaves spreading near the ground, and sitting close to the root at their base, of a light-green colour, having six longitudinal nerves, which appear strongest on the under side; they are four or five inches long, two or three broad in the middle, narrowing gradually to both ends, and continuing green all the year. In the centre of these springs up a single erect stalk, a foot in height, having a few fewlings of small leaves, ending in sharp points, standing alternately close to the stalk; this is terminated by a close obtuse spike of dark-red flowers, with petals spreading open flat; the filaments are twice the length of the flower; and the anthers are four-cornered, of a blue purple colour. Some of the flowers have no stigma, and are barren; they appear the latter end of April and May; and in warm seasons the seeds will ripen here. Native of Pennsylvania, about Philadelphia, growing plentifully in shady moist places. It is called star-grass by the natives; and is of an acid aromatic flavour.

2. Helonias aphodeloides, or graps-leaved helonias; stem-leaves fetaceous. Stem extremely fimple, two feet high; leaves alternate or scattered, upright, even, but ruged at the edge; flowers white, in a fimple terminal raceme, on peduncles longer than the flowers. It resembles an aphodel very much, but has three recurved

A fuper-
A supernumerary servant.—I live in the corner of a vast unfurnished house: my family consists of a steward, a groom, a helper in the stable, a footman, and an old maid. Swift.

HELPFUL, adj. Useful; that which gives assistance:
‘Till time lend friends, and friends their helpful swords.’ Shakespeare.

Wholesome; salutary.—A skilful chemist can as well, by separation of visible elements, draw helpful medicines out of poison, as poison out of the most healthful herbs. Raleigh.

HELPING, f. The act of assisting.
HELPLESS, adj. Wanting power to succour one's self, and enemies rage and persecute the poor and the helpless; but let it be our glory to be pure and peaceable. Rogers.—Wanting support or assistance: How shall I then your helpless fame defend? ‘Twill then be infamy to seem your friend. Pope.

HELPLESSLY, adv. Without ability; without succour.
HELPLESSNESS, f. Want of ability; want of succour.

HEL'NSING, f. A brass coin among the Saxons, equivalent to our halfpenny.

HEL'SINGBORG, a sea-port town of Sweden, in the province of Schonen, on the coast of the Sound, opposite Helsingöer. It had formerly a strong castle, but suffered severely in the wars of the 17th century, so that it is now a defenceless place, with little commerce. It has, however, manufactures of ribbons, hats, and boots. Here is a ferry across the Sound to Denmark: twenty-eight miles north-west of Lund, and fifty-five miles off Christiansstad. Lat. 56. 2. N. Long. 12. 37. E. Greenwich; 270 from London; situated on the river Cober, near its influx into the sea. It is one of the Cornish towns appointed for the coinage of tin; and is the place of assembly for the western division of the shire. It has had a good market on Saturdays; and fairs on March 13, July 20, September 9, November 8, the second Saturday before St. Thomas's-day, and the Saturday before Midsummer-day, Palm Sunday, and Whit-Monday. It had formerly a priory and a college, and sent members to parliament in the reign of Edward I., but was not incorporated till the 27th of Queen Elizabeth, who vested the jurisdiction in a mayor, four aldermen, common-councilmen, and twenty-four aldermen. In 1774, the corporation being reduced to one alderman and eight freemen, (there being no mayor,) a new charter was granted, which appointed thirty-one freemen, but included the remaining corporators. Here is a large market-house, and a guild-hall; and the town consists of four streets that lie in the form of a cross, with a little channel of water running through each. The spire of the church with its spire is ninety feet high, and serves as a fire-mark. A little below the town there is a good harbour, where the ships load their lading. King John exempted Helsingor from paying toll anywhere but in the city of London; and from being impeded any where but in their own borough.

HEL'STON, a pleasant and populous town in the county of Cornwall, 14 miles distant from Falmouth, and 270 from London; situated on the river Cober, near its influx into the sea. It is one of the Cornish towns appointed for the coinage of tin; and is the place of assembly for the western division of the shire. It has had a good market on Saturdays; and fairs on March 13, July 20, September 9, November 8, the second Saturday before St. Thomas's-day, and the Saturday before Midsummer-day, Palm Sunday, and Whit-Monday. It had formerly a priory and a college, and sent members to parliament in the reign of Edward I., but was not incorporated till the 27th of Queen Elizabeth, who vested the jurisdiction in a mayor, four aldermen, common-councilmen, and twenty-four aldermen. In 1774, the corporation being reduced to one alderman and eight freemen, (there being no mayor,) a new charter was granted, which appointed thirty-one freemen, but included the remaining corporators. Here is a large market-house, and a guild-hall; and the town consists of four streets that lie in the form of a cross, with a little channel of water running through each. King John exempted Helsingor from paying toll anywhere but in the city of London; and from being impeded anywhere but in their own borough.

HELVER, f. [helf, Sax.] The handle of an axe. The slipping of an axe from the helve, whereby another is slain, was the work of God himself: Raleigh.

To HELVE, v. a. To fit with a helve or handle.

HEL'VA, f. in botany, a genus of the class cryptogami, order fungi. The generic characters are—Pileus on a stem, smooth on both sides; feeds thrown out from under the surface.

Species. 1. Helvella mitra: stem semi-transparent, ribbed, grooved; pileus, lobes growing to the stem. When old it turns quite black, which is the extremity to which Schafer has figured it to many times. It is extremely variable, the stem from half an inch to two inches diameter; one and a half to four or five inches high; the colour from that of colourless horn to pearly, to brown, and almost to black. The pilaus is not less variable in shape and size than the stem. Stem, or rather a bundle of stems, about three inches high, nearly pellucid; connected together by places, often serpentine, ribbed and grooved; from one to two inches diameter; pilaus covering several stems united together, rather brownish, thin, brittle and tender; hanging; its under surface feeds granulated, and is of a pale brown. See the Plate, fig. 1. This species is found near Bun-gay, but rather rare; by Withering, close to the wall by the upper Stew, at Edgbaston; from August to November.

2. Helvella pinoit: without any stalk, as shown on the Plate.
Plate at fig. 2. Fig. 3 is a congeries of the same. Native of England in woods.

4. Helvella vericiformis: stem cylindrical, white; pileus hemispherical, white. Stem an half an inch high, not thicker than a pin; pileus the size of a rape seed. Grows single or in clusters, in moist and shady parts about the roots of trees, under mosses; about Halifax in wood.

5. Helvella atrata: stem smooth, and deflected in various forms; smooth and brown underneath. Pileus snowly white, leathery, hard, crumpled stemless, and natives of Jamaica, added by Swartz.

6. Helvella aurea: stem short, yellow; pileus umbrilla-like, gold coloured. Stem one-tenth to two-tenths of an inch high, tapering downwards, folid. Pileus convex, flattish, thin at the edge; find at the top, hard, smooth, slippery, hardly a quarter of an inch over. The plant is brittle, watery, and semi-pellucid. Grows in woods in moist water places on sticks and stems of plants.

7. Helvella aurinigina: with a stem; very small, bright green; pileus of various shapes. This is hardly a quarter of an inch in height; pileus concave, generally lancing, uneven at the edge, and very irregular in shape. Found on rotten wood in various parts of England.

8. Helvella fuliginea: stem hollow, greyish; pileus inflated, angular, plicated, blackish. Stem uneven, twisted and furrowed, two to four inches high, thick as a goose-quill, thicker downwards; about three inches over; stem solid. Pileus from a half to two inches over. Found by Mr. Dickson in woods.

9. Helvella aculis: pileus two or three lines thick, two to two and a half inches long. Found in moist woods above the grindle of October. This is a new species from Albertini and Schweinitz's Conspicuus Fungorum, published in 1805. The name work enumerates the following, which, as synonyms are not added, may probably be some of the above.

10. Helvella acaulis: 22. infula; 23. esculenta. HELVETIA, the ancient, and lately-revived, name for SWITZERLAND; a most celebrated and romantic country of Europe, divided into thirteen provinces called cantons: viz. Berne, Zurich, Schaffhausen, Bail, Lucerne, Unterwalden, Uri, Schwitz, Friburg, Zug, Soleure, Glaris, and Apenzel; for the particular history of each of which, see those articles.

Helvonia, one of the ancient names of Switzerland, is distinguished by several appellations. By the Romans they were regarded as a part of Gaul; and the chief poets were the Helvetii on the west, and the Rheti on the east; the chief city of the Helvetians being Aventicum, now Avanches. After the fall of the Roman empire, this interesting country may, in a general point of view, be considered. As tenned in the Latin language, to the above subject; but afterwards it has been varied by Susa, and Alalice; and on the west as a part of Burgundy, the inhabitants being styled Burgundi trans-saures; because, with reference to France, they were situated on the other side of the mountains of Jura. Divided among several lords, secular and spiritual, the inheritances of the former at length chiefly centered in the house of Hapsburg, afterwards the celebrated family of Austria; and on its emancipation, in the beginning of the fourteenth century, first appeared the modern denomination of Switzerland, either derived from the canton of Schwitz, distinguished in that revolution; or from the general name of Schiwzer, given by the Austrians to this alpine people. For the sake of precision, modern writers have restriced the orthography of Schwitz and Schwizer to the canton; while the general appellation for the people has been Saficy, now Helvetians; and for the country Switzerland, now again Helvetia.

In length from east to west, this country extends about 200 British miles; and in breadth, from north to south, about 130. The contents in future miles have been estimated at 14,960; but a great part is lost to human
1. Helvella nitra. 2. Helvella pineti. 3. A Congerous of the same. Fig. 4. to 10.
Curious Species of Hemerobius.
man industry, consisting of vast rocks, partly covered with eternal ice and snow. Even of this country the boundaries are rather arbitrary than natural; though on the west the mountains of Jura form a partial barrier from Italy. On the east lies the territory of Tyrol, and on the north is Savoy, containing as it were an excrecence of Switzerland on the other side of the Rhine, the small canton of Schaffhausen.

Modern Helvetia included, in addition to the ancient, a large part of RHENIA. The Helvetii, after their repulse by Caesar, found on their return that their numbers were reduced to a third; and that the Rhets, who, till the reign of Augustus, remained unmolested, were then almost totally exterminated. In the division of the provinces which Augustus made with the Senate, Gaul, including Helvetia, was one of those which he reserved for his own cognizance; and, in forming this division, he had particularly in view the military forces which its situation rendered necessary, and of which he would have the disposal. The civil government was administered by lieutenants immediately dependent on the emperor, who were the commanders in chief of the forces, and invested with the supreme judicial authority. The commercial department was conducted by the procurators of Caesar; who were generally freedmen, devoid of all shame, and guilty of boundless oppressions. The multiplied imposts charged on the Helvetians rendered them dear purchasers of the fine arts, the sciences, the civilization, and the improved state which Buttus had introduced among them. An inscription found in the ruins of the ancient Vindomith commemorates Manlius Cordus, who had been a receiver of the taxes, and gives him the surname of Rasaph. The modern Helvetia has been visited by exactors in no degree inferior to Cordus; but we believe that they have been less ingenious, and have not so honestly designated themselves as is the case with the Romans of the same division.

In a later division of Gaul by Augustus, Helvetia formed a part of the great Lyonefe Province, of which Lyons was the capital. It next formed a part of the new kingdom of Burgundy; the last monarch of which, Rodolph III., bequeathed it to the emperor Henry II. This bequest was the origin of the supremacy of the emperor over Helvetia.

Among the families which had early struck deep root in Helvetia, were the towering house of Hapsburg, that of Savoy, so well known to history, and that of Zähringen, so honorably distinguished in the early annals of this country; the dukes of which house were the beneficent founders of its cities, and the liberal grantors of its privileges, which were the irrevocable monuments of the liberty, and of the confederacy which afterwards became the federal confederation. Strafburg; and, in order to preclude all further importunities from this intrusive nephew, he made his grant irrevocable, in the council with the bishop of Basl, Rudolph approached with forces, and burnt the convent of the Penitent Sibers in one of the suburbs of that city; for which sacrilegious deed, he, and all his adherents, were put under a severe interdict. He then (perhaps as an atonement to the church) engaged with the infidels of Prussia, who were contending with the Teutonic knights for the gods and the freedom of their ancestors. His fortunes, which his rapines more frequently obstructed than promoted, took a more favourable turn, as soon as adversity had tempered the impetuosity of his unruly passions.

His mother Hedwig lived to see him reconciled to her family, and to witness an alliance contracted between Hapsburg and Kyburg. Godfried of Lauffen also became his friend. The days of the old count of Kyburg drawing near to a conclusion, Rodolph fought, both by perusals and kind offices, to induce the bishop of Strafburg to relinquish the haft grant of Hartman. In this however he failed; and thenceforth he engaged with the citizens of Strafburg against their bishop, and seized on the towns of Colmar and Mulhausen. He allowed no respite to this right reverend protection, had attacked and nearly demolish'd his tower near their walls. Rodolph was hastening to his assistance; and, after his death, intimidated his successor Henry to such a degree, that he gladly consented to surrender the grant.

Hartman the elder of Kyburg, soon after this, sent a pressing message to Rodolph, to solicit his aid against the burghers of Winterthur, who, in a sudden insurrection, had attacked and nearly demolished his tower near their walls. Rodolph was hastening to his assistance, when news were brought him that Hartman, the last count of Kyburg and Landgrave of Thurgau, had closed his illustrious line. All the nobles of the Kyburg family, from Basl to Thurgau, and the Gaffer, who owed allegiance to this house; the magistrates of the several towns and cities, and the heads of the many convents that had been founded or patronized either by his ancestors or by himself; met hereupon at a general assembly; and count Hartman was entombed with his illustrious line. Rodolph received the homage of the assembly, and pardoned the insult offered by the citizens of Winterthur. The house of Hapsburg had on no former occasion received so great an access of power and dominions; but Rodolph, while he was listening to the congratulations of his friends and subjects, was little aware what far greater honours were yet reserved for him by his auspicious destiny.

He was high in stature, and of a graceful figure and air; he was bald, his complexion pale, his voice aquiline; his mien was grave, but so engaging as to command the confidence of all those who approached him. Both at the time when, with scanty means, he performed eminent achievements, and when, in his exalted station, a multitude of public concerns claimed his inconstant attention, he preserved a gay and tranquil mind, and a disposition to facetious mirth. His manners were simple and unassuming; his diet was plain; and he was still more temperate in the life of strong affairs, and in his private habits. His dinner and refreshments were simple and unhaphiing; his diet was plain; and he was still more temperate in the life of strong affairs, and in his private habits. neither their wife institutions nor the purity of their manners would have availed them, “not to be amenable to any foreign tribunal, nor to be ever tried but according to their own laws;” they in return gave a striking proof of their firm adherence to Rodolph, on a day when one hundred of them, headed by himself, displayed a memorable instance of undaunted valor, in a decisive battle against Ottocar king of Bohemia. He never failed to rise from his throne at the approach of Jacob Muller, a burgher of Zurich, who in an engagement had, at the peril of his own life, saved that of the monarch; he never applied in vain to the citizens for a loan or subsidy; and found them ever ready to promote his interest and glory.

Reckless of the Swifs in high effeminacy, and was accustomed to tell them that he should ever consider them as his meritorious and daring children; and, as such, would maintain them in the immediate protection of the empire, and reserve them for the most important of its services. But Albert, who succeeded Rodolph, was of a different character from his father. The little cantons, being well acquainted with Albert, anticipated the attacks which would be made on their rights and privileges, and prepared to meet the outrage. It seems that a sort of confederacy existed between the little states of Uri, Schwitz, and Underwalden, previously even to this time; and, on the occasion of Rodolph’s death, these were renewed, the ancient dialogy of Albert for ambition, hauteur, and severity, occasioned like precautions to be taken in other places to oppose his designs. Having on this account also lost the imperial diadem, he was engaged in a war with the empire; but, being successful over the newly-elected emperor Adolphus, his rival, whom he slew in battle with his own hands, he assumed the hereditary dominions, and not as head of the empire. The people now universally expressed their abhorrence of the tyrants; and the inhabitants of Uri, Schwitz, and Underwalden, who had from time immemorial possessed the right of being governed by their own magistrates, with other important privileges, united in order to defend themselves to the last extremity. For this purpose they chose three commanders, gentlemen of approved courage and abilities; these were Werner Stauffach, Walter Furth, and Arnold Melchthal; who secretly agreed to surprize and demolish the castles in which the imperial governors resided.

This resolution being adopted by the cantons, these three places joined again in a league for ten years, which gave birth to the Helvetic Confederacy.

The emperor Albert, thinking this a proper time for totally reducing these places by force of arms, halted at Berne to begin the preparation; but his preparations were formidable; all his vassals in all parts of Switzerland were armed for the massacre of their conquerors. The late baron Haller, a few years after his death, published a pamphlet at Berne, in which he controverted the received opinion concerning the history of William Tell, and particularly the authenticity of the story of the apple, chiefly on the ground that the first writer who mentioned it wrote two hundred years after the event yet a similar story, and varying only in the names of the parties and the scene of action, is told by Saxo-Grammaticus, in his Danish annals, and said to have happened in Denmark in the year 965. This fictitious concerning a piece of history, which his countrymen considered as the most sacred verity, excited such general resentment, that a remonstrance was presented to the sovereign council of Berne, and the profane pamphlet was publicly burnt at Uri.

But, however the credibility of the particular story of the apple may be shaken by such objections, yet the general history of William Tell is celebrated in many old German songs, which are yet preserved, and the popular tradition, which is so strong, is as keen to raise the deeds they celebrate above all reasonable suspicion; and the constant traditions of the country likewise strongly support the authenticity of Tell’s general history.

This fictitious concerning a piece of history, which his countrymen considered as the most sacred verity, excited such general resentment, that a remonstrance was presented to the sovereign council of Berne, and the profane pamphlet was publicly burnt at Uri.

But, however the credibility of the particular story of the apple may be shaken by such objections, yet the general history of William Tell is celebrated in many old German songs, which are yet preserved, and the popular tradition, which is so strong, is as keen to raise the deeds they celebrate above all reasonable suspicion; and the constant traditions of the country likewise strongly support the authenticity of Tell’s general history.

The people now universally expressed their abhorrence of the tyrants; and the inhabitants of Uri, Schwitz, and Underwalden, who had from time immemorial possessed the right of being governed by their own magistrates, with other important privileges, united in order to defend themselves to the last extremity. For this purpose they chose three commanders, gentlemen of approved courage and abilities; these were Werner Stauffach, Walter Furth, and Arnold Melchthal; who secretly agreed to surprize and demolish the castles in which the imperial governors resided.

This resolution being adopted by the cantons, these three places joined again in a league for ten years, which gave birth to the Helvetic Confederacy.

The emperor Albert, thinking this a proper time for totally reducing these places by force of arms, halted at Berne to begin the preparation; but his preparations were formidable; all his vassals in all parts of Switzerland were armed for the massacre of their conquerors. The late baron Haller, a few years after his death, published a pamphlet at Berne, in which he controverted the received opinion concerning the history of William Tell, and particularly the authenticity of the story of the apple, chiefly on the ground that the first writer who mentioned it wrote two hundred years after the event yet a similar story, and varying only in the names of the parties and the scene of action, is told by Saxo-Grammaticus, in his Danish annals, and said to have happened in Denmark in the year 965. This fictitious concerning a piece of history, which his countrymen considered as the most sacred verity, excited such general resentment, that a remonstrance was presented to the sovereign council of Berne, and the profane pamphlet was publicly burnt at Uri.

claring that they were disposed to live in peace with the duke, notwithstanding the numerous subjects of complaint which they had against him, but they would neglect no means of defending themselves if he attacked them, full of confidence in the protection which heaven would yield to the justice of their cause. Not doubting that their destruction was determined, they made every preparation for their defence, and resolved to fell their lives at a dear rate. The confederate forces were thirteen hundred, while those of the invaders were reckoned at twenty thousand. Leopold marched on the side of Zug; and Rodolph Reding of Schwitz, an experienced soldier, weakened by age, but whose wisdom, patriotism, and skill, merited the confidence of his countrymen, advised them to seize the heights of Morgarten, which commanded the defile by which the enemy was to enter their territories. The battle, so glorious to the valiant few, which takes its name from that memorable spot, is described by Mr. Planta in the following animated terms:

The 15th of October, of the year 1315, dawned. The sun darted its first rays on the shields and armour of the advancing host; their spears and helmets glinted from afar; and, this being the first army ever known to have attempted the frontiers of the cantons, the Swiss viewed its long protracted line with various emotions. Montfort de Tettang led the cavalry into the narrow pass, and soon filled the whole space between the mountains. At this juncture, the confederates, having thought of acquiring in common an enlargement of territory and power, which had already long gone on, their chances of success were great; and with long pikes they dealt out blows and thrusts wherever opportunities offered. Here fell Rodolphus of Hapsburg Lauffenburg, three barons of Bonstetten, two Hallwyls, three Urgons, and four of the house of Tockenburg; two Guezlers were likewise found among the slain; and the windlass (the most illustrious Landenberg met his doom from the hands of his son, whom his son had in vain endeavoured to dissuade from allowing this battle of Laupen, July 21, 1339. This confederacy was headed by the count of Nidau, who had acquired high military renown in Palestine; and the counts of Neuchatel, of Valangin, of Arberg, of Gruyeres, and of Eberhard, with the powerful count of Kyburg, demanded the presence of the emperor, and entertaining irreconcilable hatred to the hereditary enemy of the nation, they, while by the side of the vaillants of these haughty chiefs, appeared the burghers of Friburg, the late allies of Berne. The Bernefe neither despised the danger, nor gave themselves up to fear. They professed themselves ready to listen to equitable propositions of peace, but intimated that they should not relax in their preparations to repel force by force; and they called to their allies, several of whom sent them succours. The statue of Berne appointed Rodolph of Erlach its commander-in-chief. The day of Laupen was highly fatal to the power of the nobles; since the count of Nydau, their leader, the count of Valangin, the young count of Savoy, three counts of the house of Gruyeres, and a number of great lords, fell in the field of battle. The whole country was covered with arms, with horses, with the dead, and with the wounded; and the losses of the nobles was estimated at fifteen hundred horse and three thousand foot, while that of Berne was very incon siderable. The action lasted only two hours. Berne, valiant in battle, laid the road to Friburg, and with the seven nations of the confederacy, which had joined the league of nobles against Berne, (nearly related to its head, the count of Nydau, who fell at Laupen,) elected the commander of the Bernefe to be the guardian of the infants of the deceased count. The brave Erlach accepted the trust, and faithfully discharged it; and thus did their children find a protector in the conqueror of their father, while the state of Berne approved and ratified the arrangement. This singular trait does high honour to all the parties.

Zurich, Giiarls, and Zug, had already joined the confederacy; and Berne, shortly after the memorable battle of Laupen, threw its weight into the same scale, and thus extended the union to eight cantons; which are often distinguished as the eight ancient cantons, because they remained at this number for a hundred and twenty-five years. It is a mistake, to regard the Helvetic Confederacy at this time as a sytem combined with reflection, with the design of purifying a certain object, and of acquiring in common an enlargement of territory and power. The principal, and almost the sole, aim of its founders was the security of their ancient rights against the enterprizes of princes and nobles. When we speak of independence as the object at which they aimed, it must, if applied to their efforts at this period, be taken in a restricted sense; since the formation of an indepen-
dent republican state was not yet in their contempla-
tion. Their league was not even a general, or a
national confederacy; it was kept together by con-
ferences, which gave rise to the Helvetic Diets of after-
days, but which at this date had nothing fixed either as
to time or place. There existed no regular organized
congresses, as foreigners have supposed; who fancied that
they faw in Switzerland, in the fourteenth century, ano-
other Augsburg or a federal republic; and who, at this
moment in fubfance and in name unknown to the Swifs
of that era. It is necessary to be apprized of this fad,
in order properly to comprehend the complicated tran-
sactions of this country.

In the course of the long conteft between the house of
Austria and tic confederates, we meet with this curious
incident. The caufe of quarrel having been referred
at the emperor Charles IV, he pronounced a judgment
which the cantons refused to obey. Indignant at
this act of disobedience, he resolved to carry his decree
into execution by force of arms. He called out his va-
sals, marched against Zurich, and invested it with a large
army. The chiefs and their followers held their enemy
in the utmost contempt, and they regarded themfelves
as fubject either to share fpoils than to engage in
war. How, fay they, can four thousand burghers and
peafants reft four thousand men in armour, and forty
thousand infantry and cavalry? The befieged, how-
ever, were not disheartened, but bravely defended them-
selves, and defpofted their fortifications; while the dif-
cipline was fuch that it was againft this right exercised by the
confederates, that the emperor and the princes waged
war. They pointed out the alarming progrefs made by
this adt of difobedience, he refolved to carry his decree
in his History of the Helvetic Confederacy, obferves:

"In each of thefe conflicts, all feudal rights, not alie-

..."
leges of the respective communities, were scrupulously reserved; whence (as this was observed in all other public (conferences) the multiplicity of local privileges, immunities, and customs, to which the Helvetic body owed its complicated policy." After having recited these acquisitions, he adds: "Thus, in a few years, and without wars or compellive means, the confederate cities of Helvetia acquired upwards of forty fignories from Austria and its vaftals; some by voluntary surrender, but most of them by open purchase. The old maxim of rejecting territorial acquisition was indeed relinquished on these occasions; but at this period no censure will apply for this deviation, if we reflect that the princes, in these times, in proportion as the nobility sunk into decay, had recourse to temporary forces, numbers of which they now began to enlist under their banners; and that, by means of these, they would soon have crushed the various confederacies it had been found expedient to oppose to the encroachments of despotism. The Helvetic cities guarded against this by encircling their walls with ample territorial dependencies, which defeated the purposes of their relentless adversaries, and enabled them to survive the leagues of the Swabian, Rhenish, and Hanfeatic cities, which had not used similar precautions. The confederacy, moreover, by these accessions, gradually obtained a preponderancy, which was soon felt in the scale of political equilibrium, and rendered its independence an object of equal solicitude and protection to all the states that comprised the grand republic of Europe."

It is about this time that the Grisons become known to history. The people, following the example of the confederacy, formed their several leagues. The prosperous example of the Helvetic confederacy thus spread around it its own spirit of independence; and no doubt prompted many powerful, but provident, nobles and prelates, to a nearer intercourse with their subjects, and to favour combinations which might be well found expedient to oppose to the encroachments of despotism.

We have already hinted at a similarity between the transactions in the vales of Helvetia in the fourteenth and fifteenth centuries, and others in modern times on a more conspicuous theatre. Coalitions were formed among the swabian, Rhenish, and Hanfeatic cities, which had not used similar precautions. The confederacy, moreover, by these accessions, gradually obtained a preponderancy, which was soon felt in the scale of political equilibrium, and rendered its independence an object of equal solicitude and protection to all the states that comprised the grand republic of Europe."

The war of Zurich was a contest as invertere and destructive as those usually are which arise among friends and confederates. The splendid Stufl, who exercised absolute sway over the minds of the Zurichers, was their leader. Author of incalculable ills to his country and to the confederacy, and compromising the very existence of his own state, he became independent of Austria, he retained his influence over the people undiminished, to the day in which he bravely fell, fighting for the cause of which he was the soul. The frantic valour of the small band of intrepid Swifs, who fold their lives at so dear a rate to the dauphin of France, (afterward Louis XI.) in the action of St. Jacob near the Rhone, was the first caufe of the intimate connexion between France and Switzerland, formed soon afterward; which has been productive of so many important confquences, which remained to our days, and which had so tragic a termination. The civil war of which we have but spoken, exhibited the character which too generally distinguishes Swiss contests. Towns, we are told, were sacked, churches pillaged, crucifixes broken, the confecrated hofts dragged through the mire, women suffered the greatest outrages at the foot of the altars, and houses were consumed to ashes. These shepherds, who in peace were calm, cold, moderate, and humane, became tigers, thirsting for blood, and making war on war. Previously to the Italian defater, in the course of the troubels of the Vallaix, a spirit had discovered itself, widely different from that which animated the confederacy in its better days. A demagogic ceremony, practiced by the infurgen},

**HELVETIA.**
left respected. In the delirium of their vengeance, they thought that they were allowed to break down the altars and the images of their enemy; and they carried their rage so far as to put themselves to death, when made prisoners. It is a singular circumstance, that when the first troops, who had destroyed a great number of churches, by this counsel, the latter engaged to partake of some repose within their own limits, they paid a visit to Einfelden, in order to offer their homage to the image of the virgin which was worshipped in that celebrated church, as to a patroness who had not neglected to industriously protect them.

Slight circumstance as this have often an important influence on the fate of communities, as well as on that of individuals, and occasion a great variance in the histories of those between whom a considerable similarity may be expected to prevail. This fact is inserted in the pages of Berne and Friburg. They had the same founders, namely, the dukes of Zeningen; they date their origin to whose control it long remained subject. The cunning, for which Louis XI. was so remarkable, appears in no instance to more effect, than in the conduct that is to be attributed to the Swiss, during the period, fays Brantome, "that, when we had a considerable body of Swiss, we regarded ourselves as invincible." The same writer, speaking of the French infantry at this period, says that there belonged to it a few fine men, but that the greater part consisted of vagabonds and outlaws. Philip de Comines tells us, that Louis XI. was so fully enabled of the value of his Swiss auxiliaries, that he dreaded nothing so much as entering the lists with that people, and that he paid them their stipulated subsidies punctually every year.

The Swiss must be something more than ordinary men, if we account for a transaction, which occurred a little later in point of time than the above period, to be taken exactly as it is stated by Mr. Mallet in his History of the Swiss, published in 1824. It appears to us incredible: but we are not physiologists enough to determine what a very robust human frame can endure; nor have we experience of the degree to which military subordination is capable of being carried. Pugner, who fought against the Swiss in the Swabian war, relates that a corps of them was passing the Rhine in the winter; that, when far advanced into it, the river rose prodigiously; and that, thus exposed to the fury of the enemy, the commands ordered their men in this situation to halt, until the matter was reduced to some certainty. The greater part were up to their shoulders in water for nearly two hours, occupied solely in guarding themselves from the pieces of ice which were carried along by the current; and that, thus exposed to insupportable cold, they never quitted their position, though the result was the loss of the lives or limbs of great numbers.

If nothing so much elevates man, as to be able by peroration to avert from his country the calamities and ravages of intestine war, we must allow high distinction to the Swiss, who, brave in the point of being referred to the decision of the sword. Happily, some persons called to their recollection the former services of Nicholas de Flue; who, brave in the field, was always in council the friend of peace, and the advocate of justice and moderation; who, having given his heart days to the calls of the public, and left a progeny which imitated his virtues, had himself retired to a sequestered part of his canton, for the purpose of dedicating the cluse of his life to piety and meditation.
Thee persons visited the hermit, and besought his interposition. He was not deaf to their requests, but quitted his peaceful retirement, and appeared at the congress of Stantz, the chief town of his canton. All present felt for him the veneration due to hoary sanctity; all regarded him as the genius of beneficence; and all recollected the wisdom of his counsels, his love of his country, and his devotion to its welfare. When he was announced, all eyes were fixed on him, all ears were open, and all minds became susceptible of conviction. His unassuming yet touching eloquence awoke, in the hearts of the deputies, those sentiments of fraternity and patriotism, by which the confederacy owed its glory and its existence. The cantons recommended an arbiter under the garb of a hermit, adopted all the measures which he proposed in order to alay their differences, and employed themselves in defying those which feared best calculated to prevent similar evils in future. Many very important regulations, to which the confederacy owed much of its subsequent strength and stability, derived their origin from this extraordinary interposition, and from the spirit of unanimity and cordiality which it called forth. Had de Flue been a saint, endowed with the gift of miracles, he could not have wrought one more signal, nor more useful to his country; nor have he acquired less gratitude to its gratitude, than by drawing closely together the bonds of union between states so different as those from the other, whether we regard the extent of territory, the manner of life of the inhabitants, or the several possessions under which they lived, and which would, so to say, fill up all the contradictions between pure unlimited democracy and exclusive hereditary aristocracy. Having terminated the salutary work of pacification, de Flue closed his mission by addressing, to the assembled deputies, counsels full of wisdom and patriotism. He exhorted them to be on their guard against the seductions of foreign courts, and the attractions of their pensions and their service. He pointed out to them the dangerous consequences of this line of conduct, and recommended it to them to imitate the frugality and simplicity of their ancient manners, as the necessary safeguard of that liberty which of itself ought to suffice to the people to resist all aggression and to keep them always sensitive of its value. When, at an assembly of the deputies, all the cantons solemnly declared for ever to the cantons the possession of the transalpine bailiwicks, and the provinces of Valais, Châtenois, and Bormio, to the Grisons, with an option, however, of surrendering their principal castles to the French king for the sum of three hundred thousand crowns; all the privileges that had ever been held by the confederates in the kingdom of France, were revived and confirmed; the payments stipulated by the convention of Dijon were ratified, with the addition of a free gift of three hundred thousand crowns to the whole Helvetic body, and an annual subsidy of two hundred and sixty thousand livres to each of the cantons, to the Valais, and to the Grisons leagues. This compact was declared to be perpetual, and has in fact been the basis of the many leagues that were afterwards made between the crown of France and the Helvetic confederacy.

The reformation is the next prominent feature in the history of Helvetia. As to the canons which brought about this singular revolution in human affairs; the chief of them were, the opprobria exercitata, the Romish hierarchy, the wealth and power which it had amassed, the claims which it arrogated, and the ignorance and bad lives of its clergy. The generality of the priesthood, (says Mr. Pius,) did not scruple to acknowledge their deficiency in the most elementary parts of learning. The canons of the collegiate church of Zurich, having to notify an election to the bishop of Constance, confided that they transmitted it in the handwriting of their notary, because several of them could not write. In the examinations for holy orders, it was deemed amply sufficient that the candidate could read, and tolerably comprehend what he read; even after the reformation had made some progress, the people firmly believed, and the priests confirmed them in the persuasion, that the bells travelled every sabbath-week to Rome to receive fresh baptism; and that the exorcism of priests could effectually dispel swarms of locusts, and all manner of insects. When, at an assembly of the clergy in the Valais, mention was made of the Bible, only one of the priests had ever heard of such a book:
and several, on other occasions, did not scruple to declare, that it would be an advantage to religion if no gospel were extant; and that the study of the Greek and Hebrew languages was specially favoured hereby. All men must feel a painful conviction when they learn, from the charges that were brought by the citizens of Lausanne against their clergy, that the priests used often, even in the churches, and in the midst of divine service, to strike the persons to whom they bore ill-will, some of whom had actually died of suicide; that they walked the streets at night, disguised in military dress, brandishing naked swords, and inflicting the peaceable inhabitants: and that the frequent rapes, violations, and insults, they committed, were never punished or even restrained. It is no small corroborator of the merited clamours raised against the clergy, that their own zealous advocate and protector, Charles the Fifth, publicly declared to them, that if their lives had been less reproachable, they would never have had to contend with a Martin Luther.

After the agitation of the reformation had subsided, the following became the religious state of the cantons: Four of them, and among these the two principal, had adopted the reformation; seven remained firmly attached to the faith of their ancestors; and two admitted both religions into their country as well as their senate. Of the three-and-twenty subject districts, only Morat and the Grisons became wholly protestant. Sixteen retained their former creed, and five became assecular. Among the allies, Geneva, Neuchatel, Bienne, Mulhausen, and the town of St. Gallen, renounced the doctrines of Rome; while the diminutive republic of Gerflau, and the abbey of Engelberg, perished in their former worship. In the Grison league, after great disturbances, and many fluctuations, both creeds were at length admitted by public authority. The reformation had at one time made considerable progress in the Valais, the Valteline, and the Italian bailiwicks: but popery at last prevailed; and at Locarno, those who refused to adhere to the established doctrines were compelled to quit the country; on which occasion no less than sixty families, among whom were several of considerable note, withdrew to Zurich, and contributed essentially to promote both the commerce and manufactures of that already-prosperous city. This religious separation was by no means, in all cases, topographical; the inhabitants of different persuasions were living promiscuously together, and many large families having divided into branches, and contradictory belief and fanaticism frequently proved the source of destructive feuds and great calamities.

We have before observed, that by the peace of Westphalia, in 1648, the Helvetic confederacy was acknowledged to be a free state, even by the emperor and empire; at which time they were so addressed by the French king, the king of Great Britain, the king of Sweden, the king of Prussia, and the pope. The united cantons in rank were reckoned next to Venice. To them belonged in common twenty-one bailiwicks, two towns, and the like number of lordships. Eleven other free Helvetic republics were united, either with the whole confederacy or with particular states. If the thirteen cantons sent ambassadors to a foreign court, they did not delegate one man to represent them all, but each canton appointed its own ambassador, to show its distinct and independent state.

The order of the thirteen cantons, and the era of their reception into the Helvetic confederacy, is as follows: The quota of troops to be furnished by each canton in case of war was fixed in the year 1668, in order to form a confederate army of 9600 men, and is here annexed.

The quota of troops to be furnished by each canton in the reception into the Helvetic confederacy, is as follows:

The government of Helvetia at that time may be considered as divided into three classes; the aristocratic, the arido-democratic, and the democratic. In the first class, that of Berne stands foremost. This supreme legislative, as well as executive and judicial, body, consisted, as its title denoted, of the avoyer, and the little and great council. The latter of these councils, which in fact comprised the two other branches of the legislature, being properly the federal authority, was also named the foreign council, and (though of late its number has always been greater) the council of two hundred. Its full complement was, after various changes, fixed at two hundred and ninety-nine; which number however it seldom retained for any length of time; it having been of late a constant practice, in order to obviate the cabals which ever attend a competition to few vacancies, and perhaps, as Stanyan intimates, to reduce the number of candidates to the bailiwicks, who were always members of the council, not to proceed to an election until the vacancies amounted to at least forty, which, according to the usual rate of mortality, happened in general every ten or eleven years. This council, of which the avoyers, the senators, and all the officers of state, were members, was authorized to make and repeal laws; to declare war, conclude peace, and form alliances; to judge in all capital cases within the district of the city; to determine all civil causes that were referred to it by appeal; to delegate powers to its inferior magistrates, courts, and civil departments. It ultimately regulated all that concerned the revenue; superintended whatever related to the public edifices, when the value exceeded one hundred crowns; and finally determined all matters that were referred to its decision by the senate. It usually met twice a-week. The senate, which, as it met every day, Sundays and festivals excepted, was likewise called the daily council, consisted of the two avoyers, the two treasurers, the four bannerets, seventeen ordinary and two secret senators. These seven-and-twenty members discussed and prepared all matters that were to be laid before the great council, dispatched all current affairs that related to the police, and conferred all church preferments, and many civil offices; they ordered gratuities within the limits of one hundred crowns; and ultimately decided all criminal causes, except those which were referred for the great council, or some privileged municipality or county. But the greatest consequence to which they proceeded was derived from the share they had in filling up the vacancies in the great council; and the power vested in them of convoking this council, whenever an incident occurred which appeared to them to call for vigorous measures. Whenever the great council sat, this senate became the executive in it, and retained no peculiar authority of its own. At other times it was not improperly considered as the executive power of the state.
The two avoyers were the highest officers in the state. They were elected by public votes, in the sovereign council, but were able to be removed, in the name of the same body. One of them only supported the dignity, and exercised the functions, of head of the republic; and they alternately exchanged their stations every year, on Easter Monday. The avoyer in office presided both in the council and senate, in each of which he had no regular vote, but only a casting vote; the great seal of the republic, in his custody; and a provincial jurisdiction was annexed to his station. In his absence the ex-avoyer supplied his place, and when he also was prevented from attending, he was authorized to appoint a substitute, who however could not be either a treasurer or a baneret. During the harvest and vintage, which were considered as festivals, one of the banerets presided in the least-frequent meetings that were held both of the senate and council, and had the custody of the great seal. The proceedings, on a vacancy in the senate, were as follows. On the day, or rather, on the termination of the deceased senator, the senate and council met, and as many balls as there were members present were put into two covered boxes, the senators drew them out of one, and the counsellors out of the other: among the former were three gilt balls, and among the latter seven, the remainder being silvered over; and those who drew the ten golden balls were electors for the nomination of candidates. These three senators and seven counsellors, now being in the same situation where they feared the success of the three priest-candidates which the council in its last session had given the first place in the municipal body, proposed that the candidates should be elected by lot, and that the three candidates who drew the ten balls should be lastly considered, as it was a general law of the state, that in all elections, the last to arrive at that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to that dignity, and some of late were usually preferred to H E L V E T I A.

The freedom of a state, are well worth the serious con-deration of every Englishman, who has the prosperity of his country truly at heart.

Having thus taken a cursory view of the several com-ponent parts, the aggregate of which forms the Helvetic confederacy; we may now proceed to contemplate the bond of union, to which they chiefly owed the rank they long held among the powers of Europe; but which, as has been observed by a writer of much author-ity, was improperly called an union, since, except in what concerned the common sovereignties, there were many few points in which they necessarily came in con-tact with each other. Its true denomination appears to have been that of a *permanent defensive alliance*, the object of which was the protection of each member against all foreign attacks, and the preservation of interior tranquil-ity, by the weighty preponderancy of a majority operating against those who betrayed a disposition to create disturbances. It was by no means a representa-tive government: it had no common administration, no concentrated authority, no executive power, no public treasury, no mint; nor could it, even in its relations with foreign powers, be considered as an individual power; for since most of the alliances were made collective body at large, but with one or more of the members separately, several of them having expressly referred the power of forming such connections. The di-ets, which thus appear to have been held more for the purpose of communication, than either of legislation or any other functions of government, were either general or special, ordinary or extraordinary. The general or extraordinary diets consisted of the deputies of all the can-tons, and of those of the allies who were distinguished by the appellation of associates.

Previously to the present awful struggle, Europe was often not unjustly represented as one great federal republic. The benign characters, who delighted to view it in this light, and who exercised their ingenuity in devising plans for arbitrating the differences of nations by other modes than those of arms, might have found something like a model in the practice of the Helvetic confederacy; for the law of arbitration was the result of most of the compacts that had been entered into by these states; and gave rise to many secondary meetings, which were summoned for the purpose of adjusting disputes occasionally arising between different members of the confederacy. Whenever these occurred, each canton at variance sent two deputies to the place agreed upon in their treaties, and these, when their opinions were not in harmony, were arbitrated by the neutral cantons. This umpire was for the time absolved from his oath of allegiance to his own sovereign, that none of his engagements might clash with the impar-tiality of his award. He was not allowed to propose a new opinion, but could only confirm one of those pre-viously delivered by the deputies; but his decision was final. All the cantons were not equally bound to submit their differences to the law of arbitration, the old ones having referred the power of declining it, while those that entered late in the confederacy were bound to ad-here to it whenever it was proposed to them.

Such nearly was the situation of the Swiss cantons, or Helvetic confederacy, when the French revolution, in its rapid progress of devastation, reached that devoted country! How fondly has the mind been accustomed to direct its flights to Swifterland, and to contemplate in imagination its interesting inhabitants, the children of nature, brave, independent, and happy; dwelling among noblest heights, fedulous in agriculture, and amidst scenery which exhibited matchless contrasts! Alas! that Swifterland which delighted the traveller, and whither cultivated fancy roved with so much pleasure, exills no longer! Modern Helvetia, the infalted province of France, occupies indeed the same space in the map which that happy country formerly filled, but...
it is a different object, and calls forth very different affections. In the French, that article France, vol. vii. p. 830, we have stated, that "the ancient alliance of the cantons with France, the constant employment of their best troops in the service of that nation, their hatred towards the houses of Austria and Savoy, the neutrality observed during the most critical periods of the war, the forbearance and lenity with which the Swiss were treated by the French, the hostility of the nation towards the Swiss during their revolution, the neutrality observed by them after the French war, and treaties solemnly made and repeatedly ratified, were considerations which influenced the directory to the resolution of converting Switzerland into a subordinate republic." The expression should have been, that "these considerations were not sufficient to deter the directory, or to procure from the republicans of that day a regard to the laws of justice, when opposed by the claims of convenience or the demands of ambition." Honour, and a sense of the advantages to be derived from an alliance with the cantons, had prevented the kings of France from entertaining views of hostility against them; but the republicans, from the beginning of their triumph in Paris, had used every exertion to give activity to their disorganizing doctrines among the peaceable, industrious, and inoffensive, people of Helvetia. While the fear of increasing the number of her enemies rendered prudence necessary, France observed a temporary conduct; but even in this interval the agents of the Helvetic directory had never intermitted the talk of inflaming the public passions by defects and imperfections in the various governments of the cantons, and extolling a system founded on general representation, universal suffrage, and the rights of man. These considerations were not without profelytes; and the spirit of the French was inflamed with the hope of exciting popular revolts in a country in which none was more equitably governed. When an insurrection took place in one canton, its government was frequently the occasion of soliciting the aid of the government of an adjoining canton, or even of the neighbouring monarchs of France or Sardinia, to enable it to subdue its own rebellious subjects. A dangerous precedent was thus established; and, as the French kings had formerly interfered in favour of the rulers, the republican directory now interfered in favour of the subjects. The canton of Berne was sovereign of the territory called the Pays de Vaud, in this district discontent had always existed; and an insurrection, under the countenance of the French republic, broke out towards the end of the year 1797. The government of Berne saw the dangerous nature of its own situation; and on the 5th of January, 1798, issued a proclamation, commanding the inhabitants of the canton of Berne to assemble in arms, and to employ their strength to defend the personal and political rights of allegiance, and to reform every abuse that might appear to exist in their government. A commission was at the same time appointed by the senate or sovereign council at Berne to examine all complaints, and to redress all grievances. The proceedings of this commission, however, did not keep pace with the popular impatience; and the insurgents began to seize the strong places in their country. The government of Berne now resolved to reduce them by force, and sent troops against them; but their commander Weifs appears to have acted with much hesitation, if not with treachery. In the mean time, a body of French approached under General Menard, with a view to effect the fall of the hussars, with a message to General Weifs. On the return of the messengers, an accidental affray took place, in which one of the hussars was killed. This event was converted into an unpardonable agitation; the canton of Berne vainly protested and offered satisfaction; the French would not listen to terms; but, inundating the Pays de Vaud with troops, declared it independent of the republic under their protection. Amid fluctuating councils, and gloomy intervals of defection and deposition, illuminated only by transitory flashes of courage and public spirit, the government of Berne saw their legal authority flpping from their grasp. The avowee of this iniquity, general Menard, and a number of patriots, explored them insidiously to take measures of greater vigour,
vigor, and more energetic decision; they hoped to conciliate France by partially adopting the plans of reform suggested by the directory; and the sovereign council, anxious to preserve their ancient constitution, by convening fifty delegates to give advice in the present emergency and assist in new modelling the government. These new affiliates appointed a committee to frame within a year improvements in the constitution conformable to the spirit of the times; but the people received the decree with indifference, the ideas of the party of traitors were not satisfied, and intrigue was all respect being considered only as a provisional committee.

Berne soon afterwards relinquished its claims on the Pays de Vaud, and made overtures of conciliation to the directory and to Mengaud; but, a peremptory menace informed them that the proceedings of France had no other object than to overthrow a vicious and corrupt government, and substitute one more conformable to those of the Cisalpine and French republics, such a measure being necessary to their safety and tranquillity; and required the establishment of a provisional council, from which all the old magistrates should be excluded. The government dispatched a mission to general Brune, who had succeeded Menard in commanding the French forces, deprecating the interference of a foreign power, and soliciting permission to make only a partial reform; and the general expressing either instructions or reinforcement were sent to Berne, was countenanced by assurances of a truce of fourteen days. In this awful intermediate state, the government and their officers were dissatisfied with the two parties in Berne; a proposition for a temporary dictatorship to be exercised by the avoyr Steiguer and four others, which alone could save the country, was rejected; but, as the cloze of the armistice approached, a greater portion of public spirit was manifested; the representation of Steiguer and general Erlach were attended with greater effect; twenty thousand militia were enrolled, and religious ardour blended itself with the feelings of patriotism. Great numbers who defected from the Pays de Vaud were incorporated in a regiment called the faithful legion; the forces of Soleure and Friburg ranged themselves under the standard of Berne; and the command was entrusted to general Erlach, lord of Hindelbank and member of the sovereign council, a veteran distinguished for skill and courage; and, who had attained a high rank in the service of the king of France. Accompanied by eighty officers, he repaired to Berne, the friends of France had excited insubordination among the troops, by afflicting, that divided the army; the government and their officers were divided by what seemed to betray them; a charge utterly false, but to which the preceding and subsequent conduct of their rulers gave great appearance of probability. Erlach had, with difficulty, succeeded in composing these tumults, and animated his troops by announcing his renewed powers to execute his original plan of attack, when the icebe government of Berne countermanded the order, and opened a new conference with Brune. The soldiers, many of whom had actually marched to the attack, burnt with indignation; they considered the reports propagated by the French as undeniable; great numbers quit their standards, and Erlach, obliged to act on the defensive, awaited with solicitude the event of the negotiations. Even the account of that event, through negligence or treachery, was withheld; and Brune, after rejecting the ultimatum of the council, advanced to the gates of Friburg, and surprized the important posts of Lengnau and Grange, the generals were without concert, the officers were divided; the government extorted from the council an order which they spoke to obey, and Erlach only learned the renewal of hostilities by the defeat of his right and left wings.

These events were produced by extraordinary circumstances. General Graffenreid, who commanded the right of the Swiss stationed at Buren, expecting to be attacked on the expiration of the armistice, made dispositions for defence; when an intelligence arrived from the French general Schawembourg, with information that the representatives of the cantons of Berne, Soleure, and Friburg, were arranging an accommodation with general Brune. Graffenreid, believing the intelligence, ordered his subordinate officers at Lengnau and the place to abdicate from hostilities; but a council of officers at the latter place, suspecting deceit, considered it most prudent, even if negotiations were renewed, not to place implicit confidence in French faith; but to remain under arms. While they were debating on this subject, a French officer taken near the advanced posts of Lengnau and Grange, informed the government of the arrival of French generals, and that Schawembourg had dispatched him to the post of St. Joseph, to prevent an attack which the French commander was instructed to make in that quarter at break of day; negotiations having been renewed with the three cantons, and an armistice concluded. The Swiss generals, dinged by these accounts, ordered their troops, who were fatigued with eight days' incessant duty, into their cantonal quarters;
tonments; and between three and four o'clock in the morning of the 2d of March, the French attacked their whole line from Dornec to Friburg, carried the post of Lengnau by surprize, and marched rapidly towards Orange. At this place, however, general Gibelin, who had been routed by the roar of the cannon at Langnau, met with twelve hundred men, an obdurate reed, and his defeat, against several thousands; but, after a conflict of six hours, was obliged to retreat, leaving the French at liberty to advance to Soleure.

Schawembourg summoned this town in terms of uncommon influence and ferocity, threatening, if the people did not immediately succumb to his lure, to strike off the heads of all the members of government, and, unless the town surrendered in half an hour, to reduce it to ashes, and put the garrison to the sword. While the magistrates hesitated on this barbarian summons, two pretended couriers, disguised in the livery of Berne, gaioped to the gates, and being admitted, publicly proclaimed that Berne had surrendered to Brune; the alarm became general; twelve hundred men, who were preparing to join Gibelin, dispersed; the French faction gained the ascendency; and Soleure capitulated.

On receiving intelligence of these events, Erlach concentrated his forces and hastened towards the capital; but, finding the army of Hetzi and every one of the country subdued, destroyed and annihilated, and the death of his beloved country, which alone could have given due effect to the services of his constituents, and rendered his followers furious. Printed papers were profusely distributed, accusing the officers of treachery; and the troops, agitated with alarm and enraged at the unprecedented circumstance of retiring in their own territory before a foreign army, committed all the excesses to which extravagant suspicion and hasty repentance gave birth. They mutinied, wounded and threatened to massacre their commanders, demanded new leaders, broke their officers and re-elected them, murdered two colonels, Stettler and Rhynier, and then, struck with remorse, returned to their duty. The militia, and large bodies of peasantry, whom the condition of their country had caused to assemble, refused to act with a body so disorganised; and Erlach, supported only by the left wing, who maintained a state of full obedience, occupied the strong posts of Neunec, Laupen, and Gummenen.

In the midst of these dreadful events, the French party gained a total ascendency at Berne: the populace tumultuously expelled the officials of the government, and established a new provisional regency, excluding those persons to whom Brune had previously objected. These changes were notified to the French general, and the new government offered to disband their army, provided he would quittance the posts he had occupied. The condition of their country had caused them to assemble, refused to act with a body so disorganised; and Erlach, supported only by the left wing, who maintained a state of full obedience, occupied the strong posts of Neunec, Laupen, and Gummenen.

The next day, the 4th of March, Berne had surrendered; the army of the people, consisting of thirty thousand men, was reduced to fourteen thousand men, in a state of insubordination, weakness, and irritation against their officers, while the contingents still flowed aloof. Erlach, though apprised of the difficulties and danger of his situation, prepared with this incompetent force to assail forty thousand Frenchmen; and, although he anticipated confusion and disorder among the French, he was not deterred by the great disparity of numbers, but made the most skilful dispositions, and performed the duties both of general and soldier.

At one in the morning of the 4th of March, general Rampon attacked Laupen, Neunec, and Gummenen, where, after a long contest, he was repulsed; and general Graffenried, having driven him with great loss beyond the valley of Neunec, was rapidly advancing to Friburg, when his career was arrested by a command to suspend hostilities, as Berne was in possession of the valley of Neunec, and the capitulation of the little cantons. The capitulation being forced, and Erlach, after being defeated in four desperate engagements by superior numbers, having been a fifth time vanquished under the walls of Berne, the French entered the city, and planted the fatal emblem of their atrocities, mihed the tree of liberty. The fury of the populace in Berne was restrained by the presence of an armed force; but the broken remains of the retreating army committed the most horrid excesses, affiliated several officers, and the two adjutant generals Kroufaz and Gumninoes.

Through these frantic hordes of disbanded soldiery, Steiguer and Erlach were hastening towards the mountains of Oberland, undaunted by defeat, and inspired with hopes of collecting his shattered forces to make another effort. Recognised by some ragging soldiers near Mufingen, between Berne and Thun, he was seized, bound, and placed in a cart; with an intention of conveying him to the capital; but another desperate band assaulted him, and, amidst reproaches and execrations, maceunied him with their bayonets and hatchets.

Although the directory had declared war against Berne, they had committed the people to their fate, and, in the fall of his country, he died at Augsburg, in December 1799, aged seventy-five. Erlach, after miraculously escaping from the repeated assaults of the enemy, was hastening towards the mountains of Oberland, undaunted by defeat, and inspired with hopes of collecting his shattered forces to make another effort. Recognised by some ragging soldiers near Mufingen, between Berne and Thun, he was seized, bound, and placed in a cart; with an intention of conveying him to the capital; but another desperate band assaulted him, and, amidst reproaches and execrations, maceunied him with their bayonets and hatchets.

Although the directory had declared war against Berne, they had committed the people to their fate, and, in the fall of his country, he died at Augsburg, in December 1799, aged seventy-five. The venerable Steiguer in disguise and a peafant, pass'd unknown through crowds of his enraged countrymen, and along roads infested with the light troops of the enemy, and reached the lake of Thun after a walk of five leagues; reproach'd himself, for a short time on the trunk of a tree, he crossed Mount Bruniz into the canton of Unterwalden, and found a refuge at Bregentz, in the Austrian territories. This venerable and intrepid patriot did not long survive the fall of his country; he died at Augsburg, in December 1799, aged seventy-five.

The next day, the 4th of March, Berne had surrendered; the army of the people, consisting of thirty thousand men, was reduced to fourteen thousand men, in a state of insubordination, weakness, and irritation against their officers, while the contingents still flowed aloof. Erlach, though apprised of the difficulties and danger of his situation, prepared with this incompetent force to assail forty thousand Frenchmen; and, although he anticipated confusion and disorder among the French, he was not deterred by the great disparity of numbers, but made the most skilful dispositions, and performed the duties both of general and soldier.

At one in the morning of the 4th of March, general Rampon attacked Laupen, Neunec, and Gummenen, where, after a long contest, he was repulsed; and general Graffenried, having driven him with great loss beyond the valley of Neunec, was rapidly advancing to Friburg, when his career was arrested by a command to suspend hostilities, as Berne was in possession of the valley of Neunec, and the capitulation of the little cantons. The capitulation being forced, and Erlach, after being defeated in four desperate engagements by superior numbers, having been a fifth time vanquished under the walls of Berne, the French entered the city, and planted the fatal emblem of their atrocities, mihed the tree of liberty. The fury of the populace in Berne was restrained by the presence of an armed force; but the broken remains of the retreating army committed the most horrid excesses, affiliated several officers, and the two adjutant generals Kroufaz and Gumninoes.

Although the directory had declared war against Berne, they had committed the people to their fate, and, in the fall of his country, he died at Augsburg, in December 1799, aged seventy-five.
the same fate. The confluence of your obstinacy shall be held out as an example to the whole world."

Intimidated by this threat, Schwitz and the upper district of Unterwalden complied with the injunction; but the chiefs of the Swif{s} directory, having been transferred to Lucerne, established. This was succeeded by a provisional government, which was first seated at Lucerne, and, on the progress of the Austrians in 1799, removed to Berne. When peace was established with the emperor by the treaty of Conflants, the French ambassador transmitted the plan of a new constitution; according to which, including the Grifons, was divided into seventeen cantons. Accordingly, by this constitution of 1801, the legislative authority was vested in a senate, composed of two landammans and twenty-three councilors. The executive power was lodged in a little council of four senators, in which each of the landammans prefeated, the resolutions of which were not to exceed 6000 livres. Each canton was governed by a prefect, nominated by the landammann, and was provided with its interior administration, which approved or rejected the projects of laws presented by the senate. By the conditions of eligibility, universal suffrage was abolished; and no perfon admitted to any public office, unless he was proprietor of land, or excelled an independent profession, and paid a contribution of 50,000 French livres, and the other landammann and four councilors 10,000 each. The salaries of the sena-

transpavent flowers, scenes no where else to be discerned in such perfection, and which must powerfully affect the imagination, the parent of the palms.

The languages of Switzerland are a dialect of the German; and the French is much diffused; but in the southern parts, bordering on Italy, the Valtelline, and other territories acquired from Milan, Italian is the common tongue. Among the Grisons in Engadino, and in some other parts, is spoken what is called the Romanisch, which seems immediately derived from the Latin, though the race which was scattered by the Rhone, has also a particular dialect; and at the city of Sion the French begins to be spoken, as it is also the prevalent language in that beautiful part of the canton of Berne called the Pays de Vaud. The language called the Vaudois appears to have been confined to the valleys of Piedmont.

Early monuments of Swiss literature, consisting as usual of chronicles and lives of saints, may be found in the Collection of Goldaffus. Since the restoration of letters, and the reformation of religion, Switzerland boasts of many eminent names, as the reformer Zwinglius, De Wart, or Vadiana, a native of St. Gal; Bullinger, who called himself Oporinus, the printer; Conrad Gesner; the noted Paracelsius, Turrlet, and Oferwald. Among the writers of the last century may be named Bernouilli, the mathematician, a native of Basle; Scheuchzer, the natural historian; Haller; John Gesner, the natural philosopher; Solomon Gesner, the poet; Jacquob Herbst, Hirzel, and Zimmermann, the linguist, Roufseau, and Necker, natives of Geneva; Lavater, the physiognomist; Euler, the mathematician; Court de Gebelin, &c. &c. There is an university of some reputation at Geneva, and another at Basle, with colleges at Berne, Zurich, and Lucerne.

Commerce and manufactures do not much flourish in Switzerland. Cattle are the chief produce of the country; and some of its cheese forms an export of luxury. The chief linen manufactures were at St. Gal. Printed cottons, and silks, also form considerable articles of trade.

The climate of Switzerland is deservedly celebrated as salubrious and delightful. From its southern position, considerable heat might be expected; but this, though sufficient to mature the grape, is tempered by the cooling gales from the Alps and Glaciers. When the sun descends beyond mount Jura, on a summer evening, the alpine summits long reflect the ruddy splendour, and the deep valleys often afford the appearance of burnished gold. The winter is however in some parts extremely severe; and the summer heat in the deep valleys inexpressibly oppressive. No country in the world surpasses this in diversity of appearance; the vail chain of Alps with enormous precipices, extensive regions of perpetual snow, and Glaciers that resemble seas of ice, are contrasted by the vineyard, and cultivated field, the richly-wooded brow, and the verdant and tranquil vale, with its happy cottages and crystalline stream. See the articles Alps and Glacier. Agriculture cannot of course be carried to great extent, but there is no defect of industry, and the grain seems sufficient for the domestic consumption. Barley is cultivated even to the edge of the glaciers; oats in regions a little warmer; rye in those still more sheltered; and spelt in the warmest parts. Yet in general the produce does not exceed five for one; and it has been necessary to support public granaries, to guard against deficiency. The country being principally inhabited by the chief dependant of the Swiss cantons, is poor; his cattle; and, the number being extraordinary, much land is laid out in winter forage, which might otherwise be productive of corn. A considerable quantity of lint or flax is also cultivated; and tobacco has been lately introduced. The best vines are those of the Pays de Vaud, the cantons of Berne and Schaffhausen, the Valtelline and the Vallais. There is also abundance of fruits, apples, pears, plums, cherries, and alberts; with nulberries, peaches, figs, pomegranates, lemons, and other productions of a milder climate. Nothing is wanting to clothing, which border upon Italy. The Vallais also produces saffron. But pastaumes forms the chief province of the Swiss farm; and the meadows are often irrigated to increase the produce of hay. In the beginning of summer the cattle are conducted to the accessible parts of the Alps, by cow-herds, who are called feu; the herdsman or shepherd, who either account to the proprietor for the produce, or agree for a certain sum. These herds also support many swine, with the butter-milk and other refuse. Scheuchzer, in his first journey to the Alps describes the numerous preparations of milk, which form the innocent but varied luxuries of the Swiss.

The rivers of Helvetia are numerous; and among the most sublime scenes of this country must be classed the sources of the Rhine and the Rhone, two of the most important rivers in Europe. If we eliminate their length of course through the Swiss dominions, the Rhine is the most considerable; and is followed by the Aar, the Reuss, the Limmat, the Rhone, and the Thur. See the names of these rivers in their proper places in this work.

Of forests there does not appear to be any semblance in Helvetia; and fince is the scarcity of wood, and even of turf, that the dung of cows and sheep is often used for fuel. See p. 112, vol. iii. p. 261, of the "Universal History." The lowest and warmest situations in Helvetia are the plains and broad valleys of Geneva, of Basle, of the Pays de Vaud, of the Valtelline, and the Vallais; in thefe we meet with numerous vineyards, and the trees and plants of the south of France, and of Italy. The walnut, the chestnut, the fig, the pomegranate, the bay, and the laurel, are the most characteristic among the trees; the lavender, crenat origany, hylophil, fraxinella, rue, several kinds of cistus, and peony, are some of the chief of the herbaceous plants and lower shrubs. The valleys that open towards Italy contain, besides, a few plants that are not found in other places; such as the luce, the caper-bush, the almond, the Indian fig, and the American aloe.

The horses of Helvetia are esteemed for vigour and spirit; and the cattle often attain great size. Among the animals peculiar to the Alps may be first named the ibex, bouquetin, or goat of the rocks. This animal resembles the common goat; but the horns are extremely long, and thick, and of such strength as to save them when driven in headlong descents from the precipices. The chase is dangerous, and exposed to many accidents. See Capra ibex, vol. ii. p. 772. Another singular animal is the chamois, the antelope rupicapra; see the same vol. and page. The marmot is common in the Swiss mountains; in summer they feed on alpine plants, and live in societies, digging dwellings in the ground for summer, and others for winter. About the beginning of October, having provided hay, they retreat to their halls, where they remain torpid till the spring. The skin of this little animal is used for furs. The mouffon or tawny owl, is found in the Alps. The ibex may be tamed, and shows considerable docility. The size is between that of the rabbit and the hare. See Auctonymis marmota, vol. ii. p. 139. Among alpine birds may be named the vulture, called also the golden or bearded vulture. The head and neck being covered with feathers, it might be called with the eagles, were it not for the form of the body, which is too near the shape of the Swiss cow; for the female is a much smaller bird than the male, forming its nest in inaccessible rocks, and preying on the chamois, white hare, marmot, and sometimes on kids and lambs. Among alpine birds may also be named the red-legged crow. The lakes of Helvetia have few peculiar fish.

The mineralogy of this interesting country is not so important
important as we might be led to infer from its mountainous character. Some of the streams wash down particles of gold, as the Rhine, the Emmat, the Aar, the Reufs, the Adda, and the Goldbach. Mines of silver are mentioned; but the places are not specified. Copper and lead are also found; but the chief mines are those of iron in the country of Sargans. In the canton of Berne there are valuable quarries of rock-cryftal, which perhaps the chief and of various dimensions, that hand the fierceft fire. Oolites of grey lapis ollaris, which has been long wrought into pieces as to weigh seven or eight hundred weight. The calcareous parts of the Alps often present beautiful fouth of the Pyrenees. In ridges running north and falt; and it is faid that coal and native fulphur are not unknown. But the grand stores of minerals are in Piedmont, and the southern sides of the Alps; as in Hungary they are in the south of the Carpathian mountains; and the richest minerals are also found in the four Pagi or cantons. In his youth, the author received the care of his education in his father’s house; and when he was of a proper age, was sent to the college of Louis the Great. In this seminary, by discovering marks of superior genius, he acquired the eftee of father Charles Poree, professor of rhetoric, who paid a particular attention to his education. By the progress which he rapidly made in science and literature, in wit and amiable manner, he became a favourite of the moft distinguished literary characters of his time. His firft literary productions confifted of Epiftles on Happinefs, which received no small applause; and even Voltaire complimented the talent which they discovered in the author, for composing didactic poetry. In 1760, having been the fpecimen of the world his celebrated work, entitled De l’Esprit, &c., which was condemned by the parliament of Paris, as derogatory to the nature of man, by confining his faculties to animal fenfibility, and as having a tendency to destroy the difficulties between virtue and vice. That procription, however, like similar attempts to crush principles by force, and not by argument, instead of leading to its fupport, occafioned it to be fought after with avidity, not only in France, but in other countries. In order to withdraw for a time from the fury of his enemies which this publication had called forth, he paid a visit to England in 1764; and in the following year went to Pruffia, where he was received with particular attention by Frederic the Great, lodged in his palace, and admitted into his familiar parties. Upon his return to France, he spent his time occasionally at his houfe in Paris, and on his domain at Vore, in the neighborhood of Sargans, to which the visitors palled through a long narrow chasm, by a passage extremely dangerous. To the south-east are the baths of Alvenew, which are fulphurous, and resemble Harrowgate water. In short, Helvetia profefles every thing within itself, that can be requisite for the health, the comfort, or the happiness, of man.

HELVE'TI, a people of Belgica, in the neighborhood of the Allobroges and the Provincia Romana; famed for bravery, and a turn for war. Called Civitas Helvetia, and divided into four Pagii or cantons; situated to the west and south of the Rhine, by which they were divided from the Germans; and extending towards Gaul, from which they were separated by mountains on the west, and by the Rhodanias and Lucus Lemanus on the south, and therefore called a Gallic nation. Tessin, Safar, Stroho, Pulteney, Piny. Formerly a part of Celtic Gaul, but by Augustus assigned to Belgica.

HELVE'TIUS (Claud-Adrian), a French philofo-
viable in them, depends on the various circumstances in which they are placed, and the different education which they receive. The fourth effay treats of the different faculties, or rather of the different qualifications, of the mind; the effects of those respective faculties are variously combined. The principles advanced in this work are maintained, and further extended, in A Treatise on Man, his intellectual Faculties, and his Education, in two volumes octavo, which did not make its appearance till after the author's death; for which he assigns this reason: "had he published this book in his lifetime, he should, in all probability, have exposed himself to perfection, without the prospect of any personal advantage." In both these works, he has displayed great ingenuity and taste, a very extensive knowledge of human nature, an exquisite turn for exposing the foibles of mankind, and many jocund and instructive remarks; but he has also advanced hypotheses which appear to be highly paradoxical, whimsical, and delusive: whence they have been called "the paradoxes of Helvetius." In 1772 was published his work intitled, Happiness, a Poem, in six Cantos, with Fragments of some Epistles, 12100. But, instead of making happiness to result from virtue, this poem is intended to show that great ingenuity and taste, a very extensive knowledge of human nature, an exquisite turn for exposing the foibles of mankind, and many jocund and instructive remarks; but he has also advanced hypotheses which appear to be highly paradoxical, whimsical, and delusive: whence they have been called "the paradoxes of Helvetius." HELMERSLY, a seaport town of Holland, on the south side of the island of Voorn, with a good harbour, about twelve miles from the open sea, in the middle of a large bay, capable of holding the whole fleet of the country, twelve miles from the Hague, and built on a hillock, but well defended with strong fortifications; this, in times of peace, is the general port for packets from England: twelve miles west of Dort, and fifteen south-west of Rotterdam. Lat. 51° 48' N. Lon. 23° 35' E. Ferro.

HELOT (Peter), a French Roman-catholic divine, born at Paris in 1660. He embraced the ecclesiastical life in the year 1682; and in the course of his mission he made two journeys to Rome, and visited the whole of Italy. In that country he made considerable progress in preparing for the press an extensive and laborious work, entitled A History of the monastic Orders, religious and military, and of the fecular Congregations of both sexes. Having employed himself for more than twenty-five years on this work in Italy, he returned to France, where he was successively chosen to fill the post of secretary in three provinces of his order. These situations furnished him with the opportunity of collecting additional materials, and of finishing the composition of his work. In 1714 he began to print his History, in quarto, the fourth volume of which was printed in the same year, in 1716, when about fifty-six years of age. Four other volumes of this work were afterwards printed, under the inspection of Father Maximilian Bullot. This performance is held in much estimation, on account of the learned research which it displays. An abridgment of it was published at Amsterdam, in 1721, in 4 vols. 8vo.

Pater Helyot was also the author of some devotional pieces, and of A View of the dying Christian, 12mo, which has undergone various impressions.

HELWICK HEAD, a cape of Ireland, in the county of Waterford, on the south point of the entrance into Dungarvan Bay. Lat. 52° 2' N. Lon. 7° 32' W. Greenwich.

HELXINE. See Convolvulus, Peritaria, and Polygonum.

HELZSTADT, a town of Germany, in the circle of Sundenburg, in the duchy of Holstein: three miles north of Meldorp.

HEM, f. [hem, Sax.] The edge of a garment doubled and sewed to keep the threads from spreading. Rowlandson.

HEM, s. [from the Greek, adj.] That which is doubled of even cloth, white and gentle, without hem, or seam. Wifeman's Surgery.

HEM, v. a. To close the edge of cloth by a hem, or double border sewed together. —To border; to edge: Hemmcn, hem, or (earn. Wifeman's Surgery.

HEM, n. hem. [from the Greek, adj.] A man's name.

HEMATITES. See Hematites.

Vol. IX. No. 595.

HEMEDA, a town of Persea, in the province of Irakia: twenty-eight leagues east of Iliphnan.

HEMELAR (John), an eminent antiquarian, and canon of Antwerp, in the seventeenth century. He was born at the Hague, and wrote a work, entitled, Synopsis Nominastrum imperatorum Romanorum et Jobi Cefarum et Herocliaum; which is very scarce, though it has passed through several editions.

HEMENGSTEDE, a town of Germany, in the duchy of Holstein: three miles north of Meldorp.

HEMERALOPIAS. f. [Greek; from Ἐμεραλέω, a day, and φερ, to carry.] A disease of the intestines, which consists in being able to see in the day-time, but not in the evening: in opposition to nerezimnia, wherein the patient can see only by candle-light.

HEMEREUSIS. adj. [Greek; from Ἐμεραλέω, a day.] Daily; returning every day.

HEMERIS. f. [Greek; from Ἐμεραλέω, a day.] A simple fever of one day's continuance.

HEMEROBAPTISTS, f. A sect among the ancient Jews, thus called from their washing and bathing every day, in all seasons; and performing this ablution with great solemnity, as a religious rite necessary to salvation. Epiphanius, who cites this as the fourth heresy among the Jews, observes, that in other points these heretics had nearly the same opinions as the Scribes and Pharisees; only that they denied the resurrection of the dead, in common with the Sadducees, and retained a few other of the schisms of those latter. The facts which pass in the East under the denomination of Sabians, calling themselves Menednd Iahh, or the disciples of John, and whom the Egyptians entitle the Christians of St. John, because they yet retain some knowledge of the gospel, is probably of Jewish origin, and seems to have been derived from the ancient Hemerobaptists; at least it is certain, that the person of John, whom they consider as the founder of their sect, bears no sort of similitude to John the Baptist, but rather resembles the person of that name whom the ancient writers represent as the chief of the Jewish Hemerobaptists. These ambiguous Christians dwell in Persia and Arabia, and principally at Basra; and their religion consists in bodily washings, performed frequently, and with great solemnity, and in ceremonies which the priests mingle with this superstitious service.

HEMEROBIUS, adj. [from the Greek, a day, and Live, life.] Possessing life only for one day.

HEMEROBIUS, f. [from the adj.] In entomology, a genus of insects of the order neuroptera. This genus is distinguished by having the mouth armed with two teeth and four palpi; the wings hang down, without being folded; the antennae are ficateous, advanced before the head, and longer than the thorax, which is convex.

Nature seems to have spread plant-lice, aphides, upon almost every plant for the maintenance of thousands of her offspring. In their larva state, the hemerobies are great devourers of the plant-lice; and from that circumstance they have obtained the name of lions of plant-lice. Even after their transformation, the hemerobies retain their carnivorous habits: not satisfied with making war upon plant-lice, who tamely suffer themselves to be devoured, they do not spare those of their own kind. The moment these insects enter a life, they find themselves, by the precaution of their ancestors, situated among thousands of small animals, which, without any effort, they destroy. In less than a minute after the plant-louse has been seized, the whole viscer are sucked from its body. Some species make a covering for their body of the carcasses which they have thus employed, and carry them about as trophies upon their backs. The eggs of the hemerobius offer a curious spectacle to the observer, and for a long time were deemed
Hemerobiid plants. Each of them is supported upon a long pedicle, resembling the stalk of a plant, of which the egg appeared to be the flower. In this form they are seen in clusters upon the leaves of the lime-tree in particular, where, as soon as they are hatched, they find sufficiency among the surrounding plant-lice. In about fifteen days, the larva attains to its full growth, when it weaves to itself a small white dok, or a cocoon, in a clove texture: there the hemerobius lodges about three weeks, till its metamorphosis into a winged animal is completed: if, however, the cob has not been spun till autumn, it remains in it till spring, when it is transformed. The flight of these insects is slow and heavy; some of them have an excrementitious smell. They are, however, not disagreeably infested. The species are thirty-eight in number, in two divisions.

HEM 337

31. Hemerobius quatuor-punctatus: wings white with four black dots at the base, the tip radiate with brown. Head and thorax black; antennae abdomen and legs pale. Inhabits about Kiel, in southern Europe, and in the British Islands.

32. Hemerobius abdominalis: wings white, upper-pair with faint dusky bands; antennae white. Inhabits Upland, eastern Europe.

33. Hemerobius melanostictus: yellowish; wings hyaline varied with blue and gold, the nerves whitish dotted with black, the margins with minute black dots. Inhabits Europe.

34. Hemerobius fulvus: yellow; mouth blood-red each side. Inhabits Europe.

35. Hemerobius vericolor: yellow; wings hyaline varied with blue and gold, base of the abdomen beneath and the yellow parts yellow; the abdomen yellow, the legs yellow.

HEMEROCLALIS, f. [Gr. from ἡμέρα, a day; and καλός, beauty; a plant whose flower is the beauty of a day.] The DAY-LILY; in botany, a genus of the clafs hexandria, order monogynia, natural order of lilac or lilacées. (coronariae, Linn. narcisii, Juf.) The generic characters are—Calyx: none. Corolla: six-parted, bell-shaped, tube short, border equal spreading, more reflex at top. Stamina: filaments free, stamens dividing inward, to form a staminal ring. Pistillum: germ furrowed, superior, style filiform, the length and situation of the stamens; stigma obtusely-three corollas. The plant is herbaceous, with a short tuber, like those of the asphodel, from which come the flowers of this plant.

Species. 1. Hemerocallis flava, or yellow day-lily: leaves linear-falvate keeled; corollas yellow. The flower has strong fibrous roots, to which hang knobs, or tubers, like those of the asphodel, from which come our ordinary day-lily. The leaves are not fully so large, nor the flower so great or fine, as those of the former, turning back toward the top. The flower-stalks are as thick as a man's finger, and rife near four feet high; they are naked, without joints, and branching at the top, where there are few or large copper-coloured flowers, varied like those of the red lily, and as large. The flanks of this fpecies are longer than those of the other, and their flowers are charged with a copper-coloured farina, which sheds on being touched. These flowers never continue longer than one day, but there is a succession of flowers on the same plants for a fortnight or three weeks; it flowers in July and Auguft. Thit, says Linnaeus, seems to be specifically different from the foregoing, though no real difference is discovered; it is larger in fize, the coroll is copper-coloured, and the flowers appear later. То the differences we may add, that the flowers of the foon have little or no fiume, whereas those of the fioa are very fragrant; that the former are much shorter, and that they are seldom or never succeeded by seed; whereas the flava generally produces ripe seed. Certainly none of these circumstances can be admitted as genuine specific differences; and yet it is remarked by Mr. Curtis, that, when the feveral characters in which the foon differs essentially from the flava, would not constitute half its beauty, that Linnaeus could entertain an idea of their being varieties of each other. He observes, that the leaves of this fpecies, on their first emerging from the ground, and for a considerable time afterwards, are of the most delicate green imaginable; that the appearance which the plant affumes at this period of its growth is indeed so pleasing, that half a plant would be twice the fize of thofe of the flava, of a tawny orange colour, without glofs or fiume, the petals waved on the edge, and the flowers rarely or never preceded by ripe capsule. But in judification of Linnaeus's opinion, professor Martyn, the editor of Miller's Dictionary, relates the curious results of an experiment communicated by Mr. Welch, of Ardenham, near Aylingham in the year 1788 he removed feveral plants from Hampstead to a new garden he was then making in Buckinghamshire. The foil was a fift clay manured with pond-mud, fand, and dung, in some parts; in others, it was a compoft formed of the ruins of buildings and limeftones, mixed with a mould produced from a variety of animal and vegetable fubfances. The plants were flerily placed in the clayey foil. Among them was a single plant of Hemerocallis fulva. The succedding year the fpecies divided this plant, and put part of it in a shallow bed of the compoft formed from the ruins, &c. It flowered in July, fo that the flower was able to take another part of the plant, and the fame fummer it fent it in the fame fede. When the flower had fully opened, the plant was turned on its side, and the fpecies of Hemerocallis flava, which it was propofed to be, was not pofeffed of till it was thus produced by accident. The year after, the plants in fize and colour, large and of a deep tawny hue, small and absolutely yellow, and also of a pale tawny, and of a fize between funa and flava. The change of colours in flowers occafioned by removing plants into a foil of a different nature, is a circumstance well known to florists. Its natural growth was not known to the old botanifs. Linnaeus makes it to be a native of China. Father Loureiro says it is cultivated there and in Cochinchina, but does not affirm that it is a native. Thunberg afferts it among the Japanese plants in these words: "Of the plant fusa, it is/type culta: "It grows there; others, of course, cultivated." In the Catalogue of the royal garden at Kew, it

2. Hemerocallis fulva, or copper-coloured day-lily: leaves linear-falvate keeled; corollas tawny or copper-coloured. This is a much larger plant than the flava, and the roots spread and increase so fast therefore it is not proper for small gardens; the roots have very strong fibrous fibres, to which hang large oblong tubers. The leaves are near three feet long, hollow like thofe of the former, turning back toward the top. The flower-stalks are as thick as a man's finger, and rife near four feet high; they are naked, without joints, and branching at the top, where there are few or large copper-coloured flowers, keeled like thofe of the red lily, and as large. The flanks of this fpecies are longer than thofe of the other, and their flowers are charged with a copper-coloured farina, which sheds on being touched. These flowers never continue longer than one day, but there is a succession of flowers on the same plants for a fortnight or three weeks; it flowers in July and Auguft. This, says Linnaeus, seems to be specifically different from the foregoing, though no real difference is discovered; it is larger in size, the coroll is copper-coloured, and the flowers appear later. To these differences we may add, that the flowers of the foon have little or no smell, whereas thofe of the flava are very fragrant; that the former are much shorter, and that they are seldom or never succeeded by seed; whereas the flava generally produces ripe seed. Certainly none of these circumstances can be admitted as genuine specific differences; and yet it is remarked by Mr. Curtis, that, when the several characters in which the foon differs essentially from the flava, would not constitute half its beauty, that Linnaeus could entertain an idea of their being varieties of each other. He observes, that the leaves of this species, on their first emerging from the ground, and for a considerable time afterwards, are of the most delicate green imaginable; that the appearance which the plant affumes at this period of its growth is indeed so pleasing, that half a plant would be twice the size of thofe of the flava, of a tawny orange colour, without gloss or smell, the petals waved on the edge, and the flowers rarely or never succeeded by ripe capsule. But in judification of Linnaeus's opinion, professor Martyn, the editor of Miller's Dictionary, relates the curious results of an experiment communicated by Mr. Welch, of Ardenham, near Aylingham in the year 1788 he removed several plants from Hampstead to a new garden he was then making in Buckinghamshire. The soil was a stiff clay manured with pond-mud, sand, and dung, in some parts; in others, it was a compost formed of the ruins of buildings and limestones, mixed with a mould produced from a variety of animal and vegetable substancess. The plants were first placed in the clayey soil. Among them was a single plant of Hemerocallis fulva. The succeeding year the species divided this plant, and put part of it in a shallow bed of the compost formed from the ruins, &c. It flowered in July, so that the flower was able to take another part of the plant, and the same summer it sent it in the same bed. When the flower had fully opened, the plant was turned on its side, and the species of Hemerocallis flava, which it was proposed to be, was not possessed of till it was thus produced by accident. The year after, the plants in size and colour, large and of a deep tawny hue, small and absolutely yellow, and also of a pale tawny, and of a size between flava and flava. The change of colours in flowers occasioned by removing plants into a soil of a different nature, is a circumstance well known to florists. Its natural growth was not known to the old botanists. Linnaeus makes it to be a native of China. Father Loureiro says it is cultivated there and in Cochinchina, but does not affirm that it is a native. Thunberg afferts it among the Japanese plants in these words: "Of the plant flava, it is/type culta: "It grows there; others, of course, cultivated." In the Catalogue of the royal garden at Kew, it
is called a native of the Levant. Does not this uncertainty favour the idea of its being rather a variety than a distinct species? In Japan it varies with a double flower, and with variegated leaves. In China and Cochinchina the inhabitants boil the flowers, both fresh and dry, commonly with their meat.

3. Hemerocallis lancifolia, or lance-leaved day lily: Native of Japan, and frequently kept in gardens and hothouses, for its elegance; flowering in autumn and September.

5. Hemerocallis cordata, or cordated day-lily: leaves heart-shaped, veined. Stem round, upright, smooth, a foot high or more. Gartner doubts whether this be a genuine species of Hemerocallis, since it differs so much in the fruit. It is a native of Japan, and frequently cultivated there.

**Propagation and Culture.** These plants are easily propagated by offsets, which the roots send out in plenty; they may be taken off in autumn, that being the best season for transplanting the roots, and planted in any situation, for they are extremely hardy, and will require no other culture but to keep them clean from weeds, and to allow the morn room that their roots may form the first foot may also be propagated by seeds, which if sown in autumn, the plants will come up the following spring, and these will flower in two years; but, if the seeds are not sown till spring, the plants will not come up till the year after. In a mild soil and a shady situation they thrive better than in dry ground. From their flowers are the great increase of their roots, especially in the second foot; they are most proper for large gardens and plantations. See Alstroemeria, Lilium, and Pancratium.

**HEMEROCA LLIS LILLIAL STRUM.** See Anthurium.

**HEMEROCA LLIS DRO MOLI, f.** [of ἑμερόκαλλις, Gr. day, and ἐπόμενος, coming after.] Among the ancients, centuries or wards,Signifies the same. The Greeks retrenched the last syllable of the word in the composition of words; inches in length, when most luxuriant; they grow in woods of Jamaica.

**HEMEROGLIUM, f.** [from ὑμερόκαλλις, Gr. day, and ἅγιος, a word.] A diary, a book into which the actions of every day are entered.

**HEMERTROPHI S, f.** [of ὑμερόκαλλις, Gr. day, and τρόπος, fashion, measure of capacity, the land.] It was so called from its holding one day's food.

**HEMG, a river of China, which runs into the Kincas; twelve miles south of Ma-hou, in the province of Se-tchen.**

**HEM, a word used in the composition of divers terms. It signifies the fame with fent or ven, viz. σαμάν, to cut.] In surgery, a bandage for the back and breast; so named because it was cut half-way down.

**HEMICYCLE, f.** [hemicyclicum, Lat. of ὑμερόκαλλις, Gr. half, and ὅμοιος, circle.] A semicircle, or half round. It is particularly applied in architecture, to vaults in the cradle form; and arches or sweeps of vaults, constituting a perfect semicircle. The ancients had a port of fun-dial, called hemicyclicum, which was a concave semicircle, the upper end or apex of which was fixed to the north. It had a style or gnomon standing from the middle of the hemicycle; whereas that point corresponding to the centre of the hemicycle represented the centre of the earth; and its shadow projected on the concavity of the hemicycle, which represented the space between one tropic and another, the sun's declination, the day of the month, hour of the day, &c. **HEMIDRACHMon, f.** [from hemi and drachmon.] The half-drachmon.

**HEMIMÉRIS, f.** In botany, a genus of the class di- dynamic, order angiosperma, natural order of peronatae, (leropulollaris, Juss.) The generic characters are—Calyx: perianthium one-leaved, five-parted almost to the base, much shorter than the corolla; parts unequal, permanent. Corolla: monopetalous, wheel-shaped, ringent; tube very short, (scarce any,) united, white. Upper lip cloven, with a kind of bag at the base, composed of little nectarous pits; lower concave, blunt. Stamina: filaments two or four, filiform, inserted into the base of the lower lip, bent round; antherae very small, heart-shaped cohering, yellow. Pericarpium: capsule ovate, sharp, twin, gibbous, at the base one side, two-celled, two-valved. Seeds: very many, smooth. Allied to Antirrhinum, but differing in the form of the corolla.—

**Species.** 1. Hemeris fabulosa, or sandy hemeris: pointed for the security of cities and their suburbs; leaves alternate and opposite, pinnatifid; Item dracémon, half, and 2. Hemionitis lineata, or lineated mule-fern: fronds lanceolate quite entire. The leaves are half, and after their example, we have done the same in most tufts from a strong fibrous root. The plant is commonly afflicted with the hemierania. 

**HEMIOB'LIA, f.** [from Gr. a day, and οἶλα, oil.] A diary, a book into which the actions of every day are entered.

**HEMIOBUR'G, f.** [from οἶλα, oil, and οἶλος, oil.] Half an obolus, or the twelfth part of a drachm, i.e. five grains.
hemorrhoidal veins, and fluxes of rheum.

Besides there are hemorrhages from the nose and hemorrhoidal veins.

The medical term for that kind of fever which consists of intermitting tertian and a continual pause is required at the end of each or half-verse.

In surgery, a bandage which goes half way up the arm was fixed.

Brown.

In the ancient music, the same with Hemistich.

Hemorrhoids.

Hemorrhoidal veins, and fluxes of rheum.

Belonging to the veins in the fundament.—

Hemorragy, f. [hemorrage, Gr. hemorrhoids, Fr. hemorrhoides, F.] A violent flux of blood.—Twenty days fasting will not diminish its quantity so much as one great hemorrhage. Arbuthnot.

Hemorrhoids, f. [as excreta, Gr. hemorrhoids, Fr.] The piles; the enemids.

Hemorrhoidal, adj. [hemorrhoidale, Fr. from hemorrhoid.] Belonging to the veins in the fundament.

Besides there are hemorrhages from the nape and hemorrhoidal veins, and fluxes of rheum. Ray.

Embost upon the field, a battle flood of leeches, spouting hemorrhoidal blood.

Earth.

Hem's 'mott, or Ha's'moth, [Hebrew.] The name of a city.

Hemp, f. [hampe, Sax. kamp, Dut.] A fibrous plant, of which coarse linen and cordage are made.

For its natural history, see under its generical name Cannabis, vol. iii. p. 730-732. Though hemp is become so valuable in modern commerce, we find but few notices of it in antiquity. M. Mongez, of the French National Institute, while employed in researches respecting the costume of the ancients, endeavoured to discover and describe the different substances which they employed for their veiments, arms, &c. Particular reasons induced him to detach from his work an essay on hemp, to which the ancients made great use, under the name of hemp, to which Homer do not mention this vegetable. Herodotus says, that it resembles flax, from which it differs only in size.
and in height. The appearance of these two plants, however, is marked with such a striking difference, that the father of history, since he speaks so incorrectly, must have never seen hemp. He nevertheless tells us, that the Thracians procured from the northern countries of Europe the hemp which they employed to make their vessels and for their veils; Arieophanes speaks of a hemp-merchant; and we know that the Greeks used hemp for cordage, and for caulk ing their vessels. But they did not then cultivate this production, for it is not mentioned by Theophrastus; and Hiero procured hemp from the northern countries of Europe; that is to say, from the banks of the Rhine, or Rhunu, which runs into the Volta, and which he calls, improperly, the Bridamus. It is still from Russia and Livonia that Europe is supplied with hemp. It is very probable that it was not cultivated by the Greeks till about the commencement of the Christian era. The Romans, like the Greeks, employed it for Substance for cordage, and for caulk ing their vessels; but neither of them manufactured felt-cloth of it, if we are to judge from the Greek and Roman writers whose works have been preserved. In the 15th century, and the following ones, hempen cloth became very common in the middle and southern parts of Europe. There can be no doubt that the remains of the hemp which was employed with wool or flax, or hemp, then introduced into Europe, contributed to preserve the ancient authors whose works were effaced; and that the same parchment might be employed for the books on the church and treatises of theology. In some ancient authors mention is made of torrefied hempseed, with the smoke of which barbarous nations got intoxicated; and the practice, till common in Egypt for the purpose of producing parchment, might be employed for the market. There being more of labour than of skill in the work of curing and cleaning hemp, were a large quantity to be produced in this country, the necessity of introducing machinery would be immediately bridged. At the prices hemp has hitherto been importable from Russia, no individual, it is true, has had sufficient encouragement to cultivate it in large quantities at home, with any view to profit, and it perhaps would have been bad policy, as long as Great Britain and Russia were upon good terms, for the former to have encouraged it and very heavily added duty on hemp, in the way of experiment. But now we are at war with Russia, the impolicy of such a measure is out of the question; and this seems a proper moment, therefore, for the legislature to adopt measures for the encouragement of individuals to cultivate hemp, which it would be absurd to suppose could not be done in this country in the interest of machinery. The present existing laws respecting hemp and flax are as follow: By Stat. 33 Hen. VIII. c. 17, None may water hemp or flax in any river, running water, stream, brook, or common pond, for the purpose of producing hemp, but only in their several ponds, &c. for that purpose, on pain of twenty shillings. By 15 Car. II. c. 15, Any persons may in any place or corporate town, privileged or not, put up manufactures of hemp or flax; and persons coming from abroad, using the trade of hemp or flax dressing, and of making thread, weaving cloth made of hemp, hemp or flax, or hemp, or flax with hemp or flax, for the purposes of commerce, shall have the privileges of natural-born subjects. With regard to the importation and exportation of hemp and flax from Ireland, &c. see flax, 7 & 3 Will. III. c. 39. 1 Anne, Stat. c. 8. 10 Geo. II. c. 26. and 19 Geo. III. c. 37. the last giving a bounty, and the others allowing importation duty-free. By 36 Geo. III. c. 49, and by 27 Geo. III. c. 13. bounties are granted for seven years of threepence per stone for hemp, and fourpence for flax, raised in England. The tithe of hemp and flax is, by 11 and 12 Will. III. c. 16, ascertained at five shillings an acre. For penalties on workmen embezzling it, see 2 Geo. IV. c. 17. £4. 3d. of labour, and the manufacture of hemp, flax, &c. &c. &c. 22 Geo. III. c. 27.

Hemp, Bastard, f. in botany. See Datisca.

Hemp, Virginian. See Acnida.

Hemp Agromy, See Equatorium.

Hemp Agrimony, Bastard. See Agcatam.

Hemp Agrimony, Water. See Lepens.

Hemp-Seed, f. The seed of hemp. Shakespeare puts this word into Mrs. Quickly's mouth as a term of reproach.—Do, do, thou rogue! do, thou hemp-seed. Hen. IV. P. II.

In foul reproach of knighthood's fair degree,

Of his neck a hempen rope he wore. 

Fairy Queen.

Hemsted, the name of two townships belonging to the American States, in Pennsylvania, the one in Lancaster county, the other in that of Westmoreland.

Hemstead, the name of a populous and considerable town of Hertfordshire, distant only twenty miles from London; has a market on Thursdays, and a fair on the Thursday after Trinity-Monday. It stands among hills, upon a small river called the Gade, seven miles west of St. Alban's, and five south-east of Berkhamsted. The church tower is the highest in the county, and is served with a tall spire, and a capital ring of bells. In the time of the Saxons it was called by the name of Nanhemstad, or Nain-hempested, i.e. High-Hempested; and, in William the Conqueror's time, by the name of Hemelamflede. Henry VIII., incorporated it by the name of a bailiff and corporation affluent, and empowered the inhabitants to have a common seal, and a pie-power-court during its market and fair. It has been reckoned one of the greatest markets for wheat in England, 20,000, a week being often returned in it only for meal. Eleven pair of mills stand within four miles of the place, which bring a great corn-trade to it.

Hemsekerck (Egbert), denominated the Old, a celebrated Flemifh painter of conversations; of whom, though so universally known, we have no information as to the time in which he flourished, or the school in which he was taught. By frequenting fairs, revels, and bawdy scenes, he acquired a surprizing talent of connecting expressive features in groups, with many of the humorous, but truly natural, circumstances of life. He was one of the Flemifh House of Commons, where beards are used to be worn. Hemsekerck (Egbert), designated by the title of the Young, was the disciple of Peter Grebber; but imitated the manner of Bloer and of the elder Hemsekerck. He was born at Haarlem in 1645, but settled at London.
London, where for a long time his works were esteemed, though now sunk in value. He had a whimsical imagination, and delighted in composing fanciful fugaces; such as the temptation of St. Anthony, nocturnal intercourses of witches and spectres, enchantments, &c., which he executed with a free pencil and a spirited touch. It was customary for him to introduce his own portrait and the inscriptions he designed.

HEMSTERHUIS (Tibberius), a learned critic, the son of a physician of Groningen, where he was born in 1685. He studied first in the university of that place, from whence he removed to Leyden, for the advantage of attending the lectures of Perizonius. In 1706 he was invited to the professorship of mathematics and philosophy in the school of Amsterdam. He quitted that situation in 1717, on being chosen Greek professor at Franeker, to which office was added the chair of history in 1739. Both these professorships were conferred upon him at Leyden in 1720. He died there in 1766, aged eighty-one. His earliest publication was an edition of the last three books of the Onomasticon of Julius Pol-lux, in 1706. His other publications were: 1. Select Dialogues, and The Timon of Lucian, 1701; part of an edition of the same author, which appeared in 1743, in 3 vols. 4to. 2. The Plutus of Aristophanes, with the Scholia and Notes, 1744. 3. Notes and Emendations on Xenophon Ephialtes, inserted in the Miscellanea Critica. 4. Observations on Chrubinsius's History on the Epistle to Philemon, in Raphelius's Annotations on the New Testament. 5. Inaugural Speeches. 6. Letters to I. M. Gefner and others. His criticisms are accounted excellent, both from the great extent of his erudition, and his facility in applying it. He Musé, f. A hunting term: a roe of the third year.

HEMYARITE, in ancient geography, one of a certain race of Arabian kings. See vol. ii. p. 2.

HEN, f. [Henne, Sax. and Dut. hahn, Germ. a cock.] The female of domestic poultry: One ancient hen the took delight to feed, The plodding pattern of the busy dame, Which ever and anon impelled by need, Into her school, begirt with chickens, came. She flew on.

The female of any land fowl,—The peacock, pheasant, and goldfinch, cocks have glorious, colours; the hens have not.

HEN'STERT, f. The place where the poultry rest. Many a poor devil flands to a whipping-post for the pillering of a silver spoon, or the robbing of a hen-roost.

HEN'SY, the name of a city of Assyria. 2 Kings, xxviii. 34. xix. 15.

HEN'ADAD, [Hebrew.] A man's name.

HEN'ANBI'EN, a town of France, in the department of the North Coasts, and chief place of a canton, in the district of Lamballe; two leagues and a half north-east of Lamballe, and four and a half north of Dinan.

HEN'A'O (Gabriel de), a learned Spanish Jesuit, born in 1611. He entered into the order at Salamanca, and spent the greatest part of his life in that university. After teaching philosophy and theology, he was admitted to the degree of doctor of divinity, and appointed rector of the university. He discharged the duties of his post with great reputation, and was considered as one of the most learned men in Spain. His works consist of eleven volumes folio, all in the Latin language. Nine of them comprise treatises on philosophical, theological, and controversial subjects. There were also many other smaller pieces published by this Jesuit, who died in 1642, when about ninety-three years of age, after having continued to officiate as professor till within three years of that event.

HEN'A'RES, a river of Spain, which rises near Siguenza, in Old Cadiz, and runs into the Xarana ten miles above Toledo.

HEN'AULT (Charles), an elegant writer, born at Paris in 1625. He was for some time a member of the congregation of the Oratory, where he acquired an extraordinary taste for polite literature. His juvenile education, including a course of geography and history, which had been pursued under Claude de l'Ile, father of the celebrated geographer, was uncommonly rapid; at the same time that it was enlarged and adorned by the society of numerous and respectable friends, and by an occasional and successful courtship of the muses. From his early years, he was observed to blend acuteness and facility of apprehension with an enviable sweetness of disposition. During the two years which he passed in the society of the oratory, and which have afterward pronounced to be the happiest of his life, he frequented the theatre without deserting the church, and alternately pursued Masillon and Racine. At the age of sixteen, he assumed the habit of the order, and composed a funeral oration on the abbé de Rancé, of aurëre memory. As Masillon, to whose inspection he had submitted this essay in pulpit eloquence, was observed to smile at the first part, and to yawn at the second, his young author, with a degree of resolution which has few examples, committed his performance to the flames, and took leave of a pursuit in which he perceived that he was not formed to excel. In 1706, though he had not attained the legal age, he was admitted a councillor of parliament, and, in the following years, he obtained the prize of eloquence proposed by the French Academy, and that which was announced by the Society of the Floral Games at Rouen. In 1710 he was appointed president of the first chamber of inquests; a situation which induced him to direct his attention for several years to the study of law in its various departments. Having accompanied his friend, the count de Morville, on his embassy to the Hague, his conciliatory manners secured the respect and attachment of some of the principal members of the government of the United States, and particularly those of the grand penionary Heinsius; who, in the president's company, could defend from the lofti pretensions of the democratic Dubois, in...
in 1723, he was elected to supply his place in the French Academy. His Chronological Abridgment of the History of France, which first appeared in 1744, has since undergone many impressions; and has been translated into Italian, German, English, and even Chinese. In 1755, he became an honorary member of the Academy of Inscriptions and Belles Lettres of Paris; and he had been previously received into those of Nancy, Berlin, and Stockholm: but the appointment which most sensibly gratified his feelings was that of superintendent of the queen’s household, which he had solicited for a friend, and which her majesty very generously bestowed on himself. The lucrative emoluments of this office he shared with madame de Coubert, the widow of his predecessor.

With the view of improving his health, which was never vigorous, M. Henault had often recourse to the waters of Plombieres, and sometimes to more protracted excursions. In one of these last, he made the tour of Switzerland, in company with his friend the marquis de Paulmy, who had been appointed ambassador to the Helvetic government. Monfieur Lebeau, his biographer, relates that in 1763, he was threatened with sudden dissolution, that he prepared his mind for the event with becoming composure, and that he recalled the saying of madame de Sévigné,—"Je ne laisse ici que des souvenirs: i.e. What do I regret?—I leave here only my own creatures." When, next morning, to the joy of his friends, he was pronounced to be out of danger; "I now know," said he, "what death is; it will no longer be new tome." He survived this attack only seven years, a period of his life which, like all the rest of it, was mild and tranquil. Grateful to heaven, and resigned to its decrees, he contemplated his gradual decay with a presence and a firmness of mind, which sufficiently proved that his extraordinary gentleness of temper never degenerated into weakness. He expired on the 24th of December, 1770, in the eighty-sixth year of his age. In 1714 he married mademoiselle le Bas de la Roche, who had been long deprived of any opportunity of appreciating the fidelity and goodness of his heart. The excellent works, which he has condescended to publish, have at length revealed the extent of his information, and we are now fully aware of the generous ardour of his friendships, and the benign sensibility of his mind.

HENAVULT (John), a French poet of the seventeenth century, the son of a baker at Paris. He travelled into the Low-countries and England; and upon his return became known by his poems, a collection of which was published in 1670. His talent caused him to be consulted as an adept in polite literature; and he was the poetical instructor of madame des Houlieres. His works consist of sonnets, of letters in verse and prose, and of an imitation of two acts of the Tragedy of Tereus. He died in 1682.

HENBANE, f. in botany. See Hyoscyamus.
HENBIT, f. in botany. See Lamium.
HENCE, adv. or interj. [heem, Sax; hennes, old English.] From this place to another.

Discharge my followers; let them hence away;
From Richard's night to Bolingbroke's fair day.
Shaks.
Away; to a distance. A word of command.—Hence with denial vain, and coy excuse. Milton.—At a distance; in other places. Not in use:
Why should I then be false, since it is true
That I must die here, and live hence by truth. Shaks.

From this time; in the future.—Let not posterity a thousand years hence look for truth in the voluminous annals of men. Arbuthnot.—For this reason; in consequence of this.—Hence perhaps it is, that Solomon calls the fear of the Lord the beginning of wisdom, Tiltleton.—From this cause; from this ground.—By too strong a projective motion the aliment tends to putrefaction; hence may be deduced the force of exercise in helping digestion. Arbuthnot.—From this source; from this original; from this store:

My Flora was my fun; for as
One fun, so but one Flora was;
All other faces borrowed hence
Their light and grace as stars do thence.
Suckling.

From hence is vicious expression, which crept into use even among good authors, as the original force of the word hence was gradually forgotten. Hence signifies from this:

An ancient author prophesi'd from hence,
Behold on Latian shores, a foreign prince! Dryden.

To HENCE, v. a. To fend off; to dispatch to a distance. Obsolete:

Go bawling cur! thy hungry maw go fill
On you foul flock, belonging not to me.
Shake.

HENCE, v. n. [used only in the imp. mode.] Be gone; depart hence.
HENCEFORTH, adv. [henonpors, Sax.] From this time forward:

Thanes and kinmen, henceforth be earls. Shakespeare.
If we treat gallant soldiers in this sort,
Who then henceforth to our defence will come? Dryden.

HENCEFORWARD or HENCEFORS, adv. From this time to all futurity.—The royal academy will admit henceforward only fuch who are endowed with good qualities. Dryden.—As your journey to Paris approaches, my letters will henceforward be principally calculated for that meridian. Chesterfield.

Henceforward will I bear
Upon my target three fair flussing suits.
Shake.

HE'NCH-BOY, and HE'NCH-MAN, f. [heen, Sax, a servant, or from hencr, a horse.] A page; an attendant. Obsolete.—He laid grace as prettily as any of the king's men, the kennel-boys. Jonson's Christmas Masques.
Tho' he were for every knight align'd,
All in rich livery clad, and of a kind.
Dryden.

To HEND,
The first Saxon chief who obtained a settlement in Britain was Hengest, who went to Hildecester, where he lived about three years in the house of a man of rank and merit. Afterwards he went some time with the learned civilian James Lampadius, at Hanover; and in 1645 was appointed professor of metaphysics, and of the Hebrew language, in the university of Rinthel. In 1645 he returned to Bardewic, where he had been appointed professor of the churches in that district. For five years he executed the functions of that office with so much diligence, that Augustus duke of Brunswick was desirous of entrusting to him the inspection of the whole diocese of Wittenbutter; but he declined the acceptance of so weighty a charge. In 1651, he returned to Rinthel, where he had been appointed professor of divinity, and was about the same time admitted to the degree of doctor in that faculty. He died at Rinthel in 1671, when about fifty-five years old. He was the author of a

HENDISCAYSABLE, adj. [Greek; from ἐνδίκα, eleven, and σώματος.] Confisting of eleven syllables.—Both written in the common Italian Hendeiscayasable verse. Tyrrh. HENDYER, a small island on the west coast of Scotland, and county of Sutherland. Lat. 58. 20. N. Ion. 1. 43. W. Edinburg.

HENDYADIS, f. A common figure by which a substantiative is used as an adjective; as, An animal of the dog kind. Adj.

HENDY-PENNY, f. A customary payment of money instead of hens at Christmas. It is mentioned in a charter of Edward III. Mon. Angl. tom. ii. p. 327. Dun-Cange is of opinion it may be hen-penny, gallinacions, or a composition for eggs; but Cowel thinks it is misprinted hened-penny for heyd-penny, or head-penny.

HENETI, in ancient geography, a people of Paphlagonia, who are said to have settled in Italy near the Adriatic, where they gave the name of Venetia to Venice. HENFARE, f. in doomsday book, a fine for flight on account of murder.

HENG, a town of China, of the second rank, in the province of Quang; 1135 miles south-south-west of Peking. Lat. 32. 38. N. Ion. 126. 21. E. Ferro.

HENG, a river of China, in the province of Hua-Quang, on the river Heng; twenty-five miles north-north-east of Heng-tche. HENG-CHANG, a town of China, of the third rank, in the province of Hou-Quang, which empties itself into a large lake called Tong-ting. HENG-CHANG, a town of China, of the third rank, in the province of Hua-Quang, on the river Heng; twenty-five miles north-north-east of Heng-tche.

HENG-TECHEOU, a city of China, of the first rank, in the province of Hou-Quang, on the river Heng; 775 miles south of Peking. Lat. 26. 56. N. Ion. 129. 44. E. Ferro.

HENGERBERG, a town of Germany; twelve miles north-west of Synynthia. HENJOCI, a people of Asiatic Sarmatia, near Colchis, defended from Amphythus and Telechus, the charioteers of Caistor and Pollux, and thence called Lacedemonii. Mela.

HENJOCUS, f. in astronomy, a constellation of the southern hemisphere, Auriga.

HENLEY (John), better known by the appellation of Orator Henley, a very singular character, born at Melton-Mowbray, Leicestershire, in 1691. His father, the Rev. Simon Henley, and his grandfather by his mother's side, (John Dowel, M. A.) were both vicars of that parish. Having paused his exercises at Cambridge, and his examination for the degree of B.A. with the particular approbation of the master of the college, he returned to his native place, where he was desired by the trustees of the school in Melton to take upon him the direction of it; and which he raised from a declining to a flourishing condition. He established a practice of improving eloquence by public speaking of subjects in the classics, morning and afternoon, as well as orations, &c. He was now invited to become a candidate for a township in St. John's; but, as he had long been absent, and thereby lessened his personal interest, he declined appearing for it. About this time he began his Universal Grammar, and finished ten languages, with dissertations prefixed, as the most ready introduction to any tongue whatever. In the beginning of this interval, he wrote his poem on Ether, which was well received. He was ordained a deacon by Dr. Wake, then archbishop of Lincoln; and after having taken his degree of M. A. was admitted to priests' orders by Dr. Gibbon, his successor in that see. He formed an early resolution to improve himself in all the advantages of books and conversation the most effectually, on the first opportunity at London. But he laid the basis of future proficiency in visiting at the curacy of his native town; where he preached many occasional sermons, particularly one at the affizes at Leicester; he then gave a voluntary warning for the choice of a new master and curate; and set off for London, recommended by the above three letters from the most considerate men in the country, both of the clergy and laity; but against the inclination of his neighbours and his school, which was now, as from his first entrance upon it, still advancing; and his method being established and approved, one of his own scholars was appointed to succeed him. He began to publish his lectures, fuci as a translation of Pliny's Epistles; several works of the Vertot; Montfaucon's Italian Travels, in folio, &c. His principal patron was the earl of Macclesfield, who
gave him a benefice in the country; he had likewise a lecture in the city; and preached more charity-sermons, was more numerously followed, and raised more money for charitable purposes, than any other preacher, however odious or distinguished. During these pulpit orations, he received acclamation from a great man of being fixed in town; but, when he pressed for the fullying of it, he met with an answer that completely ruined his hopes of any London preferment. Irritated by these disappointments, and poffessing abundant confidence in his own powers, which he doubted not would secure him the support of the public, he laid the plan of his lectures, and resigned his benefice, and the other appointments which he held in the church.

Mr. Henley now opened a chapel, which he called the Oratory, in the neighbourhood of Newmarket-port. Here he affirmed, or acquired, the title of Orator Henley, and for some time, by poffessing a good voice and forcible delivery, he attracted crowded auditories, particularly from among the lower classes. After some years he removed his lectures to a large room between Lincoln's-inn-fields and Clare-market, where he continued them fill his death; but with declining popularity, and frequently practicing the most miserable tricks to defer a crowd together, and to collect money. For some time he preached on Sundays only. Among other subjects, politics were frequently introduced by him into the pulpit; and in 1746, he exercised so much influence on his readers and reflections on the reigning family, and the zealous supporters of government, that by the warrant of the earl of Chesterfield, then one of the principal secretaries of state, he was taken into the custody of a messenger, in order to be examined on a charge of endeavouring to alienate the minds of his Majesty's subjects from their allegiance. After a confinement of some days, however, he was admitted to bail. Occasionally, as Dr. Warburton remarks, he did Mr. Pope the honour of declaiming against him; and in return, that poet paid him the compliment of holding him up to infamy.

**"But, where each science lifts its modern type, History her pot, divinity her pipe, While proud philosophy repines to show—Dilhonest fight!—his breeches rent below; Improvident, with native brawn too! Henley stands, Tuning his voice, and balancing his hands. How fluent nonsense trickles from his tongue! How sweet the periods, neither said nor sung! Still break the benches, Henley! with thy strain, While Kennet, Hare, and Gibbon, preach in vain. Oh great reifier of the good old stage, Preacher at once, and zany of thy age! Oh worthy thou of Egypt's wise abodes, A decent priest, where monkeys were the gods! But fate with butchers plac'd thy prie ty in hall, Mock modern faith to murder, hack, and maul! And bade thee live, to crown Britannia's prattle, In Toland's, Tiudal's, and in Woolfion's days.

This eccentric character struck medals, which he sold as tickets among his subscribers; of which the device was a star rising to the meridian, with this motto, Ad summa; and below, Invenimus, verum fiamus. His other auditories paid one shilling each for admittance. In order to fill his oratory, he was accustomed every Saturday to print an advertisement in the daily papers, containing the subject of his intended discourse on the following Sunday evening. This advertisement had a sort of motto prefixed to it, which was generally tied in some public transaction of the preceding week. He died October 14, 1756. He was the editor of a weekly paper, called The Hyp Doctor, for which he received a hundred pounds per annum.**

**HENLEY-IN-ARDEN, county of Warwick, is 102 miles from London, near the river Arrow. It was an anciently a member of Watton-Waven, but after wards annexed to Beaudesert. It lay a few miles from a castle, and a market kept at it by grant of King Stephen, which was the occasion of building the town for the reception of the market-people, at the bottom of the hill whereon the castle stood. The market is on Tuesday; fairs, March 25 and Whit-Tuesday. About the time of the battle of Evesham it was burnt; but in the reign of Edward III. it was recovered, and was the third town in Henley. Here is a chapel of ease to Waveney, the parish church, which chapel was first built in the 13th of Edward III.**

**HENLEY HOUSE, a plantation or settlement of the Hudson's Bay Company, on the north bank of Albany river, in New South Wales: 150 miles south-west of Albany Fort, and 480 north of the mainland.**

**HENLEY-UPON-THAMES, a rich and populous town in Oxfordshire, supposed to be the most ancient town in the county, its name being derived from the British word Henley, i.e. Old Place. It was formerly part of the eftates of the earls of Pembroke, and had one of the old markets of England. It is now a corporate town, governed by a high steward, recorder, mayor, ten aldermen, and sixteen burgesses. It formerly was a borough, and sent two members to parliament. It is most delightfully situated on the west side of the river Thames, over which has lately been erected a handsome stone bridge. On the key-stones of the central arch are two effigies of the6 masters in sculpture (done by the Hon. Mrs. Damer), emblematically representing Thame and Isis. Dr. Plott, in his History of Oxfordshire, says, that Henley is very ancient, and notices there having been a glass-house here. It has of late undergone very considerable improvements; the buildings in general being modernized, and the streets widened, paved, and lighted, so that few traces of its antiquity are now to be seen. Roman coins have been often found in its market-place. The Chiltern-hills run in a ridge from hence, and separate this county from Buckinghamshire. A considerable trade is carried on from hence to London by means of the Thames, in malt, grain, flour, and brown wood; about the thousand quarters of malt are annually made here. It has a weekly market on Thursdays for grain, cattle, poultry, and fish, with all of which it is well supplied. Here are also four annual fairs, on March 7, Holy Thursday, the first Thursday after Trinity-Sunday, and the first Thursday after the 2nd of September.**

The church is an ancient and spacious edifice, having a handsome lofty tower, built by cardinal Wofely, and a good peal of eight bells. Here are three free-schools; a royal grammar-school, founded and endowed by James I. for educating twenty-five boys in the classics. A blue-coat school, founded and endowed by Dame Elizabeth Periam, for educating and clothing twenty poor boys, annually apprenticing the four fomor boys, and allowing a fee of five pounds to each. And a green-coat school, founded and endowed by John Stevens, esq. for educating and clothing four boys and four girls, with an annual donation of thirty shillings each. Here are also almshouses for twenty poor persons, founded by Dr. Longland, some time bishop of Lincoln, and others. There are likewise various other benefactions to a considerable amount for the relief of the poor. Henley is twenty-three miles from Oxford, eight from Reading, ten from Wallingford, and thirty-five miles from London.

**HENLOPEN, a cape of the American States, which forms the south-west end of the strait which separates Cape Henry from Cape May.**

**Cape Henlopen lies in lat. 39.50. N., and in lon.**
There is a light-house on the top, a few miles below the town of Lewis, of an octagon form, handomely built of stone, 115 feet high, and its foundation is nearly as much above the level of the sea. The lantern is between seven and eight feet square, lighted with eight lamps, and may be seen in the night ten leagues at least. It exposes a strong iron network, in order to prevent birds from breaking the glass at night. Yet fo attractive is the light to the winged tribe, that shortly after its erection, 110 aquatic birds of different kinds were found dead one morning; and a duck, in particular flew against it with such force, as to penetrate through both the wire and glass; and was found dead in the lantern. Vessels appearing off the Delaware, upon dislaying a jack at the foretopmast-head, are immediately furnished with a pilot.

Hennepin, f. in botany. See Lawsonia.

Henrietta, [from Henry.] The Christian name of a woman.

Henriques, a remarkable salt-lake in the island of St. Domingo,—about twenty-two leagues in circuit. It is inhabited by lizards and alligators, and land-tortoises, all of a large size. The water is deep, clear, bitter, and salt, and has a disagreeable smell. Near the middle of the lake is an island about two leagues long, and a league wide, in which is a spring of fresh water, well tanked with caribatoes, and thence called Cabrito Island. This pond is about eleven leagues east of Port-au-Prince.

Henry [Camden derives it of haven, Lat. haven and Jiic, Sax. rich; i. e. rich at the des. of all the principal modern kingdoms. His German genealogies are reckoned the most valuable,
HENRY OF HUNTINGDON, an English historian, of the twelfth century, was canon of Lincoln, and afterwards archdeacon of Huntingdon. He wrote, 1. A history of England, which ends with the year 1154. 2. A continuation of that of Bede. 3. Chronological tables of the kings of England. 4. A treatise on the contempt of the world. 5. Several books of epigrams. 6. A poem on Henry the lion, as an in Latin.

HENRY OF SUSA, in Latin de Segasis, a famous civilian and canonist of the thirteenth century, who acquired such reputation by his learning, that he was called 'the source and splendour of the law.' He was archbishop of Embrun about the year 1298, and cardinal bishop of Porto in 1303.

Harry, Canon and Civil Law; and A Commentary on the Book of the Decretals, composed by order of Alexander IV.

HENRY THE MINSTREL, commonly called Blind Harry, an ancient Scottish writer, distinguished by no particular surname, but well known as the composer of a historical poem reciting the achievements of Sir William Wallace. This poem continued for several centuries to be in great repute; but afterwards sunk into neglect, until very lately it has been again released from oblivion by a very neat and correct edition published under the inspection and patronage of the earl of Buchan. It is difficult to ascertain the precise time in which this poet lived, or when he wrote his history, as to this point Dempster says that he lived in the year 1361: but Major, who was born in 1445, says that he composed his book during the time of his infancy, which we must therefore suppose to have been a few years posterior to 1456, and that he died when about eighty-three years of age.

HENRY Duke of Viseo, an illustrious Portuguese prince, fourth son of John I. king of Portugal, born in 1393. From his infancy he showed a great attachment to the study of mathematics and cosmography. At an early period he sent out a vessel upon a voyage of discovery on the Barbary coast, which reached Cape Bojador, and its success caused him entirely to devote himself to that object. Near Cape St. Vincent in Algarve, he chose a commodious situation for a sea-port, and there built his town of Sagrez, which in its plan and fortifications surpassed any other in Portugal. He erected arsenals, made docks and yards for ship-building, and invited naval adventurers from all parts to enter into his service. He himself was indefatigable in his attention to maritime subjects. He fearfully improved the art of ship-building, extended the use of the compass, and determined the modes of discovering the longitude and latitude by astromical observations. On an expedition which he sent out in 1418 under Zarco and Guyon, to discover the eftablifhment of a trading company at Lagos, he was shipwrecked off the Cape Bojador, and so passed his fuccefsful course of life in that part of the world.

The discovery of the Azores took place in 1448; and in 1449 prince Henry's fleets discovered the Cape Verde islands, and coasted sixty leagues beyond that cape, and planted there two castles; one of which was called Azores, and the other Vieira. He founded the town of Sagres, and there ended his useful life in 1463. He was unquestionably one of the greatest characters his nation ever produced; and may be regarded as the author of all the commercial prosperity to which Portugal afterwards attained by her East-Indian possessions.

HENRY (Francis), a French advocate and mathematician, descended from an ancient and noble family at Lyons, where he was born in 1473. He was educated in the college of the Jesuits at Lyons, and attracted the esteem of those fathers by the strength of his memory, his judicious application, and his progress in literature. After passing through his classical and philosophical courses, he took the degree of master of arts, and, according to the定制 of the law, was admitted to the courts of law. He officiated as an advocate before the parliament of Paris for many years with distinguished reputation; but his infirm state of health obliged him to decline all practice in the courts, and to confine himself to the labours of the study. The principal subjects which engaged his attention were the mathematical sciences, and in particular astronomy, geometry, algebra, experimental philosophy, and natural history. In connection with Henry Louis Hubert de Montmor, he prepared for publication the works of Galilei. He carefully reviewed all the productions of that philosopher, and according to the order of the senate, collected all the letters of Galilei which he could meet with, and placed them in chronological order. About the same time he employed similar attention on the works of the celebrated Paracelsus, of which a new edition was published through his means at Geneva, in 1658, in 3 vols. folio.

HENRY DE ST. IGNATIUS, a learned Flemiffh Car- melite monk, who flourifhed in the beginning of the eighteenth century, and embraced the ecclesiasticall life at Aetl. He taught theology with much reputation, and filled successively the most considerable offices in his order. He made a long stay at Rome, in the commencement of the pontificate of Clement XI. who entertained a great regard for him; and he died at Cavéz, a house belonging to his order in the bishopric of Liege, in 1729, at a very advanced period of life. His principal work is a complete body of moral theology, entitled Institutionum moralium, 1709, in 3 vols. folio, which, on account of its use for the education of the clergy, and its power and jurisdiction of the court of Rome was not favorably received in France. He was also the author of a theological work, in folio, in which he explained the first part of the Summa of St. Thomas; and of a work, entitled Motusius profugius, in 3 vols. 8vo, which, as well as the preceding, is held in much estimation by catholic divines.

HENRY (Nicholas), a learned French professor of the Hebrew language, born at Verdun in 1692. He became tutor to the sons of M. Joly de Fleury, attorney-general to the parliament of Paris; and he gave such satisfaction in this employment, that in 1723 his patron procured for him the appointment to the chair of professor of Hebrew in the College-royal. Of his erudition he afforded sufficient evidence in the new edition of Vatable's Biblia Sacra, 2 vols. folio, which was published chiefly under his inspection, with additional notes. He reviewed the first volume, which appeared in 1724, and took the superintendence of the second, which was not published till the year 1745. To a profound skill in the Hebrew language, he united a happy talent at introducing others to an acquaintance with it. Hence he had numerous pupils, to whose instruction he devoted himself with the most zealous affiduity. He was unfortunately killed by the fall of part of a building in the year 1748, in the fortieth year of his age.

HENRY (Matthew), a learned English nonconformist divine, born at Broad-oak in Flintshire, in 1665. His father, Mr. Philip Henry, was a clergyman of confiderable
able learning and abilities; and his son was initiated in grammar-learning at his own house, under his own personal instructions. The study of the Scriptures soon became his favourite employment. At this period of life, he was sent to an academy for the education of young people, at Linlithgow, where he applied to his studies with uncommon diligence and success. In 1685, he was sent to Gray's-inn, with the design of studying the law. In this new situation he distinguished himself by his usual diligence; and it was the opinion of those that conversed with him, that his great industry, quick apprehension, and tenacious memory, would have rendered him very eminent in the practice of the law, if he had chosen it as his business. But preferring the study of the Scriptures, he returned to his father's house at Broad-op, in 1686, and soon afterwards began to preach as a candidate for the office of the ministry. In the following year he was invited to settle as parson with a congregation of dissenters at Chelten, where he found himself agreeably situated, inasmuch that he continued with his congregation there for the space of twenty-five years. In 1712, however, he was prevailed upon to remove to Hackney, in the vicinity of the metropolis, where his labours were uninterrupted, both in his public capacity and his private application. He died quietly in his apartment, on November 27th, in 1714, when he had only reached the fifty-second year of his age.

Of Mr. Henry's learning and extensive knowledge as a divine, his works afford abundant evidence. His religious principles were those of the Calvinistic body. He was an eloquent and pathetic preacher, and frequently displayed much judgment and perplicity in his explanation of the sacred writers. He was distinguished by the fervency of his piety, and the unblameable neatness of his manners. His greatest work consists of Expositions on the Bible, in 5 vol. folio, of which four contain the Old Testament, and the fifth the Evangelists and the Acts of the Apostles. He intended to have finished the New Testament in another volume, but lived only to go through a part of the exposition of the Epistle to the Romans, which was afterwards finished by Dr. Evans. It has undergone various impressions; and, as it was very favourably received by the public at its first appearance, it still retains its popularity under different forms. Mr. Henry was also author of: I. A Discourse concerning the Nature of Schism, 1689, 8vo. 2. An Account of the Life and Death of Mr. Philip Henry, his father, 1696, 8vo. 3. A Scriptural Catechism, 1702, 8vo. 4. Familia Hymnico, 1702, 8vo. 5. A plain Catechism for Children, to which is added another for the people of the house that is in Judah, 1709, 8vo. 6. Lord's Supper, 1702, 8vo. 6. The Communicant's Companion, or Instructions and Helps for the Right Receiving of the Lord's Supper, 1704, 8vo. 7. A Method of Prayer, with Scripture Expressions proper to be used under each Head, 1710, 8vo. 8. Directions for daily Communion with God, in three Sermons, &c. 1715, 8vo. 9. The Pleasures of a Religious Life, 1714, 8vo. 10. Four Discourses against Vice and Immorality, 1715, 8vo. and several single sermons.

HENRY (Robert), an eminent historian, the son of a farmer at Muir-town, in the parish of St. Ninian's, Scotland, where he was born in 1718. He received his early education at Stirling, and went through a course of academical study at the university of Edinburgh. He afterwards became master of the grammar-school of Annan; and in 1736 was licensed as a preacher in the church of Scotland. He accepted an invitation to officiate as pastor to a congregation of dissenters at Carlisle, in which situation he continued twelve years. In 1748, he removed to Berwick, where he married the daughter of a surgeon, with whom he enjoyed much domestic felicity to the end of his life. Beside an assiduous attention to the duties of his office, he had not ceased to cultivate general literature; and about 1763 he began to turn his thoughts to the laborious task which has made him so respectable, the composition of an extensive history of England upon an improved plan. He found it necessary to employ the researehes necessary in undertaking of that kind, at such a place as Berwick; and therefore he removed in 1768 to Edinburgh, where he was appointed minister to the New Grey Friars' Church. After some years he exchanged this for the Old Church, which he served during the rest of his life. The degree of doctor in divinity was conferred upon him in 1772; and in 1774 he was unanimously chosen moderator of the general assembly of the church of Scotland.

He employed with so much industry the advantage of free access to the public libraries in Edinburgh, that the first volume of his History in quarto was published in 1771. It was followed by four more in the years 1774, 1777, 1781, and 1783. The plan of Dr. Henry's work is to throw the several topics of historical information into separate sections, even in number, all of which treat of their respective subjects detached from the left. With respect to the merit of its execution, the public voice may be considered as having fairly and deliberately raised it above mediocrity. The first volume excited much malignant criticism from a party of his countrymen, and unusual pains were taken to write it down. He went on, however, in the prosecution of his design, and each successive volume displayed improvement in the accuracy of his investigations, till the whole were completed. Lord Mansfield entertained such an idea of its merits, that he procured from his majesty, in 1781, a pension of one hundred pounds per annum for the writer, which he enjoyed till his death. This history was the principal object of Dr. Henry's attention for about thirty years of his life. His health began to decline in 1785, but he was not disabled from pursuing his studies till the summer of 1790; and he died on the 24th of November of that year, in the seventy-third year of his age. He bequeathed his books to the magnificence of Linlithgow, as the foundation of a public library in that town. Dr. Henry's private character was amiable and estimable. He possessed a large share of public spirit, with the purest integrity. He was a member of the Royal Society, and that of Antiquaries in Edinburgh, and very assiduously attended their meetings. The five volumes of his History of England, published in his lifetime, carried the subject from the earliest periods down to the accession of Henry VII. A sixth volume, which he had prepared for the press, and which concludes the reign of Henry VIII., was published, with an appendix of the author's Life, in 1793, by James Pettis Andrews, esq. HENRY, a cape of the American States, in the north-eastern extremity of Prince's Ann county, Virginia, twelve miles south-west of Cape Charles in Northampton county. These capes form the entrance of Chesapeake Bay. Cape Henry lies in lat. 37° N. lon. 76° 16'.

HENRY, a fort of Pennsylvania, eight miles north-west of Myer's Town, at the head of Tulpehocken creek, thirty-two north of Lancaster, and nearly thirty-seven south-east of Sunbury.

HENRY, a mountainous and hilly county of the American States, in Virginia, bounded north by Franklin, south and south-west by Patrick, south-west by Griton, and north-west and west by Montgomery. It is about forty miles long, fifteen broad, and contains 6938 inhabitants. HENS-FRET, f. A trivial name for hedge-furmitory. See PULMARTA. HENSHER, a village in Cheshire. HENSCHENIUS (Godfrey), a Flemish Jesuit and ecclesiastical historian, born about the year 1600. In 8vo. 9. The Pleasures of a Religious Life, 1714, 8vo. and several single sermons.
HEPATITIS, f. [Greek.] An inflammation of the liver.
HEPATIZON, f. [Greek.] Brown itching morphew; so called because it is of a liver colour.
HEPATOCYTE, f. [from πάπας, Gr. the liver, and κύτταρος, a particle.] A rupture of the liver.
HEPATICUM. See BIBLIA SACRA VULGATE.
HEPATOSCOPIA, f. [of πάπας, Gr. liver, and σκοπεῖν, I consider.] In antiquity, a species of divination, wherein predictions were made by inspecting the livers of animals.
The term is also used as a general name for divination by intrails.
HEPETHESIA. See PICTAEHIA.
HEPHESTIA, in Grecian antiquity, a festival in honour of Vulcan (Ἑφέστια) at Athens. There was then a race with torches between three young men. Each in his turn ran a race with a lighted torch in his hand, and whoever could carry it to the end of the course before it was extinguished, obtained the prize. They delivered it one to the other after they finished their course, and from that circumstance we find many allusions in ancient authors, who compare the vicissitudes of human life, to this delivering of the torch, particularly in those lines of Lucretius:

Inque brevis pietas mutatur facta animatum
Et quasi cures vita limpida tradat.

HEPHESTIA, in ancient geography, the capital town of Lemnos.
HEPHESTIADES, a name applied to the Lipari islands as sacred to Vulcan.
HEPHESTII, mountains in Lybia, which are set on fire by the lightest touch of a burning torch. Their very stones burn in the middle of water, according to Pliny.
HEPHESTION, a Greek grammarian of Alexandria in the age of the emperor Verus. There remains of his compositions a treatise entitled Enchiridion de Metris Bormat, the best edition of which is that of Pauw, 4to. Utrecht, 1726.
HEPHESTION, a Macedonian chief, famous for his attachment to Alexander. He accompanied the conqueror in his Achaic conquests, and was so faithful to him, that Alexander often observed that Craterus could not bear to be separated from him.

HEPATICA. See ANEMONE, ASPERULA, JUNGERMANNIA, MARCHANTIA, and RICCI'A.
HEPATICOIDES. See JUNGERMANNIA.
HEPATICUS, f. [from πάπας, Gr. the liver.] Medicines appropriated to diseases of the liver.
HEPATICUS, s. [from πάπας, Gr. the liver.] In mineralogy, a genus of calcareous earths, which, when rubbed, give out an odour like that of the liver of a sheep; whence its generic name. See the article MINERALOGY.
HEPATIRRISA, f. [from πάπας, Gr. the liver, and ἐκδύσια, a secretion.] A diurnal flux produced by acid bile.
HEPATITIS, s. [from πάπας, the liver.] A precious stone of a liver colour.

HEPATITIS, f. [Greek.] An inflammation of the liver.
HEPATIZON, f. [Greek.] Brown itching morphew; so called because it is of a liver colour.
HEPATOCYTE, f. [from πάπας, Gr. the liver, and κύτταρος, a particle.] A rupture of the liver.
HEPATICUM. See BIBLIA SACRA VULGATE.
HEPATOSCOPIA, f. [of πάπας, Gr. liver, and σκοπεῖν, I consider.] In antiquity, a species of divination, wherein predictions were made by inspecting the livers of animals.
The term is also used as a general name for divination by intrails.
HEPETHESIA. See PICTAEHIA.

Hepthemeris, or Hepthemerères, is also a causer after the third foot; that is, on the seventh half-foot. It is a rule that, this syllable, though it be short in itself, must be made long on account of the causer, or to make it a hepthemeris. As in that verse of Virgil:

Et faris agitis amor, et confid virtus.

It may be added, that the causer is not to be on the fifth foot, as it is in the verse which Dr. Harris gives us for an example:

Ille latus nunc mili faltus Hypoq.cho.

This is not a hepthemeris causer, but a hennameris, i.e., of nine half feet. 

Hephenheim, a town of Germany, in the circle of the Lower Rhine, in the electorate of Merse; sixteen miles north-north-west of Heidelberg, and east of Worms.

Hephenheim, a town of Germany, in the circle of the Lower Rhine, in the patazine of the Rhine, on the Wes; four miles south-west of Worms, and fourteen north-west of Manheim.

Hepen, f. Hawthorn-berries commonly written hips. Ainsworth.—In hard winters there is observed great plenty of hips and haws, which preserve the small birds from freezing. Bacon—See CHATEAUS.

Hepffenheim, from the vale of Neath to Svanfcaand, plenty of hawsy which preserve the small birds from freezing. It excites especially when augmented by heavy rains in the night, and the breadth of the water all through the dingle, as on the present occasion, besides other obstacles not yet appearing, prevents its being forded. Its breadth is about three feet, and constitutes the only projection in what would otherwise be a flat wall. The noise, however, from the little inhabitants of the topmost edge, while the water is forced forward; so that the two elements unite in forming as it were a roof or canopy over the head of the pillar, which affords him an imperceptible shelter from an occasional storm. Mr. Warner, when he visited this spot, had occasion to seek the protection of the river from a shower of rain. The effect of sunshine on the cascade, when behind it on a fine day, is both grand and beautiful. The particles of water glittering with a silvery brightness as they fall; the uncommon brilliancy of everything without, seen through such a medium, contrasted with the dark green of the moss, evergreenly wet with spray; the corn and dung of the dingle; the dark gloom of the atmosphere within; altogether form a singularly mingled scene of awe and gaiety. The dark hue of the bason below, deeply excavated by continued attrition, enhances the contrast of the thin transparent fluid in its descent. After passing the cascade, the stranger has to skirt the further side of the dingle for a few steps, in front of the majestic rock he defended; when he comes upon another cataract, and a large cavern under the opposite bank close by. Three more follow in immediate succession, and all three within an eighth part of a mile from the first. The most considerable of these is about twenty-five feet in height, and the smallest about ten. The fall is the largest. These four are all seen at once, but, owing to a bend of the river, the great cascade, though so near, is not seen even from the first of these. Were the five visible at one point of view, they would nearly rival the great fall of the Mynach in Cardiganshire, below the Devil’s Bridge; though they would still be very inferior in point of height, the Hepen is much broader than the Mynach, and in that respect would have the advantage irrepect to grandeur. The whole of this dingle is profoundly overgrown with wood of various kinds, among which the venerable and classic oak predominates. From the left of the cascades the scarcely-distinguishable path winds round the front of that promontory, which separates the two dingles and their rivers. But there is a path; for the common people drive their cattle this way, and under Hepfen cascade, when they have occasion to pass from the Melita to the eastern side of the fide of the Hepen.

Heptacapsula, adj. [heptagon and capula] Having seven cavities or cells.

Heptachord, f. in the ancient poetry, signified verses that were sung or played on seven chords, or on seven different notes. In this sense it was applied to the lyre when it had but seven strings. One of the intervals is also called an heptachord, as containing the same number of degrees between the extremes.

Heptagon, f. [heptagonae Fr. carm and gonia, Gr.] A figure with seven sides or angles. See the article GEOMETRY, vol. viii. p. 424.

Heptagonal, adj. [from heptagon.] Having seven angles or sides.

Heptagonal numbers, in arithmetic, a fort of polygonal numbers, wherein the difference of the terms of the corresponding arithmetical progression is 5. One of the properties of these numbers is, that if the
HEPTAHEDRON, s. in geometry, a solid figure with seven equal sides.  
HEPTAFERIS, s. [ἑπόσ, Gr. seven, and περί, a part].  
HEPTAMERON, s. [ἑπόσ, Gr. seven, and μέρος, a part.] A book in which the transactions of one week are recorded.  

HEPTANOMIA, [from ἑπτανομία, Gr. seven, and νομία, a law.] In botany, the fveenth class in Linnaeus's sexual method, consisting of plants with hermaphrodite flowers. The orders are seven, derived from the number of petals, or female organs. See the article BOTANY, vol. iii. p. 256, 257, and the correspondent Engravings.  

HEPTANGULAR, adj. in geometry, an appellation given to figures which have seven angles. See GEOMETRY.  

HEPTAPHONOS, in Grecian architecture, a portico, which received this name because the voice was reechoed seven times in it. Pliny.  

HEPTAPOLIS, in ancient geography, a country of Egypt, which contained seven cities.  

HEPTAPYLOS, a surname of Thebes in Boeotia, from its seven gates.  

HEPTARCHY, s. [ἑπταρχία, Fr. hétarchie, Gr. ἑπτὰρχος and ἀρχή, Gr.] A sevenfold government. For the Saxon heptarchy, see the article ENGLAND. vol. vii. p. 544-548.—England began not to be a people, when Alfred reduced it into England.; namely, under the article voLvi. p. 544-548.—England.  

HEPTHEMIMERIS, in poetry, a verse or line consisting of seven feet.  

HEPTAPHYLUM. See Alchemilla, and Potentilla.  

HERACLEA, an ancient city of Sicily, near Agrigentum. Minos planted a colony there; the Persians purged the place; and the Etruscans, recently, by the name of Messa, was called by the name of Minoa. It was called Heraclea after Hercules, when he obtained a victory over Eryx.—A town also of Macedonia.—Another in Pontus, celebrated for its naval power, and its conquests among the Aesetian states. The inhabitants conveyed home in their ships the ten thousand gold minas on which the Phoenicians undertook to embark. Another in Crete.—Another in Parthia.—Another in Bithynia.—Another in Phthiotis, near Thermopylae, called also Trachin, to distinguish it from the rest.—Another in Lucania.—Another in Syria.—Another in Chersonesus Taurica; and three in Egypt, &c. There were no less than forty cities of that name in different parts of the world, all built in honour of Hercules, whence the name was derived.  

HERACLEA, s. in Grecian antiquity, a festival at Athens, celebrated every fifth year, in honour of Hercules. The Thibians and Thebans in Boeotia observed a festival of the same name, in which they offered apples and flowers to the deity. This custom of offering apples arose thus: It was always usual to offer sheep, but the overflowing of the river Afopus prevented the votaries of the god from offering it with the ancient ceremony: and, as the word ἕπεκαν signifies both an apple and a sheep, some youths, acquainted with the ambiguity of the word, offered apples to the god, with much sport and animation. To represent the sheep, they raised an apple upon four ficks as the legs, and two more were placed at the top to represent the horns of the victim. Hercules was delighted with the ingenuity of the youths, and the festivals were ever after continued with the offering of apples. Pelox, s. c. 9.—There was also a festival at Sicily, in honour of Hercules. It continued two days; the first was called Fuictas, the second Demeteria. At a festival of the same name at Cos, the priest officiated with a mitre on his head, and in women's apparel.—At Lindus a solemnity of the same name was also observed; as well as in several other cities.  

HERACLEON, a famous Neoplatonic, the leader of a school of the Valentinian heretics in the second century. We have no information concerning the country which gave him birth. Irenæus mentions him and Ptolemy, in his arguments against the Valentinians; and Clement of Alexandria speaks of him as one of the most credible of Valentine's followers. There is great difficulty in ascertaining the precise time when he flourished. Balsamon places him under the year 175; and Cave under the year 126. He is represented as having maintained the fame wild and visionary notions with Valentine respecting God and the origin of the world, &c. such as conceiving the Divine Nature to be a vast abyss, in the pleroma or fulness of which existed, as emanations from the Fountain of Being, æons of different orders and degrees; that from the union of Bythos, the source of æons, and a principle called Enoia, or Sige, were produced Nous and Altheia, and from these, in succession, Logos, Anthropos, and Ecclesia; among the remote descendants of whom was Jesus Christ, and below him the Demiurgus, or Creator, who held the middle place between God and the material world, &c. To these he added some notions of his own; as, that man consists of three parts, a body consisting of gross matter, an animal soul, and a spiritual and celestial substance derived from the pleroma; that at death, the body being left to mingle with other parts of the material creation, the animal soul is transferred to the possession of the Demiurgus, and the spiritual substance returns to the seat of its high origin. And he directed his followers to
Heracleum, the plant is used in Scania against the delirium. Gmelin informs us that the inhabitants of Kamtschatka, about the beginning of July, collect the footstalks of the radical leaves, and after peeling off the rind, (which is very acid,) dry them separately in the sun, and then, tying them in bundles, lay them up carefully in the shade in bags; in this state they are covered with a yellow succarine efflorescence, tainting like hops, and the Russians esteem them for the use of a bitter spirit from the stalks thus prepared, by first fermenting them in water with the greater bilberries (Vaccinium uliginosum); which Gmelin says is more agreeable to the taste than spirits made from corn. The leaves are a favourite food both with rabbits and game; hence, goats and sheep, also eat them; but horses are said not to be fond of them. Our old writers call this plant cow-parsnip, meadow-parsnip, and mousedown. In Norfolk it is called beg-wed. The dry stalks are named, in common with those of some other umbellate plants, kesa, or keftes.

2. Heracleum angustifolium, or narrow-leaved cow-parsnip: leaves crofwise-pinnate, leaflets linear; corollas floculose. This is probably merely a variety of the foregoing, and grows plentifully at Berkmastead in Hertfordshire, near the place where Ray found it; and where both sorts may be seen growing from the same root. The dilution of the floculose and radiate corollas is very uncertain; as Jordan well remarks. Linnaeus thus distinguishes it: the stature is the same with that of H. sphondylium, but the leaflets are extremely narrow, linear, at the common petiole pinnate crozovite, being four at each joint; the anterior leaflet lobed at the base. Flowers uniform, green and white. According to Kröcker, dark or yellowish green, not white.

3. H. longifolium. This differs from the common sort in having the segments of the leaves very long, the primary ones being from half a foot to a foot in length, oblong, lanceolate, acute, smooth above, rough underneath, rarely and shortly subdivided: whilft the plant is young the leaves are palmate, divided into long segments from bifid, with white hairs, four feet high, fibrated and furrowed.

4. H. elegans. In the seed, flowers, anthers, and pistils, this agrees with H. longifolium: in the leaves it approaches nearer to H. angustifolium: it differs from both in having the segments of the leaves very narrow, shorter, very confluent; the leaves are more ternate, very divided into four or five segments only in the larger ones. These three are rather to be considered as singular varieties than as species: hence Crantz has united them under the name of H. protociforme.

5. Heracleum Sibiricum, or Siberian cow-parsnip: leaves pinnate; leaflets in fives, the middle ones bifid; roots white, with white hairs, smooth above, coarse, smooth under the base. The distinon of the flofculose and radiate corollas of the same species. The dry stalks are named, in common with those of some other umbellate plants, kesa, and kesa weed. In Norfolk it is called hog-parsnip, vca, and pigweed. The dry stalks are named, in common with those of some other umbellate plants, kesa, or keftes.
Leaves dusky green, on long hirtute petioles, pinnas
sejile, ga舌het, three or five, lanceolate, rounded and
eared, the outer odd one petiolc, three lobed, the lobes
like the other pinnas, in the lower ones blunt, in the
upper sharp. The flowers differ from H. panaces in
having the veins veined and wrinkled, green, and
scabrous on both sides; not soft, or paler underneath,
or somewhat tomentose; peduncles scabrous, not even,
as in H. panaces; the flower is lefs. Native of Austria,
Carniola, and Silesia; flowering in July and August.

Propagation and Culture. Sow their seeds in autumn;
in the spring, when the plants are up, hoe the ground,
cutting up the weeds, and thinning the plants, as di-
rected for common parnips.

HERACLI'DAE, the descendants of Hercules, so
much celebrated in ancient history. Hercules at his
death left to his son Hyllus all the rights and claims
which he had upon the Peloponnesus, and permitted him
to marry Iole, as soon as he came of age. The
nobility of Hercules were not more kindly treated by
Eurytheus than their father had been, and they were
obliged to retire for protection to the court of Cce-
exy, king of Trachinia, and Eurytheus pursued them thither;
and Cceyx, afraid of his resentment, begged the Hera-
clide to depart from his dominions. From Trachinia
they came to Athens, where Theseus, the king of the
country, who had accompanied their father in some of
his expeditions, received them with great humanity, and
affisted them against their common enemy, Eurytheus.
Eurytheus was killed by the hand of Hyllus himself,
and his children perished with him, and all the cities of
the Peloponnesus became the undisputed property of
the Heraclides. Their triumph, however, was short;
their numbers were lessened by a pestilence, and the
country, who had accompanied their father in some of
his expeditions, received them with great humanity, and
affisted them against their common enemy, Eurytheus.
Eurytheus pursued them thither; and Cceyx, afraid of his resentment, begged the Hera-
clide to depart from his dominions. From Trachinia
they came to Athens, where Theseus, the king of the
country, who had accompanied their father in some of
his expeditions, received them with great humanity, and
affisted them against their common enemy, Eurytheus.

HERÆA, f. in Grecian antiquity, festivals at Argos in honour of Juno, who was the patroness of that city. They were also observed by the colonies of the Argives which had been planted at Samos and Aegina. There were always two processions to the temple of the goddess without the city walls. Heracles' the left part of the ox was often called ἐνυπαθία, and sometimes λεγερία, from ἀγος, a bed, because Juno presided over marriages, births, &c.

There was a festival of the same name in Elis, celebrated every fifth year, in which sixteen matrons wove a garment for the goddess. There were also others instituted by Hippodamia, who had received assistance from Juno when the married Pelops. Sixteen matrons, each attended by a maid, preceded at the celebration. The contenders were young virgins, who, being divided in order, beginning with the youngest. The habit of all was exactly the same, their hair was dishevelled, and their right arm bent to the shoulder, with a coat reaching no lower than the knee. She who obtained the victory was rewarded with crowns of olives, and obtained a part of the ox that was offered in sacrifice, and was tended by a maid, who presided at the celebration. The festival of the same name in Elis, celebrated every fifth year, in which sixteen matrons wove a garment for the goddess.

The Argives always reckoned their years from her priestess, as the Athenians from their archives, or the Romans from their consuls. When they came to the temple of the goddess they offered a hecatomb of oxen. Hence the sacrifice is often called ενυπαθία, and sometimes λεγερία, from ἀγος, a bed, because Juno presided over marriages, births, &c.

There was also a solemn day of mourning at Corinth, to write a play, in which Medea is represented as the murderer of her children. There was also another festival of the same name in Elis, celebrated every fifth year, in which sixteen matrons wove a garment for the goddess. There were also others instituted by Hippodamia, who had received assistance from Juno when she married Pelops. Sixteen matrons, each attended by a maid, preceded at the celebration. The three chief heralds are called Kings of Arms; of which Garter is the principal, instituted by Henry V. His office is to attend the knights of the garter at their solemnities, and to marshall the funerals of the nobility; and Edward IV. granted the office of King of heralds to one Garter, cum fiudis et praebentibus antiquo, &c. His duty is to grant supporters to the nobility, knights of the royal orders, proxies of the princes of the blood royal at installations; to attend the knights of the garter, to marshall the solemnities at the funerals of the highest nobility, and to carry the garter to kings and princes beyond the sea, on which occasion he was usually attended in communion with some principal peer of the realm. The arms of his office are: Argent, a cross of St. George; on a chief azure, within a garter of the order, between a lion of England and a fleur-de-lis of France, a ducal coronet or. (The description in Edmundson is erroneous, as the chief is blazoned gules instead of azure.) The present Clarenceux, John Atkinson, esq., F.S.A., is a Roman-catholic. To the superior and inferior he-vaults and gentlemen, on the south side of the Trent. The badge of his office is: Argent, a Neptune with an eastern crown or, issuing from the ocean, the left hand grasping the head of a ship's mast, the bottom of the ring is lined with ermine. Anciently the kings of arms were clothed with small leaves or fleuresses, and resembled the coronets of the present dukes; but since the restoration, it has been composed of leaves in shape similar to those of oak. Within the crown is a cup of crimson silk, and at top a gold tassel; the bottom of the ring is lined with ermine. Anciently the kings of arms wore their crowns at the four high feasts of the year, Christmas, Easter, Whitsuntide, and All-Saints-day, when their attendance was required near the person of the sovereign; they still wait on those and other days of the year at St. James's palace; but never wear their crowns, except at the ceremony of the coronation.

Lord Lion's office in Scotland, and Ulster king of arms of Ireland, are distinct and independent from the heralds' College of London; which by its priority of time, and importance, is often called upon to function their grants.

Besides the kings of arms, there are six subordinate heralds, according to their original, as they were created to attend dukes and great lords, in martial expeditions, i.e. York, Lancaster, Chelver, Windsor, Richmond, and Somerset; the four former were instituted by Edward III. and the two latter by Edward IV. and Henry VIII. To these, upon the accession of George I. to the crown, on account of his Hanoverian dominions, a new herald was added, called Hanover herald of arms. Also 11 Geo. I. A deputy is appointed, with the royal approbation, when the duke of Norfolk is a Roman-catholic. To the superior and inferior heralds are added four others, called marshals or pursuivants of arms, who commonly succeed in the places of those heralds as die, or are promoted; they are denominated blue mantle, rouge croiss, rouge dragon, and palfivers. These offices are now (June 1802) filled as follows:

**HERITARY EARL MARSHAL, his Grace the Duke of Norfolk, F.R. and A.S.**

**Registrator, George Harrison, esq. Earl Marshal's Secretary, Rev. James Dallaway, M.B. F.S.A.**
In the College of Arms of London, heralds are esquires by creation, if not so previously to their admission into this honourable office. They always take precedence according to the seniority or dates of their appointments, even though a junior one should be appointed, and a senior not. Sir William Dugdale remarks, that "a younger herald, though a knight, doth not precede his senor in time, though no knight;" infaining the cases of Sir Henry St. George, knight, Richmond herald, and Sir Thomas St. George, Somerset herald, all the senior heralds preceding them, as they had done before, and continued so to continue, until they were admitted into the superior order of officers at arms, provincial kings.

The respectable and important office of the Herald's College arise equally from the high offices confided to its members, and from the share it contributes to public advantage and utility. Besides the services the Kings of Arms have to perform about the persons of their majesties, and in various departments of the state; the preservation of genealogies, the records of legitimate inquests, and in various departments of the state; the preservation of pedigrees, titles of honour, dignities, and coats of arms, by creation, if not so previously to their admission into, the College of Arms, (says Maitland in his History of London,) has subsisted in this kingdom for five hundred years, (holidays excepted,) from ten o'clock in the morning till four in the afternoon, by two officers, an herald and a pursuivant, deputed to register all such births and pedigrees as are sent to their office properly, authenticated to much more serious matters, and to register coats of arms, or armorial bearings, for such persons as may chuse to make application for these purposes. And it may be expedient to remark, that no armorial bearings are legal, unless registered in the College of Arms.

fient CARTER, SIR ISAAC HEARD, to whose generous and liberal indulgence we are indebted for a perusal of it.

In the copious list of authors and treatises, which the author is indebted to his aid in the composition of his book, we find many which are gratifyingly new. There are however very scarce or totally out of existence, and the following selection of a few of them cannot fail to interest our readers as an object of great curiosity:

In England, where prowess in arms, and improvements in literature, have more conspicuously gone hand in hand, we have many heraldic works, which do honour to the spirit of the nation. The chief of these are:

Leigh's Accidents of Armoury, or Art of Blazoning, 4to. 1652, and many times reprinted. — Boffwell's Works of Armoury, and of Cotes and Crests, 8vo. 1732, and several times reprinted. — Miller's Catalogue of Honour, 4to. 1710. — Doddridge's Honors Pedigree, 8vo. 1753. — Spelman's Apologia, 1664. — Waterhouse's Defence of Arms and Armoury, 8vo. 1660.

In France, where the spirit of the nation has in a great measure been destroyed, by the fanciful positionings into which the supporters are thrown. This fancy may be admired, from the variety it affords, —

Collins's Peerage. — Peerage of Scotland, by Sir Robert Douglas, bart. folio, 1768. — Betham's Baronage of England, 5 vols. 4to. 1801 — Dallaway's Science of Heraldry in England, 4to. 1793. — Godwin's Peerage of England, 2 vols. 4to. 1790, with a third volume, containing the arms of the English nobility, magnificently engraved; but in which the principles of heraldry are in a great measure destroyed, by the fanciful positionings into which the supporters are thrown. This fancy may be admired, from the variety it affords.

This fancy may be admired, from the variety it affords.
The antiquity of the shield is admitted on all hands; and the nature only of the devices engraved or painted upon them, that has excited the attention of the curious in heraldic disquisitions. Some of the older heralds have blazoned Jacob's shield, party per bend, or, and gules; the king of Lydia is seen with a shield, bearing David, azure, a harp, or, and gules; that of Judas Maccabees, or, several others in past ages, have afforded to us in the compilation of the present article.

ORIGIN AND PROGRESS OF HERALDRY.

To settle the origin and remote antiquity of what is termed heraldry, writers and antiquarians appear to have long struggled in vain, and have been opposed by controversy and discord, and to them we must publicly declare our sincere acknowledgments for the eminent assistance they have afforded to us in the compilation of the present article.

Heraldry and Chivalry, or the "Heraldry and Chivalry" of Miss Knapp; and the "Allusive Arms" of the late colonel Delamotte; the "Heraldry and Chivalry" of Mr. Noble, claim particular attention and regard. From a perusal of these works, every reader will find valuable literary information, blended with historical narratives and curious anecdotes; and to them we must acknowledge our sincere acknowledgments for the eminent assistance they have afforded to us in the compilation of the present article.

HERALDRY.
bearing of such devices upon the armour of any man; having reserved every such grant or authority wholly to himself.

The history of the Mecklenburg arms, if not entitled to much credit, is at least extremely curious, and serves to prove the high antiquity of such bearings. It is noticed by Collins, in his Peerage; and by Miss Knapp, in her Anecdotes of Heraldry. Antirius, who had received his warlike education under an Amazon in Scythia, and fought under the banners of Alexander, put himself at the head of the Heruli, and assumed the title of king. Quittin his native pothecary at the head of a warlike people, the pursuit of conquest continued with them on-board his fleet; and the principal vessel, in which he led the way, was decorated on her stern with the head of an ox. Arriving at Mecklenburg, they drove out the Angli, and took possession of the country; from which period that duchy has borne the ox as its armorial enigma. The house of Mecklenburg sprung from Artyrius; whence this bearing must have been for ages hereditary in that family.

The arms of Germany and Poland boast of an origin almost as remote. Varus, the Roman proconsul, and governor of Syria, being made commander in chief of the legions in Germany, was surprised by the enemy, and cut to pieces, a disaster which he could not endure; and therefore put an end to his existence in the year 90 of the Christian era. In this defeat the Romans lost two of their standards, a white eagle, and a black one. The white was seized by the Sarmatian auxiliaries; and the black by the Germans themselves; whence came the arms of the German empire: on a field or an eagle with two heads fable, which denote the eastern and western empires. And thro' the ancient Sarmatians came the arms of modern Poland, an eagle argent on a field gules. It also happened that a third standard was lost, which was supposed to have fallen into the hands of the Slav, or Sclavonians, from whom descended to the Ruffians their present arms, being an eagle fable on a field or.

It has been held, however, that none of the bearings of the Roman generals were hereditary. "The reason of this is so amply set forth by the ingenious Nisbet, that we cannot give the reader a more perfect idea of the subject, than what may be collected from the following remarks of that esteemed author:"

"Thos who mention arms to be as old as the Roman commonwealth, (thus this writer, seems to have some flaw of reason on their side; because with them some devises on their shields and military instruments were then used successively by father and son, and so downward; for instance they give us the family of the Corvini, who bore a roger or corbe for their crest, according to that of Silius Italicus:"

Corvinus, Phoebus fcelet cui confide fulus,
Oftentans alas prouiae Ingufie pagae.

"But till this corbe was no more than an ornament, which represented a combat of one of his ancestors, from which they had the name Corvinus, because during the action a roger was lighted on his head; had it been otherwise, I mean arms of the family, the poet would have called it Ingufie prouetorium. What others allege out of Suecians, Caligula, Varus familiarum ingufie, Nobilissimo custode admiranda, Torquato, Torquem, Cincinnatii Crenm, & Pompeo fipiras antiqua, Magni Cognomen: imports no more than that Caligula, being displeased with the grandeur of these families, commanded to take from their images or statues, as that of Torquato the collar or chain that he took from one of the Gauls, and from that of Cinclus the part of hair which that brave Roman had spoiled of one of the beards of the Romans. Of the epithet Great to be defaced in the inscription of the statue of Pompey; the word Great makes it evident, that the other marks, the collar and hair, were not here...
**HERALDRY.**

Some writers, however, have ascribed the merit of this heraldic invention to a milder race of ancient Germans; who, even before they emerged from the dark obscurity of their woods, were famed for gallantry, and for manors singularly governed by the point of honour, and animated by the virtues of the amiable sex. See the article **Germany**. p. 454, 454, 455. To excel in the liberties of the citizen and knight was in those days the ruling passion of the ancient Germans; and hence their invention of many insignia connected with arms, which were never bestowed but with great formality upon the wearer. "Thefe, (says Dr. Stuart,) were the friends of his manhood, when he rejoiced in his strength; and they attended him in his age, when he was weary of his weakness. Of thefe the most memorable was the *shield*; and it was the employment of his leisure to make it conspicuous. He was fedulous to diversify it with *chosen colours*; and, what is worthy of particular remark, the ornaments he hallowed were in time to produce thwart of the art of **blazonry**, and the occupation of the herald. These *chosen colours* were brought into representations of acts of heroism. Coats of arms portrayed upon the shield, were to distinguish from each other warriors who were cased completely from head to foot, with their visors down; and hence was at length reduced to regulation and sytem, what had begun without rule or art.

From the **fagum**, or short vest of the Gaulic and the German warrior, which covered his arms, shoulders, and breast, coats of arms arose. La fort d'armes a eft de le vtement le plus ordinaire des anciens Gaulois: il eftoit appelle par eux *fagum*, d'oii nous avons emprunte le mot de *fays*, ou de *fayon.*

The **fagum**, says Tacitus, c. 17. "Difert. fur l'Histoire de St. Louis, p. 127.--'Legumen omnibus *fagum,'" says Tacitus, c. 17. According to this instructive historian of the ancient Germanic manners, the *fagum* was adorned with spots, and with bits of fur. "Eligunt feras, et detracuta velamina fpargent maculis, pellibulique bellarum." c. 17. And we know from Herodotan, that it was sometimes ornamented with silver. *Lib. 4.* In these curious fragments of history, it is impossible not to see the colours, the furs, and the metals, which are the materials of the art of blazonry.

The old Germans rushed on to battle with a loud noise, applying their shields to their mouths, that their voices might rife by repercuflion into a fuller and more powerful sound. The old *fagum* was made of wood, and hence was at length reduced to regulation and sytem, what had been adopted without rule or art. *Dijfert. fur l'Histoire de St. Louis, p. 127.*

Heraldry.

adopted by his successors the dukes of Normandy. The number was not increased till the reign of Richard I., who made them three, by adding the lion, the device of Poictou, or of Aquitaine, which territories he inherited from his mother queen Eleanor; and from that time to the present the three lions, though originally French, have continued to be borne by the kings of England.

It is chiefly to this era that genealogists trace the pedigrees of our most ancient nobility. Prior to this time we have but few and scanty annals of British or Anglo-Saxon nobles, many of whom fell in battle, or were cut off by the Conqueror, while the rest of the future sovereigns of Scotland, ruined in their fortunes and estates, which were seized by the Normans. Malcolm, the Scottish sovereign, afforded them an asylum; "and," says Simon of Durham, "they were to be met with in my time in all the farm-houses, and even in cottages." In the mean while, the illegitimate William duke of Normandy, after his conquest of England, appears to have adopted the fabulous plan of Hugh Capet in establishing an hereditary nobility, on whose attachment to his person and interests he could safely rely. "Hugh Capet," says the celebrated civilian Francis Hotoman, "contrived a cunning device for establishing himself in his new dominion; for, whereas, all the magistracies and honours of the kingdom, such as dukedoms, earldoms, &c., had been from the most ancient times conferred upon elect and deserting persons, in the general conventions of the people, and were not hereditary, but held only during good behaviour; whereas, as the lawyers express it, they were but beneficiaries; Hugh Capet, in order to secure to himself the affections and interest of the great men, was the first that made those honours perpetual, which had been before but temporary, and ordained, that whoever by their merits and loyalty obtained them, should have an hereditary right in their titles and arms, and might leave them to their posterity." See Franciscus Cananus, the civilian, comment. II. chap. ix. It is singular that this fact has escaped the notice of most of the French historians.

The Conqueror, finding this precedent congenial to his views, not only dissepolled all the Anglo-Saxon nobles who had opposed his claim to the crown of England, but cut off or ruined his paternal relations, who, on account of his illegitimacy, had often confpired against his person and government. See the article England, vol. vi. p. 537; while, on the contrary, he made titles, honours, and estates, hereditary in his maternal relations, who had fought under his banners; and in his immediate retainers and followers, in whole France, and his Condé. It is true that their interest was to beLook for his planting so many of his maternal relatives and chiefs in those dominions which he had acquired by the sword. To Robert, earl of Montagne, his half-brother, was granted the earldom of Constable, with three hundred manors. To Odo, bishop of Bayeux, his other uterine brother, he gave the county of Kent, with near two hundred manors in it, besides two hundred and forty-five in other counties. To Hugh Lupus, son of his sister Emma, he gave the county of Chelten, and erected it into a palatinate for him. Alan, earl of Brecon, his son-in-law, obtained all the estates of earl Edwin; William de Warren, another of his sons-in-law, had the earldom of Sussex. His nephew Stephen, son of Odo earl of Blois, had Holderness; William de Seve- nel, his natural son, was created earl of Nottingham and Derby; Roger de Montgomery obtained those of Arundel and Shrewsbury, with the county of Salop; Walter de Giffard, Buckinghamshire; Ralph de Guardier, the earldom of Suffolk, and the county of Norwich; Simon de Siz, the earldoms of Huntingdon and Northumberland; a chief named Beauvois, Southampton; Henry de Newburgh, Warwickshire; Ulfus de Abbot, the earldom of Worcefter; Henry de Ferreres, Tutbury-castle, with one hundred and seventy lordships; William, bishop of Conrice, received two hundred and eighty fiefs, which fell, upon his death, to his nephew Robert Mowbrey. These noble families were treated by subsequent sovereigns with great respect; for, whereas, many of them had received the reward of personal merit of the kings, it became customary to honour them with the name of cuffa. See Nobles' College of Arms," p. 4. Thus the property of the nation, as well as the customs and manners of the Anglo-Saxons, were abrogated; while those of France and Normandy became the standard of their taste. Such as had fought under the banners of the Conqueror, and had received the reward of personal merit, became the founders of new families in a country which had been won by their prowess. And in order to preserve their names to distant posterity, they were recorded in a roll, hung up in Battle Abbey, near which the decisive victory had been gained. The persons therein mentioned became the patriarchs and forefathers of most of the English families of distinction for many ages; and several of our illustrious nobility at this day are descended from them. Not only the introduction of the French blazonry,—of hereditary honours and titles and bearings, with all the magnificence of stateliness and ceremony, which for centuries made the subje&s appear a separate and distinct people from the kings who governed them, and from the nobles who bound them in fetters of vassalage, by the introduction of feudal tenures. See the article Tenure.

The pride of feudal dominion unquestionably gave a wide spread to the splendid pageantry of tilts and tournaments, in which the great nobles endeavoured to emulate their sovereign. It also merits observation, that the exhibition of tournaments produced an intercourse between the nations of Europe, which could not but contribute to knowledge and civilization. To these pageanties we are likewise to attribute the introduction of numerous orders of knights, who were to be honourably received at the courts of all countries, as principal actors in those sham fights, or feats of chivalry. See the article Chivalry, vol. iv. p. 595-598. The fashion of tournaments was usually embraced as a fit occasion for conferring knighthood on those who were thought deserving of such an honour; and this, from the principle of giving encouragement to the military art. The privilege of conferring this title did not now depend so exclusively in the king; princes of the blood, peers of the realm, and the higher order of nobles, all either possessed or affected that authority. When the earl of Suffolk, in the memorable siege of Orleans, was obliged to yield himself prisoner to a Frenchman of the name of Renaud, he asked his adversary, before he chose to submit, whether he was a gentleman? On receiving a satisfactory answer, he demanded, whether he was a knight? Renaud replied that he had not yet attained that honour. "Then I make you one," replied Suffolk; and after giving him the blow with the sword, which dubbed him into that heroic fraternity, he surrendered himself to his prisoner. It is to this sumptuous taste for splendid and costly tournaments, and the consequent increase of warlike knights, that we are to attribute the successes of Gregory VII., in bringing into action his famous plan for the crusades. See the article Crusades, vol. v. p. 374. Knights usually followed the more important tournaments wherever they were proclaimed, that they might find signal opportunities of distinguishing their value, and of cultivating the friendship of illustrious persons. It was even fashionable for knights to avoid the
the restraint of marriage for some years after their ad-
mission into the order, that they might travel into dif-
tant countries, and be submitted to foreign laws and faci-
dates. St. Palaye, vol. ii. p. 8. But although their valorous knights thus made a virtue of abstinency for a time from matrimonial felicity, yet they had each a favourite lady, under whose enchanting fiyi of the order, they were permitted to take a wife or concubine.

Different nations were distiguished by different-

• as the mod honourable ; whence they have been distin-

guated as coats of arms by the epithet of grand ordinaries.

But in pro-

_TOUCH, p. 576 ; and for his

visions of the day which their victories and gallantery were eventually to be rewarded. These pledges were called favour; and hence perhaps the pieces of lace or ribbon which are to this day bestowed at mar-
riages, are termed "the bride's favours."

Thus the union of distiguished princes by their renown in chivalry, and feats of arms, prepared their minds for the pious sentiments of the "holy war," and induced the creation of new fraternities of knighthood. So came into being the knights of the holy sepulchre, the hospita-
tales, and the order of the temple of Jerusalem. The bishops and other religious orders, formed under new and famous apppellations, on purpose to give zest to this magnificent scheme of extir-
pating the Saracens, and restoring Christianity to the Holy Land. See the article KNIGHT. Some writers have fancied, that these croisades gave birth to chival-
ry in the strict sense, when only a few individuals were engaged in those arduous and bloody conflicts. Every person who went out to the holy wars, wore the crofs on his upper garment on the right shoulder; whence these formidable expeditions acquired the name of croi-

fades. Different nations were distiguished by different-coloured crofes. The English affumed the white crofs; the French chose the red; the Flemings the green, &c. Thus were the styles of heraldry and the crofes-keys upon their shoulders. But besides the general badge or symbol of the holy standard under which the Christians fought, they chose to be decorated with individual coats of arms, in imitation of the Saracens, whose magnificent armorial bearings glittered in all di-
rections, and were the subject of the highest admiration in the Christian camp. It became therefore necceffary, from motives of policy, to multiply heraldic devices and armorial ensigns, for the Chriflian foldiers, as an in-citement to glorious achievements, of which there were to be the fole reward. Thus charges of every possible kind were invented; and these were continually in-
corporated by shields rich as to their field and banners taken from the infidels in battle, and borne afterwards in perpetual commemora-
tion of the event. Till this period the ordinaries, as the bend, fefs, chevron, crofts, faltire, &c, had been for the mod part fingly borne. The coats-were the bend, fefs, chevron, crofs, faltire, and chief, had con-

creates from motives of policy, to multiply heraldic devices

in proportion to the number and variety of charges they

could crowd into their coats of arms. Mercurian states that the motto safe to have been used by Richard the Cruel, when the most showy coats of arms were

affumed by many families which had the leaff pretentions to antiquity or dilfinction; and it was this ridiculous

lious species of ostentation which gave rise to the well-

known saying among the French, "Il n'est point de plus

belle armes que les armes de ma famille."

The most active part taken by the English in the wars of the crofs, was under our heroic Richard I. ferminated, from his invincible courage, Cœur de Lion, or lion-hearted. See the article ENGLAND, vol. vi. p. 576; and for his valour in the reduction of Ptolemais, now Accr, (since

subdived into France,) and his other exploits in Greece, see the article EGYPT, vol. vi. p. 323, 324. This was the third of the eight croisades, and commenced in 1188, the year before Richard ascended the throne. Those chiefs who lived to return to their native coun-
ty, were naturally emulous of displaying their own im-

proved armorial bearings, as well as the rich banners

on which they had wrested the crofs from the Sa-

racens in the sacred war; and which, as venerable ob-
jects of such perilous attainment, were now to be intro-
duced and displayed in churches. The banners confi-

ded of the richest manufactures of silk, upon which the

device was curiously embroidered; the shields were of

coloured crofes, enriched with gold and silver. Thefe trophies were dedicated to some propitatory saint, over whose shrine they were fupped-

vised. Coats of arms too were considered of sufficient ve-
nular and importation to be admitted as ornaments in thefe sacred edifices, and were either sculptured in fone, framed in glafs in the windows, or painted in fresco on the walls. The firft instance of a sculpturred coat of arms thus erected in England, occurs in the Temple church of London, on the shield of the effigy of Geoffrey de Magnanville, earl of Eiffex, who died in 1144. The prac-
tice of carving or painting the family arms on monu-
ments foon became more common; and led to their intro-
duction on the tapestry and hangings of fome of the larg-
fer rooms, and on the walls of the great halls in inns, &c. So functioned, it is no wonfer that coats of arms came to be considered as an indifpenfable appendage to the drefs and furniture of every gentleman; that they should be considered as the exclusive right of him who had ob-
tained or won them; that they should be made the law-
ful inheritance of the family who bore them; and that to so much skill and attention should have been em-
ployed in the scientific improvement of heraldry, in rela-
tion to charges, blazonry, and marbling. See Dal-

—_away's Heraldry, 4to. p. 31, &c.

How long armorial bearings had then been held here-
ditary in England, is no where ascertained. If we re-
gard thofe only which partake of the French art of blaz-

ony, an hereditary right in them could only commen-
t at or about the era of the Norman Conqueft. But if we consider the simplicity of the ancient charges or devices as arms, an hereditary right to such might be

assigned to very remote ages. Cadwallader, who died about the year 690, bore a crofs patee fiched in the foot, as

Pater, he was prince of Wales in 843, and de
decended from Cadwallader by Idwallo, Roderic, Conan, and

Mervyn Frych.—Avaragus, the brother of Guiderus, and king of South Britain as early as the year 45, is said to

have borne the fame; from him the pedigree of Cad-

cwallader has been traced.

Another very early and remarkable instance is the fol-

lowing: In the reign of Kenneth II. king of Scot-

land, a near relation of that monarch being taken pri-

soner, and hung by the Picts, the king offered a great

reward to any one who would dare to rescue the captive.

It was not long before a brave soldier presented himself, saying,
saying, in old Scotch or Irish, "Dalzell." which signifies, "I dare." The dangerous task was accomplished; and the hero took the name of Dalziel, ancestor to the earls of Carnwath; and he had given him for armorial bearings, a naked man pendant, crest, a dexter arm in armour, grasping a sword: motto, "I dare."—

The origin of the hereditary arms of Hay, is thus related:—When the Scots fled before the Danes at Long Cartey, a husbandman named Hay, then at plough, with his two sons, matching the yoke in his hands, jumped the pursuit of the enemy, which gave his countrymen time to rally. Kenneth III. rewarded his valor by the gift of a much land as a hunting ground, i.e., the place where the birds settled. From this circumstance arose their crest. In the shield are three escutcheons, gules, which were given them because they threw themselves in between the king and the enemy, and thus rescued him. A bearing before their monarch with their shields covered with blood, he authorized them to bear argent three escutcheons gules. This monarch died in 993.—The arms of the family of Keith were alligned to them in 1006. Robert, a chief among the Catti, and from whom the family of Keith are descended, having joined Malcolm II., King of Scotland, at the battle of Cambric, in the year above-mentioned, was very instrumental in gaining the victory over the Danes; Camus, their general, having been killed by the hand of Robert, whereupon the king dipped his finger in Camus's blood, and drew strokes with it upon the victor's shield; aligning him the following arms: argent a chief paley of eight, argent and gules. This is also an example of very ancient arms taken from a circumstance which happened long before the conquest or the crusades, in the shield of Sir Hugh Williams, of Nant, in Carnarvonshire; who bears gules, a chevron ermine between three Saxon heads proper; which bearing was assumed in consequence of his having made three Saxon chiefs prisoners in the wars between the Welsh and Saxons.

Kingdoms, countries, corporations, and cities, had devices or arms at a very early date; as appears from the examples above recited of Mechlenburg, Germany, &c. The University of Oxford claims its arms as far back as the year 865; having been then presented with the royal standard of France by King Edward the Confessor. Ancestry, viz. azur, a cross argent, with seven feals appendant, opened at St. John's Gospel, between these crowns or. Fuller imagines these three crowns to be typical of three professions which Alfred the Great founded.—The arms of Wales borne by their ancient sovereigns were, quarterly gules and or, four lions pattant counterchanged. According to Sir William Dugdale, "Brute gave Camber, his third son, Cambria, with these arms: argent, three lions paffant regardant gules, which his posterity used until that country came to be divided into three distinct principalities."—The crofs of St. Andrew, we are told, was assumed as the arms of Scotland as early as the year 1573; and the harp, as the device for Ireland, at a still earlier period.—The ancient arms of England, viz. a crofs orny, were borne by Egbert as early as the year 802; to which four martlets were added by Edward the elder, his grandson, as noticed above.—See Knap's highly-entertaining "Anecdotes of Heraldry." The simplicity and antiquity of heraldic devices, are remarkably manifested in the original arms of France, the lily, of fleur de lis; adopted in allusion to the fable law by which women are forbidden to reign, left the fceptrre should take the place of the diadum. —Neque laborant, neque norit; "They toil not, neither do they spin," was the motto generally affixed to them. Of the origin of the fleur de lis, both Hugh Williams, of Llyfellglas, and Asch, say it is an emblem of the flower which grows by the river Lys, (Iris pseudacorus, Linn.) Which separated Artois and France from Flanders, after the marriage of Philip Augustus with Isabella of Hainaut. Dante's words are in the xxith Canto, del Purgatorio. Coramens venien di: for di Liso, (speaking of the twenty-four elders in Revelations.) They were walking being crowned with fleurs de lis. The poet precisely the fancied form in which he relates the infult done to Boniface VIII. in Anagni, in the xxth Canto:

"Veggio in Anagni intrar i Fior di Lifo, Et nel Vicario suo Chirito effer catto."

A single lily continued to be the bearing until the reign of Louis le Jeune, anno 1147, when their number was increased; and the escutcheons and mantles of the French knights began to be powdered with fleurs de lis, to give the greater splendour to their appearance in battle during the second crusade. Voltaire was of opinion that the number of lilies in the Gallic arms were never constant till the time of Philip Augustus; not till after his signal victory over the Germans, with the emperor Otho IV. at their head. This memorable battle was fought near Bouvines, in 1215. Otho's imperial standard was carried upon four wheels. It consisted of a long pole or staff, to which was fastened a painted dragon, as the emblem of destruction; over which was raised the imperial eagle of gilt wood. The royal standard of France was a gilt staff with colours of white silk powdered with golden fleurs de lis: and now," says Voltaire, "what had been long the fancy only of painters, came to be the arms of France." This great genius, however, was highly mistaken; every body knows that Voltaire did not excel in antiquarian knowledge; for, besides the influences to the contrary noted above, a very satisfactory one presents itself in the devices of the order of knights of Calatrava, founded in 1158, as well as in those of Alcantara, and St. James of Sword, which all terminated their crosses with a fleur de lis, and which even then had been long in use.—See Klengel, p. 157.

From what has been stated, it manifestly appears, that symbols or emblems, analogous to what are termed heraldic devices, have, as set forth at the beginning of this treatise, existed in all ages, and in all countries; and that many of them were, from the earliest epochs of time, considered as hereditary, appears also incontrovertible. "In the early days of heraldry, men took for their armorial bearings those things which were most useful or natural to them in their various pursuits. Thus the falcon, the greyhound, the talbot, the bugle horn, to name a few, were the emblems of the foresters, the sportsmen, the shepherds; and also of goats, which furnished them with milk. In doing this they accorded with the inhabitants of all countries who took a pleasure in the chase, or who led a pastoral life; and the higher we advance into the simplicity of the pastoral times, the more we shall perceive of this natural choice of emblems from the visible productions of nature, instead of mythological figures and monsters, the offspring of paganism and superstition. Such were the early symbols employed in the provinces of Wales. It was natural that they should place on their shields the figures of wolves which they hunted, as the destroyers of their flocks and children; and also of goats, which furnished them with milk. In doing this they accorded with the principle of all other nations in the choice of their emblems." See Mr. Dallaway, as still borne by many Welsh families; such...
such as a wolf issuing from a cave, a cradle under a tree, a child attended by a goat, &c.

It appears that the long want of surnames rendered heraldic devices, or coats of arms, extremely requisite, in order to distinguish or identify families and persons. Before surnames were adopted, it was common for the sons of one and the same father to assume such very different appellations, that it was impossible to know, by their names, that they were in any degree related. Such cuftoms were calculated to produce great confusion in families, and in the descent of estates, which could not be fet right by any means so well as by the use of hereditary bearings, which each of them retained, not with difference of coat, but of different nature and device. See the article Name. The art of blazonry, by appropriate armorial bearings, which each of them retained, not with different coats, but of different nature and device. See the article Name. The art of blazonry, by appropriate heraldic devices, or coats of arms, extremely requisite, was soon made capable of ascertaining the difference of coats or branches of the same family; so that it should appear, on the first inspection of a gentleman's shield, whether he was of the first, second, third, fourth, fifth, or sixth, branch of his house; and whether the fifth, second, third, fourth, fifth, or sixth, brother of his respective branch. These marks are called "distinctions of honours," and are set forth in the Engraving adapted to that section of the present article.

In the reign of our Edward I. who, previous to his acceding the throne, had taken a share in the eighth cross, caused coats of arms, escutcheons, and military equipment to become more splendid and sumptuous. Each chief, being a descendant of a knight, was now distinguished by having his arms depicted on the surcoat or mantle worn over his armour, and upon the caparisons of his horse; and they now assumed a particular badge placed upon the top of their helmet; which gave rise to the invention of crests, anno 1375.

The title or grant of coronets to a subjekt, first took place in the reign of Edward II., who delegated that authority to his son John de Eltham earl of Cornwall, who died in 1354. In most countries, those elevated by their rank into hereditary counsellors or peers of the crown, have been distinguished above the inferior orders by an ornamental emblem of royalty: but in Scotland the nobility seem not, in ancient times, to have been discriminated from the commons in that manner. In old regiments, in old seals, in churches, the arms of earls are not dignified with coronets; a distinction which probably was not assigned them before the commencement of the reign of our Edward I. Ordinarily, gold and silver were the ornaments of chivalry; but the use of the helmet, which gave rise to the invention of crests, was soon made capable of ascertaining the difference of coats or branches of the same family; so that it should appear, on the first inspection of a gentleman's shield, whether he was of the first, second, third, fourth, fifth, or sixth, branch of his house; and whether the fifth, second, third, fourth, fifth, or sixth, brother of his respective branch. These marks are called "distinctions of honours," and are set forth in the Engraving adapted to that section of the present article.

In the reign of our Edward I., who, previous to his acceding the throne, had taken a share in the eighth cross, caused coats of arms, escutcheons, and military equipment to become more splendid and sumptuous. Each chief, being a descendant of a knight, was now distinguished by having his arms depicted on the surcoat or mantle worn over his armour, and upon the caparisons of his horse; and they now assumed a particular badge placed upon the top of their helmet; which gave rise to the invention of crests, anno 1375.

The title or grant of coronets to a subjekt, first took place in the reign of Edward II., who delegated that authority to his son John de Eltham earl of Cornwall, who died in 1354. In most countries, those elevated by their rank into hereditary counsellors or peers of the crown, have been distinguished above the inferior orders by an ornamental emblem of royalty: but in Scotland the nobility seem not, in ancient times, to have been discriminated from the commons in that manner. In old regiments, in old seals, in churches, the arms of earls are not dignified with coronets; a distinction which probably was not assigned them before the commencement of the reign of our Edward I. Ordinarily, gold and silver were the ornaments of chivalry; but the use of the helmet, which gave rise to the invention of crests, was soon made capable of ascertaining the difference of coats or branches of the same family; so that it should appear, on the first inspection of a gentleman's shield, whether he was of the first, second, third, fourth, fifth, or sixth, branch of his house; and whether the fifth, second, third, fourth, fifth, or sixth, brother of his respective branch. dominions. This monarch, in 1466, instituted an order of Knights of the Garter in Ireland; but it was abolished by parliament in 1494.

The battle of Bosworth conveyed the right of regal honours from the Plantagenets to the Tudors, in the person of Henry VII. who was maternally descended from the female line of the Lancastrian branch. To cement the interests of the contending houses, he received the hand of Edward IV.'s daughter, by which consummation he united the red and white roses, the badges of the houses of Lancaster and York. During this reign the dragon and the greyhound were the supporters of the royal arms, and the lion on the dexter side. The supporters to it; which proves that the example was quickly followed. This is shown in the plate of seals published in the "History of the Isle of Wight," by the late Sir Richard Worsley. Henry IV. who succeeded Richard, assumed the "le champ de drap d'or." the field of their shield; and likewise his supporters; but they were varied by subsequent sovereigns. Queen Elizabeth, during her reign, had the dragon as a supporter on the sinister side of the royal arms, and the lion on the dexter side. The supporters, as now emblazoned, took place in the reign of James I., who added the unicorn of Scotland to the lion of England; and thus they have ever since continued.

The origin of these emblematic guardians or supporters of the shield, is said to have taken its rise from the name of any challenger, whose defiance was signified by the higher nobility; and have been very sparingly granted to commoners.

Henry VIII. was the most sumptuous of all the kings of England in the display of magnificent heraldic ensigns; and this was manifested at the gorgeous tournament proclaimed in conjunction with Francis I. of France, celebrated in 1520 in the plains of Picardy; and on which occasion the furniture and caparisons were so costly and brilliant, that the place where the tournament was held, acquired the name of "le champ de drap d'or." — See the article England, vol. vi. p. 634; and France, vol. vii. p. 699.

Henry made tilts and tournaments the chief entertainment of the court; and he discontinued, at last, many a valiant knight. He ran a tilt against the famous Granvelle, which was to have been limited to two hundred only; though in his own reign it was much increased. Not less than three thousand patents have been granted to commoners.

The union of the two crowns, under James I. brought the Scotch and English titles into a closer alliance. He conferred ducal honours, and settled the precedence of his court; and he disinherited, at joust, many a valiant knight. He ran a tilt against the famous Granvelle, which was to have been limited to two hundred only; though in his own reign it was much increased. Not less than three thousand patents have been granted to commoners.

The union of the two crowns, under James I. brought the Scotch and English titles into a closer alliance. nours, and elegant manners, were made to reign at court. Accustomed to live in retirement with the truly few who followed his fortunes, he had put on by habit the eafe of an equal, rather than the lily of a sovereign; yet he never lost his dignity, even when surrounded with the little vanities and profudences. This captivating cohefion was copied by the great; and from hence arose that pleasing freedom and urbanity which continues to animate our mixed companies. If flate diffenfed with some of her folemn appennages, she gained ten thousand graces and amabilities. If we except the title of duchefs and duke, which this monarch gave to his fonifted ladies, and to the sons he had by them, he was extremely careful of the peerage. It was proposed, at the refolution, to inftitute a new order of knighthood, to com- memorate the king's preservation in the oak at Bofcofel, after the battle of Worefer, who were to be called "Knights of the Royal Oak," and no lefs than fix hundred and eighty-seven baronets, knights-bachelors, and gentlemen, were named to receive this honour, and a die for the device or medal was funk, as a ditinguifhing badge; but the fcheme was laid aside, because the King imagined it might tend to keep alive thofe divisions and animofities, which it was the height of political prudence to extinguifh. His majefy therefore endeavoured to make the order of Knighthood already exifiting, and he gave the laft fahih to the buf hurried of the peerage, by fetting the rules of prefedency.

Vifcount Cranburne, having been the firft of that title, in the reign of James I. who was allowed to wear a co- ronet; James II. gave it to barons; but he was vory flattering of confowing titles. He gave the ducal honour to his natural fon; and the title of countefs to two la- dies, one of whom was his miftres. The other honours which he conferred were, one marquifate, two earldoms, and five baronies. He conferred titles upon feveral of his partizans after his abdication; but thefe were never ad- mitted upon the records of the Herald's College, nor recognized by the laws of England. His vengeance was singularly manifefted in 1689, by procribing no lefs than two archbishops, one duke, feventeen earls, feven coun- tefles, twenty-eight vifcountes, two vifcountfells, feven bifhops, eighteen barons, thirty-three baronets, fifty-one knights, eighty-three clergy men, and two thoufand one hundred and fifty other titles, any of them being given to any peer. This abdication, however, defeated his revenge.

During the reign of William and Mary, there were few peers created, except the fix foreign favourites. The greatfet fingularity was, that no lefs than nine noblemen were advanced to the rank of dukes, though none of them maintained any alliance with the blood-royal; which had never been confecrated by fummons, merge into higher titles. Precedence was conferred to them in the manner of the old crown, and of the fame rank. The Scotch baronies by fummons, merge into higher titles. 

The queen, like William, raised many of the peers to higher honours; and some Scotch and Irish no- 

When George I. ascended the throne, he appeared fo little acquainted with the etiquette of his nobility, or the prerogatives of his crown, that he confented to a fuf- 

Ending, by fubmitting the English peerage to its then exis- 

This has arisen from the bleffing derived to us by the length of his majefy's reign, during which time there have become extinct; and partly from the vast increment of wealth, which has been poured into these kingdoms from every quarter of the globe. This has made it neceffary to call uftuch a number of the richest commoners, as is fufficient to maintain a fuitable balance in the fe- 

The order of the Bath is very properly conferred as a 

The Thistle has been conferred on many of the meritorious brave of Scotland; and the order of 

2
nity on the Irish nation. The long neglected but highly respectable title of _bourees_, if completely revived, might be employed to make an admirable distinction for gallant officers in our army and navy, where the order of the Bath shall be thought too high, and simple knighthood, now in so little repute, be deemed too low. We can hardly do too much credit to brave men who fight our battles abroad, while we live amidst every blessing of peace and comfort at home.—See Noble's "College of Arms," a work replete with curious and valuable information.

Whatever idea republican governments may form of equality amongst men, and of confining public remuneration to the utmost rather than to beggary, the fallibility and insufficiency thereof must be obvious to every critical observer of men and manners. It has been judiciously remarked, that the highest gratification to the minds of defending men is the hope of existing in their descendants. But if pecuniary or personal reward were the utmost, it would be to limit our estimations of well-earned merit to the fleeting moments of individual life, while the remembrance of having deserved well of society would scarcely reach the knowledge of a rising generation. With a mind more eminently enlarged, his majesty has honoured with hereditary armorial bearings, and ennobled more persons for naval and military triumphs, than perhaps all the monarchs who have preceded him.

Whether, therefore, the great body of nobility be considered as hereditary or otherwise, it seems to follow very clearly, that it must have been in all ages, generally speaking, made up of the most meritorious, respectable, and virtuous, part of mankind. "The distinction of rank and honours," says William Blackstone, "is necessary in every well-governed state, in order to reward such as are eminent for their services to the public, in a manner the most desirable to individuals, and yet without burden to the community: exciting thereby an ambition, a laudable ardour, and generous emulation, in others. And emulation, or virtuous ambition, is a spring of action which, however dangerous or inviolable in a mere republic, or under a despotic sway, will certainly be attended with good effects under a free monarchy; where, without destroying its existence, its excises may be continually restrained by that superior power from which all honours are derived. Such a spirit, when nationally diffused, gives life and vigour to the community; it feeds the wheels of government, and makes it function with vigour. Whenever a wife regulator, may be directed to any beneficial purpose; and thereby every individual may be made subservient to the public good, while he principally means to promote his own particular views. A body of nobility is also more peculiarly necessary in our mixed and compounded constitution, in order to support the rights of both the crown and the people, by forming a barrier to withstand the encroachments of either. It creates and preserves that gradual scale of dignity, which proceeds from the peer to the prince; rising like a pyramid from a broad foundation, and diminishing to a point as it rises. It is this ascending and contracting proportion that adds stability to any government; for, when the government is too independent and separate branch of the legislature. If they were confounded with the mass of the people, and like them had only a voice in electing representatives, their privileges would soon be borne down and overwhelmed by the popular torrent, which would effectually level all distinctions. It is therefore highly necessary that the body of nobles should have a distinct assembly, distinct deliberations, and distinct powers, from the other branches of the constitution."

It would lead to details beyond the limits of our plan, were we to explain the origin and growth of the different privileged orders. Suffice it to say, that the prerogatives of the ancient nobility throughout Europe, may be referred to the following classes: the ones being the origin of war of their own private authority; the right of life and death in their own territories; the levying of imposts; the raising of troops, the collecting of money, and the making of provincial laws. These were considered as their unalienable rights under the early feudal jurisprudence. It were to be wished that some inquisitive and judicious antiquary would collect from the old English laws and records, all the circumstances to be found which have a relation to these topics. He certainly could not offer a more valuable present to the public. These powers were exercised by all the higher nobility among the Anglo-Saxons; and while the right of private war was acknowledged as a legal prerogative of nobility, regulations were made to adjust its nature and exertion. Dr. Robertson seems to imagine, that in England, after the Norman invasion, the nobility lost, or did not exercise, the right of private war. See Hiji. Chs. V, vol. i. It is true that the historians of England have not been very attentive to record the private wars of the Anglo-Saxons. But it is known that they were not forgotten, and that the nobility had a considerable share of influence, in the higher orders of its nobility, the right of private war was as much inherent as the coinage of money, the holding of courts, or any other of their prerogatives; and that these received not their last and effectual blow till the reign of Henry VIII.

The right of peerage seems at first to have been wholly territorial; that is, annexed to lands, honours, care, and compounded constitution, in order to support the rights of the crown and the people, by forming a barrier to withstand the encroachments of either. It is this attending and contract-quality, like a pyramid from a broad foundation, and diminishing to a point as it rises. It is this ascending and contracting proportion that adds stability to any government; for, when the government is too independent and separate branch of the legislature. If they were confounded with the mass of the people, and like them had only a voice in electing representatives, their privileges would soon be borne down and overwhelmed by the popular torrent, which would effectually level all distinctions. It is therefore highly necessary that the body of nobles should have a distinct...
of his children losing the right in case he never takes his seat; for they will succeed to their grandfather; numerous instances of which will appear in the following history of our nobility. Creation by writ has also one advantage over that by patent; for a person created by writ holds the dignity to him and his heirs, without the necessity of any words to that purport in the writ; but in letters patent there must be words to direct the inheritance, else the dignity only endures to the grantee for life. For a man or woman may be created noble for their own lives, and the dignity not descend to their heirs at all, or descend only to some particular heirs, as where the peerage is limited to a man and the heirs male of his body by his present lady, and not to such heirs by any former or future wife.

One of the great privileges of the nobility is, the right of being tried by their peers. It is said, however, that this does not extend to the bishops; who, though they are lords of parliament, and sit there as peers of the realm. If a woman, noble in her own right or by marriage, shall be tried before the same judicature as peers of the realm, it must cease with their trial for life.

As to peeresses, no provision was made for their trial when accused of treason or felony, till after Eleanor duchess of Gloucester, wife to the lord protector, had been accused of witchcraft, and found guilty of witchcraft, in an ecclesiastical synod, through the intrigues of cardinal Beaufort. This very extraordinary conviction gave occasion to a general fluctuation, and an act of 23 Edward IV. c. 9, which enjoins, that peeresses, either in their own right, or by marriage, shall be tried before the same judicature as peers of the realm. If a woman, noble in her own blood, marries a commoner, she still remains noble, and shall be tried by her peers; but if she be only noble by marriage, then by an after-marriage with a commoner, she loses her nobility; it is not in her blood; therefore, as by marriage it is gained, so by marriage it may also be lost. Yet if a duchess-dowager marries a baron, she continues a duchess still; for all the nobility are peers, and therefore it is no degradation. A peer, or peeress, either in her own right or by marriage, cannot be arrested in criminal cases; for they have their own courts of law, and colleges annexed to their peerage in the courts of judicial proceedings. A peer, sitting in judgment, gives not his verdict upon oath, like an ordinary person, but "upon his honour." He answers also to bills in chancery upon oath, like an ordinary person, but "upon his honour." He answers also to bills in chancery upon oath, like an ordinary person, but "upon his honour." He answers also to bills in chancery upon oath, like an ordinary person, but "upon his honour." He answers also to bills in chancery upon oath, like an ordinary person, but "upon his honour." He answers also to bills in chancery upon oath, like an ordinary person, but "upon his honour." He answers also to bills in chancery upon oath, like an ordinary person, but "upon his honour."
crown to her judgment much like to a close crown; and underwitu with a cipher which she took to be king's cipher, H.R.

Wriothesley Garter was then ordered to advertise all foreign ambassadors that the title of Norfolk and the earl of Surrey his fon were traitors, &c. In the confessions of the duke, extorted by a fear of death, are these articles, which contain a surrender of hereditary rights, such as the most suspicious tyranmy only could have wished to suppreffe. Article 2. Likewise I confess, that I have concealed high treason in keeping secret the false and traitorous act, most presumptuously committed by my fon Henry Howard, earl of Surrey, against the king's majesty and his laws, in putting and using the arms of St. Edward the Confeflor in his fechine of arms, which faid arms appertain to the king only of thefe realms; whereunto the faid earl by any means or way could make any title or claim by me or any of mine or his ancestors. Also I likewise confefs, that to the peril and danger of the king's majesty and the difinherifon of his fon, Prince Edward, &c. I have againft all right and againft authority borne in the firft quarter of mine arms, ever since the death of my father, the arms of England, with a difference of three labels of silver, which are the proper arms of my faid father, the arms of England, with a difference of three first quarters of mine arms, ever since the death of my highnefs might be difturbed or interrupted in his crown and dignity, &c. which I know and confefs to be high treason by the laws of this realm. T. NORFOLK.

Herbert's History of Henry VIII. p. 625, &c.—Such were the wretched means referred to for the gratification of indulgence, which famefully, and criminally committed by my fon Henry Howard, earl of Surrey, against the king's majesty and his laws, in putting and using the arms of St. Edward the Confeflor in his fechine of arms, which faid arms appertain to the king only of thefe realms; whereunto the faid earl by any means or way could make any title or claim by me or any of mine or his ancestors. Also I likewise confefs, that to the peril and danger of the king's majesty and the difinherifon of his fon, Prince Edward, &c. I have againft all right and againft authority borne in the firft quarter of mine arms, ever since the death of my father, the arms of England, with a difference of three labels of silver, which are the proper arms of my faid father, the arms of England, with a difference of three first quarters of mine arms, ever since the death of my highnefs might be difturbed or interrupted in his crown and dignity, &c. which I know and confefs to be high treason by the laws of this realm. T. NORFOLK.

Walpole's Royal and Noble Authors vol. i. p. 98.

It has been a much-miftaken idea that coats of arms have been chiefly, if not solely, granted for military prowess, or feats in war. That these took the lead, is perhaps more reasonable; but it appears that a very fevere law, which I find, was then put in operation, that arms, which are not proper to the faid prince, &c. whereby I have committed the fad occafion that his highnefs might be difturbed or interrupted in his crown and dignity, &c. which I know and confefs to be high treason by the laws of this realm. T. NORFOLK.

perors, kings, and sovereign states, usually bear; as being annexed to the territories, kingdoms, and provinces, they poffefs.

Arms of Pretextation, are thofe of fuch kingdoms, provinces, or territories, to which a prince or lord has fon claim, and which he adds to his own, although the faid kingdoms or territories be poffefled by a foreign prince or other lord.

Arms of Concection, or augmentation of honour, are either entire arms, or the addition of fome figures, given by princes as a reward for extraordinary services.

Arms of Community, are thofe of bifhoprics, cities, universities, academies, focieties, companies, and other bodies corporate.

Arms of Patronage, are fuch as governors of provinces, lords of manors, patrons of benefices, &c. add to their family-arms, as a token of their superiority, rights, and jurifdiction.

Arms of Family, or paternal arms, are thofe that belong to one particular family, that diftinguifh it from others, and which no perfon is fuffered to affume without committing a crime which sovereigns have a right to refrain and punith.

Arms of Alliance, are thofe which families, or private perfon, take up and join to their own, to denote the alliances they have contracted by marriage.

Arms of Succession, are fuch as are taken up by perfon who inherit certain effates, manors, &c. either by will, entail, or donation, and which they generally impale or quarter with their own arms.

DEFINITIONS OF HERALDIC TERMS.

Previously to our giving a comprehensive decription of all the arms which are the component parts of any coat of arms, it must not be ufeful to offer to the reader a clear and concise explanation of the scientific terms which occur fo often in treatifhes of heraldry; and, in order to facilitate the understanding of Latin and French works relative to this fubjeft, we have fpotted, as often as we could with fufficient authority, their correfponding expreffions in thofe languages. We have abftracted, however, repeating feveral of the words that are explained more fully in the course of this treatife.

ABATEMENT, a device added to coats of arms, to denote fome effate, and whereby the original dignity of coat-armour was rendered of lefs efteem. Lat. diminutioe armorum; Fr. abatement.

ACCESSION, the coat of arms of a perfon, or family, exterior ornaments of the shield, helmet, mantlings, motto, &c. together with the quarterings which they may have acquired by alliances or other means. Perpetual Achievements are termed hatchments. Lat. insignia gensititia; Fr. armories.

ADOURED, dignifies borne or fet back to back. Fr. adueta.

ADUMBRATION, the shadow only of any figure, outlined and painted of a colour darker than the field. Lat. adumbratio.

AFFRONTE, fet with the face looking frontwise. Lat. afronte.

ALLIER, an imaginary bird, made to resemble a mutilated eagle, and fuid to be used in the French blazonry to denote vanquished Imperialifts. Lat. aquile mutila; Fr. aiglette.

AMETHYST, a term used instead of purpure, or purpule, in blazoning the arms of the English nobility. See the Paradigm.

ANNULET, a circle, fometimes borne as a charge in coats of arms, and foo added to them as a difference for the fifth fon. Lat. annulus; Fr. anneau.

APUMET, a hand opened and upright. Lat. argurnet, but as these words, Or, Argent, are used adjectively, the Latin ought to be aureus, argentaeus.

ARMED, a word ufe to express the horns, hoofs, beak, or talons, of any beast or bird of prey, when borne of a different tincture from their bodies. Lat. armatus; Fr. armé.

ARMORIST, a perfon skilled in the knowledge of coats of arms.

ARRONDE, denotes a charge, or part of it, made of a round form.

ASSESSED, is faid of the horns of flags or deers, when of a different tincture from their bodies or heads. Lat. armatus; Fr. aceré.

AUGMENTATION, denotes a particular mark of honour, granted in addition, by the sovereign, either quartered with the family-arms, or borne on an escutcheon, chief, canton, &c.

AZURE, is ufed to express blue. In heraldry engravings, this colour is denoted by horizontal lines drawn from the dexter to the sinister side of the escutcheon. Lat. caracas; Fr. azur.

BADGE, a sign or mark by which the bearer is to be diftinguifhed.

BANDED, a head, or any figure tied round with a band of a different tincture. Lat. ligatus; Fr. lié.

BANNER, a flag, standard, or enign, carried at the end of a lance, or pole, and generally made square. There are fome families in Europe who fill bear their coat of arms in an escutcheon of this form, as that, for example, of de Coucy, originally of Picardy. Lat. vexillo-, fr. bannier.

BANNERTET, a very ancient title of honour, faid to derive its institution from the Romans, towards the end of the emperor Gratian's reign. Their shield was square, and they bore their arms in a banner of the fame form.

BAR, a diminutive of the fefs. Lat. velis; Fr. barre.

BARBED, is ufed to denote the green prickly leaves, which are repreffed on the outside of the full-blown rofe, and the pheon of an arrow. Lat. barbatus; Fr. barbe.

BARON and FEMME, ufed in blazoning the arms of a man and his wife marffhalled together.

BARRULET, a diminutive of the bar. Lat. fasciö; Fr. barette.

BARRY, denotes a field divided horizontally into feveral equal partitions of two different tinctures alternately difpofed. If the division be odd, the field muft be firft named, and the number of bars mentioned. Lat. fasciolatus; Fr. barette.

BARRY-BENDY, denotes a field divided into even parts, both barwise and bend-wise.

BARRY-WAYS or BARWISE, a charge difpofed after the manner of a bar. See Heraldry Plate II. fig. 24.

BAYON, a flag or truncheon, borne in English coats of arms, as a badge of illegitimacy. Lat. bacillus; Fr. bizon. See Heraldry Plate III.

BATTERING-RAM, an engine much in ufe among the ancients, before gunpowder was invented, for beating down the walls of the places they besieged. Lat. ari; Fr. biler.

BATTLEMENTS, the interfaces of castle-walls or towers.

BEAKED, faid of the bills of birds, when they are of a different tincture from the body. Lat. rostratus; Fr. beceta.

BEAVER, that part of the helmet which defends the sight; called by fome heralds, garde vifure; vifor.

BELLED, having bells affixed to fome part of the charge; generally faid of falcons, hawks, &c.

BEND, one of the honourable or prinicipal ordinaries. Lat. tenia; Fr. bande. Bend-finifter, is that which comes from the sinister to the dexter fide of the shield; and we fay, "in bend," when figures borne in coats of arms are placed obliquely, from the dexter chief to the sinister base, as the bend lies, or vice verfa. See Plate III.

BENDLET, a diminutive of the fourth part or bend. Lat. teniola; Fr. bandelette.

BENDY, a field, divided diagonally into an even number
number of partitions, varying in metal and colour. See Plate III. fig. 35. In England the number of divisions is always even; in other countries this is not regarded; but, when the number is uneven, they are called bendlets. 

Bendlet, or BEZANTS', means full of bezants, and is used to denote a field, ordinary, or charge, covered more or less with bezants. 

Bendlets, or BEZANTS, were the current coin of Byzantium, now Constantinople, and supposed to have been introduced into coats of arms by those who were at the holy wars. Lat. bizantius nummus; Fr. bezant.

Billets, oblong squares, frequently met with in English coats of arms. Lat. latericulis; Fr. billets.

Billet, a field or charge figured with billets. This expression is used in blazoning billets that exceed two; otherwise the number of partitions must be expressed. 

Blazon, to draw or express in their proper colours all that belongs to coats of arms. 

Blazonry, the art of blazoning or describing properly coats of arms.

Bordure, an edging round the shield, which sometimes, chiefly when wavy, serves for the same purpose as the Bâton, to indicate an illegitimate descent. Lat. fimbria; Fr. bordure.

Bouton, is said of a crofs which terminates at each end in three buds or buttons.

Braced, is applied to two figures of the same sort, interlacing one another.

Brest, a charge or ornament embattled on both sides.

Carossed, is said of the head of beasts born without any part of the neck, and full-faced.

Cannets, ducks, represented without any beak or feet. Lat. anates; Fr. canettes.

Canton, the French word for corner; it is a square figure, placed at one of the upper angles of the shield. See PLATE IV.

Chape, or CHAPPE, is said of a field that has a cope of another tincture, spreading from a point in the middle of the chief, to the two base angles of the shield.

Chapeau, an ancient cap of dignity, formerly worn by nobility, made of crimson velvet in the outside, and lined with fur. -

Chevele, a diminutive of the chevron. When there is more than one chevron, they are called chevrons, as they must be smaller. 

Chief, one of the honourable ordinaries. Lat. sigillum; Fr. chevron.

Chevronet, a diminutive of the chevron. When there is more than one chevron, they are called chevronets, as they must be smaller. 

Chief, one of the honourable ordinaries. Lat. sigillum; Fr. chevron.

Civic Crowns, these were reckoned more honourable than any other, though composed of no better materials than oak-boughs. 

CLEF, said of a crofs spreading from the centre toward the extremity, nearly like a crofs recumbent; with this difference, that the crofs recumbent ends with an angle in the middle of the extremity, by lines from the two points that make the breadth, till they come to join. -

Cockatrice, a winged heraldic monster, with the head, comb, and feet, of a cock, and the tail of a dragon.

Cognizance, a term which some confound with that of crofs, supposing them to be synonyms terms; but this is an error, for crofts were only worn formerly by heroes of great valour; but cognizances were badges which subordinate officers, and even foldiers, bore on their shields, for distinction-fake, being not entitled to a croft. 

Compone, a border, pale, bend, or other ordinary, made up of squares, of alternate metal and colour. Lat. compoeta; Fr. compofé.

Contourn', denotes any figure with its head turned toward the finifter side of the escutcheon. 

Cotise, one of the diminutives of the bend. It is seldom borne but in couple, with a bend or bendlet between them. See Plate III. fig. 31.

Coquint, the posture of any animal that is lying on its belly, with the head lifted up. 

Counter, signifies either contrarywise or in opposition of any metal with a colour. 

Counter-changed, denotes the intermixture or opposition of any metal with a colour. Lat. transmutatus; Fr. parti de l'un en l'autre.

Counter-flory, a trefoile, where the fleurs-de-dis are opposite to each other.

Counter-passant, two animals passing the contrary way to each other.

Counter-salarant, two animals leaping different ways from each other.

Counter-vair, denotes that the little bells, of which vair is composed, are ranged base against base.

Couched, is said of the head, or any limb, cut off from the body. It is also used to denote such crofts, bars, &c. as do not touch the sides of the escutcheon.

Couple-close, one of the diminutives of the chevron; but is seldom borne in coats of arms.

Courant, is said of any animal running. Lat. curant; Fr. courant.

Couplet, is said of a lion, &c. either paffant, rampant, or in any other position, with its tail between its legs.

Cramfette, a small cramp-iron; also the chape of the scabbard at the bottom of a broad fword.

Cramponet, a crofs that has at each end the shape of a cramp-iron.

Crepelle, a word used by some heralds instead of embattled, to express the outlines of any charge, drawn like the battlements of ancient towers. Lat. crenale.

Crescent, the half-moon with its horns turned upward, which is the general position of this charge in coats of arms. Lat. luna cornuta; Fr. croissant.

Crest, the figure placed above the helmet in an achievement. Lat. cresta; Fr. cimier, from cime, top, summit.

Crested, is said of a cock, or other bird, whose crest or comb is of a different tincture from the body.

Crowned, any animal whose hair is of a different tincture from its body.

Crowned, any animal whose hair is of a different tincture from its body.

Debruised,
DEBRUISED, denotes the restraint of any animal debarr'd of its natural freedom, by another charge, or any of the ordinaries, being placed over it.

DECRESCENT, is said of a moon in its wane, whose horns are turned toward the lesser fide of the escutcheon.

DICHET, formerly used to describe an animal, whose limbs had been cut; but the term coup'd is now used instead of it.

DENTICULATED, is said of a line or an ordinary formed outwardly, like the imbricated; but differing from it in having smaller and closer incises, resembling a row of teeth.

Dexter, is used in heraldry to signify the right side of the shield.

DIAMOND, is used by some heralds to denote the colourable, in blazoning the arms of the nobility. Lat. adamant; Fr. diamant.

DIAPERED, is said of a field divided into planes, like fretwork, and filled with variety of figures. Lat. duriatus; Fr. diapre.

DIFFERENCE, a figure added to coats of arms to distinguish one family from another, and to show how distant younger branches are from the item.

DIMIDIATED, a word used in blazoning an animal divided into two parts, chiefly applied to demi-lions, &c. Lat. dimittatus; Fr. deme.

DIMINUTIVE, a word used to denote heraldic charges controuled, either in breadth or length, from the respective dimensions appertaining to the principal ordinary.

DORMANT, the posture of a lion, or any other beast asleep. Lat. dormiens; Fr. dormant.

DORSET, having two tails.

DOUBLE-TREASURE, two trefores or orles, one within the other.

DOUBLINGS, the linings of robes of plate; also the rows of fur, set on the mantles of noblemen.

DOVETAIL, a partition, wherein the two different tinctures are set within one another, in such a manner, as to represent the form of the tails of doves, or wedges reversed.

DRAGON, an imaginary creature, commonly represented with four feet, two wings, and a serpent's tail. Lat. draco; Fr. dragon. The dragon is said to be the emblem of vigilance and safeguard. The ancients and moderns, when speaking of their being possessed. Confecrated by the religion of the earliest people, and particularly the Chines; having become the object of their mythology, the minister of the will of their gods, the guardian of their treasures: obedient to the power of enchantresses, and entering even into the divine allegories of the most sacred collections, it has been considered by the feft poets, and portrayed with all the colours that could embellish its form; the principal ornament of pious fables, invented in the remotest ages, subdued by heroes, who combated for a divine law; considered as the emblem of the splendid achievements of valiant knight-errants, it has enlightened the poetry of the moderns, as it animated that of the ancients; sometimes clothed with the greatest power, destroying the victims of its fury by a single look, transporting itself through the clouds with the velocity of lightning, striking like a thunderbolt, uniting the agility of the eagle, the strength of the lion, and the subtility of the serpent; sometimes auming even the human figure, endowed with an intelligence almost divine, and adored even at present in the vast kingdoms of the east, the dragon has been all things, and has been found every where, but in nature. From one of its supped qualities this chimerical being has been adopted for the supporters of the city of London, as if to watch over the immense wealth which this emporium of the world contains. See Plate V. fig. 69.

DUCAL, pertaining to a duke; as a ducal coronet, &c.

EAGLET, a term used in blazoning several eagles in a shield.

ENCODED, this is said of any figure or charge that is bent, or crooked like a bow.

EMERALD, is substituted instead of cerr, in blazoning the arms of the nobility.

ENDOURES, one of the diminutives of the pales.

ENSILED, is a word whose blade is run through a head, or any other charge; as, ensiled with a head, &c.

ENGRAULS, applied to croisles, saltiers, &c. when their extremities enter the mouth of a lion, or any other animal.

ENWALLED, broken, like the leaves of a tree notched by hailstones; it is said of partitions, borders, or ordinaries, having little arches, or semicircles struck out of them, the points of which enter the field, being the reverse of inviolate. Lat. friatus; Fr. engralle.

ENHANCED, applied to bearings, placed above their usual situation, which chiefly happens to the bend or its diminutives.

ENSIGN, a badge or mark of distinction, rank, or office.

ENSIGNED, in blazoning a charge, means decorated with some kind of ornament. Lat. insignitus.

ERMINE, black spots on a white field; but if the word plain be used with it, it denotes white fur.

ERMINES, the reverse of ermine, &c. white spots on a black field.

ERMOINS, the field or, and the spots black.

ESCUTCHEON, is sometimes used to express the representation of the whole coat of arms, or only to signify the field that contains the charges. Lat. sectum; Fr. ecus.

ESCUTCHEON OF PRETENCE, a small escutcheon, on which a man carries the coat of arms of his wife, being an heiress.

ETOILE, a star, by many confounded with the star with fix waved rays, and the mullet with five plain points. Lat. stella; Fr. etoile. See Plate V. fig. 65.

ESS, one of the honourable ordinaries. Lat. fascia; Fr. fesse.

ESS-POINT, the centre of the escutcheon, so called because it is the point through which the fess line is drawn, when the field is parted per fess.

ESSWISE, a charge disposed after the manner of a fess.

FIELD, the surface of the field or escutcheon, which contains the charge or arms. Lat. campo; Fr. champ.

FIGURED, is said of those bearings which are depicted with a human face.

FILET, the only diminutive belonging to the chief.

FIMBRIATED, an ordinary, &c. having a narrow border or hem of another tincture. Lat. fimbriatus; Fr. fimbrié.

FITCHIE, or FITCHY, is said of croisles when the lower branch ends in a sharp point. Lat. figibilis; Fr. fiché.

FLANK, that part of the side of an escutcheon which is between the chief and the base.

FLANCHES, or FLANCHES, heraldic figures. See Subordinaries.

FLEXED, bent. Lat. flexus; Fr. fléché.

FLEUR-DE-LIS, or FLOWER-DE-LUCE, a charge frequently met with in coats of arms. See description of Plate V. fig. 69.

FLORE, signifies flowered, or adorned with the fleurs-de-lis. Lat. lilianus; Fr. fléri.

FORMES. See Pattee's.

FOURCHY, denotes forked, or divided at the ends; therefore, a crois fourchy is a cros forked at all its extremities. Lat. furcatus; Fr. fourchu.

FRET, a figure resembling two little sticks lying flatwise, and interlaced within a mane.

FRETTY, a field or ordinary covered with eight pieces, or pieces, interlacing one another, in the manner of a fret.

FUR, is used in heraldry to denote the linings and doublings of mantlings in achievements, and likewise different variegated colours; as ermine, erminois, &c.
HERALDRY.

Fusil, a figure longer, and more acute, than the lozenge. Lat. fusus; Fr. fusil.

Fusily, a field or ordinary covered with fusils.

Gamb, denotes the whole fore-leg of a lion, or other creature, borne in coats of arms. If it is couped or erased near the middle joint, it is called a paw. It pro－pens to denote strength. Lat. ernis; Fr. jambe. See Plate V. fig. 30.

Garb, or Garb, signifies a shuf of any kind of corn. Lat. sphenicus; Fr. gerbe.

Gardant, denotes a lion or other animal full-faced, or looking right forward.

Garter, the title of the principal king of arms in England. Lat. garterus; Fr. jarretiere. See Plate V. fig. 51.

Gaze, is said of bucks and flags flanding with a full face, and their four feet on the ground.

Gemas, signifies double, and is therefore used to denote a double bar. Lat. geminus; Fr. jamelle.

Goblet. See Compound.

Golpes. See the description after the article Tinctures.

Gorged, is said of any animal that has a collar about its neck.

Griffen, Griffon, or Gryphon, a fabulous animal, said to be generated between the lion and the eagle, and very early introduced into armory. See the description after the article Tinctures.

Habited, denotes any figure clothed.

Hatchment, the coat of arms of a person deceased, usually placed on the front of a house, whereby may be known what rank the deceased person was of, when living; and distinguished in such a manner as to enable the beholder to know whether he was a bachelor, married man, or widower; with similar distinctions for women.

Haurient, is the reverse of engrailed; it has the points upward, and the form of the shield on which single ladies and widows bear their coats of arms. Lat. incurvus; Fr. couronné. See Plate VI. fig. 102.

Inescutcheon, a small escutcheon borne within the shield, or upon an ordinary.

Increment, is said of any animal that has a collar about its neck.

Indented, signifies a double bar. Lat. geminus; Fr. jamelle.

Impaled, is said of any animal that has a collar about its neck.

Impale, to enjoin two coats of arms palewise; with similar distinctions for women.

Impaled, is said of any animal that has a collar about its neck.

Increscent, a moon whose horns are turned toward the dexter side of the escutcheon.

Indented, signifies a double bar. Lat. geminus; Fr. jamelle.

Inverted, is said of any animal that has a collar about its neck.

Inverced, is a term used to signify the gills of a cock.

Inverted, is said of the tongue of a bird.

Invected, is the reverse of engrailed; it has the points upward, and the form of the shield on which single ladies and widows bear their coats of arms. Lat. incurvus; Fr. couronné. See Plate VI. fig. 102.

Irregular, is applied to any bear used in the wrong way. Wings are said to be invested when their points are downward.

Irradiated, decorated with apparent rays or beams of light. Lat. radiatus; Fr. rayonné.

Issuant, this is said of rays, or other charges, coming out of any part of the escutcheon, and the small arches or semicircles toward the centre of the field. Lat. incelsus; Fr. cernués.

Invected, is the reverse of engrailed; it has the points upward, and the form of the shield on which single ladies and widows bear their coats of arms. Lat. incurvus; Fr. couronné. See Plate VI. fig. 102.

Label, the most honorable mark of difference, serving to distinguish the coat of arms of the eldest son from the younger. Lat. lambellae; Fr. lambels.

Lanced, a term used to signify the tongue of a bird or beast, when it differs in tincture from the body.

Lioncel, a young lion; used in blazoning arms, when there are more than one lion in the same field.

Loned, is used to denote the same posture of beasts of chase, as crouchant is for those of prey.

Lozenge, a figure resembling the ace of diamonds; and the form of the shield on which single ladies and widows bear their coats of arms. Lat. planchius; Fr. lozange.

Lozenges, covered alternately with lozenges of two different tinctures.

Luna, a term used by some heralds instead of argent, in blazoning the arms of sovereigns and princes, instead of by metals and colours.

Label, the most honorable mark of difference, serving to distinguish the coat of arms of the eldest son from the younger. Lat. lambellae; Fr. lambels.

Lanced, a term used to signify the tongue of a bird or beast, when it differs in tincture from the body.

Lioncel, a young lion; used in blazoning arms, when there are more than one lion in the same field.

Loned, is used to denote the same posture of beasts of chase, as crouchant is for those of prey.

Lozenge, a figure resembling the ace of diamonds; and the form of the shield on which single ladies and widows bear their coats of arms. Lat. planchius; Fr. lozange.

Lozenges, covered alternately with lozenges of two different tinctures.

Luna, a term used by some heralds instead of argent, in blazoning the arms of sovereigns and princes, instead of by metals and colours.

Label, the most honorable mark of difference, serving to distinguish the coat of arms of the eldest son from the younger. Lat. lambellae; Fr. lambels.

Lanced, a term used to signify the tongue of a bird or beast, when it differs in tincture from the body.

Lioncel, a young lion; used in blazoning arms, when there are more than one lion in the same field.

Loned, is used to denote the same posture of beasts of chase, as crouchant is for those of prey.

Lozenge, a figure resembling the ace of diamonds; and the form of the shield on which single ladies and widows bear their coats of arms. Lat. planchius; Fr. lozange.

Lozenges, covered alternately with lozenges of two different tinctures.

Luna, a term used by some heralds instead of argent, in blazoning the arms of sovereigns and princes, instead of by metals and colours.

Label, the most honorable mark of difference, serving to distinguish the coat of arms of the eldest son from the younger. Lat. lambellae; Fr. lambels.

Lanced, a term used to signify the tongue of a bird or beast, when it differs in tincture from the body.

Lioncel, a young lion; used in blazoning arms, when there are more than one lion in the same field.

Loned, is used to denote the same posture of beasts of chase, as crouchant is for those of prey.

Lozenge, a figure resembling the ace of diamonds; and the form of the shield on which single ladies and widows bear their coats of arms. Lat. planchius; Fr. lozange.

Lozenges, covered alternately with lozenges of two different tinctures.
MAXED, is said when the hair hangs down the necks of horses, unicorns, tigers, and other animals.

MANTLE, a long robe or cloak of flate. Lat. pallium; Fr. manteau.

MANTLEs, ornamental foliage of cloth, used for adorning helmets, or receiving the escutcheon or shield of arms in the panels of a carriage, &c.

MARS, a term used instead of gates, or red, in blazoning the arms of sovereigns.

MARSHAL, or MARSHALLING, a term which signifies to range and dispose diverser coats of arms in one shield, with their contingent ornaments and appurtenances.

MARKET, the distinguishing mark of the fourth son. It is likewise a proper charge or bearing, in which case the number is not limited; it is represented small, sideways, without feet, and with its wings close. Lat. hirondelle; Fr. hirondelle.

MASCLE, a figure or bearing which represents the meath of a net. Lat. macea; Fr. noce. See Heraldry-Plate III. fig. 83.

MEMBERED, a term used to express the back and legs of a bird, when of a different tincture from the body.

MERCURY, a term used instead of purple, in blazoning the arms of sovereigns.

METALS, the tinctures of or and argent, or gold and sable, are the metals of heraldry, represented in colours by white and yellow. See the Definitions of Tinctures.

MOINE, a crofs which turns round both ways, at all the extremities.

MONTANT, the horns of the half-moon turned upward, i.e. toward the chief of the escutcheon.

MORION, a steel cap, or ancient armour for the head, resembling the chapeau.

MULLET, the rowel of a spur, which consists of five plain points, whereas flars consist of fix or more waved rays. This is added to coats of arms as a mark of difference for the third son. Lat. rotula calcaris; Fr. mollett.

MUZZLED, is said of a beast whose muzzle-band is of a different tincture from his head.

NAIENT, the position of swimming; and is said of a fish in a swimming posture. Lat. natans; Fr. nageant.

NAISSANT, signifies coming out, and is said of a lion, or other creature, that seems to be rising out of the middle of an ordinary.

NAVY, the cloudy, or representing clouds; and is said of the outlines of any ordinary running in and out.

NOMBLED-POINT, that next below the fefs-point, being the opposite place to the honour-point.

NOWED, signifies tied or knotted; and is said of serpents, wyverns, &c, whose bodies or tails are twilled and unfolded like a knot. Lat. sigatus; Fr. noué.

OBLIJ, used to express the black roundlets, which are also called pellets and guiffone.

OPHNUS, a beast of fanciful invention; the body and fore legs of which are like those of a lion; the head and neck like those of an eagle; it has wings like those of a griffin, and a tail like a camel's. It is the crest of the barber-surgeons.

OS, the heraldic word for gold. In heraldry-engraving it is denoted by small points all over the field. Lat. aurum, aurac; Fr. or.

ORDINARY, a term used to denote a certain class of flecént heraldic figures borne in coats of arms. Ordinarys subordinate, are those which follow next in order to the principal ordinaries.

ORLE, a border within the shield, at some distance from the edges thereof. Lat. limbus; Fr. environ. In orle, is said of several things borne within the escutcheon, in the form of an orle.

OVERALL, this expression is said of any figure borne over others. Lat. superico; Fr. brechent for le tout. Pat. one of the honorable ordinaries. Lat. patus; Fr. pal.

PALEWISE, is said when a charge is disposed after the manner of a pale.

PALL, a figure like the Greek Ψ about the breadth of a pallet; it is borne by some heralds, called a crois-pall; on account of its being an ecclesiastical bearing.

PALL, one of the diminutives of the pale. Lat. palus minor; Fr. vergette.

PALLY, denotes a field divided by perpendicular lines into four or more equal parts, confiding of two different tinctures interchangeably disposed. When the field is divided into fix, eight, or ten, divisions, palewise, it must be blazoned Pally of fix, &c. But if the number be odd, then the field is to be named first, and afterward the number of pales specified.

PAN-BENDY, denotes a field divided both palewise and bendwise.

PARTER, or PARTY, signifies divided, and is applied to all divisions of the field, as follows: Party per Pale, is blazoned, by French heralds, Party only: Party per Chevrons, is Chapée: Party per Fess, is Coupe: Party per Bend, is Tranché: Party per Bend-Jufliner, is Taitlé; which is the reverse of the last.

PASSANT, is said of a lion, or any other animal represented in a walking position. Lat. gradiens; Fr. paflant.

PASSANT-GARDANT, is said when an animal is in the same posture as paflant, but with his face turned, so that his eyes are both distinctly seen.

PATHÉ, or PATTÉ, a crofs which is small in the centre, and goes on widening to the ends, which are very broad. Lat. patens; Fr. paté.

PATER-NOSTER, a charge or bearing formed of beads; as a crois patre-nôster, &c.

PATONCE, a crofs that is nearly fotty, i.e. like the bottom of a fleur-de-lis, at its extremities.

PATAR, or PATERACHAT, a crofs, so called, when the middle piece is twice crofted, the lower arms being longer, and the upper fhorter.

PEARL, is used for argent, by those who blazon the arms of peers by precious stones, instead of metals and colours.

PEAN, the name of a tincture, which is fable and or.

PELLETS, a name given to the black roundlets.

PELLETED, any charge or bearing marked with pellets.

PHOENIX, a celebrated fabulous bird, among the ancients, very commonly borne as crests, or as one of the charges.

PHRON, the head or iron part of a miflile instrumefl or dart, barbed. The representation of it is frequently borne in coats of arms, and termed a Pheon's head. Lat. fcrum jaculi; Fr. fer de dard.

PIE, an heraldic figure representing those piles on which bridges are built, or other edifices raised from the ground. Sir Hugh Myddleton, knt. and bart. who heads eraled of the field: which he changed to Argent; arms, originally, Argent, on a vert, three wolves heads eraled of the field, in memory of that undertaking." Edmonston's Heraldry, vol. i. p. 166.

PILY, is said of a pile divided into partitions of the form of the pile.

PLATE, a name given to the white or silver roundlets. Lat. difficus argentus; Fr. tourteau d'argent.

POMMES, green roundlets blazoned in coats of arms. Lat. pomous; Fr. tourteau vert.

POMMETTE, or POMMETTÉ, a name given to a crofs, whose extremities terminate with a ball or knob at each end, like an apple; if there be more than one, the number must be mentioned.

PONT, is said of a crofs terminating like a T at its upper extremities.

PONT-Counter-pont, a field or charge covered with ponts counter-placed.

POWDERED, small figures, as ermin, irregularly fixed on a field.

PRESTER JOHN. This is the name ascribed to a bearing contained in the armorial ensign of the episcopal see of Chichester. This figure of a patriarch sitting on a chair,
chair, (cathedra,) holding a sword fessdeways in his mouth, and in the act of giving his blessing, has excited the ingenuity of etymologists, heralds, and antiquarians, for a long time. Some will have him a king of Abyssinia, others a Nestorian priest; those spell the name Prebester, and thefe Prebester John; we however are authorized to take it for the Evangelist St. John; the Gospel, the word of God, being represented in Holy Scripture by a Sword, and the name Prebester, (old, ancient,) well applied to the oldest and last of the apostles, who died one hundred years after the birth of his divine Master.

Pride. Peacocks are said to be in their pride, when in heraldic bearings they extend their tails into a circle, and drop their wings.

Proper, any animal, vegetable, or other thing, borne in coats of arms of its natural colour.

Purpl or Purple, a term used by some heralds to express the embroidery of a border of fur.

Purple, the colour so called, which signifies purple, is in heraldic engraving represented by diagonal lines drawn from the sinister to the dexter side of the shield.

Quartered, a four-leaved grass or flower, resembling a primrose. This charge has obtained a place in coats of arms, though not so frequently as the trefoil; the double quadrfoil is the difference for the ninth son. Lat. quadrifolium, Fr. quatrefoille. See Heraldry Plate VII.

Quartered, is said of a field divided into four equal parts. Lat. quadrupartitus; Fr. d'artail.

Quarterings, signify the partitions or separate areas of one shield, containing divers coats of arms; also those arms as borne by right of inheritance.

Quarterly, is used in the blazon of an escutcheon, or one of the ordinaries, divided into four equal parts.

Quarterly quartered is said of a field quartered in its centre, and the four branches of which are each parted by two different tinctures alternately depicted.

Queue, the tail of an animal. Lat. cauda; Fr. queue. It is sometimes borne double, or fourcher, i.e. forked.

Queue, is a term which signifies the tail of an animal. Lat. cauda bifida; Fr. queue fourche.

Radiant, is used in blazoning, to denote any charge represented with rays, or beams of light. Lat. radiant; Fr. rayonnant.

Ragule, is said of a beating which is uneven or ragged like the trunk or limb of a tree lopped of its branches, of which the stumps only are seen.

Rampant, a lion, standing upright on its hind legs, and in the attitude of climbing; this word is seldom, if ever, applied to any other animal. Lat. repens; Fr. rampant.

Ray, a stream of light issuing from any luminous body. Lat. radius; Fr. rayon.

Rayonnant, or Rayonne's, a charge that has rays of glory behind it, darting from the centre to all parts of the escutcheon.

Regatia, in heraldry, means such a coat of arms as by its figures alludes to the name of the bearer; as three caddices, for the name of Casselin; a bear, for Bernard; three salmons, for Salamian, &c. The French call them, armes parlantes, as if they were speaking to the beholder non verbis sed rebus; hence the etymology of the name rebus.

Recess'd, is said of a crofs that circles or curls at the ends, somewhat resembling a ram's horn.

ReCrop'd, a term implying the same as that of a croft-crofs.

Regalia, enigms of royalty.

Regardant, the position of an animal looking behind, i.e. having his face turned towards his tail. Lat. redditus; Fr. regardant.

Reprent, is said of any beast or fish, whether rampant, saliant, &c. when represented face to face.

Lat. repetitio; Fr. affronté.

Rest, a figure used in coats of arms, which some take to be a rest for a horsemans' lance; and others for a musical instrument called clavis or claricord.

Riband, or Riband, one of the diminutives of the bend.

Rose. This flower is much used in coats of arms; and is alligned as a difference for the seventh son.

Roundel, or Roundlet, a small round figure used in heraldry, of which there are ten forts, each of which has a particular name according to its colour. Those of metal are represented flat; those of colour, globular.

Ruby, is sometimes used instead of gules, for blazoning the coats of arms of the English nobility. Lat. rubinus; Fr. rubis.

Rustie, a figure resembling the nut of a screw. See Plate III. fig. 83.

Sable, the heraldic term for black; and is in heraldry-engraving expressed by horizontal and perpendicular lines crossing each other.

Salyant, or Saliant, the posture of a beast of prey that is springing forward, or leaping in bent. Lat. saliens; Fr. salissant.

Saltier, one of the honorable ordinaries, in the form of St. Andrew's cross. See Heraldry Plate II. fig. 32.

Saltierwise, disposed in the form of a saltier. See Heraldry Plate II. fig. 42.

Sanguine, signifies the sanguine colour, and is expressed in heraldry-engraving by lines crossing each other diagonally, from the dexter to the sinister, and from the sinister to the dexter, side. See Heraldry Plate I. third row of shields.

Sapphire, the name is used to express the colour azure, in blazoning the arms of the nobility.

Sardonyx, used instead of sanguine, in blazoning the arms of the nobility.

Saturn, denotes the colour sable, used to blazon the arms of sovereigns and princes, instead of metals and colours.

Scape, the name as sapphire; and is one of the diminutives of the bend-salient.

Segreant, an epitet applied to a griffin erect, and displaying its wings, as if it was going to fly. Lat. erctus; Fr. segréant.

Sejant, is said of any animal represented sitting. Lat. sedens; Fr. sejant or assis.

Seren, a term which signifies serene or sedent. Lat. serenus; Fr. sere.

Shield, the figure or field on which coats of arms are depicted. See p. 438.

Sinister, in heraldry signifies the left side.

Springing, is used to denote the fame posture of beasts of chase, as saliant is for those of prey.

Sol, the sun, used to express gold, in blazoning the arms of sovereigns.

Splendor, The fun in splendor is when it is represented with the lineaments of a human face, and environed with rays.

Star. This charge is often confounded with a mullet, which is the rowel of a spur, as noticed above. This a knight of some orders wears, not to be distinguished by the people, but from the people.

Statant, an animal standing on his feet, both the fore and hind legs being in a direct line. Lat. stans; Fr. en pied. See Plate VI. fig. 89.

Stones. The tints of precious stones have been introduced in heraldry, instead of the names of metals and colours, in blazoning the coats of arms of the nobility.

Sun, the luminary that makes the day; which, when used in heraldry with the lineaments of a human face, environed with rays, is called a fun in his glory, or splendor, and proper. Lat. sol; Fr. soleil.

Super-charg'd, is a figure borne on another bearing.

Supporter, animals, birds, or other figures, depicted on each side of the shield, and seeming to support it.
SMAIiMOUNTED, a charge or bearing that has another over it, both of different tinctures.

SURTOUT, signifies over-all, and is laid of a small escutcheon, within the large one, containing either a paternal coat of arms, or a coat of augmentation, thus made called.

SWORD, the usual weapon of fights hand to hand, used either in cutting or thrashing; it may be taken for an emblem of courage, justice, or authority. Lat. gladius; Fr. épée.

TALON, a sort of hunting-dog, between a hound and a terrier, with a large foun, long, round, and thick, ears. This is a frequent bearing in coats of arms; and may be confidered, as all other dogs, for the emblem of vigilance and fidelity. Lat. canis; Fr. chien.

TASSELLED, adorned with taffels.

TARNOY, or TANNY, one of the tinctures made use of in blazonry; it signifies the orange colour, and is represented in heraldry-engraving by diagonal lines drawn from the sinister-side of the shield to the dexter, traversed by horizontal lines. Lat. jasminum; Fr. tournesol. See Plate I. of Heraldry, third row of shields.

TÊTE, or head, sometimes borne double in coats of arms, ceput; Fr. tête.

TIERCE, or TIERCED, signifies the same as divided into three equal parts of different tinctures. When a field is thus divided palewise or selfwise, it is called TIERCED in Pale, or in Fy, which ever it is, Gules, Argent, and Azure; and to whatever tinctures the field is of.

TINTURE, the hue or colour of any thing belonging to coats of arms. See p. 427.

TOPEZ, used instead of or, in blazoning the arms of the nobility.

TORSE, denotes any thing twisted like a wreath.

TORTEAUX, or TORSCHEN, a name given to the red roundlets.

TOWERED, is said of walls and castles having turrets on the top. Lat. turreta; Fr. tourelle.

TREFOIL, three-leaved grass; a very common bearing in coats of arms. Lat. trifolium; Fr. trèfle.

TRESSURE, the name of an ordinary, supposed to be only half the breadth of an orle; it is borne frot and counter-frot, often double, and sometimes trebble. Lat. limbus; Fr. treffure.

TRICORPORATED, is said of a bearing of the bodies of three lions rampant, conjoined under one head gardant, in the fets-point.

TRIPANT, is used to signify the same pofure of beaees of cheale, namely a buck, doe, fawn, &c. as paffant is for the quadra-four.

TRUNKED, applied to trees, &c. that are couped, or cut off smooth.

TURRET, a small tower.

TURRETED, having turrets on the top.

TUSK, the long-tooth of animals.

TUSKED, an animal whose tusks are of a different tincture from the body.

VAIR, or VAIROU, a tincture represented in engravings by the figures of little bells reversed, and ranged in a line. Lat. vaeus; Fr. vair. See Heraldry Plate I. fifth row of tinctures.

VAIR-à-POINT, denotes that the point of one vair is opposite to the bale of another vair.

VAINLY, a field or bearing charged with vair, of a different tincture from the proper.

VALLARY, an ancient species of crown, called also coflrefo, or palliaced crown, because it consists of palliades, or the likenets of them, standing up and forming a circle.

VAMBRACED, a term for three arms habited in armour.

VENUS, used for the colour vert, in the blazon of the arms of sovereigns and princes, instead of metals and colours.

VENUS, borders charged with eight leaves, flowers, fruits, or other vegetables.

VIRT, the heraldic term for green. It is represented in heraldry-engraving by diagonal lines drawn from the dexter to the sinister side of the shield. Lat. viriditas; Fr. vert.

VENDO, or VENDY, frequently used instead of vair, and applied to an ordinary formed of a waved line.

VOCYLED, signifies hoisted, and is said of the tinctory substance on the feet of unicorns and granivorous animals.

UNICORN, an imaginary animal, sometimes found in coats of arms. It was anciently the device for Scotland; and at the union under James I. it was made one of the supporters of the royal arms of Great Britain.

VOIDED, an ordinary so evacuated, that nothing but the edge of it remains to show its form; therefore, the inside of the charge is of the same tincture with the field. Lat. vacans; Fr. vide.

VOIDERS, a subordinate ordinary, much like the flables, but narrower.

VOLANT, a bird or insect in the attitude of flying.

VORANT, a term which signifies swallowing up, and is used in blazonry to express the action of any animal, fish, bird, or reptile, devouring or swallowing up another creature. Lat. vorans; Fr. dévorant.

VULNERED, signifies wounded, and is applied to an animal stung with an arrow, &c.; Lat. vulneratus; Fr. blessé.

WATTLE, a term used of a cock, whose wattles or gills are of a different tincture from the body: called also jotted up.

WAVY, is laid of an ordinary formed of lines bent after the manner of waves rolling on the sea. Lat. undulatus; Fr. undé.

WHITE, in heraldry, signifies a plain fur.

WREATH, in heraldry, signifies the ornament set over the helmet; it is a kind of roll made by the intexture or convolution of two different colours, and on which emblems are usually placed. Lat. tortilla; Fr. torce.

WRATHY, a charge consisting of two different tinctures united by contortion.

WYVERN, a flying dragon of superflitious invention, with only two fore-feet. Lat. draco; Fr. guirois. See all these terms fully exemplified in the correspondent Engravings.

As many French heraldic terms did not pass into our tongue, and yet retain their original meaning in treaties on French blazonry, we thought it would be intereflancing to our subscribers, and all those who feel a real love for the science, to find here a small number of them.

ABBAISE, is used to signify that a bearing is placed lower than its usual situation in the field: lowered.

ABRE, a charge is said to be en atome or aline, when placed in the centre and surrounded by others.

ABSCUPT, conjoined at the ends, as four ermine spots conjoined.

ACCOLÉ, gorged; also twifled, enwapped.

ACCROUPT, is used instead of feant, for hares and rabbits.

ADENTRE, accoated on the outer side.

AJOURE, pierced.

ANNILE, or ANILLÉ, fer de moline, Astrette, bearing.

BALLONNE, is laid of animals bearing a flaff or a sword in their mouth: jagged.

BASTILLÉ, towered.

BISÉ, VIVERN, serpent.

BRASSART, vambrace.

CADUC, is laid of an eagle, the beak and eyes closed: decayed.

CHAMPAGNE, the base of the escutcheon.

COIN, coin, rabbit.

COR, buglehorn.

COUILLÉ, portcullis.

DESCOLLE, headleaf.

DIFFAMÉ, is laid of a lion without a tail: cowardly.

ECLOPÉ, bevelled, a partition per leis & per bend semeilier.
Heraldry.

The formation of the shield must have been nearly coeval with the invention of the first missile weapons of man; and its obvious utility in covering and protecting the body, rendered it of the highest estimation amongst all nations of antiquity. As by the rigour of war, the soldier incurred death who tamely surrendered his shield; so the capture of it was, on the other hand, an acquisition of the highest glory. To surrender the body, rendered it of the highest estimation among!!

The killing of a royal flag incurred the loss of the shield. Of its form, but to the custom of raising figures upon it, as to the

The shields used at the siege of Troy were adorned with imagery; "Scutis, quibus Trojam pugnata eff, continuebantur imaginis."—We find in Plautus, Mil. ii. 11. "Clupei splendore clarior quam radii folis," The refulgence of the shield is brighter than the rays of the sun. The continent of Scipio was engraved on a silver buckler, presented to him by the admiring Spaniards; and the venerable custum of adorning the mardions of the dead with appropriate shields and banners has reached our own times, from the remote ages of antiquity. Among the Goths, and other northern tribes, their kings and chiefs were raised to dignity and the supreme command, by being elevated, in the midst of the battle, up on the shield, for which ceremony fee the engraving under the portrait of Alaric, vol. viii. p. 720. And whilst the shield was made an emblem of independence to the free, the loss of it became a mark of degradation to the slave. Hence, in our forest-laws, the killing of a royal flag incurred the loss of the shield, which, in the reign of Canute, reduced a freeman to irretrievable bondage.

Among the Greeks and Romans the name of the shield was as various as its shape. The Latin word *shutum*, from which the Italian *scudo*, the French *écu*, or *écus* as formerly spelt, and *schauten*, the English *escutcheon*, *escuton*, or *scheutage*, are derived, is applied by Livy to the gold and silver bucklers of the opulent Sannites; and he gives us, book x. c. 40, a more detailed description of their form: "This was the shape of the shield; the summit, by which the breast and shoulders are protected, was large and even; the bottom was wedge-shaped, to render its motion more easy;" Forma erat 

The half-moon buckler tinctured "Gules," in the same Engraving, is like the Amazonian *pelta* or target, mentioned by the learned Bryant, as well as in the *Aeneid*, b. i. v. 494.

Duct Amazonomun dumatis agmina peitis.

Its lunar-shape was intended to give a treer and more extensive action to the right hand; and its name, as well as the word *halce*, a belt, seems to be derived from *pelts* or *pelts*, or the Teutonic *pela*, the hide of beasts, with which it was generally covered. Livy informs us also that it differed but very materially from the *etra*: "Cetrae peitl haud abimilis," which was a target used by the Spanish, and generally made of buffaloes' and oxen's leather; a circumstance which is common to them as well as to the *shutum*: this word being derived from the Greek *kypnos*, leather, skin, hides.

The *clupea* appears to have undergone a great variety of shapes among the Romans. Its name is not allusive to an animal, but to the custom of raising figures upon it, from the word *clupea*, *clupeum*, to carve or chafe. It was particularly worn by the infantry; its length and weight being considered as too cumbersome for cavalry; and, if we inspect attentively ancient baso-relievoes, cameos, and medals, we shall find that the shields which are often represented upon them incline generally to the oval or round form, and were of a considerable dimension. See the shield in the portrait of Hannibal the Carthaginian general, vol. iii. p. 844, with the bearing of the white horse, similar to that of Hanover in the royal arms of England. This is from a very antique gem, in the collection of Mr. Taille, Leicester-square, London, the authenticity of which is unimpeachable.

The word *abumis*, means rather a part of the shield than a particular species. It expresses the convexity of the buckler, or more particularly the centre, which was sometimes armed or adorned with a knob, or sharp point. This convex form was adopted in order to give a glancing direction to the darts, and to strengthen the whole against the repeated hackings of the sword. Such was, according to Virgil, the form of the buckler worn by Pyrrhus at the sack of Troy, when the venerable Prinæon threw, with unavailing strength, a heavy spear against him:

Et summo clupei necquequom umbone pependit.
The figure in Plate I. coloured "Purpure," is a modern representation of the convex buckler, and may give an idea of the different ornaments which are admitted around the escutcheon; but they are seldom used by English heralds, or by any of those who feel a deep reverence for classical simplicity. The figures marked "Sable," and "Sanguine," are mere variations of the "gules," or crimson, colour, and are in the centre of that line, is exclusively devoted to bear the armorial engravings of maids, spinners, and widows.

The Europeans, as well as the nations that inhabit the rest of the globe, have adopted and used these several shapes; which have hitherto been tortured and twisted all sorts of ways, by the fanciful imagination of artists, who have as yet rarely confined themselves to the rules of science, probably for want of knowing their value.

**TINCTURES.**

It has been observed before, that shields, targets, and bucklers, were anciently made of the hides of animals, and generally covered with plates of a metallic substance, when not made entirely of metal. Indeed Livy (loc. cit.) mentions the gold and silver shields of the Samnites; but the scarcity and high price of those two precious metals soon introduced, in their stead, less expensive ones, as brass and copper, iron and iron-burnt, or by being silvered or gilt, were found cheap and useful representatives of the former.

By a certain chain of events, in part noticed above, but the particulars of which might lead us into a digression foreign to our plan, the heraldic delineators prefer to this moment its French origin, and most of the terms used in blazon belong to that language as it was written in the 15th, 16th, and 17th centuries. According to this ancient custom gold is denominated or, and silver argent, in describing coats of arms; and in painting, yellow is often substituted for gold, as white for silver, when the metals themselves cannot be made use of for the purpose; but when it is not convenient to lay on either metal or pigment, then by minute dots for or, and the blank vellum, or paper, for argent; and by lines in different directions for the other tinctures, as particularized in the following "Definitions," the engraver or draughtsman presents them to the eye with as much clearness and complicity, as if they shone in their respective places.

This useful invention is ascribed to Silestre de Saint Pierre, or Sancta Petra, an Italian writer, and does not seem to have been known or adopted before the middle of the 17th century, as it appears by several English and French treatises on heraldry, published before that period, wherein the wood-cuts, representing the several bearings, are so admirably executed, that, had the lines been in use, the respective authors would certainly have enriched their numerous shields with them. Several heraldic works of as late a date as the latter end of the 17th century, are more incorrect in their expressing the tinctures of the field and ordinaries by lines.

Of the different tinctures of the colour which left a deplorable blank in the history of the human mind, between the reigns of the Roman emperors and the revival of genius under Leo X, the beautiful art of chaîning metal had lain dormant and forgotten. It was therefore natural for the chiefs and warriors to look out for some easy and conspicuous manner of distinguishing themselves by the colour of their shields; and hence originated the custom of dividing or charging the metal field with contriving pieces of coloured ornaments.

**GULES.**—Proud of having imbued his victorious vassals with the blood of his Saracen enemy, and eager to spill his own in defence of his religion, his king, and his individual rights; or perhaps having encountered and defeated the lion of the forest, the tiger of the deserts, in Palestine; the knight naturally adopted first the red colour, not only in allusion to his achievements, but also for its superiority in brightness; hence the Tyrian scarlet, in the shape of a crescent, flamed on the silver shields and banners of the crusaders.

The word gules, by which red is heraldically called, is an inductible proof that it took its name from the crimson mouths of animals, the correspondent of which, in French, is guail, (as buckle is peculiarly applied to the fourth or grand collar of the breastplate, without any further particular, as to shape, appearance, or color), and is governmentally conferred, without looking any farther for the etymology of the word, we are persuaded that gules means much-colour. Vermilion or crimson is commonly used for it; and, as it stood the first in dignity, the engraver represents it by the simplest azure, the vertical or perpendicular line. See also illustrated in the first of this row of shields, Plate I.

**AZURE.**—The next colour is blue. The azure canopy of heaven, in its splendour and purity, may have induced the warrior to adopt it on his banner or target. It is also one of the primitive and component colours of nature, the union of which with yellow produces gold, and with red generates purple. It retains the French name azur in heraldry, and is usually painted with Prussian blue or verditer, ultramarine or saphire; and is expressed in the engraving by the horizontal line. See also illustrated in the second row of Plate I.

**SABLE.**—The third line on the horizontal of the French coat of arms should follow; but sable and purpure, being composed of azure, general colour, should take precedence.

**VERT.**—To lay that the verdant imagery of forests and meadows, or their purple tint at sunset, reflected on the polished steel of a plain buckler, has given the idea of introducing green and purple ornaments in shields and banners, would be indulging in fanciful probability; whatever may have been the cause of their being admitted among heraldic colours, it is certain that the use of as ancient a date as the preceding. Green is still called by its French name, vert, as anciently spelt; although the heralds of that nation have styled it jynople, which is not, as some pretend, derived from the German fynoner, which means cinerar or verminium, nor from any mineral that yields a green pigment; but more probably from the Greek πυρρος, with arms, and was originally called by the subjects of the Greek emperors who shared the toils of the holy wars. It is represented in engravings by hatches drawn from the dexter summit diagonally downward to the sinister corner of the shield down to the right base. See Plate I., second row of shields.

**PURPURE.**—The French word purpure, which is more of its Latin than French origin; purpurea has been translated into purpure or purpura; which now means a kind of compound tint between blue and red, although originally intended to express scarlet, or flame-colour, from the Greek πυρρος, fire. In engravings and the cuts it is represented in the reverse way of vert; that is, by strokes, from the sinister corner of the shield down to the right base. See Plate I., second row of shields.

**SABLE.**—We often read in the description of titles and tournaments, that after the loss of his brother in arms, or his lady, the valorous knight appeared in the lists, clad in fable armour, to manifest his grief, or to express his personal rights; or perhaps having encountered and defeated the lion of the forest, the tiger of the deserts, in Palestine; the knight naturally adopted first the red colour, not only in allusion to his achievements, but also for its superiority in brightness; hence the Tyrian scarlet, in the shape of a crescent, flamed on the silver shields and banners of the crusaders.

The word sable, by which black is heraldically called, is an inductible proof that it took its name from the crimson mouths of animals, the correspondent of which, in French, is sable, (as buckle is peculiarly applied to the fourth or grand collar of the breastplate, without any farther particular, as to shape, appearance, or color), and is governmentally conferred, without looking any farther for the etymology of the word, we are persuaded that sable means much-colour. Vermilion or crimson is commonly used for it; and, as it stood the first in dignity, the engraver represents it by the simplest azure, the vertical or perpendicular line. See also illustrated in the first of this row of shields, Plate I.
Ought never to be used. See the two last shields of the third row of Plate I.

It is necessary to observe, that in composing arms, it has always been a rule never to place metal upon metal, or colour upon colour; although we might produce very ancient coats where it has been overlooked for some particular reasons, which are now unknown to us; but we meet so seldom with those exceptions, that they cannot destroy the rule. Neither does this rule apply when the shield is divided per pale; per fess, &c., for then the metal or colour is not supposed to be laid on another colour or metal, but placed contiguous to each other. Therefore it is classical heraldry to blazon as follows: per pale argent and or; per fess gules and azure; quarterly azure and sable.

Moreover, as we diffuse the knowledge of metals and colours, it may be proper to mention, at least as a matter of curiosity, if not of instruction, the several other methods of blazoning arms, mentioned in almost all treatises on heraldry. We are thoroughly aware that they have been laid aside, and long exploded, by men of real taste and judgment; yet may we not consider them as the bell proof of the high esteem and veneration in which the science was held in former times? The dialect used for theantry was borrowed from the French; but noblemen's armories were blazoned by the corresponding names of precious stones; and the heralds of old even called down the planets to afflit and help them in describing the repellant effects of princes and of kings. The enthusiastic respect for heraldry went still farther; the art was supposed to be connected with the bright constellations of heaven, —with all the metals concealed in the bowels of the earth—and with the unlimited course of time; it was thought allusive to the caballistic secrets of numbers;—to man's complexion, temper, and age;—to the principles and elements of nature; in short, the ingenuity of the adepts seems to have been exhausted in dignifying their favourite science. The following Paradigm, carefully extracted from the best authors on that fanciful subject, will give a concise and accurate synopsis of the whole system.

Paradigm of the Tinctures.

We find in ancient treatises on heraldry, counter-tournaire, which is when the bells or cups of the same are placed base against base, point against point; and tournair-coustic, when the field is filled with a kind of crotchets, or, as the French called them, 'tourne flets. They are seldom to be found in old, and never in modern, coats of arms.
The sharp point of a dart could not transpierce the shield: the severe stroke of the sword, descending from the nervous arm of a barbarian, would scarcely divide the buckler; nor could the impetuous stone, emitted by the balista, do more than leave a round embossment on the other side of the target; yet, since the bristles they had occasioned were considered a honourable marks of warfare, so they were prefixed in memory of a hard-fought battle, by pieces contrasting with the colour of the field: and when a fallen chief had offered and delivered sums of money for his ransom, then the national coin was affixed to the arms, to immortalize the glory of the victor; hence the origin of the roundels, which are those devices in coats of arms which differ in name, in allusion to their respective tinctures, which are as follows.

The bezant is or; in memory of coins and medals struck at Constantinople or Byzantium. See these represented in their regular order in the above-mentioned Engraving.

The plate is argent; and denotes a silver piece of money. From the Spanish, plata, silver.

The targeau is gules; and originally alluded to a spot of blood on the shield. The word is borrowed from the French, who use it still for any thing flat and round in the shape of a cake, which they call by that name.

The hart is azure. It is allusive to a fruit of that name, of a dark-blue colour, growing wild on heaths; and was perhaps adopted in memory of a place where a victory was obtained, gained either in war, or in tournaments.

The femme is vert. It is the French word for an apple; and may have been introduced in coat armour for the reason just alleged.

The golfe is purpure; its round form representing a kind of bobus, many have connected its name with the word to gulp, to swallow; and, in romantic ages, it was supposed of great use to lay asleep dragons and waverers, the usual guardians of enchanted castles.

The pellet is sable; and may be taken for a ball of lead, discharged by engines upon the besiegers of a place. Some are of opinion that it is a derivation of the French word paler, a quoit, which is generally made of iron or lead. It is also called ore, a word often found in French works of fables; but the allusion we cannot perceive.

The orange, which is tene, alludes to a fruit of that name, not uncommon in countries where heraldry received its greatest luftre.

The gaze is sanguine. The etymology of this word has diviated much among the heraldic writers. The Iron masts or lump in a plate of incandence in founderies or forges, retains till the name of gaze in France; and its dark-red hue, when it begins to cool, has very likely given origin to this roundel. It was a red-hot ball hurled by engines from the battlements of a besieged town.

The fountain is barry wavy of fex argent and azure, and represents a spring of water. So eagerly did the parched mouth of the exhausted knight, after the heat of battle, enjoy the cooling and reviving crystal stream in some neighbouring vale, that he would have the fountain depicted on his shield, in grateful remembrance of the feasable refreshment he had received from it. The probability of this supposition is strongly supported by the following stanza, the 46th of the 1st canto of the Girufelamer Liberata:

---E fama, che quel di, che glorioso
Fè la rota de' Persì il popol Franco,
Poi che Tancred al fui vittorigia
I fuggitivi di Seguir fà Stanco,
Certò di refrigero, e di riposo
Al arce labra, nel travagliato fianco,
A che i defio dell' ope re e sì cliu
Cinto de verdi feggi un fonto vivo.

Had not the brave Tancred found in this retirement something more than refreshment and rest, he might have transmitted to his posterity the memory of the fact by adopting this roundel on his shield.

VOL. IX. No. 597.
The knowledge of these points was formerly of great importance, because the charges were generally described and blazoned according to them; but they are seldom used now; and except the words in chief, in the centre, and under the centre, they do not find any other expressions in their blazonry. It is proper always to recollect, that the Dexter side of the shield is the side that faces the left hand of the beholder.

Defloris of adding a colour to the metal of his shield, the warrior drew first a perpendicular line from the top to the base; and this is called divided, or per pale; the word per pale coming through the obsolete French partie, from the Latin portfolio, to divide in parts.

The next operation, and the simplest, was to divide the plain shield by an horizontal line, from side to side; and this was and is still denominated per fess or per pale.

See Plate I. per fess argent and gules.

The next proceeding, of course, was to cross the preceding line, and it produced what is termed quarterly. See Plate I. seventh row of shields; quarterly argent and gules.

This most simple operation being performed, the diagonal division next took place; and then drawing the line from the dexter corner of the shield to the left base, a new combination was obtained. See Plate I. fifth row of shields; per bend argent and gules.

The name natural processes induced the warrior to invert the operation, and drawing a line from the left side of the shield diagonally to the right, he formed another partition, called per bend sinister. See Plate I. sixth row of shields. The next change happened as for the perpendicular and horizontal lines; the two diagonals were crossed, and produced a sixth division. See Plate I. seventh row of shields; per saltire argent and gules.

Yet the combination was not exhausted; they cut the saltire horizontally in two, and the chevron appeared. See Plate I. sixth row of shields; per chevron argent and gules.

Crouching the saltire with a heraldic line, gave gyron or fix; and adding the horizontal line, they obtained the gyronn of eight. See Plate I. seventh line. There is another division which sometimes takes place, and is styled per pale and per chevron. See Plate I. sixth row of shields; but the other, per fess and per chevron, we do not remember to have ever met with. The repetition of quarterly, or the perpendicular and horizontal lines crossing each other several times in a shield, have generated chevronn; and the same processes with the diagonal lines have produced lozengy. See the two centre examples in the seventh row of shields, Plate I.

Several authors are of opinion that all these partitions have their origin from the cuts and bruises that appeared on the shields after furious and obstinate engagements; and the things proscribed, as we observed before, of dangers the bearers had been exposed to, they gained them esteem, for which reason they were transmitted to posterity, and became arms and marks of honour to their future families.

From the shape of the line by which these several partitions are produced, we may obtain many other combinations. The upper margins on both sides of our first Plate present the variations of them, with their proper denominations; and in so clear a manner as to be known and understood at first sight.

1. The simplest division is the plain or straight line.
2. The next is fooped or escalloped, and is called per pale in gules, if the escaploped part is on the inside, and invected, or on the contrary; and it is blazoned per fess or per pale invected or inlaid.
3. An undulated line is called wavy, and is often made use of in allusion to ultramarine achievements and naval expeditions. This line has also been often employed, and is still now, chiefly in bordure, designed to signify safety.
4. From the battlements of a castle, this line borrowed the shape and name of embattled, and obtains naturally the preference in blazonary arms or honourable augmentations for skillful captains and successful generals.
5. From the shape of clouds, and from their Latin names nebula, and nubes, the following line is called nebuly. It is probable that the eldest of his sons, adhering respectfully to the original tincture borne on the buckler, and illustrated by the glorious achievements of his sire, thought that the simplest and easiest manner of produc-
Heraldry.

Plate II.

Ordinaries No. 1.
ing the desired difference, would be to add a bend, either perpendicular, horizontal, or diagonal, to the paternal bearing; and would thence adopt the pale, as at fig. 17, Plate II.

The second son, wishing also to differ his coat-armour from that of his father and elder brother, inverted the fraternal pale, and adopted the fess, as at fig. 16, Plate II.

A third son, or perhaps the chief of any branch of the family, uniting in his pedigree the double descent of the two brothers just mentioned, and wishing to preserve, in an offensive manner, the memory of their names, by adopting their bearings, placed the pale and the fess together, and thus produced the cross: fig. 26, Plate II.

The next proceeding was to decorate the shield with a dexter diagonal ribbon, as at fig. 30, Plate II, which they called a bend, paling, as a scarf of honourable order, from one side to the other; and the inverting of the position of this lath bearing gave birth to the bend sinister, which may be so styled in the double acception of the word; since it has commonly been looked upon as a sinister mark of illegitimacy. See fig. 37, Plate II.

The saltire, as at fig. 38, originated from the combination of the bend crossing each other, and the lower half of this ordinary produced the chevron, as at fig. 43, Plate III.

The chief we have placed last, as being produced by nothing more than the removal of the fess to the summit of the shield. See fig. 54, Plate III.

There are the only charges, which, in our opinion, have a right to the title of superior ordinaries; because they hold the most conspicuous place in an escutcheon; and not being isolated or floating in the field, as common charges are, they display themselves invariably from one side of the shield to the other, covering often a third part of it, and never less than a fifth. Their diminutives, as will be described in their respective places, and all other bearings, that adhere constantly to the same ordinary, which derives its name from its position in coats of arms, as explained above, it is not the usual custom to shade it in this particular bearing. See fig. 8; where the pallets are not exactly half of the pale to the summit of the shield. Fig. 7 represents the other diminutive of the same ordinary, which derives its name from its position.

THE PALE.

This ancient and honourable bearing is a double partition of the shield, by two perpendicular, parallel, or equi-distant, lines from the summit to the base; the interval between them being filled with a colour or metal in contra-position with the metal or colour of the field.

The etymology of this simple ordinary is variously stated in different treatises of heraldry. Some derive the name from the Latin word pala, pales, a post, a stake, as the pale does not exceed three in number, it is constantly made a little wider; it ought also to be flanked so as to appear laid on, and the light supposing to come from the left of the holder. See fig. 1, Plate II, gules, a pale or. See also fig. 2, per pale indented argent and azure a pale counter-changed. It is easy to perceive that, by the strength of the general rule, colour may not lie upon colour, the centre half of the pale becomes azure, and the sinister argent; in contrá-position with the metal and colour of the field, as observed before.

As to our systematic introduction of the ordinaries in coats of arms, as explained above, it is not the usual custom to shade it in this particular bearing. See fig. 8; where the pallets are not exactly half of the pale to the summit of the shield. Fig. 7 represents the other diminutive of the same ordinary, which derives its name from its position.

Notes strength, power, or dominion, draw the etymology from more remote and even mystic sources.

Heraldry is so closely allied to chivalry, that it is almost impossible to refrain from searching the origin of the first in the bosom of the other; therefore let the name be derived from any one of those supposed causes, it is not improper to reflect upon the importance of those names in those romantic ages which witnessed the legitimate birth of the noble science we attempt to delineate, a ribbon or scarf laid on the shield by the hands of a renowned chieftain in the field of battle, or of a beloved lady at a tournament, gave occasion to the bearing, and became an invaluable distinction for the warrior who bore the renouned, or chivalrous exploits, had not before been sufficiently signal to allow him a difference in the field of his buckler.

The pale ought to cover the third part of the field, if plain; but when ensignified with charges, which rarely exceed three in number, it is constantly made a little wider; it ought also to be flanked so as to appear laid on, and the light supposing to come from the left of the holder. See fig. 1, Plate II, gules, a pale or. See also fig. 2, per pale indented argent and azure a pale counter-changed. It is easy to perceive that, by the strength of the general rule, colour may not lie upon colour, the centre half of the pale becomes azure, and the sinister argent; in contrá-position with the metal and colour of the field, as observed before.

As to our systematic introduction of the ordinaries in coats of arms, as explained above, it is not the usual custom to shade it in this particular bearing. See fig. 8; where the pallets are not exactly half of the pale to the summit of the shield. Fig. 7 represents the other diminutive of the same ordinary, which derives its name from its position.

Notes strength, power, or dominion, draw the etymology from more remote and even mystic sources.

Heraldry is so closely allied to chivalry, that it is almost impossible to refrain from searching the origin of the first in the bosom of the other; therefore let the name be derived from any one of those supposed causes, it is not improper to reflect upon the importance of those names in those romantic ages which witnessed the legitimate birth of the noble science we attempt to delineate, a ribbon or scarf laid on the shield by the hands of a renowned chieftain in the field of battle, or of a beloved lady at a tournament, gave occasion to the bearing, and became an invaluable distinction for the warrior who bore the renouned, or chivalrous exploits, had not before been sufficiently signal to allow him a difference in the field of his buckler.

The pale ought to cover the third part of the field, if plain; but when ensignified with charges, which rarely exceed three in number, it is constantly made a little wider; it ought also to be flanked so as to appear laid on, and the light supposing to come from the left of the holder. See fig. 1, Plate II, gules, a pale or. See also fig. 2, per pale indented argent and azure a pale counter-changed. It is easy to perceive that, by the strength of the general rule, colour may not lie upon colour, the centre half of the pale becomes azure, and the sinister argent; in contrá-position with the metal and colour of the field, as observed before.

As to our systematic introduction of the ordinaries in coats of arms, as explained above, it is not the usual custom to shade it in this particular bearing. See fig. 8; where the pallets are not exactly half of the pale to the summit of the shield. Fig. 7 represents the other diminutive of the same ordinary, which derives its name from its position.

Notes strength, power, or dominion, draw the etymology from more remote and even mystic sources.

Heraldry is so closely allied to chivalry, that it is almost impossible to refrain from searching the origin of the first in the bosom of the other; therefore let the name be derived from any one of those supposed causes, it is not improper to reflect upon the importance of those names in those romantic ages which witnessed the legitimate birth of the noble science we attempt to delineate, a ribbon or scarf laid on the shield by the hands of a renowned chieftain in the field of battle, or of a beloved lady at a tournament, gave occasion to the bearing, and became an invaluable distinction for the warrior who bore the renouned, or chivalrous exploits, had not before been sufficiently signal to allow him a difference in the field of his buckler.

The pale ought to cover the third part of the field, if plain; but when ensignified with charges, which rarely exceed three in number, it is constantly made a little wider; it ought also to be flanked so as to appear laid on, and the light supposing to come from the left of the holder. As to our systematic introduction of the ordinaries in coats of arms, as explained above, it is not the usual custom to shade it in this particular bearing. See fig. 8; where the pallets are not exactly half of the pale to the summit of the shield. Fig. 7 represents the other diminutive of the same ordinary, which derives its name from its position.

Notes strength, power, or dominion, draw the etymology from more remote and even mystic sources.
The FESS.

The fess is produced by two parallel or equi-distant horizontal lines drawn across the centre of the field, the intermediate space being filled in opposition to the colour or metal of the field; and has been borne on coats of arms from the earliest times of heraldry. It seems to owe its origin to a scarf of honour laid horizontally on the buckler after some great achievement. Ancient armigers made it designate moderation and temperance; but this sort of allegory is of such a nature, that every one may in this manner indulge his fancy without end; for there is nothing determinate on the subject. The name of the fess is derived from the Latin fasa, a band or roller, which the ancients made an article of dress, the men applying it round their thighs and legs, the women around their breasts and body; which may be understood from this line of the epigrammatist Martial:

Falcia crecentes domine compece papallas.

The French call and spell it fases, from which, allowing for the difference of pronouncing the letter a, we have the word fess.

The fess is of the same breadth with the pale; that is generally a third part of the field, and has likewise its diminutives; for it is the several armigers have made a distinct ordinary of the bar, which is nothing more than a comprehension of the two lines that constitute the fess; and therefore ought to be ranked among the subordinate ordinaries. The barrulets and the clokets are also the offsprings of this ordinary, the first being a fourth of the bar; see Plate III. fig. 16, per pale gules and azure, three bars gemelles argent. These gemelles are barrulets, whose breadth is half of the clocket; the word is French, and means female twins. Their undoubted affinity with the fess induced us to bring them under the same head; for they are sub-ordinaries. Fig. 16, Plate II. gules, a fess or. Fig. 17, per pale argent and fable, a fess wavy counterchanged. Fig. 18, or, a pale fable surmounted by a fess gules. Fig. 19, purpure a fess between two flets argent, or purpure a fess cotised argent. Fig. 20, or, two bars fable. Fig. 21, barry of fess argent and gules. Fig. 22, barry of fess, argent and gules, per bend counterchanged. Fig. 23, fable, a fess humette or. This charge, being the fess copped at both ends, finds a place here because of the analogy it bears to the ordinary from which it is derived; but its due rank is among common charges.

When an object, that has some length in itself, as a sword, a lance, an axe, &c. is placed horizontally on the shield, and when several charges, as escallops, croffes, bezants, &c. are so disposed, their position is described by the words "in fess," or " en fessays." See Plate II. fig. 24, gules, a battle axe, in fess proper. Fig. 25, fable, three escallops, fesssay argent.

The CROSS.

This bearing consists of two perpendicular lines meeting two horizontal ones in the fess-point, so as to make four equal angles; observing, however, that the lines are not drawn throughout, but discontinued the breadth of the ordinary, which takes commonly the fifth part of the shield, if plain, and more if charged; it may be differenced, as the pale and fess are, by its outlines being characterized according to the variations represented on both sides of Plate I. under the title "lines of division," and consequently may be blazoned, ensigned, encircled, invecled, or yoked. When plain, it is simply termed a crof; as in fig. 26, Plate II. ermine, a crof gules; and fig. 28, quarterly argent and gules, a crof engrailed counterchanged. The crof has no diminutives, unless we admit as such the crof voided, as in fig. 27; or a crof voided fable. But many common charges draw their origin from this ordinary, as will be abundantly exemplified in the corresponding Engravings. See fig. 28, Plate II. Quarterly argent and gules, a crof voided argent.

When charges are disposed in the shape of a crof in the escutcheon, we use the word "crofways," to signify their position. See fig. 29, gules five bezants crofeways. Armigers use indefinitely fessways, bendways, and in fess, in bend, but they seldom say in crofs; and it would be difficult to explain why. Usage and custom, in this as in many other instances, have pronounced their solemn and irresistible fix volo, fix jubeo; leaving no room to conjecture on what ground their fiat is established.

The BEND.

Two diagonal equi-distant lines, drawn from the dexter chief of the shield to the sinister base, containing the fifth, or third part of the field, according to the circumstance of being or not being charged, constitute this ordinary.

The bend has several diminutives, viz. the bendlet, the garter, the collar, or dotice, and the riband. Authors disagree so materially on the subject of these sub-ordinaries, that it is next to impossible to contradict some of them in advancing any particular opinion; we shall therefore content ourselves with explaining clearly the figures of our plates, and by observing that the bendlet, the garter, and the riband, are smaller than the bend; and the dotice still smaller than any of them; this last may not receive any charges.

Fig. 30, ermine a bend azure. Fig. 31, azure, a bend engrailed or, cotised argent. Fig. 32, gules a fess or, surmounted by a bend argent. Fig. 33, per pale argent and fable, a bend engrailed, counter-changed. Fig. 34, or, two bendlets, gules. Fig. 35, bend of fess, argent and azure. Fig. 36, fable, three crofs crofes bendways, argent.

In some heraldry the bendlet is reckoned a separate ordinary, entirely distinct from the bend; but as it is of the same form and breadth, and differs only by its position in the field, we place it under the same head. It is sub-divided into a fcape, from the French escharpe, a scarf, which is half, and a baton, which is the fourth part, of the bend; but, as this last does not extend itself to the sides of the shield, we shall mention it among the common charges.

We have observed before, that to these bearings, and to the baton in particular, devolve in many circumstances, among English armories, the fatal necessity of stamping the mark of illegitimacy on their owners. See Plate II. fig. 37.

The SALTIRE.

The meeting of the dexter and sinister bends in the centre point of the escutcheon, produces the saltire, or saltier; as at fig. 38, Plate II. gules, a saltire argent; its name is evidently derived from the French echarpe, a scarf, which word traces its origin from faster or saltier, saltare, to jump over; as if to express that one of these bends jumps over the other, as the belts of a soldier cross each other on his breast. Fig. 39, per pale, or and fable, a saltire engrailed, counter-changed. Fig. 39a, per faret argent and gules, a saltire counter-changed.

A saltire is called humeté, when the ends, being lopped off, give to the figure the appearance of standing isolated on the ground, from the Latin humet, to rise; see fig. 41, azure a saltire humette or. This is a common charge, and does not claim a place here, but by right of analogy with the ordinary of the same nature.

When certain charges are disposed from one corner of the shield to the opposite base diagonally, crossing each other in the centre of the escutcheon, they are called, in the blazoning of arms, "in saltire," or "saltireways," as at fig. 43, gules, two tilting spears saltireways proper.
THE CHEVRON.

This ordinary consists of the lower half of the saltire, and derives its name from the French, who call a chevron the two rafters or pieces of timber which, being joined together in an angle at top, bear the weight of the rest of the roof. It has also its diminutives; namely, the chevronet, which is the half of the chevron; and the couplet, which is half of the chevronet, and is to the chevron as the costice is to the bend, that is, so exclusively and closely attached to it that it never appears but in its company. The French have but one diminutive of this ordinary, which they term styg, a prop, or support; and it contains the third part of the chevron.

The chevron, the French architectural word chevron appears to be borrowed from chovre, a goat; for when two goats butt together, head to head, their position is exactly that of the two rafters meeting in an angular attitude. Though simple and obvious, this idea does not seem to have ever been conceived by former etymologists.

Plate III. Fig. 43, argent, a chevron gules. The chevron ought to be shaded under, and not one side under and the other opposite above. Fig. 44, per pale or and azure, a chevron counterchanged. Fig. 45, argent, a pale gules surmounted by a chevron engrailed counterchanged. Fig. 46, or, three chevronels gules. Fig. 47, vert, a chevron between two chevronels counterchanged argent; or, vert, a chevron couple counterchanged argent. This last mode of describing this bearing is feblon, if ever, used. Fig. 48, or, a fess between two chevrons gules. Fig. 49, azure, a chevron removed argent.

When the field is divided more than once per chevron, the terms in blazon are chevron, or chevron, of 4-8 pieces, as at fig. 50, chevronny of six, or and fable. And when the charges on the chevrons are disposed in an angle, the fummit of which is directed towards the top of the shield, it is said to be chevronny as, at fig. 51, argent, a heart supported by two swords chevronly proper. Fig. 52, gules, a chevron humeté or. Here the same observation applies as was made above, in the description of fig. 41, Plate II. Fig. 53, azure, three chevronels interlaced argent. Some heralds call them chevronels braced.

THE CHIEF.

The chief is so called because it occupies the chief or head part of the escutcheon. It is an ordinary, determined by an horizontal line, dividing a third part of the field from the top-edge of the shield. This line may be indented, wavy, &c. and in that case it ought to be so expressed in the blazon. Its diminutive is a fillet, though seldom to be met with, being nothing but a chief of a smaller breadth. This ordinary is often made use of as an honourable augmentation in the arms of a man who has deserved well of his country; and we find illustrious instances of it in the addition made to the coats of Lord Nelson, Sir W. Sidney Smith, &c. where the chief of honourable augmentation, as it is properly called, bears some conspicuous representations of the achievements through which that dignifying distinction was obtained.

Fig. 54, or, a chief sable. Fig. 55, argent, a chief per pale azure and gules. Fig. 56, per pale argent and sable, a chief indented counterchanged. Fig. 57, azure, three mullets in chief argent.

The term "in chief" is often used to express that some of the charges are in the upper part of the shield; as, argent a chevron between two mullets in chief, and an anchor in base sable.

These ends the nomenclature and description of what we have called principal ordinaries; the pieces or charges following, being not of the same importance, are considered as subordinate in dignity.

SUBORDINATE ORDINARIES.

In conformity to the reasons alleged above, we should

The bordure.

Some heraldic writers have considered the bordure as one of the principal ordinaries; and as it goes round, and takes the shape of the field, clearly, on a superficial view, may be supposed well grounded in their opinion; but when we consider that this charge does not interfere with the original bearings, but respectfully creeps round the family coat merely to give a necessary distinction, or create a difference, we feel ourselves authorized to class it with the subordinate ordinaries; as we should have done with the chief, had not a formidable host of armoryists threatened us with the displeasing accumulation of being innovators.

The origin of the bordure or border, spelt indifferently both ways, is certainly of great antiquity. Those in existent sources of heraldic devices, the tournaments and jousts, have witnessed the introduction of this adornment, when, after a hard and doubtful conflict, the unknown knight, his left arm bearing a golden but plain and undecorated shield, alights from his charger, and, throwing up his visor, discovers the beautiful features of a young lady who had long fought and victoriously encountered her unfaithful suitor, vanquished, and vanquished again, and returning speedily to his duty, the warrior divests himself of his purple sculp, and, with it, the shield of his fair conquering antagonist. In that case, and let us not for a moment suppose it improbable, the arms would look as they are exemplified at fig. 58, Plate III. or, a bordure purpure. See also fig. 59, or, a fesse chevron argent and sable, within a bordure engrailed quarterly gules and fable. Also fig. 60, quarterly azure and argent, a bordure counterchanged.

It has been a question among heraldists, whether a bordure should be shaded. Although in this point we are conscious that we differ entirely from Edmondson's precept, yet we shall not hesitate to advance in the affirmative, that a bordure being, in general, an addition to the original arms, it ought to bear a strong shadow upon it; otherwise it would appear as if the field was parti per bordure, which would be, in fact, an heraldic incongruity. This figure has been often used as a rebatement or diminution of honour, to distinguish younger sons from the elder, and illegitimate offspring from the legitimate; and, as the bordure admits of charges, its outlines may be composed of pieces of several tinctures. That shown at fig. 61, Plate III. is guarnia, a bordure argent, with verd of trefoils; or eight trefoils flipp'd proper. This word verdoy, is a corruption of the French verdure, and means a green bordure, or orle of green vegetables; as, pret, fruits, flowers, or leaves. In ancient blazons, of arms we find also an encolure (en orle) of birds; ennuyn (orné) of beasts; perfleu (tours) and encontre (entoure) of inanimate things. These expressions are all derived from French heraldic terms; and, most likely, to avoid obscurity in no noble a science, have been long exploded and diffused. The breadth of the bordure generally is a fifth part of the shield, and its tincture ought to be contrasted with the tincture of the field, according to the rule laid down for other charges; yet we may furnish several instances to the contrary.

The bordure has no diminutive; but being removed from the circumference of the escutcheon nearer to the circumference of the field, it takes the name of orle. From a Latin orla, a coat or border; orula, a small border; from which the French have made their word orlet, a hem or selavage. See fig. 62, or, an orle azure.

The实现了对页面内容的正确识别。
In fig. 63, of the same plate, is represented an orle of martlets, and the arms are blazoned thus: argent, an esceutcheon within an orle of martlets sable; which is the same as a bar a bordure argent, charged with eight martlets of the first, supposing that the bordure has been spread beyond its usual breadth to give room for the charges.

Another off-spring of the bordure is the trefuire, a sub-ordinary of great dignity and antiquity; since it has been said that it was granted by Charlemagne to the Scotch kings, on the occasion of his entering into a league with Athens, the then sovereign of that country.

The trefuire is commonly supposed to be the half of the breadth of an orle, and is generally termed fiori and counter-fiori, that is, having the flowers-de-lis alternately inverted; it may be double, and even treble. Its charges are from the French trefuire, the French trefuir, the French trefuire, and if gilt, or plain. It was a light and simple ornament, of silver or golden twist, elegantly wrought around the principal bearing of a coat, as in the royal arms of Stuart, viz. or, a fess sable argent & azure within a double trefuire gules. This ordinary, according to Nibbet, was anciently given to none but such as had intermarried with, or descended from, some of the branches of the royal family.

The INESCUTCHEON.

This sub-ordinary consists of a little escutcheon, borne within the shield, in the fefs point, according to some heralds; as in fig. 63, Plate III. But others give the name to all kinds of smaller shields borne as charges, as in the family arms of Hay, viz. argent, three inescutcheons gules.

THE PILE.

It is not an easy task to give a satisfactory etymology of the word pile, as a sub-ordinary in armories. Some authors place it in it a faithful representation of the piles on which bridges are founded and flamed. Others derive the word from the French pile, a heap, a pile, a pile of wood; a funeral pile; but this charge should be called pile inverted; as in general the basis of this triangular figure adheres, not to the base, as nature would have it, but to the summit of the shield. Those who are fond of antiquarian disquisitions, seek for the name among the annals of the Greeks and Romans, who used to play the game pile trigonalis, the three-cornered ball; so denominated, not from the form of the pile, which was spheric, but from the position of the players, who were three in number, and formed an angle, as in the pile; the man who throws the ball standing at the point where the base being occupied by the two others, who repel or catch it.

However, the pile is an isosceles acute triangle, pointing from the top, from which it issue, to the base of the shield in a perpendicular direction, as at fig. 64, Plate III. argent, a pile fable. As to the tincture, it follows the general rule of opposition, and may bear any charges, as in the noble bearing of Seymour, where a pile gules is charged with three lions of England.

Fig. 65, Plate III. ermine, two piles fleging from the dexter and sinister sides and meeting in base azure. Fig. 66, argent, three piles meeting in base gules. Fig. 67, or, a pile between two others reversed, fable. Fig. 68, ermine, a pile vary bendways. Vert. Fig. 69, fable, three piles in bend, each joint charged with a flear de lis argent.

The CANTON.

The word canton, in French, means any given part of a whole space, as a province or county may be divided into several cantons. Here it means a square part of the escutcheon, of no determined proportion, but somewhat fles than a quarter, and generally at the dexter corner of the shield. When it is placed on the other side, it is denominated canton fances; but this seldom occurs in English heraldry.

Armorialts have supposed that it was intended to represent the banner given to the ancient knight banneret. That may perhaps have been the case; but, properly speaking, it has been and is still frequently used as an honourable addition in a coat of arms, or a necessary distinction to point out a difference between the several branches of a family. See fig. 70, ermine, a canton purpure. A shield ermine, is the well-known and ancient bearing of Britain in France, and the canton is added to point out a difference between the ramifications of the families entitled to bear it. See in the same figure, the shield argent, a canton and a fess conjoined gules. In some cases the canton, also of the same tincture with the fess, is separated from it by a shaded line, as in the coat of Widvile earl Rivers, &c.

The quarter or fpace quarter, is a French bearing, seldom or never to be met with in English armories. It must here be observed, that when the shield had originally a bordure, it ought to be placed upon it; but, if the original coat possesses a canton, then the bordure must go round.

FLANCHES, FLASQUES, and VOIDERS.

Flanches is a plural derived from the French flane, which signifies the side of any thing, but chiefly of the human body. They are formed by two curved lines or semicircles, and are never borne single. See fig. 72, Plate III. azure two flanches or; and at fig. 73, gules two flanches argent per chevron counterchanged. When the curved lines, becoming more elliptic, do not recede so far from the flanks of the escutcheon, none heralds call them flanches, because they resemble in shape a flank or a flagon; but modern heralds do not take notice of this distinction. The voiders, still narrower than the flanches, are also obsolete; and it is merely out of acknowledgment and respect for those ingenious authors who have treated of the science before us, and to whose indefatigable exertions we owe the entire removal of the veil of darkness that so long obscured the monuments of antiquity, that we mention several objects which might otherwise remain for ever buried in oblivion. We therefore did not think it necessary to introduce figures of them in our plate.

THE GYRON.

The word gyron does not come, as Gwillim and many other armorialists pretend, from the Latin gremium, which in French signifies giron, bosome; nor from the shape of a lady's stomacher, as others have gallantly dreamt; but from gyrus, a circuit or circle; this charge being a piece of the shield divided quarterly and per sable, which then takes the appellation of a wheel, whose several alternate pieces seem to turn (gyrase) round within the escutcheon. See Heraldry Plate I. It is, in heraldry, a triangular figure formed by two lines, one drawn diagonally from one of the four angles to the centre of the shield, and the other either horizontal, or perpendicular, from one of the sides of the escutcheon, meeting the other line in the centre of the field. See Plate III. fig. 74, argent, a gyron fable.

If the gyron proceeds from the dexter fide of the shield, it is blazoned a gyron; but, if from the opposite side, we are to add the word foiffer, as we do to the bend, canton, &c. This bearing is seldom used in modern arms.

THE FRET.

This figure resembles two little fticks or pieces lying filltre-ways, and interlaced within a mascele. See Plate III. fig. 75, fable, a fret argent. Its name originates from the contra-position of the sticks supporting each other, as the Latin adjective fretus, a, um, signifies, relying upon, supported by; Gibbon calls it, heraldorum nodus amatorius, the herald's true lover's knot; but for what reason, it is not easy to guess.

The fret is sometimes couped at the four angles, and becomes an isolated common charge in the field, and may be placed in any point. See Plate III. fig. 76, or, a fret couped, fable.

When the field is partly covered by small bendlets or ficks,
ficks, interwoven and crossing each other, at equal distances, it is called *fret.* The water of a brook fretting among the pebbles, and uniting its narrow banks, gives a good representation of this bearing, and may have occasioned its name. See fig. 79, gules, fretted argent.

Sometimes the lozenge—parts of the field left naked between the intersections of the bendlets are charged as in fig. 79, azure, fretted and jemé of fleurs-de-lis, or.

The word *jemé*, from the French *jemier*, to draw, to throw about irregularly, is made use of when the field is charged with charges repeated to an indefinite number. See fig. 78, argent, jemé of crescents fable, a demi-lion proper.

The pall or *pairle*.

The *pall* is a subordinate ordinary representing the *pallium* or mantle of the ancient archbishops and patriarchs, and took its origin also in Palestine, in remembrance of the benediction the crusaders used to receive at the hands of those heads of the church, previously to their giving battle to the infidels, their powerful opponents. It has the form of a chevron reversed, and a semi-pale meeting at the centre-point of the shield. See fig. 81, ermine a pall fable.

The word *pairle* is entirely French, from the Latin *pallium*; and is never used but in French blazonry. Sometimes the *pall* becomes a common charge, being incipiated or sharpened at the ends; and then it resembles a fork, or the letter *Y*. See fig. 82, or a pall (or *crook-pall*) fable.

Heraldically, according to the simplest and best mode of classification, the list of subordinate ordinaries; but as many of those who have preceded us in the arduous task of elucidating the science of heraldry, have constantly introduced the lozenge, the mule, the rutile, and some other figures which would better rank among the common charges, we have added here the four first of them.

The lozenge, *fusil*, *mascel*, and *rustre*.

The lozenge is composed of four equal and parallel, but not rectangular, sides; two of its opposite angles being acute, and the other two obtuse. It imitates in the common charges, we have added here the four first of them.

The *fusil* is a lengthened lozenge, or a lozenge whose diagonal lines are still more unequal in length. Its name comes from the Latin *fusilem*, a spindle; in French *fusil*, and formerly *fusi*; representing the shape of those ivory instruments which ancient knights law turning and whirling in the roly fingers of their dames, who, as the heroines of old, did not disdain to spin and weave at the hands of those heads of the church, previously to their giving battle to the infidels, their powerful opponents. It has the form of a chevron reverted, and a sable on the field of battle. See Plate III. fig. 83-84.

The *mascel*, supposing to have been a representation of the mule of a net, or of a coat of mail, the word being in Latin *macula*, is like a lozenge, but perforated through its whole extent, leaving only a narrow bordure, as it appears at fig. 83, azure, a mascel in fesse argent.

The *rustre* in lozenge piercing the nut of a screw; but if the shape in that case is transposed, that is to say, if it is placed on the sinister side of the round hole of the lozenge, it may be called a lozenge charged with a beaufy, or plate, or any other roundel. See fig. 84, on the sinister chief point, azure a ruspe argent. These four charges ought to be placed so that their longer diagonal line hand perpendicular in the field.

**COMMON CHARGES.**

Sections and intersecions, divisions of the shield by nearly all possible combinations of lines twisted in all kinds of shapes, could not satisfy the cravings of fancy without the art of creating difficulties for branches of families, or original families that had not adopted any heraldic badges; but a larger field soon opened itself to the view; all that nature possess'd, all that imagination could invent or graphic art execute, became in succession the property of heraldry. Natural, artificial, even mythical objects, were at her disposal; and the parts of her body chose from among them all. Hence, that infinite variety of common charges, which have enkindled the arms of the nobility and gentry from the earliest times. The three kingdoms of Nature, animal, vegetable, and mineral—-even the constellations, with all the luminaries of the firmament of heaven,—the inferior works of man; may mark himself, and every one of the constituent parts of his body, claimed a place on the shield of the warrior; and thus heraldry (if we may be allowed the metaphor) became a panegyric mirror of the universe.

As, therefore, it would be endless, were we to attempt to depict and describe all the common charges which are to be found in armories, we shall content ourselves with delineating and explaining the most important only, and chiefly those which have received a particular character from the flam of heraldic fancy; for it is worthy of remark, that a number of objects are not, and ought not, to be drawn, in blazon, as they appear on the surface of the earth, or in the works of man, and are not the lions of the forest; and the fleurs-de-lis, or lilies of France, are not the lilies of our garden. Heraldry, in alluming those objects for distinctive marks, impressed upon them her own seal, and clothed them with her own livery. They have an indelible type belonging to themselves alone; and the perfection of heraldic painting consists in preserving to them their characteristic form and spirit.

To facilitate the discrimination of common charges, we have arranged them in alphabetical order, which obviously claims the preference of every other disposition; and they are as follow:

**HERALDRY.**

*Plate IV.*

**Fig. 1.** Argent, an anchor fable. This well-known emblem of hope, this protector and guardian of the ships, is often to be met with in armories granted to those who have distinguished themselves in naval expeditions. The anchor ought to be represented as in this figure; that is, in perspective; otherwise, the flock being in a line with the flukes, the bearing would not appear to advantage. Yet we find in old heraldic paintings many inferences where the flukes and the flock are placed in the same direction. The anchor is often represented with a part of the broken cable entwined round the flank, and then it is blazon'd a foul anchor.

**Fig. 2.** Gules, on an antelope armed hovers, and tufted or. This antelope is widely different from the animal of that name. Both are admitted in heraldry; but the one here depicted has the body of a stag, the tail of an unicorn, and a tuft issuing from the tip of its nose; if it were not for the two horns on the head, it might be easily taken for what is termed an heraldic tiger. It is seldom made use of in new grants of arms.

**Fig. 3.** Or, two fickle arches in chief, and a double arch in hoche azure. The arches are very old bearing, and are composed of pillars supporting a vaulted roof, supposed to be a device alluded to by very ancient architect.

**Fig. 4.** Azure, an arm in armour proper garnished or, the fist clenched, hand proper. This arm is generally supposed represen'ted in old armories, armed hooded and tufted or.

**Fig. 5.** Or, a fwerp arm vested, cuff argent, the hand proper grasping a baton fable tipped of the third.

The repetition of the name of a tincture is never allowed in blazoning, the words *fig.* first, second, third, &c. are subtilized in lieu of such repetitions.

**Fig. 6.** Vert, an arm embowed and ered, in the hand a club proper.

**Fig. 7.** Argent, an arm in mail armour, the hand proper, grasping a baton azure.

**Fig. 8.** Azure, in chief two fleaves of three arrows argent, lanced
The arrow, for long used in war, was in the earliest times adopted as an heraldic bearing. The flight and, when of a different tinture, ought to be noticed in the blazon.

Fig. 9. Or, a flag's (or arrow's) foot. In this bearing, part of the scull of the stag is generally adhering to the horns. Fort, a half-stag argent. The halfs and mantling were warlike engines, used before the invention of gunpowder, to annoy the enemy at a distance, and to throw stones of great weight on the battlements of besieged towns. It was called anciently a sheelp.

Fig. 11. Argent a barnecone, azure. This is an instrument made of iron, and used by farriers, who place it on the upper lip of a horse in order to keep him quiet, when they bleed or throw him.

Fig. 12. Purpure, a bat argent. The bat, or meromerse, is always displayed in coats of arms, as it used to appear nailed on the gates of ancient castles; and therefore the word displayed need not be added in blazon.

Fig. 13. Per pale, argent and or, a baton sinister gules. The baton is a staff or truncheon, and a diminutive of the bend sinister; it has been variously spelt, baston, basture, and is, in English heraldry, a badge of illegitimacy. The French admit it in their coats of arms also as a mark of confanguinity or difference between the branches of a family.

Fig. 14. Azure, a beacon argent, fired proper. A machine formerly used to give notice of the approach of an enemy; and also a tower erected and lighted at top in order to direct the mariners at night when they coast a dangerous shore.

Fig. 15. Or, a bear erect proper, muzzled gules. This animal is too well known to need a description. We refer him here on account of his position in the shield, which ought to be mentioned in the blazon.

Fig. 16. Gules, a bear passant argent, muzzled or. The colour or the thong which surrounds the nose and head ought to be specified, as they are generally of a different tinture, by contradistinguish.

Fig. 17. Argent, a bear's head erased sable, muzzled or. The colour or the thong which surrounds the nose and head ought to be specified, as they are generally of a different tinture, by contradistinguish.

Fig. 18. Sable, a bear's foot or. Fig. 19. Argent, in chief, two hawk's heads in base a church-bell sable.

Fig. 20. Azure fix billets, three, two, and one, argent. Billet means a small oblong and square piece of wood.

Fig. 21. Or, three bird botes sable. These weapons were anciently used to run a bird in its flight; the end of the oval arrow being not sufficiently sharp to enter the body.

Fig. 22. Purpure, a bear passant argent. In heraldry we always by this word understand a wild bear.

Fig. 23. Argent, a bear's head couped at the neck proper. Fig. 24. Sable, a bear's head erased argent. The tusk may be of a different tinture, but generally of a metal.

Fig. 25. Azure, a bear's head erect or, in a cup argent. This is a very ancient bearing, and may have originated from the custom of a noble hunter, presenting the head of a wild bear on a charger to the principal lady of the chase, as Meleager of old did to the beautiful Atalanta. See Ovid, Metam. lib. viii. v. 425.

Fig. 26. Sable, two thick bones sable on chief, and in base a small broken rib-bone, argent. Bones are borne by the name of Bones, Da Cofia, &c.

Fig. 27. Argent, two bones azure. We give in this shield two forms of bones: the one on the dexter is the most ancient. See the article Archery, vol. ii. p. 54.

Fig. 28. Vert, a crofsh-bow argent. Arms which bear this weapon may fairly be considered as of very high antiquity, since the origin of the crofs-bow is imputed to the Cretans, and was used both by the Greeks and Romans. See Archery, vol. ii. p. 53.

Fig. 29. Argent, in chief, two buckles of different form azure in base, a single horn fable garnished or, fringed gules.

Fig. 30. Sable, a bull's head couped argent.

Fig. 31. Or, a bull's head cabossed proper.
Common Charges N°2.
erial ensigns of Sir Sidney Smith, granted to him on account of his brave and successful achievements in Palestine.

Fig. 44. Sable, three cross crozets, the first plain, the second fitchy, or fitchy, the third fitchy at the foot, argent.

Fig. 45. Argent, a cross fitchy, which this very old bearing we find each end of the cross adorned with a furch de lis. Fig. 46. Azure, a cross ragulé or. Fig. 47. Argent, a cross moline vert. The ends of this cross are in the shape of the fer de moulins. See fig. 66. Fig. 48. Sable, in chief a cross yale, in base a cross patée fitchy. The word patée is derived from the French espée, spread, extended in width, in the French a paw or claw, which the French call patée, un ak espée, a flat spread nose, a pug nose.

These etymological elucidations may appear at first useless or trifling; but when we consider that most of the words employed in heraldry are foreign to an English ear, and cannot be remembered if they are not connected with some interesting fact more likely to make an impression on the mind, we truft that, far from having to apologize to the lover of the blazon, we shall be entitled to his thanks for thus affisting his memory, in a manner which conveys literary instruction besides. Aveul- lone, moline, patée, are barbarous and unmeaning founds to the ear of those who do not know what aveulone, moline, and patée signify in another language.

Fig. 49. Or, a cross patonce azure. The etymology of the word patonce is the same as in the explanation of the preceding figure. Fig. 50. Vert, a cross plain argent. This bearing is the nearest to the ordinary, being a cross coupled or分手 from the sides of the shield. Fig. 51. Argent, a cross potent sable. The ends of this cross represent the potent or curvate, mentioned above, at the article vair. Fig. 52. Vert, a chalice, a cup, and a covered cup or. These charges are very nearly alike in form, and often occur in ancient heraldry. In the romantic history of Gabriel de Vergy, we find that her relentles father caused her to be imprisoned and starved to death, with the cap by her side, containing the heart of her lover, which, by his last desire, had been conveyed to France from the Holy Land, where he had fallen in battle. This, or some similar circumstance, may have introduced this bearing. In modern grants it is properly assigned to dignified clergymen.

Fig. 53. Or, a dolphin naiant proper. The dolphin, as represented in heraldry, is nearly an imaginary being. Fig. 54. Gules, a dolphin hauriant argent. Several tribes of fishes, and particularly those of the cetaceous class, cannot live in the deep, without ascending now and then to the surface to draw air necessity for their existence; as on the other side, man is obliged to draw from rivers, or out of the bosom of the earth, a proportional quantity of water for his support. Fig. 55. Argent, a dragon vert. This fabulous creature is fully described in the vocabulary. See the word Dragone.

Fig. 56. Vert, an eagle dêch or. The king of the feathered tribes; the messenger of Jove; the only bird, it is said, that can fly, unwinking and unmoved, at the dazzling disius of the sun; was not an emblem unworthy of the attention of former heralds: and hence we are to account for the great number of eagles that occur in ancient and modern coats of arms. A bird, in heraldry, is styled dêch, when it is represented with its wings lying close to its body.

Fig. 57. Argent, an eagle displayed azure. Fig. 58. azure, an eagle's head eraged argent. Fig. 59. or, an eagle displayed with two heads sable: perhaps more heraldically, or, a spread eagle with two heads sable. The eagle was the ancient emblem of Roman bravery, the origin of the victorious legions, the terror of the world; when the em-
smith, the mallet of the cooper, have been often turned into warlike weapons. See Fed. ch. 4, v. 26. "She put her hand to the nail, and her right hand to the workman's hammer; and with the hammer the scone Sifera." The reader will observe that maces, battle-axes, hammers, and other similar instruments, were commonly used as weapons of war, before the introduction of gunpowder; and then battles were, if less destructive, certainly more bloody, because every man was obliged to fight corps a corps.

Fig. 76. Azure, a harpy argent, crested or. This bearing was borrowed from the Greek and Roman mythology. We find an elegant account of the harpies in Virgil's Ened, Lib. III. 216.

Virgines Volucrum Vultus, &c.

The intention of those whofe imagination created this monster, was to inspire us by an appropriate emblem, with the love of temperance in the enjoyment of sensual pleasures, which the harpy is supposed to represent. By her beautiful female face, the enticing of pleasure and meat animal; and we often find around the staff of the flag, which is enlarged argent a crois gules, a scroll inscribed with the words of the precorior, Ecce agnos Dei! Behold the lamb of God!"

Fig. 86. Azure, a leg and foot in armour proper, garnished or. Fig. 87, argent, a leopard's head affronté gules. Fig. 88, gules, two leopards' heads jeffant de lys or. It is a question among heralds, whether the lesser one of these bearings is original and classical. As we have seen it clearly sung or painted in ancient heraldic manuscripts and pedigrees, we thought it necessary to exhibit it to our readers. When the head is inverted it ought to be mentioned in blazoning; a leopard's head reversed jeffant de lys.

Fig. 89. Argent, a lion passant proper. Enough has been noticed in the preceding pages upon the introduction of this noble king of the beasts into heraldry; suffice it to say that no bearing is more common in ancient and modern blazon; nor is there a symbol more expressive of grandeur and power.

Fig. 90. Vert, a lion passant argent. Fig. 91, or, a lion passant gardant gules. Fig. 92, gules, a lion passant regardant argent. Fig. 93, argent, a lion rampant fable. Fig. 94, purpure, a lion fiant argent. Fig. 95, argent, a lion rampant, his tail noded sable. What discordant fancy could invent this unnatural twisting of the tail of a lion, we cannot easily divine; but certain it is that this has been used from the earliest ages of heraldry. The tail of a lion is sometimes called and of a dragon is sometimes noded or knotted.

Fig. 96. Gules, a lion passant argent. This small animal, whole body is armed like a phalanx facing the enemy on all sides, was depicted on the shield to intimate that the bearer was ready to answer any attack from his antagonist.

Fig. 97. Argent, a harrow sable. The implements of agriculture and husbandry are emblems of the husbandman. Virgil calls them, claimed a place on the shield of the warrior, who, like Cincinnatus, was often obliged to put on the helmet and grasp the spear, when the clang of war called him from his half-harrowed field to the field of battle.

Fig. 78. Sable, a hawk-bell argent, jeffed or. The leather thongs used to tie the bells round the legs of the falcon or hawk were called jeffes, and are often described of a different tincture. See these habiliments figured in the Engraving to the article FALCONRY, vol. vii. p. 198.

Fig. 79. Or, a hedgehog sable. This small animal, whose body is armed like a phalanx facing the enemy on all sides, was depicted on the shield to intimate that the bearer was ready to answer any attack from his antagonist.

Fig. 80. Purpure, a heron argent. This bird afforded good sport to the barons in the amoufment of falconry; and was a bearing probably confined to those who had a right to indulge in this species of the chase.

Fig. 81. Azure, a heron argent. The bird, when caught, a timid contest of the royal flag came to have a place on the buckler of the warrior, is not easy to guess; unless it was in order that his shield should be presented as a mirror to the flying coward.

Fig. 82. Azure, a horse shoe argent. Whether the adoption of this bearing in ancient coats of arms was connected to the superstition which fills hangs the horse shoe over the cottage door, or under the threshold, to keep off incantations and spells, we shall leave to the antiquarian to decide.

Fig. 83. Or, an ibex gules. This animal, the most elegant of the Capra genus, probably owes its origin as a bearing to the Cretans, whose adventurous youth hunted the ibex among the precipitous cliffs of the Cretan alps.

Fig. 84. Sable, a key argent. This ancient symbol of trinity is still often granted to those who dignify themselves by a strict discharge of those important duties confidentially imposed upon them.

Heraldry Plate VI.

Fig. 85. Or, a pashal lamb proper. This symbol of the Christian religion was adopted early in the holy wars, St. John the Baptist was represented with that innocent
HERALDRY.

Common Charges, N.3.
small blackbirds; as if they had forgotten that the word martlet signifies in their own language.

Fig. 111. Argent, masoned proper. When the field is divided so as to represent the alternate position of stones in a building, it is called masoned, and the bearing is figures, Fig. 112, or a merrylefe displayed gules. Whether the French armoris intended here to represent a blackbird, with his beak and feet mutilated, or the swallow, as mentioned at fig. 110, is not easy to decide; however, this bearing is seldom used in English heraldry.

Fig. 113. Azure, a merlons proper, crowned or. This chimaera seems to take it origin from the fabulous fyrrens whom Y法治 is fabled to have met in his travels. They are generally represented with a comb in one hand, and a mirror in the other. We are of opinion that the comb is but of moderi introduction, comparatively with the mirror, which is seldom used in English heraldry.

Fig. 114. Argent, merlettes displayed gules, and the bearing a mirror in the other. Old paintings, and ancient escutcheons, at the top, has long been a part of the insignia of a Moor's head. This symbol of the globe, bound by the following monkifh line: Mundus ut in Christo, sic nos mundus ut in Christo, has long been a part of the insignia of a Moor's head. This symbol of the globe, bound by a line: Mundus ut in Christo, sic nos mundus ut in Christo, has long been a part of the insignia of a Moor's head. This symbol of the globe, bound by a line: Mundus ut in Christo, sic nos mundus ut in Christo, has long been a part of the insignia of a Moor's head. This symbol of the globe, bound by

Fig. 115. Argent, a Moor's head sable. Egypt, and all the contiguous powers of Barbary, opposed as Malhometans the success of the crusaders in Palestine; and hence the great number of Moors' heads affixed to ancient escutcheons.

Fig. 116. Sable, a mound or. Mound from monde, mundus, the world. This symbol of the globe, bound by the chains of Christian fraternity, as preferred by the byzantine emperors, and defended from a crocodile by a plate at the top, has long been a part of the insignia of a Christian emperor. The extent of Charlemagne's empire authorized the painters of his, and of our own time also, to place this figure in his hand; and the eagle of Germany still holds the mound in one claw and the sceptre in the other. Old paintings, and ancient stained glass, frequent us sometimes with this emblem, illustrated by the following monikish line: Mundus ut in Christo, sic nos mundus ut in Christo.

Fig. 117. Argent, a morion proper. This sort of steel armour for the head resembled a cap. Fig. 118, gules, in chief two mullets, the finer placed in base a mullet of eight points argent, in base a mullet, see the definitions. From this, we understand that the colour or metal of the field is seen through the charge; if another tincture appear, it must be mentioned thus: Piegord, or, argent, &c.

Fig. 119. Or, a next proper. The next is a small amphibious animal of the lizard genus, called also by some effect or eft; and has obtained a place among the heraldic charges, although it is not easy to guess what may have been the cause of such an honour bestowed on this humble reptile.

Fig. 120. Vert, an opinicus paffant argent. This hieroglyphical figure, which is seldom to be found in heraldry, and never in nature, parables of the qualities of several quadrupeds, and is one of the most complicated figures that for artistic fancy the every nation, with the character of their eccentricity. However, it holds a place as a crest in the armorial engravings of the company of barber-surgeons in London. Its body and fore-legs are those of a lion, the head and neck those of an eagle, the wings similar to those of a griffin, and its tail that of a camel. When painted without wings, it is called an opinicus fans winges.

Fig. 121. Argent, an ostrich's head couped azure, in the beak a horef-feet fable. Ancient naturalists were of opinion that the gastric juices, in the stomach of this gigantic bird were so powerful, that he could digest iron; and hence the common representation of the ostrich with a horef-feet or a key in the beak.

Fig. 122. Azure, thre ostrich's feathers argent. The ostrich being commonly found in those countries where the wars of the crofs had called the European princes, they often decorated their armour with the feathers of that noble bird.

Fig. 123. Or, an owl proper. This bird was anciently dedicated to Minerva, the goddess supposed to patronize the sciences; and it has been made the symbol of those men, who, in their nightly labors, apply then felves to deep studies; hence it has been denominated the "bird of wisdom." It is often found in coats of arms of ancient families, painted argent on a fable ground, and always full-faced.

Fig. 124. Argent, in chief two pilgrims' chaffes or, in base a palmer's ferip argent. Palmers and pilgrims are synonymous terms; the first originates from the palms, or spires of withy or willow, which these travellers from the Holy Land used to bring with them on their return, as a token of their having visited the sacred places of Palestine; the other name is a contraction of the French pelerin, which itself is a corruption of the Latin peregrinus, a stranger, a traveller, a wanderer. They used to carry their beads, relics, and victuals, in a fcrip or wallet; and this also was introduced in coats of arms, in memory of the chiefrman having been occasionally obliged to disfigure himself after a defeat under a pilgrim's garb, to avoid the slaughter of his pursuers.

Fig. 125. Argent, a peregrine flying gules. This winged horse belongs to ancient mythology, and is fabled to have been ridden by Perseus, after his slaying the gorgon Medusa; and is an emblem of the rapidity with which he flew to the assistance of Andromeda. It is one of the Egyptian hieroglyphics, intimating "to fly with the wings of the wind, to avoid the inundation of the Nile." See the article Egypt, vol. vi. p. 376, and the corresponding plate.

Fig. 126. Vert, a pelican in her nest, turning herself and feeding her young, or. The heraldic pelican is more like an eagle than the real bird of that name. Natural history shows that the female ofverts her breast of the fine down, with the view to make a nest for her young; hence the idea that the pulsus herefigh feed her offspring. This bearing was called anciently a pisey, and has been often represented in images as an emblem of Him who gave his body and blood for the spiritual nourishment of our souls. The French call it un pelican avec sa piete.

HERALDRY PLATE VII.

Fig. 127. Gules, a pheon argent. The pheon is nothing more than the barred head of non with which the darts and the larger kind of arrows were armed anciently. The word is a corruption of the Latin ferrum; French fer.

Fig. 128. Or, a phoenix's head and wings burning proper. This bird of hieroglyphical invention, is generally represented on burning wood, as it was reported that the phoenix, when worn out with years, gathered several branches of aromatic trees, and, setting fire to them, destroyed the remains of its decaying life; but that, out of an egg hatched by the heat of the embers, another phoenix arose, and began a new career of a hundred years. The Egyptian word by which Joseph was designated by the people of Memphis, which he had seized in a time of dearth, sounds so much like the common name of this bird, that it is fair to conclude that the phoenix might be an emblem of that son of Jacol, who, after being hipped to have been long dead, revived in the presence of his astonished brethren. It is often painted over the doors of chemists, as a characteristick symbol of their protection; and it is frequently found among ancient crests, in heraldic collections.

Fig. 129. Azure, three pine-apples or. The word pine-apple means originally the fruit or cone of the pine or fir tree, and from its similarity to this the American nations took the name of pine-apple. The word apple was used anciently for a fruit of fruits that have not a hard outside like nuts, &c, and seems to be derived from the a privative of the Greeks, and pellis, skin; as much
as to say, without skin; the rind of the apple, pear, peach, apricot, &c. being very thin and soft. Fig. 130. argent, a pomegranate seeded proper, is a bearing somewhat similar in derangement to the preceding.

Fig. 131. Sable, a portculis or. The portculis was a strong gate, grated, which they used anciently to let down at the entrance and for the defence of castles, towers, &c. See the article Fortification. It is an apt bearing for military engineers.

Fig. 132. Or, in chief a quarterfoil, and in base a double quarterfoil azure. The quarterfoil is supposed to represent the primrose. It is sometimes, though seldom, to be found double, except as a difference for the ninth son. Fig. 133. Gules, a quiver or, arrows proper. The quiver was a case to keep the arrows in readiness, and was worn for that purpose behind the left shoulder, in order to supply the archer with a succession of weapons. The most ancient of profane writers, Homer, mentions the quiver of Apollo in the beginning of the Iliad, A. v. 45:

It was worn at a time when heraldic bearings began to adorn the shields of the Christian chiefs in the East.

Fig. 134. Or, a rainbow proper. A section of a circle of seven different colours described on the clouds opposite to the sun when its rays pass through a watery medium. Fig. 135. Sable, rays issuing from a cloud proper. See our description of the lines of partition.

Fig. 136. Argent, a reindeer's head caboshed sable. This fleet animal of the cervus genus, has been so far domesticated, that it draws, on icy ground, the sledges of the northern nations. His antlers, or horns, which have in nature a very peculiar form, are to be represented in the annexed engraving.

Fig. 137. Gules, a coat or. Whether this bearing is of a small piece of wood, or any other substance, hanging at the side of the combatants on horseback in tournaments, for the purpose of reining their lance upon, and to give a greater impetuosity to their threats when they encountered; or whether it is the old flute, so much renowned among the Syracusan shepherds, "Serius compulit eis dicta flabella," or some other instrument, called sometimes clarion, or claricord; is not yet, and perhaps will never be, decided among etymologists, antiquarians, and heralds.

It is, however, an ancient bearing.

Fig. 138. Argent, a rove gules. The heraldic rose, as painted red for the badge of the Lancastrian branch, and white for the Yorkists, differs a little from the natural one; and the pustule, differs too, from the petals, and particularly the stigmatic shape, ought to be observed and imitated from the specimen which we have here given from the best examples in ancient and modern authors.

Fig. 139. Sable, the rudder of a ship argent. An apt bearing for those who landantly undertake voyages of discovery.

Fig. 140. Or, a sapeur proper. This suppos'd man of the woods, or wild man, obtained very early a place on the shield, and probably from some gigantic inhabitants of the forests of Germany, who emerged accidentally from their haunts, and deject the armed knight, and made the shield of his helmet and shield ring under the ponderous frokes of their club. They are represented generally naked, but wreathed round the temples and loins with boughs of oak, laurel, &c. Sometimes they are clad in a coat of bark or cortex of any tree, with their elbows and knees bare. Fig. 141. Vert, a demi-sauve proper; a bearing somewhat similar to that above described.

Fig. 142. Argent, a Saracen's head proper, wreathed and sable. The character given to this head must be fierce and audacity. The Saracen troops composed the greatest part of the Mahometan armies in the time of the crusades; and the adoption of the sable engraving under this number, dates from the earliest days of heraldry. The head is covered with a turban, or simply surrounded above the ear with a wreath of two wreaths, and often with a helmet.

Fig. 143. Azure, a bearing proper. The continual use which besiegers have for this implement, has induced armorists to place it among the common charges.

Fig. 144. Or, a sea-horse azure. Although this creature is of fabulous invention, yet its shape ought to be strictly retained in heraldry. The animal that bears the name, in natural history, is very different in form.

Fig. 145. Azure, a serpent proper. The great number of serpents and snakes of all sorts which the regions of the north must have encountered in Africa and Asia, and which are poetically described in the Paraphilia of Lucan, gave rise to the bearing of reptiles in coats of arms.

Fig. 146. Argent, in chief two falk-hawks, in base a fustile proper. Weaving was certainly of Asiatic invention. Penelope, in Homer, sits constantly at the loom; and as the art of weaving was imitated from the spider and the falk-worn, Arachne is suppos'd, by mythology, to have been the inventress of that useful employment.

Fig. 147. Pursuè, three spears heads argent, embowed gules. A very ancient warlike bearing.

Fig. 148. Or, a phoenix couchant proper. This hieroglyphical creation of Egyptian fancy is half a beautiful woman, and half a lion. Much has been said upon the frequency of the allegory against the fair sex; but the fact is, that the meaning of this figure has quite a different tendency. The most interesting opinions of nature in Egypt was the inundation of the Nile, which generally happens about July or August; and the ingenious people who benefited by it, have noted and exemplified the circumstance, by uniting the two signs of the Zodiac, Leo and Virgo, which correspond to those two months; placing the Virgin first, either because of their manner of writing anciently from right to left, the left figure with us being the first with them; or because of the difficulty of grouping well in one body a lion's head with the inferior part of a woman. It has been lately granted to some of those heroes who, in 1799, distinguished themselves in Egypt, and made the whole French army prisoners of war: whence we might say of their famous standard, what Corneille, the father of their tragedy, saw on another occasion: "Il est invincible, mais non pas invincible." See the article Egypt, vol. vi. p. 336, &c.

Fig. 149. Azure, three f宣讲 gules. There is hardly a part in the harness of a warrior which is not recorded among armorial bearings. See vol. vi. p. 336, &c. This supposed man of nature a very peculiar form, are to be represented as represented in the annexed engraving.

Fig. 150. Argent, a ragged flag in bend fustile sable. The elegance of motion, the ease and lightness, with which this sprightly animal bounds over the lawn, gave origin to the word trippant, which is used instead of passant, for the flag, and a few animals of a similar kind. The chase was a favourite amusement with the princes of England, France, and Germany, as well as those of Italy, in the feudal ages; and they did not disdain to decorate their warlike apparel with the figure of an animal which, in time of peace, had afforded them so much delectable sport.

Fig. 151. Gules, a flag trippant argent. The elegance of motion, the ease and lightness, with which this sprightly animal bounds over the lawn, gave origin to the word trippant, which is used instead of passant, for the flag, and a few animals of a similar kind. The chase was a favourite amusement with the princes of England, France, and Germany, as well as those of Italy, in the feudal ages; and they did not disdain to decorate their warlike apparel with the figure of an animal which, in time of peace, had afforded them so much delectable sport.

Fig. 152. Argent, a flag courant gules, armed argent. The attitude of a flag may be of a tincture different from the body, and it is in general in contradistinction with it; that is, if the horns are of a metal, the body must be of a colour, and vice versa. Yet this rule admits of many exceptions, as will appear in the numerous coats of arms delineated on the Plates adapted to this article.

Fig. 153. Azure, a flag flantant at gaze argent. In this position the animal is in motion. It is the natural attitude of this peaceable inhabitant of the grove, when the sudden blast of the horn breaks his rest.

Fig. 154. Or, a flag lodged gules.—"Lying down among the branching leaves of the mountain fern, and listening to the paling breeze;" the flag may have been an appropriate...
The proper emblem of attention and watchfulness. The word lodged is exclusively applied to this particular bearing, which is most elegantly exemplified in the following lines:

The flag sprang up on Cheviot Fell,
Spread his broad nootril to the wind,
Lifted before, aside, behind,
Then droth'd him down beside the hind,
And quak'd among the mountain fern,
To bear that found so dull, so stern.

Marmion, C. ii.

Fig. 155. Sable, in chief two swallows volant, in base a fow argent. Here the swallow preserves its original name and shape; and we must observe, by the way, that when two or more charges are of the same tincture, the name of that tincture is mentioned only once; and that after the name of the last charge that particle of it.

Fig. 156. Argent, a talbot's head fable. This noble dog is of the ancient English breed, and holds a place here on account of his fidelity to his master. And we must here remark, that nearly all the virtues and amiable qualities of man living in society have been symbolized and portrayed by the hand of heraldry, in the embellishment of appropriate objects in natural history; and that consequently the study of this science, besides its other advantages, has a direct and strong tendency to meliorate our hearts, as well as to enlighten our minds.

Fig. 157. Vert, a Tau argent. This figure has long been taken for the letter T, but from a manifest error. The fact is this: St. Anthony, the first hermit of the deserts of Thebaic, founded a congregation of monks, who were bound to observe the rules he had framed for them. They were often to be met with in Egypt, where they were enrolled with the care of the hospitals for the wounded and lame crusaders. They carried, hitched on their garments, a figure allusive to the ministry of charity which they exercised toward the maimed and decayed warrior: and this was not a letter, but a cloutch; which having the shape of the letter T, was soon mistaken by the ignorant, who even in allusion to it called the friars of the order of St. Anthony by the name of Thebains; a convent of that order gave its name to one of the Quai at Paris.

Fig. 158. Or, a thunderbolt proper. The wings denote the rapidity, and the zigzag lines the form and figure of the lightnings in the clouds. This emblem of destruction is often engraved on Roman shields, as may be ascertained by the inspection of ancient sculptures. We read in Virgil, when he speaks of both the Scipios:

Quis Graeci genius? aut gemina, duo fulminia beli, Scipiiadis, cladem Libyae? Enn. vi. 841.

Who can omit the Graeci? who declare
The Scipios' worth, those thunderbolts of war,

The bane of Carthage?

Pope.

Thus the Mantuan poet confirms the propriety of introducing this bearing in modern coats of arms.

Fig. 159. Purpure, a tortoise proper. The attack on some city by the clove target-roof, in which the warrior may have been engaged, found a lodging memorial in this bearing.borne. The turreted tortoise, or shell, is this manner of uniting or hooking shields to shields, which enabled them to approach the walls in defiance of the burning pitch, stones, &c. which the besieged threw incessantly on the besiegers. Virgil says:

Omnes
Ferre libet fruber dentis telludinis causis. Enn. ix. 513.

Fig. 160. Argent, in chief two stumps of trees erased, in base a mount a tree proper. These three bearings ought to be delineated as exhibited in our engraving. They were therefore the revival of a title, as when, after having lain long dormant, it has been allowed to be borne again. The little sprig coming out of one of the charges is expressive of the meaning.

Fig. 161. Sable, in chief two trefoils fitched or, in base a Vol. IX. No. 598.

trefoil double fitched argent. The trefoil is the trifolium of the Latin, the treffe of the French, and the plant commonly called clover.

Fig. 162. Or, a trident proper. The naval power has been often designated by the trident. The ancient poets figured this with numberless ineffaces of it. This symbol is often placed in the hands of Britannia, and usually in that of Neptune; and indeed we might write under it this quotation from the first book of Virgil's Aeneid:

Maturate fugam regique hae dicte urbi;
Non illi imperium peligri facunque triglolum
Set miti forte ditum.

By fatal lot to me
The liquid empire fell, and trident of the sea.

Pope.

Fig. 163. Gules, two trumpets paleways or. This warlike instrument, whose blade laid prostrate the walls of Jericho, is of the highest antiquity.

Fig. 164. Argent, a pair of wings gules. This is called in French, un vol; and when a wing only, un demi-vol. This bearing originated in the sport of hawking.

Fig. 165. Sable, an unicorn argent, armed, maned, and hoofed, or. This fabulous animal is of a form between the horse and the cloven-hoofed quadrupeds. It is mentioned in the Bible; but commentators are of opinion that the rhinoceros was meant by the word unicorn.

Fig. 166. Argent, three martlets sable. Wonderful are the alterations which this figure has undergone from the fancy of different herald-painters. It is now more like the yoke to which the budgets are suspended, than the budgets themselves. Some spell the word ybeng.

Fig. 167. Gules, in chief two wishes or, in base a wolf's head erased argent. The wolve, or whelk, is a shell of a beautiful form, and of a comic shape, tinged with lively nuances of colours. See Conchology, vol. v. p. 27.

The wolf has been completely hunted out of this island; and the pererverence which this laborious chase gave to the ancient English, probably suggested the propriety of bearing a wolf; or of any parts of this voracious predator on the heeptold.

Fig. 168. Or, a wert worn. This fabulous creature has been already explained. There is an old legendary story of a wert and the fairy Melusina of the castle of Lusignan in France, which those may consult who are fond of fables founded on improbability.

In the description of our Plates, as well as in the Definitions of Heraldic Terms, we have mentioned and explained all the principal and subordinate ordinaries, and a sufficient number of charges to enable the young student in heraldry to become soon a proficient in the science. But when we consider that all those figures, varied by their outlines, combined with each other, and diversified by the fevenfold power of the metals and colours, can be multiplied nearly ad infinitum, the mind is struck with astonishment, and, were it not for the fecetful helps we receive from heraldry and her systematic rules, how few would be capable of acquiring a competent knowledge of the art? Yet, aided by these explanations, the mind of a student, through the most intricate mazes of pedeges, and, by attaining the point it had in view, soon reaps the fruit and reward of its labours.

To confirm what we have just said, and to give the reader a faint idea of the immense number of combinations, which, however, may be obtained by adding, changing, the devices of any charge by ordinary, and we have calculated that a single sffe, combined with the seven tinctures of the shield, produces 20 charges.

If varied by the sixteen outlines of division, as given in the Heraldry Plate I. it will amount to 320. If we divide the field per sffe also, the combinations will increase to the last number multiplied by 42, that is 464,480; and if we place a roundel on the sffes, from the bezant in fuse.

5 U
ceffion to the fountain, we obtain the astonishing sum of 17,498,880. Were we to add any charge in the other parts of the shield, the number of changes would defy calculable number of sounds which the human tongue can articulate and offer to the ear.

ACCIDENTAL BEARINGS.

Hitherto we have delineated, as strictly and carefully as possible, all the constituent and component parts of a regular coat of arms, under the heads of Ordinaries, Sub-ordinate Ordinaries, and Common Charges; which, if once removed from the general composition of the shield, alter materially the bearing, that it becomes to all intents and purposes another coat, just as distinctly as if the colours or metals were themselves changed. But it is incumbent on us in this place to particularize three accidental bearings, which do not affect the purity and originality of the blazon, either real or imaginary, connected with the other charges: we mean, 1. the badge of Ulster; 2. the badge of Nova Scotia; and, 3. the modern marks of difference, whereby are ascertained the different branches of the same paternal house.

The Badge of Ulster, consists in a small shield argent, ensigned with a sinister hand opened and erect gules. See Plate IX. fig. 52. It may be borne in the dexter corner, in the centre chief, or as the fess point; but never in the shape of a canton. We often find instances of its being affixed to the centre intersection of a shield of four quadrants; or on an intersection in the middle summit of the chief row of the quarterings, when they amount to any greater number. It must however be observed, that if in a collection of quarterings, it would be highly improper to introduce it in any other coat than the first, if an intersecing middle point could not easily be found, which is the case when the row is composed of an uneven number of coats, as 3, 5, 7, etc. The origin of this badge is as follows:

In the reign of James I. and even long before his accession to the throne of England, the whole kingdom of Ireland, but particularly the province of Ulster, had continued in a very refractory and unsettled state, and the people were in general unwilling to submit to the influence of the English government. To repress these tumultuous cabals, king James created an order of baronet, being a middle station between the barons of parliament and the order of knights; of all which (baronets) did not only tender to his majesty their utmost service, but also made a proffer of their lives, fortunes, and estates, as a test of their ready performance of this duty, adding that while a spark of rebellion, or hostile motions took place. That they are of most ancient date, is beyond doubt; as it was necessary to give a difference to the beholder a criterion as certain and indubitable, as it is manifest and satisfactory. The differences thus selected, are exhibited in the Heraldry Plate VIII. as follow:

The heir, or first son... wears a label. The second son... a crescent. The third son... a mullet. The fourth son... a martlet. The fifth son... an annulet. The sixth son... a fleur-de-lis. The seventh son... a rose. The eighth son... a cross moline. And the ninth son... a double quarterfoil.

For the second house, that is the house of the second son, the eldest wears a label on the paternal crescent. The second son a crescent on a crescent, and so on invariably. The third house, or the house of the third son, wears, for the eldest a label on the paternal mullet, the second son a crescent on the mullet; and so on.

The daughters of each house should always bear the family distinction borne by their father, but not any to show them to be the first, second, third, &c. daughters, as is done by the royal princes; each of whom bears a label differently ensigned, as shown in the engraving Plate VIII.

It is not easy and uncertain exactly when these distinctions took place. That they are of most ancient date, is beyond doubt; as it was necessary to give a difference to the all the members of a family to facilitate the means of identifying them. However, it appears to us that these brixtures, or, as they are scientifically called, marks of cadency, are coeval with the earliest visitations of the heralds, because they are to be found in the records of those visitations preserved in the College of Arms from the early part of the reign of Henry VIII. Now as the most ancient visitation of which any account is recorded, is "Visitatio falsa per Marischallum de Norroy, ult. ann. Henrici IV. 1412," preserved in the Harleian library, it is fair to conclude that these distinctions began to be used in the reign of Henry IV. Edward IV. &c, although Edmondson, whose partiality against past and present heralds is obvious in his works, represents them as of modern invention, and of little import, as being too small to be perceived at a distance. It is said, that in an old window of the church of St. Mary at Warwick, the six sons of Henry VI. who died in Edward III. are distinguished by these differences; but we cannot be sure that this window was not put up some years after his death, and perhaps that of his sons.

These marks of cadency are not adopted by the princes or princes of the blood royal of England, because...
cause none of the children of our king bear arms, until it be his majesty's pleasure to command that such be granted them; which is done in the following manner: His majesty, by his royal warrant, and sign manual, directed Garter principal king at arms, to grant and confirm such arms as the bearer shall be enabled to bear, in which, together with the grant, is recorded in the registers of the College of Arms; and those have been lately settled, as delineated in our Heraldry Plate VIII.

It has happened that these marks of cadency by lapse of time, and the careless neglects of scribes, have been altered; and in other ancient pieces of sculpture, that the helmet was generally placed over the buckler of the deceased hero, whenever a monument was erected to his memory. This method has been followed quite to our own times; and will probably pass unvaried to posterity.

The name of the helmet in the Greek language, is 

In Latin, galea, cafco, casque; in German, helm; in Italian, elce; in French, haubert, haubin, and casque; and in English, helm, helmet, bowler, morion, and falade, or falade, and sometimes caske. From the Greek the crested lark has received her denomination of τὰρτας, corvus; from the German helm, the Italian, English, and French, have borrowed the most barbarous and incorrect names that can be applied to the head of a warrior; and we perceive in the Latin expression the nature of two sorts of helmets; for galea, which is a derivation of γαλαξα, a cat, means a helmet made of cat's-skin; and casque, one composed of plates of iron, steel, or copper, covering each other in an interlaced form, like the scales of fish. The English word falade, commonly, used for a helmet, is derived from Ialad, because the bejeged, when they failed forth, roaring out their head foremost, and beat upon their heavy spears, in order to make a sudden charge on the advancing troops of the assailants, had need of such a strong covering for their heads, which, in this attitude, were exposed to the brunt of the bejeged enemy.

Descriptions of ancient poets, antique monuments of Greek and Latin sculpture, medals, and intaglios, remains of Gothic carvings, and old euhemerises, present such a variety of helmets, that it would exceed the limits of our plan to attempt a description of them all. We shall therefore only delineate in our correspondent Engraving those that are fill in use among heralds, or that throw some new light on the subject.

The full-faced helmet of six bars, all of gold, and damasked. This is exclusively aligned to the sovereign, and all the princes of the blood. See Plate VIII. fig. 2. A profile or side view of a helmet of steel damasked with five bars; the bars, balls, and orgrills, of gold. This is placed over the arms of dukers, marquis's, earls, vicounts, and barons; without any particular difference. The word orgrill, by old armorists in this case, is derived from the French grille d'or, a golden grate, and means the same as bars of gold interjecting each other; this we often meet with in ancient descriptions of helmets, and is a particular kind of uffor, through which the armed knight was able to see the motions of his adversary, without fearing the thrusts of the spear in his face. Here Edmonson and others have committed an egregious error, in assigning a helmet to dukers and marquises differing from the others, to earls, vicounts, and barons. This damasked helmet, with five golden bars, belongs equally and indifferently to all the nobility; for they are pairs. See Plate VIII. fig. 2.

A full-faced helmet of steel, its uffor or beaver up, or open, and without bars. This is proper to the baronet and knight. See Plate VIII. fig. 3. Some ingenious admirers of heraldry have wished that the inside of this helmet should be of a colour analogous to that of the field; but there is no particular injunction to this purpose.

A profile of a helmet of steel, with the uffor down. This is the proper bearing of a esquire; and by courtesy, of all those who may be flyled gentlemen. See Plate VIII. fig. 4. This division of the helmets is finial, clear, and rational: the helmet of gold full-faced, with bars, for the king and princes; the same full-faced, but of steel or silver, for the nobility. The helmet of steel full-faced and open without bars, for baronets and knights; the same full-faced, and front, for the gentry.

Some writers are of opinion, that three principal and different metals, should be made a characteristic distinction for the three branches of the British Constitution, or three integral parts of the nation. Gold for the king and princes; steel for the peers of the realm, and silver for the commoners; but painters have seldom attended to this, there being no particular rules laid down for it.

If two helmets are placed on one shield to support two different crests, they are usually set face to face, in imitation of the Germans; who sometimes, according to the number of crests a man is entitled to, place ten or more helmets on the same shield. In that case, if the number be uneven, the centre helmet is depicted full-faced, and called effronté; and those on each side looking respectively towards the centre.

Among the Greeks and Romans, and also among our ancestors, the fabrication of the shield, and of its ornamental details, was copied from the example of the best artists.

The gold, silver, or steel, of which it was generally composed, was engraved, and polished so bright, that lightnings were said to flash from it. In the beautiful episode of the Adiues of Hector to Andromache, in book vi. of the Iliad, Homer gives to the helmet of that hero the epithet 'κορυφή, "sparkling all around with dazzling rays of light;" and Virgil, speaking of the helmet of Aeneas produced by the skilful hand of Vulcan, uses the following bold expression: Territilem crepis galeam flammagiae comitem. Lib. viii. 620.

The crested helm that votms radiant fire.

And book ix. 477:

---Galaamque nitentem Memphi.

It was through the high polish of his head-piece, that Euryalus lost his life; for had it not been for the emis-sions of light it gave in the darknes of the grove, by reflecting the doubtful beams of the moon, the enemy would never have discovered him:

Galea Euryalum subluiti nollis in umbra

---Through the doubtful shade,
His shining helm Euryalus betray'd.

Dryden.
The helmet furnishes also the Italian genius of Tasso with a most affecting and truly picturesque scene, when he represents Tancred running to the neighbouring bushes with the intent, that the water of baptism to the expiring Clorinda; -

Poco quindi lontan nel fen del monte
Scaturla mormando un picciol rio

Egli s'accorfe, e l'elmo empio nel fonte
to the expiring Clorinda:

...But these representations chafed on the steel, silver, or gold, of the helmet, did not long satisfy the warrior; he added to them a quadruped, a bird, or some fanciful figure, which made part of the ridge on the top...
CROWNS AND HELMETS, CUPS AND WREATHS, AND FAMILY DISTINCTIONS.

London: Published as the Act directs March 14, 1803, by J. W. Y.
part of a nature of Achilles; it was found near the
ancient Lavinium, not far from Ofius, and was in the possession of
Generil Shouwaloff, when the caft, after which we describe it, was made.
We are aware that Achilles is represented by Homer and Virgil, as wearing a conspicuous cress, "Hoc Phryges inlatic curru cressatus Achilles;" but though the simile figura, Plate VIII, do not seem to allude to this hero.
The cress was a sphrink, beneath which, on each side, is a most exquisitely carved gryphon, and nearer to the forehead are figures of two dogs. Nibjet mentions this as belonging to Minerva, and as the sphrink denotes acuteness of mind, the griffins, old guardians of treasures, secrecy, and the dogs fidelity, vigilance and truth, and very anciently ascribed to the ancients.
However, as it is not our province to decide upon this question, we shall content ourselves with observing, that here we have the second stage of the rudiments of a modern cress.
The Latin classic mention, in several places, chimneys, lions, eagles, and other animals, as forming the most elevated part of the helmet; and an elegant description of such a cress appears in Aem. lib. vii. v. 783.
Ipsce inter primos praefianti corpore Turnus Vertitur, arma tenens, et toto vertice suprâ cist. Cui triplici crinita juba galea alta chimeram Suffinet, Âneas eflanturn faucibus ignes.
An imagination that is ready either to conceive, or to admire, what others have framed beforehand, cannot help feeling in these two last lines the grand idea of a cress which, running over the undaunted forehead of a hero, has the double effect of frightening the foe, by impressing the high qualities of the wearer, Virgil in this book of his inimitable poem, conscious that he was ushering, for the first time, this secondary hero to his readers, delighted in the description, and, foaring above the general and even tone of this book, sang of the threefold mane of horfe's hairs, and of the lofty chimeras towering over his brow, and breathing with open jaws a volcano of unremitting flames. Alexander the Great, from this confidential idea of his undaunted courage, at first adopted the lion for the ornament of his helmet; but when, intoxicated by flattery and ambition, he vainly called himself the son of Jupiter Ammon, he assumed the goat, in allusion to his horns affixed to the head of that god. Julius Caesar, it is said, chose a cress for his cress, in allusion to the evening star, over which Venus, the god. Julius Caesar, it is said, chose a cress for his cress, but when, in the contrary, crowd the top of their shields with as many crests as they can muster; and it is impossible to deny that it has a most conspicuous and confessional appearance.
Every quartering in their achievement seems entitled to a cress, and each cress has a helmet for its support.
The name of the cress in Greek is âegrae, and in Latin cresca; in French cimier, or timbre; in Italian cimiero; but the word timbre, Lat. thimbrum, is common to the helmet also, and means rather the form of it than any thing else; as the French call the bell of a striking clock by that name, in allusion to its helmet-like form. It must here be observed, that a great number of ancient families did not adopt any crests at all; and that the want of it to coats armorial becomes often a proof of high antiquity, and of originality.

**OF CROWNS AND CORONETS.**

Crowns were not originally a mark of sovereignty. They were bestowed on the best finger at a feast, on the best runner in the Olympic or Nemean games, and upon those who by some particular talents or exertions rose above their competitors. The crown or garland was placed on the head, as the feat of wisdom, Lucy, and wit; and as the most conspicuous and noble part of the human frame. It was voted, among the Romans, to those who, after great military and successful exertions, were entitled to the triumphal honours; and in times when virtue had more value than gold, it was composed of single leaves of laurel, plucked from the neighbouring grove; but the native simplicity of manners being altered, gold was substituted instead of the plain garland of bay-leaves; and in Tully's time the triumphant hero began to prefer the aurum coronarium, or money, granted instead of a crown, to the bare but more noble dignity of the laurel. See Plate VIII. fig. 15. Livy, in several parts of his works, mentions the corona obсидionalis of the Romans; and indeed that great people, worthy to succeed the Grecian states, let no occasion slip when they could inspire the warrior with boldness, intrepidity, and courage. A crown was ever waiting for the leader on his return; when by a coup de main or a sally he had victualled and preferred a citadel long besieged, or railed by skilful manoeuvres, or bold and timely succour, a tir- some blockade, and forced the besiegers to abandon their plan—in this boastful, but arduous, moment, what had he to expect from his fellow citizens, as a reward for the jeopardy of his life? Was it the golden diadem, the treasures of the city, or the most profitable places in the government? No; the rich emigrants, plucked from the very spot where he displayed his valour; and that alone sufficed, in his estimation, every species of remuneration or reward. If the duties of man, which are so amiablely expressed and enforced in the gospel of Christ; if the love of each other, the real wants of the Christian inhabitants, were to operate on our minds, as they appear to have done on the magnanimous Romans, we should not have to wonder at their wearing with a crown the temples of him who, at the expense of
of his own blood and the hazard of his life, had saved a fellow-citizen in the heat of battle, and rescued him from the jaws of the enemy; and that the cornua cibica, cornu alcei, was given to him, as a memorial of his heroical and generous interposition. See Plate VIII. fig. 16.

The Phoenician spirit which animated the Carthaginians, the love of commerce and of conquest, which, for a term in the annals of history, buried the shores of Libya, and the wales of Mount Atlas, created a naval force at the mouth of the Tyber, and hence a crown was fabricated of gold to deck the brows of a naval hero. It was made in imitation of the prow of a ship, and was called corona navalis, naval crown. Thanks to the national spirit of our brave countrymen, that the heralds of our age have so often had occasion to grant this distinguished mark of honour; and the naval crown glitters of late on many a coat of arms, as an everlasting proof of our successful exertions in the maintenance of our rights and liberties. The naval crown, as now borne, is composed of a gold rim, surmounted with three ferns of ships, and two tails alternately. See Plate VIII. fig. 8.

The ancients, as we find it described most minutely in Cæsar's Commentaries, and other classical works, used to raise a trench, which, from the old Celtic word vallum, they called vallum, in order to advance upon, or fence themselves from, the enemy. Whoever entered the entrenched trench, was entitled to a crown called vallatis corona, which is literally翻译of pales or palisades and is still in use among heralds. See Plate VIII. fig. 9.

The mural crown, corona muralis, was the meed of those who had exhibited great prowess in attacking a town, and who, under a shower of darts, stones, and other missiles, had scaled its walls, and carried the place by storm. It was a circle of gold, with pinacles or battlements erected upon it; and has preserved this shape, as delineated in Plate VIII. fig. 11.

The eared crown is a gold rim adorned with eight rays, five of which are only to be seen in heraldic representations. It has often been granted as a mark of particular distinction to some British subjects, who have well merited the country, by their talents in conducting the affairs of our eastern establishments; or who have defended our Indian possessions against the inroads of the enemy. See Plate VIII. fig. 11.

The celestial crown is very similar to the one last described, with this distinction, that every ray is surrounded with a small star. It was bestowed on emperors, kings, and princes, who were entitled to the honours of the apostles; and it is still frequently painted on funeral achievements. See Plate VIII. fig. 12.

The preceding crowns, in heraldic blazon, may be of others, but distinguished by;

- The coronet of his royal highness the prince of Wales, in proceeding to her coronation, is a single rim richly ornamented with large diamonds curiously set, with a string of pearls round the upper edge thereof. The cap is purple velvet lined with white taffeta, and turned up with ermine.

A sovereign queen is crowned with St. Edward's crown, but a queen consoled with a crown called St. Ethilda's, made originally for the coronation of queen Catharine, consoled of king Charles II.

The coronet of his royal highness the prince of Wales, as heir apparent to the king of Great Britain, was anciently a circle of gold, set round with fleurs-de-lis and crowns, in the same form and number as on the royal crown; but since the restoration it has been cloathed with an arch only, adorned with pearls, and surmounted also with a mound and croiss. The cap is the same as for the king's crown. See Plate IX. fig. 4.

All the royal princes and princesses, sons and daughters of the king of England, wear a similar crown, but without arch. The cap, surmounted with a tuft of gold, is also of purple velvet, turned up with ermine. See Plate IX. fig. 5.

The present duke of Gloucester, and the princes Sophia his sister, have a particular coronet, composed of four crescents pâtes, to show their immediate confanguinity with the royal family; and four strawberry-leaves; as represented in Plate IX. fig. 6. The strawbery-leaves is very ancient; and we do not doubt but that the honour of adorning the brows of majesty was referred to this humble plant, in order to remind sovereigns that though elevated to so high a station in society, they never ought to forget that they are but men, and but a simple leaf in the great scale of nature, and in the dispensations of Divine Providence. Certain it is, however, that this leaf has been introduced on the kings crowns from the earliest times of the British monarchy; which is exemplified and proved by the oldest coins now in existence. The ducal coronet is composed entirely of these leaves, to the number of eight; five of which are seen in heraldic drawings, as shown in Plate IX. fig. 7. Sometimes a ducal coronet is used in arms as a charge, or on a charge, as in the composition of crests, and then it ought to be drawn as represented in Plate VIII. fig. 7.

The marquis's coronet is made like the preceding, of a gold rim enriched with jewels, charged with four straw-

- The earl's coronet is a circle of gold, with the cap and ermine turning up like the others, but distinguished by eight pyramidal points, each supporting a large pearl at the top, the interfaces being adorned with strawberry-leaves,
leaves, whose spicis do not rise quite so high as the points. See Plate IX. fig. 9. We read in Sandford's Genealogical History, that John of Eltham, earl of Cornwall, to whom his father Edward II. gave the manor of Harborough in the county of Leicesters, is adorned, upon his monument in Westminster-abbey, with a coronet composed of greater and leffer flrets or leaves, and that it was the most ancient instance of an earl, in his observation, that had a coronet.

A viscount's coronet is a circle of gold also ornamented with jewels, and supporting sixteen pearls, nine of which are only to appear in heraldic engravings and paintings. We are well aware that in many instances this coronet is represented with seven only; but we have under our eyes a viscount's coronet in the arms of the eldest sons of peers, above the degree of a viscount, assumed their father's arms bound about with a double row of pearls.

The coronet of a viscount, as it is called, which was first granted by Charles II. is formed of a plain circle of gold, without jewels, supporting six pearls set at equal distances, four of which are to be shown in engravings, paintings, &c. See Plate IX. fig. 11. We must not omit to observe, that previous to the reign of Charles II. the barons wore only a cap, as represented Plate VIII. fig. 13.

The coronets of foreign noblemen differ considerably from those of the British nobility; a French earl wears a circle of gold with eighteen pearls set on the brim of it; a viscount a circle of gold enamelled with four large pearls; a baron a circle of gold enamelled and bound about with a double row of pearls.

The cap of maintenance, as it is called, which was formerly worn by our nobility, is of crimson velvet, lined, and turned up with ermine. Such a cap was sent by pope Julius II. with a sword, to King Henry VIII., to direct all painters and artists the order of the earl marshall, dated September 1514. We are well aware that in many instances this coronet is represented with seven only; but we have under our eyes a viscount's coronet bound with jewels, and supporting sixteen pearls, nine of which is a figure illustrative to our last example.

MOTIFS, DEVICES, AND BADGES.

It is recorded by ancient authors, that the Gauls, Germans, and other warlike nations, used to raise a tremendous cry, at the instant of rubbing forth upon their enemies. Whether that warlike vociferation was the repetition of some peculiar word or phrase to invoke the protection of their gods, or to excite a dreadful panic among the foe, it is not easy, at this distance of time, to ascertain. But we cannot help supposing, that from this barbarous custom, the several cry d'armes, cries of war, cry de guerre, and motos, took their origin; with this material difference, however, that the former were intended to create confusion in the ranks of the adverse party; while the latter was to produce union among themselves.

The coronet of a viscount, as it is called, which was first granted by Charles II. is formed of a plain circle of gold, without jewels, supporting six pearls set at equal distances, four of which are to be shown in engravings, paintings, &c. See Plate IX. fig. 11. We must not omit to observe, that previous to the reign of Charles II. the barons wore only a cap, as represented Plate VIII. fig. 13.

The coronets of foreign noblemen differ considerably from those of the British nobility; a French earl wears a circle of gold with eighteen pearls set on the brim of it; a viscount a circle of gold enamelled with four large pearls; a baron a circle of gold enamelled and bound about with a double row of pearls.

MOTIFS, DEVICES, AND BADGES.

It is recorded by ancient authors, that the Gauls, Germans, and other warlike nations, used to raise a tremendous cry, at the instant of rubbing forth upon their enemies. Whether that warlike vociferation was the repetition of some peculiar word or phrase to invoke the protection of their gods, or to excite a dreadful panic among the foe, it is not easy, at this distance of
explanation of heraldic terms, and p. 426.) he adopted it as his own. The small animal called *genet*, passing between two spires of broom, was his other cognizance, and is described in the records of the heralds' office:—

"*It fertit unij genetie possant entre deux plantes de genife.*"

The ears of the *Viverra genetta* of Linnaeus, which are peculiar to the *genet*, are a little pointed; the body is slender, and the tail very long. The colour of the body is a rusty-red spotted with black, and the ridge of the back is marked with a black line; the tail is annulated with black and tawny, and the feet are black. It is at the size of a martin, but the fur is shorter." See the article *Viverra*.

Edward III. adopted the stump of a tree, "therby to signify his flourishing issue." His most magnificent son Edward, surnamed, from his iron armour, *The Black Prince*, had a sunne arrowy out of the clouds, be-tokening that, although his noble courage and princely valour had liithero been hid and obscured from the world, now he was arying to glory and honor in France." This gallant hero, at the battle of Crefly, assumed the three ostrich's feathers and coronet which he took from John king of Bohemia, who was slain in his encounter with the prince; and added to it the no-elled and submiffive motto, *I serve.* See the Plate XIV. This badge has been ever since continued to the princes of Wales.

The badge of Richard II. was a white hart lodged, with a crown round his neck chained or;—he bore also a sun in its splendor, from the badge of his father; and his other badge was a falcon in the fetterlock, with the motto "fpera eadem." Her other badge was a falcon argent crowned or, holding a sceptre of the second, and a fleur-de-lys crowned. Her other badge was a falcon argent crowned or, holding a sceptre of the second, and a fleur-de-lys crowned.

Richard III. found in a hawthorn bush, he bore the crown and the bust, with the letters H. R. and H. E. as may be seen in the windows of his chapel at Westminster-abbey.

Henry VIII. bore also the red rofe encompassing the white, sometimes in the fun-beams and crowned. 

Queen Elizabeth, the spirit of chivalry, which had declined confiderably in the sixteenth century, being entirely funk, badges have grown in consequence into difufe. They originated with the war-like fports of tilts and tournaments; and with those they ended. Many of them were superseded by crefts; some, but few, became crefts themselves; and fewer still have been preferved. Some of our nobility retain the family badges, as in the infance of the earl of Delwar, who bears the crimpette and impaled rofe; and the earl of Abergavenny, who still retains the rofe. On account of the fatal effection of the royal houses of York and Lancaster, the white and red rofe became, as we have noticed above, the diftinctive badges of the two contending branches of the fame family; deluges of blood empurled the field of Albion during the mighty strife, till at length, in Bosworth field, Richard III. be-foing flain, Richmond, of the houife of Tudor, became posfessor of the throne, and exclaimed:

As we have taken the sacrament,
We will unite the white rofe and the red. *Shakespeare.*

This badge of the united rofes is fill the noble cognizance of England; to which the thistle or badge of Scotland, and the shamrock of Ireland, have been successively added, according to the period of the junction of those kingdoms under the sceptre and fway of the famne monarch, reprefented by the fame parliament, and protected by the wife laws of the fame fortunate constitution. See Plate IX. fig. 28, with the collar of SS, which plate exhibits the moft conspicuous badges and crefts of the three united kingdoms, in the manner as correct as any pi-cies and defcriptions from the felf of authorities, the He-ralds' Office, could possibly produce.

*OF SUPPORTERS.*

There are natural, allegorical, or chimerical, figures, placed on a compartment or a roll at the bottom of the shield which they seem to support. Their origin is like that of several other parts of the science of Heraldry, is enveloped and perhaps irrevocably lost in the clouds of antiquity. Some authors pretend that they were at firft painted as if holding the shield behind, and from some old specimens of this manner they also derive the origin of the crest as well as that of the supporters. See Plate XI. fig. 1. The moft probable opinion is that they firft were made use of and publicly exhibited as a part of chivalrous pageantry at tournaments, where the knights caused their banners to be carried, and sometimes their shields to be held, by their pages, fervants, or attend-ants, difguifed under the shape of lions, tigers, leopards, bears, in order that their arms might be inspected by other knights, and thereby their family and connexions ascertained. It appears that these escutcheons or flags were fent to the place of entertainment a few days before it began; and a grand procession, called *la montre*, used to take place after the *mas de la Holy Groff,* Queen Elizabeth, the spirit of chivalry, which had declined confiderably in the sixteenth century, being entirely funk, badges have grown in consequence into difufe. British Flags, Crests & Badges of the 3 Kingdoms, Royal Crown & Coronets of the Nobility, Armorial Bearings of the College, Kings of Arms, &c.
standing and holding the banner; and in Plate XI. we have introduced two specimens of them at fig. 2 and 3. Sometimes supporters have been taken from the principal charges of the field, whether men or animals; birds of all kinds have been called to the honour of supporting the noble escutcheon; dragons and fennouches were admitted to the glorious employ; and the bear and the lion, from their instinctive tendencies to the banks of rivers, to uphold the buckler of the warrior: they have often been adopted, or first granted, on account of some particular action which the Knight wished to have remembered. Lord Nelson had the lion of England tearing the tricoloured flag of the French navy.—Sir Sidney Sidney, Duke of Buckingham, had the lion held by the lamb with the banner of Jerusalem in allusion to his brave achievement at St. Jean d'Acce; and many other of our distinguished characters have had granted to them supporters expressive of the occasion or circumstance of their obtaining that honour.

Peers of the realm, knights of the fervor orders, and proxies to princes of the blood royal at installations, are those only who enjoy this prerogative, unless his majesty is pleased to concede to others the privilege of bearing them for some particular and special cause, generally mentioned in the Sign Manual.

Supporters are not hereditary but to the eldest sons of peers; that is, that they descend with the peerage according to the rules of heraldry, as has been observed before. Thefe external ornaments of the shield are sometimes divided, each holding an escutcheon, as we often have seen at the entrance or over the gates of royal palaces, where the lion on one side and the unicorn on the other hold the royal arms; painters and carvers have also taken the liberty, in imitation of foreign nations, to place the supporters in attitudes; but this is contrary to the rules of heraldry, as has been observed before. Specimens of supporters will be seen to a great number in the plates annexed to this article.

Heradry Plate VIII.

Fig. 1. The helmet and mantling appropriated to the armorial bearings of the king, George III. and the princes of the royal blood, as described under the head "external ornaments." Beneath these are the distinctive marks for the sons and daughters of his majesty; and although they are engraved on their respective coats of arms, yet it is requisite we should give a more enlarged view of them in this place, with a concise description.

a. The Prince of Wales. A plain label of three points.

b. The Duke of York. A crofes gules, on the middle point or drop.

c. The Duke of Clarence. A crofes gules, between two anchors azure; in allusion to his being grand admiral of Great Britain.

d. The Duke of Kent. A crofes gules, between two fleurs-de-lis azure.

e. The Duke of Cumberland. A fleur-de-lis azure, between two crofes gules.

f. The Duke of Sussex. Two hearts in pale, between two crofes gules.

g. The Duke of Cambridge. A crofes, on each side two hearts in pale gules.

h. The Princess Royal. A rofe between two crofes gules.

i. The Princess Augusta Sophia. A rofe gules, between two ermine lape fable.

j. The Princess Elizabeth. A crofes, between two rofes gules.

Vol. IX. No. 598.

I. The Princess Mary. A rofe between two cantons gules.

m. The Princess Sophia. A heart between two rofes gules.

n. The Princess Amelia. A rofe between two hearts gules.

To show at once the cadency of one degree, or the first removal from the stem, the late duke of Gloucester bore on a label of five points argent, a fleur-de-lis azure, between four crofes gules. And his son, prince William of Gloucester, had, during the lifetime of his father, the same label, and under it the common distinction of the first son, viz. a label of three points, and a fleur-de-lis azure. Since the death of the late Duke, Prince William bears his father's label, as granted to him according to the king's warrant directed to Garter, bearing date Oct. 2, 1801, as shown at o; and his sister Princess Sophia Matilda had in the same manner the same label alligned to her, on March 23, 1806, as shown at p.

This cuftom seems to have originated in England in the age of Henry III. and probably sooner in France. Robert earl of Artois bore a label of three points gules, each charged with three cailles or. His daughter Blanch, relieft of Henry de Champagne, king of Navarre, and second wife of Edmund earl of Lancaster, second son of Henry III. bore the same; her husband Edmund de Lancaster bore the arms of England, gules, three lions passant guardant, or, with a label of three, and sometimes of five, points azure, each charged with three fleurs-de-lis or. He died at Bayonne in 1306. Sayer de Quincey bore in his arms, in the reign of John, a label of ten or twelve points; but whether it was a family distinction, or a particular bearing adumbrated for some cause unknown to us, is not possible now to ascertain.

Fig. 2. The helmet alligned to the nobility of Great Britain and Ireland. See above the description under the title Helmet. Beneath this is the paradigm of the distinction of houses, as already explained. Fig. 3. The helmet alligned to baronets and knights. Fig. 4. The distinction of houses, as already explained. Fig. 5. The helmet alligned to esquires and gentlemen. The other figures contained in this Engraving are described under the head "external ornaments" of the shield.

Heradry Plate IX.

Fig. 1. The Royal Standard of the United Kingdom of Great Britain and Ireland, as settled by the king in council, on Nov. 5, 1800.—For the blazon of the arms, see the description under the article "the King," and the Heradry Plate XIII.

Fig. 2. The union flag, commonly called the "jack," or "union jack," composed of the three crofes, viz. of St. George for England, of St. Andrew for Scotland, and of St. Patrick for Ireland; properly combined according to the rules of heraldry, as follows: On a field azure, the crofes-fallicres of St. Andrew, argent; and of St. Patrick for Ireland; properly combined according to the rules of heraldry, as follows: On a field azure, the crofes-fallicres of St. Andrew, argent; and of St. Patrick, gules; over all, the crofes of St. George, fimbriated of the second. This bearing has carried the victorious arms of England into all the known parts of the world. The union jack is the only flag that rides on board with the certain of being undisputed, and is, and we hope WILL EVER BE, the triumphant symbol of the SOVEREIGNTY OF THE SEAS.

Fig. 3. The imperial crown of England, above described. Fig. 4. The prince of Wales's coronet. Fig. 5. The coronet of the princes and princefales of the blood real. Fig. 6. The Duke of Gloucester's coronet. Fig. 7, 8, 9, 10, 11, the coronets of the nobility; and fig. 12 and 13, the mitres, as above described.

Fig. 14. The badge of England. The red and white rofe crowned, as above described.

Fig. 15. The badge of Scotland. The thistle proper, ensigned with the imperial crown of Great Britain. Of this badge, which is very ancient, we treat anply under...
under the article Knight, where all the different orders of Knights are enumerated, and their badges delineated in its correpsondent engravings.

Fig. 16. The badge of Ireland; which consists of a harp or, stringed argent, ensigned with the imperial crown or. Whether anciently the people of this isle or one of the more particularly addicted to music than the Scots and Picts, or, communicating with the Britons of Wales, their neighbours, they learned to sweep the enchanting string of the harp in the vales of Snowdon, and in the groves of Mona, attended by the mysterious bards; they adopted for their cognizance the figure of an instrument that was alternately the folace of their forlorn spirits, and the companion of their mirth.

Fig. 17. Second badge of Ireland, the shamrock, ensigned with the imperial crown, all proper. The shamrock is a kind of trifolium, clover; but we cannot offer any thing satisfactory to our readers as to the origin of this badge.

Fig. 18. The crest of England.

Fig. 19. The crest of Scotland; upon the imperial crown of Great Britain, a lion sejant, full faced gules, crowned or, holding in his dexter paw a naked sward, and in his sinister a fceptrum, both eretted. The origin of this crest is similar to that of the crest of England, and of many others: the bearing of the coat accented the helmet, and the crest the coat. The shield, which goes with this crest, is analogous to the attacks which that country was so often obliged to repel, before its happy union with England.

Fig. 20. The crest of Ireland; on a wreath, a caffle triply turreted or, out of the gate thereof a hart springing argent. The origin of this crest is not properly ascertained; and we shall forbear hearing any conjecture upon it. The colours with which it is blazoned here, are according to the order in council above mentioned; but it is often found thus: out of a caffle triply turreted a hart lodged argent armed or.

Fig. 21. The badge of Wales. On a mount vert, a dragon passant, wings elevated gules. This is said to be the bearing of Cadwallader. Henry VII. adopted it as belonging to the house of Tudor.

Fig. 22. The badge of the baronets of England and Ireland, described before. Fig. 23. The badge of the baronets of Nova Scotia, as before explained. Fig. 24. The arms of the College of Arms, or Heralds' College; see page 404. Fig. 25. The arms of Garter principal porter of the arms of Clarenceux. Fig. 26. The arms of Clarenceux. Fig. 27. The arms of Norroy. See page 404.

Fig. 28. The union badge, in the centre of the collar of SS, see page 404. Much has been affected upon the signification of the SS, of which this collar is composed. A curious manuscript note in Latin, in one of the books composing the library of the College of Arms, derives it from Scutius Sulcius; but we are still inclined to think that the reduplication of the letter S, means nothing more than Scutifor, a shield-bearer; and that this collar of honour was anciently given to esquires by the knights, whose buckler they were accustomed to hold, while they were preparing for the combat.

HERALDRY PLATE X.

The science of heraldry is not confined to the knowledge of our own times: her extensive view comprehends also the past, when at the same moment, the takes down records, and prepares documents for ages yet unborn. Improved with this idea, and unabashed by the late temporary changes that have taken place in the world, we shall present our readers with the arms and crowns of the principal potentates of Europe.

Fig. 1. The arms of the emperor of Germany, are blazoned as follows: Or, an eagle displayed sable, beaked and armed gules, holding in his right claw a sword and sceptre or, in his left a mound, and on his breast a small inescutcheon. Above the eagle is an imperial crown surmounted with a mound banded, whereon is a cross enriched with pearls. These arms are extremely splendid, and are in general surrounded by eleven small shields, each of them ensigned with a crown, viz. 1. On the dexter, barry of eight argent and gules for Hungary. 2. On the left, gules a patriarchal cross argent, all proper. 3. On the right, gules a lion double-queued argent, crowned or, for Bohemia. 4. Three leopards heads crowned, or, for Dalmatia. 5. Chequy argent and gules, for Croatia. 6. Or, a dexter arm habited, gules, holding a fceptrum proper, for Schlavonia. 7. Gules, a bend argent, for Austria. 8. Bendy of six or, and azure, within bordure, gules, for ancient Burgundy. 9. Vert, a bull argent, enflamed at the mouth, nozfrils, and ears, proper, for Styria. 10. Argent, an eagle azure crowned ermine, on the breast a crescent chequy, argent and gules, for Carniola. 11. Argent, an eagle displayed, gules, crowned or, the wings charged with an annulet, for Tyrol. Supporters, two griffons or.

Fig. 2. The king of France bears azure three fleurs-de-lis or, the shield timbered with an open helmet full-faced or, with mantlings or and azure, surmounted with an imperial French crown, composed of eight fleurs-de-lis, out of which as many arches, adorned with pears, rise, and meet in the centre, under a double fleur-de-lis, in chief, ganted, argent, azure, and or, which girdles the shield, and the motto: Montjoie St. Denis, and the cry of arms: Montjiy St. Denis.

The arms of Navarre are sometimes joined as an impalement with those of France; and are, Gules an escutcheon of eight rays, or rather a chain figured as a wheel, or.

Fig. 3. The arms of the Pope, confit in the following appertaining Successively to the persons who fill the chair; but the shield is generally surmounted or timbered with the tiara, surmounted with three crowns or, not unlike the marquis's coronet; the whole ensigned at top with a globe and a cross; behind the tiara two keys, the dexter or, the finifter argent, falterways, tied together. The pope ranks among the temporal powers of Europe, the arms of which are blazoned here. Sometimes instead of the family-arms of the reigning pope, the two keys falterways are introduced in the shield. The popes do not impale them, but bear them as their own arms.

Fig. 4. Arms of the republic of Venice. Azure a lion rampant, wings expanded or, holding a book opened argent, on which is inscribed, Pax tibi, Marce, evangelista meus; Peace to thee, O Mark, my evangelist." This lion is commonly called, St. Mark. Above is the cap of the doge, a pointed cap of gold brocade inflating out of a fillet of gold ornamented with jewels.

Fig. 5. Arms of the republic of Geneva. Argent a crose gules, surmounted with a royal crown for the kingdom of Corfo.

6. Arms of Spain. These are: Quarterly, 1 and 4, gules, a tower or, maisonfled, or, a tower argent, for Castille; 2 and 3, argent, a lion purpure crowned langued and armed or, for Leon. Paly of eight or and gules, for Arragon, impaling per faly, the chieft and base paly of eight or and gules; on each inch argent an eagle fable crowned or, for Sicily. Third quarter, a feignor, a lion argent for Austria. In base, bendy of six or, and azure within a bordure gules, for Burgundy. Fourth quarter, azure, feme of France within a bordure compony argent and gules, for modern Burgundy; in base sable, a lion rampant or, and langued gules, for Brabant. Over all an inescutcheon of the arms of France.
France, surrounded with the collar of the order of the golden fleece.

Fig. 7. The arms of Portugal: argent feme of fleurs-de-lis or, a label of three points gules.

Fig. 9. The armorial engravings of Poland: quarterly; and 3, gules, a cavalier armed argent, holding his right hand a sword erect proper, and on his left arm a shield azure charged with a patriarchal cross, for Lithuania. Over all an escutcheon per pale. First party per fess fable and argent, two swords erect saltireways proper, second party of eight or and fable, the fegment of a crofs flory in bend vert, for Saxony.

Fig. 10. The arms of Sweden: Quarterly; first and fourth azure, three crowns or, for Sweden; second and third argent, a lion rampart crowned or, charged on the breast a palm leaf vert, for Gotland. On an inescutcheon, quarterly: 1. Lozengy in bend argent, and azure for Bavaria. 2. Or, a lion fable, armed argent, langued azure, for Jullers. 3. Gules, an escarbuncle or, in the centre an escutcheon argent, for Cleves. 4. Argent, a lion double-queued, crowned and armed argent, langued azure, for Mons. Over all, an inescutcheon fable, a lion crowned or, armed and langued gules, for the palatinate of the Rhine. Supporters, two lions.

Fig. 11. Arms of Denmark. Gules, a crofs argent, in the first quarter or, feme of hearts gules, three lions passant gardant argent, for Denmark. 2. Gules, a lion rampant courant argent, holding a battleaxe proper, for Norway. 3. Azure, three crowns or, for Sweden. 4. Or, feme of hearts gules a lion azure, for Gothia. Over all an inescutcheon quarterly: 1. Or, two lions paflant in pale azure, for Sleswick. 2. Gules, three nettle-leaves charged with an escutcheon argent, for Holstein. 3. Gules, a swan argent ducally gorged or, for Stormarnen. 4. Gules, an armed knight argent, holding a sword proper, for Ditmarfen; and over all again, argent two bars gules for Delmenhofen, impaling azure a crofs patee or, for Jutland. Supporters, two favages crowned and wreathed around the body with ivy-leaves proper, armed with knotty clubs, also proper.

Fig. 12. The eagle of all the Kuffia bears, an eagle argent, charged with a label argent, and impaled in the dexter quarter a mullet argent; and impale them in the rote quarter a mullet argent, with an escutcheon gules, a cavalier naked argent, holding a lance, with which he pierces a dragon proper. Over the eagle are three crowns, the middle one imperial, for the empire of Kufia.

Fig. 13. The arms of Prussia. These are compose of twenty-seven quarterings, which are distinctly represented in the engraving.

Fig. 14. Arms of Sardinia. Argent, a crofs gules, between four moors' heads proper, wreathed of the field, for ancient Arragon and Sardinia. Over all an escutcheon of twelve coats, as delineated on the plate.

Fig. 15. Arms of the grand lignor of Constatineople, emperor of the Turks. Azure, an increscent argent; surmounted with a turban enriched with pearls and diamonds, under a double open crown.

Fig. 16. The arms of the seven united provinces of Holland, were, for the general effates, gules a lion rampant or, holding in the dexter paw a sword erect and nacked proper, in the sinister seven arrows also proper. For a more extensive description of these arms, see Boyer's Theatre of Honour and Nobility, Edinburgh's Complete Body of Heraldry, Les Soverains du Monde, &c.

in the several treatises above mentioned, is owing to the manner in which the sovereigns to which the arms belong chose successively to alter them, according to circumstances of time and place.

**Of Marshalling or Quartering Arms.**

Marshalling coat-armour consists in the arrangement of armorial ensigns. First, to show the rank and condition of the bearer; secondly, the connection of one family with another by marriage; and, thirdly, the representation of several families, by combining their respective bearings, in one shield, according to the priority of their accession, denominated quarterings. Women, with the exception of sovereign princesses, bear their arms in a lozenge. A maiden lady in this manner bears her paternal arms only; and a widow impales them with those of her deceased husband.

The manner of impaling arms is, by dividing the shield in half, and placing the bearings of the husband on the dexter side, and those of the lady on the sinister. We find, however, among the earliest instances of marshalling arms in this manner, that the two shields were disjuncted, and the dexter half of the husband's arms being conjointly with that of the sinister half of the wife's, the arms of their united houses thus formed a shield. This mode has been in use, in this kingdom, so early as the reign of Edward I. For it appears, in Sandford's Genealogical History, p. 133, that Margaret, daughter of Philip the Hardy king of France, upon her marriage with the English monarch, bore on her helm the arms of England so disjuncted with those of France; which is related as the first instance where a queen of England bore her paternal arms in the same shield with those of her husband. It appears also that the kings of France frequently bore the arms of Navarre impaled in this manner; which the French heralds called accolé. This method of impaling arms by disjuncted, though first introduced in France from the earliest periods, down to the moment when the infatuated spirit of revolution broke out in that unhappy country, and deftroyed every vestige of armorial honours, and the distinctions of families rendered illustrious by the patriotism of their progenitors; yet it does not appear that it was long adopted in this country. Indeed, if we look at many of the bearings of the nobility of this realm, we shall find, that disjuncting their armorial ensigns in this manner, and so materially alter them, that it would puzzle an heraldic eye to discover to what family they respectively appertain. For instance, if we disjunct the arms of the illustrious family of Vere, being quarterly gules and or, in the first quarter a mullet argent; and impale them in the second quarter the arms already displayed, with those of Say, being quarterly or and gules, it would form a shield divided per fess gules and or, in the dexter chief point a mullet argent, and thus appear a single coat. Impalings of a similar nature would frequently occur, so as to confound the observer, and thus prevent the original intention of armorial insignia, namely, to show at once the family and the condition of the bearer, as well as the tenure of his possession. The English heralds have therefore very properly discontinued this custom of impaling arms by disjuncted, showing a matrimonial connection. Another mode has been pointed out by some heraldic writers, which is, by disjuncting the arms of the husband, and impaling the dexter half with the entire coat of the wife; we do not find, however, any instance where this rule has been followed in England; if, therefore, it ever existed, it is now entirely obsolete.

It is proper to remark that, according to the present mode of impaling arms, the entire bearings of the husband and wife are conjoint, except in such cases where either or both of the coats are surrounded with bordures; in the event of which, the bordure goes no farther than around the edge of the shield, if the bordered coat is impaled. See Plate XI. Thus it sometimes
times happens that part of the bearings are omitted, which would be the case in impaling the coat of Wickeham of the county of Oxford, which is a borne baron gules charged with eight mullets or.

Impaled arms are also borne by ecclesiastical as well as by civil officers, such as archbishops, bishops, kings of arms. The same principle of marshalling is here observed, with the exception, however, that the arms annexed to the office, both ecclesiastical and civil, are placed on the dexter side of the shield; thus precluding the possibility of showing the armorial ensigns of the wife of the bishop or officer in the same shield with those appertaining to his office. An additional shield is placed on the sinister side of the first, showing the arms of the wife impaled with those of her husband.

Another method of showing a connection between two families by marriage, which has been adopted in England from an early period, is by placing the armorial ensigns of the lady on an escutcheon of pretence, over the arms of her husband; which shows, at once, that she is either the representative or coheir of her father, and thus transmitting the armorial ensigns to her posterity.

We frequently find in the achievements of the ancient nobility of this realm, particularly from the time of Edward III. to the reign of Henry VII., the arms of the lady quartered with those of her husband; but in such cases, only, where the ladies inherited honours by which their husbands were designated; for example, we find that Richard Nevill (eldest son by the second sister of Ralph the first earl of Westmorland), afterwards earl of Salisbury and knight of the most noble order of the garter, upon his marriage with Alice, the daughter and heir of Montecute earl of Salisbury, placed the arms of his lady quarterly in the first quarter with his own, which bearings were so continued by his second son John, afterwards earl of Northumberland, and marquis of Montecute, K.G. although he married the daughter and heir of Sir Edmund Englethorpe, knight, whose arms, according to Ashdown, he bore on an escutcheon of pretence over those above-mentioned. But the eldest son of the said earl, Richard, the great earl of Warwick, so renowned for his valour, following the principle of his father, bore on his shield the arms of the earldom of Warwick, incorporated with his paternal arms. The foregoing examples of quartering the arms of either the wife or the first quarter, will be sufficient to show that this mode was not adopted so much to show the matrimonial connection of the bearers as the inheritance of honours by which they were designated, or which became vested in the family; and therefore were borne in this way as feudal coats, as if the persons so bearing them were entitled thereto by right of blood. At a former period, viz. in the time of Henry V., we find that Hugh Stafford, K.G., lord Bourchier, bare quarterly, the arms of the Bourchiers: he died without issue, leaving his widow, who remarried to Sir Lewis Robeart, K.G., who became lord Bourchier; and not only quartered the arms of his lady's family, but also took the crest, as appears by his garter plate; to evince his descent, by this conspicuous and well-known decoration, that he held the barony of Bourchier.

Quartering arms, to show the representation of several families, appears to have been adopted so early as the time of Edward III. and we are told that John Haftings, second earl of Pembroke, who died in the 45th year of that reign, was the first subject in England who quartered arms. He bore quarterly, first and fourth of a manche gules for Haftings; second and third, barry of ten argent and azure, on erle of many martlets gules, for Valence; the latter in right of his great grandmother Isabel, who was sister and co-heir of Aymer de Valence earl of Pembroke, and in whose right he obtained that earldom.

The art of quartering arms is undoubtedly an admirable means of showing, at one view, the representation of several different families; we cannot, therefore, be surprised to find that it was reforted to at so early a period as the fourteenth century, when armorial insignia were held in such high repute; and a nobleman, proud of the honours of his ancestors, could adopt no means to recall to the mind of a beholder the whole line of his renowned progenitors more strikingly, than by placing their respective arms on his own shying buckle.

The annexed table, or genealogical scheme, depicted on Plate XI. will show the manner of marshallng quarterings, according to the principle classically adopted. John lord Haftings of Abergavenny, (the grandfather of John lord Haftings of Pembroke above-mentioned,) who died in the 16th year of the reign of Edward II. is there exhibited as the inheritor of ten quarterings, viz. six paternally, and four by the inheritance of his mother. The acquisition of these quarterings is also shown in the shields of the respective marriages.

"The manner of placing the several coats in the shield of the representative of the respective families must be next explained. — First, we take the paternal coat of Haftings. — We next take the arms of the first marriage, in that line, which we find to be with Ada, daughter and heir of David earl of Huntingdon, which not only entitles the son of Henry lord Haftings, the first of that family mentioned in the table, to the arms of his father, but also to those of his maternal grandmother Maud, daughter and at length co-heir of Hugh Keviolic earl of Chefter. Thus, having found the arms acquired by the first marriage of Haftings, we pass to the second, which appears to be with Joan, daughter and at length co-heir of William de Brusefe, and co-heir of William de Brusefe, is entitled to the arms of Brusefe; and by her maternal grandmother, being co-heir to William Marshall earl of Pembroke, gives her a right to bear his arms. — In this manner John lord Haftings, who died 6 Edw. II. became the representative, first of Huntingdon; second of Keviolic, third of Brusefe, fourth of the earldom of Pembroke, and fifth Marshall; and as such, becomes entitled to bear their respective arms quartered with his own accordingly.

We next ascertain what arms John, the last lord Haftings mentioned in the table, is entitled in virtue of his becoming the representative of his mother Isabel de Valence, daughter, and at length heir, of William earl of Pembroke. — By the rule above pointed out, we first take the arms of the first heiress, in the male line of Valence, which we find to be Isabel, daughter and heir of Aymer count of Angoulefme. — The second heiress is Jane, daughter, and at length heir, of Warren de Monchency, who, in right of her mother Joan, daughter and co-heir of William earl of Pembroke, is also entitled to the bearing in which she is heir expedient of him; and not only to those by descent from the mother conveyed to her posterity by her heirship, but also to those of her co-heir by entail. — On the death of this heiress, her daughter, Alice, is entitled to bear the arms of her mother, Eva, daughter and co-heir of William de Brusefe, is entitled to the arms of Brusefe; and by her maternal grandmother, being co-heir to William Marshal earl of Pembroke, gives her a right to bear his arms. — In this manner the arms of John, the last lord Haftings mentioned in the table, are entitled to all the quarterings mentioned in the table, is entitled, first to all the quarterings which his father inherited, and secondly to all those by descent from the mother conveyed to her posterity by her heirship; making together a shield of ten quarterings, as before observed. In this manner an innumerable number of quarterings may be acquired; all of which of right belong to the sons and daughters respectively of the person entitled thereto; but which cannot be allowed, unless he has vested in him the heirship of the several families through which they are derived.

A man marrying an heiress or a co-heiress, as before observed, (after the decease of his father) bears his paternal arms, with the quarterings belonging thereto, in an escutcheon of pretence, over his own. — A man cannot, according to the rules of heraldry, so place the arms of his wife during his lifetime, as to make them entitle him to the heirship of her family through his own right.

At a former period, viz. in the time of Henry V., we find that Hugh Stafford, K.G., lord Bourchier, bare quarterly, the arms of the Bourchiers; he died without issue, leaving his widow, who remarried to Sir Lewis Robeart, K.G., who became lord Bourchier; and not only quartered the arms of his lady's family, but also took the crest, as appears by his garter plate; to evince his descent, by this conspicuous and well-known decoration, that he held the barony of Bourchier.

Quartering arms, to show the representation of several families, appears to have been adopted so early as the time of Edward III. and we are told that John Haftings, second earl of Pembroke, who died in the 45th year of that reign, was the first subject in England who quartered arms. He bore quarterly, first and fourth of a manche gules for Haftings, second and third, barry of ten argent and azure, on erle of as many martlets gules, for Valence; the latter in right of his great grandmother Isabel, who was sister and co-heir of Aymer de Valence earl of Pembroke, and in whose right he obtained that earldom.

The art of quartering arms is undoubtedly an admirable means of showing, at one view, the representation of several different families; we cannot, therefore, be surprised to find that it was reforted to at so early a period as the fourteenth century, when armorial insignia were held in such high repute; and a nobleman, proud of the honours of his ancestors, could adopt no means to recall to the mind of a beholder the whole line of his renowned progenitors more strikingly, than by placing their respective arms on his own shying buckle.

HERALDRY.

is heir to her mother, without being so to her father; who, marrying a second wife, has male issue, which becomes the representative of the paternal arms. In order, therefore, for considerations for the lady, what she is unquestionably entitled to, namely, the inheritance of her mother, the heralds have adopted a method which shows at once the representation, namely by placing the arms of her mother in a canton on her maternal coat, and thus enabling her to quarter the arms to which her late mother was entitled.

We have adopted, in the engraved table, the effocation of pretense, instead of the impalement, for a better elucidation of the principles of marshallmg the arms of heiresses, although we are well aware that this mode was not in use at the period when the representative of the families mentioned in the table existed.

OF FLAGS AND COLOURS.

Since the age of the Phoenicians, the first people who ventured out to distant seas, all nations have adopted some peculiar marks to distinguish their vessels from others, whenever the allurements of trade or the fiery war called them out of their havens to foreign shores. We read in one of the most enthusiastic pages of the sublime prophecies of Ezekiel, chap. xxxv. v. 7; the following words addressed to the city of Tyre, described under the allegory of a ship: ‘Hyacinthus et purpura et infilis Etiah facela jactum experimentum tuum; ‘Your pavilion has been made of hyacinth and purple from the island of Eliphafim,’ from which it is allowable to infer, that the national colours of the trading city of Tyre, the emporium of the world at that time, were blue and scarlet; (see Purpura, p. 427.) since the word experimentum may be translated by pavilion, which the French use to this day to signify a naval flag; for they say common, le pavillon angles, Espagnol, Francois &c. having no other way to express itself, as many of our national civil and martial emblems. Ancient ships had no conveniences under deck, and therefore a large pavilion or tent was erected on the stern, the colour of which was likely to distinguish the sea-faring nations. Fencion, who had studied the manners and habits of the ancients with so much attention and success, that his immortal Telemachus might fairly pass for a genuine translation of a Greek poem, makes his hero escape the enemy by imitating the colour of the ribbons and other characteristic ornaments suspended to the masts of their ships. Phily tells us that the stern and prow of trading vessels and men-of-war were without exception decorated with colours, and at Athens, Corinth, and elsewhere, the erection of ships, painters having the famous schools of painting in those cities. We read in the journals of circumnavigator, that even the barbarous tribes who inhabit the islands of the Pacific Ocean and South Sea, as well as the savages of America, all make use of some appropriate means to be easily recognized wherever they navigate their rude and clumsy canoes at some distance from their native creeks. Woven reeds were used for sails, and rules for stearmers, hence the common word flag for both the water-plant and the naval colours; as the word bark for the wind of a tree, and the small ship originally made out of it.

Although naval flags do not come immediately under the cognizance of heraldry, yet it must be allowed that they are intimately connected with the science, since several of them exhibit the respective armorial enigmas of the nations they belong to, whilst others have a bearing of their own. We shall content ourselves with selecting a few instances, which we trust will be acceptable to our readers. See also the article Signal.

The following have been described under the same heading in the table: Gules, a fess argent charged with a demi-eagle with two heads crowned or. See Heraldry, Plate X. fig. 18.

The flag of Algiers is azure a fess argent charged with a bar vert. See Heraldry, Plate X. fig. 22.

The flag of Malta is white ensigned with a crescent argent, the form of which is so peculiar to the order of knighthood of that name, that it has retained the denomination of the Malta-crescent. See Plate X. fig. 19.

The colours of Leghorn are on a flag argent a crescent or. See Plate X. fig. 24.

The flag of Hamburg is charged with three towers argent. See Plate X. fig. 25.

The colours of Persia are, or three decrecents argent. See Plate X. fig. 36.

It must be observed that many of these bearings are not consistent with the strict rules of heraldry.

FUNERAL ACHIEVEMENTS.

Heraldry, as clearly appears by the foregoing pages, seems to be the constant and faithful companion of man through the different periods of his life. At his birth, the others him into the world by the real and appropriate name, the father in his youth, the amulets and instructions his mind by the display of her scientific rules and significant ennumeraisons; when of age, he teaches him how to erect and decorate his family mansion, what shields of arms should swell in bold relief to the portals of his castle, or adorn in historical array the frigate and cornices of his halls. He properly enrolls transfers the splendid honours of his parent to the pannels of his carriage; enlivens with her sevenfold tinctures the livery of his attendants, and embroiders his mantle with hereditary armories, which characterize and honourably distinguish him through public and private life. Heraldry has directed him in what family to seek for his lovely comfort, the fair partner of every social enjoyment; the pedigree of his ancestors is again unfolded to his view, and heraldry, with unerring hand, points out the names which courteously or family distinctions have selected for his children. If the sound of the trumpet calls him from these domestic comforts, to nobler employments in defence of his country, the genius of heraldry rendering the sides of his trysty buckler, which she has so curiously wrought with the achievements of his ancestors, that we may say of him, as Virgil does of his hero in a different view, ‘Avorum attollens humero familiaque et fata formam.’ So also, when his earthly career is run, and the tomb of his ancestors opens its sacred valves to receive the remains of one whofe life was gloriously spent in the service of his country; who so highly merited the affection of his relations, and the regard of his friends; heraldry is still at hand, endearing to conne the mourners for the loss they sustained by amusing the eye with armorial pageantry, calculated to animate and rouse the drooping heart from grief. The family banners that proudly float around the hero, of that wave in solemn procession through the streets, amid the admiring crowd; the stately vehicle, and the family escutcheons, the trappings of the horses, and the numerous shields which ornament the gothic pile where the body is to be deposited; in one word, the whole of the funeral pomp is embellished by the hands of heraldry; which, to detract as much as possible the combined efforts of time and of death, officially configures his name to her sacred records, as the last tribute she can pay to the memory of her departed friend.
The Romans, at their funeral solemnities, always
fond of pomp and magnificence, had the images of their
ancestors carried in procession to the tomb; on which occasion
the splendid trophies of the deceased were fupended, as
a laffing monument of his bravery and of his virtues.
This pageantry was attended with great care, conducted
with appropriate decency, and recorded by the classical
historians; and family connection was so much respected,
that it would have been extremely incongruous to have
introduced a single image which was not entitied by
consanguinity to a place among them. We read in
Tacitus, that twenty images were carried at the funeral of
Manlius; and as many at the obsequies of Quintus.
Speaking of the funeral of Drusus, the same author
says: "It was pleasant to behold the statue of Æneas
next to the Sabinian effigies; and the noble images of
the Claudian family, all marching in a well-regulated
ceremony." Horace, who, in the midst of his mirth,
and in his mirth, never lost sight of the solemn
rites due to the obsequies of departed man, alludes to
the Cludian family, all marching in a well-regulated
funerary celebration. See Plate XII. fig. 2.

A hatchment is a square piece of cloth, framed, and
hung between the outer edge of the armorial bearings, whereby may be known what
rank the deceased person held when living; the whole
distinguished in such a manner as to enable the beholder
to decide whether he was a bachelor, a married man,
or a widower: with the like distinctions for a woman.
The hatchment, thus enclosed, is painted by one
corner of the square, so that the diagonal line becomes
perpendicular, as exhibited in the Heraldry Plate XII.
fig. 3, and which represents the whole of the hatchment
of the immortal Horatio lord Nelson, knight of the order
of the Bath. Here it must be observed, that the Ladies
of knights, whose shields are surrounded by the ribbon
of the order, cannot have their arms impaled in the same
manner as their husbands. See figs. 12 and 13.

A biarch bears his arms sable, his wife's arms
argent, his own name argent, and a banner of ermine.

When a woman dies, the hatchment is painted black, as shown in the Engravings at
fig. 4 and 5, and also fig. 6 and 7. There is here
an hereditary distinction settled to show on
a carriage or effcutcheon, that a man is a widower;
though such a distinction would be of obvious utility.
When a widow dies, the whole ground of the hatchment
is painted black, as shown in the Engraving at
fig. 6 and 7. But if there be a widow, and she has a husband, his hatchment is to be
covered with black on the ground, as far as his coat of arms extends. See fig. 10.
But if there are two widows before him, he may for the
sake of them put the hatchment with the ground beneath his wives bearings painted black, the part under his
own remaining white. See fig. 11.

A bishop or a prelate impaling on the right the arms
of an office, ought to exhibit his arms and those of his
wife in two shields, in the manner exemplified in figs. 12
and 13; and, if his wife dies before him, the sinister
part of the hatchment is to be painted black, as far as
her arms extend, about a third part of the ground, as
shown at fig. 12. But if the husband dies first, the part
of the hatchment under his coat is then to take the
mourning hue. If the husband dies a widower, his
coat of arms extends on the ground, the rest being left white, because the arms of the see, or of the
cloth, cannot die.

Mottos to be placed under the arms within a scroll,
hatchments, are generally left to the choice of the
relatives of the deceased, or to the fancy of the painter,
and have been commonly more religious than heraldic;
as In calvo quiues, Mors jana vitae; Refurgam, &c.

In pompous obsequies many effcutcheons are hung
around the coffin, the herse, and on the trappings of
the horses; in some countries they are affixed to the
ornaments of the altar, and even round the whole body
of the church, on a black frizee, which the French
hers call a bretze, and the shape of them is an oblong square
of about fifteen inches, by ten or twelve. Banners also are
borne in procession to the grave, as represented at figs.
15 and 16. This custom has been of late considerably
neglected, particularly on the continent, where
the spirit of revolution, and the demon of war, have
served to level all ranks and overturn all ancient
precepts. Although we are aware, that if the mind of
the rigid philosopher considers that such a profusion of
armorial ornaments has often no other effect than to flatter
the folly of ostentation and feed our vanity, he may
whisper
whisper with the French satirist, "Ne scuroit on
pourrir ses tontes ces figons!" yet on the other hand,
when we reflect that, by a strict observance of those
ancient though apparently trifling customs, the living
bind themselves to the dead, the family ties are kept
strong and close together, and that distinction of
ranks, so necessary in a well-regulated society, carefullv
preferred in order to nurtute, under the security of
impartial laws, the national spirit of a brave and inde-
pendent nation—who is not ready either to bleff the
study and pursuits of HERALDRY, or to bewail the
neglect of a liberal science, from which so many advan-
tages have been and may be drawn in favour of man-
kind?

Such are the Elements and Rules which, from its first
rule form, gave the present polish and perfection to the
elegant science of HERALDRY; a science which has for its
object the due regulation and approbation of the arma-
mental bearings of individuals and families according to
their different degrees of rank and subordination in
society. Hence the principal of those rules which esta-
blish the various emblems or marks of dignify

By the XXIIIrd article of the Union of Scotland, which was
confirmed by rat. 5th Anne, c. 8., as noticed above,
al! peers of Scotland shall be peers of Great Britain, and
have the right after the peers of Scotland to rank next
after the lords spiritual of Great Britain, and shall enjoy the
same privileges (except those depending upon setting in the
house of lords;) and the temporal peers of Ireland shall have
rank next after the peers of the like degree in England at the
time of the union, and be considered as peers of the
united kingdom; and all peers of Ireland and of the
united kingdom, created after the union, shall have
rank according to creation; and all peers of Great
Britain and Ireland shall in all other respects be con-
dered as peers of the united kingdom; and the peers of
Ireland shall enjoy the same privileges, except those
depending upon setting in the house of lords.

ROYAL FAMILY OF THE UNITED KINGDOM OF
GREAT BRITAIN AND IRELAND, (JULY 1828.)

The pedigree of the illustrious House of Brunswick, which
happily fills the British Throne, has been traced by
lineal descent from the very ancient and noble lines
Witekind the Great, first duke of Saxony, in 827.

Pharamond duke of the Franks, ancestor of the Guelphs,
in 404; Caius Petius, a noble Roman family, in 309,
ancestor of the house of Elice; and Herman Billing,
duke of Saxony, in 956; the representative of all of
the branches of Henry the Lion, duke of Saxony and
Bavaria, in 1102; who married Maud, the daughter of
Henry II. king of England, lineally descended from Egbert,
the first king of England, in 879, according to the
following genealogy;

Egbert of the Saxons race, first king of England, crowned
A.D. 829; died in 838; was succeeded by his
son Ethelwulf, crowned in 838; died in 855; who
father Ethelbald was crowned in 877; died in 878,
and was succeeded by his three brothers, the youngest
of whom was Alfred, crowned in 899; died in 900;
whose daughter Elfrida married Baldwin II. count of
Planders, from whom descended, in a direct line, Ma-
rida of Brunswick, who married William duke of Nor-
mandy, surnamed the Conqueror. After Alfred died,
the crown descended to Edward the Elder, his son,
who was crowned in 900; died in 925; and was succeeded
by Athelstan, his eldest son, who died without issue in
990; and the crown descended to his brother Edmund,
who died in 946; whose wife Thyrta married Gorm III.
king of Denmark, from whom descended Swaine, king
of England, in 1012; who died in 1013; his son, Edu-
ard I. who was king of England in 1017; Harold, king
of England, in 1036; and Canute II. or Hardicanute,
in 1019; who died in 1037. Edmund, son of Edward
the Elder, died in 965; whose son Edgar was crowned
in 959; and dying in 975, was succeeded by Edward II.
who was murdered by his stepmother, and was succee-
ded in 973, by his half-brother Ethelred, who died in
1016; and was succeeded by his son, Edmund II. surn.
named Ironside, who dying in 1017, his son Edward was
driven into exile, where he had two children, Edward
Atheling, who died without issue, and Margaret, sole
heir to the crown of England, but which was set aude
by the conquest, married Malcolm III. king of Scot-
land, whose daughter Maud, in 1124, was married to
Henry I. son of William I. the conqueror of England,
which Henry succeeded his brother in England in 1100
and died in 1135; whose daughter Matilda was married
to Henry V. emperor of Germany; and in 1154 her son
Henry II. was crowned king of England; and dying in
1189, left two sons, and a daughter named Matilda, or
Marie, married to Henry, son of Matilda, the last lion, duke of Brunswick.

From this marriage descended the noble families of
Brunswick, Grubenbagen, Gottingen, Lunenburg, Ca-
lenburg, Wolfenbutte, Harburg, Zelle, Gifhorn, and
Datenburg.

John, second son of Henry I. was crowned in 1199;
died in 1216; and was succeeded by his son, Henry III.
who died in 1272; and was succeeded by his son Ed-
ward I. in 1272; who died in 1307; who was succeeded
by Edward II. in 1307; who died in 1327; and his son,
Edward III. succeeded him in 1327; who succeeded
Edward called the Black Prince, (from his iron or fable
armour,) died before his father in 1376. Edward III.
his son, was crowned in 1333; who was succeeded by
his grandson, John, who was deposed in 1399; and was succeeded by his uncle's
son, Henry IV. who died in 1413, whose son, Henry V.
died in 1422; and his son, Henry VI. deposed in 1461.

Edward IV. who deposed the fifth son of Ed-
ward III. mounted the throne; and died in 1483; whose
daughter, Elizabeth, married Henry VII. who de-
descended from John of Gaunt, duke of Lancaster, fourth son of
Edward III. by which marriage the two families of
York and Lancaster were again united. Henry VII.
was crowned in 1485; and dying in 1503, left three children,
a son and two daughters; the youngest daughter, Mar-
garet, married James IV. king of Scotland, who was,
in 1513, succeeded in that kingdom by his son, James V.
whose daughter Mary, was mother of James VI. of
Scotland, and the first of that name in England; whose
Armorial Bearings of King George III. and Queen Charlotte.
daughter, Elizabeth, married Frederick, king of Bohemia; by whom she had a daughter, Sophia, married to Ernæus, elector of Hanover, the representative of the House of Brunswick, Hanover, Lunenburg, Wolfenbuttel, Zelle, &c. by whom she had a son (George) who on the decease of Queen Anne, by virtue of the act of settlement, ascended the throne of Great Britain. See also ANNE, Vol. VI. 9.

The issue of George J. by his uncle's daughter (the heiress of Zelle) was George II. and Sophia-Dorothea; by whom his marriage with Frederick II. king of Prussia, was grandmother to the late king of Prussia, whose first princes was a titter to the present duke of Brunswick, by whom he had the present duchies of York, and by a former marriage three daughters; the eldest son, Frederick-William, is the present king of Prussia, born August 3, 1737; married April 24, 1739, Louisa, daughter of the late duke of Mecklenburg-Strelitz, niece to the queen of England, by whom he has issue, three sons and a daughter; and succeeded his father, November 16, 1779. Frederick-Louis Charles, the king of Prussia's next brother, born in 1733, married February 15, 1797, Frederica-Louisa-Wilhelmina, of Heffe-Cassel. George II. married Wilhelmina-Carolina, daughter of John-Frideric, margrave of Anspach, by whom, who died in 1737, he had the following issue, and died October 25, 1760, viz.

1. Prince Charles, the eldest son, October 3, 1715, late prince of Wales. 2. Anne, born October 22, 1709, and died in 1759; married March 14, 1734, William-Charles-Henry, prince of Nassau and Orange, by whom she had the present prince of Nassau and Orange, the Stadtholder; married in 1767 Frederica-Sophia-Wilhelmina; by whom she has issue two sons: William-Frederic, born August 1, 1772; and William-George-Frederic, born February 15, 1773, who died in January 1799. The eldest son married, October 1, 1791, Frederica-Sophia-Wilhelmina, sister to the late king of Prussia, and has issue. The Stadtholder's daughter, Frederica-Louisa-Wilhelmina, born November 18, 1770, married on October 14, 1790, the hereditary prince of Hesse-Wolfenbuttel. The Stadtholder's sister, Wilhelmina-Carolina, married to the prince of Nassau-Weilburg, had issue, and died in May, 1787. 3. Anna-Sophia-Eleanora, born May 30, 1711; died unmarried October 31, 1785. 4. Elizabeth-Caroline, born May 30, 1713; died unmarried December 28, 1737. 5. George-William, born November 2, 1717; died at three months old. 6. Sophia, born in 1745, died of small-pox; died April 15, 1721; died unmarried October 31, 1765. 7. Mary, born February 22, 1723; died June 14, 1731; having married the late prince of Hesse-Cassel, May 8, 1740, by whom she had issue three sons; the eldest, William, and Charles, married their cousins, two prinncesses of Denmark, children to the present king of Denmark, and have issue. Maria-Sophia-Frederica, a daughter of Charles, the second son, married July 12, 1750, to Frederic, prince royal of Denmark, and died November 27, 1754, leaving issue, a son and two daughters. 8. Louisa, born December 7, 1724, and died December 8, 1751, having married, November 30, 1743, Frederic K. V. king of Denmark, by whom she had issue, one son, and three daughters; the eldest of whom was married to the late king of Sweden, by whom she had issue, Gustavus IV. the present king of Sweden, born November 11, 1778; who married, November 3, 1797, Frederica-Dorothea-Wilhelmina, princess of Baden-Dourlach; the other two daughters married their cousins, princes of Hesse-Cassel, and have issue. Frederick-James Lewis, eldest son of George II. was born January 20, 1707; married, April 27, 1736, Augustia, daughter of Frederic II. duke of Saxe Gotha, and great aunt to the present duke; by whom, who died February 9, 1772, he had the following issue; and died, while present in London, March 18, 1751, and August 4, born July 31, 1737; married to the late duke of Brunswick-Wolfenbuttel, January 19, 1756, by whom she had issue three sons: 1. Charles-George-Augustus, married October 14, 1790, Frederica-Louisa-Wilhelmina, daughter of the late Stadtholder; 2. George-Wiliam-Christian, born June 26, 1763; 3. William-Frederic, born October 9, 1771; and three daughters; 1. Charlotte-Georgiana-Augusta, the eldest, born December 3, 1765, and married October 11, 1780; Frederick-Charles-William, having lately made king of Wirtemberg (by whom she had two sons and a daughter,) and died in 1791. The king of Wirtemberg is brother to the empress of Russia; he was born on November 7, 1754; and on May 18, 1797, married, secondly, Charlotte-Augusta-Matilda, princess royal of England. 2. Carolina-Amelia-Elizabeth, born January 20, 1707; married, April 27, 1736, Augusta, born on August 8, 1770, unmarried.

2. GEORGE-WILLIAM-FREDERIC III., our present most gracious king. 3. Edward Augustus, duke of York, born March 14, 1739; died unmarried on September 19, 1767. 4. Elizabeth-Caroline, born December 20, 1740; died September 4, 1759, unmarried. 5. William-Henry, duke of Gloucester; died August 25, 1805, leaving issue the present duke of Gloucester. 6. Henry-Frideric, duke of Cumberland, born November 7, 1735; created duke of Cumberland, &c. October 18, 1766; married, October 2, 1771, lady Anne Lut- tener, earllett's daughter; and had issue, two sons and a daughter, one of whom was a filler to the present duke of Brunswick. 7. Louisa-Anne, born March 8, 1739; died unmarried on May 13, 1758. 8. Frederic-William, born May 30, 1730; died December 29, 1763. 9. Caroline-Matilda, born after the death of her father, on July 11, 1765, and died on May 19, 1785, her royal Highness, October 1, 1766, was married to Christian VII. the present king of Denmark, and died at Zell, May 10, 1775, by whom she had issue Frederic, the present prince royal of Denmark, born January 28, 1768, who married, July 23, 1790, his cousin, Maria-Sophia-Frederica, a daughter of the prince of Hesse-Cassel, by whom he had issue two sons and a daughter; and his princes died November 27, 1794. Louisa-Augusta, the princes royal of Denmark, was born July 8, 1771; married, May 26, 1786, the prince of Holstein-Augenburg, and had issue four daughters.

Our present Most Gracious Sovereign, GEORGE III.

Was born May 24, O.S. and baptized by the names of George-William-Frederic, June 21, 1738; succeeded his father in his titles of Prince of Great Britain, Electoral Prince of Brunswick-Lunenburg, Duke of Edinburgh, Marquis of the Isle of Ely, Earl of Carrick and Eltham, Viscount Lambeeton, Baron of Renfrew and Snadon, Lord of the Isles, and Steward of Scotland; but the Duchy of Cornwall was merged in the crown. He was, therefore by letters patent, on the 20th of April 1751, created Prince of Wales; and, on the death of his royal grandfather, George II. the crown of Great Britain devolved on his Royal Highness, October 25, 1760. His majesty married on June 17, 1761, to Sophia-Charlotte, Princess of Mecklenburg-Strelitz, titter to the present and late duke; and their majesties were crowned the 22d of the same month. By his royal Confort, who was born May 19, 1744, his Majesty has the following issue:

His majesty’s armorial bearings, as last recorded in the Herald’s College of England, are thus explained: The arms are quarterly: in the first quarter gules three lions palletant guardant or, for England. The origin of this bearing has been fully explained in our introduction. Second quarter, or, a lyon rampart within a double trefure, floy and counterfloy gules, for Scotland. We have also noticed above, that this bearing was granted to the Scots kings by Charlemagne, when he entered into a league with king Achaus, anno 609. When first granted, this trefure was only borne single; but, in 1371, Robert Stuart doubled it, by renewing the same alliance with Charles V. of France, Engle; but, in 1371, Robert Stuart doubled it, by when lie entered into a league with king Achaius, anno 809. When firft’ granted, this trefure was only borne.

The third quarter is azure, a harp or, ‘tringed argent, for Ireland, it is not ascertained when this bearing was

809. When firft’ granted, this, trellure was only borne

appearance. The -harp being the device for Ireland, induced fir James Ware to imagine that this people, writers, with more plaufibility, fuppofe the device to have been chosen in honour of their bards, to whom the mofl sacred regard was universally manifested; yet there are no traces in the Trish annals of its origin. The exclusion of the French arms from the Britifh shield, (with that of over our own) the Black Prince, when he took John king of France prifoner at the battle of Poitiers; and which had been previously claimed by his renowned father Edward III. and afterwards by Henry V. in right of inheritance; see the article ENGLAND, vol. vi. p. 569, 600, 609;) has occasioned the bearing of England to be repeated in the fourth

The. election of pretence is two lions paffant guardant in pale or, for Brufin.—impaled with or, Azure of hearts proper, a lyon rampant azure, for Lunen-uburg; with grated in base gules, a horfe current argent for ancient Saxony; and over all on an iffuecutcheon gules, the crown of Charlemagne or, as arch-treafurer of the empire; the issuecutcheon crowned with the electoral bonnet and motto, Heni fuit qui mal y perfet: “Evil to him that evil thinks.”

Honi Joit qui mal y perfet: “Evil to him that evil thinks.”

CREST: on a helm fuited to the dignity, an imperial crown proper; thereon a lyon fiant guardant or, crowned with the crown of England proper. The mantlings of, doubled ermine. The supporter we have before noticed, the lion quartered, or, a lyon paffant guardant as the crest; on the sinister fide, a unicorn, argent, armed, attired, unguled, and gorgeted, with a corneet composed of croffes patee and fleurs-de-lis; (so that here, as well as in the crown above, the fymbof of our conquest of France is retained;) fixed to the coronet a chain, paffing between his fore legs, and reflected over his back, or; both standing on a compartment, from whence issue, both on the dexter and sinister fides, a rofe entwined, both with the thistle, and shamrock flalked and leaved proper, for the union with Scotland and Ire-land: motto, Dieu et mon Droit: “God and my Right.” See Heraldry Plate XII.

Underneath the Royal Arms of England, in the fame manner given the armorial bearings of her pre-ent majefty Queen Charlotte, impalied with that of her royal conrort, as described above. The arms of her majefy are as follow: In a shield of six coats, the first or, a bufaloe’s head couped argent, crowned or, for the principality of Ratze-burg, which was also formerly a bifhopric. 2. Gules, an arm argent,iffering out of a cloud from the finner fide of the shield, and holding in its fingers a ring or, for the county of Schwering, which the duke Albrecht brought to the house of Mecklenburg, and over all, a bufaloe’s head, fawed, fable crowned gules, attired argent, for the lordship of Rolflock; and over all an issuecutcheon, gules and or, for the lordship of Stargard.

It may be proper to obferve of her majefy’s arms, that ladies bear neither motto, nor crest, nor mantling.

PRINCES OF THE BLOOD ROYAL.

GEORGE-AUGUSTUS-FREDERIC, PRINCE OF GREAT BRITAIN, PRINCE OF WALES, Electoral Prince of Brunsuic-Lunenburg, Duke of Cornwall and Rothebay, Earl of Chester and Carrick, Baron de Renfrew, Lord of the Isles, Hereditary Great Steward of Scotland, a Colonel in the Army, and Colonel of the 40th Regiment of Light Dragoons, Captain-General of the Artillery Company, High Steward of Plymouth, Knight of the Garter, and F. K. S. Born Auguft 12, 1762: and, on the 17th of the fame month, his Majesty ordered letters patent for creating him Prince of Wales and Earl of Chester; and in November 1783, his Royal Highness took his seat in the Black Cap. He was born July 25, 1772. Married April 8, 1795, Caroline-Amelia-Elizabeth, second daughter of the late duke of Brunsuic, born May 17, 1768, by whom he has a daughter, Charlotte-Caroline-Augufta, born Jan. 7, 1796.

His majefty’s armorial bearings, as last recorded in the Herald’s College of England, are thus explained: The arms are quarterly: in the first quarter gules three lions palletant guardant or, for England. The origin of this bearing has been fully explained in our introduc-
HERALDRY.

Duke of Kent. H.G. & K.P.

Duke of Cumberland. H.G.

Duke of Sussex. H.G.

Duke of Cambridge. H.G.

Duke of Gloucester. H.G.
Prince of the Blood Royal.

London: Published as the Act directs Augt 13th 1787 by J. Seller.
NY in Great Britain, and Earl of Ulster in Ireland, Bishop of Osnaburg, Knight of the Garter and Bath, LL. D. F. R. S. and a Field-Marshall, Commander in Chief of all the King's Land Forces in the United Kingdom, Colonel of the first Regiment of Foot Guards, Colonel in Chief of the sixteenth (or Royal American) Regiment of the Royal Dublin Infantry; Ranger of St. James's and Hyde Parks, and Warden and Keeper of the New Forest, Hampshire; born Aug. 16, 1763; created as above Nov. 27, 1784; married, Sept. 29, 1791, to Frederica-Charlotte-Ulrica-Catharina, Princess Royal of Prussia, born May 7, 1777, eldest daughter of the late King of Prussia, by his first marriage, and natural daughter of the Prince of Prussia of Brunswick-Wolfenbuttel, inher to the late duke.

The armorial bearings of his Royal Highness the Duke of York are the same as those borne by the Prince of Wales, except that the inescutcheon is argent, charged with a wheel of six spikes gules, for the bishopric of Osnaburg. Over all a label of three points, the middle one charged with a cross gules. See Plate VIII. a. The shield is encompassed with the order of the Garter, and affixed beneath that of the Bath, with its jewel appendant.

Crest: on a coronet of crowns patee and fleurs-des-lys, the lion of England, crowned with the like coronet, and charged with a label, as in the arms. This crest is placed on a helmet of suitable dignity with a mantling or, and argent, and surmounted on a coronet of crowns patee and fleurs-des-lys, encompassing a crimson velvet turnip murrene, and fixed on the shield. Supporters the as those borne by the Prince of Wales, only charged with labels as in the arms. See Heraldry Plate XIV.

Residences.—Oatlands Park, Surrey.—Town-house, Stable Yard, St. James's.

The armorial bearings of his Royal Highness the Duke of Clarence, are the same as those borne by the Duke of York, excepting that the inescutcheon is argent, charged with a wheel of six spikes gules, for the bishopric of Osnaburg. His field distinction is a label argent of three points, the middle one charged with a St. George's cross, gules, and the two exterior ones, each charged with a label, as in the arms. See Heraldry Plate VIII. c. The shield is encompassed with the order of the Garter, and round that is displayed the collar of the order of the Garter, with its jewel appendant. The crest, coronet, mantling, and supporters, are precisely as those borne by the Duke of York, distinguished only by labels similar to that which is borne upon the shield. See Heraldry Plate XIV.

Residence.—Bushy Park, Middlesex.

Prince Edward, Duke of Kent and Strathearn in Great Britain, Earl of Dublin in Ireland, Knight of the Garter charged with a label, as in the arms. Governor of Gibraltar, Colonel of the first Regiment of Foot, Keeper of Hampton Court Park; born Nov. 2, 1767; created as above, Apr. 23, 1799.

The armorial bearings of his Royal Highness the Duke of Kent, are the same as those borne by the Duke of Clarence, except only in the distinction of the label, which replaces St. George's cross on the centre point, but bears a fleur-de-lys on each of the external points, as his majesty's fourth son. See Plate VIII. d. As Knight both of the Garter and St. Patrick, the shield is ensigned with the Garter, and round that with the collar of St. Patrick; appended to which is the badge or jewel. The supporters, crest, coronet, and others are borne as those borne by the Duke of Clarence, distinguished by the proper label, charged the same as that on the shield. See the Heraldry Plate XV.

Residences.—Kensington Palace, and Castle-hill Lodge, Middlesex.

The armorial bearings of his Royal Highness the Duke of Cumberland, his Majesty's fifth son, are the same as those of his royal brother the Duke of Kent, differentiated only by the label, which is ensigned on the central point with a fleur-de-lys, and a St. George's cross on the two exterior points; (see Plate VIII. c. As Knight of the Garter, he bears the insignia round the shield, the crest, coronet, supporters, &c. the same as those borne by the Duke of Kent, only differentiated with the proper label, as on the arms. See Heraldry Plate XV.

Residences.—Kew Green, Middlesex.—Town-house, Cleveland Row.

Prince Augustus-Frederic, Duke of Sussex, Earl of Inverness in North Britain, Baron of Arlack in Ireland, Knight of the Garter; born Jan. 27, 1773; created as above, Nov. 7, 1801.

The armorial bearings of his Royal Highness the Duke of Sussex, his Majesty's sixth son, are the same as those of the Duke of Cumberland, distinguished only by the label which passes over the shield, the central point of which is ensigned with a double heart, gules, and the two exterior ones with a St. George's cross. See Plate VIII. f. As Knight of the most noble order of the Garter, he bears the insignia round the shield. The crest, coronet, supporters, &c. are the same as those borne by the Duke of Cumberland, differentiated only by the proper labels. See the Heraldry Plate XV.

Residence.—Pall Mall.

Prince Adolphus-Frederic, Duke of Cambridge, Earl of Tipperary in Ireland, and Baron of Culloden in North Britain; born Feb. 24, 1774, Knight of the Garter, and a Field Marshal, Commander in Chief of the British forces, Governor of Gibraltar, and Commander-in-Chief of the Royal regiment of Foot Guards. Created as above, Nov. 27, 1801.

The armorial bearings of his Royal Highness the Duke of Cambridge, his Majesty's seventh son, are the same as those of his royal brother last described, differentiated by a label ensigned with a St. George's cross gules, on the central point, and with a double heart on the dexter and sinister points. See description of Plate VIII. g. As Knight of the Garter, he bears the insignia ensigning his shield. The crest, coronet, supporters, &c. are the same as those borne by the Duke of Sussex, but differentiated by the label described above. See Heraldry Plate XV.

Residence.—St. James's, and Kensington.

His Royal Highness's father, Prince William-Henry, Duke of Gloucester, third son of his Royal Highness Frederic Louis Prince of Wales, and brother to his Majesty, was born Nov. 25, 1743, and by patent Nov. 24, 1764, created Duke of Gloucester and Edinburgh in Great Britain, Earl of Connaught, and Baron of Culloden in North Britain; born Feb. 24, 1774, Knight of the Garter, and a Field Marshal, Commander in Chief of the British forces, Governor of Gibraltar, and Commander-in-Chief of the Royal regiment of Foot Guards. Created as above, Nov. 27, 1801.

The armorial bearings of his Royal Highness the Duke of Gloucester, his Majesty's eighth son, are the same as those borne by the Duke of Cambridge, only distinguished by the label, which passes over the shield, the central point of which is ensigned with a double heart, gules, and the two exterior ones with a St. George's cross. See Plate VIII. h. As Knight of the Garter, he bears the insignia ensigning the shield. The crest, coronet, supporters, &c. are the same as those borne by the Duke of Sussex, but differentiated by the label described above. See Heraldry Plate XV.

Residence.—St. James's, and Kensington.

The armorial bearings of his Highness the Duke of Gloucester, are the same as those of his royal cousin the Duke of Cambridge, differentiated only by the distinction of a second house, a label throughout the arms of five points argent, the middle point charged with a fleur-de-lis azure, the other four with a St. George's cross each, gules. See description of Plate VIII.

As Knight of the Garter, he bears the insignia and coronet, and upon each of the supporters. See the Heraldry Plate XV, but the coronet is composed of strawberry leaves and croiss pattée. See page 446, and Plate IX, fig. 6.

PRINCESSES OF THE BLOOD ROYAL.

CHARLOTTA AUGUSTA MATILDA, Princess Royal of England, Duchess of Wurttemberg, Lady of the Ruffian Imperial Order of St. Catharine, born Sept. 29, 1756; married May 18, 1779, to Frederic-Charles-William, Duke of Wurttemberg, brother to the empress of Russia, and widower of the eldest daughter of the late Duke of Brunswick, by Augusta, his present Majesty George III's sister.

The armorial bearings of the Princess Royal of England are impaled with those of her confort, the Duke of Wurttemberg, which are thus blazoned: A shield of six quarterings. 1. Bendy lozengy or and sable, for the Duchy of Teck. 2. Azure, a banner of the empire, in bend or, charged with an eagle displayed sable, to denote the dignity of Standard-bearer of the empire of Russia. 3. Gules, two trouts endorsed in pale or, for the county of Mont Belliard. 4. Azure, a bend embattled, counter-embattled, argent. 5. quarterly, 1 and 4, per fess, indented gules and argent. 2 and 3, gules five trees, argent. 6. Per fess or and gules, in chief a sun's head couped with the darts of Cort, his cap of state carved argent; and over all an inescutcheon argent, charged with three flag's horns in fess fable, for Wurttemberg; impaling the arms of the Princess Royal, which are similar to those above described, with the distinction of a label of three points charged with a rofe gules on the exterior points. See description of Plate VIII. 4. Supporters, two eagles regardeant proper. See Plate XVI.

These arms are here inferred as they were borne by the Duke of Wurttemberg before the changes and alterations which took place in Germany under the influence of the ruler of the French nation.

Princess AUGUSTA-SOPHIA, their Majesties' second daughter, born Nov. 8, 1758. By the laws of heraldry, which direct that unmarried ladies shall bear their coats armorial on a lozenge, and without motto, mantling, or crest, the princess Augusta Sophia bears the Arms of the United Kingdom of Great Britain and Ireland, in right of her illustrious father, in a lozenge, distinguished fromthose of her royal sisters by a label of three points argent, ensigned on the middle point with a rofe gules between two ermine spots fable on the exterior points. See description of Plate VIII. 1. Plate XVI.

PRINCESSES of the BLOOD ROYAL.

CHARLOTTA AUGUSTA MATILDA, Princess Royal of England, Duchess of Wurttemberg, Lady of the Russian Imperial Order of St. Catharine, born Sept. 29, 1756; married May 18, 1779, to Frederic-Charles-William, Duke of Wurttemberg, brother to the empress of Russia, and widower of the eldest daughter of the late Duke of Brunswick, by Augusta, his present Majesty George III's sister.

The armorial bearings of the Princess Royal of England are impaled with those of her consort, the Duke of Wurttemberg, which are thus blazoned: A shield of six quarterings. 1. Bendy lozengy or and sable, for the Duchy of Teck. 2. Azure, a banner of the empire, in bend or, charged with an eagle displayed sable, to denote the dignity of Standard-bearer of the empire of Russia. 3. Gules, two trouts endorsed in pale or, for the county of Mont Belliard. 4. Azure, a bend embattled, counter-embattled, argent. 5. quarterly, 1 and 4, per fess, indented gules and argent. 2 and 3, gules five trees, argent. 6. Per fess or and gules, in chief a sun's head couped with the darts of Cort, his cap of state carved argent; and over all an inescutcheon argent, charged with three flag's horns in fess fable, for Wurttemberg; impaling the arms of the Princess Royal, which are similar to those above described, with the distinction of a label of three points charged with a rose gules on the exterior points. See description of Plate VIII. 4. Supporters, two eagles regardeant proper. See Plate XVI.

The armorial bearings of his Highness the Duke of Gloucester, are the same as those of his royal cousin the Duke of Cambridge, differentiated only by the distinction of a second house, a label throughout the arms of five points argent, the middle point charged with a fleur-de-lis azure, the other four with a St. George's cross each, gules. See description of Plate VIII.

As Knight of the Garter, he bears the insignia and coronet, and upon each of the supporters. See the Heraldry Plate XV, but the coronet is composed of strawberry leaves and croiss pattée. See page 446, and Plate IX, fig. 6.

PRINCESSES OF THE BLOOD ROYAL.

CHARLOTTA AUGUSTA MATILDA, Princess Royal of England, Duchess of Wurttemberg, Lady of the Russian Imperial Order of St. Catharine, born Sept. 29, 1756; married May 18, 1779, to Frederic-Charles-William, Duke of Wurttemberg, brother to the empress of Russia, and widower of the eldest daughter of the late Duke of Brunswick, by Augusta, his present Majesty George III's sister.

The armorial bearings of the Princess Royal of England are impaled with those of her consort, the Duke of Wurttemberg, which are thus blazoned: A shield of six quarterings. 1. Bendy lozengy or and sable, for the Duchy of Teck. 2. Azure, a banner of the empire, in bend or, charged with an eagle displayed sable, to denote the dignity of Standard-bearer of the empire of Russia. 3. Gules, two trouts endorsed in pale or, for the county of Mont Belliard. 4. Azure, a bend embattled, counter-embattled, argent. 5. quarterly, 1 and 4, per fess, indented gules and argent. 2 and 3, gules five trees, argent. 6. Per fess or and gules, in chief a sun's head couped with the darts of Cort, his cap of state carved argent; and over all an inescutcheon argent, charged with three flag's horns in fess sable, for Wurttemberg; impaling the arms of the Princess Royal, which are similar to those above described, with the distinction of a label of three points charged with a rose gules on the exterior points. See description of Plate VIII. 4. Supporters, two eagles regardeant proper. See Plate XVI.

These arms are here inferred as they were borne by the Duke of Wurttemberg before the changes and alterations which took place in Germany under the influence of the ruler of the French nation.

Princess AUGUSTA-SOPHIA, their Majesties' second daughter, born Nov. 8, 1758. By the laws of heraldry, which direct that unmarried ladies shall bear their coats armorial on a lozenge, and without motto, mantling, or crest, the princess Augusta Sophia bears the Arms of the United Kingdom of Great Britain and Ireland, in right of her illustrious father, in a lozenge, distinguished from those of her royal sisters by a label of three points argent, ensigned on the middle point with a rose gules between two ermine spots sable on the exterior points. See description of Plate VIII. 1. Plate XVI.

ENGLISH DUDES.

HOWARD, DUKE OF NORFOLK.

CHARLES HOWARD, Duke of Norfolk; premier duke, earl, and baron, of England, next the blood royal; Earl Marshal and Hereditary Marshal of England; Earl of Arundel, Surrey, and Norfolk; Baron Fitzalan, Chinn, Ofswaldeire, and Matravers; Baron Monbray, Howard, Legrave, Browne of Gower, War-
ren, Greyfrock, Furweal Verdon, Lovetov, and Strange of Blackmire; Lord Lieutenant and Cintras Rolotum of the county of Sufex, Recorder of Gloucefer, High Steward of Hereford, F.R. and A.S. born March 15, 1746; succeeded his father, the late duke, Aug. 17, 1752. He was married March 19, 1752, to Jane Coppinger, eqg. of Ballylaine in Ireland, who died in childbed, May 28, 1768; secondly, April 2, 1771, Frances, only daughter and heiress of Charles-Fitzroy Scudamore, eqg. of Home Lacy in Herefeshire, by whom he has no issue.

The dukes of Norfolk, chiefs of the illustrious family of the Howards, were descended from the earls of Paffy, in Normandy. Sir William Howard, from whom they are lineally derived, was lord chief juftice of the common pleas in the reign of Edward I. Sir Robert, the fifth in descent from Sir William Howard, married Margaret, eldest daughter of Thomas and cousin and co-heir to John Mowbray dukes of Norfolk, and the surviving representative of Thomas of Brocton earl of Norfolk, second fon of Edward I. Sir John Howard, the issue of this marriage, ferred in the battle of Chiltton, July 20, 1453, where John, fifth earl of Shrewsbury, and his son, was killed. He served under Henry, son of Edward IV. He was created lord Howard, and constituted lord admiral of England, Ireland, and Aquitaine, for life, July 25, 1483. He was Haiti in the service of Henry VI. He poffefled a conforable command in Henry's expe- dition against France; but, becoming suspected through the unaccountable jealousy of that prince, he was attainted together with his eldest fon; and his life was saved by the deceafe of that prince. He remained in prison till the accession of queen Mary, when he was reforfed in blood, and went to quell the insurrection of sir Thomas Wyat; he died August 23, 1554. His second fon Thomas was created by Queen Elizabeth, January 13, 1559, viccount Bindon in the county of Dorset, which title became extinct in the year 1619. Henry, earl of Surrey, his fon, who had been attainted together with his father, and was beheaded January 19, 1553, was one of the most accomplished scholars of his time. His fon Henry, son of the fair Geraldine, the first object of his attachment, exhibit an elegance of composition till that time unknown in English poetry. While on his travels at Florence, he published a general challenge in honour of her beauty, and came off victorius. His second fon Henry was by James I. March 13, 1603, created baron Howard of Marnhill in the county of Dorset, and earl of Northampton. He was further conftituted, April 29, 1605, lord keeper of the privy seal; and upon his death, June 15, 1613, his titles became extinct.

His eldest fon Thomas, fourth duke of Norfolk, was in coniderable favour with queen Elizabeth. Entering however into the cabals of Mary queen of Scots, and betrayed by the perfons in whom he confided, he was attainted in parliament, and suffered on the scaffold.

His younger fons were Thomas, created earl of Suffolk, and ancelor to the extinct barons Howard of Erfwicke, and lord Montague; Philip, earl of Arundel, his fon, was reforfed in blood some years after; but was through the turbulence of the times imprisoned in the Tower, and died in con- finement November 19, 1595.

Henry, earl of Arundel, his eldeft fon, was con- sidered in favour with James I. and Charles I. By the former he was raied to the office of earl marshal for life. By the latter he was raied to the office in the earl of Strafford. In confequence of his faithful services he was created earl of Norfolk; but, having resigned his office of lord feward in 1644, and taking no part in the fubfequent calamities, he passed over to Italy, and died at his favourite residence at Padua October 4, 1646. He was father of William viccount Stafford, who was beheaded in the eightieth year of his age, in confequence of the infamous perjuries of Titus Oates. His eldest fon Henry Frederic of Arundel, was by James II. October 5, 1688, earl of Stafford, which title became extinct April 2, 1762. It is to this Thomas, earl of Arundel, that the learned world is indebted for the celebrated Marmora Arundeliana.

Henry Frederic, earl of Arundel, his eldeft fon, was father of Thomas, fifth duke of Norfolk, who was raied to that dignity by Charles II. of Henry, sixth duke of Norfolk, to whom the office of earl marshal was firft made hereditary in his family; of Philip, cardinal Howard; of Charles, ancelor of the present duke of Norfolk; and of Bernard.

Henry, seventh duke of Norfolk, fon of Henry, was a zealous supporter of the caufe of the revolution, and raied a regiment for the fervice of King William. He died April 2, 1701.

Thomas, the eighth, and Edward, the ninth, dukes of Norfolk, were fons of Thomas, brother to this Henry; and upon the deceafe of the latter, the honours and estate devolved upon Charles, tenth duke of Norfolk, and grandfon to Charles, fon of Henry Frederic earl of Arundel in the reign of Charles I. His grace married Catharine, fecond daughter and co-heir of John Brochhole, of Cluften in the county of Lancarter, esquire; by which lady, who died March 25, 1752, he had
had issue Charles the eleventh and present duke of Norfolk, who is the most ancient duke and peer now existing by patent in the male line in Europe.

*Heraldic Extraposition.*—Bernard-Edward Howard, esq. descended from Bernard Howard, esq. brother of Thomas, and Henry, dukes of Norfolk, and Charles Howard, great-grandfather of Charles, present duke of Norfolk.

**RESIDENCES.**—Arundel Castle in the county of Sussex; Workfop Abbey, in the county of Nottingham; Home-Lacey, in the county of Hereford; and Greyflock Castle, in the county of Cumberland.—Town-houfe, St. James's-square.

**Armorial Bearings.**—The arms of this noble family are particularly illustrative of the heraldic science, and exhibit the additional bearing of an augmentation, given as the device of the year of great and singular value. As often as any such remarkable insignias occur in the coats of arms adapted to this work, we shall consider it of advantage to explain the blazon; not only because it will tend to familiarize a learner to the language of heraldry; but because it will store the memory with a series of authentic facts, which interlace and adorn the page of our national history. At the top of our Heraldry Plate XVII. these arms are correctly emblazoned, thus: Quarterly, first on a bend between six crof crof crof fitchy argent, an effeachon or, charged with a demi-lion rampant, parted through the mouth with an arrow, within a double treffure or counter-foy gules, for Howard. Second, gules, three lions paffant guardian in pale or, in chief a label-of-three points argent, for Brotherton. Third, chequ' or and azure, for Warren. Fourth, gules a lion rampant argent, armed and langued azure, for Mowbray. Behind the shield, two truncheons or marshal's staves, in faltier argent; the latter holding in his hand a fable, being the insignia of the earl marshall of England.

**Crest.**—On a chapeau gules turned up ermine, a lion rapturant guardian his tail extended or, gorged with a ducal coronet argent.

**Supporters.**—On the Dexter side, a lion; on the sinister side, a horse or with a fore, both argent, the latter holding in his mouth a flip of oak vert, fructed proper.

**Motto.**—Sola virtus inviolata. "Virtue alone is inviolable."

While Henry VIII. was purfuing his wars in France, James IV. king of the Scots, broke into England at the head of 50,000 men, and ravaged a part of the north of England. Henry earl of Surrey, having assembled an army of 26,000 men, met the invaders in Flandon-field, September 9, 1513, and gave them a fatal overthrow, in which the Scottish king was killed. For this loyal and heroic act, the earl of Surrey received from Henry VIII. the above-mentioned augmentation to his arms: yet it must be observed, that this noble earl of Surrey, whose whole life, with that of his fathers, was a series of services to the crown and state, falling under the jealousy of the king, was attainted of treason on false suggestions, and fcarcely in the shameful manner we have already stated in p. 417, of this Treatise.

**SEYMOUR, DUKE OF SOMERSET.**

**Edward, Adolphus Seymour, Duke of Somerset.** Baron Seymour, and a Baronet; President of the Literary Fund, and of the Institution for the Prevention of Fevers, LL. D. Born February 24, 1775, and succeeded his father, Webb Seymour, the late duke, December 15, 1799. Married June 24, 1800, lady Charlotte Hamilton, second daughter of the duke of Hamilton; and has issue a daughter, born October 21, 1803; and a son and heir apparent, born December 20, 1804.

The noble progenitor of the family of Seymour is distinctly traced among the baronets and earls of Hertford in a direct line from the Saxon de Vere, who came to England with William the Conqueror. Their name was originally written Saint Maur. Sir John Seymour, knight, in the reign of Richard III. had issue Jane, who was third confron to Henry VIII. and mother to Edward VI. His son, sir Thomas Seymour, was created viscount Beauchamp, March 16, 1546, and later earl of Hertford, and the next day constituted lord high admiral of England. This nobleman made his addresses to the princess Elizabeth, and finally married Catharine Parr, surviving comfort of Henry VIII. Entering into some intrigues for the destruction of his brother, and the subversion of the existing government, he was attainted in parliament, and beheaded March 20, 1549.

Sir Edward Seymour, knight, eldest son of sir John Seymour, was created viscount Beauchamp and earl of Hertford. He was one of the executors of Henry VIII. and, three days after the death of that prince, was elected protector of the realm, and governor of the person of the infant prince Edward, his successor. He was afterwards advanced to the dignity of a duke, and was in the thirty-eighth year of his age. He was afterwards, February 10, 1547, constituted lord high treasurer of England, and in the course of a few days created earl Seymour and duke of Somerset. The lord protector distinguished himself on various occasions in the field, and gave a memorable defeat to the Scots at the battle of Pinkie, September 10, 1547. He had an ambitious and intrepid rival in John Dudley, afterwards duke of Northumberland; by whose intrigues he was deprived of all his offices, and committed to the Tower, October 14, 1549. He was afterwards liberated; but, being charged with an attempt to assassinate the duke of Northumberland, he was brought to his trial in 1553, and beheaded. He was twice married: by his first marriage he had issue sir Edward Seymour, baronet, from whom the present duke of Somerset and the present earl of Hertford are descended; and by the second, Anne, married to the earl of Warwick, eldest son of the duke of Northumberland; and Edward, his successor in his honours, but who was deprived of that succession by the attainder of his father, and restored, in the first year of the reign of queen Elizabeth, to the titles of viscount Beauchamp and earl of Hertford. This nobleman incurred the displeasure of the court by his marriage to lady Catharine Grey, granddaughter of Mary, daughter of William, the grandson of this marriage, was created marquis of Hertford June 3, 1690, constituted governor of the prince of Wales, and soon after elected chancellor of the university of Oxford. He attached himself to the royal party; and, upon the restoration of Charles II. was reinstated by act of parliament to the title of duke of Somerset. Francis, the brother of this nobleman, was, February 19, 1641, advanced to the dignity of a baron, by the title of lord Seymour of Trowbridge. Upon the failure of issue in the line of William, second duke of Somerset, the title descended to Francis, fifth duke of Somerset, and third lord Seymour of Trowbridge. Charles, sixth duke of Somerset, joined the party of king William in 1688, and was lord president of the council in the last year of the reign of that monarch. Upon the accession of queen Anne, he was constituted master of the horfe, and retained that appointment till 1715. He was succeeded in his titles by Algernon, his fourth son, seventh duke of Somerset, who, at the death of his mother Elizabeth, only child of Josceline Percy earl of Northumberland, succeeded to the baronies of Percy, Lucy, Poyning, Fitzpayne, Bryan, and Litimer. This duke was, October 23, 1749, created baron Warkworth of
HERALDRY.

Norfolk.
Premier Duke and Earl, and Hereditary Earl Marshal.

English Dukes.
of Warkworth-Castle in the county of Northumberland, 
and earl of Northumberland, with remainder to Sir Hugh 
Smithson, first duke of Portland, and duchess of Portland, 
only daughter of the duke of Portland. And in January 1675, 
she was, by Louis, created duchess of Aubigné in the 
province of Berry, and a peeress of France, with re- 
mainder to Charles duke of Richmond, and his male 
issue. She died November 14, 1734.

Charles Lenox, her only son by Charles II, having 
celebrated the third year of his age, on February 10, 
the late duke, by the advice and present duke; and al- 
so Webb-John, his grace's brother, born February 7, 
1777.

Edward, eighth duke of Somerset, married Mary, 
daughter and heiress of Daniel Webb of Monkton Far- 
ley in the county of Wiltz, esquire; by which lady he 
had issue, 1. Edward, ninth duke of Somerset, born 
January 2, 1718, and who died unmarried January 2, 
1792. He was succeeded by his brother Webb, of 
Monckton Farley, the tenth duke, who married December 
11, 1769, Anna Maria, daughter of John Bonnel of 
Stanton Harcourt in the county of Oxford, esquire; by 
which lady he had issue Edward-Adolphus, the eleventh 
son, born November 10, 1776.

Charles Lenox, Duke of Richmond.

CHARLES LENOX, DUKE OF RICHMOND, Earl of 
March, Duke of Lenox, and Earl of Darnley, Lord 
Lieutenant of Ireland, and Grand Master of the Order of 
St. Patrick, a Lieutenant-General in the Army, and 
Colonel of the 35th Regiment of Foot; succeeded his 
uncle, the late duc, December 29, 1806; born 1764; 
marched, September 6, 1783, Charlotte, daughter of 
Alexander, duke of Gordon, by whom he has issue, 1. 
Mary, born August 15, 1790; 2. Charles, earl of March 
and Darnley, heir apparent, born August 3, 1791; 3. 
Sarah, born August 21, 1792; 4. John-George, born 
October 3, 1793; 5. Georgiana, born September 30, 
1795; 6. Henry-Adams, born September 6, 1797; 7. 
Jane, born September 5, 1798; 8. William-Pitt, born 
September 20, 1799; 9. Frederic, born January 24, 
1801; 10. Suffex, born July 11, 1802; 11. Arthur, born 
October 13, 1803; 12. Louisa-Madehna, born October 2, 
1804; 13. Charlotte, born December 4, 1806.

The title of duke of Richmond is derived from Charles II. 
king of England, by Louisa, daughter of the count de 
Quecnounille of Bretagne in France, who came into Eng- 
land in 1672, with the princess Henrietta-Maria, duches-
and Sudbury, and Knight of the Garter, Hereditary Ranger of Whittlebury Forest, Northamptonshire, the King's Gamekeeper at Newmarket, Havenor of the Duchy-ports in Cornwall and Devon, Receiver-General of the profits of the seals in the King's Bench and Common Pleas, and of the Privage on Wines, Chancellor of Cambridge, and Governor of Addenbrooke's Hospital, a Trustee of the British Museum, High Steward of Durham, Recorder of Thetford and Coventry, and Governor of the Charter-house.

His grace was born in October 1755; married January 29, 1776, Anne, daughter and heiress of Henry lord Ravenworth, by which lady (who was divorced March 23, 1769, and soon after married John Fitzpatrick, earl of Upper Olfory) he had issue: Georgiana, born May 8, 1777, married to John Smyth, esq. of Heath, in Yorkshire, and died January 10, 1799, leaving issue George-Henry, earl of Suffolk, heir apparent, born January 14, 1760; married Charlotte-Maria, sister to the late counts of Waldegrave, and daughter of the second earl of Waldegrave, by the duchess of Gloucester, by whom he had four sons and four daughters, viz. Ipswich, Charles, William, and Hugh-George; and Maria, Lu- ra, Elizabeth, and Isabella. On May 24, 1769, his grace married, secondly, Elizabeth, daughter of the Rev. sir Richard Wrottesley, bart. dean of Windsor, niece to the late duchesses of Bedford and marquis of Stafford, by whom he has issue: Henry, born April 19, 1770, in holy orders, married October 2, 1800, Miss Caroline Pigot, youngest daughter of the late admiral Pigot. Charlotte, born May 14, 1771. —Augustus, born June 2, 1772. —Frederic, born September 16, 1774. —Eliza-beth, born October 19, 1775. —Louisa, born July 13, 1777. —Augusta, born February 19, 1779. —Francis, born June 1, 1780, married, November 25, 1800, lord Francis Almeric Spencer, second son of the duke of Marlborough. —William, born June 1, 1782. —John, born September 24, 1785. —Caroline, born July 5, 1781. —Harriet, born April 8, 1784. —Isabella, born November 17, 1786.

The family of Fitzroy is descended from Charles II. king of England, by Barbara, only daughter of William Villiers, second viscount Grandison, of the kingdom of Ireland. She was created August 3, 1670, baroness of Nonsuch in the county of Surrey, countess of Southam-pton, and duchess of Cleveland, with remainder to her fiction and George, son of Charles Somer-set, duke of York, by queen Catherine Swynford. The descendants of this line bore to king Charles, 1. Anne, married to Thomas Lenard, afterwards earl of Suffolk. 2. Charles, created September 10, 1675, baron Newbury, earl of Clifford, and duke of Southampton; afterwards duke of Cleveland. His titles became extinct in 1773. 3. Henry, afterwards duke of Grafton. 4. Charlotte, married to Henry-Edward Lee, afterwards earl of Litchfield. 5. George, created October 1, 1684, baron Pontefract, viscount Falmouth, and earl of Northumberland; and April 6, 1683, duke of Northumberland. His titles became extinct in 1726. 6. Barbara. The duchesses of Cleveland married, first, Roger Palmer, afterwards earl of Cafflemain in the kingdom of Ireland; and, secondly, Robert Fielding, esquire; and died in 1709.

Henry Fitzroy, the first duke, was created baron of Sudbury, viscount Ipswich, and earl of Eufoton, in the ninth, and duke of Grafton in the twelfth, year of his age. He was afterwards promoted to the offices of colonel of the first regiment of foot-guards, vice-admiral of England, and lord lieutenant and custos rotulorum of the county of Suffolk. He joined king William at the same time with lord Churchill, afterwards duke of Marlborough; but, upon the debate in the house of peers respecting the form of government to be adopted, he was one of those who voted for a regency, and as brothers to the dukes of Southampton and Northumberland, and the duke of Ormond; and he was killed in the attack upon the town of Cork in Ireland, October 9, 1690.

Charles, second duke of Grafton, his son, in right of his mother, became earl of Arlington. He was twice appointed lord lieutenant of the kingdom of Ireland; and, April 5, 1724, lord chamberlain of his majesty's household. His grace married, in March 1713, Henrietta, daughter of Charles, earl of Marlborough, and Mary, daughter of Henry, first duke of Beaufort; by which lady he had issue: 1. George, earl of Eufoton, who died July 6, 1742. 2. Aug¬ reputation, a captain in the royal navy, married to Eliza¬beth, daughter of colonel William Coby of Strodehall, in the kingdom of Ireland, by which lady he had issue: Augusta-Henry, the present duke, and Charles, the late lord Southampton. The late duke of Grafton died on May 6, 1757, when he was succeeded by his grand¬son, the third and present duke.

CREATIONS.—Baron Arlington, March 14, 1663. Bar¬on Arlington and Viscount Thetford, April 22, 1672. These titles belong to the duke of Grafton, in right of his mother, to whom he succeeded on the death of the late lord Southampton. The late duke of Grafton died on May 6, 1757, when he was succeeded by his grand¬son, the third and present duke.

RESIDENCES.—Kifton Hall, and Livermore Hall, in the parish of Waltham, in the county of Southampton. —Waltham Forest, in the county of Northampton.—Townhouse, in Piccadilly.

ARMORIAL BEARINGS.—See the annexed Engraving. MOTTO.—Et decus et pretium recit.—"At once the ornament and reward of virtue."
by James I. lord keeper of the privy seal. He died March 3, 1628. Henry, fifth earl of Worcester, his son, is supposed to have been the richest English nobleman of his time; and it was in a considerable degree owing to him that Charles I. was enabled to make so powerful a rebellion, as he did at the breaking out of the civil war. Soon after the commencement of the rebellion, he was created marquis of Worcester. He maintained, at his personal expense, a force in his castle of Ragland, in the county of Monmouth, from 1642, to August 19, 1646. The articles of capitulation upon which he surrendered himself, and was afterwards installed and confirmed in various offices by the parliamentary forces, and he died under confinement in December the same year, in the eighty-fourth year of his age.

Edward, second marquis of Worcester, his son, attracted much attention during the life of his father, under the style of the "earl of Glamorgan." His negotiations with the Irish catholics are now fully cleared up, and to disavow his proceedings, it appears that the marquis did nothing without the fullest authority. A commission, granted to him by the king, and dated April 1, 1644, contains powers of the most unlimited nature. Blank patents are there mentioned to have been given him for titles of honour from a marquis to a baron; the title of duke of Somerset is promised to him and his heirs for ever; the princes Elizabeth, with a portion of three hundred thousand pounds, is promised to his eldest son in marriage; and it is added, that whatever he contracts or engages for from the date of this commission, the king will make good the same. His lordship died April 3, 1660.

Henry, third marquis of Worcester, his son, was towards the close of the reign of Charles II. advanced to the title of Duke of Beaufort. He exerted himself in opposition to the invasion of the duke of Monmouth in 1685, and in 1688 endeavoured to secure Bristol against the adherents of the prince of Orange, upon whose elevation to the throne his grace refused to take the oath. He died January 21, 1699. Henry, second duke of Beaufort, his grandson, was January 10, 1712, constituted captain of the band of gentlemen pensioners.

Charles Noel, fourth duke of Beaufort, his son, succeeded his brother, the third duke, who died without issue, February 24, 1745; and having been divorced from his duchess, who afterwards, by Charles-Fitzroy, successor to her mother, married Sir Walter Roberts, Bart., of Glafenbury, in the county of Norfolk; on May 1, 1740, he married Elizabeth Berkeley, daughter to the vicountess dowager Hereford, by John Berkeley, Esq. of Stoke Gifford, in Gloucestershire, late baronets Betteourt, who died April 8, 1799, aged eighty (when her barony descended to the third duke, born May 28, 1730, the third son of Holland, by his second wife, Diana, daughter and heir of Aubrey de Vere Earl of Oxford; by which lady he had issue, nine sons, and one daughter who died an infant."

"Charles, the second duke of Saint Albans, was born April 6, 1666; on May 11, 1725, he succeeded his father as duke of Saint Albans; on December 12, 1732, he married Lucy, daughter and co-heir of Sir John Werden, of Holloport, in Berkshire, bart. and by her had issue, one son, and one daughter, Diana, born October 20, 1725; married to the honorable and reverend Shute Barrington, bishop of Durham, and died in 1766, without issue; and George, born June 25, 1739, the third son, who married October 12, 1763, Jane, daughter and heir of Sir Walter Roberts, of Glafernbury, Kent, bart. by whom he had no issue; and his grace died February 1, 1786, and was succeeded by his grandson, George, the fourth duke, and grandson of his brother William."

William, born May 22, 1698, married Charlotte, 6 C daughter
daughter and co-heir of Sir John Werden, bart. by whom he had issue: 1. William, who died in 1737. 2. Charles, a colonel in the army, who died in 1735, having married Miss Elizabeth Jones, by which lady he had a son, George, the fifth duke, born December 5, 1758, who succeeded to the dukedom on the death of his cousin, George; which dignity he enjoyed till February 1, 1787, when, dying without issue, the honour descended to his cousin, Aubrey Lord Vere, the late and sixth duke, born June 3, 1750, married May 4, 1763, Catharine, daughter of William Earl of Belborough, by whom he had issue: Catharine-Elizabeth, born February 20, 1764; Aubrey, the present duke; William, born December 18, 1766; married July 21, 1789, to the Reverend Mr. Thelwall, who died October 17, 1797, without issue; he married, secondly, March 4, 1799, Miss Nelthorpe, and has issue several children: Amelius, a captain in the royal navy; Caroline married to the honorable C. Dundas; Georgiana, who died October 17, 1791; and Frederic, in holy orders. His grace died February 9, 1802, when he was succeeded by his son, the present duke. 3. Charlotte, married to the late John Drummond, esq. by whom he had issue: Charlotte, who married her cousin Beauclerk; and other children. 4. Caroline, married to Sir William Draper, K.B. and died in 1782.

Vere, father of the late duke, was born July 14, 1699, and married Mary, eldest daughter and co-heir of Thomas Chapman, of Hanworth, esq. by whom he had Aubrey the fourth and late duke, and late lord Vere, the duke of Marlborough, and has issue. His lordship died October 1, 1781, and was succeeded by his only surviving son, the present duke. 1. Henry, born August 11, 1721; married in December 1733, Martha, daughter of John and sister and heir of Nevil Lord Lovelace, by whom he had issue: Henry, who married, in November 1769, Miss Charlotte Drummond, who died in March 1774, leaving issue; and six daughters: Diana; Henrietta; Mary; Barbara, married July 6, 1782, to the Reverend Walter Williams, of Harrow; Charlotte; Martha, married in 1794, no honorable and reverend George Talbot, uncle to Lord Talbot; Anne Sidney, born February 27, 1702; married, December 9, 1736, Mary, daughter of Thomas Norris, of Speak, in Lancashire, esq. and died November 23, 1744, leaving one son, the late Topham Beauchler, born in 1745, and married in 1766 to Miss Sarah, a vicountess of Bolingbroke, sister to the Duke of Marlborough, and died in 1780, leaving issue one son, Charles-George, and three daughters, Mary, Elizabeth, and Anne. Elizabeth was married April 8, 1787, to the present earl of Pembroke, and died in 1792. Anne, married May 23, 1733, John Talbot, brother to the earl of Talbot, George, born December 30, 1734, Hendon in the county of Middlesex, general of his majesty's forces, married Miss Margaret Bainbridge; he died in 1763, and his lady October 23, 1792, without issue. Seymour, born in 1708, died an infant. James late bishop of Hereford, born 1702, died October 28, 1737, unmarried. Aubrey born in 1711, was killed at Culloden in 1746. His grace the late duke died February 5, 1795, and was succeeded by his son Aubrey, the present duke.

**Residences.**—Windsor, in the county of Berkshire. Hanworth Park, in the county of Middlesex; and Belwood Park in Nottinghamshire.—Town-hall, Stratford Place, Oxford Street.

**Armoirial Bearings.**—See the annexed Engraving.

**Motto.**—*A posticum melioris avi.* "A pledge of better times."

**Osborne, Duke of Leeds.**

GEORGE-WILLIAM-FREDERIC OSBORNE, DUKE OF LEEDS, Marquis of Carmarthen, Earl of Danby, Viscount Latimer and Dumbelaine, Baron O'ree of Kiveton, Baron Conyers, and a Baronet, Lord Lieutenant of the North Riding of Yorkshire, Governor of the Islands of Scilly, Ranger of Richmond Forest, and Constable of Middleham Castle; born July 21, 1755; married August 17, 1797, Charlotte daughter of the Marquis of Townhead; has issue, Francis-Godolphin D'Arcy, Marquis of Carmarthen, heir apparent; born October 17, 1798; and succeeded his father as duke of Leeds January 31, 1799.

The family of Osborne rose to pre-eminent distinction in the person of Sir Edward Osborne, knight, created a baronet by James I. and was father to Thomas, first duke of Leeds. He was patronised by the celebrated Earl of Strafford, and, when that nobleman was confined, the lord president of the North, he was appointed vice-president.

Thomas Osborne, first duke of Leeds, adhered to the royal cause during the civil wars; and, upon the restoration of Charles II. was appointed in 1661, treasurer of the navy, and constituted June 19, 1673, lord high treasurer of England. He was in the same year created Duke of Kiveton in the county of York and Viscount Latimer and, in the following year, Mary, born December 1, 1676, died without issue; he married, secondly, March 4, 1739, Mifs Nelthorpe, and has issue several children: His grace married, July 6, 1782, to the Reverend Mr. Williams, and married Mary, eldest daughter and co-heir of Thomas Norris, of Speak, in Lancashire, esq. and died November 23, 1744, leaving one son, the late Topham Beauchler, born in 1745, and married in 1766 to Miss Sarah, a vicountess of Bolingbroke, sister to the Duke of Marlborough, and died in 1780, leaving issue one son, Charles-George, and three daughters, Mary, Elizabeth, and Anne. Elizabeth was married April 8, 1787, to the present earl of Pembroke, and died in 1792. Anne, married May 23, 1733, John Talbot, brother to the earl of Talbot, George, born December 30, 1734, Hendon in the county of Middlesex, general of his majesty's forces, married Miss Margaret Bainbridge; he died in 1763, and his lady October 23, 1792, without issue. Seymour, born in 1708, died an infant. James late bishop of Hereford, born 1702, died October 28, 1737, unmarried. Aubrey born in 1711, was killed at Culloden in 1746. His grace the late duke died February 5, 1795, and was succeeded by his son Aubrey, the present duke.

**Residences.**—Windsor, in the county of Berkshire. Hanworth Park, in the county of Middlesex; and Belwood Park in Nottinghamshire.—Town-hall, Stratford Place, Oxford Street.

**Motto.**—*A posticum melioris avi.* "A pledge of better times."

**Osborne, Duke of Leeds.**

GEORGE-WILLIAM-FREDERIC OSBORNE, DUKE OF LEEDS, Marquis of Carmarthen, Earl of Danby, Viscount Latimer and Dumbelaine, Baron O'ree of Kiveton, Baron Conyers, and a Baronet, Lord Lieutenant of the North Riding of Yorkshire, Governor of the Islands of Scilly, Ranger of Richmond Forest, and Constable of Middleham Castle; born July 21, 1755; married August 17, 1797, Charlotte daughter of the Marquis of Townhead; has issue, Francis-Godolphin D'Arcy, Marquis of Carmarthen, heir apparent; born October 17, 1798; and succeeded his father as duke of Leeds January 31, 1799.

The family of Osborne rose to pre-eminent distinction in the person of Sir Edward Osborne, knight, created a baronet by James I. and was father to Thomas, first duke of Leeds. He was patronised by the celebrated Earl of Strafford, and, when that nobleman was confined, the lord president of the North, he was appointed vice-president.

Thomas Osborne, first duke of Leeds, adhered to the royal cause during the civil wars; and, upon the restoration of Charles II. was appointed in 1661, treasurer of the navy, and constituted June 19, 1673, lord high treasurer of England. He was in the same year created Duke of Kiveton in the county of York and Viscount Latimer and, in the following year, Mary, born December 1, 1676, died without issue; he married, secondly, March 4, 1739, Mifs Nelthorpe, and has issue several children: His grace married, July 6, 1782, to the Reverend Mr. Williams, and married Mary, eldest daughter and co-heir of Thomas Norris, of Speak, in Lancashire, esq. and died November 23, 1744, leaving one son, the late Topham Beauchler, born in 1745, and married in 1766 to Miss Sarah, a vicountess of Bolingbroke, sister to the Duke of Marlborough, and died in 1780, leaving issue one son, Charles-George, and three daughters, Mary, Elizabeth, and Anne. Elizabeth was married April 8, 1787, to the present earl of Pembroke, and died in 1792. Anne, married May 23, 1733, John Talbot, brother to the earl of Talbot, George, born December 30, 1734, Hendon in the county of Middlesex, general of his majesty's forces, married Miss Margaret Bainbridge; he died in 1763, and his lady October 23, 1792, without issue. Seymour, born in 1708, died an infant. James late bishop of Hereford, born 1702, died October 28, 1737, unmarried. Aubrey born in 1711, was killed at Culloden in 1746. His grace the late duke died February 5, 1795, and was succeeded by his son Aubrey, the present duke.
1789, and Catharine Anne Sarah. His grace died January 31, 1799, when he was succeeded by the present duke.

**Creations.**—Baron Osborne of Kiveton, and Viscount Latimer, August 15, 1673; Earl of Danby, in the county of York, June 27, 1674; Marquis of Caermarthen, April 20, 1683; and Duke of Leeds, in the county of York, May 4, 1694.

**Residences.**—Hornby Castle, and Kiveton Park, in Yorkshire; and Godolphin Park, in the county of Cornwall. —Town-house, Grosvenor-square.

**Armorial Bearings.**—See the annexed Engraving. **Motto.**—*Pax in bello.*

**RUSSEL, DUKE OF BEDFORD.**

**JOHN RUSSEL, DUKE AND EARL OF BEDFORD,** Marquis of Tavistock, Baron Ruffell of Cheneys and Thornhaugh, and Baron Howland of Streatham; succeeded his brother Francis, the late duke, May 2, 1802: born July 6, 1666; married at Bruxelles, March 21, 1786, Georgiana Elizabeth, second daughter of George Byng, Marquis of Tavistock, Baron Russel of Cheneys and Thornhaugh, when he was driven by a violent storm upon the coast of Great Britain. By Henry VIII. he was appointed lord high admiral of England. Having resigned this office, he was, December 3, 1543, promoted to the titles in consequence of having attended the houfe of lords was voted to be useless, he went over to the royal party, and served in the army of Charles I. at the battle of Newbury. Dissatisfied with his reception, he changed sides, December 25, 1643, and his estate was for a short time sequestrated. By king William he was created marquis of Tavistock and duke of Bedford; and, among the motives for this promotion alligned in the patent, it is observed, "That this was done that he was father to the lord Russel, the ornament of his age, whose name could never be forgotten, so long as men preferred any esteem for sanctity of manners, greatness of mind, and a love to their country, confant even to death." The duke died September 7, 1700. The mother of William lord Russel was Anne, daughter and heir to Robert Cottrell of Scruton.

William, lord Russel, highly distinguished himself as the principal leader of the original whig party in 1689, and as a strenuous advocate for the bill of exclusion. It is observed by Sir William Temple, "That his setting himself at the head of these affairs had a great influence on the houfe, being a person in general repute, as an honest worthy gentleman, without tricks or private ambition, who was known to venture as great a flake as any subject in England." He was accused of being concerned in the Rye-houfe plot; and, nobly refusing to escape, was condemned, and executed July 21, 1683. He married Rachel, daughter and heir to Thomas Wriothesley earl of Southampton, lord high treasurer of England. His attainder was revoked by act of Parliament, March 22, 1748.

Wriothesley, second duke of Bedford, son of William lord Russel, married Elizabeth, daughter and heir of John Howland of the county of Surrey, esquire, and was in consequence created, during the life of his father, baron Howland of Streatham. Wriothesley, third duke of Bedford, his son, died without issue October 23, 1752.

John, fourth duke of Bedford, his brother, was, December 27, 1744, constituted first lord commissioner of the admiralty, and at the breaking out of the rebellion raised a regiment of foot for his majesty's service. Resigning his seat at the admiralty board, he was, February 13, 1748, appointed one of the principal secretaries of state, which office he resigned in July, 1751. He was declared, December 15, 1756, lord lieutenant-general and general-governor of the kingdom of Ireland, which office he held for upwards of twelve months. His grace was appointed, November 25, 1761, lord keeper of the privy seal; and September 4, 1763, ambassadour extraordinary and minister plenipotentiary to negotiate a treaty of peace with the court of France. He returned in the following year, and, having refused to be reappointed, September 9, declared lord president of the council, which office he held till July 13, 1765. His grace married April 2, 1737, Gertrude, daughter of John first Earl Gower; by whom he had issue, 1. Francis marquis of Tavistock, who married, July 7, 1764, Elizabeth, daughter of William Anne second earl of Albemarle; by which lady he had issue, Francis the fifth duke, and John the present duke. The marquis of Tavistock lost his life in consequence of a fall from his horse, March 22, 1767, and the marchioness, from her affliction for his accident, died November 2, 1768.

**Francis, second earl of Bedford, his son,** was employed in various embassies by queen Elizabeth. William, youngest son of Francis, served under the earl of Leiceter in the United Provinces, and, May 16, 1594, was appointed lord deputy of Ireland, where he made a successful campaign against the rebel Tyrone. Upon the accession of James I. he was created a peer by the title of Baron Russel of Thornhaugh in the county of Northampton. He died October 9, 1613.

Francis, fourth earl of Bedford, his son, made a considerable figure during the troubles in the reign of Charles I. He was the intimate friend of Mr. Pym; and is represented by the earl of Clarendon as having been always inclined to moderate measures. When the king had it in contemplation to appoint an administration from the popular party, the earl of Bedford was fixed upon for lord high treasurer. He died May 9, 1641. Edward, earl of Orford, first lord commissioner of the admiralty, was the grandson of Francis. He was greatly instrumental in the success of the prince of Orange in 1688. He gained an important victory over the French fleet at La Hogue, May 19, 1692. He was three times appointed first lord commissioner of the admiralty; and was created, May 7, 1697, baron of Shingey, in the county of Cambridge, viscount Barkley in the duchy of Normandy, and earl of Orford in the county of Suffolk. He died December 19, 1727.

William, fifth earl, and first duke, of Bedford, the son of Francis, was July 14, 1642, appointed general of the horse in the service of parliament, and displayed singular bravery at the battle of Edgehill. In 1643, when the house of lords was voted to be uilehils, he went over
Bedford; Thorney, in the Isle of Ely; Cheney's, in the county of Bucks; and Tavistock House, in Devonshire. Town-house, Stanhope-street.

AMORAL BEARINGS.—See the annexed Engraving.

MOTTO.—"Chiar fara fara." — "What will be, will be."

CAVENDISH, DUKE OF DEVONSHIRE.

WILLIAM CAVENDISH, DUKE OF DEVONSHIRE, Marquis of Hartington, Earl of Devonshire, Baron Cavendish of Hardwick, Knight of the Garter, and Lord Lieutenant of the county of Derby; LL.D., born December 24, 1748; succeeded his father William, the late duke, October 2, 1764; married June 5, 1774, lady Georgiana Spencer, sister to George-John earl Spencer; and by her (who died March 30, 1786) had issue, Georgiana, born July 12, 1783; married March 21, 1801, George vicount Morpeth, son of Frederic earl of Carlisle, by lady Caroline Gower, daughter of Granville marquis of Stafford; Henrietta, born August 13, 1785; William George, marquis of Hartington, heir apparent, born May 21, 1790.

The family of Cavendish is descended from Robert de Geron, the one of the Norman chiefs, who came over to England with William the Conqueror. Roger de Geron, in the reign of Edward II. had four sons, all of whom were preceptors, and succeeded to the manorship of Cavendish, in the county of Suffolk, of which their mother had been heiress. From the second of these sons descended Thomas Cavendish, the celebrated circumnavigator; who, attempting a second voyage to the South Seas, died off the coast of the Portuguese settlement of Brazil, in 1591.

James, son of Roger de Geron, was constituted, October 29, 1366, lord chief justice of the court of king's bench; and, being sent into Suffolk to quell the insurrection of Wat Tyler, was beheaded by the rebels in the town of Bury St. Edmund's, in 1381. William, fifth in descent from lord chief justice Cavendish, was gentleman usher to cardinal Wolsey, in the reign of Henry VIII. and, after the death of the cardinal, was employed in various services by that monarch. He married Elizabeth, daughter of John Hardwicke, of Hardwicke, in the county of Derby, esquire, at whose persuasion he purchased several estates in that county, and built Chatsworth House, the principal residence of the dukes of Devonshire. After his death his lady married George, earl of Shrewsbury, in whose charge Mary, daughter of Cuthbert Lord Ogle; by which lady he had issue, Frederic, one of the trustees of the British Museum, and Henry, one of the trustees of the British Museum, and fellow of the royal and antiquarian societies. Lord Charles Cavendish died April 28, 1783; and the duke his father, June 4, 1759.

William, second duke of Devonshire, was, June 12, 1771, constituted lord keeper of the privy seal; and, having resigned that office, was, in April 1773, appointed lord steward of the household. He exchanged this
this appointment, March 31, 1737, for that of lord lieutenant of Ireland; and returning from that country, was, January 3, 1744, returned to the appointment of lord steward of the household, which office he resigned in June 1750. He married Charlotte, daughter and heiress of John Fiskine, esq. of the county of Middlesex; by whom he had issue: 1. William, fourth duke of Devonshire. 2. Caroline, married to William Ponsonby, earl of Bessborough in the kingdom of Ireland. 3. Elizabeth, married September 20, 1743, to John, second brother to the earl of Bessborough. 4. George, born April 8, 1748. 5. Frederic, born August 27, 1750. 6. John, born October 22, 1752. He was, March 27, 1753, appointed one of the lords commissioners of the treasury, and chancellor of the exchequer; and, having resigned those offices July 5, in the same year, was reappointed April 5, 1755. He resigned a second time December 17, in the same year. The duke, his father, died December 5, 1755. William, fourth duke of Devonshire, was appointed, July 9, 1754, master of the horse to the king; and, in January 1754, lord high treasurer of the kingdom of Ireland. Having resigned his office of master of the horse, he was, March 27, 1755, declared lord lieutenant of Ireland, which office he held one year. He was, November 16, 1756, appointed first lord commissioner of the treasury; and, having resigned that office, he was, in May, 1757, promoted to be lord chamberlain of the household, which appointment he held till 1762. His grace married March 28, 1748, Charlotte, heir of Richard Earl of Burlington and Cork, and died December 27, 1793; Charles, born December 3, 1749, died without issue; Henry, born December 25, 1751, married, January 4, 1773, to her cousin John Spencer, esq., son of lord Charles Spencer, by whom he had issue: George, born December 20, 1764; married, February 6, 1790, to her cousin John Spencer, esq., son of lord Charles Spencer, by whom he had issue: George, born December 20, 1764, married, February 6, 1790, to her cousin John Spencer, esq., son of lord Charles Spencer, by whom he had issue: George, born December 27, 1753; Charles, born December 3, 1753; George-Henry, born May 18, 1764; Charlotte, born October 19, 1769; married, the Rev. Edward Nares, son of the late judge Nares, and died January 10, 1803, leaving issue: Henry, born December 20, 1765, died at Berlin, July 3, 1793; Ann, born November 5, 1773; John, born December 10, 1776, married, December 19, 1796, the honourable Copley Ashley, brother to the earl of Shaftesbury; Francis Almire, born December 18, 1779; married, November 25, 1800, lady Frances Fitzroy, fifth daughter of Augustus Fitzroy, duke of Grafton; and his heirs: a son, born October 13, 1804; Amelia Sophia, born September 9, 1805.

This illustrious family is descended from Robert Spencer, steward to king William the Conqueror, who came over to England with that prince. His name in its original etymology signifieseward, and the office above-mentioned continued in the family for several generations. The title of earl of Sunderland was first conferred by charter, Walter, who had summons to parliament by the title of lord Stanley, and died without issue; and Almire, whose son, Thurstan, headed the barons who took up arms against king John. Hugh, the grandson of Thurstan, was one of the most distinguished nobles in the reign of Henry III. and by his weight with the barons, the kingdom became in 1260, chief judiciary of England. He distinguished himself in the battle of Lewes, where the king was taken prisoner. Being disgraced with the haughty behaviour of Simon de Montfort earl of Leicester, he deserted the party of the barons, obtained from the king a patent of the office of justiciary, December 15, 1264, and received summons to parliament as baron Le Defencer. But he afterwards returned to his old friends, and died in arms against the king at the battle of Evesham, August 5, 1265.

Hugh Le Defencer his son, and Hugh Le Defencer his grandson, were the favourite of Edward II. Hugh, the elder, had summons to parliament, as baron Le Defencer, June 23, 1335, and was farther promoted to the dignity of earl of Buckingham, by letters patent of FebrChatworth House, and Hardwicke Hall, in the county of Derby; and Chiswick, in the county of Middlesex. —Town-house, in Piccadilly. —Armorial Bearings. —See the annexed Engraving. —Motto. —Cavendish, duke of Marlborough. —GEORGE SPENCER, DUKE OF MARLBOROUGH. —GEORGE SPENCER, DUKE OF MARLBROUGH, Marquis of Blanford, Earl of Sunderland and Marlborough, Baron Spencer of Wormleighton, Baron Churchill of Sandridge, and Knight of the Garter, Lord Lieutenant of Oxfordshire, Ranger of Whitchurch Forest, High Steward of Oxford and Woodstock, LL.D. born January 26, 1738-9; succeeded his father, Charles, the late duke, November 26, 1753; married, August 27, 1763, Caroline, only daughter of John, fourth duke, by whom he had issue: Caroline, born October 27, 1763; married, March 10, 1792, Henrietta, Baroness Churchill of Grey's Court in the county of Oxford, baronet.

The dukedom of Marlborough was so styled from Geoffrey, next brother to Hugh Le Defencer, chief justiciary of England; and this younger branch was also distinguished in the wars of the barons. Robert,
burt, the fourteenth in descent from Geoffrey, was by James I. at his accession, created baron Spencer of Wormleighton in the county of Warwick. He distinguished himself in opposition to what were considered as the encroachments of prerogative, and was reputed to be one of the best parliamentary speakers of his time. He died October 25, 1637.

Henry, third lord Spencer, his grandson, was one of those noblemen, in the time of Charles I., who formed a party of moderating the differences between the king and his parliament; but, being unable to prevail, he followed the royal army; though, as he observes in a letter to his lady, "if there could be an expedient found to solve the puncticulo of honour, he would not have continued in it an hour." He was created, soon after the commencement of the civil war, earl of Sunderland. He married Dorothy, daughter of Robert Sydney earl of Leicester, who is celebrated by Waller in his poems under the appellation of Sacharifa, and after the commencement of the civil war, earl of Sunderland. He died October 25, 1643, in the twenty-third year of his age. Robert, his next brother, was in 1686 created a peer of Scotland, by the title of viscount Tiviot, and died without issue.

Robert, second earl of Sunderland, was, in the earlier part of the reign of Charles II. employed in several important embassies, and being being recalled from the court of France, where he then resided, was, February 9, 1679, appointed one of his majesty's principal secretaries of state, at the same time that the earl of Exeter was made chief lord of the treasury, and the earl of Shaftesbury lord president of the council, and that the office of secretary of state, in conjunction with lord Sunderland, was offered to Sir William Temple. He was, April 1680, removed from the office of secretary of state, in consequence of his supporting the bill for excluding the duke of York from the succession to the throne. Another provision was reëstablished January 23, 1682. He continued in this office during the greater part of the reign of James II. and December 4, 1685, obtained the additional appointment of lord president of the council. Becoming suspected by the government, he was, October 27, 1688, dismissed from all his employments, and, departing from the kingdom, arrived in Holland about the same time that the prince of Orange landed at Torbay. A few years after the earl of Sunderland acquired a high degree of credit with King William, and, April 19, 1697, was appointed lord chamberlain of the household, which office he resigned December 26, in the same year. The situation in which this nobleman was placed during these transactions, was in many respects extremely hazardous and dangerous.

Charles, third earl of Sunderland, having married Anne, second daughter of John Churchill duke of Marlborough, was, December 3, 1706, appointed one of the principal secretaries of state; which office he held till June 14, 1710. At the time of his dismissal he very distastefully refused to accept of the offer of a pension of three thousand pounds per annum. Upon the accession of George I. he was, September 24, 1714, appointed lord lieutenant of the kingdom of Ireland; and, having resigned that office, was farther promoted, August 28, 1715, to be lord keeper of the privy seal. Having resigned this appointment, he was, April 13, 1717, constituted one of the principal secretaries of state; March 16, 1718, he exchanged that situation for the place of lord president of the council; and, in the following week was promoted to be first lord commissioner of the treasury. The office of lord president of the council he resigned February 6, 1719, and his post at the head of admittance in April 1721, he died September 1, 1722. From this third surviving son, the family of Spencer, earl Spencer, is descended.

Charles, fifth earl of Sunderland, and second son of Charles, the third earl, succeeded, August 23, 1731, (according to the tenor of the patent, creating the celebrated John Churchill, marquis of Blandford and duke of Marlborough, to the title of marquis of Blandford, and, October 24, 1733, to the title of duke of Marlborough.

The family of Churchill is lineally descended from Roger de Courcy, grandson of Guito de Leon, progenitor of the noble house of Leon in France, who came over to England with William the Conqueror. Sir Winston Churchill, in the reign of Charles I., was a zealous partizan of the royal cause, and suffered under the sequestrations of the parliamentarians. He had issue, 1. Arabella, much admired by James II. to whom she bore James Fitz-James, duke of Berwick. She married colonel Charles Godfrey, master of the jewel-office in the reign of queen Anne. 2. John, duke of Marlborough. 3. George Churchll, who distinguished himself at the battle of La Hague, and was admiral of the blue. 4. Charles, a general in the army.

Charles Churchill, first duke of Marlborough, was created, November 21, 1682, baron Churchill of the kingdom of Scotland; and upon the accession of James II. a peer of Great Britain, by the title of baron Churchill, of Sandridge, in the county of Hertford. He was second in command at the defeat of the duke of Monmouth; but, upon the invasion of the prince of Orange, was among the first who went over to his party, and was by that prince advanced to the rank of earl of Marlborough. He served some campaigns in Ireland and the Low Countries; but, falling under the displeasure of King William, was dismissed from all employments, and sent prisoner to the Tower. He was, in June 1698, appointed governor to William duke of Gloucester, son of the princes Anne. By king William, June 1, 1701, he was appointed commander-in-chief of the forces in Holland, and this appointment was confirmed and extended to him by queen Anne, with the addition, June 29, 1702, of the appointment of master-general of the ordinance. By that prince he was created marquis of Blandford and duke of Marlborough, December 4, 1702; and he illustrated her reign by the most signal victories ever gained upon the continent of Europe. By the emperor Joseph, he was, November 12, 1705, created prince of Mindenheim, in the duchy of Swabia, which he afterwards exchanged for the county of Nellenburg in the circle of Austrria. In compensation for his unexampled services, the manor of Woodstock and house of Blenheim, were settled on him and his heirs by act of parliament January 28, 1705, and January 28, 1707, an annuity of five thousand pounds per annum was in a similar manner entitled to him by his wife, and, on his decease, he was divested of all his offices, at the same time that his duchess was deprived of hers! By George I. he was restored September 24, 1714, to the office of master-general of the ordnance.—For the military history, and portrait, of this great English general, see the articles Churchill, vol. iv. p. 580; and England, vol. vi. p. 785-790.

The duke of Marlborough married Sarah, daughter of Richard Jennings of Sandridge in the county of Hertford, esquire; by which lady he had issue: 1. John, marquis of Blandford. 2. Henrietta, married to Francis earl of Godolphin, son to lord-treasurer Godolphin. 3. Anne, married to Charles, the third earl of Sunderland, and died without issue. 4. Elizabeth, married to Sempill, first duke of Bridgewater. 5. Mary, married to John Montague, duke of Montague. The marquis of Blandford dying in the thirteenth year of his age, an act of parliament was obtained, December 21, 1706, by which his grace's honours and dignities were to descend to all the heirs of his body, male and female. He died June 16, 1722. Upon his death, Henrietta, countess of Godolphin, his eldest daughter, succeeded to the title of duchess of Marlborough, and her son William to that of marquis of Blandford.

Charles, second duke of Marlborough, embraced the military
military profession, and commanded the brigade of foot guards at the battle of Dettingen. He was deceased in 1749, lord steward of the household; and, having relinquished that appointment, was, January 7, 1755, promoted to be lieuten-ant of theorph at the battle of Dettingen, December 23, in the same year, this office for the post of master-general of the ordnance; and resigned in November 1757. In 1758, the duke of Marlborough commanded an expedition against the port of Saint Malo in the province of Bretagne; and July 25, in the same year, was appointed commander-in-chief of the British forces intended to serve in Germany under prince Ferdinand of Brunswick.

George, the third duke of Marlborough, married May 23, 1732, Elizabeth, daughter of Thomas lord Trevor, by whom he had issue, Diana, born March 24, 1734; married September 9, 1757, lord Woffington Bo-landbrook, from whom she was divorced in 1768, having had issue; and two days after, married to the honourable Topham Beaufort, only son of lord Sydney Beaufort, by whom she was left a widow, March 11, 1789, leaving issue, Charles. Beaufort, esq. who married, April 29, 1799, Charlotte, daughter of William Ogilvie, esq. by the duke's dowager of Lenzie; and their youngest daughter married, in 1787, George-Augus-tus earl of Pembroke, and died in 1792, leaving issue; Elizabeth, born December 29, 1737; married to Henry, tenth earl of Pembroke and Montgomery, March 13, 1759, and had issue, George, the present earl; Charles, born March 31, 1740; married, October 2, 1762, to Mary, daughter of the late lord Vere, sister to the duchess of Leinster; and Jane, born March 24, 1745, and had issue; John, the eldest son, born December 21, 1757; married, February 5, 1792, to Elizabeth, daughter of George duke of Buckingham, by whom he had issue; Lucy, born December 1, 1792, and was succeeded by his son, George, the present and fourth duke.

CREATIONS.—Baron Churchill, of Sandridge, in the county of Hertford, May 14, 1683; Baron Spencer of Wormleighton, in the county of Warwick, July 21, 1683; Earl of Marlborough, in the county of Wilts, April 9, 1689; Earl of Somerset, in the county of Salop, June 5, 1643; and Marquis of Blandford, in the county of Dorset, and Duke of Marlborough, December 14, 1702.

RESIDENCES.—Blenheim, near Woodstock; Sion Hill, Middlesex; and Langley Broom, in the county of Buckingham.—Town-houses, in Pall Mall.

ARMORIAL BEARINGS.—See the annexed engraving.

MOTTO.—Deo defide et ab ore: "God defends the right."

MANNERS, DUKE OF RUTLAND.

JOHN-HENRY MANNERS, DUKE OF RUT-LAND, Marquis of Granby, Earl of Rutland, and Baron Manners of Haddon, Knight of the Garter, LL. D. Lord Lieutenant and Cudfors Rotutular of the county of Leicetser, High Steward of Cambridge, Recorder of Grantham and Scarborough, Colonel of the Leicester-shire Regiment of Militia; born January 4, 1728; succeeded his father, Charles, the late duke, October 24, 1737; married April 22, 1739, lady Elizabeth Howard, daughter of Frederic earl of Carlisle, and has issue, Caroline, born May 25, 1739, and died November 25, 1804; Elizabeth, born January, 1802; Emmeline, born May, 1806; and the marquis of Granby, born June 26, 1807, to whom his majesty George III. is the son, and who died August 4, 1807.

The family of Manners was originally settled in the county of Northumberland, where they were successfully engaged in land leasing, the impress of the Scots, and for many years occupied the appointment of sheriff of the county. Sir Robert Manners, in the reign of Edward IV. married Eleanor, daughter of Thomas lord Roos, whose family was of great antiquity, and whose ancestor, William lord Roos of Hamlake, was one of the competitors for the crown of Scotland, in the reign of Edward I. George, the eldest son of this marriage, bore the title of lord Roos, baron Roos, of Hamlake, Barrow, and Pelvoir, in the county of Northumberland, which he held for many years. His son, second lord Roos, of the family of Manners, his son, was, in consideration of his descent from a father of Edward IV. advanced to the dignity of earl of Rutland, a title which no persons but such as were of the royal family had hitherto borne; and hence received an augmentation to his armorial bearings, and worn. Thomas, second earl of Rutland, his son, was imprisoned in the Fleet at the accession of queen Mary, upon suspicion of having favoured the pretensions of lady Jane Grey. Edward, third earl of Rutland, his son, obtained great reputation in the law, and was designed by queen Elizabeth for the office of lord chancellor, which intention was frustrated by his death, April 14, 1587. Roger, fifth earl of Rutland, his nephew, engaged in the insurrection of Robert Devereux earl of Essex, and was committed to the Tower. John, eighth earl of Rutland, great grandson of Thomas, first earl of Rutland, lived in the period of the civil war, but kept himself detached from the violence of either party. He was appointed by the parliament, in 1643, one of the lords commissioners for executing the office of lord chancellor of England.

John, ninth earl and first duke of Rutland, his son, lived entirely in the country in the practice of the old English hospitality, and was created marquis of Granby, and Duke of Rutland, by queen Anne. He was deceased May 23, 1772, Caroline, born May 23, 1732, Elizabeth, daughter of Thomas lord Trevor, by whom he had issue; 1. John, third duke of Rutland; William, who died April 23, 1772; Catharine, married to the right honourable Henry Pelham, first lord of the treasury and chancellor of the exchequer; Lucy, born January 2, 1758; Robert; John James, born January 11, 1764; and George, born November 12, 1765. Lord Robert Manners died May 31, 1782.

John, third duke of Rutland, was, July 17, 1777, appointed chancellor of the duchy of Lancaster, which office he resigned in May 1776. He was, January 14, 1755, confir mated lord steward of the household, and, having relinquished that appointment, was promoted, in 1761, to be master of the horse to the king; which office he held till August 1766. He married Bridget, daughter and heiress to Robert Sutton lord Lexington; by which lady he had issue, 1. John, marquis of Granby, who, in the rebellion in 1745, raised a regiment of foot for his majesty's service; and, August 25, 1759, was commissioned commander in chief of the British forces serving in Germany under prince Ferdinand of Brunswick, in which post he obtained the highest military reputation. He was, September 12, 1759, appointed lieutenant general of the office of ordnance; and May 14, 1763, further promoted to be master general of that office. He was constitted, August 12, 1766, commander in chief of the land forces in Great Britain, which office he resigned in January 1770. He married, September 3, 1750, Frances, daughter of Charles sixth duke of Somerset; by which lady, who died January 25, 1760, he had issue, Charles, fourth duke of Rutland; and Robert, a captain in the navy, who distinguished himself in the fleet of sir George Rodney, and was mortally wounded in the great victory obtained by that commander over count de Grasse in the West Indies, April 12, 1782. George, who inherited the estate of Robert lord Lexington, his grandfather, and took the name of Sutton; Louisa-Bridget, born 1763; Thomas, born February 24, 1765; Francis, an officer in the army, born January 5, 1767; and George, born May 10, 1768. The duke of Rutland died May 29, 1799; and the marquis of Granby, October 19, 1779.

Charles, fourth duke of Rutland, was appointed, February 14, 1783, lord steward of the household, and resigned.
signified that office, April 2, in the same year. He was consecrated, December 23 following, lord keeper of the privy seal; and, having resigned that appointment, was farther promoted, February 27, 1756, to be lord lieutenant of the kingdom of Ireland. He married, December 26, 1775, lady Mary-Isabella Somerset, aunt to the duke Beaumont, by whom he had issue, John-Henry, the present duke; Isabella, born September 28, 1776, married to Richard Norman, esquire; Catherine-Mary, born April 29, 1779, married to Cecil Poreler, of Kols Hall, Salop, esquire; Charles-Somerset, born October 24, 1780; Robert, born December 21, 1783; and William, born May 1, 1783, who died April 2, 1793. His grace died while lord lieutenant of Ireland, on the 24th of October, 1789, when he was succeeded by his son, John-Henry, the present and fifth duke.

**Creations.**—Baron Roos of Hamsle in the county of York, and of Trubut and Belvoir in the county of Lincoln, December 26, 1662. Earl of Rutland, June 23, 1655. Baron Manners of Haddon in the county of Derby, April 29, 1679. Marquis of Granby in the county of Nottingham, and Duke of Rutland, March 29, 1703.

**Residences.**—Haddon Hall, in the county of Derby; Chevelley Park, in Cambridgeshire; and Belvoir Castle, in the county of Lincoln. —Town-house, Grosvenor-street.

**Armorial Bearings.**—See the annexed Engraving. **Motto.**—"Pour y partienc."—"In order to attain it!"

**HAMILTON, DUKE OF BRANDON.**

**Archibald Hamilton, Duke of Brandon.**

Duke of Hamilton in Scotland, and Duke of Chatelherault in France, Marquis of Douglas, Clydefaide, and Hamilton, Earl of Angus, Arran, and Lanark, Keeper of Holyrood House and of Linlithgow Palace, Lord Lieutenant of the county of Lanark, and President of the London Dispensary; born July 15, 1742; succeeded his nephew, Douglas, the late duke, August 2, 1793; married, May 25, 1765, Harriet, daughter of Alexander earl of Galloway, and sister to John the present earl, by whom he has issue, Alexander, born October 5, 1767; now marquis of Douglas, and heir-apparent; Archibald, born March 16, 1769; Anne, born March 26, 1766; Charlotte, born April 6, 1772; married June 24, 1800, the present duke of Somerset; Susan, born in July, 1774; married August 4, 1803, lord viscount Pin-castle, eldest son of John earl of Darkmore.

The dukes of Brandon are descended from Bernard, chief counsellor and second in command to Rollo, first duke of Normandy. Roger de Beaumont, earl of Hainault, in descent from Bernard, came over to England with William the conqueror; and his policy were successively created earls of Warwick, Leicester, Worcester, and Bedford. Robert de Beaumont, fourth earl of Leicester, was father to William, who took the surname of Hamilton or Hamilton, from a manor of that name in the county of Buckingham, and by some genealogists is said to have died without issue; but by Douglas, in his Peerage of Scotland, is represented as having removed into that kingdom in 1215, where he became the ancestor of the present illustrious family of Hamilton, as well as of the earls of Haddington, and barons Belhaven, in the kingdom of Scotland, and the earls of Charnbrait in the kingdom of Ireland.

Sir James Hamilton, created baron Hamilton by James I. king of Scots, was father to James, second lord Hamilton, who married, in 1475, Mary, daughter to James II. James, third lord Hamilton, his son, was by James IV. created earl of the isle of Arran. James, fourth earl of Arran, his son, by Henry II. king of France, created duke of Chatelherault, in the county of Poiton; and in 1543 was declared by the states of the kingdom of Scotland, governor to Mary their young queen, and regent of the kingdom during her minority, as well as next heir to the crown, failing her issue. He suffered both imprisonment and forfeiture for his faithful adherence to that princess, and died January 22, 1573. He was ancestor by a younger son to the earls of Abercorn.

John, third earl of Arran, his son, was by James VI. King of Scots, created marquis of Hamilton, being the first person who bore the appellation of marquis in that kingdom. James, second marquis of Hamilton, his son, was by that prince, June 26, 1619, created baron of Emmetfaile, in the county of Cumberland, and earl of Cambridge. James, third marquis of Hamilton, his son, was by Charles I. created duke of Hamilton, and for his faithful adherence to that prince was beheaded March 9, 1649. William, second duke of Hamilton, his brother, had been created earl of Lanark and baron Macamulline and Poltont in the kingdom of Scotland. He was killed fighting for the cause of Charles II. at the battle of Worcester, September 3, 1651. Anne, duchess of Hamilton, daughter of James first duke of Hamilton, married William Douglas marquis of Douglas, who by Charles II. was created duke of Hamilton. He was a principal in the revolution in 1688; and was twice lord commissioner to repreffent the king in the parliament of Scotland, as well as lord president of the privy council of that kingdom. He had issue, James, fourth duke of Hamilton; Charles, created earl of Selkirk; John, created earl of Ruthven; George, created earl of Orkney; and Basil, ancestor to the earl of Selkirk.

His grace died April 18, 1695.

James, fifth duke of Hamilton, born during the lifetime of his father the appellation of earl of Arran. He attached himself to the cause of James II. and, being present at a meeting of the peers of Scotland then in London, strenuously dissuaded them from placing the crown upon the head of the prince of Orange. He was present upon the first visit of the project of the union, and was, in 1703, upon a rumour of the intended invasion of the king of James II. arrested and brought prisoner to London. Three years after this, he was created baron of Dutton in the county of Chester, and duke of Brandon in the county of Suffolk. His grace was, August 29, 1712, constituted master-general of the office of ordnance, and appointed ambassador extraordinary to the court of France; but before he could set out, he was engaged in a duel with Charles, first earl of Moilesey, August 15, in which both parties were killed upon the spot.

James, the second duke of Brondion, on the death of his father James, November 15, 1712, succeed to also as duke of Hamilton; he married, first, Anne, daughter of John earl of Dundonald, by whom he had only one son, James, his successor; and the dying in August 1733, his grace married, secondly, in 1727, Elizabeth, daughter and co-heir of Thomas Strangeways, of Sonerethir, esquire; who dying in November 1758, without issue, he married, thirdly, Anne, daughter and heir of Edward Spencer, esquire, by whom he had a daughter, Anne, born in 1739; married, in 1761, the marquis of Donegal; and two sons: Archibald, the present duke; Spencer, born June 1742, lieutenant-colonel in the guards; died March 29, 1791. His grace married, secondly, December 24, 1751, the honourable Richard-Savage Naffau, second son of Frederic earl of Rochford, and died March 9, 1771, leaving issue the present earl, and George-Savage Naffau.

Douglas, the third duke of Brandon, succeeded his father in March 1743; married, February 14, 1752, Elizabeth, daughter of John Gunning, esquire, by whom he had issue George-James, the fourth duke of Brandon;
Douglas, the fifth duke of Brandon, married April 5, 1778, Elizabeth, daughter of the late Peter Burrell, esq. and sister of the duchess of Northumberland, countess of Beverley, and lord Gwydir, and died August 2, 1779. He was succeeded by his uncle Archibald, the present and fifth duke; the duchess married, secondly, Henry, first marquis of Exeter. Elizabeth, born January 26, 1733; married, June 23, 1774, to Edward, now earl of Derby, and died in 1797. The duke died in 1756; and her grace married, secondly March 5, 1776, to John Campbell, marquis of Montrose, by whom she had issue. On May 20, 1776, her grace was created a baroness of Great Britain, by the title of baroness Hamilton of Hambleton, in the county of Leicestershire; and the dignity of a baron to her heirs male.

CREATIONS.—Earl of Angus, April 9, 1389; Earl of Arran, in the county of Bute, August 10, 1503; Duke of Chateletkaitz, in Poitou in France, 1552, by Henry II. of France; Marquis of Hamilton, in the county of Lanark, April 19, 1599; Marquis of Douglas and Clydefield, June 17, 1633; Baron Dutton, and Duke of Brandon, September 10, 1711.

RESIDENCES.—Aston Hall, Lancashire; Hamilton family at Bertiefield or Berfield, in the county of Kent.

ARMS.—See the annexed Engraving.

MOTTO.—Through.

BERTIE, DUKE OF ANCASTER.

BROWNSLOW BERTIE, DUKE OF ANCASTER AND KESTEVEN, Marquis and Earl of Lindesey, Lord Lieutenant and Custos Rotulorum of the county of Lincoln; born May 1, 1739, and succeeded to the title upon the death of his nephew July 8, 1779, and was appointed in the same year lord lieutenant and custos rotulorum of the county of Lincoln. His grace married November 14, 1755, Henrietta, daughter and heir of George Morton Pitt, of Twickemham, esq. to lady dying April 23, 1753, he married January 2, 1759, Mary-Anne, daughter of Peter Layard, esq. and had issue Mary Elizabeth, born July 14, 1763; married, August 14, 1783, to John Valentine, seventh earl of Derby; and died May 24, 1773, to viccount Millington, eldest son of Lord Portmore, by whom she had issue, and died February 20, 1777.

The family of Bertie came into England with Hengist and Horsa, at the time of the first Saxon invasion. Leopold de Bertie, in the reign of Ethelred, having applied to the king for the redress of some injury, and receiving no satisfaction, went over to the standard of Sweyn king of Denmark, upon the subsequent defeat of the Danes, Burbach his son took refuge in France, where his possibility continued till 1154, when Philip de Bertie accompanied Henry II. into England, and by that prince's favour was re-store to the patrimony of his family at Bertieland or Bertiefield, in the county of Kent.

Richard Bertie, in the reign of Edward VI., married Catharine, baroness Willoughby d'Ereby, and relief of Charles Brandon duke of Suffolk; and together with his lady was reduced to great peril by the perfecution of Stephen Gardiner bishop of Winchester in the reign of queen Mary. Peregrine, their son, was by queen Elizabeth admitted to the dignity of lord Willoughby d'Ereby with issue; and he succeeded Robert earl of Leicester in the appointment of commander in chief of the English auxiliaries in the United Provinces, and a few years after was sent with four thousand auxiliaries into France, to the assistance of Henry IV. He married Mary, a sister and heir of Edward Vere earl of Oxford, and died in 1600.

Robert, second lord Willoughby d'Ereby of the family of Bertie, his son, claimed, in right of his mother, the office of lord great chamberlain of England, and in consideration of the dignity of that office was created earl of Lindsay, in the beginning of the reign of Charles

Vol. IX. No. 600.

I. He was March 16, 1626, constituted lord high admiral of England, and at the commencement of the civil war in June 1642, commander in chief of the forces of the king. He was killed at the battle of Edgehill October 23 in the same year. Two of the sons of the earl of Lindsey were also killed in the same service, Mono, second earl of Lindsey, his son, was near his father in the battle of Edgehill, and, seeing him wounded and taken prisoner, is said voluntarily to have surrendered himself, that he might be near and attend upon him. He adhered to the king in all his subsequent misfortunes, and exerted himself, with Stuart duke of Richmond, Seymour marquis of Berwick, and Wriothesley earl of Southampton, to prevent his tragic catastrophe. He lived privately in England during the usurpation of Cromwell, and had the pleasure of attending at the coronation of Charles II.

Robert, fourth earl of Lindsey, son of Robert third earl of Lindsey, was, by queen Anne, created marquis of Lindsey, and by George I. duke of Ancaster and Kesteven. He had issue, Peregrine, the second duke; Vere, who left two daughters; Albina, married to George fon of John Arif earl of Buckinghamshire; and Louisa.

Peregrine, second duke of Ancaster, succeeded his father in 1733. He married Jane, daughter of Sir John Brownlow of Belton, baronet; by which lady he had issue, Peregrine, third duke; Brownlow, the present duke; and Jane, married to general Matthews. His grace died January 1, 1742.

Peregrine, third duke of Ancaster, upon the breaking out of the rebellion in 1745, raised a regiment of foot for his majesty's service. He was, December 13, 1766, appointed master of the horse to the king. He married Mary, daughter of Thomas Panton, of Newmarket, esquire; by which lady he had issue, Robert, fourth duke; Prissilla Barbara Elizabeth, baroness Willoughby d'Ereby; Georgiana Charlotte, born August 7, 1764. His grace died August 12, 1788; and was succeeded by his eldest son, Robert, late and fourth duke, born October 17, 1756, who dying suddenly, July 8, 1779, unmarried, left the barony of Willoughby d'Ereby in abeyance between his two sisters, but which was granted by patent March 18, 1786, to lady Prissilla Barbara Elizabeth, his eldest sister, the present baroness, (her husband, lord Gwydir, in her right, officiates as lord great chamberlain of England;) and in his other honours by his uncle, Brownlow, the present duke.

RESIDENCES.—Grimsthorpe Castle, Swithfield, and Ullington, in the county of Lincoln.—Town-houses, Saville-row.
quis of Titchfield, heir apparent, born June 24, 1768; married August 4, 1795, Henrietta Scott, daughter of the late general Scott, and in September following, by his majesty's permission, added the name of Scott to that of Bentinck; and has issue William-Henry, born August 21, 1796; Caroline, born July 6, 1799; and William George, born September 14, 1774; Charlotte, born October 3, 1775; married, March 31, 1793, Charles Greville, eld. son of Fulke Greville, of Witburn, in Wilts; and has issue, Charles-Cavendish Fulke, born April 2, 1794; and Algernon-Frederic, born January 13, 1797; and William, born November 2, 1785.

William first earl of Portland was descended from the noble family of Bentinck, of the province of Overfyll in the United Provinces, where his family had flourished for many ages. In his youth he had been page of honour to William prince of Orange, afterwards king William III. from which office he was advanced to that of gentleman of his bed-chamber. He was the confidential ambassador of the prince, and was sent into England in 1667, to solicit his marriage with the princess Mary, eldest daughter of James duke of York; and succeeded in hisoffer to king James the after he had promised the prince's troops and perfon to repel the invasion of the duke of Monmouth. In the year succeeding that of the revolution, in the promotion of which measure Mr. Bentinck had been extremely active, he was appointed, February 13, to be groom of the robe, and soon after created baron Cirencefter, viscount Woodstock, and earl of Portland. His lordship served under his royal master both in Ireland and the Netherlands with great reputation. He was principally employed in the negociation of the treaty of Ryswic in 1697, and was soon after appointed ambassador extraordinary to the court of France. In 1695, an enquiry being instituted into certain transactions relative to the paying of an act for incorporating the East-India company, it was reported to the house of commons, that some members of both houses had been bribed; and it appeared that fifty thousand pounds had been offered to the earl of Portland, and refused.

But, notwithstanding the integrity of his conduct, and the great favour that he partook with king William, he was not always regarded with equal partiality by the house of commons. In 1694 they addressed the king in opposition to an intended grant to the earl of Portland of certain lordships in the principality of Wales; and in 1701 this nobleman, together with John Somers lord Somers, Edward RufTel earl of Lan caster, and Charles Montagu lord Halifax, was pointed, February 13, to be groom of the robe, and earl of Portland. His lordship served under his master both in Ireland and the Netherlands with great reputation. He was principally employed in the negociation of the treaty of Ryswic in 1697, and was soon after appointed ambassador extraordinary to the court of France. moff among the English heroes at the celebrated battle of Cressy; and he had also a great share in the subsequent victory of Poictiers. He was lord steward of the household to Richard II. and took part with the king's uncles in reforming the favourite, Robert de Vere earl of Oxford and duke of Ireland. He died June 3, 1397.

John, third earl of Salisbury, son of John lord Montacute, uncle to the favourite, Robert de Vere earl of Oxford and duke of Ireland. He died June 3, 1397.

Henry, third earl of Salisbury, born under the regent duke of Bedford at the great victory of Verneuil. He was lord steward of the most among the English heroes at the celebrated battle of Poictiers. He was lord steward of the most distinguished warriors in the campaigns carried on in that province. In the reign of the latter prince, lie took various towns from the French, particularly Avranches, Melun, and Sens; and was second in command under the regent duke of Bedford at the great victory of Verneuil. He conducted the siege of Orleans in 1428, when he was killed by a cannon-ball, November 3, in that year.

From Simon, the younger son of John lord Montacute, born in the county of Lancaster; and, having resigned that office, was, April 9, 1783, appointed ambassador extraordinary and minister plenipotentiary to the court of Versailles; in which situation he negociated the definitive treaty of peace. He resigned in December in the same year; and, dying on September 2, 1788, was succeeded by his eldest son, William, the present duke; Frederic Caroline Maria, his grace was constituted April 20, 1782, lord chamberlain of his majesty's household; and, having in vain exerted himself to bring about a compromise between the king and the parliament, he retired from public life, greatly disapproving of the subsequent severities against that prince; and expressed a perfect hatred against the protector, Cromwell. The earl of Manchester was very active in procuring the restoration of Charles II. and, when the parliament met, April 25, 1660, he officiated as speaker of the house of peers. Among the subsequent appointments he was declared lord chamberlain of the household, and died May 5, 1671.

Charles, fourth earl of Manchester, his grandson, disapproving of the measures of the reign of James II., spent the principal part of his time in retirement. He appeared with other noble persons at the trial of the seven bishops, June 29, 1688; and afterwards waited upon the prince of Orange in Holland, for the purpose of concerting with him the measures that led to the revolution. He voted for filling the throne with the prince and princes of Orange, and accompanied king William in his expedition to Ireland in 1690. He was promoted, March 23, 1693, to be captain of the yeomen of the guards, and was afterwards sent upon several foreign embassies, particularly in May 1699, to the court of Versailles. The king of France having acknowledged the pretended Charles Stuart as king of Great Britain upon the death of his father, his lordship left the court, and returned to England; and, having at the same time resigned the office of captain of the yeomen of the guards, he was, January 4, 1702, appointed one of the principal secretaries of state, which office he resigned upon the accession of queen Anne. Under that prince he was again committed to several foreign courts; and by George I. was created duke of Manchester. He died January 20, 1722.

William, and Robert, his sons, were successively dukes of Manchester. William married Isembell, the eldest of the co-heirs of John duke of Montagu, April 16, 1733, having succeeded to his father's honours on January 20, in the year preceding. He was appointed, in October 1737, captain of the yeomen of the guards; and died without issue October 21, 1739; Robert, his brother, the third duke, married April 3, 1755; Harriet, daughter and co-heir of Edmund Dunch, esquire, by which lady, he had issue, 1. Caroline, married to Charles, grandson of Henry, ninth earl of Pembroke. 2. Margaret, fourth duke of Manchester. 3. Charlotte, the earl of Salisbury, married to Elizabeth, daughter of James Bulmer, esquire; by which lady he had issue, George, Charles, and several other children. His grace died May 10, 1762.

George, fourth duke of Manchester, was born April 6, 1737; married October 23, 1763, Elizabeth, eldest daughter of Sir James Dalwood, bart, by whom he had issue, William, the present duke; Frederic Caroline Maria, married to the duke of Montrose; and Anne Maria. His grace was constituted April 20, 1782, lord chamberlain of his majesty's household; and, having resigned that office, was, April 9, 1783, appointed ambassador extraordinary and minister plenipotentiary to the court of Versailles; in which situation he negociated the definitive treaty of peace. He resigned in December in the same year; and, dying on September 2, 1788, was succeeded by his eldest son, William, the present and fifth duke.

SACKVILLE, DUKE OF DORSET.

George John Frederic Sackville, Duke of Dorset, Earl of Dorset and Middlesex, Baron Buckhurst, and Baron Cranfield in Suffolk; born November 15, 1793; succeeded his father the late duke, July 19, 1799.

The family of Sackville is descended from the Norman chief, Herbrand de Sachavilla, who came over to England with William the Conqueror. His descendants were persons of considerable eminence in the subsequent reigns. Jordan de Sackville, in the reign of king John, was one of the persons elected by the barons to scrutinize and settle the articles of Magna Charta; and John de Sackville, his grandson, was one of the turbulent barons taken prisoners by king Edward, son of Henry III. at the battle of Evesham. The family of Sackville also served in the wars of Edward III. and Henry V. for the crown of France. Richard Sackville was one of the privy council to Edward VI. and queen Mary, and was appointed, upon the accession of queen Elizabeth, chancellor and under-treasurer of the exchequer. He died April 21, 1566. Thomas Sackville, his son, was one of the confidential ministers of queen Elizabeth. By that princess he was created baron Buckhurst, of Buckhurst, in the county of Suffolk. He was a person of great learning and genius, particularly celebrated for his composition of the tragedy of Gorboduc; and his son, Sir John Sackville, March 15, 1590, was elected chancellor of the university of Oxford. He was employed in various embassies; and, upon the death of William lord Burleigh, was constituted, March 15, 1600, lord high treasurer of England. He kept himself unconnected with the violent parties that agitated the court, viz. of Cecil earl of Salisbury, and Howard earl of Nottingham, on the one part, and Devon earl of Exeter, on the other; and was appointed to preside as lord high steward at the trial of that unfortunate nobleman. From James I. he obtained a patent of the office of lord high treasurer for life, and was created by that prince, earl of Dorset, March 13, 1604. He died April 19, 1603.

Edward, fourth earl of Dorset, his grandson, was a person of great learning and excellent accomplishments. The story of his fierce and bloody duel with Edward lord Bruce, baron of Kinlofs, is well known; the letters in which it is related were inserted by Mr. Addison in a paper of the Guardian. While a commoner, he was one of the principal commanders of the forces sent to affist Frederic king of Bohemia, and was at the famous battle of Prague, November 8, 1620. He spoke with great eloquence in defence of lord chancellor Bacon, March 12, 1621; and was, in 1624, declared lord chamberlain of the household. He was a zealous adherent to Charles I. and distinguished himself at the battle of Edgehill. He died July 17, 1652. Richard, fifth earl of Dorset, his son, was for some time committed to the Tower by the parliamentary faction; and was afterwards particularly active in bringing about the restoration of Charles II. He married Frances, daughter and heir of Lionel Cranfield earl of Middlesex, and died August 27, 1677.

Charles, sixth earl of Dorset, the issue of this marriage, was one of the most popular characters of the court of Charles II. Though he yielded in some measure to the profligacy of those times, yet his manners were engaging, that it was observed of him with some envy, by Wilmot earl of Rochester, "That lord Buckhurst might do what he would, and every body was determined to speak well of him." A song of this nobleman has been particularly admired, as being written on board the fleet of the duke of York, on the night previous to the celebrated battle with admirals Opdam, June 3, 1665. He was a great patron of polite literature, and is described by Mr. Pope, with a view to the amiableness of his manners and the severity of his satire, as "the best good man with the world-natured mufe," by Charles II. he was created baron Cranfield of Cranfield, and earl of Middlesex. The princes Anne, afterwards queen of Great Britain, put herself under the protection of this nobleman in the year of the revolution, when she secretly withdrew herself from the court of her father. He voted for filling the throne with the prince and princes of Orange; and, was, February 13, 1689, appointed lord chamberlain of the household, which office he resigned April 23, 1697. He died January 29, 1706.

Lionel Cranfield, seventh earl of Dorset, his son, was by George I. created duke of Dorset. He was appointed, May 30, 1725, lord steward of the household; and, having resigned that office, was, June 19, 1730, constituted lord lieutenant of the county of Middlesex. By tendering resigned that appointment, he was restored, March 31, 1737, to the office of lord steward of the household; and, January 3, 1744, exchanged that appointment for the post of lord president of the council. He held this office till he was constituted a second time, in June 1751, lord lieutenant of the kingdom of Ireland. He exchanged that appointment, May 29, 1755, for the post of master of the horse to the king, which office he resigned May 5, 1757. In January 1709, his grace married Elizabeth, daughter of lieutenant-general Collyer, brother to David earl of Portmore; and by her he had issue, Charles, the second duke; Elizabeth, married to Thomas Thynne viscount Wemyouth, but died before cohabitation, June 29, 1759, while his lordship was on his travels.

John Philip Sackville married Frances, fourth daughter of John earl Gower; by whom, who died June 26, 1788, he had issue, John Frederic Sackville, the late and third duke, and a daughter, Sackville-Tufton Mary, married to the earl of Thanet, and died in September 1778, leaving issue, George, the late viscount Sackville; Carolina, married to Joseph Damer, esq. since created earl of Dorchester, by whom she had issue, and died in March 1735. His grace, the first duke, dying October 10, 1765, was succeeded by his son, Charles, born February 6, 1711; who married, in 1743, Grace, only daughter of viscount Shannon, and she died May 10, 1763, without issue. His grace was, during the life-time of his father, December 24, 1743, appointed one of the lords commissioners of the treasury; and, having resigned that office, he was, in 1747, constituted master of the horse to Frederic prince of Wales. His grace dying without issue, January 1769, was succeeded by his nephew, John Frederic, the third duke, born May 3, 1750. His grace was, in January 1788, he had issue, John Frederick Sackville, the last and fourth duke.

RESIDENCES.—Knowle, in the county of Kent; Buckhurst, in the county of Suffolk; and Croxhall, in the county of Derby.—Town-house, Whitehall.

MOTTO.—Aut quaeram tenes, aut perfect.—"Either not attempt, or accomplish."
The family of Clinton is descended from William, chamberlain of Normandy, whose three sons came over to England with William the Conqueror. They took their name from the lordship of Clinton, now Glimpton, in the county of Lincoln, by the title of lord of the barons who made war against Henry III. John, second lord Clinton, in the reign of Edward I. married Ada, sister and heir of William de Ongelinges, baron of Maxtock, in the county of Warwick, and received summons to parliament February 6, 1298, by the title of baron Clinton of Maxtock. He had issue: 1. John, second lord Clinton, 2. William, who served Edward III. in his wars in Scotland and France; and was by that prince, July 16, 1333, constituted lord high admiral of England; and March 16, 1337, created earl of the county of Huntingdon. He died without issue, August 25, 1354.

John second lord Clinton, and John third lord Clinton, his sons, both distinguished themselves in the parliamentary service of Edward III. William, fourth lord Clinton, grandson of John third lord Clinton, served Henry IV. in his wars against Scotland; and Henry V. and Henry VI. in their wars in France. He bore the titles of lord Clinton and Say, the latter of them in right of whose grandsons Ofbert was in the list of barons who made war against Henry III. John de Clinton, in the reign of Edward I. married Ida, sister and heir of William de Ongelinges, baron of Maxtock, in the county of Warwick, and received summons to parliament February 6, 1298, by the title of baron Clinton of Maxtock.

He had issue: 1. John, second lord Clinton, 2. William, who served Edward III. in his wars in Scotland and France; and was by that prince, July 16, 1333, constituted lord high admiral of England; and March 16, 1337, created earl of the county of Huntingdon. He died without issue, August 25, 1354.

Edward, ninth lord Clinton, his great-grandson, distinguished himself in the naval service of his country, and was created principal in chief of the English fleet off Edinburgh, at the battle of Pinkney, in 1547. He was soon after appointed governor of Boulogne in Pardon, which he held till it was surrendered to the French in 1550. He was farther appointed, May 14, in the same year, lord high admiral of England for life; and in May 1552, constable of the Tower of London. In 1558 he commanded an expedition against the harbour of Breil, and assaulted and destroyed the town of Conquet in Bretagne. By queen Elizabeth he was constituted one of the commissioners to hear the charges against Mary queen of Scots, and one of the peers who sat for the trial of Thomas duke of Norfolk. By the fame princes he was advanced earl of Lincoln, and Januy 16, 1558. Henry, second earl of Lincoln, his son, was father to Thomas, third earl of Lincoln, and to Sir Edward Clinton, grandfather of Francis, seventh earl of Lincoln.

Theophilus, fourth earl of Lincoln, son of Thomas, the third earl, was concerned in the unfortunate expedition in the reign of James I. to join count Mansfeld with six regiments of Britisht foot and two troops of horse, for the service of the elector Palatine king of Bohemia. In 1645, the parliament ordered 1700l. which he had disbursed in their service, to be paid him out of the estates of delinquents in the county of Lincoln; but in the following year, having opposed their army, and endeavoured to bring on a treaty with Charles I. an impeachment of high treason was preferred against him by the house of commons, from which he was afterwards discharged.

Francis, sixth earl of Lincoln, had issue: 1. Henry, seventh earl of Lincoln. 2. George, an admiral, in the navy, the daughter Anne, daughter and heir of Peter Carle, a major-general in the army; by which lady, who died August 5, 1767, he had issue sir Henry Clinton, knight of the bath, a lieutenant-general in the army, colonel of the seventh regiment of dragoons, governor of Limerick in Ireland, and commander in chief of the forces in the American war.

Francis, sixth earl of Lincoln, had issue: 1. Henry, seventh earl of Lincoln. 2. George, an admiral, in the navy, the daughter Anne, daughter and heir of Peter Carle, a major-general in the army; by which lady, who died August 5, 1767, he had issue sir Henry Clinton, knight of the bath, a lieutenant-general in the army, colonel of the seventh regiment of dragoons, governor of Limerick in Ireland, and commander in chief of the forces in the American war.

Henry, seventh earl of Lincoln, adhered to the party of the whigs in the reign of queen Anne, and warmly opposed the measures of the ministry in support of the succession of the Prince of Orange. On the accession of George I. he was constituted paymaster-general of the forces, and commander in chief of the Tower of London. He married Lucy, sister to the late duke of Newcastle, by whom he had issue: 1. John, second duke; 2. George, eighth earl of Lincoln, born January 15, 1718, died April 20, 1730; Henry, the ninth earl, and second duke; Thomas, born November 8, 1723, died March 10, 1728; Lucy, died unmarried; Caroline, born January 20, 1727, died young; Margaret, born in December 1722, died October 1733; Grace, died young. Henry, the second duke, was born April 24, 1703; married, October 3, 1744, Catherine, only surviving daughter of Henry Pelham, brother to the first duke of Newcastle, by which lady, who died July 27, 1750, he had issue: George, born November 26, 1745, died in August 1752; Henry, earl of Lincoln, born November 5, 1750, married May 2, 1775, Frances, sister to the marquis of Hertford, and died October 22, 1778; by his lady he had a son, Henry Pelham, who died in September 1779; and a daughter, Catherine, born April 1, 1779. He was viscount Falconbridge, son of the earl of Radnor, and died May 17, 1804; John, born September 13, 1755, and died in October 1781. Thomas, the third duke, and second son, who succeeded his father February 22, 1794, was born in July 1762; married, January 25, 1782, Maria Pelham, daughter and sole heir of Sir Edward Clinton, grandfather of Francis, seventh earl of Lincoln.

The family of Percy, is in the list of those ancient

PERCY, DUKE OF NORTHUMBERLAND.

HUGH PERCY, DUKE AND EARL OF NORTHUMBERLAND, Earl Percy, Baron Warwick, of Warwick Castle; Baron Percy, Lucy, Poyning, Fitzpayne, Bryan, and Latimer; Colonel of the Royal Regiment of Horse Guards Blue, Knight of the Garter, Lord Lieutenant and Vice-admiral of Northumberland, and Commander-in-Chief of Launceston-Castle; born August 25, 1742. He succeeded his father, Hugh, the late duke, June 6, 1786; married, first, July 2, 1744, lady Anne Stuart, daughter of John earl of Bute, by whom he had no issue, and which marriage was dissolved by act of parliament, in 1779; he married, secondly, May 25, 1779, Frances Julia Burrell, daughter of Peter Burrell, esq. of Beckingham in Kents, by Elizabeth, first daughter of Sir Henry Percy, of Northumberland, and marchioness of Exeter, sister to Catherine, countess of Beverley, and Peter lord Gwydir; by whom he had issue: Charlotte, born July 3, 1780, died May 3, 1781; Elizabeth, born December 23, 1781; Julia, born May 2, 1783; Hugh, Earl Percy, heir apparent, and Agnes, born October 13, 1785, since deceased; Amelia, born January 16, 1786; Frances, born September 13, 1791, died August 18, 1803; Algernon, born December 15, 1792.
chefs who came over to England with William the Conqueror; and derives its name from a village in the province of Normandy. The founder of the family was Mainfrid, a Danish chief, who made immigrations into France in the ninth century, and whose son, Geoffrey or Galfrud, solicited Bollo to the conquest of Normanby, and obtained considerable possessions in the new duchy. William de Percy, the sixth in descent, appears to have lived in personal intimacy with William the Conqueror; and his brother Serlo, prior of Whithby, is recorded to have been the favourite companion of the early days of King William Rufus. William de Percy bore the title of baron of the realm from the period of the conquest, was distinguished by the surname of Aisgernon, or William with the Whiskers, and died in the Holy Land in 1096.

The poeility of William de Percy in the male line became extinct in William his grandson; and the family honours descended to Agnes, daughter of this William, who married Jofccline de Lounva, younger son of Godfrey Barbatus duke of Lorraine, and brother of Alicia conforl to Henry I. This family descended in the female line from Charlemagne emperor of Germany, and Hugh Capet king of France. Upon his marriage, Jofccline assumed the name of Percy. Richard de Percy, the youngest son of Jofccline, had a considerable influence in enforcing Magna Charta from king John; and Henry de Percy, grandson of Henry the eldest son of Jofccline, distinguished himself on both sides in the wars of the barons against Henry III. Henry de Percy, his son, was a leader of the malcontents against Edward II. and, together with Valentine earl of Pembroke, besieged Pierp Gravesend in Scarborough-castle, who surrendered himself to them upon certain conditions. These conditions were violated by the other hostile barons; who, either through imprudence or treachery, were suffered to get the prisoner into their possession, and struck off his head at Warwick-castle. It was this lord Percy who first acquired by purchase from Anthony Beck, bishop of Durham, the barony of Alnwick, in the county of Northumberland. He died in 1395.

Henry, second lord Percy of Alnwick, his son, was in the memorable battle of Halldown-hill, in the reign of Edward III. and, upon the surrender of the town of Berwick on the following day, was appointed by the king to the office of governor. He was also in the great fleet of Edward in 1377; in 1380, in the war against the Scots; in 1386, in the war in Gascony; in 1387, he was in chief at the battle of Neville's cross against the Scots, in which he gave them a complete defeat, and took David king of Scotland prisoner. Henry, his son, third lord Percy of Alnwick, attended Edward III. at the famous battle of Crécy in 1346; and married Mary, daughter and heiress of Philip Plantagenet earl of Lancaster, grandson of Henry III. by which marriage he had issue, 1. Henry, his successor, afterwards created earl of Northumberland; 2. Thomas, created by Richard II. in 1397, earl of Worcester; but the title expired with him.

Henry, fourth lord Percy of Alnwick, was intimately connected with John of Gaunt duke of Lancaster; and, together with that prince, countermanded and protected doctor John Wickliffe, the celebrated reformation. In 1377, he was by Edward III. appointed lord marshal of England; and July 16, in the same year, by Richard II. advanced to the title of earl of Northumberland. In the following year he took the castle of Berwick by storm, and was appointed governor of that place, which was restored to the Scots in 1384. The earl having in this interval quarrelled with the duke of Lancaster, judgment of death and loss of estate was pronounced against him at the duke's indignation in parliament for the loss of this fortress, which sentence was remitted by the king. He was appointed, in 1387, lord admiral of England; and, being suspected of disaffection, in 1399 was taken from the Scots in 1384. The earl having in this interval quarrelled with the duke of Lancaster, judgment of death and loss of estate was pronounced against him at the duke's indignation in parliament for the loss of this fortress, which sentence was remitted by the king. He was appointed, in 1387, lord admiral of England; and, being suspected of disaffection, in 1399 was taken from the Scots in 1384. The earl having in this interval quarrelled with the duke of Lancaster, judgment of death and loss of estate was pronounced against him at the duke's indignation in parliament for the loss of this fortress, which sentence was remitted by the king. He was appointed, in 1387, lord admiral of England; and, being suspected of disaffection, in 1399 was taken from the Scots in 1384.
favour by Henry VII. In his office of lord lieutenant of the county of York, he was engaged in levying certain taxes imposed by king Henry; and was seized and murdered by the populace, April 18, 1489.

Henry Algernon, fifth earl of Northumberland, his son, was an eminent protector of literature and the patron of the historian of the reign of Henry VIII. He was engaged in levying certain taxes imposed by king Henry; and was seized and murdered by the populace, April 18, 1489.

Henry Algernon, his son, sixth earl of Northumberland, became a figure in the reign of Henry VIII. He appears to have been the chief supporter of that monarch in the affections of the nobleman there was published, in 1770, a very curious volume, entitled The Regulators and Establishment of His Household; from which it appears, that his manner of living was extremely magnificent. He had issue, 1. Henry Algernon, sixth earl of Northumberland, to whom was intrusted the administration of the affairs of the county, and to whom was intrusted the administration of the affairs of the county.

Algernon, tenth earl of Northumberland, was appointed, March 30, 1677, lord high admiral of England; and about that period had a considerable share in the political deliberations of Charles I. He was commander in chief of the army appointed to march against the Scots in 1679; but soon after had a misunderstanding with the king, respecting the appointment of Richard earl of Warwick to the command of the fleet, who was nominated for that purpose by the parliament, in 1642.

In consequence of this transaction he was removed from the post of lord high admiral; and, refusing to continue in the office at the request of the parliament, the earl of Lanark was by that assembly appointed to succeed him. The earl of Northumberland was several times selected, as a man of moderate principles, to negotiate between the king and the parliament; and was charged, in 1643, by Edmund Waller the celebrated poet, with being concerned in a plot formed at that time for delivering the city of London to the king. He was appointed to the care of the duke of York, and the other royal children, in 1645. After the death of the king, the earl of Northumberland lived chiefly in retirement till the restoration, when he concurred with general Monk in the measures adopted for the restoration of the kingdom. He died November 23, 1662.

Jofceline, eleventh earl of Northumberland, his son, died May 21, 1679, and by his decease the title of earl of Northumberland became extinct; which was soon after conferred by Charles II. upon George Fitzroy, his third son by Barbara duchess of Cleveland. The baronies of Percy, Lucy, Poyning, Fitzpayne, Bryan, and Cowley, were conferred by Charles II. upon George Fitzroy, his third son by Barbara duchess of Cleveland.

Hugh Percy, eighth earl of Northumberland, his brother, having continued loyal to queen Elizabeth, marched against the insurgents, who were commanded by Nevile earl of Westmoreland. But being afterwards suspected of conspiring for the delivery of Mary queen of Scots, he was committed to the Tower, where he put an end to his life, June 21, 1585. His issue, Charles and Jofceline, eldest son and heir, were deprived of the barony of Northumberland and of the title of earl of Northumberland, which became extinct; which was soon after conferred by Charles II. upon George Fitzroy, his third son by Barbara duchess of Cleveland.

Jofceline, who married, first, Henry earl of Ogle, son of Henry second duke of Newcastle; secondly, Thomas Thynne, of Longleat, in the county of Wilts, esquire, who was affiliated; and thirdly, Charles, sixth duke of Somerset, by whom he had issue Algernon seventh duke of Somerset, who was by King George II. created baron Warkworth of Warkworth-castle, and earl of Northumberland, with remainder to Sir Hugh Smythson, of Stanwick, in the county of York, baronet, and Elizabeth his wife, daughter and heir of the duke of Somerset.

Sir Hugh Smythson, who now took upon himself the name of Percy, was descended from a family whose ancestry had been traced to William the Conqueror, and which had formed intermarriages with some of the noblest families in the kingdom. He succeeded to the titles of earl of Warkworth and earl of Northumberland upon the death of his father-in-law, February 7, 1750; and was appointed, April 20, 1760, lord lieutenant of Ireland, which office he resigned in the following year. He was also, by his majesty George III. raised to the dignity of earl Percy and duke of Northumberland, and was constituted December 24, 1778, master of the horse to the king, which office he resigned in December 1780.

He was created January 28, 1774, lord Lovaine of Alnwick, with remainder to Algernon, his second son. By his duchess, who died December 5, 1776, his grace had issue, two sons and one daughter, viz. Hugh, the present duke; Elizabeth-Anne-Frances Percy, born April 6, 1744, and died May 27, 1761, unmarried; and Algernon, the present earl of Beverley. His grace died June 6, 1786, and was succeeded by his eldest son, the present and second duke.

CREATIONS.—Baron Percy, by William the Conqueror, Baron Poyning, 1294; Fitzpayne, 1296; Lucy, 1296; Latimer, 1297; Bryan, 1354; Baron Warkworth, of Warkworth-castle, and Earl of the county of Northumberland, 1749; and Earl Percy, and Duke of Northumberland, 1766.

RESIDENCES.—Sion House, in the county of Middlesex; Alnwick-castle, Warkworth-castle, and Prudhoe-castle, in the county of Northumberland; Stanwick Park, in the county of York; and Warrington-castle, in the county of Cornwall.
The title of Marquis is very ancient; and, according to Hotoman, is derived from the German or Teutonick-originally, "Comes et prefectus limitis." In England, it implied the office of guarding the frontiers of the realm, which were called the marches; i.e., "limits," such were, in particular, the marches of Wales, and of Scotland, while under distinct governments, often hostile to this country. The persons who held these marches were called marchers, or marquisses. Their authority was abolished by statute 27 Henry VIII. c. 27. It was first made a title of honour next in dignity to that of a duke, and immediately preceding that of an earl, by Richard II. in the eighth year of his reign.

PAULET, MARQUIS OF WINCHESTER.

CHARLES INGOLDSBY PAULET, MARQUIS OF WINCHESTER, Earl of Wiltshire, and Baron Saint John, Premier Marquis of England; succeeded his father, George, the late marquis, April 23, 1800; married, July 31, 1800, Anne, second daughter of John Andrews, of Shottery, in the county of Warwick, esq., by which lady he has issue, John, earl of Wiltshire, heir apparent, born June 3, 1801; a son, born August 12, 1803; and another son, born July 7, 1804.

The name of this ancient family has been variously written, Paulet, Pawlet, Poullet, and Pawlet. Herctules, lord of Tournon in Picardy, came into England with Geoffrey Plantagenet earl of Anjou, third son of Henry II. and having, among other estates, the lordship of Paulet in Somercashire, assumed his surname from that place. From Sir John Paulet, in the reign of Richard II. by the eldest son, the present earl of Wiltshire is descended.

Sir William Paulet, the descendant of William, second son of Sir John Paulet, was by Henry VII. advanced to the dignity of a baron by the title of lord Saint John of Baig, and appointed lord great master of the household, and lord president of the council. Upon the accession of Edward VI. being one of the executors of the will of his father, he was farther appointed lord keeper of the great seal. He was three years after created earl of Wiltshire, and in 1554, having resigned his other appointments, was promoted to be lord high treasurer of England, and created marquis of Winchester. It was principally by his counsels, that the duke of Northumberland's design of setting lady Jane Grey upon the throne was prevented. He polished the high office last mentioned for twenty years, and died in the ninety-seventh year of his age; being succeeded as lord high treasurer by William lord Burleigh.

John, fifth marquis of Winchester, was one of those noblemen who adhered to king Charles I., and, having made a garrison of his seat at Baig, endured a siege from August 1643, to October 16, 1645. By the defection of this feat he suffered an immense loss, but he had the satisfaction of living to see the restoration of the royal family, and died March 5, 1674.

Charles, his son, was instrumental in settling the crown of these realms on the prince and princes of Orange, and was by them raised to the title of duke of Bolton. Charles, second duke of Bolton, his son, was by king George I. promoted to be lord chamberlain of the household, which office he retained a very short time, and was twice appointed, April 16, 1717, and May 31, 1719, lord lieutenant of the kingdom of Ireland. He had three sons, Charles and Harry, successively dukes of Bolton, and William, a captain in the royal navy. The name of this ancient family has been variously written, Paulet, Pawlet, Poullet, and Pawlet. Herctules, lord of Tournon in Picardy, came into England with Geoffrey Plantagenet earl of Anjou, third son of Henry II. and having, among other estates, the lordship of Paulet in Somercashire, assumed his surname from that place. From Sir John Paulet, in the reign of Richard II. by the eldest son, the present earl of Wiltshire is descended.

Sir William Paulet, the descendant of William, second son of Sir John Paulet, was by Henry VII. advanced to the dignity of a baron by the title of lord Saint John of Baig, and appointed lord great master of the household, and lord president of the council. Upon the accession of Edward VI. being one of the executors of the will of his father, he was farther appointed lord keeper of the great seal. He was three years after created earl of Wiltshire, and in 1554, having resigned his other appointments, was promoted to be lord high treasurer of England, and created marquis of Winchester. It was principally by his counsels, that the duke of Northumberland's design of setting lady Jane Grey upon the throne was prevented. He polished the high office last mentioned for twenty years, and died in the ninety-seventh year of his age; being succeeded as lord high treasurer by William lord Burleigh.
which illustrious family his posterity have inherited their dignities and estates.

The family of Temple is said to be descended from Leoric earl of Mercia, 11th cent., the eldest son lady Greiwada, reputed to have roved naked through the streets of Coventry in the reign of Edward the Confessor, to obtain from her husband some immunities for that ancient city. Sir William Temple, in the reign of queen Elizabeth, was patronized by Sir Philip Sidney, whom he accompanied as his secretary in his expedition into Flanders, and who expired in his apartment. He afterwards became secretary to Robert Devereux earl of Essex; and, being persecuted by the party who occasioned the fall of that nobleman, he retired into Ireland, and accepted the provostship of Trinity-college, Dublin. His works were published in Latin in 1681, and he died in 1626.

Sir John Temple, his son, was master of the rolls in the kingdom of Ireland in the reigns of Charles I. and II. and he exposed himself to the ill-will of both parties in the civil war by his attachment to moderate measures. He published a history of the rebellion in Ireland, and died in 1679.

He had issue, 1. Sir William Temple, baronet, a person of the most distinguished political and literary reputation. He was the friend of John de Witter, grand pensionary of Holland, and was the most upright and respectable of the counsellors of Charles II. He died in January 1668. 2. Sir John Temple, attorney-general for the kingdom of Ireland, who died March 19, 1704, married Miss Henry, 1722, viscount Palmerston, of the kingdom of Ireland.

Thomas Temple, first cousin to his William, the friend of Sir Philip Sidney, by an elder brother, was created a baronet by James I. May 22, 1611. Sir Richard Temple, his grandson, made a figure in the reign of Charles II. and adhered to the party who promoted the bill of exclusion. He had issue, 1. Richard. 2. Hester, married to Richard Grenville, of Wotton, in the county of Buckingham, esquire. 3. Christiana, married to Sir Thomas Lyttelton, of Hagley, in the county of Leicestershire, baronet, by whom she had issue George Lord Lyttelton, author of the History of Henry II. This family became extinct in Thomas, second Lord Lyttelton, in 1776.

Sir Richard Temple, son of Sir Richard, served under the duke of Marlborough in the wars of queen Anne, and was created by George I. on the 19th of October 1714, Baron Cobham of Cobham in the county of Kent, and five days after constituted envoy extraordinary and plenipotentiary to the emperor of Rome. He was further created, in 1718, viscount and baron Cobham, with remainder to his two sisters. This nobleman is celebrated in a very high strain of panegyric by Mr. Pope, in his Moral Epistles. He died September 13, 1749.

Upon his decease, Hester, the relict of Richard Grenville, esquire, succeeded to his titles, and in the same year was raised to the dignity of countess Temple. She had issue, by Richard Grenville, esquire, 1. Richard, first earl Temple. 2. George, who was appointed treasurer of the navy April 6, 1734. He resigned that office in November 1753; was restored to it in November 1756; and, having resigned it a second time April 6, 1757, was again restored to it June 29, in the same year. He exchanged that appointment May 28, 1761, for the office of one of his majesty's principal secretaries of state; and was, October 6, in the same year, appointed first lord commissioner of the admiralty. He quitted his seat at the board of admiralty April 16, 1763, for the appointments of first lord of the admiralty and chancellor of the exchequer, and under treasurer of the exchequer, which he resigned July 10, 1765. He married Elizabeth, daughter of Sir William Wyndham, of Orchard Wyndham, in the county of Somerset, baronet; by which lady he had issue, George-Nugent, present and first marquis of Buckingham. Thomas, born December 31, 1755; Elizabeth, born October 24, 1759; and married to Charles Earl Stanhope; William Wyndham, born October 25, 1759, who was created a peer of Great Britain by the title of baron Grenville; Hester, born November 23, 1760, and married to Matthew Earl Fortescue; and Catherine, born January 2, 1764, and married to Richard Aldworth Neville, of Billingbear, in the county of Berks, esquire.

3. James, who married Mary, daughter of James Smith, of Harding, in the county of Hertford, esquire; by which lady he had issue James, since created baron Glattonbury, and was commissioned to negotiate with the prince of Orange, and the duke of Brunswic, commander of the forces of the king of Prussia, respecting the defenisons of the republic of the United Provinces. James Grenville, the elder, died September 14, 1783. 4. Henry, who married Margaret, daughter of Joseph Banks, of Revely Abbey, in the county of Lincoln, esquire; by which lady he had issue James, since created baron Glaptonbury, and was commissioned to negotiate with the prince of Orange, and the duke of Brunswic, commander of the forces of the king of Prussia, respecting the defenisons of the republic of the United Provinces. James Grenville, the elder, died September 14, 1783. 5. Hezler, who married William Pitt, first earl of Chatham; and by his present majesty was created baronets Chatham, in the county of Kent. Hezler, countess Temple, grandmother of the present marquis, died October 6, 1752.

Richard, first earl Temple, is best known as the intimate friend and political colleague of William, first earl of Chatham. He was, November 20, 1756, appointed first lord commissioner of the admiralty, which office he resigned in April, 1757. He was farther constituted, June 30, in the same year, lord keeper of the privy seal, and resigned October 9, 1761.

Residences.—Stowe Park, in the county of Buckingham; and Gosfield Park, in the county of Essex.

Arms and Mottos.—See the annexed Engravings.

John-Henry Petty, Marquis of Lansdowne, 1741-1805, was created a peer of Great Britain in 1784.
HERALDRY.

June 26, 1753, to the same titles which had been enjoyed by his maternal uncle.

The family of Fitzmaurice is derived from Other, a rich and powerful lord in the reign of Alfred the Great, who descended from ancestors in the kingdom of Norway. Walter Fitz-Other, in the reign of William the Conqueror, had issue, 1. William, surnamed Windfor, ancestor to the present earl of Plymouth. 2. Gerald, who commanded with success against the Welsh, and who married Neilis, sister to Griffith, prince of South Wales; by whom he had issue three sons, William, Maurice, and David, who was appointed bishop of St. David's, 1147, and died about the year 1175. William and Maurice were among the principal persons who went out in the expedition of Richard the Lion-heart. William, 1st earl of Pembroke, was appointed in 1176, by King Henry II. for the conquest of Ireland. Maurice, lord Kerry, his descendant, having a dispute with Dermot Macarthy, commonly called Prince of Desmond, killed him upon the bench before the judge, but not put to death; and the family honours were restored to his son. Edmund, 1st marquis; and William, who died January 5, 1717, had issue, John, the present marquis; and William, who died January 27, 1718; the marquis married, secondly, July 19, 1779, Louisa Fitzpatrick, daughter of John, first earl of Fitzmaurice, and lady of the office of chancellor of the exchequer, born July 2, 1759; and Louisa, who died young. The marquis was appointed in 1766, and 1782, one of his majesty's principal secretaries of state, and in 1782, first commissioner of the treasury, and dying May 7, 1805, was succeeded by his eldest son, John, the present and second marquis.

CREATIONS.—Baron and viscount, October 7, 1752; Earl of Shelburne, June 6, 1753; Baron Wycombe, May 17, 1760; Viscount Calne, Earl of Wycombe, and Marquis of Landlowne, November 30, 1784.

RESIDENCES.—Bow Wood, near Calne, in the county of Wilts; and Wycombe, in the county of Buckingham;—also Kennington, in the county of Gloucester.

ARMORIAL BEARINGS.—See the annexed Engraving. MOTTO.—Virtute, non viris. —"By courage, not by men."

GOWER, MARQUIS OF STAFFORD.

GEORGE GRANVILLE-LEVESON GOWER, MARQUIS OF STAFFORD, Earl Gower, Viscount Trentham, Baron Gower, of Stittenham, Knight of the Garter, Lord Lieutenant of Sutherlandshire, Recorder of Stafford; born January 9, 1758; succeeded his father, Granville, the late marquis, October 26, 1803; married, September 4, 1785, Elizabeth, countess of Sutherland, and baroness of Strathnaver; and had issue, 1. George-Granville, earl Gower, heir apparent, born August 8, 1786. 2. Charlotte, born June 8, 1788. 3. William, born June 4, 1792, and died in 1793. 4. Elizabeth, born November 8, 1798. 5. Francis, born January 1, 1800. 6. Henry, born June 16, 1802. 7. William-John, born in 1823; died in 1844.

The family of Gower has by some antiquaries been supposed to have descended from Sir Alan Gower, lord of Stittenham in the county of York, and sheriff of that county at the time of the Norman conquest. But the first perfon, unquestionably of this family, who distinguished himself, was Lawrence Gower of the county of York, who, in the reign of Edward II. together with Thomas Plantagenet earl of Lancaster, and others, obtained the king's pardon for being concerned in the fray with Piers Gavetton. Thomas Gower, his great-grandson, signalized himself in the wars of Henry V. and Henry VI., and was governor of the castle of Mains. Sir John Gower, brother and heir to this Thomas, engaged in the party of the house of Lancaster in the civil wars; and, being taken prisoner at the battle of Tewkesbury, May 4, 1471, was treacherously beheaded by Edward IV.

Thomas, his grandson, served under the duke of Somerset, lord protector, at the battle of Pinkney; and, from the exasperation of his conduct, exposed himself to the being taken prisoner by the Scots. Thomas, his grandson, was created a baronet by James I. June 1, 1620, and his family adhered to the party of king Charles in the ensuing civil wars.

Sir John Leveson Gower, fifth baronet, was by queen Anne created baron Gower of Stittenham, and constituted chancellor of the duchy of Lancaster, which office he held from the year 1752 to the year 1790. He died September
September 16, 1709. John, second lord Gower, his son, was July 13, 1742, appointed lord keeper of the privy seal, which office he held religiously in the following year. He was again appointed lord keeper of the privy seal, December 26, 1744. He married first Evelyn, daughter of Evelyn Pierpont duke of Kingston: by which lady, who died June 27, 1727, he had issue, two sons who died young. 3. Granville-levenson, marquis, of St. Albans. He married, first, July 1744 to John Fitzpatrick, first earl of Upper Ossory; and, secondly, to Richard Vernon, of Hilton in the county of Stafford, esquire.

Granville-Leveson, first marquis and second earl, succeeded his father, John, the late earl, December 25, 1754; married, first, in 1754, Elizabeth, daughter of Nicholas Pakerley esq. and by her, who died May 19, 1745, had issue, John, born May 14, 1745, and died the same day; and, secondly, March 28, 1758, he married lady Louisa Egerton, daughter of Sceope duke of Bridgewater, by lady Rachel Ruffell, daughter of the duke of Bedford; and by her, who died March 14, 1770, had issue, Louisa, born 1749; married, December 25, 1777, to Sir Archibald Malcolm, knight, by whom she has issue. 2. Caroline, born November 2, 1753; married March 22, 1770, Frederic earl of Carlisle, and has issue. 3. George-Granville, present marquis. 4. Anne, born February 22, 1761; married, February 1784, the most reverend Dr. Edward Vernon, archbishop of York. The marquis married, thirdly, May 23, 1768, Susan Stewart, daughter of Alexander earl of Galloway; and by her, who died in August 1805, had issue, Georgiana-Augusta, born April 13, 1769; married the honourable William Eliot, brother to lord Eliot: Charlotte-Sophia, born January 11, 1771, married May 26, 1794, Henry-Charles duke of Beaufort, and has issue. Susan, born in 1772, married, July 1795, Dudley lord Harrowby, and has issue. Granville-Leveson, born October 12, 1773. The marquis died October 26, 1803, and was succeeded by his eldest son, George-Granville, the present and second marquis.

CREATIONS.—Baron Gower, of Stittenham, in Yorkshire, October 7, 1603; Sir Thomas Townshend, of Lory, joint plenipotentiary to treat of a peace with the Republic of the United Provinces, March 7, 1710, and the office of captain of the yeomen of the guard June 13, in the same year. By George I. he was constituted, September 17, 1724, one of his majesty's principal secretaries of state; and, having resigned that office, was declared, January 23, 1737, lord lieutenant of the kingdom of Ireland. This office was held by him only three months; and he was appointed June 11, 1729, lord president of the council, which post he exchanged February 19, 1721, for that of one of the principal secretaries of state, and continued in that situation till May 15, 1730. He died in June 1738.

This nobleman had issue, 1. Charles, third viscount Townshend. 2. Thomas, who married Albina, daughter of colonel John Selwyn of Matton in the county of Suffolk; by which lady he had issue Thomas lord Sydney of Cliffeheury; Mary; and Henry, who was killed in Germany June 24, 1756. Thomas, their father, died May 21, 1780. 3. William, who married Henrietta, grand-daughter of Charles first duke of Bolton; by which lady he had issue, Charles, who married August 29, 1777, Arabella Powlet; by which lady he has issue, William, born September 26, 1783, and another son, born February 25, 1786. 4. Gertrude, married to John Selwyn of Matton in the county of Norfolk. 5. Arabella, born May 21, 1780. 6. Sarah, born February 25, 1786. 7. Elizabeth, born September 26, 1783, and another son, born February 25, 1786.

TOWNSEND, MARQUIS TOWNSEND.

GEORGE-TOWNSEND FERRARS, MARQUIS OF TOWNSEND, Earl of Leicester, Vifcount Townshend, Baron Townshend of Lynn, Baron de Ferrars of Chartley, Baron Bourchier, Loxley, Baffet, Compton, and a Baronet, a Trustee of the British Museum, L.L.D. P.S.A. and F.R.S. succeeded his father, the late marquis, September 12, 1807; born April 15, 1783; marquis, September 12, 1773; and a nobleman of the most exalted rank. He was afterwards appointed rear-admiral of the white squadron, and died August 9, 1762. 5. Edward, dean of St. Asaph, was February 23, 1786. William Townsend, in the county of Stafford, baronet; by which lady he had issue, Arabella, born May 21, 1780. 6. William, who married Henrietta, grand-daughter of Charles first duke of Bolton; by which lady he had issue, Charles, who married August 29, 1777, Arabella Powlet; by which lady he has issue, William, born September 26, 1783, and another son, born February 25, 1786. 4. Gertrude, married to John Selwyn of Matton in the county of Norfolk. 5. Arabella, born May 21, 1780. 6. Sarah, born February 25, 1786. 7. Elizabeth, born September 26, 1783, and another son, born February 25, 1786.
Charles, third lord viscount Townshend, married Audrey, daughter and heiress of Edward Harrison, of Balls, in the county of Hertford, esquire, governor of Fort Saint George in the East Indies, by which lady he had issue George, first marquis Townshend; and Charles, who was appointed, March 24, 1761, to the office of secretary at war. He was also constituted, June 8, 1765, paymaster general of his majesty's forces; and was further promoted, August 2, 1766, to be one of the lords commissioners of the board of treasury, and chancellor of the exchequer, under-treasurer of his majesty's exchequer. He was pothecary of extraordinary abilities and admirable eloquence, and was considered as one of the first political characters of his time. He married Caroline, daughter of John duke of Argyle and Greenwich, and widow of Francis earl of Dalkeith, son of Francis second duke of Buccleugh in the kingdom of Scotland; which lady was afterwards created baroness of Greenwich, with remainder to her male issue. He died September 4, 1767.

3. Roger, a lieutenant colonel in the army, who was killed at the siege of Ticonderoga in North America, July 25, 1759.

4. Audrey, married to Roger Orme, was killed at the siege of Ticonderoga in North America, July 25, 1759.

2. Audrey, married to Roger Orme, was killed at the siege of Ticonderoga in North America, July 25, 1759, leaving issue. His lordship served under George II. at the battle of Dettingen; he was in the battle of Fontenoy, for Flanders; and La Fède; also at the memorable siege of Quebec, which surrendered into his hands, as commander in chief after the death of the immortal Wolfe. His lordship was also at the battle of Fellinghaufen, and served a campaign in Portugal, under the celebrated general count la Líppé; he served the offices of lieutenant-general and major-general of his forces, and filled the station of lord lieutenant of Ireland for five years. He married first, December 1751, Charlotte, baroness de Ferrars, sole daughter of James Compton earl of Northampton, by Elizabeth baroness de Ferrars, and by her, who died September 14, 1770, had issue, 1. George, the present marquis. 2. Charlotte, died March 12, 1750. 3. John, born January 19, 1757, married to Georgiana-Anne Poyntz, daughter of William Poyntz, esq. 4. Frances, who died young. 5. Frederic-Patrick, born January 19, 1757, married to Georgiana-Anne Poyntz, esq. 6. John, who died May 29, 1777.

6. Elizabeth, married, May 7, 1790, lieutenant-general William Loftus, colonel of the 24th regiment of dragoons, general of ordnance, and was created baron Cecil of Cranbourn; and William, who died in 1740; and three daughters: Anne, married to William Strode, esq. Catharine, married to John, second earl of Egmont; and Margaret, who died in March 1735. His lordship died October 9, 1748, was succeeded by James, fifth earl of Salisbury, born October 20, 1713, married May 4, 1735, Elizabeth, eldest daughter of Edward Keet, of Hertfordshire, by whom he had issue, James, the present earl of Salisbury, born October 29, 1745, married May 4, 1765, to whent their majesties and the crown, he was successively created baron Cecil, vicount Cranbourn, and earl of Salisbury. From the death of queen Elizabeth he was sole secretary of state; in 1608 he was raised to the dignity of lord high treasurer of England; and died May 24, 1612. He has been considered as a statesman of consummate ability, and was the last survivor of the great ministers of queen Elizabeth.

James, third earl of Salisbury, his great grandson, was one of the zealous supporters of the bill for excluding the duke of York from succeeding to the throne of Great Britain. He had issue, 1. James, fourth earl of Salisbury. 2. Charles, elected bishop of Bristol in the year 1732, and translated to the see of Bangor in 1734. He died May 29, 1737.

James, the fifth earl, succeeded his father in 1694. He married Anne, second daughter of Thomas, sixth earl of Thanet; and had issue by her, James vicount Cranbourn; and William, who died in 1740; and three daughters: Anne, married to William Strode, esq. Catharine, married to John, second earl of Egmont; and Margaret, who died in March 1735. His lordship died October 9, 1748, was succeeded by James, sixth earl of Salisbury, born October 20, 1713, married May 4, 1735, Elizabeth, eldest daughter of Edward Keet, of Hertfordshire, by whom he had issue, James, the present earl of Salisbury, born October 29, 1745, married May 4, 1765, and Marquis of Salisbury, August 10, 1789.

Residences. Hatfield in the county of Hertford; and Cranbourn Lodge, in the county of Dorset.

Townhouse, Arlington-street.

Armorial Bearings. See the annexed Engraving.

Motto.—Scrib, scribo.—"Late but seriously."

THYNNE, MARQUIS OF BATH.

THOMAS THYNNE, MARQUIS OF BATH, VICOUNT WEMYSS, BARON THYNNE OF WARMINSTER, and a Baronet; born January 25, 1765; succeeded his father, Thomas, the first marquis, November 19, 1756; married, April 24, 1794, Isabella Byng, daughter of vicount Torrington; by which lady he has issue, Elizabeth, born February 27, 1795; vicount Wemyss, heir apparent, born April 17, 1795; Mary Elizabeth, born May 24, 1797; John, born November 7, 1798; Louisa, born March 25, 1804; and a son, born October 17, 1803.

Thomas, second vicount Wemyss, was son of Henry-Frederic, the first vicount's younger brother, by Mary, daughter of Edward earl of Jersey, who married Elizabeth,
Eliza:abeth, eldest daughter of Lionel duke of Dorset; who dying June 20, 1739, he married secondly Louisa, daughter of John Earl Granville; by whom he had issue Thomas, the eldest marquis; Henry-Frederic, born November 17, 1735, who was heir, by will, to his father Thomas, the first marquis; Henry-Frederic, born March 29, 1743, James, born December 19, 1736, and died March 19, 1741. His lordship died January 12, 1751, and was succeeded by his son Thomas, the present marquis, and had issue: Thomas, the present eldest daughter of William, second duke of Portland, born October 11, 1768; George, born January 23, 1770, married in July 1805, to George, earl of Aberdeen. His lordship married secondly, lady Cecil, his cousin, to George 1st, son of Lord Abercorn, his grandfather, and Privy Councillor in Scotland, Vizcount and Baron of Strabane, and Baron of Mount Carbery, in Ireland, and Privy Councillor in Scotland; Vizcount Hamilton, heir apparent, born October 7, 1786; James II. in his expedition into Ireland in 1689, in which he lost his life.

Elizabeth, eldest daughter of Lionel duke of Dorset, who dying June 20, 1739, he married secondly Louisa, daughter of John Earl Granville; by whom he had issue Thomas, the eldest marquis; Henry-Frederic, born November 17, 1735, who was heir, by will, to his father Thomas, the first marquis; Henry-Frederic, born March 29, 1743, James, born December 19, 1736, and died March 19, 1741. His lordship died January 12, 1751, and was succeeded by his son Thomas, the present marquis, and had issue: Thomas, the present eldest daughter of William, second duke of Portland, born October 11, 1768; George, born January 23, 1770, married in July 1805, to George, earl of Aberdeen. His lordship married secondly, lady Cecil, his cousin, to George 1st, son of Lord Abercorn, his grandfather, and Privy Councillor in Scotland, Vizcount and Baron of Strabane, and Baron of Mount Carbery, in Ireland, and Privy Councillor in Scotland; Vizcount Hamilton, heir apparent, born October 7, 1786; James II. in his expedition into Ireland in 1689, in which he lost his life.

Elizabeth, eldest daughter of Lionel duke of Dorset, who dying June 20, 1739, he married secondly Louisa, daughter of John Earl Granville; by whom he had issue Thomas, the eldest marquis; Henry-Frederic, born November 17, 1735, who was heir, by will, to his father Thomas, the first marquis; Henry-Frederic, born March 29, 1743, James, born December 19, 1736, and died March 19, 1741. His lordship died January 12, 1751, and was succeeded by his son Thomas, the present marquis, and had issue: Thomas, the present eldest daughter of William, second duke of Portland, born October 11, 1768; George, born January 23, 1770, married in July 1805, to George, earl of Aberdeen. His lordship married secondly, lady Cecil, his cousin, to George 1st, son of Lord Abercorn, his grandfather, and Privy Councillor in Scotland, Vizcount and Baron of Strabane, and Baron of Mount Carbery, in Ireland, and Privy Councillor in Scotland; Vizcount Hamilton, heir apparent, born October 7, 1786; James II. in his expedition into Ireland in 1689, in which he lost his life.

Elizabeth, eldest daughter of Lionel duke of Dorset, who dying June 20, 1739, he married secondly Louisa, daughter of John Earl Granville; by whom he had issue Thomas, the eldest marquis; Henry-Frederic, born November 17, 1735, who was heir, by will, to his father Thomas, the first marquis; Henry-Frederic, born March 29, 1743, James, born December 19, 1736, and died March 19, 1741. His lordship died January 12, 1751, and was succeeded by his son Thomas, the present marquis, and had issue: Thomas, the present eldest daughter of William, second duke of Portland, born October 11, 1768; George, born January 23, 1770, married in July 1805, to George, earl of Aberdeen. His lordship married secondly, lady Cecil, his cousin, to George 1st, son of Lord Abercorn, his grandfather, and Privy Councillor in Scotland, Vizcount and Baron of Strabane, and Baron of Mount Carbery, in Ireland, and Privy Councillor in Scotland; Vizcount Hamilton, heir apparent, born October 7, 1786; James II. in his expedition into Ireland in 1689, in which he lost his life.

Elizabeth, eldest daughter of Lionel duke of Dorset, who dying June 20, 1739, he married secondly Louisa, daughter of John Earl Granville; by whom he had issue Thomas, the eldest marquis; Henry-Frederic, born November 17, 1735, who was heir, by will, to his father Thomas, the first marquis; Henry-Frederic, born March 29, 1743, James, born December 19, 1736, and died March 19, 1741. His lordship died January 12, 1751, and was succeeded by his son Thomas, the present marquis, and had issue: Thomas, the present eldest daughter of William, second duke of Portland, born October 11, 1768; George, born January 23, 1770, married in July 1805, to George, earl of Aberdeen. His lordship married secondly, lady Cecil, his cousin, to George 1st, son of Lord Abercorn, his grandfather, and Privy Councillor in Scotland, Vizcount and Baron of Strabane, and Baron of Mount Carbery, in Ireland, and Privy Councillor in Scotland; Vizcount Hamilton, heir apparent, born October 7, 1786; James II. in his expedition into Ireland in 1689, in which he lost his life.

Elizabeth, eldest daughter of Lionel duke of Dorset, who dying June 20, 1739, he married secondly Louisa, daughter of John Earl Granville; by whom he had issue Thomas, the eldest marquis; Henry-Frederic, born November 17, 1735, who was heir, by will, to his father Thomas, the first marquis; Henry-Frederic, born March 29, 1743, James, born December 19, 1736, and died March 19, 1741. His lordship died January 12, 1751, and was succeeded by his son Thomas, the present marquis, and had issue: Thomas, the present eldest daughter of William, second duke of Portland, born October 11, 1768; George, born January 23, 1770, married in July 1805, to George, earl of Aberdeen. His lordship married secondly, lady Cecil, his cousin, to George 1st, son of Lord Abercorn, his grandfather, and Privy Councillor in Scotland, Vizcount and Baron of Strabane, and Baron of Mount Carbery, in Ireland, and Privy Councillor in Scotland; Vizcount Hamilton, heir apparent, born October 7, 1786; James II. in his expedition into Ireland in 1689, in which he lost his life.
The family of Cornwallis is descended from Thomas Cornwallis, a younger brother born in Ireland, from which kingdom the surname is derived; who, having nestled in England, was chosen sheriff of London in the reign of Richard II., in 1378. Sir John Cornwallis, in the reign of Henry VIII., served under the earl high admiral; and distinguished himself in the form of Morlaix in Bretagne. He was six years steward of the household to Edward prince of Wales, afterwards Edward VI., and died April 23, 1544. Thomas, his son, was instrumental in securing the crown to queen Mary, and exerted himself in the suppression of Wyatt's rebellion. He was appointed, December 25, 1557, controller of her majesty's household, but was deprived of his employment on the accession of queen Elizabeth. He had issue, 1. William, who served under Robert Devereux earl of Essex in the wars of Ireland. 2. Charles, who was appointed ambassador from James I. to the court of Madrid, and constituted, in 1660, treasurer of the household to Henry prince of Wales, son of James I. He wrote an account of the Life and Death of that prince; and William, his son, also distinguished himself as an author, and published a volume of essays on several subjects.

The family of William son of Thomas, was in the train of Charles I. when prince of Wales, in his journey into Spain in 1623. He was created a baronet May 4, 1627, and distinguished himself amongst the royal party at the battle of Cropredy Bridge, June 30, 1644. He followed Charles II. in his exile, and was created by King James, upon his restoration, baron Cornwallis of Eye in the county of Suffolk. He died January 31, 1662.

Charles, third lord Cornwallis, his grandson, was by William, appointed first lord commissioner of the admiralty, which office he resigned in April 1663. He died April 29, 1678. Charles, fourth lord Cornwallis, this son, fe., and in several campaigns under king William III., appointed April 6, 1715, joint post-master general, which office he exchanged April 8, 1724, for that of paymaster general of his majesty's forces. He had issue, 1. Charles, fifth lord Cornwallis. 2. John, who married Sarah, daughter of the reverend Hugh Dale; by which lady he had issue, Sarah, married to the reverend Walter Earle. He died June 9, 1765. 3. Edward, who served with considerable reputation at the battle of Fontenoy, May 11, 1745, and at the battle of Culloden, April 27, 1746. He was constituted in March 1765, governor of Gibraltar; and died January 14, 1776. 4. Frederic, who embraced the profession of the church, was constituted, February 18, 1730, lord bishop of Litchfield and Coventry; died August 13, 1758, to the metropolitan see of Canterbury. He married February 8, 1759, Caroline, grand-daughter of Charles second lord viscount Townshend, and died March 19, 1783. Lord Cornwallis died January 19, 1722.

Charles, fifth lord Cornwallis, was constituted, May 13, 1740, constable of the Tower of London, and lord lieutenant and custos rotulorum of the Tower Hamlets, and by George II. was created viscount Brome, and earl Cornwallis. He married Elizabeth, daughter of Charles third lord viscount Townshend; by which lady he had issue, 1. Charles, second earl Cornwallis. 2. James, who embraced the profession of the church, and was elected, in July 1781, lord bishop of Litchfield and Coventry. 3. William, appointed April 20, 1765, captain of the royal navy. 4. Elizabeth. 5. Charlotte. 6. Mary, married to Samuel Whitbread, of Cardington, in the county of Bedford, esquire. She died December 17, 1720. The earl, dying on June 21, 1722, by his son, Charles, the second earl, a general in the army, colonel of the 33rd regiment of foot, constable of the Tower of London, and governor-general of Bengal; born December 31, 1738, married, July 24, 1768, to
Jemima-Tnllikin, daughter of James Jones, esq. and had issue by her (who died February 14, 1779) Charles, province of Benares, in Hindooftan, October 5, 1805, was earl, in consideration of his great services and abilities, England, second marquis.

Marquis, August 10, 1768, Alicia, daughter of the late viscount Windfor; born February 12, 1748; succeeded his father, Francis, marquis and earl of Hertford, with remainder, for want of male issue, to his brother; and in 1791, he was advanced to the dignity of marquis of Hertford and earl of Yarmouth. He was born in 1719; married, May 29, 1741, Isabella Fitzroy, youngest daughter of Charles, second duke of Grafton; and by her, who died November 10, 1783, had issue the present marquis.

Anne, married, February 10, 1755, John Harris, esq. and died in 1774, leaving issue, Francis, lord Conway, who died in Ireland, February 3, 1712, and was succeeded by his son Francis, the first marquis, who, August 3, 1730, was created viccount Beauchamp, and earl of Hertford, with remainder, to his son.

The family of Conway is descended from the dukes of St Albans, who married Henry, young Henry Conway, lord Beauchamp, and earl of Hertford, with remainder, to his brother; and in 1791, he was advanced to the dignity of marquis of Hertford and earl of Yarmouth.

The family of Conway is descended from the dukes of St Albans, who married Henry, young Henry Conway, lord Beauchamp, and earl of Hertford, with remainder, to his brother; and in 1791, he was advanced to the dignity of marquis of Hertford and earl of Yarmouth.

FRANCIS - INGRAM - SEYMOUR CONWAY, MARQUIS OF HERTFORD.

The family of Conway is descended from the dukes of St Albans, who married Henry, young Henry Conway, lord Beauchamp, and earl of Hertford, with remainder, to his brother; and in 1791, he was advanced to the dignity of marquis of Hertford and earl of Yarmouth.

FRANCIS-INGRAM-SEYMOUR CONWAY, MARQUIS AND EARL OF HERTFORD, EARL OF YARMOUTH, VICOUNT BEAUCHAMP, LORD CONWAY, BARON CONWAY OF KILLULTAGH IN IRELAND; born November 8, 1748, married, June 14, 1767, John Damer, eldest son of the first earl of Devonshire, and was left his widow, in 1788. Charlotte, born July 22, and died in September 1775. Anne, married, March 10, 1755, John Harris, esq. and died in 1774, leaving issue, Francis, lord Conway, who died in Ireland, February 3, 1712, and was succeeded by his son Francis, the first marquis, who, August 3, 1730, was created viccount Beauchamp, and earl of Hertford, with remainder, to his son.

The family of Conway is descended from the dukes of St Albans, who married Henry, young Henry Conway, lord Beauchamp, and earl of Hertford, with remainder, to his brother; and in 1791, he was advanced to the dignity of marquis of Hertford and earl of Yarmouth.

By faith and love. —Motto.

FRANCIS-INGRAM-SEYMOUR CONWAY, MARQUIS OF HERTFORD.
June 30, 1744; succeeded his father, John, the late earl, March 25, 1792; married, November 12, 1765, Charlotte Jane, eldest daughter and coheiress of Herbert Crichton, viscount Drumlanrig, by whom she died January 28, 1805, aged 57, and left issue, John, the second viscount Drumlanrig, and Mary, eldest daughter, born September 25, 1793, and left issue, Henry, the third viscount Drumlanrig, and Mary, born September 28, 1795, and left issue, Maria, the fourth viscount Drumlanrig.

Henry, born in 1777; married, May 7, 1773, Anne, daughter of Evelyn, first duke of Kingston, who died January 28, 1773, and had two sons, John, born in 1773, and William, born in 1775. William was second earl of Exeter, and married, April 11, 1793, Elizabeth, daughter of John, second Duke of Argyle, and by her, who died January 28, 1773, had two sons, John, born in 1773, and William, born in 1775. William, the second earl of Exeter, died May 7, 1773, and succeeded by his eldest son, John, the third earl, who succeeded his father, dying April 9, 1722, unmarried. John, the third earl, died May 17, 1782; married, April 19, 1778, Anne, daughter of James, lord Ouston, and by her, who was Anne, the eldest daughter, born August 23, 1769; married, March 25, 1789, and left issue, Charlotte, born March 25, 1801; and John, born August 29, 1783, in the navy.

William, born in March 1755, D.D., lord archbishop of Armagh, and primate of all Ireland; married, May 3, 1776, Miss Penn, daughter of Thomas Penn, Esq., late proprietor of Pennsylvania, and has issue. Mary, married, in September 1791, James, first earl of Lonsdale, born February 1, 1750, to George, late earl Macartney. Anne, married, July 2, 1764, to Hugh, now duke of Northumberland, which marriage was dissolved by act of parliament, in 1773. Augusta, married, July 30, 1772, Captain Andrew Corbett, and died February 5, 1778. Caroline, married, December 1, 1777, to John Dawson, first earl of Portland, and has issue.

Creations.—Baron Mount Stuart, and Earl of Bute, April 11, 1793. Baron Mount Stuart in England, April 3, 1764. Baron Cardiff, of Cardiff Castle, in Glamorganshire, May 22, 1766. Viscount Mountjoy, of the Isle of Wight; Earl of Windfor, and Marquis of Bute, in North Britain, July 20, 1796.

Residences.—Mount Stuart, in the Isle of Bute; Luton House, Bedfordshire; and Cardiff Castle, Glamorganshire. Town-house, South Audley Street.

Arms.—See the annexed Engravings.

Motto.—_A faca est vo_ _—He furflaghes through his ancestors_.

Cecil, Marquis of Exeter.

Brownlow Cecil, Marquis and Earl of Exeter, and Baron of Burleigh, joint hereditary Grand Almoner to the King; born July 2, 1793; succeeded his father, who succeeded by his eldest son, born January 11, 1803.

James, second earl, succeeded in 1790; he married Anne, daughter of Archibald, earl of Argyle; and by her, who died January 28, 1773, had two sons, John, and James, and four daughters, Mary, who married to Sir Robert Menzies, of Wem, bart, and died in 1773; Anne, who married to James Ruthven, third lord Ruthven; Jane, who married to William Courtenay, esq. and sister, to the countess of Guildford and Arundel.

By his second marriage, he had issue, John, born April 8, 1773; — and two daughters—these two sons were both created earls in one day, by James 1, May 4, 1605; Robert, the youngest, being created earl of Salisbury; and Thomas, the elder, earl of Exeter; who succeeded to his father's honours, and from whom descended John, the sixth earl, who, in 1700, succeeded his father, and married, first, Annabella, daughter of the late earl, late viscount Lonsdale, and second, Elizabeth, daughter and co-heir to Sir John Brownlow, who died November 28, 1723, he had five sons, and a daughter, Elizabeth, married to William, born in 1701; Francis, born in 1703; Charles, born in 1705; the three youngest, died unmarried; and the eldest, who, on December 21, 1721, succeeded his father, dying April 9, 1722, unmarried, Brownlow, his next brother, became heir, and eighth earl of Exeter, who married, in July 1724, Hannah Sophia, daughter and heir of Thomas Chambers, esq. by whom he had three sons and three daughters: Brownlow, the ninth earl; Margaret Sophia, who died in February 1738, unmarried. Thomas Chambers, born June 25, 1728; died August 14, 1778, having married Charlotte Gariner, by whom he had an only son, Henry, the first marquis. David, died January 13, 1736—Elizabeth, born July 12, 1739; married, May 22, 1757, John Chaplin, esq. by whom she has issue, Anne, born in June 1734, and died April 8, 1785. Brownlow, the eighth earl, died November 3, 1756, when he was succeeded by his son, the ninth earl, who was born September
September 25, 1725; and married, July 2d, 1719, Letitia, sole daughter and heir of Horatio, son of the first Viscount Talbot. Her ladyship died on April 17, 1756, without issue; and his lordship died December 26, 1793, when he was succeeded by his nephew, Henry, tenth earl, who was advanced to the dignity of a marquis in 1801. Born March 14, 1754; married, first, May 23, 1776, Emma, sole daughter and heir of Thomas Verdon, esq., and died an infant, and the marriage was dissolved by act of parliament in 1779. The marquis married, secondly, Miss Sarah Hoggins, by whom (who died January 16, 1797) he had issue Sophia, born February 4, 1792; Brownlow, the present marquis; and Thomas, born January 1, 1797.

His family is (said to have resided in England is of Saxon origin, and appears to have been, among that people, applied only to the descendants of the royal line. The title is now used to designate the third class of our nobility, which occupies the place between Marquesses and Viscounts. Anciently, however, this dignity was given with a power of jurisdiction over a county, or some other extensive district, with immunities arising therefrom; but since the declension of the feudal system, in the reign of Charles II., the title is often founded on a single city or town, or even upon the place of residence of the person so ennobled.

TALBOT, EARL OF SHREWSBURY.

CHARLES TALBOT, EARL OF SHREWSBURY, Baron Talbot, Strange of Blackmore, Furnival, Verdon, Lovetot, Giffard of Brimsfield, Comyn of Badenaghe, Valence and Munchetis, in the kingdom of Great Britain; Earl of Wexford and Waterford, and Baron Talbot in Ireland. This nobleman was born March 18, 1505; succeeding the rebellion of his father to secure him for better times. His titles, which lie discharged with great honour and humanity, in the wars of our kings Henry V. and VI. during their conflicts in France. In 1428 he was appointed general of the English army in that country, and was taken prisoner by the admirable Joan of Arc, at the battle of Patay, in April 1429. A few years after this event, he was created earl of Shrewsbury, and in 1446, was re-appointed lord lieutenant of Ireland, in which office he continued for three years, and about the same time was created earl of Wexford and Waterford in that kingdom. The English power being greatly reduced in France, this nobleman was once more sollicited, in the eightieth year of his age, to take upon him the command in that country: but, immediately after, advancing to the relief of Châlillon, he was killed before that town, July 20, 1433. The great earl of Shrewsbury had issue, 1. John, second earl of Shrewsbury; 2. Henry, third earl of Shrewsbury; 3. Thomas, born January 1, 1797; and died October 23, 1355. Richard, his grandson, had issue, 1. Gilbert, eighth earl of Shrewsbury, 2. John, 3. Francis, fifth earl of Shrewsbury, his son, commanded an army which marched against the Scots in 1544 and 1549. He died September 21, 1560. George, sixth earl of Shrewsbury, his son, had the custody of Mary queen of Scots in 1562; and was continued in that employment, which he discharged with great honour and humanity, till 1584. He was appointed lord high steward for the disgraceful trial of Thomas duke of Norfolk, January 16, 1572; and, after the unmerited execution of that nobleman, was constituted earl marshal of England. He died November 18, 1593. Gilbert, seventh earl of Shrewsbury, his son, was, in 1596, appointed by Queen Elizabeth ambassador to the court of France; and died May 8, 1616. He was succeeded by his brother Edward, eighth earl of Shrewsbury; upon whose death, February 8, 1618, the title reverted to the title of Sir Gilbert Talbot, of Graf ton, in the county of Worcester, knight, younger son of John second earl of Shrewsbury; which title Sir Gilbert had been ancestor of the Talbots; it was granted to the king on the death of Henry VII. Sir John Talbot, his son, had issue, 1. John, father of George ninth earl of Shrewsbury; and of John, father of John tenth earl of Shrewsbury. a. Sherington, ancestor to the present earl Talbot.
John, tenth earl of Shrewsbury, had issue, 1. Francis, eleventh earl of Shrewsbury, who married Anna Maria, daughter to Robert second earl of Cardigan; by which lady he had issue, Charles, duke of Shrewsbury; and John, who was killed in a duel by Henry first duke of Bedford, who was killed fighting for Charles I. at the battle of Marston Moor, July 2, 1644.

2. Gilbert. 3. Bruno, appointed chancellor of the exchequer in the kingdom of Ireland.

Charles, twelfth earl and afterwards duke of Shrewsbury, engaged so strongly in the opposition to James II. that he went over to the prince of Orange, and made him an offer of his purse and his life. He was cousin, Charlotte Margaret, and John, who was killed in a duel by Henry first duke of Hamilton; by which lady, who died March 14, 1707, he had issue, 1. Edward, lord Stanley, heir apparent, born April 27, 1735; married, June 30, 1758, his cousin, Margaret Horby, second daughter of the reverend Geoery Horby, and has issue: 1. Edward Geoery, born March 29, 1799; 2. Henry Thomas, born March 9, 1803; 3. Charlotte Elizabeth, born July 11, 1801; 4. Emily Lucy, died November 2, 1845; 5. Louisa Emily, born June 1, 1805; 6. Charlotte, born October 17, 1776; and died November 25, 1795, having married, August 22, 1795, Edmund Horby, esq., son of the above-named reverend Geoery Horby, 3. Elizabeth Henrietta, married, January 15, 1795, Thomas Cole, esq. son of major Thomas Rea Cole, of Twickenham, Middlesex, by Isabella, daughter of Sir Henry Ibbitson, bart. His lordship married, secondly, May 1, 1797, the lady Rutland, and had issue: 1. Mary Elizabeth, born March 1, 1799; 2. Henry James, born March 9, 1800; Mary Margareta, born March 23, 1801.

The family of Stanley is descended from that of Audley, of whom Nicholas de Audley was created a baron by Edward I. January 28, 1226, by the title of lord Audley of Heleigh in the county of Stafford. The title became extinct July 25, 1391. Henry de Audley, the descendant of a younger branch, assumed the name of Stanley in the reign of king John, from a manor of that name in the county of Derby. John, seventh in descent from William de Audley, the descendant of a younger branch, assumed the name of Stanley in the reign of Henry II. and was re-appointed to the latter of these offices upon the accession of Henry IV. He was also steward of the household to that monarch, and was constituted by Henry V. lord lieutenant of Ireland; and lord chamberlain of the household; three offices of the highest trust, which had never before been placed in the hands of one person. The appointment of lord chamberlain was continued to him by George I. but he resignd it in 1715, and died February 1, 1718. Upon his decease the titles of duke of Shrewsbury and marquis of Alton became extinct; but the earldom descended, first, to Gilbert, thirteenth earl, who married Mary, daughter of Sir George Mostyn of Talbot, of the house of Blackmere in the county of Salop, Furnival, Verdon, Lovetot, Giffard, Comyn, Vale, and Muncinphy, by various intermarriages. Earl of Shrewsbury, May 20, 1642.

Residences.—2. 1. Exeter in the county of Middlesex; 2. West, in the county of Stafford; and Heythorpe near Woodstock in the county of Oxford.

Town-house, Stanhope-street.
the title of lord Strange of Knockyn. 2. Edward, who was principally instrumental in gaining the victory for the English at the battle of Flodden Field, September 9, 1515; and as a reward for his services, was, by Henry VIII., created a baron by the title of lord Montague. William, the fourth in descent from Edward, was the lord Strange of Knockyn, who, on the 22nd of August, 1540, in consequence of which the confecution of the powder treason was discovered. The title became extinct in 1565. Lord Stanley married, secondly, Margaret, daughter and heir of John Beaufort duke of Somerset, and relict of Edmund Tudor earl of Richmond, mother to Henry VII., and foundress of Christ's College, Cambridge. Lord John's Grandfather, lord Stanley, by the connection which he had thus formed, was suspected by King Richard to favour the pretensions of Henry VII. and was obliged to deliver into his custody George George Lord Strange, his son, as a hostage of his fidelity. Richard had given orders that lord Strange should be beheaded previous to the battle of Bosworth; but was induced by some of his counsellors to defer the execution till the event of the engagement should be known. It was lord Stanley who placed the crown on the head of Henry after the battle; and he was in the same year raised to the dignity by the earl, by the title of earl of Derby. He died in 1504.

Edward, third earl of Derby, his great grandson, distinguished himself by his loyalty to Charles I. and II. and in 1649 he rejected with indignation the overtures of Oliver Cromwell, offering him his own terms, if he would deliver up the ill of Man, of which he was governor. In an encounter near Wigan in Lancashire, August 26, 1642, where with six hundred horse he maintained a fight of two hours against three thousand horse and foot of the enemy, he received seven musquet-shot on his breast-plate, thirteen blows of a sword upon his helmet, and five or six wounds, and had also two horses killed under him. He was taken prisoner at the battle of Worcester, September 3, 1651; and, being condemned by a council of war, was beheaded at Bolton in Lancashire, October 15, in the same year. He married Charlotte, daughter to Claude de la Tremouille duke of Thouars, and peer of France; which marriage he had to own the surname of Stanhope. By this lady he had issue, Elizabeth, born 1748, and married to Thomas Horton, esq. Lucy, born 1750, and married to Jeffrey Harby, of Preston in the county of Lancaster, esquire; Edward Smith Stanley, present and twelfth earl of Derby; and Harriet, born 1756, married to Sir Watts Horton of Chaderton in the county of Lancaster, baronet. Lord Strange died June 4, 1771. 2. Elizabeth, married to Sir Peter Warburton of Harley Hall, in the county of Chester, baronet. She died September 2, 1780. 3. Mary, born in January 1717. 4. Jane, born in April, 1715. Charlotte, married to the late general Burgoyne. She died June 9, 1776. Edward the eleventh earl, died February 22, 1776, and was succeeded by his nephew, the twelfth and present earl.

CREATIONS.—Baron Stanley of Latham in the county of Lancaster, January 20, 1456. Earl of Derby, October 27, 1455.

RESIDENCES.—Knowleley Park, and Bickerstaff in the county of Lancaster; and the Oakes, in Surrey.—Town-hous, Grovenor-square.

ARMORIAL BEARINGS.—See the annexed Engraving. Of bearings intended to record memorable circumstances, perhaps none can be offered more truly affecting, than the crest of the earl of Derby. It consists of a chapeau gules, turned up ermine, an eagle, with wings expanded or, feeding an infant, in its nest, all proper. The origin of this crest is thus recorded: It was borne by the family of Latham, of Lancaster, knights, now represented by the Stanleys, who married Isabel, their heir, about the close of the fourteenth century. It is said to have been assumed on account of one of their ancestors having exposed an illegitimate infant son in an eagle's nest, in an oak tree, in the park of Latham, and the eagle's nurturing and feeding him, instead of destroying him; from which extraordinary circumstance, which was taken from the Heil again by his father, and adopted as his heir. MOTTO.—Sans changer. "Without changing."

HERBERT, EARL OF PEMBROKE.

GEORGE HERBERT, EARL OF PEMBROKE and Montgomery, Baron Herbert of Cardiff, and Baron Herbert of Shurland, Lord Lieutenant of Carmarthenshire, and A.D.C. to the King, Rotulorum of the county of Wilts, a Lieutenant General in the Army, Colonel of the 6th Regiment of Dragoons, High Steward of Salisbury, Visitor of Jesus College, Oxford, and a Vice President of the Welsh Charity and Veterinary College; born September 11, 1759; succeeded his father, Henry, January 26, 1794; married, April 8, 1787, his cousin, Elizabeth, second daughter of Topham Beaucler, only son of Sidney Beaucler, fifth son of Charles, first Duke of St. Alban's, by whom he had issue: George, born March 31, 1788, and died July 5, 1793; Diana, born February 5, 1790; Robert Henry, born September 19, 1791; Charles Herbert, born March 9, 1793; and his lady died the 25th of the same month. His lordship married, secondly, in February 1808, the Russian countess Woronzow. The family of Pembroke has its pedigree from Herbert,
Heraldry.

Armorial Bearings.—See the annexed Engraving.

Motto.—Un je furious: "One will I serve."

HOWARD, EARL OF SUFFOLK:

JOHN HOWARD, EARL OF SUFFOLK AND BERKSHIRE, VISCOUNT ANDOVER, AND BARON HOWARD, OF CHARLETON: A general in the army, colonel of the 70th regiment of infantry, and governor of London-derry and cultivate forts; born March 7, 1739; succeeded the late earl, February 23, 1783; married, July 2, 1774, Julia, daughter of John Gaskarth, of Penrith, in the county of Cumberland, esq. by whom he has issue, Charles-Nevisiou, vicount Andover, born May 13, 1775, married June 23, 1796, Milis Cokie, daughter of Thomas-William Cooke, esq. of Holkham Hall, in Norfolk, and who was unfortunately killed, while mounting his horse, by the accidental discharge of his bowing piece, January 11, 1800, without issue; Thomas, born August 18, 1776, now vicount Andover, and heir apparent, married, October 20, 1804, the honourable Elizabeth Jane Dutton, eldest daughter of James lord and earl of Shrewsbury, and earl of Montgomery, May 4, 1804.

Residences.—Wilts., town-haus, conduit-street.

HERALDRY.

Humphrey Herbert, second baron Herbert of Chepstow and guest to lady Jane Grey; secondly, having the title of Pembroke for that of Huntingdon, July 4, 1479, king Edward IV. being desirous to confer the title of earl of Pembroke upon the accession of Charles I. and succeeded his father, died March 16, 1570.

Henry,第九 earl of Pembroke, was appointed, in 1575, in the family of Somerfet duke of Beaufort. His father, died March 3, 1757, and earl Thomas, January 22, 1733.

Mary, was appointed, June 20, 1796, lord, chamberlain of the house of George II. and married, August 18, 1776, now viscount Andover, apd heir apparent, married, October 20, 1804, the honourable Elizabeth Jane Dutton, eldest daughter of James lord and earl of Shrewsbury, and earl of Montgomery, May 4, 1804.

Residences.—Wilts., town-haus, conduit-street.

Thomas, eighth earl of Pembroke, his great grandson, was, in 1689, appointed ambassador extraordinary to the United Provinces; January 20, 1690, first lord commissioner of the admiralty; and March 21, 1691, lord keeper of the privy seal. He was first plenipotentiary in the court of Great Britain for negotiating the peace of Ryfwick; and in 1699, was constituted lord president of the council. Having resigned that employment, he was, April 4, 1701, again nominated first lord commissioner of the admiralty, and January 26 in the following year declared lord high admiral of England, which office he resigned in favor of prince Charles of Denmark in May 1705. In 1707 he was appointed lord lieutenant of Ireland, and, upon his return from that country, was again constituted, November 25, 1708, lord high admiral of Great Britain, which office he resigned in November 1709. This nobleman has been deservedly celebrated for his knowledge in the science of antiquities, and for the admirable and most valuable collection of them made by him at his seat at Wilton. He had issue, 1. Mary, was appointed, June 20, 1796, lord, chamberlain of the house of George II. and married, August 18, 1776, now viscount Andover, and heir apparent, married, October 20, 1804, the honourable Elizabeth Jane Dutton, eldest daughter of James lord and earl of Shrewsbury, and earl of Montgomery, May 4, 1804.

Residences.—Wilts., town-haus, conduit-street.

Thomas, earl of Pembroke, was, in 1689, appointed ambassador extraordinary to the United Provinces; January 20, 1690, first lord commissioner of the admiralty; and March 21, 1691, lord keeper of the privy seal. He was first plenipotentiary in the court of Great Britain for negotiating the peace of Ryfwick; and in 1699, was constituted lord president of the council. Having resigned that employment, he was, April 4, 1701, again nominated first lord commissioner of the admiralty, and January 26 in the following year declared lord high admiral of England, which office he resigned in favor of prince Charles of Denmark in May 1705. In 1707 he was appointed lord lieutenant of Ireland, and, upon his return from that country, was again constituted, November 25, 1708, lord high admiral of Great Britain, which office he resigned in November 1709. This nobleman has been deservedly celebrated for his knowledge in the science of antiquities, and for the admirable and most valuable collection of them made by him at his seat at Wilton. He had issue, 1. Mary, was appointed, June 20, 1796, lord, chamberlain of the house of George II. and married, August 18, 1776, now viscount Andover, and heir apparent, married, October 20, 1804, the honourable Elizabeth Jane Dutton, eldest daughter of James lord and earl of Shrewsbury, and earl of Montgomery, May 4, 1804.

Residences.—Wilts., town-haus, conduit-street.

Thomas, earl of Pembroke, was, in 1689, appointed ambassador extraordinary to the United Provinces; January 20, 1690, first lord commissioner of the admiralty; and March 21, 1691, lord keeper of the privy seal. He was first plenipotentiary in the court of Great Britain for negotiating the peace of Ryfwick; and in 1699, was constituted lord president of the council. Having resigned that employment, he was, April 4, 1701, again nominated first lord commissioner of the admiralty, and January 26 in the following year declared lord high admiral of England, which office he resigned in favor of prince Charles of Denmark in May 1705. In 1707 he was appointed lord lieutenant of Ireland, and, upon his return from that country, was again constituted, November 25, 1708, lord high admiral of Great Britain, which office he resigned in November 1709. This nobleman has been deservedly celebrated for his knowledge in the science of antiquities, and for the admirable and most valuable collection of them made by him at his seat at Wilton. He had issue, 1. Mary, was appointed, June 20, 1796, lord, chamberlain of the house of George II. and married, August 18, 1776, now viscount Andover, and heir apparent, married, October 20, 1804, the honourable Elizabeth Jane Dutton, eldest daughter of James lord and earl of Shrewsbury, and earl of Montgomery, May 4, 1804.

In 1707 he was appointed lord lieutenant of Ireland, and, upon his return from that country, was again constituted, November 25, 1708, lord high admiral of Great Britain, which office he resigned in November 1709. This nobleman has been deservedly celebrated for his knowledge in the science of antiquities, and for the admirable and most valuable collection of them made by him at his seat at Wilton. He had issue, 1. Mary, was appointed, June 20, 1796, lord, chamberlain of the house of George II. and married, August 18, 1776, now viscount Andover, and heir apparent, married, October 20, 1804, the honourable Elizabeth Jane Dutton, eldest daughter of James lord and earl of Shrewsbury, and earl of Montgomery, May 4, 1804.
Thomas, fourth duke of Norfolk, by his second wife, Margaret, daughter and heiress of Thomas, lord Audley of Walden in the county of Essex, and lord high-chancellor of England. Having entered into the service, he greatly distinguished himself in the memorable engagement of the Spanish armada in 1588. He also commanded a squadron of ships designed to attack the Spanish coast in 1595, with which he engaged the third squadron of the fleet which failed against Cadiz in 1597. On his return he was created a baron, by the title of lord Howard of Walden. Soon after the accession of James I., he was created earl of Suffolk, and appointed lord chamberlain of the household; and, having received the title, he was, June 16, 1603, lord high-treasurer of England. He had issue, 1. Theophilus, second earl of Suffolk, whose son, James, third earl of Suffolk, dying without issue male, the title of earl of Suffolk, who died two days after he was born. Henry, sixth earl of Suffolk, grandson of Theophilus, was by queen Anne created, during the life-time of his father Henry, fifth earl of Suffolk, baron of Chelverford in Essex, and earl of Blindon in the county of Dorset. He was appointed, July 14, 1717, first lord commissioner of trade and plantations, and died September 12, 1718. Upon the death of his son Charles-William, seventh earl of Suffolk, without issue, the titles of earl of Blindon and baron of Chelverford became extinct.

Thomas, second son of Thomas, first earl of Suffolk, was by James I., created baron Howard of Charlton, and viscount Andover; and by Charles I. was advanced to the dignity of earl of Berkshire. Soon after the commencement of the civil war he was taken prisoner by the parliamentary forces, and committed to the Tower. Upon his release, in 1643, he was appointed preceptor to Charles prince of Wales, afterwards Charles II. and, when the prince was persuaded to go into France, the earl was recalled to his native, and died July 16, 1669. He had issue, 1. Charles, fourth earl of Berkshire; 2. Thomas, third earl of Berkshire; 3. William, whole grandson, Henry Bowes, became fourth earl of Berkshire, and eleventh earl of Suffolk. 4. Philip, fifth earl of Suffolk, married the celebrated English poet John Dryden.

Henry Bowes, eleventh earl of Suffolk, had issue, 1. William, lord viscount Andover, who married Mary, daughter of Heneggs, second earl of Aylesford, by which lady he had issue, Henry, twelfth earl of Suffolk; Catharine, born July 6, 1741; and Frances, born February 27, 1747, and married to Richard, son of Sir Walter Waghorn, fourth baron of Birtiffe, in the county of Stafford, baronet, and brother to William lord Bagot. He died July 19, 1756. 2. Thomas, fourteenth earl of Suffolk, who married Elizabeth, daughter of William Kingicote, of Kingicote in the county of Gloucester, esquire, by which lady he had issue, Diana, married November 23, 1782, to John Selden, of Rye, in the county of Sussex, gentleman. Henry, twelfth earl of Suffolk, was, January 12, 1771, appointed lord keeper of the privy seal; and, having resigned that office, was, June 22 in the same year, constituted one of his majesty's principal secretaries of state. He married August 14, 1777, Charlotte, daughter and third earl of Aylsham, by which lady he had issue a posthumous son, Henry, twelfth earl of Suffolk, who died two days after he was born. Henry, twelfth earl, died March 6, 1779. Thomas, fourteenth earl, and fourth son of Henry Bowes, fourth earl of Suffolk, died without issue.

Philip, youngest son of Thomas, first earl of Berkshire, had issue, 1. James, whose daughter Martha-Maria married Charles, son of John, first earl of Bridfol. 2. Charles, who had issue Philip, who married Margaret, daughter and heiress of Francis Screven, of Edinburgh, in 1782; and died February 27, 1782.

The family of Egerton derived their surname from the manor of Egerton, in the county of Cheshire, and inhabited in the female line the lordships of Robert Fitzhugh, baron of Malpas, in the reign of William the Conqueror. The earl of Cholmondeley is descended in a collateral line from the same stock.

Thomas Egerton, in the reign of queen Elizabeth, was constituted her majesty's solicitor general, and April 10, 1594, promoted to the office of master of the rolls. He was appointed, May 6, 1596, lord keeper of the great seal. He appears to have acted with considerable tenderness towards the unfortunate Robert Devereux, earl of Essex. By James I., he was created baron Eglisfer; and about the same time, July 24, 1603, constituted lord high chancellor of England. He presided at the trial of Carr earl of Sornolest; and, having resigned the great seal, was farther advanced to the dignity of a viscount, by the title of viscount Brackley. He died March 15, 1617. The king had farther proposed to confer upon lord chancellor Egerton the dignity of an earl; but, his lordship dying previously to the making out of the patent, the title of earl of Bridgewater was conferred upon his son. This John, first earl of Bridgewater, was the patron of the celebrated Milton, and the marquis of Comus was originally performed by his children. He adhered to the cause of Charles I., and died December 4, 1649.

John, third earl of Bridgewater, his grandson, voted for conferring the crown upon the prince and princes of Orange. By king William he was constituted, May 31, 1708, bishop of Worth, for executing the office of lord high admiral of England. He had issue, 1. Samuel, bishop of Rochester; 2. Henry, who was appointed February 2, 1724, lord bishop of Hereford, and died April 11, 1726.

The bishop of Hereford was father of John, who, in 1726, was consecrated lord bishop of Bangor; October 15, 1734, translated to Litchfield and Coventry; and in June 1731, farther translated to the see of Durham. He married Sophia, daughter of Henry Grey, duke of Kent; by which lady he had issue, John, a lieutenant-colonel in the army, born August 29, 1749; in the years, May 14, 1783, by his daughter of Samuel Haynes, esquire; Francis; and Amelina. He married, April 24, 1579, a lady of the gallery of Bute, and died July 4, 1789. The bishop of Durham married, secondly, April 1782, the daughter of Sir Edward Boughton, of Lawford-hall, in
in the county of Warwick, baronet, and died January 14, 1786. The earl of Bridgwater died March 19, 1701. Scroop, fourth earl of Bridgwater, was in the reign of queen Anne constituted master of the horse to prince George of Denmark, and upon the accession of George 1.

1786. The earl of Bridgwater died March 19, 1701. in the county of Warwick, baronet, and died January 14, queen Anne constituted master of the horse to prince Brackley and duke of Bridgwater. He married Rachel, daughter to Wriothetey, (second duke of Bedford, and died) January 11, 1745, leaving issue, Charles, born July 27, 1755, and died young; John, second duke of Bridgwater, who died unmarried; Francis, third and last duke of Bridgwater, who dying without issue male, in 1803, the dukedom became extinct, and the earldom defcended to John-William, the present earl, son of John, late bishop of Durham. —The heir preempive is Francis-Henry Egerton, in holy orders, prebendary of Durham, only brother to the earl.

CREATIONS.—Baron Eelfinere, July 17, 1603; Vifcount Brackley, November 7, 1616; and Earl of Bridgwater, May 17, 1617.

RESIDENCES.—Park-house, in the county of York; Abridge-park, in the county of Buckingham; and Birch-hall, in the county of Salop.—Town-houfe, Grosvenor-house, London. —The heir preemptive is John, third and last duke of Bridgwater, May 17, 1617.

Motto.—"Thus until."

COMPTON, EARL OF NORTHAMPTON.

CHARLES COMPTON, EARL OF NORTHAMPTON, Lord Lieutenant and Ciftus Rotulorum of the county, and Recorder of the town of Northampton; born March 21, 1760; succeeded his father, the late earl, April 7, 1796; married, August 18, 1787, Mary, eldest daughter of Juliana Smith, of Earl Stoke-park, in Wiltshire, &c. by whom he has issue, Spencer, born June 8, and died June 23, 1788; Spencer-Juliana Alwyne, lord Compton, and heir apparent, born January 2, 1790; Smith, born December 7, and died December 18, 1790; Frances-Elizabeth, born December 20, 1791.

The family of Compton is descended from a Saxon chief named Turchill, who was of considerable consequence in the reign of Edward the Confessor; and was earl of Warwick, the fifth in descent from the celebrated Guy earl of Warwick, who flourished in the close of the ninth century. Of the, the son of Turchill, assumed the surname of Compton. William, his descendent, was a great favourite with Henry VIII., being the companion of that monarch in most of his tournaments, and in the tour of chivalry. In the year 1523, he was constituted lord high chancellor of Ireland for life. He died June 30, 1528. Henry, his grandson, was by queen Elizabeth created baron Compton of Compton, in the county of Warwick. William, second lord Compton, his son, was by James I. created earl of Northampton, and died June 24, 1530.

Spencer, second earl of Northampton, his son, distinguished himself by many brilliant actions in the service of Charles I. Being sent to the relief of the town of Staford, and having accomplished that object, he with a thousand men engaged more than two thousand of the enemy in the battle of Hopton-heath, March 19, 1643. The enemy was defeated; but, the royalists being too eager in the pursuit, the earl of Northampton was surrounded. He retiuated the quarter which was offered him, having given it as his opinion, "that, if he outlived these wars, he was certain never to have to noble a death." His five elder sons also distinguished themselves in the same cause, particularly in Charles, his second son, who was proposed to Caroline princess of Wales. By that prince he was created marquis of Brackley and duke of Bridgwater. He married Rachel, daughter to Wriothesley, second duke of Bedford, and died January 11, 1745, leaving issue, Charles, born July 27, 1755, and died young; John, second duke of Bridgwater, who died unmarried; Francis, third and last duke of Bridgwater, who dying without issue male, in 1803, the dukedom became extinct, and the earldom descedned to John-William, the present earl, son of John, late bishop of Durham. —The heir preemptive is Francis-Henry Egerton, in holy orders, prebendary of Durham, only brother to the earl.

1786. The earl of Bridgwater died March 19, 1701. in the county of Warwick, baronet, and died January 14, queen Anne constituted master of the horse to prince Brackley and duke of Bridgwater. MOTTO.—Je ne cherche qu’un.—“I seek but one.”

FIELDING, EARL OF DENBIGH.

BASIL PERCY FIELDING, EARL OF DENBIGH.

Vicount Fielding, Baron Fielding, of Newham Pad- 

don and St. Liz, Earl of Desmond, Vicount Callan, and 

Baron Fielding, of Leecache, in Ireland, also Count 

of the Roman Empire; born March 25, 1596; succeeded 

his grandfather, Basil, the late earl, July 14, 1800. 

The family of Fielding deduces its pedigree from the 

counts of Hapburg, being the same origin as that of the 

illustrious house of Austria, which formerly occupied 

the sovereignties of Spain, and the German empire. 

Rodolph, count of Hapburg, was elected emperor of 

Germany in 1273; and Geoffrey, also claiming the 

titles of count of Hapburg, Lautenbourg, and Rhiinfel- 

den, being oppressed by the great power of Rodolph, 

died into England in the reign of Henry III. William, 

the fourth in descent from Geoffrey, attached himself to 

the house of Lancaster, and was killed in the battle of 

Tewkesbury, May 4, 1471. He married Agnes, daugh- 

ter and heir of John Saint Liz, a branch of the noble 

family of Saint Liz, earls of Northampton and Hunting- 

don. William of his first marriage, had issue, 

sister to George Villiers, first duke of Buckingham. 

By James I. he was raised to the dignity of a baron and a 

count, and two years after was created earl of Den- 

bigh. He commanded with success in several naval ex- 

pitions; and, upon the breaking out of the civil war, 

engaged in the interest of Charles I. He was mortally 

wounded in a skirmish between the royalists and parlia- 

dementarians near Birmingham, and died April 8, 1643. 

He left issue, 1. Basil, second earl of Denbigh. 2. George. 

He married, married, to Lewis Boyle, viscount Boyle, 

of Kinalmealcy in Ireland, and created, in 1660, coun- 

ter and heir. 

3. Elizabeth, married to Lewis Boyle, viscount Boyle, 

of Kinalmealcy in Ireland, and created, in 1660, coun- 

3. Elizabeth, married to Lewis Boyle, vicount Boyle, 

of Kinalmealcy in Ireland, and created, in 1660, coun- 

ter and heir. 

He married. 

By James I. he was raised to the dignity of a baron and a 

count, and two years after was created earl of Den- 

bigh. He commanded with success in several naval ex- 

pitions; and, upon the breaking out of the civil war, 

engaged in the interest of Charles I. He was mortally 

wounded in a skirmish between the royalists and parlia- 

dementarians near Birmingham, and died April 8, 1643. 

He left issue, 1. Basil, second earl of Denbigh. 2. George. 

He married, married, to Lewis Boyle, vicount Boyle, 

of Kinalmealcy in Ireland, and created, in 1660, coun- 

ter and heir. 

3. Elizabeth, married to Lewis Boyle, viscount Boyle, 

of Kinalmealcy in Ireland, and created, in 1660, coun- 

ter and heir. 

Basil, second earl of Denbigh, was with his uncle the 

duke of Buckingham at the time of his alia(Tination; 

and the duke having received notice of a design upon 

his life, this nobleman, then vicount Fielding, request- 
ped permission to disguise himself in such a manner as 

that he might be mistaken for his uncle. Upon this 

conclusion the civil war, which was the tide of the parlia- 

ment, and he and his father fought in the two 

opposite armies at the battle of Edgehill, October 

23, 1642. Having concurred in the restoration, he was 

by Charles I. created baron Saint Liz, and died 

November 28, 1675. 

George, second son of William, first earl of Denbigh, 

was by James I. created baron Fielding of Leecache, 

vicount Callan and earl of Desmond, in the kingdom 

of Ireland; and had issue, 1. William, second earl of 

Desmond, and third earl of Denbigh. 2. John, who 

had issue, Edmund, a lieutenant general in the army, 

and father of Henry, the celebrated author of Tom 

Jones. 

Basil, fourth earl of Denbigh, son of William, third 

card, had issue, 1. William, fifth earl of Denbigh, who 

married Isabella, daughter of Peter de Jonghe of the 

province of Utrecht, in Holland; by which lady, who 

died May 5, 1762, he had issue, Basil, the fifth earl, 

who died unmarried. His lordship married, secondly, 

July 21, 1783, Sarah, relieffor of Sir Charles Halford, bart. 

and, dying July 14, 1800, was succeeded by his grand- 

son, Basil-Percy, the present earl. 

Creation.—Basil-Percy Fielding, of Newham Pad- 

don, in the county of Warwick, and Vicount Fielding, 

December 30, 1620. Earl of Denbigh, September 14, 1622. 

Baron Saint Liz, February 2, 1684. 

RESIDENCES.—Newham Pad donn, in the county of Warwick. 

Town-houfe, South-street. 

ARMOIRIAL BEARINGS.—See the annexed Engraving. 

MOTTO.—Credif sub ponderes virtut. —“Virtue en- 

creaffeth by opprobrium.”

FANE, EARL OF WESTMORELAND.

JOHN FANE, EARL OF WESTMORELAND, 

and Baron Burgherth, Knight of the Garter, Lord Keeper 

of the Privy Seal, and Recorder of Lyne Regis; born 

January 1, 1759; succeeded his father, John, the late 

earl, April 26, 1774; married, May 20, 1783, Sarah-

Anne, jole heir of Robert Child, esq., of Olderley-park, 

in Middlesex; by whom, who died November 9, 1793, 

he had issue, 1. John, lord Burgherth, heir apparent, 

born February 3, 1784; Sarah-Sophia, born May 28, 

married, May 23, 1804, vicount Villiers, earl of Jersey; 

Augusta, born March 17, 1786, married, June 20, 1804, 

John, lord Borriington; Maria, born May 11, 1787, 

married, November 16, 1805, John vicount Duncon- 

sford; and, fourth son of Frederic Ponsonby, earl of Ber- 

borough, by lady Henrietta, daughter of John, the 

first earl of Spencer; and Charlotte, born August 25, 1793. 

His lordship married, secondly, in March, 1806, Miss 

Saunders, daughter of Huck Saunders, M. D. and has 

issue, Jane-Georgiana, born January 25, 1801; and Charles-

Saunders-John, born May 8, 1803. 

The family of Fane, originally written Vane, has been 

trailed higher than the time of William the Conqueror. 

Henry Vane, in the reign of Edward III. was knighted 

for his valiant behaviour at the battle of Poictiers, Sep- 

tember 19, 1356. John, his great grand-son, had issue, 

Richard, ancestor to the earls of Westmoreland; and 

John, ancestor to the earls of Darlington. Thomas, 

grandson of Richard, married Mary, daughter and 

heir of Henry lord Abergavenny, who, upon the 

death of her father, inherited the barony of Le Desper- 

cer. Francis, the eldest son of this marriage, was by 

James I. created baron Burgherth and earl of West- 

moreland, and had issue, 1. Mildmay, second earl of West- 

moreland, who, upon the breaking out of the civil war, 

supported the cause of Charles I. 2. Francis. 

Vere, fourth earl of Westmoreland, grandson of Mild-

may, had issue, 1. Vere, fifth earl of Westmoreland, 

2. Thomas, sixth earl of Westmoreland, who was con- 

stituted, May 19, 1719, first lord commissioner of trade 

and plantations, which office he resigned in May, 1733, 

and died June 4, 1736. 3. John, seventh earl of West- 

moreland, who distinguished himself in the wars of John 

duke of Marlborough; and was created, October 4, 

1735, lord Catherlough, in the kingdom of Ireland. He 

was elected chancellor of the university of Oxford, Ju-

ly 1737, and died August 26, 1765. Upon his death 

the Irish title became extinct; the barony of Le Despe- 

encer descended to Sir Francis Daffwood, of Wilt 

Wycombe, in the county of Buckingham, baronet; and 

the titles of baron Burgherth and earl of Westmoreland, 

devolved upon Thomas, great-grandson of Francis, 

younger son of Francis, fifth earl of Westmoreland. 

He married, 1735, lady Montague, daughter of Philip, 

third earl of Manchester, and by her had two sons, 

father of Henry, whose son Thomas became eighth earl 

of Westmoreland. 2. Henry, father of Charles, created 

October 19, 1714, baron of Longhaire vicount Fane, of the kingdom of Ireland; which titles are ex- 

ting. 

Thomas, eighth earl of Westmoreland, married the 

doughter of William Swymmer, esq. of Britoll, and by 

her
his had two sons and two daughters, viz. John, the elder, who succeeded him; Henry, married, January 12, 1778, to Miss Barford, and died June 4, 1802, leaving issue, of which his eldest daughter married, September 26, 1782, Colonel Mitchell, of Dawlish, in the county of Devon; Anne, died in 1764; Mary, married to Charles Blair, esq. and had issue, Henry, born in 1768, and died in the West Indies 1794; Charles-Nerry, and Mary. His James, died November 12, 1775, and was succeeded by his eldest son, John, ninth earl, who married, March 26, 1752, Augusta, daughter of Montague Berrie, son of Robert, first duke of Ancaster, by whom lady, who died January 3, 1766, he had issue, John, the present earl; Thomas, one of the grooms of the bed-chamber to the king; born July 6, 1760; married, July 27, 1789, Miss Lowe, by whom he had a son, born April 27, 1793; and a son born July 2, 1793; Augusta, born September 18, 1761, married, in July, 1781, William earl of Lonsdale, by whom she had issue. His lordship married, secondly, May 28, 1767, lady Susan Gordon, daughter of Colman-George, third duke of Gordon, by whom he had Henry, born April 14, 1771, died March 6, 1774; Susan, born October 3, 1778; married, July 20, 1778, John Drummond, esq. and died in August 1773; Elizabeth, born January 7, 1773, married, September 4, 1790, John Lowther, esq. brother to the earl of Lonsdale; Mary, born September 19, 1772, married January 16, 1794, George Fulder, esq. His lordship died April 26, 1774, and was succeeded by his eldest child, John, the present, and tenth earl.

Creations.—Baron Burghersh, and earl of Welfmoreland, December 29, 1624.

Residences.—Apethorpe, in the county of Northampton; Brompton, in the county of Somerset; and Chalrton, Yorkshire. — Townhouse, Grosvenor-square.

Armorial Bearings.—See the annexed Engraving.

Motto.—Ne vile fano.—"Diligence not the altar."

Mordaunt, Earl of Peterborough.

Charles-Henry Mordaunt, Earl of Peterborough and Monmouth, Viscount Mordaunt of Avalon, Baron Mordaunt of Turvey, and of Ryegate; born May 11, 1758; and succeeded to the title upon the death of his father, August 1, 1779.

The family of Mordaunt came over to England with William the Conqueror. Sir John Mordaunt, in the reign of Henry VII. was chancellor of the duchy and county palatine of Lancaster; and John, his son, had issue, 1. Frances, born in 1602, married, in July, 1781, William earl of Peterborough, and had issue, 1. Charles-Henry, the present and fifth earl of Peterborough; and 2. Henry, who married, first, Mary, daughter of John Cox, of the city of London, esq. by which lady he had issue, Francis, born in 1736, married to the reverend Samuel Bulkeley, of Hatfield, in the county of Hertford; and Anna-Diana Grace. The earl of Peterborough married, secondly, Robinianna, daughter of colonel Brown, by which lady he had issue Henry Charles, the present and fifth earl of Peterborough.

Creations.—Baron Mordaunt, of Turvey, in the county of Northampton, April 4, 1623. Earl of Peterborough, in the county of Northampton, March 4, 1628. Baron Mordaunt of Ryegate, in the county of Surrey, and Viscount Mordaunt of Avalon, in the county of Somerset, July 10, 1659. Earl of the county of Monmouth, April 9, 1669.

Residences.—Apethorpe, in the county of Northampton; and a castle destined for that country. Immediately upon his arrival in Spain, he commenced with success the siege of Barcelona, and the governor proposed to surrender. Pending the negotiation, his German allies forced the gates on one side of the town, and began a general pillage. Lord Peterborough, informed of this circumstance, desired to be admitted at the opposite gate; and, having received a guard out of the German forces to the former station, and completed the terms of surrender. In the following year, the French, headed by Philip V. in person, endeavoured to retake Barcelona; but lord Peterborough obliged them to raise the siege, and retreat with so much precipitation, as to leave their ammunition, their provisions, and their sick and wounded men, in his hands; the latter of whom, from a knowledge of his character, were recommended by marestial de Telle, the French general, to the earl of Peterborough's clemency. He conquered Catalonia, Valencia, and Arragon, with part of Murcia and Castile; crowned Charles III. in his metropolis; and, with an army of ten thousand men, drove out king Philip, and the French army, amounting to twenty-five thousand. He was, however, called home in the midst of his victories; and in 1710 his conduct was made a subject of parliamentary animadversion, the refult of which was a vote of thanks for his many great and eminent services. This nobleman was, principally trusted by the prince of Orange, afterwards William III. He landed at Torbay with that prince at his metropolis; and, with an army of ten thousand men, drove out king Philip, and the French army, amounting to twenty-five thousand. He was, however, called home in the midst of his victories; and in 1710 his conduct was made a subject of parliamentary animadversion, the refult of which was a vote of thanks for his many great and eminent services. This nobleman was, principally trusted by the prince of Orange, afterwards William III. He landed at Torbay with that prince at

GREY, EARL OF STAMFORD.

GEORGE-HARRY GREY, EARL OF STAMFORD, Baron Grey of Groby, Baron Bonville and Harrington, Baron Delamer of Dunham-Maiffe, and Earl of Warrington; Lord Lieutenant and Custos Rotulorum of the county of Chester, and President of the Humane Society; born October 1, 1737; succeeded to the title upon the death of his father in 1768; and married, May 28, 1766, Henrietta Greville, daughter of William, second duke of Portland; by which lady he has issue, 1. Henrietta, born April 19, 1764; and married October 28, 1785, to sir John Chester, wode, of Oakley, in the county of Stafford, baronet.

2. George-Harry, lord Grey, heir apparent, born October 31, 1766; married, December 23, 1797, Henrietta-Charlotte-Elizabeth Charteris, eldest daughter of Francis lord Elcho, son of the earl of Wemyss, and has issue, Henrietta-Charlotte, born September 13, 1798; Maria, December 17, 1800; George-Harry, born April 5, 1802; Maria, born November 2, 1807, and died the same month; Maria, born June 30, 1794; married, May 20, 1794, to Edward Grey, esq. who had issue, Edward, by whom she has issue, 1. Louise, born May 8, 1771. 2. William-Booth, born September 10, 1773; married, April 7, 1802, Miss Price, eldest daughter of Thomas Price, of Diffryny, in Glamorganshire, efq. 3. Archibald, born December 16, 1774.

The family of Grey was originally of Normandy, and ancestor to Arlotta, mother of William the Conqueror. Sir John de Grey was also appointed in the year 1200, chief justice of England; and, having resigned that office, he was chosen archbishop of Canterbury, upon the recommendation of John, but the pope, incensed at this interference, prevailed to have Stephen Langton chosen to the archiepiscopal see, and was the origin of the great conflict between King John and pope Innocent III in which the pope was finally victorious.

John de Grey was also appointed, in the year 1200, chief justice of England; and, having resigned that office, was constituted, August 13, 1210, lord deputy of Ireland, where he governed with singular wisdom and success, and was created, December 31, 1260, earl of Dorset, and Leonard, created January 1, 1536, viscount Garney, of the kingdom of Ireland. The marquis of Dorset died April 16, 1507. Thomas, second marquis of Dorset, was created earl of Huntingdon, and April 18, 1475, marquis of Dorset. He married Cicely, daughter and heir of William Bonville lord Bonville and Harrington; by which lady, who introduced these titles into the family of Grey, he had issue, Thomas, second marquess of Dorset, and Leonard, created January 1, 1536, viscount Garney, of the kingdom of Ireland. He had issue, Thomas, second marquess of Dorset, was commander in chief of the expedition against Fontarabia, in 1512. He had issue, Henry, third marquess of Dorset; Thomas; Leonard; and John.

Henry, third marquess of Dorset, married Frances, daughter of Charles Brandon, duke of Suffolk, in 1520, and was created, June 18, 1548, viscount of Louis XII. king of France; and was created, October 11, 1551, duke of Suffolk. The issue of this marriage was, 1. Jane Grey, who married Guildford, younger son of John Dudley, duke of Northumberland, and was nominated by the last will of Edward VI. heir of the crown of England. She had accordingly proclaimed queen much against her own inclination, July 10, 1553; but, finding the tide of popular opposition irresistible, she resigned her pretensions the 20th of the same month. She was tried, together with her husband, for this faultless assumption, the 34th of November following. They remained prisoners in the Tower till the defeat of Thomas Wyatt's insurrection, in consequence of which they were brought to the scaffold February 12, 1553; and the duke her father on the 34th of the same month. See the article ENGLAND, vol. vi. p. 647. 2. Catharine, married, first, to Henry, son of William, first earl of Pembroke, and afterwards to Edward, the younger son of Edward, son of Edward, duke of Somerset, lord protector of England. This marriage having taken place without the consent of queen Elizabeth, they were both of them committed to the Tower, where the counts died, after nine years confinement, January 26, 1567. By these tragical events the titles of the family became extinct.

Henry
Henry, son of John, younger son of Thomas, second marquis of Dorset, was now become the representative of the family, having by descent the titles of Bonville and Athlone. By James I., the eldest son, he was created baron Grey of Groby. Henry, second lord Grey of Groby, his grandson, was by Charles I. created earl of Stamford, and had issue, 1. Thomas, eldest son of Thomas, second earl of Stamford. 2. John, father of Harry, third earl of Stamford. Thomas, second earl of Stamford, was appointed August 28, 1637, chancellor of the duchy and county palatine of Lancaster, which office he resigned 1702, and died January 13, 1720.

Harry, fourth earl of Stamford, son of Harry, third earl of Stamford, married Mary, daughter and heir of George Booth, last earl of Warrington; by which lady, who died December 10, 1672, he had issue, 1. George-Harry, the present earl. 2. Booth, born August 15, 1720, married May 10, 1782, Elizabeth, daughter of Charles Mainwaring, of Brimborough in the county of Chester, esquire; by which lady he has issue a son and a daughter. 3. John, born May 22, 1743, who married June 22, 1773, Suffannah, daughter of Ralph Leycester, esquire. His lordship, dying May 30, 1765, was succeeded by his, the present and fifth earl.

RESIDENCES.—Enville Hall, in the county of Stafford; and Dunham Park, in the county of Chester.

TOWN-HOUSE, CHARLES-STREET, BERKELEY-SQUARE.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—"AC MUNIQUE."—"According to my power."

FINCH, EARL OF WINCHELSA.

GEORGE FINCH, EARL OF WINCHELSEA AND NOTTINGHAM, Viscount Maidstone, Baron Finch of Daventry, and a Baronet; Knight of the Garter, Groom of the Stole to the King, Lord Lieutenant and Custos Rotulorum of the county of Rutland, and F.S.A. born November 4, 1752; and succeeded to the title upon the death of his uncle, August 2, 1769.

The family of Finch is descended from Henry Fitzherbert, lord chamberlain of the household to Henry I. and the reputed ancestor of the earl of Pembroke. Herbert, his son, had issue Peter, progenitor of the earls of Pembroke; and Matthew, a considerable baron in the reign of King John, whose grandson took the name of Finch in the reign of Edward I. Sir Thomas Finch was sent by queen Elizabeth in 1564, to the relief of Newhaven, then besieged by the French, where he was shipwrecked, and perished with all his retinue. He married Catharine, eldest daughter of Sir Thomas Mylne of Baffew in the county of Kent, by which lady he had issue, 1. Mylne. 2. Henry, whose son John was elected speaker of the house of commons in 1628, and constituted lord chief justice of the court of common pleas January 21, 1634. Having resigned this office, he was, January 23, 1639, appointed lord keeper of the great seal, and created baron Finch of Fordwich in the county of Kent. Upon his death in 1660 the title became extinct.

Mylne, eldest son of Sir Thomas Finch, married Elizabeth, daughter and heir of Sir Thomas Heneage, of Coft Hall in the county of Essex, treasurer of the chamber to queen Elizabeth; by which lady, who was created by James I. a viscountess Maidstone, and by Charles I. countess of Winchelsea, he had issue, 1. Thomas, who succeeded to the titles of his mother. 2. Heneage, elected speaker of the house of commons in 1660. Mylne, the father was created a baronet by James I. June 29, 1641.

Heneage, second earl of Winchelsea, was one of the persons principally connected with general Monk in the restoration of Charles II. By that monarch he was created lord Fitzherbert of Bailwell, and appointed ambassador extraordinary to the court of Constantinople. He was present, and died in the great fleet against the Dutch, May 28, 1672. He was succeeded by his fourth son, Heneage, fourth earl of Winchelsea. 3. John, fifth earl of Winchelsea.

Charies third earl of Winchelsea, son of William lord viscount Maidstone, was June 14, 1711, appointed first commissioner of trade and plantations; and died August 14, 1714.

Heneage, son of Heneage, younger son of Sir Mylne Finch, baronet, was June 6, 1660, constituted his majesty's lieutenant general, and the day following raised to the dignity of a baronet. He was farther promoted, May 10, 1670, to the office of attorney general; and, November 9, 1673, declared lord keeper of the great seal. In the following year he was created baron Finch of Daventry, and December 19, 1675, constituted lord high chancellor of England. In the midst of the fickleness and profligacy of the court of Charles II., he preserved that even tenour and dignity of character which prevented him, though a tory, from becoming, as the king's other ministers were, an instrument of the ambition and perfecution of the whigs. The last honour conferred upon him was that of being created earl of Nottingham; and he died December 18, 1682, leaving issue, 1. Daniel, second earl of Nottingham. 2. Heneage, created earl of Aylesford.

Daniel, second earl of Nottingham, was constituted February 19, 1682, first lord commissioner of the admiralty, and resigned May 22, 1684. He was in the councils of those who invited over the prince of Orange; and, though he could not join with them in that measure, he was however faithful to their secret. He was sent by king James, together with the marquis of Hailfax and lord Godolphin, to treat with the prince upon his landing; but, upon his return to London, he found that the king had hastily withdrawn himself. He was appointed, February 13, 1689, one of his majesty's principal secretaries of state, and resigned in March 1694. His conduct was such, that king James thought proper to except him out of his intended general pardon; and, to his honour he was proved to have refused a considerable bribe in the corrupt trans action respecting the charter of the East-India company. Upon the accession of queen Anne he was again constituted one of the principal secretaries of state, and resigned April 17, 1704. Though he had always been regarded as a leader in the high church party, he went over to the whigs at the time that the duke of Marlborough and the earl of Godolphin were dismissed from their employments; and, upon the accession of George I., he was appointed lord president of the council. He received in 1721, the unanimous thanks of the university of Oxford, and of the clergy of the diocese of London, for his answer to Mr. Whitson concerning the eternity of the second and third persons in the Holy Trinity. Upon the failure of the elder branch of the family, September 9, 1729, he became fifth earl of Winchelsea, and died January 1, 1730. He had issue, 1. Daniel, seventh earl of Winchelsea; and 2. William, who was employed by his majesty's envoy extraordinary, first, to the court of Sweden, and afterwards to the republic of the United provinces. He married Charlotte, daughter of Thomas, first earl of Pomfret, by the honorable Henrietta-Louisa Jeffrey's his wife; by which lady he had issue, George, the present earl of Winchelsea; Charlotte, who died in 1767; Sophia, born October 28, 1748, and married, March...
March 2, 1774, to Charles Fielding, esq. Frances who died 1765; and Henrietta, born December 28, 1750.

William, their father, died December 25, 1756.

3. John, who married Elizabeth Younger, by which lady he had issue Elizabeth, married June 2, 1737, to John Milner, of Sleep, in the parish of Ambleby, in the county of Lincoln; she was buried February 12, 1750.

4. Edward, who took the name of Hatton, pursuant to the last will of his maternal aunt Anne, daughter of Lord Viscount Hatton. He was successively employed as envoy extraordinary to the court of Sweden, to the diet of Ratisbon, to the republic of the United Provinces, to the King of Poland, and to the empire of Russia.

He married Elizabeth, daughter of Sir Thomas Palmer of Wingham in the county of Kent, baronet; by which lady he had issue, George, born June 30, 1747; Anne, born November 15, 1750; Harriet-Frances-Charlotte, born February 19, 1753; Mary Henrietta-Elizabeth, born May 25, 1753; and John-Emilius-Daniel-Edward, born May 19, 1755.

Edward, their father, died May 16, 1771.

Daniel, seventh earl of Winchelsea, was appointed March 16, 1751, first lord commissioner of the admiralty, which office he resigned in December 1744. He was again appointed first lord of the admiralty, April 6, 1757, and continued in that situation to the end of his life, under the administration of the marquis of Rockingham, July 12, 1765, lord president of the council, which office he resigned July 30, 1766. The earl of Winchelsea married, first, Frances, daughter of Basil fourth earl of Denbigh; by which lady he had issue Charlotte; and secondly, daughter of Sir Doranour, fourteenth earl of Chesterfield, by which lady, who died August 8, 1757, he had issue four daughters: 1. Henage, born in December 1741, and married to Sir George Oborn of Chickelands in the county of Bedford, baronet. 2. Edes, born January 17, 1746. 3. Hatton, born February 23, 1747. 4. Augusta, born in February 1751, died July 10, 1757. The earl dying August 2, 1769, was succeeded by his nephew, the present and eighth earl of Winchelsea, and fourth earl of Nottingham.

The heir-presumptive is George Finch Hatton, esq. his lordship's cousin, and the eldest son of Edward, son of Daniel, sixth earl of Winchelsea, and second earl of Nottingham.

RESIDENCES.—Burleigh in the county of Rutland; Rantham House, county of Buckingham; and Easwell in the county of Kent.—Townhouse, South-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Nil confire fui.—"Conscious of no guilt."

STANHOPE, EARL OF CHESTERFIELD.

PHILIP STANHOPE, EARL OF CHESTERFIELD, and Baron Stanhope, of Shelford, Knight of the Garter, F.R. and A.S. born November 10, 1755; succeeded the late earl, March 21, 1773; married, first, September 16, 1777, Anne, daughter of Thomas Thistlethwaite, D.D. who died October 26, 1788, leaving issue, Harriet, born April 9, 1786, married November 10, 1803. His lordship married, secondly, February 5, 1799, lady Henrietta Thynne, fitter to Thomas, marquis of Bath, and has issue, Elizabeth, born November 14, 1800, and Elizabeth Georgiana, born February 15, 1802, to whom their Majesties and the Princes Auguilia, duchesses in person; and a son, George-Augustus-Frederick, born May 19, 1803.

The family of Stanhope was of considerable eminence in the reign of Henry III. and they were elected to parliament for the borough of Newcastle upon Tyne, and the county of Nottingham, from the accession of Richard II. Sir Edward Stanhope, in the reign of Henry VII. was one of the commanders for that monarch at the battle of Stoke, June 6, 1487; and at the battle of Blackheath, June 22, 1497. He had issue Anne, married to Edward, first duke of Somerset, lord protector of England; and Sir Michael, who, on account of this affinity was twice committed prisoner to the Tower, and then to a house of correction, and at length died in the Tower, 1505.

1. Thomas, father of John, who had issue Philip, and John, ancestor to the earl of Harrington. 2. John, created May 4, 1605, baron Stanhope of Harrington, which title became extinct, upon the death of his son in 1676.

2. Philip, grandson of Thomas, son of Sir Michael Stanhope, was by James I. raised to the dignity of a baron by the title of lord Stanhope of Shelford, and by Charles I. created earl of Chesterfield. He lived in retirement till the commencement of the civil wars; and then, engaging in the royal party, he made his house at Shelford a garrison for the king, and fixed in person upon the city of Litchfield. He was there reduced to surrender by the parliamentary forces in 1643, and died in confinement September 12, 1656. He had issue, 1. Henry lord Stanhope, who married Catharine, eldest daughter of Thomas lord Wotton; by which lady, who married October 29, 1666, counties of Chesterfield for life, he had issue Philip, fourth earl of Chesterfield, 2. Ferdinand, who was killed in the civil wars in 1647.

3. Philip, who by his father was appointed commander of the garrison of Shelford, and lost his life in its defence, October 27, 1645. 4. Arthur, 5. Alexander, whose son James was created earl Stanhope.

3. Philip Dormer, fourth earl of Chesterfield, grandson of Philip second earl of Chesterfield, was February 26, 1728, appointed his majesty's ambassador extraordinary to the republic of the United Provinces; and April 19, 1730, lord steward of the household, which office he resigned in April 1733. From that period he became one of the principal leaders of the parliamentary opposition to Sir Robert Walpole; and, together with John Lord Carteret, afterwards Earl Granville, was regarded as the great ornament of the house of lords for splendour of abilities and brilliancy of eloquence. He was constituted, January 3, 1745, lord lieutenant of Ireland; but, his abilities being deemed indisputably necessary at that critical period, he was May 18 in the same year commissioned to go as ambassador extraordinary to the republic of the United Provinces, and did not arrive in Dublin till August 31 following. During his residence there he was completely successful in preserving the peace of the country during the rebellion in England; and having resigned in April 1746, he was in the same year constituted one of his majesty's principal secretaries of state, which office he resigned February 6, 1748. He married Melesina, the natural daughter of George I. by Melesina de Schulenberg duchess of Kendal; which lady was created in her own right baronets of Aldborough in the county of Suffolk, and counts of Walsingham in the county of Norfolk, for life, and died September 16, 1776. Since the death of this celebrated earl of Chesterfield, there have been published his letters to his natural son, Philip Stanhope, late envoy extraordinary to the court of Dresden; written with great elegance of style, and with an elevated degree of paternal affection.

Arthur, a younger son of Philip first earl of Chesterfield, had issue Michael, who embraced the profession of the church, was canon of Windfor, and doctor in divinity. He had issue, 1. Arthur-Charles, who married Margaret, daughter of Charles Hedlam of Kerby in the county of York, esquire; by which lady, who died December 26, 1776, to William Smelt, esquire, 2. Ferdinando, who was killed in the civil wars in 1647.

He was created earl Stanhope, 3. Philip, who by his father was appointed commander of the garrison of Shelford, and lost his life in its defence, October 27, 1645. 4. Arthur, 5. Alexander, whose son James was created earl Stanhope.

CREATIONS.—Baron Stanhope of Shelford in the county of Nottingham, November 7, 1616. Earl of Chesterfield, and Baron Stanhope, of Shelford, Knight of the Garter, F.R. and A.S. born November 10, 1755; succeeded the late earl, March 21, 1773; married, first, September 16, 1777, Anne, daughter of Thomas Thistlethwaite, D.D. who died October 26, 1788, leaving issue, Harriet, born April 9, 1786, married November 10, 1803. His lordship married, secondly, February 5, 1799, lady Henrietta Thynne, sister to Thomas, marquis of Bath, and has issue, Elizabeth, born November 14, 1800, and Elizabeth Georgiana, born February 15, 1802, to whom their Majesties and the Princes Augusta, duchesses in person; and a son, George-Augustus-Frederick, born May 19, 1803.

The family of Stanhope was of considerable eminence in the reign of Henry III. and they were elected to parliament for the borough of Newcastle upon Tyne, and the county of Nottingham, from the accession of Richard II. Sir Edward Stanhope, in the reign of Henry VII. was one of the commanders for that monarch...
MONTAGU, EARL OF SANDWICH.

JOHN MONTAGU, EARL OF SANDWICH, VISCOUNT HINCHINBROOK, AND BARON MONTAGU, OF ST. NICHOLAS, IN THE COUNTY OF KENT; BART.

Motto.—*Alas volat propriis.*—"The bird flies to its own."
a whole division of the latter. His ship was at length set on fire; and, the majority of the crew having been killed, the officers and some of the men got into the long boat; but the Earl of Sandwich refused to quit his vessel, and perished with her. 

The unfortunate earl of Sandwich had issue, 1. Edward, second earl of Sandwich. 2. Sidney, who married Anne, daughter and heir of Sir Francis Wortley of Wortley in the county of York, baronet; in consequence of which marriage he added to his own the name of Wortley. He was one of the supporters of the bill of exclusion, and raised a body of horse in the reign of James II. to assist the prince of Orange. He had issue Edward (Wortley Montagu), ambassador extraordinary to the Grand Signior, who married Mary, daughter of Evelyn Pierrepont duke of Kingston; by which lady, who was the author of a celebrated collection of Letters upon the Turkish Nation, and died August 21, 1765, he had issue Edward, author of a treatise upon Ancient Republics, who spent the latter years of his life at Venice, living in the Turkish manner, and died in 1776. Mary, sister of the late-mentioned Edward, married John Stuart, earl of Bute in the kingdom of Scotland; and Arthur, his second son, marries Montifiatt of Wortley in the county of York. The honourable Sidney Wortley Montagu died November 11, 1777.

Edward, third earl of Sandwich, had issue Edward, Richard, lord viscount Hinchingbrooke, who married Edith, daughter and heir of Alexander Rouhan of Littlecote in the county of Wilts; by whom, who died March 20, 1761, he had issue John, fourth earl of Sandwich, born November 3, 1718, who succeeded Edward, his grand-father, the third earl, in 1711, who married Judith, daughter of Charles, viscount Fane, of the kingdom of Ireland, on March 7, 1742; by whom (who died on July 7, 1797) he had issue John, the present earl; 2. Edward Montagu, born June 30, 1745, and died November 2, 1752; 3. William-Augustus, born in February 1752, and died at Lisbon, in January 1776, unmarried; 4. Mary, born February 23, 1746, who died June 23, 1761; William, born December 23, 1750; married, in October 1758, Charlotte, daughter of Francis Nairn, esq. and had issue a son, William, and died February 10, 1757; Edward, born April 7, 1715, died young; Mary, born June 18, 1709, died young; Elizabeth, born May 20, 1711, who married, first, in September 1737, Kelland Fane, of the kingdom of Ireland, by whom he had issue; 2. George, born March 17, 1748, and married to William Poyntz, esq. by whom he has issue; 3. Elizabeth, born January 6, 1750, and died November 19, in the same year. He was committed to the Tower on a charge of being concerned in the Rye-house plot, where he is said to have been murdered, July 15, 1683.

William, third earl of Essex, his grandson, was appointed in 1754, his majesty's ambassador extraordinary and minister plenipotentiary to the court of Turin, in which employment he continued till 1756, and was constituted, December 4, 1739, captain of the yeomen of the guard. He married, first, Jane, daughter of Henry Hyde, earl of Clanrode and Rochefort; by whom he had issue, Charlotte, born October 2, 1721, married to Thomas earl of Clanrode; and Mary, born October 17, 1722, married to John, son of the earl of Granard, in the kingdom of Ireland. The earl of Essex married, secondly, Elizabeth, daughter of Wriothesley, second duke of Bedford; by whom he had issue, Diana, born February 22, 1728; Anne, born May 13, 1730; and William-Anne-Holles, born February 7, 1732, married, first, Frances, daughter of Sir Charles Hanbury Williams, knight of the bath, by Frances, daughter of Thomas earl of Coningsby, by whom, who died July 19, 1759, he had issue, Elizabeth, born August 10, 1755, married to John Lord Monson, and had issue, George, the present earl; and Frances, born July 29, 1759, and died an infant.
His lordship married, secondly, March 3, 1767, Harriet, daughter of colonel Thomas Bladen, by whom he had issue, John-Thomas, born March 2, 1759, married, April 9, 1791, lady Caroline Paget, daughter of Henry Earl of Uxbridge, and had issue, three sons and a daughter, Caroline, born in September 1754; and a daughter, born May 8, 1765. Thomas-Edward, born March 25, 1770; William-Robert, born April 28, 1775, in holy orders, married, June 7, 1803, Miss Salter, daughter of T. Salter, of Rickmansworth in Hertfordshire, esq., Bladen-Thomas, born August 25, 1776, in the army, married March 31, 1799, and was succeeded by the present and fifth earl. The heir presumptive is John-Thomas, brother to the earl.

CREATIONS.—Baron Capel, August 6, 1641. Viscount Malden, and Earl of Effex, April 20, 1661.

RESIDENCE.—Cafhtobury-park, in the county of Hertford; and Hampton-court, in Hertfordshire. — Town-houfe, Upper Grosvenor-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Sede et fortitudine. —"By faith and fortitude."

BRUDENELL, EARL OF CARDIGAN.

JAMES BRUDENELL, EARL OF CARDIGAN, Baron Brudenell of Deane in the county of Northampton, and a Baronet, Keeper of the Privy Purse to the King, High Steward of New Windsor, and Governor of Windsor Castle; born April 10, 1755. He was the son of George Duke of Montagu, born September 28, 1721; and had issue, 1. Charles, 2nd Earl of Car- digan, born May 23, 1790; married, November 23, 1760, Anne, eldest daughter of George Vicecount Lewisham, son of William, first earl of Buckingham; but had issue by this lady, who died January 12, 1786. His second son, John, was married to the first Viscount Sydney; and 2. Mary, born in September 1794; and a daughter, born of weight in the county of Hertfordshir e. His third son, born August 25, 1776, a captain in the royal house, Upper Grosvenor-street. —See the annexed Engraving.

Motto.—Deane-park, in Northamptonshire; and Twickenham, in Middlesex.—Town-houfe, Upper Grosvenor-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—En grace aye. —"On grace depend."

HOWARD, EARL OF CARLISLE.

FREDERIC HOWARD, EARL OF CARLISLE, Viscount Howard of Morpeth, Baron Dacre of Gilel’aville-Leveson Gower, marquis of Stafford, by whom he has issue, George, vicount Morpeth, heir apparent, born September 17, 1773; married, March 1801, Lady Georgiana Cavendish, eldest daughter of William Duke of Devonshire, and has issue, the duke of Norfolk, and has issue, the duke of Northumberland, the duke of Devonshire, and has issue, the duke of Northumberland, the duke of Northumberland, the dukedom and marquessate became extinct. His grace was born May 26, 1736, and died July 7, 1790, Mary Montagu (sister to the duchess dowager of Manchester, late countess of Belvoir, who died without issue in 1757), second daughter and co-heir of John Duke of Montagu, by Mary, daughter and co-heir of John the third great Duke of Marlborough; after whose decease, in 1756, his grace, on October 8, 1756, took the name and arms of Montagu; and was by his majesty created marquis of Monthermer, and Duke of Montagu, November 5, 1756, and Baron Montagu, of Boughton, with remainder to James, second son of Henry Duke of Beccleuch, by patent, August 21, 1756. The duchess died May 1, 1775, leaving issue, 1. John, marquis of Monthermer, born March 17, 1755; created, May 8, 1762, baron Montagu, of Boughton, and died April 11, 1770, unmarried, by whose death that barony became extinct. 2. Elizabeth, born May 29, 1753, married, May 2, 1767, to Henry Duke of Beccleuch, and died, unmarried, July 17, 1780. 3. Caesar, born July 8, 1763; 4. Charlotte, born February 18, 1762, died an infant. Thomas, the eldest son, born April 30, 1729, assumed the name and arms of Bruce, by royal warrant, December 9, 1727, and in February 1747, succeeded his uncle, the Earl of Aylburge, as Lord Bruce of Tottenham, in the county of Wilts, and was created earl of Aylburge, by patent, July 10, 1776.

CREATIONS.—Earl of Carlisle, April 20, 1661; Baron Brudenell, of Deane, in Northamptonshire, October 17, 1756.

RESIDENCES.—Deane-park, in Northamptonshire; and Twickenham, in Middlesex. — Town-houfe, Upper Grosvenor-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—En grace aye. —"On grace depend."
son of William, having been instrumental to the reformation of Charles II. was soon after that event created Baron Dacre of Gillecille, viscount Howard of Morpeth, and Earl of Carlisle. He was ambassador from Great Britain to the court of Denmark and Sweden, in 1663 and 1664; and was governor for some years of the island of Jamaica. He died February 24, 1684, leaving issue, Edward, second earl of Carlisle; and Frederick-Christian, who was killed at the siege of Luxembourg in 1682.

Charles, third earl of Carlisle, son of Edward the second earl, was June 19, 1701, appointed first lord commissioner of the treasury, which office he resigned upon the death of William III. He was again constituted first lord commissioner of the treasury, May 23, 1715; which office he resigned in October following, and died May 1, 1725.

Henry, fourth earl of Carlisle, born in 1694, married, first, November 27, 1717, Frances-Spencer, only daughter of Charles, third earl of Sunderland; by whom, who died July 27, 1743, he had issue, Charles Viscount Howard, who died August 9, 1743; Robert Viscount Howard, who died October 20, 1743; Arabella, who married Jonathan Cope, Esq.; Diana, married to Thomas ter of Charles, third earl of Sunderland; by whom, liege of Luxembourg in 1684.

Henry, fourth earl of Carlisle, born in 1694, married, first, November 27, 1717, Frances-Spencer, only daughter of Charles, third earl of Sunderland; by whom, who died July 27, 1743, he had issue, Charles Viscount Howard, who died August 9, 1743; Robert Viscount Howard, who died October 20, 1743; Arabella, who married Jonathan Cope, Esq.; Diana, married to Thomas ter of Charles, third earl of Sunderland; by whom, liege of Luxembourg in 1684.

Henry, fourth earl of Carlisle, born in 1694, married, first, November 27, 1717, Frances-Spencer, only daughter of Charles, third earl of Sunderland; by whom, who died July 27, 1743, he had issue, Charles Viscount Howard, who died August 9, 1743; Robert Viscount Howard, who died October 20, 1743; Arabella, who married Jonathan Cope, Esq.; Diana, married to Thomas ter of Charles, third earl of Sunderland; by whom, liege of Luxembourg in 1684.

Henry, fourth earl of Carlisle, born in 1694, married, first, November 27, 1717, Frances-Spencer, only daughter of Charles, third earl of Sunderland; by whom, who died July 27, 1743, he had issue, Charles Viscount Howard, who died August 9, 1743; Robert Viscount Howard, who died October 20, 1743; Arabella, who married Jonathan Cope, Esq.; Diana, married to Thomas ter of Charles, third earl of Sunderland; by whom, liege of Luxembourg in 1684.
country of Gloucester; Constable of the Castle of St. Briavel, and Warden of the Forest of Dean; Colonel of the South Battalion of the Gloucestershire Militia, and High Steward of the City of Gloucester; born May 24, 1745, and succeeded to the title upon the death of his father, January 9, 1755; married, March 30, 1785, Mary, daughter of William Cole, of the county of Northampton; and has issue, William-Fitzharding, viscount Durfley, heir apparent, born December 26, 1786; Maurice-Fitzharding, born March 5, 1788; Augustus-Fitzharding, born March 26, 1790; Francis-Henri-Cuifin-Philippe-Fitzharding, born December 7, 1794; Thomas-Morton-Fitzharding, born October 19, 1796; George-Charles-Granville-Fitzharding, born February 10, 1800; Mary-Henrietta-Fitzharding, born October 4, 1801; a daughter, born April 12, 1803; and a son, born in May, 1805.

The family of Berkeley is descended from the renowned Harding, of the royal family of Denmark; and is in the line of those heroic chiefs who came over to England with William the Conqueror. Robert-Fitzharding, his son, adhered to the empress Matilda, and for his fidelity to Henry II. in their contest with King Stephen, and obtained a grant of the castle of Berkeley, in the county of Gloucester, together with the barony, from which his posterity have derived the surname of Berkeley. Robert, his son, and Maurice, nephew of Robert, were chiefs among the barons in the reign of King John. Thomas, son of Maurice, was appointed, in 1269, lord constable of England; and at the battle of Barnesfield, June 24, 1263, was taken prisoner by the Normans. He afterwards opposed two of the victorious Scots. He was a favourite of Edward II. as did Maurice, his son; who received summons to parliament in the preceding reign by the title of lord Berkeley, of Berkeley-castle; being, according to the family pedigrees, the seventh poliarch of the barony. He was appointed, in 1311, reward of the duty of Aquitaine, and died May 31, 1326. James, his brother, was elected bishop of Exeter, March 15, 1326, and died the 24th of June in the following year.

Thomas, second lord Berkeley, (reckoning from the summons of Edward I.) was a considerable warrior, and distinguished himself at the battle of Cressy; and also received a considerable ransom of the prisoners he took at the battle of Poitiers, where he was one of the princes to the battle of Poitiers. He married Elizabeth, daughter of Henry Drax, of Charborough, esquire, who married, secondly, Robert Crags Nugent, first Earl Nugent of the Kingdom of Ireland, he had issue, James, third earl of Berkeley, married Louisa, daughter of Charles first duke of Richmond. He entered into the service, and distinguished himself in the reign of Anne in the fleets of Sir George Rooke and Sir Dudley Sherley, and was created viscount Durfley, March 15, 1736, first lord commissioner of the admiralty, in which office he continued till the death of George I. He died in August 1736.

Augustus, fourth earl of Berkeley, his son, was commander of one of the regiments raised in 1745 to march against the rebels. He married Elizabeth, daughter of Henry Drax, of Charborough, esquire, who married, secondly, Robert Crags Nugent, first Earl Nugent of the Kingdom of Ireland, he had issue, 1. Frederic-Augustus, the present earl. 2. Louisa, born July 28, 1748, and married to George Lord Hervey, son of Frederic earl of Bristol. 3. Elizabeth, born in December 1750, and married to William lord Craven. 4. George-Cranfield, born August 10, 1753, an admiral in the royal navy. He married August 19, 1784, Amelia, daughter of Lord George Lenox, and sister of Charles third duke of Richmond. The earl died January 9, 1755, and was succeeded by his son Frederic-Augustus, the fifth and present earl.

Residences.—Berkeley Castle, in the county of Gloucester; Bruton Abbey, in Somersetshire; and Cranford Park, in the county of Middlesex.—Town-houses, in Spring Gardens.

Armorial Bearings.—See the annexed Engraving.

Motto.—Dieu a vost. —"God with us."
had issue, James, first lord Norreys of Bertie, and by Charles II. created earl of Abingdon. This nobleman joined in the invitation to William prince of Orange in 1688, and contributed thirty thousand pounds to his expedition. He died March 22, 1699, leaving issue, 1. Peregrine, second earl of Abingdon; 2. Thomas, third earl of Abingdon; 3. Peregrine, who greatly distinguishe himself in the royal navy, and died in France in 1709.

Abingdon, third earl of Abingdon, married Anna, daughter of sir John Collins, of the kingdom of Scotland, knight; by whom he had issue, 1. Peregrine, fourth earl of Abingdon; 2. Catherine, daughter of Thomas lord Arched, by which lady he had issue, 1. James, father of William, third earl of Abingdon; 2. Jane, married to Thomas Clifton, esq. and died February 25, 1791; 3. Elizabeth, married to sir John Gallini, and by him had issue. 4. Jane, married to Thomas Clifton, esq. and died February 25, 1791; 5. Bleona, married, July 7, 1666, to vicount Wenman; 6. Mary, married to Miles Stapleton, esq. of Clints, in Yorkshire. His lordship died in 1762, and was succeeded by Willoughby, the fourth earl, born January 16, 1740; married July 1768, Charlotte, daughter of admiral sir Peter Warren, knight of the bath; by whom he had issue, 1. Montague, the present earl; Louisa-Anne-Maria-Bridge, born March 5, 1775, and married, July 20, 1793, lady Montague, daughter of the earl of Pembroke, born October 18, 1778. His lordship died September 26, 1799, when his son, the present and fifth earl, succeeded.

RESIDENCES.—Rycote Park, in the county of Oxford; and Willingdon, in the county of Berks.

ARMORIAL BEARINGS.—See the annexed Engraving. MOTTO.—Virtus arietefortior.—"Fortified by virtue."

WINDSOR, EARL OF PLYMOUTH.

OTHER-ARCHER WINDSOR, EARL OF PLYMOUTH, and Baron Willoughby, of Bradenham, in the county of Bucks; born July 2, 1789; succeeded his father, the late earl, June 12, 1799.

The family of Windsor, from whom the ears of Plymouthe in the female line are descended, derives its origin from other, a rich and powerful lord, in the reign of Alfred the Great. Walter-Fitz-Other, in the reign of William I., was father of William, who took the surname of Windsor from the castle of Windsor committed to his custody; and of Gerard, who was ancestro to the ears of De la Fore, the dukes of Leinster, and the ears of the Conqueller, in the kingdom of Ireland; and to the lords Gerard of Bromley, the Gards earls of Macclesfield, and of the Conqueller.

Sir William de Windsor, in the reign of Edward III., was twice lord lieutenant of Ireland, where he performed considerable services. Sir Andrew Windsor, in the reign of Henry VIII., was a principal commander in the army sent under Charles Brandon duke of Suffolk to invade the kingdom of France, in 1521; and had summons to parliament by the title of lord Windsor of Bradenham; by whom he had issue, 1. William, second lord Windsor, his son, was one of the partizans and confessours of queen Mary; and Edward, third lord Windsor, his son, displayed considerable valour at the siege of Saint Quentin, July 7, 1557. He was father of the first and fourth lords Windsor, and of Henry, fifth lord Windsor, both of them distinguished by tears of chivalry in the court of queen Elizabeth. Henry, fifth lord Windsor, had issue, 1. Thomas, sixth lord Windsor; 2. Elizabeth, married to Dixie Hickman, of Brixton, in the county of Oxford, esquire, and mother of Thomas-Windor Hickman, seventh lord Windsor.

Thomas Windsor, first lord Windsor of the family of Hickman, displayed in early youth great loyalty to Charles I. and in the fatal battle of Naseby, June 14, 1645, several times broke into the line of the parliament's army. In consideration of his services in the royal cause, he was, June 12, 1660, declared by patent seventh lord Windsor of Bradenham. He was also appointed governor of the island of Jamaica, where he took from the Spaniards the town of Saint Iago; and was afterwards created earl of Plymouth. He died November 19, 1687, leaving issue, 1. Thomas, second earl of Plymouth; 2. Thomas, created June 12, 1669, lord viscount Windsor of the kingdom of Ireland; and, December 31, 1711, baron Mountjoy of the Isle of Wight. His titles became extinct in 1788.

Other-Lewis Windsor, fourth earl of Plymouth, grandson of Other, second earl of Plymouth, married August 11, 1700, Catharine, daughter of Thomas lord Arched; by which lady he had issue, 1. Other, fifth earl of Plymouth; 2. Thomas, an officer of the royal navy, born May 10, 1752. 3. Catharine, born 1755, and married July 26, 1755, to sir James Talney Long, esquire. 4. Elizabeth, married to George Townshend, of Honington-hall, in the county of Warwick, esquire. 5. Henry, born January 4, 1760. 6. Anne, married to sir Thomas Broughton, in the county of Stafford, esquire. 7. Sarah, married to William Crefpigny, esquire. 8. Andrews, born May 12, 1764. His lordship died April 20, 1771, and was succeeded by Other-Hickman, fifth earl, married August 21, 1778, Sarah, eldest daughter and coheir of the last lord Archer, by whom he had issue, Other-Archer, the present earl; Maria, born May 30, 1790; Henry, Sarah, and Augustus, who died young; Harriet, born July 30, 1799. The countesses married, secondly, July 24, 1800, William-Pitt, lord Amherst. His lordship died June 12, 1799, when he was succeeded by his son, the present and sixth earl.

CREATIONS.—Baron Windsor of Bradenham, in the county of Buckingham, November 3, 1752. Earl of Plymouth, December 6, 1762.

RESIDENCES.—Hewel Grange, in the county of Worcester; and St. Fugan's Castle, Glamorganshire.—Townhouse, Bruton-street.

ARMORIAL BEARINGS.—See the annexed Engraving. MOTTO.—Je me fes et Dieu.—"I put my trust in God."

LUMLEY SAUNDERSON, EARL OF SCARBOROUGH.

RICHARD LUMLEY SAUNDERSON, EARL OF SCARBOROUGH, Vicount and Baron Lumley of Lumley Castle, and Vicount Lumley in Ireland; born April 16, 1751; succeeded his brother, the late earl, September 5, 1807; married, May 25, 1787, Harriet Willoughby, sister to Henry lord Middleton.

The family of Lumley is descended from Lulph, a nobleman of great distinction, in the time of the Conqueror; but was stripped of his possessions by William the Conqueror, and afterwards murdered. The name of Lumley wasblings by William his grandson. Ralph de Lumley had summons to parliament in 1385, by the title of baron Lumley of Kyton Castle, in the county of York; and, having entered into a confederacy in favour of Richard II., was killed at Cirencester in the year 1400. Marmaduke, his younger son, was, April 15, 1430, elected bishop of Carlisle; and, December 18, 1446, constituted lord high chancellor of England. He was translated, February 8, 1451, to the see of Lincoln, and died in the following year. Sir John Lumley, in the reign of Henry V., was restored to the lordship of Lumley; and, having distinguished himself in the wars of France, was killed, together with the duke of Clarence, brother to Henry V., at the battle of Beauge, April 13, 1423. Thomas, third lord Lumley, his son, enfranchised the party of the house of York; and George, fourth lord Lumley, son of Thomas, was one of the commanders in the expedition of Richard III. against the Scots, and in some military expeditions under Henry VII. John, seventh lord Lumley, his great grandson, was one of the principal commanders at the battle of Flodden Field, September
September 9, 1613; but George, his only son, being suspected of fomenting an insurrection against Henry VIII., suffered imprisonment in the Tower, and death, in April 1539. His son, Sir Henry, was rescued from the Tower by Edward VI., but, dying without issue, April 11, 1549, the title became extinct.

Richard, second son of Anthony, younger son of Richard, sixth Lord Lumley, was by Charles I., July 12, 1628, created Viscount Lumley of Waterford, in the kingdom of Ireland. He was a principal commander in the royal army in the ensuing civil war. John, his son, had issue, 1. Richard, second Lord Viscount Lumley. 2. Henry, who served with great reputation in the wars of William III. and the duke of Marlborough; and was raised to the appointment of general of the horse; he died October 28, 1723.

Richard, second Lord Viscount Lumley, was by Charles II., created Baron Lumley, of Lumley-Castle, in the county of Durham. He had a principal share in gaining the victory of Sedgemoor, in which the duke of Monmouth was defeated, July 6, 1685; and was afterwards active in promoting the business of the revolution. By King William he was advanced to the dignity of Earl of Scarborough. He died December 17, 1723, leaving issue, 1. Richard, second Earl of Scarborough. 2. William, who entered into the royal navy, and was killed in an engagement at sea, April 9, 1709. 3. Thomas, third Earl of Scarborough.

Richard, second Earl of Scarborough, upon the accession of George II., was appointed master of the horse to the king. He was the intimate friend of Philip Dormer, fourth Earl of Chesterfield, who wrote a very elegant panegyrical of his character. Thomas, third Earl of Scarborough, took the name of Sanderson, in pursuance of the will of James Sanderson, Earl of Beaulieu, in Ireland. He married Frances, daughter of George Hamilton, Earl of Orkney; by which lady he had issue, 1. Richard, fourth Earl of Scarborough. 2. Anne. 3. Frances, married to Peter Earl of Ludlow in the kingdom of Ireland. He died March 15, 1753.

Richard, fourth Earl of Scarborough, married Barbara, daughter to Sir George Savile, Baronet; by which lady he had issue, 1. George-Augustus, fifth Earl. 2. Richard, the present Earl. 3. Thomas Charles, born May 3, 1760, a captain in the royal navy, killed on board the Isis, September 3, 1782. 4. John, in holy orders, who assumed the name of Savile, pursuant to the will of his uncle, the late Sir George Savile, Bart., born in 1761; married, in November 1785, to Anna Maria, daughter to Samuel, Earl of Scarborough, take the name of Saunders, in pursuance of the will of Anthony, younger son of Richard, sixteenth Lord Lumley, born May 3, 1760, a captain in the royal navy, killed on board the Isis, September 3, 1782. 4. John, in holy orders, next brother to the present Earl.

Creations.—Baron Enfield, Viscount Tunbridge, and Earl of Rochford, May 10, 1705.

Residences.—Easton Hall, in the county of Suffolk; and Saint Olythe, in the county of Essex.—Town-house, Bruton-street, Bond-street.

Armorial Bearings.—See the annexed Engraving. Motto.—Murus acies conficiat fana.—"A found conscience is a wall of brass." [This is the motto of the Lumley family.]

ZULEISTEIN DE NASSAU, EARL OF ROCHFORD.

WILLIAM-HENRY-ZULEISTEIN DE NASSAU, EARL OF ROCHFORD, Viscount Tunbridge, and Baron of Enfield; born June 23, 1754; succeeded to the title upon the death of his uncle, September 30, 1781.

The family of Zuleistein descends from the house of Nassau, a branch of the house of Orange. They were princes of Orange, and were created princes of Nassau by William III. of England in 1692. The family of Zuleistein was created earls of Rochford by George II. of Great Britain in 1748. The present earl is the fourth son of William-Augustus, second Duke of Cumberland, and heir apparent to the dukedom.

KEPPLE, EARL OF ALBEMARLE.

WILLIAM-CHARLES KEPPEL, EARL OF ALBEMARLE, Viscount Bury, and Baron of Albemarle; born May 24, 1772; succeeded his father, the late earl, October 13, 1800; while an infant, the same year; and married April 9, 1793, Elizabeth, fourth daughter of Edward Lord Clifford; and has issue, 1. George-Augustus-Frederick, Viscount Bury, heir apparent, born June 2, 1794; Sophia, born March 28, 1719; Elizabeth, born April 23, 1719; died April 26, 1806; George-Thomas, born June 13, 1799; Edward, born August 16, 1800; a daughter, born June 16, 1803; a son, born October 5, 1804; and a daughter, born July 15, 1806.

The family of Keppel is one of the most ancient in the history of the nobility of the province of Guelderland, in the United Provinces. Arnold Joost van Keppel, lord of Vooi, came over to England with William III. and was by that monarch created Baron Ashford, Viscount Bury, and Earl of Albemarle. Upon the death of the king he returned to his native country, and was one of the commanders of the Dutch forces appointed to serve under John Duke of Marlborough. He was taken prisoner at the battle of Dettingen, June 27, 1743, and in the different battles of William Duke of Cumberland. Upon the conclusion of the peace of Aix la Chapelle in 1748, he was...
was appointed ambassador extraordinary to the court of France; and in 1750, he was made groom of the stole to George III. He married Anne, daughter of Charles, first duke of Richmond, and had issue 1. George, third earl of Albemarle. 2. Augustus. 3. William, who embraced the military profession, and served in the expedition against the Havannah, in 1762. He died March 1, 1782.

Frederic, who was elected, in October 1762, lord bishop of Exeter. He married Laura, daughter of Sir Edward Walpole, knight of the bath, son of Robert, first earl of Orford; by which lady he had issue, Ann Maria, born June 17, 1759; Frederic, born November 14, 1761; Laura, born March 14, 1761, and married to George Ferdinand son of Charles lord Southampton; and Charlotte Augusta, born June 6, 1771.

Elizabeth, born November 15, 1759; married Francis Russell, marquis of Tavistock, son of John fourth duke of Bedford, and had issue the present duke of Bedford, and his brother; and died November 2, 1768. 6. Henry, born August 13, 1742. The earl of Albemarle died December 22, 1754.

George, third earl of Albemarle, served under William duke of Cumberland, and was commander in chief of the land-forces that reduced the town of the Havannah, August 13, 1762. He married Anne, daughter of Sir John Miller, of Froyle Park in the county of Hants, January 7, 1779, to February 11 following, when they became judicious, brave, and experienced, officer."
VILLIERS, EARL OF JERSEY.

GEORGE VILLIERS, EARL OF JERSEY, VISCOUNT VILLIERS, COUNT OF DARTFORD, BARON OF HOO, IN KENT; AND VICOUNT GRANDISON, IN IRELAND; BORN AUGUST 19, 1673; SUCCEEDED HIS FATHER THE LATE EARL, AUGUST 22, 1687, WILLIAM THE CONQUEROR. SIR NICHOLAS DE VILLIERS, IN PALESTINE, AND BORE THE ARMS WHICH ARE STILL BORNE BY THE EARL OF JERSEY. GEORGE VILLIERS, IN THE REIGN OF JAMES I. JULY 19, 1619, WHICH BECAME EXTINGUISHED WITH MARY, DAUGHTER OF ANTHONY BEAUMONT, OF GLENHEPIE; HE ALSO HAD ISSUE, 1. JOHN, CREATED IN 1609 BARON VILLIERS, AND SUCCEEDINGLY CREATED, AUGUST 27, 1616, BARON OF WADDELEY; WHICH TITLES ALSO BECAME EXTINCT IN 1659.

GEORGE, SECOND DUKE OF BUCKINGHAM, HIS SON, AND LORD FRANCIS, HIS BROTHER, VENTURED THEIR LIVES AND FORTUNES FOR THE DELIVERANCE OF CHARLES I. FROM CONFINEMENT; IN WHICH undertaking the lord francis villiers was killed. THE DUKE OF BUCKINGHAM ATTENDED CHARLES II. IN HIS EXPEDITION INTO SCOTLAND, AND DISTINGUISHED HIMSELF IN THE BATTLE OF WORCESTER, SEPTEMBER 3, 1661; AND AFTER THE DEFEAT ESCAPED TO THE CONTINENT. RETURNING TO ENGLAND, AFTER THE RESTORATION, HE WAS APPOINTED MASTER OF THE HORSE TO CHARLES II., AND APRIL 16, 1667. EDWARD, SECOND SON OF GEORGE VILLIERS BY HIS FIRST MARRIAGE, WAS APPOINTED, MARCH 10, 1662, PRESIDENT OF THE PROVINCE OF NEWFOUNDLAND, WHERE HE CONDUCTED HIMSELF WITH CONSIDERABLE REPUTATION, AND DIED SEPTEMBER 7, 1666. HE MARRIED BARBARA, DAUGHTER OF SIR JOHN SAINT JOHN, OF EDDARDE TREGOYE, IN THE COUNTY OF WILTS, AND NIECE TO SIR OLIVER SAINT JOHN, CREATED JANUARY 3, 1626, VICOUNT GRANDISON OF LIMERICK IN IRELAND, WITH REMAINDER TO THE MALE ISSUE OF SIR EDWARD VILLIERS AND BARBARA HIS WIFE. THEIR ISSUE WERE, 1. WILLIAM, SECOND LORD VICOUNT GRANDISON. 2. JOHN, THIRD LORD VICOUNT GRANDISON. 3. GEORGE, FOURTH LORD VICOUNT GRANDISON. 4. EDWARD, OLIVER, FIRST LORD VICOUNT GRANDISON, DIED IN 1630.

WILLIAM, SECOND LORD VICOUNT GRANDISON, ENTERED INTO THE SERVICE OF CHARLES I., AND WAS KILLED AT THE BATTLE OF BRITOL JULY 26, 1643. HE WAS FATHER OF BARBARA, CRE-
Sarah, married to Charles-Nathaniel Bayley, esq. 7.
William-Augustus-Henry, born November 15, 1780, who, June 4, 1803, assumed the surname of Manfel, pursuant to the will of Louisa-Barbara, baroness Vernon.
Elizabeth-Frances, married to John, lord Ponfby, of Inimksby, 9.
Harriot, married, December 21, 1805; the honourable and reverend Richard, brother to Wiliam, the second earl of Oxford, born July 29, 1796. The earl, dying August 22, 1805, was succeeded by his eldest son, George, the present and fifth earl.

**Residences.**—Middleton Stoney, in the county of Oxford; and Osterley Park, in Middlesex. —Townhouse, Berkley-square.

**Armorial Bearings.**—See the annexed Engraving.

**Motto.**—Fidelitate cuncta. —"The cross is the test of faith."

**POULETT, EARL POULETT.**

John Poulett, earl Poulett, vicecount Hinton, Baron Poulett, of Hinton St. George, lord Lieutenant and Cussofs Rotulorum of the county of Somerset, and Recorder of Bridgewater; born April 7, 1756; succeeded his father, the late earl, April 24, 1788; married, June 26, 1725, Catharine Lambert, esq., died August 16, 1733, leaving issue, Catharine, married, June 26, 1725, to John Parker, esq.; and John, second earl, who died unmarried. He was succeeded by his next brother, Vere, the third earl, born May 18, 1710, married, in 1754, to Mary, daughter of Richard Bertie, of Arlingham, in Gloucestershire, esq. by whom he had issue, John, the present earl; and Vere, born in 1761, a general in the army, who married Miss Beecher (since dead), by whom he has issue, Vere, the hon. Henry; and Charlotte-Chloe. His lordship, dying April 14, 1788, was succeeded by his son, John, the present and fourth earl.

**Residences.**—Hinton-park, in the county of Somerset; and Atthorpe-house, in Devonshire. —Town-house, Alborough place.

**Armorial Bearings.**—See the annexed Engraving.

**Motto.**—Gardez ta foi. —"Keep thy faith."

**CHOLMONDELEY, EARL OF CHOLMONDELEY.**

George-James Cholmondeley, esq, of Wich-Malbank, in Cheshire, and Baron of Newburgh, in the Isle of Anglesey; and a baronet; Vicecount Cholmondeley of Kells, and Baron of Newburgh, in Ireland; born April 30, 1749, and succeeded to the title upon the death of his grandfather, June 10, 1770; married, April 25, 1791, to Georgiana Charlotte Bertie, daughter of Peregrine duke of Ancaster, by whom he has issue a son, George-James-Horatio, vicecount Malpas, his heir apparent, born January 17, 1792; Charlotte; and William-Henry. The family of Cholmondeley is descended in the female line from Robert Fitzhugh, baron of Malpas, in the reign of William the Conqueror. William de Belward, heir of this barony in the reign of Henry II, had issue, 1. David, father of Philip, who assumed the surname of Egerton, and is ancestor to the late duke of Bridgewater. 2. Robert, who assumed the surname of Cholmondeley. Hugh Cholmondeley, in the reign of queen Elizabeth, was knighted in the memorable year of the Spanish invasion, and had issue two sons, Robert and Hugh. Robert, the eldest son, was created a baronet by James I, June 29, 1613; and by Charles I, 1628, was promoted to the dignity of viscount Cholmondeley of Kells, in the kingdom of Ireland. He exerted himself in behalf of the royal party in the civil war, and was farther promoted, September 1, 1646, to the degree of an English baron by the title of lord Cholmondeley; and March 5, in the following year, to the title of earl of Leinster, in the kingdom of Ireland. These titles became extinct upon his death, October 2, 1659; but that of viscount Cholmondeley of Kells, in the kingdom of Ireland, was immediately after the restoration, March 19, 1661, revived in favour of Robert, son of Hugh, his younger brother. Hugh, second lord viscount Cholmondeley, exerted himself in favour of the prince of Orange, afterwards William III, and was by that monarch created baron Cholmondeley of the kingdom of Great Britain; and by queen Anne, viscount Malpas, and earl of Cholmondeley. These titles were conferred with remainder to his younger brother, George; Hugh died January 18, 1725. George, second earl of Cholmondeley, served in the wars of king William, and was wounded at the battle of Steinkirk in 1692. By George I, March 16, 1715, he was created baron of Newburgh in the kingdom of Ireland.
Ireland, and soon after baron of Newburgh in the kingdom of Great Britain. He had issue, 1. George, third earl of Cholmondeley. 2. James, who embraced the military profession, and served in Flanders in the war of 1745, and in Great Britain during the rebellion of 1745. He died October 23, 1753; and the earl of Cholmondeley, his father, May 7, 1733. George, third earl of Cholmondeley, was appointed, December 10, 1743, lord keeper of the privy seal, which office he resigned in December following. In 1745 he raised a regiment to serve against the rebels. He married Mary, daughter of Robert first earl of Orford, and by her had issue, George, late viscount Malpas, born October 17, 1724, and married, January 19, 1747, Hefer, daughter and heir of sir Francis Edwards, bart., of Shrewsbury. His lordship died March 15, 1754, leaving issue, by his lady (who died at Hampton-court-palace, April 10, 1729, aged 53), George-James, the present earl; and a daughter, Hefer, married to William Clapcot Lisle, esq. by whom he had issue, George, earl of Oxford, born December 12, 1760, married to George, second lord Rodney, by whom he had issue, Robert, ninth earl of Kinnoul; 7. Sarah, born 19, 1760, married to Robert, ninth earl of Kinnoul; 8. Margaret, born May 4, 1765, married to Sir John Boyd, bart. William, born May 50, 1723, died prebendary of Worcester, July 8, 1769. Sarah, born in 1733, died in

Robert Harley was an active member of the House of Commons during the reigns of George I. and II., and was chosen, February 11, 1704, to the office of speaker; in which situation he continued till 1705. He was farther constituted, May 18, 1704, one of the principal secretaries of state to queen Anne, which he resigned in February 1706. He was declared, August 15, 1710, one of the lords commissioners of the treasury, and chancellor and was elected baronet of the honour and county of Lincoln, he was made to assist him at the council-table by the marquis de GuiscICH, a French spy, March 8, in the following year; and this incident tended greatly to the increase of his popularity. He was immediately after created baron Harley of Wigmore, earl of Oxford, and Mortimer, March 15, 1715, and July 1, 1716, Baron of Newborough in the kingdom of Great Britain.

Harley, Earl of Oxford.

Harley, Earl of Oxford and Mortimer, and Baron of Newburgh, by whom he had issue, 1. John, D.D. late bishop of Hereford, born September 29, 1727, married, March 3, 1754, Miss Muncy, daughter of Sir Henry Muncy, of Iccham, in the county of Southampton; by whom he has a daughter, born March 9, 1756; a son, lord Harley, heir apparent, born January 20, 1803; and a daughter, born December 12, 1801.

The family of Harley is more ancient than the Norman conquest. One of its ancestors commanded an army in the reign of king Ethelred, and defeated Sweyn king of Denmark, in 1013. Richard de Harley, in the reign of Henry III. assailed Roger Mortimer, lord of Wigmore, in his project for liberating prince Edward, afterwards Edward I. after the battle of Lewes. The Harley family was particularly patronized by that monarch, and attained in his reign to great opulence. Thomas Harley, in the reign of James I. obtained a grant of the honour and castle of Wigmore, in consideration of his descent from the family of Mortimer, lords of Wigmore.

Sir Robert Harley, knight of the bath, his son, was a considerable leader in the opposition to Charles I. His castle of Brampton fled a considerable siege in the civil war; but was at length taken and burned, in 1644, together with all his books, by order of the đình. When Charles was taken, as well as his son Sir Edward, also a knight of the bath, was among the members of the house of commons who voted, December 6, 1648, that the king's
in 1737. Martha, born November 23, 1736; married, April 20, 1754, Charles Milbourne, esq. The third child died April 11, 1755, and was succeeded by his eldest son, Edward, the late and fourth earl of Oxford, born September 2, 1728; married, July 11, 1751, Susan, daughter of W. Archer, esq. and dying, without issue, October 8, 1790, was succeeded by his nephew, Edward, the present and fifth earl.

CREATIONS.—Baron Harley, Earl of Mortimer, and Earl of Oxford, July 24, 1711.

ARMORIAL Bearings.—See the annexed Engraving. 

Motto.—Virtut et fide.
Dartmouth. Upon the accession of James II. he was constituted, in addition to his former office, master of the horse to the king, and confable of the Tower of London. He reigned the post of master of the horse, December 16, 1687; and in the following year was appointed admiral of the fleet continued to intercede for Prince of Orange. He had a strong personal attachment to James II. and at the period of the revolution was deprived of all his employments. He was on that account also committed prisoner to the Tower of London, in July 1691, and died in confinement October 23 in that year.

William, second lord Dartmouth, his son, was constituted, in 1719, one of the principal secretaries of state. In the following year he was created vicount Lewisham, and earl of Dartmouth; and, having resigned the office of secretary of state, was declared, in 1713, lord keeper of the privy seal, which office he held till September 1720. He married Anne, daughter of Heneage Finch, first earl of Aylesford, and died December 15, 1759, leaving issue six sons, and two daughters. George, vicount Lewisham, married Elizabeth, daughter and heir of Sir Arthur Kaye, baronet, of Kockton Grange, Yorkshire, by whom he had issue, 1. a daughter, who died an infant; 2. Arthur, who died October 6, 1729; 3. William, the second earl; 4. Anne, married to James Brudenell, earl of Cardigan, and died January 30, 1784, leaving issue; 5. Elizabeth, married March 12, 1759, to John Weyland, esq. His lordship died in the lifetime of his father, August 29, 1732; and his lady married, secondly, in January 1736, Francis North, eighth earl of Guildford, and died April 21, 1745, leaving issue; Heneage, who died in 1701; married, in June 1740, Catharine, daughter and co-heir of John Poga, esq. and had issue, Elizabeth, married March 17, 1763, to John Bernard, alderman of London, and died August 29, 1759, as did his lady November 12 following, leaving issue, 1. Heneage, born January 7, 1747, who married Elizabeth, daughter of Philip Muffgrave, baronet; 2. Catharine, married to Charles Cheffer, esq. brother to the first lord Bagot; 3. Anne, died July 30, 1752. William, died an infant. Henry-Bilson, born March 29, 1702, was constituted, April 6, 1754, chancellor and under treasurer of the exchequer, which office he resigned November 22, in the same year. Upon the appointment of the late earl of Chatham to be one of the principal secretaries of state, Mr. Legge was restored to the office of chancellor of the exchequer, November 19, 1757; and continued in that office till June 23, in the same year. He married, September 3, 1759, Mary, daughter and heir of Edward Stawell, lord Stawell, and died August 23, 1764, leaving issue one son, Henry, lord Stawell. His lady married, secondly, in September 1758, Wills, the second marquis of Downshire, and was created baroness Stawell, May 19, 1766. Edward, born in 1710, died in the West Indies, Robert, died in infancy. Barbara, born October 3, 1701; married Sir Walter Bagot, of Blithfield, in Staffordshire, by whom she had issue, Anne, married, in October 1739, Sir Liffer Holt, bart. of Atton, in Warwickshire, and died in 1765. William, the second earl, born June 20, 1731, succeeded his grandfather, December 15, 1752; married, January 14, 1752, Frances-Catharine, daughter and heir to the late Sir Charles Gunter Nicoll, K. B. and by her, who died July 24, 1785, he had issue, George, the present earl; William, who died October 19, 1764; Charles-Gunter, died October 21, 1782; Heneage, died September 2, 1783; Henry, born January 23, 1765; Arthur-Kaye, born October 25, 1765; Edward, born December 11, 1766; John, born of Windor and Wolverhampton; Auguustus-Gregor, married, December 15, 1795; Honora Bagot, daughter of the rev. Walter Bagot; Charlotte, born October 5, 1774; married, September 24, 1795, Charles Duncombe, esq. of Yorkshire, and has issue. The late earl, dying July 15, 1801, was succeeded by George, the present and third earl.

**CREATIONS.**—Baron of Dartmouth, December 2, 1682; vicount Lewisham, Earl of Dartmouth, September 5, 1713; and Baron Dartmouth, June 18, 1801.

**RESIDENCES.**—Sandwell Park in the county of Stafford, and Woodhall Hall in the county of York. — Town-house, Berkeley-square.

**BENNET, EARL OF TANKERVILLE.**

Charles BenneT, Earl of Tankerville, and Baron of Offulstone; born November 15, 1743; succeeded to the title upon the death of his father, October 27, 1767. He was appointed, April 13, 1782, to the office of joint postmaster-general, which he resigned April 10, 1783. He was restored to the same office January 6, in the following year; and having resigned in September 1786, was re-appointed in February 1787, and continued in this office till June 23, in the same year. He married Emma, daughter and co-heir of Sir James Colebrooke, bart. by whom he has issue, Caroline, married to Sir John Wrotteley, bart. Anna, married to the reverend William Beresford, youngest son of the hon. William Beresford, and died without issue, and nephew of the marquis of Waterford; Charles-Augustus, lord Offulston, heir apparent, born April 28, 1776, married, July 28, 1806, Madeleine de Gramont, daughter of the Duke de Gramont, and grand-daughter of the Duke de Polignac; Henry-Grey, born December 2, 1777; John-Aitley, born December 21, 1778; Margaret-Alida-Emma, born 1781; Elizabeth-Mary, born May 12, 1782; George, married to Miss Hill, and has issue, 1. Heneage, born January 7, 1783, married to Miss Hill, and has issue; 2. Robert-Augustus, born November 24, 1783; Augusta-Sophia, born November 27, 1787.

The family of BenneT was originally of Clapcot, in the county of Berks. Thomas BenneT, esq. in the reign of Henry VI. had issue, 1. Richard. 2. Thomas, lord-mayor of London in 1603, whose son Simon was created a baronet July 17, 1627, and died without issue. Richard had issue, 1. John, born 1651; 2. John, born 1652; 3. Thomas, whose son Thomas was created a baronet November 23, 1669, which title became extinct May 23, 1701. John, son of John, had issue. 1. John, created by Charles II. Baron of Offulston. 2. Henry, created by that monarch Baron Arlington of Arlington, vicount Thetford, and earl of Arlington, with remainder to Isabella, his daughter, and to the heirs and assigns of his body. His son, Charles, second earl of Ossulston, was created a baronet November 22, 1671; and continued in the office of joint postmaster-general, which he resigned April 9, 1757, and restored July 2, in the same year. He married, September 3, 1759, Mary, daughter and heir of Edward Stawell, lord Stawell, and died August 23, 1764, leaving issue one son, Henry, lord Stawell. His lady married, secondly, in September 1758, Wills, the second marquis of Downshire, and was created baroness Stawell, May 19, 1766. Edward, born in 1710, died in the West Indies, Robert, died in infancy. Barbara, born October 3, 1701; married Sir Walter Bagot, of Blithfield, in Staffordshire, by whom she had issue, Anne, married, in October 1739, Sir Liffer Holt, bart. of Atton, in Warwickshire, and died in 1765. William, the second earl, born June 20, 1731, succeeded his grandfather, December 15, 1752; married, January 14, 1752, Frances-Catharine, daughter and heir to the late Sir Charles Gunter Nicoll, K. B. and by her, who died July 24, 1785, he had issue, George, the present earl; William, who died October 19, 1784; Charles-Gunter, died October 21, 1782; Heneage, died September 2, 1783; Henry, born January 23, 1765; Arthur-Kaye, born October 25, 1765; Edward, born December 11, 1766; John, born of Windor and Wolverhampton; Auguustus-Gregor, married, December 15, 1795; Honora Bagot, daughter of the rev. Walter Bagot; Charlotte, born October 5, 1774; married, September 24, 1795, Charles Duncombe, esq. of Yorkshire, and has issue. The late earl, dying March 12, 1776, married, July 28, 1785, aged 105, had issue two sons and one daughter, viz. Charles, the late earl; Camilla, married to Gilbert-Pane Fleming, esq. by whom she was left a widow; and October 6, 1779, she married, secondly, John-Wake, esq. died February 7, 1783; George, born in 1727, died in 1793. His lordship, dying March 12, 1776, was succeeded by his eldest son, Charles, third earl, who married Alida, daughter and co-heir to Sir John Atley, bart. of Staffordshire; and by her, who died October 8, 1775, had Charles, the present earl; John-Grey, born
CREATIONS.—Baron Guernsey, March 15, 1703; Earl of Aylesford, October 19, 1714.

RESIDENCES.—Aylesford, in the county of Kent; and Becketting-hall, in the county of Warwick. —Town-house, Audley-square.

MOTTO.—Aperto vivere voto.—"To live without guile."

HERVEY, EARL OF BRISTOL.

FREDERIC-WILLIAM HERVEY, EARL OF BRISTOL, BARON HERVEY OF ICKWORTH, born in June 1769; succeeded his father, the late earl, July 8, 1833; married, February 20, 1798, Elizabeth-Albana Upton, eldest daughter of lord Tempelton; and had issue, Frederic-William lord Hervey, heir apparent; Augusta; and William, born October 1803.

The family of Hervey is descended from Robert Fitz-Hervey, younger son of Hervey duke of Orleans, who came over to England with William the Conqueror. Hervey, elected lord bishop of Bangor in 1105, and who, having resigned that see, was constituted first lord bishop of Ely in 1109, was one of his descendants. He died August 30, 1132. Thomas Hervey, in the reign of Edward IV, was constituted master general of the ordnance. His grandson William distinguished himself in the naval service of queen Elizabeth, and was by James I. May 31, 1619, created a baronet; and, August 5, 1620, baron of Ros in the kingdom of Ireland. By Charles I. he was farther created, February 7, 1628, lord Hervey of Kidbrooke, in the county of Kent; and upon his death in June 1642, the title became extinct. William, great grandson of John, had issue, 1. William, the literary friend of Mr. Cowley the poet, who celebrated his memory in an excellent elegy. 2. Thomas, John, the son of Thomas, was by queen Anne created baron Hervey of Ickworth, and by George I. earl of Bristol. He had issue, 1. John, lord Hervey. 2. Thomas, who married Anna, daughter and heir of Francis Coghlene of the kingdom of Ireland, esq. by which lady he had issue, William-Thomas. Thomas, the father, died January 10, 1775. 3. William, who married Elizabeth, daughter of Thomas Ridge, of Portmouth in the county of Southampton, esq. and heir to sir Thomas Ridge, knt. by which lady, who died July 13, 1756, he had issue, 1. William, born February 11, 1735; 2. Frederic-Augustus, born October 12, 1736; 3. Mary, born May 21, 1738; 4. Henry, who embraced the clerical profession, and married Catharine, daughter of sir Thomas Afton, of Afton in the county of Chester, baronet, in consequence of which marriage he assumed the name of Afton. Henry Hervey, his son, married Mifs Dickenfon of Lancaster, by which lady he has issue, William-Thomas, who died January 20, 1775. 5. Francis, who married Elizabeth, daughter of Charles Hervey, of Kidbrook, in the county of Kent; and married, December 31, 1743, Martha-Maria, great grand-daughter of Thomas first earl of Berks. 6. Felton, who married Dorothy, daughter of Solomon Ashley, esq. by which lady, who died November 8, 1761, he had issue, Felton-Lionel, Emilia, Caroline, and Elizabeth. Felton-Lionel married Selina, daughter and heir of sir Thomas Afton, of Afton, by which marriage he assumed the name of Afton. 7. Frederic-Anne-Lionel; and Selina-Mary. He died in September 1785; and Felton, his father, died August 18, 1775.

John lord Hervey was constituted, May 1, 1740, lord keeper of the privy seal. He was a nobleman of considerabe eloquence and learning, the patron of Dr. Conyers Middleton, and of other learned men; and was the author of several elegies, and other poems. His lordship married Mary, daughter of Nicholas le Pell, esq. by which lady he had issue, 1. George-William, second earl of Bristol. 2. Augusta-John, third earl of Bristol. 3. Mary, born in 1746; and married to George Fitzgerald, esq. 4. Frederic-Augustus, fourth earl of Bristol. 5. William, a general in the army. 6. Le Pell, married.
married to Constance Phipps, first lord Mulgrave, and had issue. 7. Emilia Caroline, Naffau, 8. Carolina. Lord Hervey died August 5, 1743.

George-William, second earl of Bristol, was declared, June 17, 1758, ambasassador extraordinary to the court of Madrid; which residence he quitied December 17, 1761. He was farther appointed, September 26, 1766, lord lieutenant of the kingdom of Ireland, and resigned that office in October 1767. He was constituted, November 2, in the following year, lord keeper of the privy seal; and exchanged that office January 29, 1772, for that of groom of the stole to the king. He died March 13, 1775.

Augustus John, third earl of Bristol, embraced the pension of the navy, in which he served with considerable reputation. He was constituted, in 1775, vice admiral of the blue squadron. His lordship married Miss Elizabeth Chudleigh, who afterwards married Evelyn Pierrepont, duke of Kingston, in her husband's lifetime, and was styled duchess of Kingston; but being convicted of bigamy by the house of peers April 22, 1776, was forbidden to make use of that title. She retired to the continent, and died August 26, 1778. The earl her husband, died December 23, 1779, without issue, and was succeeded by his next brother, Frederic-Augustus, the fourth earl, bishop of Derry, who married Elizabeth, daughter of sir Jermyn Danvers, bart., and had issue, John-Augustus lord Hervey, a captain in the royal navy, born May 1, 1780; Miss Elizabeth, March 30, 1783, married to Henry Seymour, esq. nephew to Edward duke of Somerset, and died June 3, 1772, leaving issue, George-Nassau, third earl Cowper. His lordship married, May 1, 1750, his second wife, Georgiana Caroline, daughter of John earl Granville, widow of John Spencer, esq. and mother to the first earl Spencer, by whom he had no issue; and, dying September 18, 1754, was succeeded by George-Nassau, third earl, born August 26, 1753; married, June 2, 1775, Anne, daughter of Francis Gore, esq. of Southampton, third earl Cowper. His lordship died at Florence, December 22, 1789, when he was succeeded by his son, George-Augustus, the fourth earl, born August 1, 1776, who dying February 13, 1799, unmarried, was succeeded by his brother, Edward-Spencer, the earl's brother.

The presumptive heir is Edward Spencer, the earl's brother.

CReATIONS.—Baron Cowper, November 9, 1706; Viscount and Earl Cowper, March 18, 1707.

RESIDENCES.—Colne-Green Park, in the county of Hertford; and Mount House, in the county of Kent.

Town-houfe, George-street, Hanover-square.

Armorial Bearings.—See the annexed Engraving. Motto.—Je n'oublerai jamais.—"I shall never forget."

COWPER, EARL COWPER.

PETER-LEOPOLD LOUIS FRANCIS COWPER, EARL COWPER, Vincount Fordwich, Baron Cowper of Wingham, a Baronet, and Count of the Holy Roman Empire; born May 6, 1778; succeeded his brother, the late earl, July 12, 1799; married, July 21, 1803, the honourable Amelia Lambie, daughter of vicount Melborne.

The family of Cowper was of considerable eminence in the reign of Edward IV. and one of them was a patriarchal alderman of London, in the reign of Henry VIII. William, son to the alderman, was first created a baronet of Nova Scotia; and afterwards, March 4, 1642, a baronet of England. He was imprisoned for his loyalty to Charles I. to whom he was knighted by John, his son, who died in confinement. Sir William, second baronet, son of John, distinguished himself in the whig party in the reign of Charles II. and had issue, William, third baronet; and Spencer, who was appointed, October 24, 1727, one of the judges of the court of Common Pleas; and died December 10, in the following year. William greatly distinguished himself in the profession of the law; and was appointed by queen Anne, October 11, 1705, lord keeper of the great seal; and in the following year created Baron Cowper of Wingham. He was farther declared, May 4, 1707, lord high chancellor of Great Britain, which office he resigned September 14, 1710, upon the dissolution of the whig administration. He was referred to the appointment of lord chancellor by George I. September 22, 1714, and a few years after created earl Cowper. He resigned the seals in May 1718, and died October 10, 1725.

George-William, second earl Cowper, his son, added to his own the surname of Clavering, which had been the name of his mother. He married Henrietta, daughter of Henry d'Averquerque earl of Grantham; by which lady, who died October 13, 1747, he had issue, Caroline, married to Henry Seymour, esq. nephew to Edward duke of Somerset, and died June 3, 1772, leaving issue, George-Nassau, fourth earl. He was constituted, in 1775, vice admiral of the blue squadron, and exchanged that office January 29, 1772, for that of groom of the stole to the king. He died March 13, 1775.

FERMOR, EARL OF POMFRET.

GEORGE FERMOR, EARL OF POMFRET, Baron Leominster, and a Baronet; L.L.D. born January 6, 1768; succeeded his father, the late earl, June 9, 1785; married, August 29, 1793, Miss Browne, daughter of Trollope Browne, esq.

The family of Ferman was in high repute in the reign of Richard III. Richard Ferman, in the reign of Henry VII., suffered the penalties of a prelate, for conveying reversion to Nicholas Thayne, at that time imprisoned for denying the king's supremacy. George, his grandson, fent his youth in the wars of the Netherlands, under William the first prince of Orange; and was the friend of Philip Sidney. William, his grandson, was created a baronet, and suffered considerable losses for his loyalty to Charles I. and Hatton, his brother, was killed in the civil wars, January 11, 1645. Sir William, second baron, his son, was created by William III., second lord Leominster.

Thomas, second lord Leominster, was created by George I. earl of Pomfret, and married Henrietta-Louisa, daughter of John Jeffries; by which lady, whose issue, he had four sons and five daughters:

1. George, the second earl, born in 1722; married, April 30, 1764, to Peter Denys, esquire. The earl died June 9, 1785, and was succeeded by his eldest son, George, the fourth earl; married May 5, 1782, Elizabeth-Louisa, daughter of his uncle, James, the second earl, born in 1722; married, April 30, 1764, Anna-Maria, daughter and sole heir of Draycott, esq. of Sunbury, in Middlesex, by whom he had issue; 1. George, the present earl. 2. Thomas, born November 21, 1770, a colonel in the army; married to Peter Denys, esq. The earl died June 9, 1785, and was succeeded by his eldest son, George, the present and third earl. The heir presumptive is Thomas-William, his lordship's brother.

C RE AT I O N S.—Baron Leominster, in the county of Hereford, April 12, 1692; Earl of Pomfret, otherwise Ponterfract, in the county of York, December 27, 1721.

R ES I D E N C E S.—Edaston Hall, in the county of Northampton; and Sunbury, in the county of Middlesex.—Town-house, Portman-square.

GRAHAM, EARL GRAHAM.

WILLIAM GRAHAM, EARL AND BARON GRAHAM, of Belford, in the county of Northumberland, in England, and Duke of Montrose, in Scotland; Maitre of the Horse to the King.—See D U K E OF MONTROSE under Dukes of Scotland.

WALDEGRAVE, EARL WALDEGRAVE.

JOHN JAMES WALDEGRAVE, EARL WALDEGRAVE, Viscount Chewton, Baron Waldegrave, and a Baronet; a Captain in the 7th Regiment of Dragoons; born July 29, 1755; and succeeded his brother, the late earl, June 9, 1785.

The family of Waldegrave was among the patriotic barons in the reign of King John; and Sir Richard Waldegrave, in the reign of Richard II. was elected speaker of the house of commons, and died May 2, 1401. His poffessor adhered to the party of the house of York; and when the. seventy in defiance, was a strenuous supporter of queen Mary, having been on that account imprisoned by Henry VIII. and after her accession was appointed chancellor of the duchy and county palatine of Lancaster. Upon the death of that prince he was vindictively treated, and committed to the Tower, where he died, September 1, 1571. Edward, his grandson, adhered to the party of Charles I., by whom he was created a baronet, August 11, 1643. Sir Henry Waldegrave, fourth baronet, his great grandson, married Henrietta, daughter of James II. by Arabella, sister of John Churchill duke of Marlborough; and by that monarch was created baron Waldegrave of Chewton. James, second lord Waldegrave, was, May 26, 1727, appointed ambassador extraordinary to the court of Vienna; and July 7, 1730, ambassador extraordinary to the court of Versailles. By George II. he was created viscount Chewton, and earl Waldegrave, and died April 11, 1741, leaving issue, 1. James, second earl Waldegrave. 2. John, third earl Waldegrave.

James, second earl Waldegrave, was appointed, December 13, 1755, to the place of ambassador extraordinary to the court of Warsaw; succeeded by George III. He married, May 25, 1759, Maria, daughter of Sir Edward Walpole, knight of the bath, son of Robert first earl of Orford; by which lady he had issue. 1. Elizabeth-Louisa, born March 24, 1760, and married to George earl Waldegrave, her first cousin. 2. Charlotte-Maria, born October 11, 1761, and married to George-Henry earl of Euston, son of Augustus-Henry duke of Grafton. 3. Anna-Hortensia, born November 8, 1762, married to lord Hugh Seymour, brother to the second marquis of Hertford, an admiral in the royal navy, who died Feb. 12, 1801, leaving issue; and his lady died July 12, 1801. The countess married, secondly, Sept. 6, 1766, his royal highness William-Henry duke of Gloucester, and by which marriage had issue. 1. Elizabeth, born Aug. 23, 1807, leaving issue. James, the third earl, dying without issue, and leaving his property to his only brother, John, third earl, a general in the army, governor of Plymouth, and master of the horfe to the queen; born April 28, 1783; married, in 1755, Elizabeth Gower, sister to Granville-Lecon, first marquis of Stafford, by whom he had issue, George, the fourth earl; William, an admiral of the white, created baron Radstock, in Ireland; married, at Smyrna, in 1785, Cornelia, second daughter of David Van Lennep, esq. and has issue. John, born November 27, 1756, died in 1780; Elizabeth, and Amelia, twins, born May 26, 1758, and both died in June 1768; Elizabeth, married, April 28, 1791, the earl of Cardigan; Frances, born October 6, 1761, died in May 1768; Catharine, born March 1, 1760. His lordship, dying October 23, 1784, was succeeded by his son, George, the fourth earl; married May 5, 1782, Elizabeth-Louisa, daughter of his uncle, James, the second earl, by whom he had issue, George, fifth earl; John-James, sixth earl; Edward-William, in the 7th regiment of dragoons; Wilhelmina, deceased; Maria, married, January 26, 1782, Nathaniel Micklethwaite, baronet, of Beeton-hall, in Norfolk, esquire, and by her, who died March 30, 1805, left one son; Charlotte, deceased. His lordship dying October 17, 1789, was succeeded by his son, George, fifth earl, born July 12, 1784, and who
was unfortunately drowned in the Thames, near Eton, June 29, 1754; and was succeeded by his brother, John James, the sixth and present earl. The premonitory signs are that he was the eldest.

CREATIONS.—Baron Waldegrave of CHEWTON, in the county of Somerset, January 20, 1685; Viscount CHEWTON, and Earl Waldegrave, in the county of Northampton, September 13, 1729.

RESIDENCES.—Navelock Park, in the country of ERF; and Haver Place, in the county of Kent.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Calum, non animum.—" You may change your climate, but not your mind."

ASHBURNHAM, EARL OF ASHBURNHAM.

JOHN ASHBURNHAM, EARL OF ASHBURNHAM; LL.D., born October 30, 1744; and succeeded to the title upon the death of his father, March 10, 1737. He was appointed one of the lords of the bedchamber to George II. and July 14, 1753, ranger and keeper of St. James’s Park and Hyde Park. He resigned both these employments in 1763, was promoted, November 10, 1775, to be groom of the stool at his majesty’s personal attendance, if he reigned in March, 1782. His lordship married, June 28, 1756, Elizabeth, daughter of Ambrose Crawley, of Crawley, in the county of Suffolk, esquire; by which lady, who died in February 1781, he had issue, George, viscount St. Alaph, born February 2, 1758, and died February 14 following; George, viscount St. Alaph, heir-apparent to the title of earl, as Baron Ashburnham, March 23, 1803; born December 25, 1769; married, August 28, 1784, Sophia, third daughter of Thomas, first marquis of Bath, by whom, died April 9, 1791, he had George, born October 9, 1785; Elizabeth; Sophia; and John, a captain in the 7th regiment of foot. Secondly, July 23, 1795, Charlotte, eldest daughter of Algernon earl of Lindsey, and has issue a son. Henrietta-Theodora, born November 8, 1759; Jemima-Elizabeth, married February 26, 1785, James duke of Montrose, and died September 28, 1786. Elizabeth-Frances, born May 10, 1763. Theodosia-Maria, married to Robert Vyner, esq. of Gautyby, in Lincolnshire, and his issue.

The family of Ashburnham is descended from Bertram de Eshburnham, constable of Dover-castle in the reign of King Harold, who place he bravely defended against William the Conqueror, who ordered his head to be stricken off, together with those of his two sons, Philip and Michael. Sir John Ashburnham, in the reign of King Edward the First, and eldest daughter of Sir Thomas Beaumont, of Staughton, in the county of Leicestier, knighthood; by which lady, who was after his decease created by Charles I. baronets of Crandom in the kingdom of Scotland, he had issue, i. John, groom of the bedchamber and a confidential servant of king Charles. He attended that monarch in his confinement at Carlbrook-castle in the isle of Wight, and incurred the resentment of Cromwell, by whom he was committed till the death of the usurper. He died June 15, 1671. ii. William, who entered into the military service of Charles I. and endured a siege of four months in the town of Weymouth, in 1644, and he died in December 1679. John, grandfather of John, was by William II. created Baron Ashburnham; and had issue, i. William, second lord Ashburnham; ii. John, third lord Ashburnham.

John, third lord Ashburnham, was by George II. created viscount St. Alaph, and earl of Ashburnham; and appointed, November 23, 1727, steward of the royal household, which office he resigned in 1733. He married, first, Mary Butler, daughter of James duke of Ormond, who died without surviving issue, January 12, 1713. He married, secondly, Henrietta, daughter of William, ninth earl of Derby, and widow of John An-
ord of the island of Jamaica, esquire; by which lady, who was appointed, September 5, 1761, one of the ladies of the bedchamber to the queen, and married, secondly, sir George Howard, knight of the bath, he had issue, Thomas, third earl of Effingham, born January 13, 1744; married to Catharine, daughter of Metcalfe Proctor, esq. of Thorne, in Yorkshire, by whom, who died October 14, 1791, at New York, and his lordship November 15 following, he had no issue, and was succeeded by his brother, Richard, the present earl. Elizabeth, born November 10, 1759; married to the right rev. Henry, R. G. Howard of Effingham, late bishop of Exeter, by whom she had no issue; and by his death was succeeded in the earldom by his brother, Charles, fifth earl of Effingham, born January 13, 1722; married in 1745 Caroline, daughter of Charles second duke of Grafton; by which lady he has issue a son, born June 20, 1787; and a daughter, born April 4, 1748, who was appointed, September 5, 1761, one of the ladies of his majesty's principal secretaries of state; which office he exchanged at the close of the administration of Mr. Pelham, from the tenth to the end of the year 1751. He died December 8, 1756.

STANHOPE, EARL OF HARRINGTON.

Charles Stanhope, earl of Harrington, a general in the army, and colonel of the first regiment of life-guards; born March 20, 1753; succeeded his father, the late earl, April 1, 1779; married, May 22, 1772, Mary, daughter of Barry, sixth earl of Barrymore of the kingdom of Ireland, and widow of Henry Grey, esq. of Billingbear, Berks. She died without issue; and his lordship dying, November 22, 1799, his eldest son succeeded. 5. Catharine, married to the hon. Lockhart Gordon, a major in the army, who died August 1794. 6. Elizabeth, born May 22, 1755; married, June 16, 1776, the late lord Foley, and died September 1, 1781, leaving issue a daughter, Caroline, married to Kenneth Mackenzie, esq. of Thorpe, in Yorkshire, by whom he has issue, a son, born June 20, 1787; and a daughter, born April 9, 1767.

WALLOP, EARL OF PORTSMOUTH.

John, Charles Wallop, earl of Portsmouth, viccount Lymington, and Baron Wallop of Farleigh-Wallop, in the county of Southampton; born December 13, 1757; succeeded his father, the late earl, February 20, 1796. The presumptive heir is Francis Herriing, born May 22, 1755; married, June 16, 1776. The presumptive heir is Francis Herriing, born May 22, 1755; married, June 16, 1776.
her 29, 1742; married, June 13, 1742; August 22, 1743,

in Hampshire. In Upper Wallop, born May 20, 1784, and died November 20, 1790. His father, by whom he had issue, John-Charles, the present and third earl. The presumptive heir is Newton, brother to the present earl. Creations.—Baron Wallop of Wallop in the county of Southamptom, and Wicount Lymington, June 11, 1720. Earl of Portsmouth, April 11, 1743.

Baron Wallop of Wallop, or Welhop, in the county of Southamptom. —Town-houfe, in Lincoln's-Inn-Fields.

Amorial Bearins.—See the annexed Engraving. Of arms expressive of situation, or place of residence, those of the earl of Portsmouth have been added as an example. Wallop is the name of two parishes, near Whitechurch in Hampshire. In Upper Wallop arises, on the side of a hill, a (line, as the name, according to Camden, was originally written, implying a well or spring on the side of a hill;) which, flowing through Nether Wallop, the other parish, falls into the Tees, a river adjacent. The ancient and noble family of Wallop, originally possessing this part of the country, were denominatet from hence; and the family of Greville, in the reign of Henry VIII. was constituted, by Sir Fulke Greville, knight of the bath; and, with the family of Beauclerk earls of Warwick, took place. The issue of this marriage was, 1. Fulke, who had issue for Fulke Greville, knight of the bath; and Margaret, by whom the title of baron Willoughby de Brooke was engrafted into the family of Verney. 2. Robert, grandson of Robert, second lord Brooke of the family of Greville.

Sir Fulke Greville, knight of the bath, was the most intimate friend of the celebrated sir Philip Sidney, with whom, and sir Francis Drake, he formed a project for invading the Spanish dominions in South America. He was of a life of his heroic friend; and together with him, cultivated the arts of eloquence and poetry, and supported literary men, being the particular patron of Camden the antiquary, and of Speed the author of the Chronicle. He was treasurer of the navy to queen Elizabeth; which office he exchanged, soon after the accession of James I. for those of chancellor and under-treasurer of the exchequer. The title of baron Willoughby de Brooke being suffered to remain dormant, sir Fulke Greville was created by James I. baron Brooke of Beauchamp-court, with remainder to Robert, his great nephew. About the same time, in January 1621, he resigned the office of chancellor of the exchequer, and was inhumanly murdered by one of his own servants, to whom he had refused to bequeath a legacy, September 30, 1628.

Robert, second lord Brooke, was among those who opposed the arbitrary taxes of Charles I., and formed a project, together with lord vifcount Say and Sele, for removing to America, in which he was disappointed. He was not of service to the parliamentary party upon the breaking out of the civil war, and was kept at the siege of Litchfield, March 1, 1643, in which siege he was commander in chief; and the town surrendered immediately after his death. His character is highly applauded by Milton, in his Pia for the Liberty of the Press. He had issue, 1. Francis, third lord Brooke. 2. Robert, fourth lord Brooke, who was greatly instrumental in effecting the restoration of Charles II. 3. Fulke, fifth lord Brooke.

Fulke, fifth lord Brooke, had issue, 1. Francis, father of Fulke, sixth lord Brooke, and of William, seventh lord Brooke. 2. Algernon, who married Mary, granddaughter of Henry, first duke of Beaufort; by which lady he had issue Mary, married to Stuckey Brookton, esq. 3. Fulke Greville, knight of the bath; and Margaret, whom he had issue: Charlotte Mary, married to John Crewe of Crewe Hall in the county of Cheshire, esquire.

Francis, eighth lord Brooke, son of William, seventh lord Brooke, and father of the present earl, born in 1719, married July 12, 1729, to Charlotte, eldest daughter of lord Archibald Hamilton, by whom he had issue; and succeeded his father, in 1723, was, on July 7, 1748, created earl Brooke; and on November 27, 1759, by George II. advanced to the farther dignity of earl of Warwick, of Warwick Castle. He married May 16, 1742, Elizabeth, eldest daughter of lord Archibald Hamilton, by whom he had issue: and succeeded his father, in 1755, by the death of Sir Francis Drake, he formed a project for invading the Spanish dominions in South America. He was of a life of his heroic friend; and together with him, cultivated the arts of eloquence and poetry, and supported literary men, being the particular patron of Camden the antiquary, and of Speed the author of the Chronicle. He was treasurer of the navy to queen Elizabeth; which office he exchanged, soon after the accession of James I. for those of chancellor and under-treasurer of the exchequer. The title of baron Willoughby de Brooke being suffered to remain dormant, sir Fulke Greville was created by James I. baron Brooke of Beauchamp-court, with remainder to Robert, his great nephew. About the same time, in January 1621, he resigned the office of chancellor of the exchequer, and was inhumanly murdered by one of his own servants, to whom he had refused to bequeath a legacy, September 30, 1628.

Robert, second lord Brooke, was among those who opposed the arbitrary taxes of Charles I., and formed a project, together with lord vifcount Say and Sele, for removing to America, in which he was disappointed. He was not of service to the parliamentary party upon the breaking out of the civil war, and was kept at the siege of Litchfield, March 1, 1643, in which siege he was commander in chief; and the town surrendered immediately after his death. His character is highly applauded by Milton, in his Pia for the Liberty of the Press. He had issue, 1. Francis, third lord Brooke. 2. Robert, fourth lord Brooke, who was greatly instrumental in effecting the restoration of Charles II. 3. Fulke, fifth lord Brooke.

Fulke, fifth lord Brooke, had issue, 1. Francis, father of Fulke, sixth lord Brooke, and of William, seventh lord Brooke. 2. Algernon, who married Mary, granddaughter of Henry, first duke of Beaufort; by which lady he had issue Mary, married to Stuckey Brookton, esq. 3. Fulke Greville, knight of the bath; and Margaret, whom he had issue: Charlotte Mary, married to John Crewe of Crewe Hall in the county of Cheshire, esquire.

Francis, eighth lord Brooke, son of William, seventh lord Brooke, and father of the present earl, born in 1719, married July 12, 1729, to Charlotte, eldest daughter of lord Archibald Hamilton, by whom he had issue: and succeeded his father, in 1723, was, on July 7, 1748, created earl Brooke; and on November 27, 1759, by George II. advanced to the farther dignity of earl of Warwick, of Warwick Castle. He married May 16, 1742, Elizabeth, eldest daughter of lord Archibald Hamilton, by whom he had issue: and succeeded his father, in 1755, by the death of Sir Francis Drake, he formed a project for invading the Spanish dominions in South America. Robert, second lord Brooke, was among those who opposed the arbitrary taxes of Charles I., and formed a project, together with lord vifcount Say and Sele, for removing to America, in which he was disappointed. He was not of service to the parliamentary party upon the breaking out of the civil war, and was kept at the siege of Litchfield, March 1, 1643, in which siege he was commander in chief; and the town surrendered immediately after his death. His character is highly applauded by Milton, in his Pia for the Liberty of the Press. He had issue, 1. Francis, third lord Brooke. 2. Robert, fourth lord Brooke, who was greatly instrumental in effecting the restoration of Charles II. 3. Fulke, fifth lord Brooke.
groom of the bed-chamber to the king, married to Louisa, countess of Mansfield, and sister of the present viscount Calthart, and has issue, Georgiana-Murray-Greville, born July 28, 1798, and Louisa-Murray-Greville, born February 8, 1800; Anne, born August 26, 1760, died May 26, 1783. His lordship, dying July 6, 1773, was succeeded by George, the present and second earl.

CREATIONS.—Baron Brooke, January 9, 1620; Earl Brooke, July 7, 1746; and earl of Warwick, November 27, 1759.

RESIDENCES.—Warwick Castle, in the county of Warwick; and Edling, in the county of Middlesex.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Furca a nostra voce.—"I can scarcely call these things our own."

HOBART, EARL OF BUCKINGHAMSHIRE.

ROBERT HOBART, EARL OF BUCKINGHAMSHIRE, Baron Hobart of Blickling, and a Baronet; succeeded his father, the late earl, November 14, 1804; born May 6, 1760; Clerk of the Pleas in the Exchequer in Ireland, and a Privy Councillor there, and was called by writ to the House of Peers, November 29, 1798, during the life-time of his father, as Baron Hobart. He married, first, January 4, 1793, Margaretta, relict of Thomas Adderley, of Infinnahan, in the county of Cork, esq. by which lady, who died August 9, 1796, he has issue, Jane, born February 22, 1794. The earl married, secondly, June 1, 1797, Eleanor-Agnes Eden, daughter of lord Auckland.

The family of Hobart was of considerable eminence in the reign of Richard II. James Hobart, in the reign of Henry VII. was constituted, July 8, 1486, his majesty's attorney-general, and died in 1507. Henry, his great-grandson, was also appointed, July 4, 1606, attorney-general. He was advanced, May 23, 1611, to the degree of a baronet; and farther promoted, November 26, 1613, to the office of lord chief justice of the court of common pleas. He died December 26, 1625, leaving issue, 1. Sir John, second baronet. 2. Sir Miles Hobart, knight, who distinguished himself in the opposition to Charles I. and was imprisoned in 1629, for detaining the speaker in the chair of the house of commons, after the king had commanded his presence in the house of lords. He was liberated from confinement in 1631, and died in 1639. The parliament retained so high a senti of his services, that in 1646 they voted the sum of five thousand pounds to be given to his family, as a small acknowledgment of his merits. Sir Henry, fourth baronet, had four daughters, of whom one, named Maria-Anna, married the right honourable John Sullivan, by whom she has issue; Charlotte, married to Edward-Debororough Taylor, esq. Maria-Anne, married to George, third earl of Guildford, and died in 1794, leaving a daughter, Maria, born December 25, 1793. The earl died November 14, 1804, and was succeeded by his eldest son, Robert, fourth and present earl.

CREATIONS.—Baron proprietors of the Weft Riding of Yorkshire, High Steward of Hull, Cuttos Rotulorum of the Soke of Peterborough, and Recorder of Higham Ferrers; born May 30, 1748; succeeded his father, the late earl, August 9, 1796; married, July 11, 1770, Charlotte Ponsonby, youngest daughter of William Ponsonby, esq. of Higham Ferrers, by Caroline Cavendish, eldest daughter of William Cavendish, duke of Devonshire, by whom he has issue, Charles-William, vicount Milton, heir apparent; born May 4, 1786, married, July 8, 1806, Charlotte, daughter of Thomas lord Dundas, by lady Charlotte Fitzwilliam, daughter of William, first earl Fitzwilliam, and has issue a daughter, born July 12, 1807.

The family of Fitzwilliam is descended from sir William Fitzgodric, cousin to Edward the Confessor. Sir William Fitzwilliam, his son, was appointed by that monarch ambaassador to the court of William duke of Normandy, afterwards William I. surmaned the Con¬quering, and attending that monarch in his expedition into England, in the quality of marshall of his army, he signified his valor at the battle of Hastings, October 14, 1066. Sir William, third in descent from sir William, married Ela, daughter of William de Warenne earl of Surrey, great-grandson of William the Con¬quering. Sir William, his grandson, married Ela, daughter of Hameline Plantagenet earl of Surrey, natural brother of the constable of England, by whom he had issue, 1. William, 2. Edmund, whole great-grandson, sir Thomas, had issue three sons; Thomas and John, killed at the battle of Flodden-field; and William, who was appointed by Henry VIII. in 1533; lord keeper of the privy seal; and exchanged that office, Aug. 16, 1536; for the appointment of lord high admiral of England and Ireland.

FITZWILLIAM, EARL FITZWILLIAM.

WILLIAM-WENTWORTH FITZWILLIAM, EARL FITZWILLIAM, Viscount Milton, Lord Fitzwilliam, and Baron of Milton, in England; also Earl Fitzwilliam, Viscount Milton, and Baron Fitzwilliam, of Lifford in Ireland: Lord Lieutenant and Cuffos Rotulorum of the Weft Riding of Yorkshire, High Steward of Hull, Cufios Rotulorum of the Soke of Peterborough, and Recorder of Higham Ferrers; born May 30, 1748; succeeded his father, the late earl, August 9, 1796; married, July 11, 1770, Charlotte Ponsonby, youngest daughter of William Ponsonby, esq. of Higham Ferrers, by Caroline Cavendish, eldest daughter of William Cavendish, duke of Devonshire, by whom he has issue, Charles-William, vicount Milton, heir apparent, born May 4, 1786, married, July 8, 1806, Charlotte, daughter of Thomas lord Dundas, by lady Charlotte Fitzwilliam, daughter of William, first earl Fitzwilliam, and has issue a daughter, born July 12, 1807.

The family of Fitzwilliam is descended from sir William Fitzgodric, cousin to Edward the Confessor. Sir William Fitzwilliam, his son, was appointed by that monarch ambaassador to the court of William duke of Normandy, afterwards William I. surmaned the Con¬quering, and attending that monarch in his expedition into England, in the quality of marshall of his army, he signified his valor at the battle of Hastings, October 14, 1066. Sir William, third in descent from sir William, married Ela, daughter of William de Warenne earl of Surrey, great-grandson of William the Con¬quering. Sir William, his grandson, married Ela, daughter of Hameline Plantagenet earl of Surrey, natural brother of the constable of England, by whom he had issue, 1. William, 2. Edmund, whole great-grandson, sir Thomas, had issue three sons; Thomas and John, killed at the battle of Flodden-field; and William, who was appointed by Henry VIII. in 1533; lord keeper of the privy seal; and exchanged that office, Aug. 16, 1536; for the appointment of lord high admiral of England and Ireland.
Ireland. He was created, October 18, 1537, earl of Southampton, which title became extinct by his death in 1556.

William Fitzwilliam, great grandson of William, brother of Edmund, honourably distinguished himself by his fidelity to cardinal Wolsey in the period of his disgrace. Sir William, his grandson, was patronised by John, first earl of Bedford, lord high admiral of England; he was appointed by queen Elizabeth, January 15, 1560, lord deputy of the kingdom of Ireland, which office he resigned June 25, in the following year. He was again raised to the same office, February 15, 1568, in which he continued till August 11, 1594. He was also several times one of the lords justices for that kingdom, and was near thirty years commander in chief of the army there, where he performed considerable services against the rebellious natives. He was some time constable of Fotheringay-castle in the county of Northampton, where he had the person of Mary queen of Scots in which he continued till August 11, 1594. He was again raised to the same office, February 20, 1588, and was several times one of the lords justices for that kingdom. His fidelity to cardinal Wolsey in the period of his disgrace, and his services against the rebellious natives, were highly distinguished by his integrity, firmness, and eloquence. He married Catharine, daughter of Charles, sixth duke of Somerset; by which lady, who died in April 1713, he had issue, 1. Charles, fourth baronet, 2. Francis, who took the name of O'Brien, in compliance with the will of Henry O'Brien, earl of Thomond, of the kingdom of Ireland; and was created, in 1756, baron Finglas, and earl of Thomond, of that kingdom. Upon his death, July 21, 1774, these titles became extinct. Sir William Wyndham died June 17, 1740.

Sir Charles, fourth baronet, succeeded upon the death of his uncle Algernon, seventh duke of Somerset, February 7, 1750, to the titles of earl of Egremont, and baron of Cockermouth. He was constituted, October 9, 1751, one of his majesty's principal secretaries of state. His lordship married, March 13, 1753, Alicia-Maria, daughter of George, second lord Carpenter, who, after his lordship's decease, married, secondly, the Rev. Mr. Bruhl of Saxony. The countess is survived by leaving issue one daughter, married to Hugh Scott, of Harden in North Britain, esq. by lady Diana Scott, daughter of the third earl of Marchmont, and has issue. His lordship died August 24, 1756, leaving issue, George, the present earl; Elizabeth-Alicia-Maria, born November 29, 1756, married to Henry Herbert, earl of Carnarvon, and has issue; Frances, born July 9, 1756, married to Charles earl of Romney, and died January 21, 1756, leaving issue; Charlotte-Catharine, born September 3, 1756, died young; Percy-Charles, born September 3, 1757; Charles-William, M.P. for the county of Suffolk, born October 8, 1756, married, February 4, 1801, lady Anne Lambton, daughter of George earl of Jersey, and relict of William-Henry Lambton, esq. William-Frederic, born April 7, 1763, married, July 21, 1783, Miss Hartford, daughter of Frederic Calvert, earl of Baltimore, by whom he has George-Francis, born August 30, 1785; Laura; Julia, and a son, born at Florentia, in July 1794. The late earl's sister, Eliza-Ann, married, in 1746, to George-Thomas, earl of Richford, first earl Temple, and died December 5, 1769, having had George, the present marquis of Buckingham; the right honourable Thomas Grenville; and William, lord Grenville, and other issue. Sir William Wyndham, the first earl married, for his second wife, Maria-
Maria-Catharine, daughter of Myneher Peter de Jonghe, of Utrecht in Holland, and widow of William marquis of Blandford, and fiffer of the late countess of Denbigh, but by her he had no issue; and, dying June 1740, was succeeded in the baronetage by his son George, the present and second earl.

CREATIONS.—Baron of Cockermouth, and earl of Egremont in the county of Cumberland, Oct. 3, 1749.

RESIDENCES.—Orchard Wyndham, in the county of Somerset; and Petworth-park, in the county of Sussex.—Town-house, Grosvenor-place.

GEORGE-SIMON HARCOURT, EARL AND VICECOUNT HARCOURT, Viscounet of Nuneham, and Baron Harcourt of Stanton Harcourt, Master of the Horse to the Queen, L.L.D. born August 1, 1736; and succeeded to the title upon the death of his father, September 16, 1777. His lordship married, September 25, 1765, Elizabeth, daughter of George Venables, first lord Verney, by his third lady, Martha, sister to Simon, late earl Harcourt, by whom he has no issue.

The family of Harcourt is descended from Bernard, chief counsel and second in command to Rollo, first duke of Normandy. Torf, his son, had issue, 1. Touronne, ancestor to the Newburghs earls of Warwick; to the Beaumons earls of Leicefer, Worcefer, and Bedford, all which titles are extinct; to the present duke of Brandon; the present earl of Selkirk and Ruglen, of the kingdom of Scotland; and, through the latter, to the present and second earl. The heir presumptive is Simon, second lord viscount Harcourt, son of the last-mentioned, attended George II. at the battle of Dettingen, June 27, 1743, and was by that monarch created viscount Harcourt of Nuneham Courteney, and earl Harcourt. He was appointed, in April 1751, governor to the prince of Wales, afterwards George III. which honour he resigned in the following year. He was appointed, in 1794, to bring over Queen Charlotte from Germany; and was successively master of the horse to the queen, and lord chamberlain of her household. He was constituted, November 4, 1768, ambasfador extraordinary and minister plenipotentiary to the court of Verfailes; which office he exchanged, November 9, 1773, for that of lord lieutenant of the kingdom of Ireland; where he continued till December 1776. He married, in October 1735, Rebecca, sole daughter and heir of Charles Le Bas, esq. by which lady, who died January 16, 1765, had the following issue: George-Simon, the present earl; William, born March 20, 1743, a general in the army, colonel of the 16th regiment of dragoons, and governor of the military college at Woolwich; Buckingham, born 1741, and died August 1746, Simon, the first earl, being unfortunately drowned in his own park, September 16, 1777, was succeeded by his son, George-Simon, the present and second earl. The heir presumptive is William, brother to the present earl.

RESIDENCES.—Nuneham-park, in the county of Oxford; and Bigghopt-park, in Surrey.—Town-house, in Cavendish-square.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Au bon droit. — "To the best right."

NORTH, EARL OF GUILDFORD.

FRANCIS NORTH, BARON AND EARL OF GUILDFORD, a Colonel in the Army, High Steward of Banbury, and Patent Comptroller of the Customs, L.L.D. born December 23, 1761; succeeded his brother, the third earl, April 20, 1792.

The family of North has been traced back to the reign of Edward IV. Edward North, in the reign of Henry VIII. was appointed, in 1544, chancellor of the court of augmentation; and constituted, by the will of that monarch, one of the executors to whom the government of the kingdom was entrusted during the minority of Edward VI. He declared in favour of the succession of lady Jane Grey, but soon afterwards became reconciled to queen Mary, and was by that princess created baron North of Kirtling. He died December 31, 1564.

Roger, second lord North, his son, was the intimate friend of Robert Dudley earl of Leicester, the favourite of queen Elizabeth, and distinguished himself under that commander in the wars of the Netherlands. He was also her majesty's ambassador extraordinary and minister plenipotentiary to Charles IX. king of France, and died December 3, 1600. Dudley, third lord North, his grandson, was one of the lords commissioners nominated by parliament during the civil war, April 15, 1645, to manage the affairs of crown; and a series of valuable efforts upon
was succeeded by his son, George-Augustus, the third earl, born September 14, 1757; married, September 20, 1785, Maria, daughter of George, third earl of Buckinghamshire, by which lady, who died April 25, 1794, he had issue. Maria, born December 16, 1783. He married, secondly, Susan, daughter of Thomas Coutts, esq. and sister to the Marchioness of Bute and lady Burdett, and has issue, the ladies Susan and Georgiana; and, dying April 20, 1802, was succeeded by his brother, Francis, fourth and present earl. The heir presumptive is Frederic, brother to the earl.

**Crests.**—Baron of North of Kirtling, in Kent, by summons, February 17, 1553, which barony is now in abeyance between the late earl’s daughters; Baron of Guildford, September 27, 1683; and Earl of Guildford, March 1, 1752.

**Residences.**—Wroxton-abbey, in the county of Oxford; and Waldershare, in the county of Kent.

**Town-house, in Piccadilly.**

**Arms.**—See the annexed Engraving. **Motto.**—"By courage and faith."

**YORKE, EARL OF HARDWICKE.**

**PHILIP YORKE, EARL OF HARDWICKE, VISCOUNT ROYDON, and BARON HARDWICKE; KNIGHT OF THE GARTER, LORD LIEUTENANT AND CUSFOS KOUTERUM OF THE COUNTY OF CAMBRIDGE, HIGH STEWARD OF CAMBRIDGE, REGISTRAR OF THE COURT OF ADMIRALTY, F.R. AND A.S. AND L.L.D. BORN MAY 31, 1757; SUCCEEDED HIS UNCLE, THE EARL, MAY 16, 1793; MARRIED, JULY 23, 1758, LADY ELIZABETH LINDSAY, DAUGHTER OF JAMES, FIFTH EARL OF BALCARRES; BY WHOM HE HAD ISSUE, ANNIE, BORN APRIL 11, 1753; MARRIED, AUGUST 29, 1787, TO JOHN VICOUNT POLINGTON, SON OF THE EARL OF MEXBOROUGH; PHILIP VICOUNT ROYDON, HIS APPARENT, BORN MAY 7, 1754; CATHERINE-FREMAN, BORN APRIL 14, 1756; ELIZABETH-MARGARET, BORN JANUARY 14, 1758; CAROLINE-HARRIET, BORN OCTOBER 15, 1761; ELIZABETH-CATHARINE-JAMES, BORN JULY 15, 1767; JOSIAH-JOHNSON, BORN AUGUST 20, 1768.

Philip Yorke, father of the late earl of Hardwicke, was early distinguished for his intellectual accomplishments; and is still remembered as one of the writers in the periodical paper called the "Spectator." He was appointed, March 23, 1720, solicitor-general to George I.

He exchanged this office, January 31, 1724, for that of attorney-general. Having also resigned that appointment, he was constituted, October 31, 1733, lord chief justice of the court of king’s bench; and in the following month created baron Hardwicke. He exchanged this office, February 21, 1737, for that of lord high steward of the university of Cambridge.

He was some years after raised to the dignity of viccount Roydon, and earl of Hardwicke; and resigned the office of lord high chancellor in November 1736. In this great office he uniformly preferred a very high reputation; and it has been remarked of him, that though he filled this situation longer than any of his predecessors, yet only three of his decrees were appealed from, and those three were confirmed by the house of lords. He was also distinguished by his forcible eloquence in that house; and was greatly connected with the politics of his time, being the most considerable of the co-adjutors of Sir Robert Walpole’s administration.—See his portrait, and a biographical sketch of his life, p. 223 of this volume.

The earl of Hardwicke married Margaret, daughter of Charles Cocks, of the city of Worcester, esquire; by which lady, who died September 19, 1764, he had issue, 1. Philip, second earl of Hardwicke. 2. Charles, born December 29, 1722; appointed lord chancellor January 6th, 1746. He died by the title of Lord Hardwicke; but dying on the 20th of the same month, before his patent had passed the great seal, it did not take effect. He married, first, May 19, 1755, Catharine, only daughter of William Freman, esquire, of Hamels, in Herefordshire;
fordhie; by which lady, who died July 10, 1759, he had issue, Philip, the present earl, and two daughters, Margaret and Catharine, who died in their infancy. He married, secondly, December 25, 1752, Margaret, daughter and co-heir of Henry Johnson, esq. of Berkhamsted, in Hertfordshire, by whom he had issue, Charles-Philip, born March 12, 1764; married to Miss Harriett Manningham; Caroline, married to John lord Eliot; in Joseph-Sydney, knight, born June 6, 1768, a captain in the navy; married to Miss Ratcliffe, and has issue a son, Charles-Philip, born in April 1759. 3. Sir Joseph, a knight of the bath, general and field-marshall in the army, colonel of the first regiment of life-guards, envoy extraordinary and ambassador at the Hague, from November 1751, to December 25, 1780; married, June 22, 1783, the dowager baroness de Boetzalaer, widow of the baron de Boetzalaer, first noble of the province of Holland, and was created a peer by the title of baron Dover, September 11, 1788; but, dying without issue, the title became extinct.

4. John, born August 27, 1721; married Elizabeth, daughter and co-heir of Henry Johnfon, esq. of Berkendington, D. D. prebendary of Ely, died July 2, 1800; fucceeded his father, Thomas Wyat, in 1554, and committed to the Tower, but soon after pardoned. Sir Henry, his grandson, resumed the name of Vane, and was employed by Charles I. in an embassy to Gustavus Adolphus king of Sweden, in behalf of the elector palatine king of Bohemia. He was constitted one of the principal secretaries of state to that monarch, to which was added, May 18, 1643, the office of one of the lords commissioners for executing the trust of lord high treasurer of England. He died in 1654.

Sir Henry, his son, refided for some time in the city of Geneva; from whence he failed, in 1635, for the province of New England, in North America, and was soon declared governor of the province by Anthony Ashley Cooper. He became involved in various controversies with the inhabitants, and in consequence was induced to return to his native country. He was then appointed to the office of treasurer of the navy, in which he afterwards continued by authority of the parliament. He reduced the profits of that office from a floating income of about thirty thousand pounds per annum, to a fixed salary of only two thousand pounds per annum. which, instead of converting to his own use, he bestowed upon the agent by whom the business of the office was conducted. Sir Henry Vane, together with Cromwell, and lord chief justice Saint John, was the most active leader of the party of the independent ministers, and was greatly instrumental in the establishment of the self-denying ordinance in 1644. He was also one of the commissioners deputed to negotiate with Charles I. in the isle of Wight, in September 1648; but opposed the subsequent proceedings against the life of that monarch, and was the refolute adversary of the ambitious purpofes of Cromwell. After the death of the usurper, he again appeared upon the theatre of politics, as the champion of liberty. Upon the restoration of Charles II. he was marked as an object of vengeance; and, being brought to his trial, was convicted and executed, June 14, 1665. Upon this occasion he manifested the highest proofs of a calm and intrepid mind, notwithstanding the indelent efforts that were made by the partisans of the ambicious purpofes of Cromwell, to appal him by流ing forth the noblest characters of this eventful period, and exhibited an union of the most superior abilities, the most perfect integrity, the most uniform principles, and the highest sagacity; which occasioned him never to deviate from the line of conduct which his judgment dictated. Christopher, his son, was by William III. created baron Barnard of Barnard Castle, and had issue, 1. Gilbert, second lord Barnard, father of Henry, third lord Barnard.

524

Heraldry.

William-Henry Vane, earl of Darlington, was George I. created viscount Barnard, and earl of Darlington; and constituted, in 1755, joint paymaster general of his majesty's forces, which office he resigned in 1757. He married Grace, daughter of Charles Fitzroy duke of Cleveland; by which lady, who died September 29, 1753, he had issue, Henry, second earl of Darlington; Frederic, maried to Henrietta, sister to William Meredith, bart. by whom he had an only daughter, who married, February 23, 1795, captain Metcalfe; and secondly, Grace, second daughter of Arthur Lyfaght, brother of John lord Lisle, Raby, born January 2, 1736; married to Elizabeth,
Elizabeth, daughter of George Sayer, D. D. archdeacon of Durham, and died October 24, 1789. Anne, married, first, to Charles Hope Weir, esq. brother to the earl of Hopetoun; and secondly, to brigadier-general George Monson, and died September 14, 1766, as did her husband in 1777. Mary, married to Ralph Carr, esq. of Cocken, in the county of Durham, and died April 11, 1759, and left issue, viz. Christiana, baptized December 26, 1759; died unmarried, March 1758. His lordship dying March 6, 1758, was succeeded by his son, Henry, the second earl, born 1726; married, March 10, 1757, Margaret Lowther, sister to the first earl of Lonsdale, who died January 28, 1809, and by her had issue, Grace, and Elizabeth, who both died young; and William Henry, the third and present earl of Ilchester.

**CREATIONS.**—Baron Barnard, of Barnard Castle, in the county palatine of Durham, July 8, 1699; Viscount Barnard, and Earl of Darlington, April 3, 1754.

**RESIDENCES.**—Raby Castle, in the county palatine of Durham.—Town-house, Cleveland House, St. James's-square.

**ARMORIAL BEARINGS.**—See the annexed Engraving.

**MOTTO.**—Nei temere nec timido.—"Neither rash nor diffident."

---

**FOX, EARL OF ILCHESTER.**

**HENRY-STEPHEN FOX STRANGWAYS, EARL OF ILCHESTER,** Lord Hichester, Baron of Woodford Strangways, in the county of Dorset, and Lord Ilchester and Stavordale, Baron of Redlinch, in Somersetshire; born February 21, 1787; succeeded his father, the late earl, September 5, 1802.

The family of Fox is descended from William Fox, of Farley, in the county of Wilts, esquire, who lived in the reign of James I. He had issue two sons: John, who took up arms for Charles I. and fought for Charles II. in the battle of Worcester, September 3, 1651; and for Stephen, who constantly attended Charles II. during his exile upon the continent. He was constituted, in 1661, paymaster-general of his majesty's forces; and having resigned that office, was promoted, in September 1679, to be one of the lords commissi6niers of the treasury, and first commissi6nner for executing the office of master of the horse. He resigned his seat at the board of treasury in 1686, and was restored to the same office in December the same year. At the period of the revolution he voted for the vacancy of the throne, and for filling it with the prince of Orange; refusing, in his seat at the board of treasury on the death of William III. He was one of the persons excepted by James II. from the intended act of indemnity, in 1692. Sir Stephen Fox was a learned and able advocate for the integrity of the earl of Clarendon, and voted against his impeachment in 1679. He was also the first projector of the noble building of Chelsea-hospital, and was one of its most munificent benefactors. He had issue, i. Charles, who was constituted, December 26, 1679, joint paymaster-general of his majesty's forces; and had the same office conferred upon him fledly, April 16, 1682. He died in September 1713. 2. Stephen. 3. Henry, first lord Holland. Sir Stephen Fox died in the eighty-ninth year of his age, October 28, 1716.

Stephen, eldest surviving son of Sir Stephen, was by George II. created baron Ilchester and Strangways; farther created Baron Ilchester, Stavordale, and Redlynch, with remainder to Henry his brother; and at length raised to the dignity of earl of Ilchester, with the same remainder. He married Elizabeth, daughter and heir of Thomas Strangways Horner, of Wells Park, in the county of Somerset, esquire; by which lady he had issue three sons and six daughters, viz. Henry Thomas, the second earl. Stephen Strangways Digby, a lieutenant-colonel in the army, born December 3, 1751. Charles Redlynch, in holy orders; married to Jane, daughter of the Rev. Dr. Haines, and has issue, Charles, in the royal navy; Thomas, a lieutenant in the royal artillery; and six other children. Sufannah Sarah Louisa, born February 12, 1743; married to William O'Brien, of Stinsford, in the county of Dorset, esquire. Charlotte Elizabeth, and Juliana Judith, both died young. Lucy, married to the honourable Stephen Digby, uncle to the second earl Digby, and died August 1787, leaving issue. Charlotte Caroline Henrietta, married to John Dyke Ackland, eldest son of Sir Thomas Dyke Ackland, of Kelston-house, in Devonshire, baronet; by whom she had issue two sons and three daughters; the eldest son died an infant; John, succeeded to his grandfather's baronetcy, and died in 1785, his father having died in November 1783; the only other son, Henry, married Henrietta Mary George Lord Porcher, eldest son of the earl of Carnarvon, and has issue. Frances Muriel, born August 1753; married to Richard Quin Lord Adare, and has issue. His lordship, dying September 26, 1776, was succeeded by Henry Thomas, second earl, born August 9, 1743; married Mary Thereza, daughter of Standish Grady, esq. of Cappercullin, in the county of Limerick, in Ireland; by which lady, who died in June 1790, he had issue two sons and six daughters; 1. Elizabeth Thereza, married, first, William Davenport Talbot, esq. of Laycock Abbey, Wilts, who died August 1800, leaving issue one son; and, secondly, to Charles Manes, esq. captain in the royal navy, and nephew to the earl of Winciliffe. 2. Sir Mary Lucy, married to Thomas Manes Talbot, esq. of Margam, in Glamorganshire, and has issue, Mary Thereza Jane Harriet, and Christiana Barbara. 3. A son, born in 1777, and died the same year. 4. Harriet, married to James Frampton, esq. of Moreton, in Dorsetshire. 5. Charlotte Anne, born February 7, 1784. 6. Louisa Emma, born June 27, 1785. 7. Henry Stephen, the present earl. 8. Susan Caroline, married to Sir Philip Grainger, of Cornwall, and died in January 1792. His lordship married, secondly, August 22, 1794, Maria, third daughter of the Rev. William Digby, late dean of Durham, and brother to the first earl Digby; and had issue, William Thomas Horner, born May 7, 1795. Giles Digby Robert, born May 26, 1798. His lordship, dying September 5, 1802, was succeeded by his eldest son, Henry Thomas, the present and third earl. The countefis was delivered of a posthumous son, February 6, 1803. The presumptive heir is William Thomas Horner, the earl's next brother.

**CREATIONS.**—Baron Ilchester, May 11, 1741; Lord Ilchester and Stavordale, January 3, 1747; and Earl of Ilchester, June 3, 1756.

**RESIDENCES.**—Melbury House, in the county of Dorset.

**TOWN-HOUSE, OLD BURLINGTON-STREET.**

**ARMORIAL BEARINGS.**—See the annexed Engraving.

**MOTTO.**—Faire sans dire.—"Act without ostentation."

The armorial bearings of this noble family are remarkably illustrative of their name; and are charged with an honourable augmentation for pre-eminent services. They are, Ermine, on a chevron azure, three foxes heads erased or; on a canton of the second, a fleur-de-lis of the third.—Crest, on a chaplet azure, turned up ermine, a fox sejant or, Supporters, two foxes; the dexter ermine, pretty or, collar dovetail azure; the collar charged with three fleurs-de-lis of the second. The finders proper, collared as the dexter.

Among the many services rendered to Charles II. by Sir Stephen Fox, one of the most important was that of conducting his pecuniary affairs, while under his directing exile on the continent. On the removal of his majesty from Paris, the arduous task of governing the expenses of the royal family, of paying the wages of the soldiers, and of influing the greatest number of ways, as well as when the court was removed settled, was confided entirely to Sir Stephen Fox, "a person," says lord Clarendon, "well qualified with languages; and all parts of honesty and disinterestedness, necessary for the discharge of such a trust; and, indeed, his great industry, modesty, and prudence, did very much contribute to the bringing the family, which
which for many years had been under no government, into a very good order; by which his majesty, in the pulchinett of his condition, enjoyed very much ease from the time he left Paris." The royal fugitive, tenable of his fidelity and loyal attachment, upon his restoration, commanded sir Edward Walker, garter, to align him an honourable augmentation to his arms, out of the royal enigns and devices, viz. on a canton azure, a fleur-de-lis or; as appears by a special instrument under the hand and seal of his majesty, dated November 23, 1658.

WEST, EARL DELAWAR.

GEORGE-JOHN WEST, EARL DELAWAR, Viscount Cantelupe, Baron Delawar, and Baron West; born October 26, 1791; succeeded his father, the late earl, July 28, 1792.

The family of West is descended from Thomas de West, who served in the wars of Edward III. in France; and received summons to parliament as one of the barons of the realm. Thomas, third lord West, his grandson, married Joan, daughter and heir of Roger Delawar, who principally assisted in the capture of John King of France at the battle of Poitiers, and was the person who finally discomfited that monarch, and received his sword, in company with John de Pelham, September 29, 1356. By the above marriage the title of Delawar was introduced into the family of West. Reginald, fifth lord West, the issue of this marriage, obtained precedence among the heirs of the real title of lord Delawar, in the reign of Henry VI. July 5, 1453.

Richard, second lord Delawar of the family of West, distinguished himself on the side of the house of Lancaster; and retired for a few years to the continent upon the accession of Edward IV. Thomas, third lord Delawar, his son, was one of the principal commanders of the army sent into Flanders, by Henry VII., to the attempt to the emperor Maximilian; and also in the army that gained the battle of Blackheath, June 22, 1497. William, fifth lord Delawar, his grandson, was disfranchised by parliament, in 1548, upon an unfounded charge of having attempted to poison his uncle, Thomas, fourth lord Delawar; and was therefore restored to blood in the reign of queen Elizabeth, March 12, 1568. Thomas, seventh lord Delawar, his grandson, was constituted, in 1609, captain-general of the colonies in Virginia, and gave his own name to one of the states of North America. Charles, ninth lord Delawar, his grandson, was created by Oliver Cromwell, August 13, 1659, upon supporting the interests of George Booth, for the purpose of restoring Charles II.

John, eleventh lord Delawar, his grandson, was by George III. created viscount Cantelupe and earl Delawar. He married Charlotte Macartney, daughter of Donagh earl of Clanarty in Ireland; by which lady, who died February 7, 1735, he had issue John, second earl. Henrietta-Cecilia, married to general John Clavering, born young. Diana, married to general John Clarving, and died in May 1766, leaving issue. George-Augustus, married, February 24, 1764, lady Mary Grey, daughter of Harry fourth earl of Stamford, and died in 1792, without issue. His lordship married, fecondly, in June 1744, Anne, widow of George, twelfth lord Abergavenny, who died in July 1754, without issue; and his lordship, dying March 16, 1766, was succeeded by John, second earl, born in 1729, a general in the army, and master of the horse to the queen; married, August 8, 1756, Mary, daughter of lieutenant-general John Wynyard, by whom he had issue, William-Augustus, third earl. John, sixth earl, the fourth earl, Francis, died unmarried. Thomas-Holles, died in September, 1777. Charlotte, died unmarried. George, died in 1722. Augustus, died young. Septimus-Henry, died October 20, 1753. Amelia, died in March 1770. Georgiana, married to Edward-Percy Buckley, esq. and has issue. Frederick, married, first, to Charlotte, daughter and co-heir of Richard Mitchell, esq. of Culham Court, Berkshire, who died in 1755, childless. He married, secondly, February 19, 1756, Maria, daughter and co-heir of Richard Myddelton, of Chirk Castle, in Denbighshire, esquire. Matilda, married to major-general Henry Wynyard. His lordship died November 22, 1777, and was succeeded by William-Augustus, the third earl, born April 24, 1737, who died, unmarried, in January 1783; when John, Richard, his next brother, and fourth earl, succeeded; and died, February 25, 1755; married, April 22, 1733, Catharine, daughter of Henry Lyell, esq. of Bourn, in Cambridgeshire, by whom he had issue, Catharine-Georgiana, born August 29, 1751; Charlotte, born October 20, 1750, died an infant; George-John, the present earl. His lordship died July 28, 1755, and was succeeded by George-John, seventeenth lord, and fifth and present earl. The presumptive heir is the earl's uncle.

CREATIONS. — Baron Delawar, June 8, 1744; Baron West, February 25, 1742; Visccount Cantelupe, and Earl Delawar, March 18, 1792.

RESIDENCES. — Bolderwood Lodge, in the New Forest; and Wherwell, in the county of Southampton. — Townhouse, Upper Grosvenor-street.

ARMORIAL BEARINGS. — See the annexed Engraving.

AMORIAL BEARINGS. — See the annexed Engraving.

MOTTO. — _jeur de ma vie._ — "The brilliancy of my life:" alluding to the days of taking the French king.

PLEYDEL-BOUVERIE, EARL OF RADNOR.

JACOB PLEYDEL-BOUVERIE, EARL OF RADNOR, Viscount Folkestone, Baron of Longford, and Baron Pleydel-Bouverie, of Colehill, in Berkshire, and a Baronet; Lord Lieutenant, and Custos Rotulorum of the county of Berks, Recorder of New Sarum, M. A., F. R. and A. S., born March 4, 1759; succeeded his father, the late earl, January 28, 1776; married, January 23, 1777, Anne, daughter and co-heir of Anthony Duncombe, lord Fetherman; by whom he has issue, William, viscount Folkestone, heir apparent, born May 7, 1779; married October 2, 1800, to lady Catherine-Pelham Clinton, only daughter of Henry earl of Lincoln, eldest son of the duke of Newcastle; and by her, who died May 17, 1804, had issue a daughter, born May 2, 1804. Duncombe, born June 28, 1780, in the royal navy; Laurence, born August 6, 1781; Harriet, who died December 31, 1794; Barbara, born June 25, 1798; Frederic, born November 16, 1793; Philip, born October 21, 1788.

The family of Bouverie is originally of the Low Countries, and has been traced back to the year 1356. John de la Bouverie was solicitor-general to Charles duke of Burgundy, in 1459, and chief of the council to Mary his daughter. Laurence des Bouveries, about the middle of the sixteenth century, fled from the residence of his ancestors on account of his religion; and after an abode of some years at Frankfurt upon the Maine, took refuge in England, under the protection of queen Elizabeth. Edward, his son, married Mary, grand-daughter of the famous Tiberkin, who suffered martyrdom in Germany for the protestant religion. Edward, his son, afterwards accumulated a considerable fortune; and William, his grandson, was created a baronet, February 19, 1714. The late sir Jacob Bouverie, third baronet, his son, was by George II. created baron Longford, and viscount Folkestone. He was a great friend to literature, and a principal promoter of the Society for the encouragement of arts, manufactures, and commerce, and was chosen president at its first institution in 1753, in which office he continued till his death. He married, first, Mary, daughter and co-heir of James Clarke, of Hardwick, in the county of Northampton, esquire; by whom lady, who died November 16, 1799, he had issue, William, the first earl; Mary, who died in 1799; Jacob, who died March 15, 1731, Bartholomew, died March 6, 1743; Anne, married the honourable
able George Talbot, D.D. brother to the first earl Talbot; Mary, married to Anthony fourth earl of Shaftebury, and had issue, Harriet, who died Dec. 13, 1731; Charlotte, married to John Grant, esq. of White Waltham, Berks; Edward, died an infant; Harriet, married to the third earl; Mary, married to William Maxwell, of Cariden, in North Britain, esquire, and has issue, Mary, John, and Elizabeth; 5. John, born in 1725; 6. Jane, married to Dr. Richard Vincent, baronet; 7. Henry-Frederick, born 1728; 8. Diana, born 1785. The vicomt married, secondly, April 7, 1741, Elizabeth, daughter of the first lord Romney, by whom, who died in 1782, he had issue, Jacob, born June 4, 1743, died February 4, 1745; Philip, who, agreeably to the will of Mrs. Jane Allen, esq. of Devonshire, and died August 23, 1786, having married, August 14, 1777, Bridget, daughter of James earl of Rosslyn; 3. Frances, born in North Britain, esquire, and has issue, Mary, John, and Elizabeth; 4. Jacob, born August 13, 1744, died April 1793; and another son, born December 21, 1759.

John, younger son of Charles third earl of Sunderland, and of Anne, daughter of John Churchill duke of Marlborough, had issue, John, who was created by George III, baron Spencer of Althorpe, and vicomt Spencer; and soon after vicomt Althorpe, of Althorpe, and earl Spencer. He married Georgiana, daughter of Stephen Poyntz, esquire; by whom he had issue, Georgiana, born June 5, 1751; married to William, fifth duke of Devonshire, and died March 30, 1806, leaving issue, George-John, the present earl; Henrietta-Frances, married to Frederick earl of Beverley, and had issue, Charlotte, born August 26, 1785, who died October 9, 1796; Louise, born April 3, 1787, died an infant. His lordship, dying October 31, 1789, was succeeded by his only son, the present and second earl.

CREATIONS.—Baron Spencer, of Althorpe, in the county of Northampton, and Vicomt Spencer, April 3, 1761; Vicomt Althorpe, of Althorpe, in the county of Northampton, and Earl Spencer, November 1, 1775.

RESIDENCES.—Althorpe Park, in the county of Northampton; Wimbledon Park, in the county of Surrey; and St. Alban's, in the county of Herts.—Townhouse, St. James's Place.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Dies eftend le droit. —"God defends the right."

PITT, EARL OF CHATHAM.

JOHN PITT, EARL OF CHATHAM, Vizcount Pitt, of Burton Pynsent, in the county of Somerset, and Baron Chatham, of Chatham, in right of his mother, who died April 3, 1803; Knight of the Garter, Master General of the Ordnance, Governor of the Charter House, a General in the Army, Colonel of the 4th Regiment of Foot, and Governor of Jersey; born September 10, 1755; succeeded his father, the late earl, May 11, 1773; married, July 9, 1783, Mary-Elizabeth Townshend, second daughter of Thomas, fifth viscount Sydney.

This illustrious family is descended from the same ancestors as the lords Rivers and Cambridge. William, first earl of Chatham, was younger brother of Thomas, father of Thomas lord Camden. He early engaged in the opposition to sir Robert Walpole, and, by a beauty and energy of eloquence of which this country had hitherto been afforded no example, acquired a very extensive popularity. In conformity to the practice of the opposition of that period, he accepted, in February 1773, an office in the household of Frederic prince of Wales, being appointed one of the grooms of his bedchamber; and in 1774, received a legacy of ten thousand pounds, which was bequeathed to him by Sarah, consort of John Churchill duke of Marlborough, "upon account of his merit in the noble defence he had made for the support of the laws of England, and to prevent the ruin of his country." Having resigned his office in the household of the prince of Wales, he was appointed, May 5, 1746, paymaster-general of his majesty's forces, in which employment he continued to November 30, 1747, when he nullified his disinterestedness, by refusing to make any advantage of the public money which was
HENRY BATHURST, EARL BATHURST.

BARON BATHURST, Margaret Douglas, Countess of Richmond; and, by her, who died May 14, 1728, he had issue, Henry, born May 24, 1684; Charles, born Feb. 1, 1689; Maurice, born Nov. 12, 1690; and Sarah, born March 10, 1692.

BATHURST, EARL BATHURST.

HERALDRY.

HENRY BATHURST, Earl Bathurst, Baron Bathurst of Battlesden, and Baron Apsey; a Member and Worker of his Majesty's Mint, a Lord of Trade and Plantations, one of the Tellers of the Exchequer, and Joint Clerk of the Crown; born May 22, 1772; succeeded his father, the late earl, Aug. 6, 1794; married, April 1, 1793, Georgiana, young daughter of the late Lord George Germain, and succeeded by the right of female representation, to the present duke of Richmond; by whom he has issue, Henry-George, lord Apsey, heir apparent, born Feb. 24, 1790; William-Lennox, born Feb. 14, 1791; Louisa-Georgiana, born Sept. 22, 1792; Seymour-Thomas, born Oct. 27, 1793; Emily-Charlotte, born Feb. 1, 1795.

The family of Bathurst has been traced back to the reign of Henry VI. and the ancient family seat of Bathurst, in the county of Suffolk, was destroyed in the civil war between the houses of York and Lancaster. George Bathurst, in the reign of Charles I. had issue thirteen sons, six of which lost their lives in fighting the battles of the royal party; and of the survivors, Ralph, who embraced the clerical profession, has been admired for his Latin poetry; and celebrated for his independence in refusing the bishopric of Bristol, in April 1661. Benjamin, younger son of George, was cofferer of the household to queen Anne, and died April 27, 1704.

The author of the following lines: 'Benjamin, who married Elizabeth, daughter of Charles earl of Aylebury, and died Jan. 17, 1767, without issue, as did his lady, November 14, 1771; Henry, the second earl; John, died May 6, 1777, unmarried. Allen, in holy orders, died unmarried, Aug. 22, 1767. Frances, married, first, Aug. 6, 1731, to William Wodehouse, esq. son and heir of Sir Peter Wodehouse, bart. and secondly, to James Whitbread, of Ireland, esq. Catherina, married to Reginald Courtney, esq. brother to the first viscount Courtney, and left issue, the late bishop of Exeter, and died in 1783. Jane, married to John Buller, esq. of Morval, in Cornwall, and left issue three sons and three daughters. Leonora, married, September 1752, the late general Edward Urquid, and died Oct. 20, 1789. Anne, married, April 13, 1772, the Rev. James Benfon, I.I.D. His lordship died Sept. 16, 1775, and was succeeded by his son, Henry, the second earl, born May 2, 1744; who was appointed one of the judges of the court of common pleas, constituted lord high chancellor of Great Britain, and in 1776 acted as high steward of Great Britain, on the trial of the duchess of Kingston; he married Anne, daughter and heir of —— James, esq., widow of Charles Philips, esq. and by her, who died Feb. 8, 1758, he had no issue. He married, secondly, Tryphena, daughter of Thomas Sawen, esq. by whom he had issue, Tryphena, born Oct. 23, 1763; Henry, the present earl; Catherine, born June 26, 1794; and Selina-Letitia, born June 3, 1765; Susannah, born Feb. 2, 1766; and Tryphena, born Oct. 14, 1769. His lordship died Aug. 6, 1794, and was succeeded by Henry, the present and third earl.

CREATIONS.—Viscount Pitt, and Earl of Chatham, July 30, 1766; and Baron Chatham, in right of his mother, on the creation July 5, 1716.

Hill, Earl of Hillsborough.

Arthur-Blundell-Sandys-Trumbull.

Bruce Brudenell, Earl of Aylesbury.

Thomas Bruce Brudenell, Earl of Aylesbury, Baron Bruce, Knight of the Thistle, and Lord Chamberlain of the Household to the Queen; born in 1720; married, first, February 17, 1761, Susanna, daughter of Henry Hoare, esq., and widow of Charles Boyle, viscount Dungarvon, by which lady, who died Feb. 4, 1783, he had issue, George, who died in 1783. Caroline-Anne, born May 1, 1753. Frances-Elizabeth, married to Sir Henry Wilson, of Chelsea Park, in Middlesex, 1st Lord Justice, died January 22, and left issue, Edward, third Lord Justice, and Dorothea, his sister, both of whom died in infancy.

HARRISON BRUCE.

The family of Bruce is descended from Robert le Bruce, who came over to England with the Conqueror; by that monarch he was commissioned to bring the northern parts of England under subjection, which undertaking he successfully performed, and was created Baron of Skelton in the county of York. Robert, second Lord of Skelton, his son, contracted an intimate friendship with David I. King of Scotland, during his residence in England, previous to his accession to the Scottish throne, and received the lordship of Annandale from that monarch. He fought on the English side at the battle of the Standard in the reign of King Stephen 1138, and took prisoner his own son Robert. He had issue, 1. Adam, third Lord of Skelton, which title became extinct about the year 1300. 2. William, who succeeded him in the lordship of Annandale in Scotland. 3. Robert, taken prisoner in the battle of the Standard.

Robert, fourth Lord of Annandale, grandson of William second Lord, married Isabel, daughter of David Earl of Carrick, and grandson of Prince Robert of Scotland. In consequence of this marriage, Robert, fifth Lord of Annandale, his son, who in his youth had been one of the justices of the court of common pleas to Henry III. and had taken part with that monarch against the barons, at length became, together with John Balliol, in 1290, one of the principal claimants of the crown of Scotland; but his claim was fet aside by Edward I. King of England. He had issue, 1. Robert, sixth Lord of Annandale, who by marriage inherited the earldom of Carrick, and was father of Robert, who was crowned King of Scotland, March 27, 1306, and from whom the royal house of Stuart descended; of Edward, created Duke of Cumberland, in the wars of Ireland in 1318, that title became extinct; and of three sons, who were put to death by command of our Edward I. 2. John, father of James, elected in 1441 Lord Bishop of Dunkeld, constituted in 1441, Lord High Chancellor of the kingdom of Scotland, and translated in 1447, to the archiepiscopal see of Glasgow, and died in the same year. By the death of his wife, he was befieged in Edinburgh Castle by Robert the Bruce, his brother, was killed in the famous duel with Sir Edward Sackville, afterwards fourth Earl of Dorset, in 1615. Thomas, third Lord Bruce, his brother, was by Charles I. June 21, 1633, created Earl of Elgin of the kingdom of Scotland, with remainder to his male heirs. He was also created, August 11, 1645, Baron Bruce of Wheriton in the county of York.

Robert, second Earl of Elgin, his son, gave proofs of his loyalty to Charles I. in the civil war; and was highly instrumental to the restoration of Charles II. In reward of these services he was created, in 1664, Baron Bruce of Skelton in the county of York, Viscount Bruce of Amphil in the county of Bedford, and Earl of Aylesbury in the county of Buckingham. He was constituted by James II. July 30, 1685, Lord Chamberlain of the household, and died October 20, in the same year. Thomas, second Earl of Aylesbury, his son, retired to Bruffeld, and died there in November 1714, leaving issue, 1. Charles, third Earl of Aylesbury. 2. Elizabeth, married to George, third Earl of Cardigan; she died in December 1745.

Charles, third Earl of Aylesbury, was by George II. created Baron Bruce of Tottenham, with remainder to Thomas, the present Earl; and dying without issue male, February 10, 1747, was succeeded in that title by the present Earl’s son, who took the name and arms of Bruce. The late Earl of Aylesbury married Anne-Saville, daughter and co-heir to William marquis of Halifax, by whom he had two sons and two daughters: George, born in 1707, died young. Robert, who married, in 1739, Frances, daughter of Sir William Backett, of Newcastle-upon-Tyne, bart. and died without issue. Mary, his eldest daughter, married to Henry, Duke of Chandos, and died in August, 1738, leaving issue, James, the late Duke. Elizabeth, married to the Honourable Benjamin Bathurst, eldest brother to the first Earl Bathurst, and died without issue in 1771. The said Earl, Charles, married, to his second wife, Juliana Boyle, daughter of Charles, second Earl of Burlington, who died without issue in 1738. He married, thirdly, Caroline, daughter of John, fourth Duke of Argyle, and dying February 10, 1747, left issue Mary, married in 1757, to Charles, third Duke of Richmond; the counties married, December 17, 1785, to Lady Charlotte, daughter of Charles, third Earl of Burlington, who died in 1785, John Damer, eldest son of the Earl of Cork.

Creations.—Baron Bruce of Tottenham, in the county of Wilts, April 17, 1746. Earl of Aylesbury in the county of Buckingham, June 8, 1747.

Residences.—Tottenham Park, in the county of Wilts. Town-house, in Seymour-place, May Fair.

Armorial Bearings.—See the annexed Engraving.

Motto.—Think and thank.

Villiers Hyde, Earl of Clarendon.

Thomas Villiers, Earl of Clarendon, Baron Hyde of Hindon, and Count of the Kingdom of Prussia; born September 26, 1753, and succeeded to the title upon the death of his father, December 13, 1788.

Thomas, younger son of William second Earl of Jersey, married, March 30, 1752, Charlotte, youngest daughter of Henry Hyde, late Earl of Clarendon and Rochester. Lady Charlotte became entitled, upon the death of the Earl of Clarendon her grandfather, in the year 1753, to use the arms and surname of Hyde; and her consort was created...
created by George II. baron Hyde of Hindon, with re-
mainder to the issue of this marriage. He was also con-
stituted, September 10, 1763, joint postmaster general;
which office he resigned in 1765. He was promoted,
June 24, 1771, to the office of chancellor of the duchy
and county palatine of Lancaster, which office he resign-
ed in 1782. He was also created by George III. earl of
Clarendon; and, having been twice employed in the
envy extraordinary to the king of Prussia, that monarch
was pleased to confer upon him, in 1782, the honour
of bearing upon his arms the royal Prussian black eagle.
He was re-appointed to the office of chancellor of the
duchy and county palatine of Lancaster, December 31,
1783; and exchanged that office, September 9, 1786, for
the appointment of joint postmaster general. He had
issue, by lady Charlotte his wife, 1. Thomas, present
and second earl of Clarendon. 2. John, Charles, born No-
very 12, 1757; married, January 5, 1791, Maria
Kleanor, daughter and co-heir of the honourable admi-
ral Forber, brother of the fourth earl of Granard, by
lady Mary Capel, daughter of William, third earl of
Edg. 3. George, paymaster of the marine forces, born
November 23, 1759; married to Therefa Parker, fitter
of John lord Borrington, and had issue, Frederic-Adol-
phus, who died November 21, 1806. Charlotte-Barba-
ra, born March 27, 1761. His lordship died December
11, 1786, and was succeeded by Thomas, the present
and first. The presumptive heir is John Charles Wil-
liers, his lordship's brother.

CREATIONS.—Baron Hyde of Hindon in the county of
Wilts, June 3, 1756. Earl of Clarendon, June 14,
1776.

RESIDENCES.—Hindon, in the county of Wilts; and
Grove Park, in the county of Hertford.—Town-house,
Cumberland-place.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Fidei cotiela crex. "The cross is the teft
of faith."

NEVILLE, EARL OF ABERGAVENNY.

HENRY NEVILLE, EARL OF ABERGAVENNY, Vi
count Neville, and Baron of Abergavenny; Record-
er of Harwich; born February 22, 1755; succeeded his
father the late earl, September 10, 1785; married, Oc-
tober 3, 1781, Mary, only daughter of the late John
Robinson, of Wyke Houfe, in Middlefex, esquire, by
which lady, who died October 26, 1796, he had issue,
Mary, born at Marble, married, January 2, 1802, to
Thomas Meyers, esq. late account-tenant-general in
Bengal; and, dying July 12, 1807, left issue a fon, born June 4, 1802.
Henry, Viscount Neville, born May 22, 1785, died April
5, 1805. Ralph, viscount Neville, his heir apparent, born
December 21, 1786. Henrietta, born July 14, 1788.
John, born December 25, 1789. William, born June
28, 1792.

The family of Neville is descended from Walthof and
Uchtred, succescively earls of Northumberland in the
reign of Ethelred II. Robert Fitzmaldred lord of
Raby, their descendant, married Isabella, daughter and
heir of Henry, third in descent from Gilbert de Neville,
who came over to England with William the Conqueror;
and in consequence of this marriage the lords of Raby
assumed the surname of Neville. Robert lord Neville of
Raby, the issue of this marriage, took part with Henry
II. in his wars against the barons; but afterwards
changed his party, and fought against that monarch.
Ralph, third lord Neville of Raby, his great grandson,
was steward of the household to Edward I. and had a prin-
cipal command at the battle of Durham, October 17,
1346. John, fourth lord Neville of Raby, his son, was
made constable of the duchy of Aquitaine in the reign of
Richard II. and is said to have taken eighty-three towns,
castles, and fortes, from the enemy.

Ralph, sixth lord Neville of Raby, his son, was created
by Richard II. in 1356, earl of the county of Welfmore-
land. He nevertheless joined Henry duke of Lancaster,
afterwards Henry IV. in his project for depoiting that
monarch, and had the earldom of Richmond bestowed
upon him by king Henry at his accession. He greatly
alighted in the suppreffion of the insurrection of Henry
first earl of Northumberland, and Henry furrested Hot-
sbury, his fon, in 1453; and by stratagem induced Rich-
ard, second earl of York, to remove Hothbury, and affin-
and second earls of York, and Thomas Mowbray
card of Nottingham, to lay down their arms, who were
soon after beheaded. He was one of the principal com-
manders at the battle of Agincourt, October 25, 1415.
By his first marriage he had issue, 1. John, father of
Henry, second earl of Welfmoreland; and of John, kil-
ed at the battle of Towton Field, fighting for the ha-
ufe of Welfmoreland. 2. Richard, second earl of York.
Nevilles lords Ferrers of Overfey. He married, second-
ly, Joan, daughter of John of Gaunt duke of Lancaster;
by which lady he had two fons, Richard, and William.
The earl of Welfmoreland married, thirdly, Elizabeth,
daughter and heir of William Latimer lord Latimer;
by which lady he had issue, 1. George, 2. Edward,
3. Robert, who was elected in 1457 lord bishop of Sa-
libury, and tranflated in 1458 to the fee of Durham. He
died in 1457. 4. Cicely, married to Richard Plantage-
net duke of York; by whom he had issue king Edward
IV. and king Richard III. The earl of Welfmoreland
died in 1433.

Henry, second earl of Welfmoreland, was killed, to-
gether with his brother, at the battle of Towton Field,
fighting on the side of the house of Lancaster. The title
of earl of Welfmoreland became extinct in the person
of Charles fixth earl of Welfmoreland. Richard, eldest
son by the second venter of Ralph first earl of Welf-
moreland, married Alice, daughter and heir of Thomas Mont-
tague earl of Salisbury, in whose right he succeeded
to the title of Salisbury upon the death of that nobleman.
He was one of the most distinguished partifans of
the duke of York at the commencement of the conteft of
the two royal houses; and, when that nobleman was con-
stituted lord protector of the realm, the earl of Salisbury
was also appointed, by the authority of parliament,
April 2, 1454, lord high chancellor of England, in
which office he continued for about two years. He
was afterwards declared lord great chamberlain of England,
and had a considerable share in the battles of Saint Al-
bain's, Blore Heath, and Northampton; but was taken
prifoner at the battle of Wakefield, December 31, 1460,
and was presently executed, January 14, 1461, at Sa-
libury. 2. John, 3. George, who was elected, in
1457, lord bishop of Exeter; and constitued, July 25,
1466, lord high chancellor of England. He was tran-
flected to the archiepifcopal fee of York in 1464, and
reigned the office of chancellor in 1457. He died in 1468.
He was also chancellor of the university of Oxford.

Richard, second earl of Salisbury, married Anne,
daughter and heir of Richard Beauchamp earl of War-
wick, in whose right he succeeded to the title of Warwick
upon the death of that nobleman. He was the last
and greatest of those mighty barons, who, in the earlier pe-
riods of our history, overawed the crown, and extorted
from it, at various times, many important franchiles.
No less than thirty thousand pounds are paid to the
have lived daily at his board in his different manors and ca-
fles; and he is recorded to posterity by the appellation of
the "king-maker." He was more instrumetal than
any other subject in England in transferring the crown
to the house of York; and in his political transctions
made considerable use of the government of Calais,
which was placed in his hands. He commanded in chief
at the second battle of Saint Albain's in 1461, and was
constituted lord high admiral of England, Ireland, and
Aquitaine; but being afterwards disfiguted by Edward
IV. he formed a conspiracy in favour of his rival,
and drove him out of England in 1470. He was killed,
fighting for the house of Lancaster, April 24, 1471; leav-

HERALDRY.

leaving issue, 1. Isabel, married to George duke of Clarence, brother to Edward IV. by which marriage the titles of Warwick and Salisbury were transferred to the royal family. 2. Anne, married first to Edward prince of Wales, son of Henry VI. and secondly to Richard III.

John, second son of Richard first earl of Salisbury, was created earl of Northumberland, the title of Northumberland being restored to the family of Percy in 1449. George, third son of the said earl, had issue, upon the death of that nobleman, in 1435. He advanced a claim to this title by Mary, fifth lord Abergavenny, son of Edward, third son of George, third son of Ralph, first earl of Westmoreland.

George, fourth son of Ralph first earl of Westmoreland, married Joan, daughter of Thomas lord Fauconberg, of Ryle, in the county of York, in whose right he had issue, which included the title of Fauconberg, upon the death of that nobleman. He behaved with great gallantry at the siege of Orleans, in 1428; and embracing the party of the house of York, conspicuously contributed to the victory of Towton, March 29, 1461. By Edward IV. he was created earl of Kent, and in 1462, lord high admiral of England. Upon his death in the following year these titles became extinct.

John, third son of Ralph first earl of Westmoreland, married Elizabeth, daughter and heir of the late Sir John Latimer, barrister, of Fauconberg, and of Abergavenny, and of Le Despencer; in whose right he succeeded to the titles of Abergavenny and Le Despencer uppon the death of that nobleman, in 1435. He adhered to the party of the house of York.

George, second lord Abergavenny, his son, had issue, 1. George, third lord Abergavenny, who distinguished himself at the battle of Blackheath, and suffered imprisonment from party prejudice, first in the reign of Henry VII. and afterwards in that of Henry VIII. 2. Edward. 3. Thomas, who was appointed secretary of state to Henry VIII. and died May 29, 1543. Edward, second lord Abergavenny, of Edward son of George second lord Abergavenny, was one of the chief accomplished noblemen of the court of Henry VIII. and was beheaded upon an indictment "for devising to maintain, promote, and advance," Reginald Pole, afterwards cardinal archbishop of Canterbury, January 9, 1539.

In the reign of James I. the barony of Abergavenny being in Edward seventh lord Abergavenny his grandson, a claim was advanced to this title by Mary, daughter to Thomas Fane, knight, and daughter and heir of Henry fourth lord Abergavenny, son of George third lord Abergavenny; but it was decided by the house of peers, May 25, 1604, that it descended to the heir male. At the same time the barony of Le Despencer was confirmed to the said Mary, and the said Sir Thomas Fane, and his heirs general. On his part lord Abergavenny advanced a claim to the family-honour of earl of Westmoreland; but which claim was rejected by the peers. He had issue, 1. Henry, eighth lord Abergavenny. 2. Christopher, great-grandfather of George twelfth lord Abergavenny, and of Edward father of William, fifteenth lord. This William, fifteenth lord Abergavenny, mustered, upon the death of that nobleman, in 1435. He advanced a claim to this title by Mary, daughter to Thomas Pelham, esq. of St. Eustace, earl of Monmouth, in the county of North Wales, Pembroke, and county of Carmarthen, L.L.D. born June 18, 1744; married, April 11, 1677, Jane, daughter of Arthur Campagne, dean of Cambrai, in which he died, February 1, 1781. He had issue, Henry-William, lord Paget, heir apparent, born March 17, 1758, a general in the army, and colonel of the 7th regiment of dragoons; married, July 22, 1759, Caroline Elizabeth, daughter of George, fourth earl of Jefery. William, born December 22, 1767, Jane, daughter to the earl of Annesley, married, October 15, 1805, to John Wilmot, bart., of Kirby, seat of Annesley, in the county of Suffolk, and filler of Thomas, first earl of Chichester, and descendent to the dukes of Northumberland. The title of Northumberland being transferred to the family of Percy in 1449, was in that family created marquis of Montagu. When his brother, the earl of Warwick, invaded England with hostile intentions towards Edward IV. the marquis of Montagu went over to his brother, and Edward was in consequence expelled from the throne. He was killed, together with the earl of Warwick, at the battle of Bannockburn, April 14, 1314.

George, second grandson of the said earl, had issue, 1. Isabel, married to George duke of Clarence, brother to Edward IV. by which marriage the titles of Warwick and Salisbury were transferred to the royal family. 2. Anne, married first to Edward prince of Wales, son of Henry VI. and secondly to Richard III.

John, second son of Richard first earl of Salisbury, was created earl of Northumberland, the title of Northumberland being restored to the family of Percy in 1449. George, third son of the said earl, had issue, upon the death of that nobleman, in 1435. He advanced a claim to this title by Mary, fifth lord Abergavenny, son of Edward, third son of George, third son of Ralph, first earl of Westmoreland.

George, fourth son of Ralph first earl of Westmoreland, married Joan, daughter of Thomas lord Fauconberg, of Ryle, in the county of York, in whose right he had issue, which included the title of Fauconberg, upon the death of that nobleman. He behaved with great gallantry at the siege of Orleans, in 1428; and embracing the party of the house of York, conspicuously contributed to the victory of Towton, March 29, 1461. By Edward IV. he was created earl of Kent, and in 1462, lord high admiral of England. Upon his death in the following year these titles became extinct.

John, third son of Ralph first earl of Westmoreland, married Elizabeth, daughter and heir of the late Sir John Latimer, barrister, of Fauconberg, and of Abergavenny, and of Le Despencer; in whose right he succeeded to the titles of Abergavenny and Le Despencer upon the death of that nobleman, in 1435. He adhered to the party of the house of York.

George, second lord Abergavenny, his son, had issue, 1. George, third lord Abergavenny, who distinguished himself at the battle of Blackheath, and suffered imprisonment from party prejudice, first in the reign of Henry VII. and afterwards in that of Henry VIII. 2. Edward. 3. Thomas, who was appointed secretary of state to Henry VIII. and died May 29, 1543. Edward, second lord Abergavenny, of Edward son of George second lord Abergavenny, was one of the chief accomplished noblemen of the court of Henry VIII. and was beheaded upon an indictment "for devising to maintain, promote, and advance," Reginald Pole, afterwards cardinal archbishop of Canterbury, January 9, 1539.

In the reign of James I. the barony of Abergavenny being in Edward seventh lord Abergavenny his grandson, a claim was advanced to this title by Mary, daughter to Thomas Fane, knight, and daughter and heir of Henry fourth lord Abergavenny, son of George third lord Abergavenny; but it was decided by the house of peers, May 25, 1604, that it descended to the heir male. At the same time the barony of Le Despencer was confirmed to the said Mary, and the said Sir Thomas Fane, and his heirs general. On his part lord Abergavenny advanced a claim to the family-honour of earl of Westmoreland; but which claim was rejected by the peers. He had issue, 1. Henry, eighth lord Abergavenny. 2. Christopher, great-grandfather of George twelfth lord Abergavenny, and of Edward father of William, fifteenth lord. This William, fifteenth lord Abergavenny, mustered, upon the death of that nobleman, in 1435. He advanced a claim to this title by Mary, daughter to Thomas Pelham, esq. of St. Eustace, earl of Monmouth, in the county of North Wales, Pembroke, and county of Carmarthen, L.L.D. born June 18, 1744; married, April 11, 1677, Jane, daughter of Arthur Campagne, dean of Cambrai, in which he died, February 1, 1781. He had issue, Henry-William, lord Paget, heir apparent, born March 17, 1758, a general in the army, and colonel of the 7th regiment of dragoons; married, July 22, 1759, Caroline Elizabeth, daughter of George, fourth earl of Jefery. William, born December 22, 1767, Jane, daughter to the earl of Annesley, married, October 15, 1805, to John Wilmot, bart., of Kirby, seat of Annesley, in the county of Suffolk, and filler of Thomas, first earl of Chichester, and descendent to the dukes of Northumberland. The title of Northumberland being transferred to the family of Percy in 1449, was in that family created marquis of Montagu. When his brother, the earl of Warwick, invaded England with hostile intentions towards Edward IV. the marquis of Montagu went over to his brother, and Edward was in consequence expelled from the throne. He was killed, together with the earl of Warwick, at the battle of Bannockburn, April 14, 1314.

Bayley Paget, Earl of Uxbridge.

Henry Bayley Paget, Earl of Uxbridge, Paget, of Beaumesfort, Lord Lieutenant of the counties of Anglesey and Stafford, Keeper of the Castle of Carnarvon, Ranger of Snowdon Forest, Vice-admiral of North Wales, Pembroke, and county of Carmarthen, L.L.D. born June 18, 1744; married, April 11, 1677, Jane, daughter of Arthur Campagne, dean of Cambrai, in which he died, February 1, 1781. He had issue, Henry-William, lord Paget, heir apparent, born March 17, 1758, a general in the army, and colonel of the 7th regiment of dragoons; married, July 22, 1759, Caroline Elizabeth, daughter of George, fourth earl of Jefery. William, born December 22, 1767, Jane, daughter to the earl of Annesley, married, October 15, 1805, to John Wilmot, bart., of Kirby, seat of Annesley, in the county of Suffolk, and filler of Thomas, lord Graves.

The family of Paget is descended from William Paget, in the reign of Henry VI. who was educated in the reign of Henry VII. who was educated in the family of Stephen Gardiner bishop of Winchester, as the custom then was with the sons of noble personages. He was confinuated in 1544, by his majesty's private secretaries of state; and was appointed by Henry VIII. one U
one of the sixteen executors of his will, and to whom the
government of the kingdom was intrusted during the
minority of Edward VI. He exchanged the office
of secretary of state for that of chancellor of the
duchy and county palatine of Lancaster, in 1547, and was soon after
created baron Paget of Beaudevert. He was vindictively
sent to the Tower, November 8, 1551, on account of
the friendship in which he lived with the duke of
Somerset, lord protector; and was deprived of all his offices.
By Frances Bayley he had issue, January
29, 1556, lord keeper of the privy seal, which office he
resigned upon the accession of queen Elizabeth, and died
June 9, 1563. Thomas, third lord Paget, his son, was
attainted, in 1586, upon a charge of supporting Mary
queen of Scots; and William, fourth lord Paget, his
son, was restored in blood by James I. in 1603.
William, fifth lord Paget, son of William fourth lord
Paget, first took part with the parliament in the civil
wars; but soon after discovering the drift of Cromwell,
he raised a regiment for the service of Charles I. He
had issue, 1. William, sixth lord Paget. 2. Henry,
grandfather of Caroline, who married, April 19, 1737,
sir Nicholas Bayley, of Plasnewth, in the county of
Anglesey, the present earl of Uxbridge; Nicholas, born 1745;
Paget, born 1753; Mary, married to Stephen Medcalf, of
Sereby in the county of Lincoln, esquire; Dorothy,
moved to George Forbes, earl of Granard of the king-
dom of Ireland, and died February 19, 1764; Gertrude,
died unmarried, in 1761; Louisa-Augusta, born December
25, 1762; Henry Bayley, died February 7, 1766.
William, sixth lord Paget, voted in favour of the
vacancy of the throne, in 1689, and had a considerable share
in negociating the peace of Carlowitz, in 1698. Henry,
seventh lord Paget, his son, was constituted, June 13,
1711, captain of the yeomen of the guard to queen Anne,
and created, December 31, in the same year, baron Bus-
tow, in the county of Northumberland. By the last,
he was created, October 19, 1714, earl of Uxbridge in
the county of Middlesex. He resigned the office of cap-
tain of the yeomen of the guard in September, 1715, and
died in August 1743. Upon the death of his grandson
Henry, second earl of Uxbridge, the titles of lord Burton
and earl of Uxbridge became extinct; but the barony
of Paget, being a barony in fee, descended to the heir of
the female branch, existing in Henry Bayley, who, on
his acceding to the barony of Paget, on the death of his
cousin, assumed the name and arms of Paget, by royal
sign manual January 29, 1770; and was advanced by
George III. to the dignity of earl of Uxbridge.

GROSVENOR, EARL GROSVENOR.

ROBERT GROSVENOR, EARL GROSVENOR, Viscount Belgrave, in the county palatine of Chester, in the person of Thomas, second earl of Chester, and a Baronet, Lord Lieutenant and Custos Rotulorum of Flint; born March 22, 1677; succeeded his father the late earl, August 5, 1702; married, April 28, 1714, Eleonora, daughter of Thomas earl of Wilton; by which lady he had issue; Richard viscount Belgrave, heir apparent, born January 27, 1795; Thomas, born December 30, 1799, son of Thomas earl of Wilton; and Robert, born August 5, 1802; and Mary, born February 19, 1803.

The family of Grosvenor is descended from an uncle of Rollo first duke of Normandy, who affiicted that chief in his conquest of Normandy in 912. The family-name is supposed to have been derived from the appellation of gros-enere, signifying the rank and dignity of its progenitors. Gilbert le Grosvenor, his descendant, came over to England with William the Conqueror. Ralph, third in descent from Gilbert, adhered to the party of the empress Matilda, in her wars against King Stephen. Robert, his son, served under Richard Curé de Lion, in the Holy Land, and Robert, third in descent from the latter, under Edward III. at the battle of Cressy, August 26, 1346.

Richard, ninth in descent from the last-mentioned Robert, was created a baronet by James I. February 9, 1622. Sir Richard, second baronet, his son, adhered to the party of Charles I. in the civil wars, and had his estate sequestrated by the parliamentary faction. Sir Thomas, third baronet, his grandson, is said to have rejected an offer from James II. of a regiment and a peerage, upon condition that he would vote for the bill repealing the penal laws. Sir Robert, sixth baronet, his son, married Jane, daughter and heir of Thomas Warre of Sweetcote, in the county of Somerset, esquire; by which lady, who died April 10, 1733, he had issue, 1. Richard, born October 5, 1762; succeeded by his son, Robert, born August 21, 1759, Deborah, daughter and co-heir of Stephen Skynner, of Walthamstow, in Essex, esquire, by which lady, he had issue, 1. Richard, born October 5, 1762; married to Mifs Drax, of Charlborough, in the county of Dorset, and took the name of Drax. 2. Stephen, who died young. 3. Thomas, a general in the army, and co-heir, married April 6, 1797, Mifs Heathcote, sister to Sir Gilbert Heathcote, bart. 4. Maria-Deborah, born August 30, 1761. 5. Emma, who died in 1793. 6. Robert, born June 7, 1767. Mary, who died unmarried in 1774. 7. Elizabeth; Jane, died 1738, unmarried; Dorothy, married to the present viscount Curzon, uncle to lord Scarf; 8. Grace, married to Robert Grosvenor, second and present earl, born August 5, 1755, and was succeeded by his son, Richard, born August 21, 1759; succeeded by his son, Robert, eighth baronet, born June 18, 1731; married July 19, 1764, Henrietta, daughter of Henry Vernon, esq. by Henrietta, daughter of Thomas, third earl of Strafford, by whom he had issue, Richard, who died an infant, and Robert, now earl. The counts marquess of Hertford, and Robert, second and present earl.

CREATIONS.—Baron Grosvenor, April 8, 1766; Viscount and Earl, July 5, 1784.

RESIDENCES.—Grosvenor House, in Chester; and Halkin, in Flintshire. —Town-house, Upper Grosvenor-street.

Armorial Bearings.—See the annexed Engraving. Of armorial bearings granted or assumed in virtue of holding an office, a more satisfactory example cannot be adduced than what is afforded by the noble house of Grosvenor, so far as it concerns the support of their ancient office of Great Huntsman to the dukes of Normandy; a place of great dignity in those times, as companion of the prince. Their name, Grosvenor, or Gros Venas, in Norman; or, Græf Senare, as it is rendered in old Latin records, indubitably implies their office of superintendent of the chase.

Motto.—Nobilis virtus non femina character.—" Virtue, not pedigree, characterizes nobility."

PRATT, EARL CAMDEN.

JOHN-JEFFREYS PRATT, EARL CAMDEN, Viscount Bayham, and Baron Camden, Knight of the Garter; Lord President of the Council, Recorder of Bath, one of the Tellers of the Exchequer, and an elder brother of the Trinity House; born February 11, 1729; succeeded his father, the late earl, April 18, 1745; married, December 31, 1758, Frances, daughter and heir of William Molesworth, esq. of Wembury in Devonshire, by whom he had issue, Frances-Anne, born November 21, 1757; Georgiana-Elizabeth, born July 4, 1753; Caroline-Anne, born July 25, 1752; George-Charles viscount Bayham, heir apparent, born May 2, 1759.

The family of Pratt is descended from Richard Pratt, who suffered so extremely in the civil wars of Charles I. Sir John, his grandson, was constituted, October 26, 1714, one of the justices of the court of king's bench, April 15, 1718, one of the commissioners for the custody of great seal, and in the same year, lord chief justice of the court of king's bench. He married, first, Elizabeth, daughter of the reverend Henry Gregory, of Middleton Stoney in the county of Oxford; by which lady he had issue, 1. John. 2. Grace, married to John Fortescue lord Fortescue, of the kingdom of Ireland. 3. Anne, married to Edward Gee, esq. 4. Jane, married to Thomas Taylor of Pupin, in the county of Hertford, esq. Sir John Pratt married, secondly, Elizabeth, daughter of the reverend Hugh Wilton, of Fynant in the county of Montgomery; by which lady, who died in 1728, he had issue, 1. Thomas, who was one of the chief clerks of the office of treasury. 2. Charles, first earl Camden. 3. Caroline, married to Robert Camden, Baron of Montgomery, in the province of Westphalia, died September 3, 1805. 4. Jane, married to Nicholas Harding, of Canbury, in the county of Surrey, esquire. 5. Anna-Maria, married to Thomas Barret Lennard, late lord Dacre. 6. Frances, died unmarried. 7. Thomas, died March 19, 1705. 8. William, an officer in the South-Sea Company's service, and was cast away at sea. Charles, first earl Camden, brother of the Trinity House, died in 1728, he had issue, 1. John, who was, in 1759, chosen recorder of Bath, and the same year was appointed his majesty's attorney-general; in December 1761, he was constituted chief justice of the court of common pleas. His lordship obtained great applause by his conduct, May 6, 1763, in discharging Mr. Wilkes from his confinement in the Tower, and, by proclamating the general warrant upon which he had been apprehended illegal. Upon this occasion he was presented with the freedom of the cities of London, Dublin, Exeter, and Norwich. During the administration of the marquis of Rockingham, he was created baron Camden of Camden; and when that administration was superseded by a new cabinet under the auspices of the late earl of Chatham, he was, in 1783, declared lord high commissioner of England. Upon the change of ministry at the conclusion of the American war, he was constituted, March 27, 1782, lord president of the council; which office he resigned in March 1783, and was restored to the same appointment, December 1, 1784. He married Elizabeth, daughter and heir of Nicholas Jeffreys, esq. of the Priory, in Breconshire, by whom he died in January 1729, he had issue, John, the second and present earl; Frances, who married, June 7, 1755, Robert, earl of Londonderry, in Ireland, and has issue, Elizabeth; Sarah, who married Nicholas Price, esq. of Saintfield, in the county of Downe; Jane, who married Sir Walter-James James, bart. of Langley Hall, in Cheshire; Robert, who was in the army, and died unmarried.

CREATIONS.—Baron Camden, July 16, 1765; Viscount and Earl, May 13, 1786.

MURRAY, EARL STRANGE.

JOHN MURRAY, EARL STRANGE, Baron Murray of Stanley, in the county of Gloucester, Baron Strange, of Knockna; also Duke of Athol, &c. in Scotland.—See Dukes of Scotland.

EDGCUMBE, EARL OF MOUNT-EDGCUMBE.

RICHARD EDGCUMBE, EARL OF MOUNT-EDGCUMBE, Viscount Mount-Edgcumbe and Valletort, and Baron Edgcumbe; Lord Lieutenant and Vice-admiral of Cornwall, Recorder of Plympton-Earle, and LL.D. born September 14, 1764; succeeded his father the late earl, February 4, 1795; married February 21, 1789, Sophia Hobart, daughter of John, second earl of Buckinghamshire, by which lady, who died August 17, 1806, he has issue, Emma-Sophia, born July 26, 1791; Caroline, born October 22, 1792; William viscount Valletort, heir apparent, born November 19, 1795; Ernebt, born March 23, 1797; a daughter, born June 26, 1800.

The family of Edgcumbe was of considerable note in the reign of Edward III. Sir Richard Edgcumbe coaleced with Henry Stafford duke of Buckingham against the usurpation of Richard III. and went over to the court of king Richard II. After the victory of Bosworth, August 22, 1485, upon the accession of Henry VII. and his family allurned the surname of Fortescue. Sir John Fortescue was one of those gallant leaders who distinguished themselves in the wars of Henry V. for the crown of France; and Henry, his son, was confessit by Henry VI. June 25, 1456, lord chief justice of the court of common pleas of the kingdom of Ireland. Sir John, son of Henry, was appointed, in 1442, lord chief justice of the court of king's bench; which office he afterwards exchanged for that of lord high chancellor of England. He adhered to the party of the house of Lancaster in the civil wars; and wrote a treatise De Legibus Angliae, which has frequently been appealed to as one of the earliest monuments of our free constitution.

Hugh, ninth in descent from lord chancellor Fortescue, married Bridget, daughter and heir of Hugh Boscawen, esq., by Margaret, daughter and co-heiress of Theophilus, earl of Lincoln, and baron Clinton and Saye, by whom he had issue Hugh and Theophilus; and by a second wife, Lucy, daughter of Matthew, first lord Aylmer, he had Matthew, late earl Fortescue; Lucy, married, in 1744, to George Lord Lyttelton, and died January 19, 1746. The eldest sister of Theophilus, earl of Lincoln, and baron Clinton and Saye, married Robert, a brother of Sir John Fortescue, who died in 1757, having had issue by her, Samuel Rolle, esq., whose only daughter Margaret married, in 1754, to Robert, second earl of Orford; on the death of her mother the barony of Clinton and Saye devolved on his lordship, and on his death it devolved on R. G. W. TreffEngland, in the county of Cornwall. The barony, when in abeyance, was by George I. conferred on Hugh Fortescue, son and heir of the above-mentioned Hugh and Bridget, who, having demanded a writ of summons to parliament, was, March 16, 1717, called up to the house of lords, and took his seat as the ancient barons Clinton and Saye, who, by several summonses, had enjoyed that honour from February 6, 1708, the 26th Edward I. He was also advanced to the dignity of earl Clinton and baron Fortescue, of Castle Hill; and, in default of issue male, the title of baron Fortescue was to descend to Matthew Fortescue, his lordship's youngest and half brother, and the heirs male of his body. Theophilus, his lordship's own brother, died unmarried in March 1746; and, his lordship dying also unmarried, May 2, 1751, the title of earl Clinton became extinct; but the barony of Clinton and Saye reverted to Margaret, counts dowager of Orford; but the barony of Fortescue descended to his half-brother, Matthew. His lordship was born in 1710; married, July 8, 1733, Anne, second daughter of John Campbell, of Calder, in North Britain, esq., by whom he had issue, Hugh, the present earl; Matthew, born April 12, 1754, a captain in the royal navy; married to lady Ackland, widow of his brother, Matthew, and died unmarried in March 1773; Lucy, married, in September 1778, the reverend Mr. Harrington. His lordship, dying July 8, 1783, was succeeded by his son, Hugh, the first and present earl.

Creations.—Baron Fortescue, April 3, 1722; Viscount Fortescue, February 17, 1781; and Earl, August 18, 1789.

Residences.—Mount Edgcumbe, in the county of Cornwall; Cotele, in Cornwall; and Richmond Hill, in Surrey.—Town-houses, in Hill-street, Berkeley-square.

Armsorial Bearings.—See the annexed Engraving.

Motto.—Du plus fort de Dieu.—"At the all-powerful dispofal of God."

FORTESCUE, EARL FORTESCUE.

HUGH FORTESCUE, EARL FORTESCUE, Viscount Ebrington, and baron Fortescue, of Castle Hill, in the county of Devon; Lord Lieutenant, Cinque Ports, and Vice-admial of the same county; High Steward of Barnstaple and South Moulton; born March 12, 1753; succeeded his father the late lord, July 8, 1785; married, May 10, 1782, Hester Grenville, sister to George marquis of Buckingham; by which lady he has issue, Hugh, viscount Ebrington, heir apparent, born February 13, 1783; Hester, born December 17, 1784; married, May 26, 1804, to Peter lord King; Matthew, born in August 1786.

The family of Fortescue is descended from Sir Richard le Fort, who displayed considerable valour in the battle of Hafting, October 14, 1066, in consequence of which his family assumed the surname of Fortescue. Sir John Fortescue was one of those gallant leaders who distinguished themselves in the wars of Henry V. for the crown of France; and Henry, his son, was confeffed by Henry VI. June 25, 1456, lord chief justice of the court of common pleas of the kingdom of Ireland. Sir John, son of Henry, was appointed, in 1442, lord chief justice of the court of king's bench; which office he afterwards exchanged for that of lord high chancellor of England. He adhered to the party of the house of Lancaster in the civil wars; and wrote a treatise De Legibus Angliae, which has frequently been appealed to as one of the earliest monuments of our free constitution.

Hugh, ninth in descent from lord chancellor Fortescue, married Bridget, daughter and heir of Hugh Boscawen, esq., by Margaret, daughter and co-heiress of Theophilus, earl of Lincoln, and baron Clinton and Saye, by whom he had issue Hugh and Theophilus; and by a second wife, Lucy, daughter of Matthew, first lord Aylmer, he had Matthew, late earl Fortescue; Lucy, married, in 1744, to George Lord Lyttelton, and died January 19, 1746. The eldest sister of Theophilus, earl of Lincoln, and baron Clinton and Saye, married Robert, a brother of Sir John Fortescue, who died in 1757, having had issue by her, Samuel Rolle, esq., whose only daughter Margaret married, in 1754, to Robert, second earl of Orford; on the death of her mother the barony of Clinton and Saye devolved on his lordship, and on his death it devolved on R. G. W. Treff

Digby, Earl Digby.

EDWARD DIGBY, EARL DIGBY, Viscount Colehill, and Baron Digby, in England; also Lord Digby, Baron...
Baron of Gealhill, in Ireland, L.L.D. born January 6, 1773; succeeded his father, the late earl, Sept 25, 1793.

The family of Digby was in great estimation in the reign of Henry II. Their original name was Tilton, which they changed in 1536, for that of Digby. Everard Digby, third son of Everard, was killed fighting for the house of Lancaster at the battle of Towton, March 29, 1461. His seven sons also fought for Henry VII. at the battle of Bosworth, Aug 22, 1485. Sir Everard, fourth in descent from Everard eldest son of Everard, had issue, 1. Sir Kenelm Digby, who was bred to the navy, and afterward a general in the Roman and Algerines, in 1628, in which he behaved with great gallantry. He adhered to Charles I. in the civil wars, and was chancellor to Henrietta-Maria, queen dowager of England. He was distinguished for his ability and learning, being a great benefactor to the Bodleian Library, and an eminent proficient in the cabalistical and astrological sciences. He was the author of several treatises, and died June 11, 1665. Kenelm, his son, was killed at Sainte Neot's, fighting for Charles I. in the year 1648.

2. Sir John, who had also a command in the army of Charles I., and was killed in the civil wars.

George, third in descent from the first, had issue, 1. Robert. 2. John, who was sent to James I. with an intimation of the gunpowder-plot, and was by that monarch created, Nov 25, 1618, baron Digby of Sherborne, and, December 15, 1622, earl of Bristol. He was also employed in several foreign embassies, particularly in negotiating the marriage of the prince of Wales, afterwards Charles II., with the Spanish infanta. In this business he was obstructed by Villiers duke of Buckingham; and he withdrew with the royal family to the continent, and died January 21, 1653, leaving issue George, second earl of Bristol; and John, who had a command in the army of Charles I.

George, second earl of Bristol, was a nobleman of great abilities, and made a considerable figure in the reign of Charles I., under the title of lord Digby. He was one of the committee of the house of commons appointed to prepare articles of impeachment against the earl of Strafford; but afterwards opposed the bill of attainder, March 19, 1641. He died January 19, 1655. He was married to a nun, and immediately employed to negotiate with the Scottish army. He fought for Charles I. at the battle of Edgehill, October 23, 1642; and he withdrew with the royal family to the continent, and died January 21, 1653, leaving issue George, second earl of Bristol; and John, who had a command in the army of Charles I.

PERCY, EARL OF BEVERLEY.

ALGERNON PERCY, EARL OF BEVERLEY, succeeded to the dignity of Lord Louvain, June 6, 1786, by virtue of a special limitation; and was created earl of Beverley, by George III. born January 21, 1759; married, June 8, 1775, Isabella-Sufanna Burrell, second daughter of Peter Burrell, of Beckenham in Kent, eldest sister to the duchesses of Hamilton, and marchioness of Exeter, and to Lord Merry Wydari; by whom he had issue, Charlotte, born June 3, 1776, married to George viscount St. Aaph, son of John earl of Ashburnham; Elizabeth, died April 28, 1779; George, lord Louvaine, heir apparent, born June 22, 1778, married, June 23, 1803, Miss Louisa Wortley, and his issue a daughter, born September 24, 1803; a son, born October 2, 1803; died May 19, 1805; and a daughter, born March 19, 1805; Algernon, born August 19, 1779; Sufanna-Elizabeth, born December 29, 1782; Amelia-Charlotte, born November 9, 1786; Hugh, born January 29, 1784, married, May 19, 1806, Diana Manners Sutton, eldest daughter to his grace the archbishop of Canterbury; Josephine, born May 29, 1784; Henry, born September 14, 1785; William-Henry, born March 24, 1788; Francis John, born May 1, 1790; Charles, born March 4, 1794.

His lordship is next brother to the present duke of Northumberland, and son to the late duke. His pedigree

John, born May 1, 1790; Charles, born March 4, 1794.

Alger

born August 19, 1779; Sufanna-Elizabeth, born December 29, 1782; Amelia-Charlotte, born November 9, 1786; Hugh, born January 29, 1784, married, May 19, 1806, Diana Manners Sutton, eldest daughter to his grace the archbishop of Canterbury; Josephine, born May 29, 1784; Henry, born September 14, 1785; William-Henry, born March 24, 1788; Francis John, born May 1, 1790; Charles, born March 4, 1794.

His lordship is next brother to the present duke of Northumberland, and son to the late duke. His pedigree is the object of our sketch of that illustrious house.

CREATION.—Earl of Beverley, November 2, 1786.

RESIDENCES.—Louvaine, in the county of York; and Bennington, in Hertfordshire.—Town-house, Portman-square.

ARMOIRIAL BEARINGS.—See the annexed Engraving.

MOTTO.—Effortans en Dieu.—"Truant in God."

MURRAY, EARL OF MANSFIELD.

DAVID WILLIAM MURRAY, EARL OF MANSFIELD, and Baron Murray, in Middlesex; viscount Stormont, Baron of Scone and Balvaird, in Scotland; lord Lieutenant of Chankmanannah, Hereditary Keeper of Scone, and P.R.S. born March 7, 1777; succeeded his father, David, the late earl, September 1, 1796; married, September 16, 1797, Frederica Markham, daughter of the late archbishop of York, and has issue a daughter, born January 8, 1800; a daughter, born September 13, 1803; viscount Stormont, heir apparent, born February 21, 1806; and a daughter, born July 10, 1807.

The family of Murray earl of Mansfield is descended from Sir William Murray of Tulibardine, in the reign of James III. king of Scotland, who had issue, William, ancestor to the duke of Atholl, and Andrew, who married Margaret, daughter and heir of James Barclay, baron of Arngask, Balvaird, and Kipopo. Andrew, grandson of this marriage, headed a rebellion against James VI. king of Scotland, and being defeated at the battle of Corrichie, suffered decapitation in 1563.

David, his son, was master of the horse to James VI. and, having rendered him signal service upon occasion of the captivity of the earl of Gowrie, was created by that monarch, April 7, 1695, baron of Scone in the kingdom of Scotland, and next to James Murray, earl of Annandale, of that kingdom.

He was created viscount Stormont, by Charles II.

David, fifth lord viscount Stormont, his son, married Margaret, daughter and heir of David Scott of Scottvart, by which lady he had issue and eight daughters; of whom, Margaret was married to colonel John Hay, of Cromlix, who had the title of earl of Inverness. He was second son of Thomas, and sixth earl of Kinnoull, and married to Miss Alexander Lindsay, bart. of Alford, daughter of Robert, earl of Paisley, by whom she had the late Sir John Lindsay, knight of the Bath, and rear-admiral of Great Britain, who died June 4, 1788; Catharine, died November 21, 1754. The second son, James, was one of her majesty's commissaries for settling the trade with France; John, the third son, died young; William, the fourth, was appointed solicitor-general to his majesty in 1745, in 1744 attorney-general; in 1756 lord chief justice of the court of King's Bench, and created a peer of Great Britain, by the title of lord Mansfield, earl and baron of Mansfield, in the county of Nottingham, and afterwards the first earl of Mansfield in Middlesex, August 1, 1792. Charles and Robert, both died without issue; Elizabeth; Jane, Nicholas, and Mary, all died unmarried.

William, the first earl of Mansfield, studied in Christ Church College, Oxford; and gained a poetical prize in that university, in 1728. It is to this nobleman that Mr. Pope alludes, when, speaking of his choice of the profession of the law, he exclaims,

"How sweet an Ovid is in Murray lost!" He was constituted, November 27, 1742, solicitor general to George II. which office he exchanged, April 17, 1754, for that of attorney general. He was early distinguished in the house of commons by the most infinuating eloquence; and on the part of the then administration was a most powerful speaker. Having resigned the office of attorney-general, he was constituted, November 8, 1756, lord chief justice of the court of King's Bench, and created baron Mansfield, of Mansfield, in the county of Nottingham. He twice filled the offices of chancellor and under treasurer of the exchequer; first in 1757, and afterwards in 1757. He was created by George III. earl of Mansfield, with remainder to the issue of his consort; and in default of her issue, to Louisa, daughter of David lord viscount Stormont, and her Issue.

He resigned the office of lord chief justice of the court of King's Bench, and created a peer of Great Britain, after having filled the office for the long period of thirty-two years. He married, September 1738, Elizabeth Finch, sixth daughter of Daniel earl of Winchilsea, by whom he had no issue. She died in 1784, and his lordship March 30, 1793.

David, sixth viscount Stormont, succeeded his father, and married Anne, daughter and sole heir of John Stewart, of Invernetty, esquire, by whom he had two sons and two daughters: David, the late viscount, and second earl; James; Anne; Margery, who died April 25, 1779. His lordship, dying in 1742, was succeeded as viscount by his eldest son, David, who succeeded to his father's viscountship by his eldest son, David, who succeeded to his father's viscountship, by Charles, born August 21, 1781; Henry, born August 6, 1786; and Caroline, born December 14, 1790. His lordship, the late earl, died September 27, 1796, and was succeeded
HERALDRY.

MOTTO.—“Unde jexeret.”

JENKINSON, EARL OF LIVERPOOL.

CHARLES JENKINSON, EARL OF LIVERPOOL, and Lord Hawkins, Baron of Hawkbury, in the county of Gloucefer, and a Baronet; Collector of the Customs Inwards in the Port of London; Clerk of the Pells in the house of Commons; President of the Society of Arts, L.L.D. born May 29, 1784; and married, July 15, 1771, to Elizabeth-Alicia, sister of the earl of Egremont, by whom he has issue, Henry-George, lord Porchefer, heir apparent, born June 7, 1772, married, April 26, 1796, Elizabeth, daughter and heir of colonel Ackland, by lady Harriet, sister of the late earl of Ilchestor, by whom he has issue, Harriet-Elizabeth, born June 23, 1797; and a son, born June 8, 1798. Charles, born July 5, 1774, married, July 9, 1798, Bridget-Augufa Forreft, fourth daughter of the honourable J. Byng, and niece to viscount Torrington. William, born January 12, 1778; George, born February 21, 1779; Eduard, born August 3, 1782; and William, born April 1, 1784. Algernon, born July 15, 1772; Frances, born June 5, 1775, married, December 5, 1779, to Thomas, eldest son of lord Ducie, and has issue.

The pedigre of his lordship is set forth under that of the Earl of Pembroke, being the son of William, the fourth son of Thomas, grandfather of the present earl.

CREATIONS.—Baron Porchefer, October 17, 1780; Earl of Carnarvon: July 3, 1793.

RESIDENCES.—Highclere-houfe, in the county of Southampton. —Town-houfe, in Tenterden-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—“Virtus in jure.”

JERVIS, EARL OF ST. VINCENT.

JOHN JERVIS, EARL OF ST. VINCENT, Baron Jervis, and Viscount St. Vincent of Meaford, in the county of Stafford, with remainders to William-Henry Ricketts, esq. captain in the royal navy, and his heirs male; to whom his majesty, June 13, 1801, granted permission to assume and use the surname and bear the arms of Jervis only, to Edward-Jervis Ricketts, esq. barrister at law, brother to the said William-Henry Ricketts, and his issue; and to the issue of Mary Ricketts, by William-Henry Ricketts, esq. of the island of Jamaica, deceased, and sister to the said John earl of St. Vincent, and his heirs; and the dignity of viscountess of St. Vincent of Meaford, to the right honourable Mary countes of Northelk, daughter of the said Mary Ricketts, and widow of William-Henry Ricketts, esq. and her issue; and to the issue of their marriage.

The pedigre of his lordship is set forth under that of the Earl of Pembroke, being the son of William, the fourth son of Thomas, grandfather of the present earl.

CREATIONS.—Baron Hawkins, May 27, 1797; and Earl of St. Vincent, May 27, 1797, and Viscount St. Vincent, April 21, 1801.

RESIDENCES.—Meaford-place, in Staffordshire; and Rochets, in the county of Eifex.—Town-houfe, Mortimer-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—“Palmis non sine pulvere.”—“I have with difficulty gained the palm.”
538

HERALDRY.

Armorial Bearings.—See the annexed Engraving. The armorial bearings of the earl of St. Vincent being the reward of valour and integrity in the service of his country, we shall, for the gratification of our readers, explain them here; viz. Sable, a chevron ermine between three martlets or; his family arms.

Crest.—Of a naval coronet vert, the tails of it or, a demi pegafus argent, maned, &c. or, winged azure; the blazons charged with a fleur de lis of the second.

Supporters.—Dexter, an eagle, holding in his interior talon a thunderbolt, all proper. sinister, a pegafus argent, maned, &c. or, wings azure; the dexter one charged with a fleur de lis of the second.

Motto.—Thus.

Among the brave and successful actions fought by the earl of St. Vincent, and for which he twice received the public thanks of both houses of parliament, we might instance the following: In 1783, he took, off Breif, Le Pegafe, a French ship of 74 guns and 700 men, remarkable for having been constructed from her keel, and completely equipped, in about ninety days, as an instance of what might possibly be accomplished by supererogation in the work of ship-building. She was commanded by the chevalier de Giliart, who fought till he became killed in India, in 1774, unmarried; Edward, in the army, died at St. Lucia, in 1779, unmarried; Henry-William, died August 4, 1774. His lordship married, secondly, August 19, 1777, Mary Churchill, eldest daughter of Charles Churchill, esq., by lady Mary Walpole, daughter of Robert earl of Orford, from whom he had issue, 1. Humphrey, born May 26, 1778, married to the honourable and reverend Gerald Valerian Wellesley, brother to the marquis of Wellesley; Henry, born February 26, 1780; Charlotte, born July 11, 1781; and died, January 18, 1797, unmarried; Edward, born April 25, 1789. His lordship married April 3, 1807, and was succeeded by his son Charles-Henry, the present earl. The prefumptive heir is Henry, brother to the earl.

CREATIONS.—Baron Cadogan, May 5, 1718; Earl of Cadogan, June 12, 1720.

RESIDENCE.—Santon-Downham, in the county of Suffolk.

Armorial Bearings.—See the annexed Engraving. 

Motto.—Qui invideo minor et.—“He who envies is inferior.”

HARRIS, EARL OF MALMESBURY.

JAMES HARRIS, EARL OF MALMESBURY, Vizcount Fitz-Harris, of Hurne Court, in Hampshire; Lord Malmesbury, of Malmsbury, in the county of Wilts; and Lord Lieutenant and Custos Rotulorum of the county of Southampton; Knight of the Bath; and envoy extraordinary and minister plenipotentiary to the court of Madrid; and further promoted, in 1772, to be envoy extraordinary to the court of Berlin; which office he exchanged, in 1777, for that of envoy extraordinary to the court of St. Petersburg. He was further appointed, in 1783, envoy extraordinary and minister plenipotentiary to the republic of the United Provinces of Holland, which honourable appointment he held for many years; and on his return to England was, by George III., created baron Malmsbury. His lordship was also appointed, in 1796, envoy extraordinary to the French directory at Paris, for the purpose of settling preliminaries of peace; but which proved abortive. See the article ENGLAND, vol. iv. p. 782, for the transactions of this nobleman.

This nobleman was created, February 22, 1771, minor plenipotentiary to the court of Madrid; and further promoted, in 1772, to be envoy extraordinary to the court of Berlin; which office he exchanged, in 1777, for that of envoy extraordinary to the court of St. Petersburg. He was further appointed, in 1783, envoy extraordinary and minister plenipotentiary to the republic of the United Provinces of Holland, which honourable appointment he held for many years; and on his return to England was, by George III., created baron Malmsbury. His lordship was also appointed, in 1796, envoy extraordinary to the French directory at Paris, for the purpose of settling preliminaries of peace; but which proved abortive. See the article ENGLAND, vol. iv. p. 782, for the transactions of this nobleman.

James Harris, father of lord Malmsbury, was an author of considerable abilities and reputation; as shown in the biographical sketch of his life, given in p. 255 of this volume. He married Elizabeth, daughter and heir of John Clarke, of Sandford, in the county of Somerset, esquire; by which lady he had issue, 1. James, lord Malmsbury, 2. Catharine,
He succeeded his uncle, Alexander Wedderburne, the elder daughter of the honourable Edward Bouverie, in commemoration of the above-mentioned revolution: and his majesty has also been pleased to order this his concession and license and authority, in pursuance of the royal permission of keeping of the great seal; but was deprived of the assembly of professors of Greenwich, in 1673, and died in the following year. James, elder son of Alexander, had issue, 1. Alexander, whose grandson John was created a baronet of the kingdom of Scotland by queen Anne, August 9, 1704. 2. Peter, who was appointed, July 17, 1668, one of the lords of the court of felon of Scotland; in which character he bore the style of lord Gosford, of the county of Mid Lothian. He had issue Peter and Alexander.

Peter, elder son of lord Gosford, was created a baronet of the kingdom of Scotland by William III. December 30, 1697, and married Janet, daughter and heir of sir Charles Halket, of Fetterane, baronet, by which lady he had issue, 1. Alexander, his brother; and by patent, April 21, 1801, earl of Rosslyn, to him and the heirs male, with remainder as above. He died January 3, 1805, and was succeeded by his nephew, sir James St. Clair Erskine, bart. 3. Louisa Margaret, born May, 1759, and married sir Henry Erskine, of Alva, baronet, who died in July, 1765, and her ladyship in June, 1797, leaving issue, 1. Alex- ander, lord Loughborough. 2. David, who was appointed, February 1, 1696, lord bishop of Dumbarton, and was deprived of the same, and called to the privy council; in 1783, he was appointed, February 1, 1784, chief justice of the Common Pleas, and in the army as one of his supports: as a public mark of his Prussian majesty's esteem and regard, and as a memorial of the satisfaction he derived from his conduct, in the character of his majesty's ambassador extraordinary and plenipotentiary to the States General of the United Provinces, during the late revolution in that country, as well as from his services in the field, he had issue, all, or; and on each wing a trefoil, as the chief. Supports: Dexter, the Prussian eagle as in the arms, the ensigns in the talons being omitted; sinister, a rein-deer beaked, legged; on the breast the cipher F R, and over it the electoral cap; over its head the same cap: acroos them barwise a key azure.

Motto, over the crest, on an orange-coloured label, Je maintiendrai, "I will support: " the motto of the house of Naflan. Motto below the shield, Ubique patria trarius insidiens, "In all situations remember your country."

These honourable augmentations were thus publicly announced:

Whitehall, May 9, 1789.

The king has been pleased to grant to the right honourable James lord Malmesbury, and his issue, his royal licence and authority, in pursuance of the royal permission of the king of Prussia, under his signet and sign manual, bearing date 28th day of October last, to add to the arms of his family the black eagle of Prussia, either quarterly, or as one of his supports: as a public mark of his Prussian majesty's esteem and regard, and as a memorial of the satisfaction he derived from his conduct, in the character of his majesty's ambassador extraordinary and plenipotentiary to the States General of the United Provinces, during the late revolution in that country, as well as from his services in the field, he had issue, all, or; and on each wing a trefoil, as the chief. Supports: Dexter, the Prussian eagle as in the arms, the ensigns in the talons being omitted; sinister, a rein-deer beaked, legged; on the breast the cipher F R, and over it the electoral cap; over its head the same cap: across them barwise a key azure.

Motto, over the crest, on an orange-coloured label, Je maintiendrai, "I will support: " the motto of the house of Naflan. Motto below the shield, Ubique patria trarius insidiens, "In all situations remember your country."

These honourable augmentations were thus publicly announced:

Whitehall, May 9, 1789.

The king has been pleased to grant to the right honourable James lord Malmesbury, and his issue, his royal licence and authority, in pursuance of the royal permission of the king of Prussia, under his signet and sign manual, bearing date 28th day of October last, to add to the arms of his family the black eagle of Prussia, either quarterly, or as one of his supports: as a public mark of his Prussian majesty's esteem and regard, and as a memorial of the satisfaction he derived from his conduct, in the character of his majesty's ambassador extraordinary and plenipotentiary to the States General of the United Provinces, during the late revolution in that country, as well as from his services in the field, he had issue, all, or; and on each wing a trefoil, as the chief. Supports: Dexter, the Prussian eagle as in the arms, the ensigns in the talons being omitted; sinister, a rein-deer beaked, legged; on the breast the cipher F R, and over it the electoral cap; over its head the same cap: across them barwise a key azure.

Motto, over the crest, on an orange-coloured label, Je maintiendrai, "I will support: " the motto of the house of Naflan. Motto below the shield, Ubique patria trarius insidiens, "In all situations remember your country."

These honourable augmentations were thus publicly announced:

Whitehall, May 9, 1789.
CRAVEN, EARL OF CRAVEN.

WILLIAM CRAVEN, EARL OF CRAVEN, in the county of York, Viscount Uffington in Berkshire, and Baron Craven, of Hempheld-Marsh, in Berkshire; a Major-general in the army; born September 1, 1779; succeeded his father the Late Lord, September 26, 1791.

The family of Craven is descended from the venerable John Craven, of Appletree in the county of York, in the reign of Henry VIII. He had issue, 1. Henry, 2. William, father of Sir William, who was elected lord-mayor of London in the year 1571; and had issue William, and John, created by Charles I. March 21, 1642, baron Craven of Ryton in the county of Salop, which title became extinct at his death. William, son of Sir William, was created by Charles I. March 12, 1647, baron Craven of Hempheld-Marsh; and by Charles II. March 16, 1664, viscount Craven of Uffington in the county of Berks, and Earl Craven of Craven in the county of York. He afterwards obtained a limitation of the barony to William, Thomas, and Anthony, grandsons of Henry son of John, his paternal ancestor.

Baron Craven became extinct, and the barony descended to William, Thomas, and Anthony, the heirs of the late lord Leigh, who dying without male issue, the late Lord, and died in 1746, leaving no issue. 8. Maria-Rebecca, married, first, to Ludford Taylor, esq. of Vale Muscall, in Kent, and has issue; and their mother died January 3, 1799. Maria, sister to this lady, married, secondly, June 13, 1801, to Mr. Sergeant Onslow. 2. Sir Richard, bart. an admiral in the navy, who died January 9, 1799. 5. Henry. 6. Thomas, fourth lord Leigh, and died in 1746, leaving no issue. 7. Dorothea, married, April 11, 1793, the honourable Frederic Serjeant Onslow. 2. Sir Richard, second baronet, having married Jane, daughter of Howard Berkeley, of Clandon, and Cranley, of Imber-court in Surrey, was left a widow; and married, secondly, June 13, 1801, to Mr. Sergeant Onslow. 2. Sir Richard, second baronet, who thus succeeded to the dignity of a baronet, had issue, 1. Sir Richard, second baronet, who was elected, November 16, 1708, speaker of the house of commons; and ceased to hold that office upon the change of ministry in 1710. Upon the accession of George I. he was constituted chancellor and under-treasurer of the excise, which office he exchanged, in October 1715, for that of one of the tellers of the exchequer, and was soon after created baron Onslow of Onslow and Clandon, with remainder to the heirs male of his father. He died December 5, 1717. 2. Foot, younger son of Sir Arthur, had issue. 1. Sir George, was constituted constable of George II. November 23, 1760, with remainder to his son Sir Arthur Onslow, who thus succeeded to the dignity of a baronet, had issue, 1. Sir Richard, second baronet, who was elected, November 16, 1708, speaker of the house of commons; and ceased to hold that office upon the change of ministry in 1710. Upon the accession of George I. he was constituted chancellor and under-treasurer of the excise, which office he exchanged, in October 1715, for that of one of the tellers of the exchequer, and was soon after created baron Onslow of Onslow and Clandon, with remainder to the heirs male of his father. He died December 5, 1717. 2. Foot, younger son of Sir Arthur, had issue. 1. Arthur, who was constituted constable of George II. in April, 1734, treasurer of the navy in May, 1735, and elected speaker of the house of commons. He resigned the office of treasurer of the navy in May 1743, and the chair of the house of commons, which he had filled for upwards of thirty-three years with peculiar celebrity; in March 1761; at which time a pension of three thousand pounds per annum was granted for his parliamentary services, upon the joint lives of himself and his son, now earl. He married Anne, daughter and heir of John Bridges, of Thomas Ditton in the county of Surrey, esquire; by which lady, who died June 5, 1766, he had issue George, the present earl; and died February 17, 1768. 2. Richard, Richard, younger son of Foot, embraced the profession of the army, and married Pooley, daughter of Charles Warner of Little Burton in the county of Essex, esquire; by which lady he had issue three sons; 1. George, who was constituted constable of Windsor Forester, and married Jane, daughter of the reverend Thomas Thorpe; by which lady he had issue two sons, Richard, who died an infant; and George, born April 7, 1764: a daughter, married, March 23, 1788, to admiral Sir Francis Drake, bart. by whom she was left a widow; and married, secondly, June 13, 1805, to Mr. Sergeant Onslow. 2. Sir Richard, bart. an admiral in the navy.
by which lady, who died February 27, 1771, lie had his only surviving son, Robert, the late second lord, whose lordship, dying November 28, 1724, was succeeded by his son, Charles, the third lord, and first present earl.

C Reations.—Baron Romney, June 25, 1716; Viscount and Earl, June 23, 1731.

Residences.—Mote Park in the county of Kent.—Town-house, Arlington-street.

Armorial Bearings.—See the annexed Engraving.

Motto.—Non sibi, sed patriae.—“Not for myself, but for my country.”

THOMAS PELHAM, EARL OF CHICHESTER, and Baron Pelham, Joint-Potentiary-General, a Privy Councillor also in Ireland, F. R. S. born April 28, 1736; succeeded his father in January 1783. He was called up by writ to the house of peers, by the title of baron Pelham, during his father’s life-time, June 29, 1801; and married, August 18, 1801, lady Mary-Heinert-Ofborne, daughter of Francis, fifth duke of Leeds, and has issue a daughter, born August 14, 1803.

The family of Pelham has pedigree in England prior to the Norman conquest. Sir John Pelham, in the reign of Edward III. distinguished himself at the battle of Poictiers, and, with lord Delawar, took prisoner John King of France. John, his son, attended personally upon Henry of Bolingbroke, afterwards Henry IV. and was joint treasurer of war to that monarch. He distinguished himself in the wars of Henry V. for the crown of France; and died in 1429. William, his grandson, had issue, 1. William, who distinguished himself in the wars of queen Elizabeth, and was by that princess constituted warden general of the office of ordnance. He was second in command, under Robert Dudley earl of Leicester, in the expedition into the Low Countries; and died November 24, 1587. 2. Edward, who was constituted by queen Elizabeth lord chief baron of the exchequer of the kingdom of Ireland, and died July 4, 1606.

Sir John, third in descent from William, was created a baronet, by James I. He married, May 26, 1616, lady Amelia-Chapline, eldest daughter to Thomas the second baronet, his son, adhered to the parliamentary interest in the civil wars of Charles I. Sir John, third baronet, his son, had issue, 1. Sir Thomas, fourth baronet. 2. Henry, who was clerk of the privy council in his majesty’s exchequer, and died April 1, 1721. Thomas, his son, married Annatta, daughter of Thomas Bridges, esq. by which lady he had issue Thomas, first lord Pelham; and Harriot, married first to Richard, son of Henry Temple first lord viscount Palmerston of the kingdom of Ireland, and secondly to George first earl of Abergavenny. She died August 29, 1768; and Thomas, her father, in 1737.

Sir John, fourth baronet, was created by queen Anne, November 29, 1706, baron Pelham of Laughton in the county of Sussex. He married Grace, first daughter and heiress of John Holles duke of Newcastle, marquis of Clare, earl of Clare, and baron of Haughton; by which lady he had issue, 1. Thomas, second lord Pelham. 2. Henry, who was constituted, April 1, 1721, secretary at war, and exchanged that office, May 3, 1725, for that of paymaster general of his majesty’s forces. He was further promoted, August 27, 1743, to be first lord commissioner of the treasury, and chancellor and under treasurer of the exchequer, which employments he filled with integrity and applause. He married Catharine, daughter of John second duke of Bridgewater, by which lady he had issue Catharine, married to Henry duke of Newcastle, who died July 29, 1760; Frances, born August 18, 1728;
738; Grace, married to Louis lord Sondes, who died July 30, 1777; and Mary, born in September 1739.

Henry, the father, died March 6, 1754. 3. Lucy, married to Henry seventh earl of Lincoln, and died July 20, 1779.

Thomas, second lord Pelham, assumed the surname of Holles, in compliance with the will of his maternal uncle, and was by George I. October 26, 1714, created viscount Haughton, in the county of Nottingham, and earl of Clare in the county of Suffolk; and, August 2, 1728; Grace, married to Louis lord Sondes, who died December 14, 1748, chancellor of the university of Cambridge; and, having resigned the feisin of secretary of state, was constituted, March 16, 1754, first lord commissioner of the treasury, in which office he continued till November 1756. By George II. he was created duke of Newcastle-under-line in the county of Stafford, with remainder to Henry Fennes, ninth earl of Lincoln, afterwards duke of Newcastle; and was re-appointed first lord commissioner of the treasury, July 2, 1757, which office he resigned in May 1762. He was also created by George III. Baron Pelham of Stanmer, with remainder to Thomas, third lord Pelham. Upon his death, November 17, 1768, the titles of baron Pelham of Laughton, viscount Haughton, earl and marquis of Clare, and duke of Newcastle in the county of Northumberland, became extinct.

Thomas, third lord Pelham, succeeded to the barony on the death of the duke of Newcastle, in 1768; and was, June 23, 1801, created earl of Chichester; married, May 11, 1754, Anne, daughter and heir of Frederic-Maynard Frankland, esq. sixth son of Sir Thomas Frankland, bart, by whom he had issue, Thomas, the present earl. Henrietta-Anne, born September 1, 1757; married, May 23, 1789, George, lord Leflie, son to Jane-Elizabeth, countess of Rothes, and died December 5, 1797, leaving issue three daughters. Henry, born July 10, 1759; married to Catharine, eldest daughter of Charles Cobb, esq. (only son of Charles, late archbishop of Dublin,) and died January 16, 1797, leaving three daughters, Harriot, Amelia, and Catharine. Frances, born December 4, 1760; married, December 3, 1778, to George viscount Haughton, and died June 28, 1793, leaving issue one daughter, Frances-Anne. Lucy, born February 22, 1763; married to John lord Sheffield, and died January 18, 1795. Anthony, born, July 19, 1764; George, D. D. lord bishop of Bristol, born October 13, 1766; married to Mary, daughter of Sir Richard Ryecroft, bart. Frederic-John, died an infant. On his lordship's death, he was succeeded by his eldest son, Thomas, the present and second earl.—The heir presumptive is George bishop of Bristol, only brother of the earl.

Creations.—Baron Pelham, of Stanmer, May 4, 1762, and by writ of summons, June 29, 1801; Earl of Chichester, June 23, 1801.

Residences.—Stanmer Park, near Highbury, Monmouth, Suffex.—Town-houfe, Bruton-street.

Armorial Bearings.—See the annexed Engraving.

Motto.—"Virtutis non armis fudo."—"I trust in virtue, not in arms."

GREY, EARL GREY.

CHARLES GREY, LORD GREY OF HOWICK, VISCOUNT HOWICK, and EARL GREY; born March 13, 1739; succeeded his father, Charles, the first earl, November 14, 1789; married, November 18, 1794, Mary-Evelyn, daughter of lord Ponsonby, and has issue, Henry, vicount Howick, heir apparent, born December 27, 1802; Charles, born March 15, 1804; Louisa-Evelyn, born April 7, 1797; Elizabeth, born July 10, 1798; Caroline, born in 1799; Georgiana, born February 17, 1801; Mary, born May 17, 1806; died March 19, 1807. The present earl is nephew of sir Henry Grey, of Howick, in the county of Northumberland, baronet, descended from a junior branch of a very illustrious family, the chief of whom was created baron Grey, of Werke, by James I. and king William III. advanced them to the dignities of vicount Glendale and earl of Tankerville; a title which one of them had gained in the conquest of France under Henry V.

Charles, first earl Grey, born October 23, 1729, was a general in the army, and governor of Guernsey. His lordship was aid-de-camp to prince Ferdinand at the battle of Minden, in which he was wounded; served at the relief of Ostend and Nieuport in 1793; and was commanded in chief in India, and governor of the Cape of Good Hope, and lieutenant-colonel of the 17th regiment of dragoons; Thomas, born in 1770, died in 1797; George, commissioneer of Portmouth dock-yard, married Mary, sister to Samuel Whitbread, esq. by whom he had issue, Henry, who died an infant; Charles, the present earl; Henry-George, a general in the army, governor of the Cape of Good Hope, and lieutenant-colonel of the 17th regiment of dragoons; Thomas, born in 1770, died in 1797; George, commissioneer of Portmouth dock-yard, married Mary, sister to Samuel Whitbread, esq. by whom he had issue, Mary, born April 3, 1796; Elizabeth, born December 1800; and George, May 11, 1799; William, born October 20, 1777, a colonel in the army, and lieutenant-colonel of Chelmsford regiment and lieutenant-colonel of the royal navy. The earl died December 14, 1807, and was succeeded by his eldest son, Charles, the present and second earl.

CREATIONS.—Baron of Howick, June 23, 1801; Viccount Howick, and Earl Grey, April 1, 1806.

RESIDENCES.—Fallowden House, in the county of Northumberland.
LOWTHER, EARL OF LONSDALE.

WILLIAM LOWTHER, Viscount and Baron LOWTHER, EARL OF LONSDALE, and a Baronet; Knight of the Garter, Lord Lieutenant of the counties of Cumberland and Westmoreland, Recorder of Carlisle, and a Colonel in the Army; born December 29, 1757; succeeded to the titles of viscount and baron Lowther on the death of James earl of Lonsdale, May 1823, agreeable to the patent of limitation, October 10, 1797; married, July 13, 1788, lady Augusta Fane, elder daughter of Sir Hugh, eighth in descent from Sir Hugh, had five children: 1. Robert; 2. Margaret, married Lowther of Lowther, and viscount Lonsdale; and far in 1755-

The family of Lowther was of distinguished eminence in England long before the Norman conquest; and has been variously written Lader, Loder, Lotlair, &c. It produced one viscount, and three baronets, all living at the same time in the reign of George II. Sir Hugh de Lowther was attorney-general to Edward I. in 1292; and had issue, 1. Sir Hugh; 2. Sir Richard, eighth in descent from Sir Hugh, who was lord chief justice of the court of King's Bench, December 5, 1350. Sir Richard, eighth in desc-

Sir Richard, eighth in descent from Sir Hugh, had issue, 1. Sir Hugh; 2. Sir Gerard, who acted as a deputy under an earl, to regulate or superintend the jurisdiction of a county. It was made a title of honour, distinct from that of office, by Henry VI, in 1439, who created Sir John Beaumont a peer, by the name of viscount Beaumont; which is the first instance of the kind on the records of history.

DEVEREUX, VISCOUNT HEREFORD.

HENRY DEVEREUX, Viscount HEREFORD, and a Baronet; Premier Viscount of England; succeeded his father, the late viscount, December 31, 1788; married, December 21, 1805, Milis F. E. Cornewall, third daughter of Sir George Cornewall, bart., of Moccas-court, Herefordshire.

The family of Devereux derives its surname from the town of Eveux, in Normandy; and the first of them who settled in England were Walter and Robert, sons of Walter earl of Rofmar, took part with the barons in the battle of Hastings, the lordship of Salisburry, in the county of Wilts; and Patrick, his grand-

Sir Richard, eighth in descent from Sir Hugh, had issue, 1. Sir Hugh; 2. Sir Gerard, who acted as a deputy under an earl, to regulate or superintend the jurisdiction of a county. It was made a title of honour, distinct from that of office, by Henry VI, in 1439, who created Sir John Beaumont a peer, by the name of viscount Beaumont; which is the first instance of the kind on the records of history.

Sir Richard, eighth in descent from Sir Hugh, had issue, 1. Sir Hugh; 2. Sir Gerard, who acted as a deputy under an earl, to regulate or superintend the jurisdiction of a county. It was made a title of honour, distinct from that of office, by Henry VI, in 1439, who created Sir John Beaumont a peer, by the name of viscount Beaumont; which is the first instance of the kind on the records of history.

Sir Richard, eighth in descent from Sir Hugh, had issue, 1. Sir Hugh; 2. Sir Gerard, who acted as a deputy under an earl, to regulate or superintend the jurisdiction of a county. It was made a title of honour, distinct from that of office, by Henry VI, in 1439, who created Sir John Beaumont a peer, by the name of viscount Beaumont; which is the first instance of the kind on the records of history.
ties, daughter of Henry Bourchier earl of Effex, earl of Eu in the duchy of Normandy, viscount Bourchier, and baron Bourchier and Lovaine, and descendant of Thomas of Woodstock duke of Gloucester, youngest son of Edward III. The family of Bourchier is the only surviving representative of Thomas of Woodstock. Walter, third lord de Ferrars, the issue of this marriage, was by Edward VI. created viscount Hereford. He had issue, 1. Richard, father of Walter, second lord viscount Hereford. 2. Edward.—Walter, second lord viscount Hereford, was admired, in right of his great grandmother, in 1571, to the titles of earl of Eu, and baron Bourchier and Lovaine; and was created by queen Elizabeth, May 4, in the following year, earl of Effex.

Robert, second earl of Effex, his son, is one of the most interesting characters in the history of England. He was a nobleman of an intrepid and impetuous spirit, generous, but precipitate; and an advantage was made of these qualities to effect his ruin. He was appointed master of the horse to queen Elizabeth, in 1588, and commanded the land-forces in the expedition against Cadiz, in 1596. In the following year he was constituted earl marshal of England, and in 1599 lord deputy of the kingdom of Ireland. In this last employment he was unsuccessful; and, having returned abruptly without leave of the queen, soon fell under her displeasure, and was beheaded, February 25, 1601. See the biographical sketch of his life, under Devereux, vol. v. p. 772-774.

He married Frances, daughter and heir of Sir Francis Waddington, secretary of state, and relative of Sir Philip Sidney; by which lady he had issue, 1. Robert, third earl of Effex. 2. Dorothy, married to Sir Henry Shirley, of Stanton Harold, in the county of Leicester, baronet. 3. Richard, father of Walter, second lord viscount Hereford.

Robert, third earl of Effex, was soon after restored in blood, and married Frances, daughter of Thomas first earl of Suffolk, from whom he was divorced; and she was afterwards the infamous contriver of the poisoning of Sir Thomas Overbury. Upon the first insurrections of the Scots, in 1639, the earl was appointed lieutenant-general of the forces that were sent against them; and in 1641, promoted to be lord chamberlain of the household to Charles I. but he resigned this post in the following year, and was made commander in chief of the parliamentary forces in the civil war, in which faction, he continued till the passing of the self-denying ordinance, May 7, 1649. Upon the death, September 14, 1647, the titles of earl of Effex and Eu became extinct, and those of baron de Ferrars of Chartley, Bourchier, and Lovaine, came into the family of Shirley first earl Ferrars.

Edward, younger son of Walter first lord viscount Hereford, was created a baronet by James I. November 25, 1629. He had issue, 1. Walter, fifth lord viscount Hereford, who succeeded to the title upon the death of Robert third earl of Effex. 2. George, grandfather of Price ninth lord viscount Hereford; and of Vaughan, grandfather of Edward eleventh lord viscount Hereford.

Edward, eleventh lord viscount Hereford, married Catherine, daughter of Richard Mytton, of Garth, in the county of Montgomery, equerry, by which lady, who died Feb. 22, 1748, he had issue. 1. Bridget, married to Price Jones, esq. and died in May 1781. 2. Arthur, died in 1743. 3. Edward, twelfth viscount. 4. Arthur, died an infant. 5. Catherine, married to the Rev. John Ackland, of Broadchit, in Devonshire, and died January 30, 1806. 6. George, the thirteenth viscount. The eleventh viscount, dying August 20, 1760, was succeeded by his son, Edward, the twelfth viscount, born February 15, 1741; married, June 2, 1774, the honourable Henrietta-Charlotte-Tracy Keck, one of the maids of honour to her majesty, daughter of Anthony Keck, esq. and dying without issue, August 1, 1785, was succeeded by his brother, George, the thirteenth viscount, born August 25, 1758. He married, December 15, 1789, Mariana, daughter and heir of George Devereux, esq. of Tregoyd, in Breconshire, by whom he had issue thirteen children, six of whom survived him. 1. Henry, the fourteenth viscount. 2. Marianna, married to Sir James Cockburn, of Langton, baronet. 3. Charlotte-Henrietta-Maria. 4. Juliana-Stratford-Maria. 5. Catharine-Elizabeth-Marianna, married to Sir Walter Wilmot, of Maclough, Radnorshire, esquire. 6. Georgiana-Marianna. The viscount died December 31, 1804, and was succeeded by his only son, Henry, the fourteenth and present viscount.

CReATIONS.—Viscount Hereford, February 2, 1547; and subsequently by intermarriage as Barons Ferrars, of Chartley; Baronet, 1615.

RESIDENCES.—Nanterribba Hall, in the county of Montgomery; and Tregoyd, in the county of Brecon.

TOWN-HOUSE, Chandos-street, Cavendish-square.

BOTTO.—Bona virtute constantia. — Sedateness is the foundation of virtue.

BELASYSE, VISCOUNT FAUCONBERG.

ROWLAND BELASYSE, VISCOUNT FAUCONBERG, of Henknowle, in the county palatine of Durham, and Baron Fauconberg, of Yarm, in Yorkshire; born February 1747; succeeded to the above honours on the 23d of March 1802; married, on the death of Henry earl Fauconberg, when the earldom became extinct.

His lordship is descended from Rowland Belasyse, esq. brother to Thomas, third viscount. He married Frances, daughter of Christopher Roper, fifth lord Teynham, by whom he had issue five daughters, Mary, Bridget, Frances, Barbara, and Anne, who died without issue; and two sons, Henry, who died unmarried, October 4, 1782, and Anthony, who died October 9, 1754, having married Sarah, daughter of John Clarke, by which lady he had issue, Rowland, the present viscount; Raymond, who died an infant; Charles, D. D. born May 7, 1759; and Thomas, born September 11, 1751; married to Marie-Louise de Maneville, by whom he has five daughters, Mary, Frances, Elizabeth, Anne, and Barbara: Mary, who died April 1790; Frances, born in 1753; and Barbara, born in 1754. The heir presumptive is the Reverend Charles Belasyse, next brother to the viscount.

CREATION.—Viscount Fauconberg, of Henkowle, January 30, 1690.

Residence.—Newborough Park, in Yorkshire.

Armorial Bearings.—See the annexed engraving.

Motto.—Bona et belle aetate. — "Good and handsome enough."

ST. JOHN, VISCOUNT BOLINGBROKE.

GEORGE-RICHARD ST. JOHN, VISCOUNT BOLINGBROKE and ST. JOHN, Baron St. John, of Lydiard Tregoze, Baron St. John, of Bletsho; and a Baronet; born March 5, 1761; succeeded his father, the late viscount, May 5, 1787; married, in 1783, Charlotte, daughter of the Reverend D. Collins, second member of Winchelsea college; and rector of Midhurst, in Sussex; by which lady, who died in 1803, he had issue George, and Barbara, both died young; and Henry, heir apparent.

The family of St. John is of great antiquity in England. Sir Oliver St. John, in the reign of Henry VI. married Margaret, sister and heir to John Beauchamp, Lord Beauchamp of Bletheoe; by which lady, who afterwards married John Beaufort Duke of Somerset, and was grandmother to Henry VII. he had issue. 1. John, ancestor to the extinct earls of Bolingbroke, and to Henry Beauchamp, Lord St. John of Bletheoe. 2. Oliver.

John, son of Oliver, was one of the three executors of Margaret, countess of Richmond, mother to Henry VII. and foundress of Christ's college, and St. John's college, in the university of Cambridge. He had issue, 1. John, who died before his father; 2. John, brother of George Villiers, first duke of Buckingham; 3. Oliver, who distinguished himself at the battle of

Plate XXVII

English Viscounts.

London: Published as the Act directs by T. Wilber, 1810.
Topham Beauclerk, by whom he was left a widow. By lord Bolingbroke he had issue: 1. George; Richard; the vifcount Beauclerk, a general in the army; married, first, December 8, 1788, Mary, daughter of the fifth marquis of Lornhan, who died February 6, 1791; secondly, April 6, 1793, lady Georgiana Craven, fiter to William earl of Craven. 3. Charlotte, who died young. His lordship died May 5, 1797, when he was succeeded by George-Richard, the present and fourth vifcount.

CREATION.—Baron St. John, and Vifcount Bolingbrooke, July 2, 1712; Baron St. John, of Battersea, and Vifcount St. John, July 2, 1716.

RESIDENCES.—Battersea, in the county of Surrey; and Lydiard Park, in the county of Wilts.

ARMORIAL BEARINGS.—See the annexed Engraving. The armorial bearings of this ancient family may be had to reference to a public office. They are, Argent, on a chief gules, two mullets pierced or.

CREST.—On a wreath, a mount proper, and therefrom a falcon rising, belled or, ducally gorged gules.

Supporters.—Two eagles, with wings expanded or, ducally crowned gules; and upon the beak of each a pair of horse-hames, tied at the top and bottom proper; within which is party per pale argent and of the second.

The great ancestor of this noble family, William de Saint John, whose name occurs upon the roll of Battle of Hastings, attended the Conqueror as grand master of the engines of war, and superintendant of the carriages; for which reason the horse-hames, or collars, were borne as the cognizance of the family, and are continued to the present day.

Motto.—Ne quarete ne spernere honorum.—"Neither seek nor despise honours."

BOSCAWEN, VISCOUNT FALMOUTH.

EDWARD BOSCAWEN, VISCOUNT FALMOUTH, and Baron Bofca wen-Rofe, born May 10, 1807; succeeded his father, the late Vifcount, February 14, 1808.

The family of Bosca wen has pedigree as far back as the reign of king John; and ranked at that time among persons of the first consequence in the county of Cornwall. Nicholas Bosca wen, in the reign of Charles I. raised a regiment of horse for the service of the parliament. His eldest fon, Nicholas Bosca wen, admiral, was created Baron of Bossca wen, and Vifcount Bolingbrooke, with remainder to the heir of his body. He was succeeded by his eldest fon, Hugh, the first earl of Boscawen, in the reign of Charles II. Edward Boscawen, in the reign of George I. raised a regiment of horse for the service of Great Britain; and Hugh, the issue of this marriage, who married Arabella, daughter of Charles Godfrey, esquire, and of Arabella, fiter to John Churchill duke of Marlborough. He performed considerable services in the rebellion of 1715 and by George I. was created Baron of Bossca wen-Rofe, and Vifcount Falmouth. The issue of his marriage was, Hugh, second lord Vifcount Falmouth. Edward, who distinguished himself in the naval service of his country, as stated in the biographical sketch of his life, under Bosca wen, vol. iii. p. 327. He married Frances, daughter of William Evelyn Glanville, of Saint Chase, in the county of Cornwall, esquire, by which lady he had issue Frances, born March 7, 1746, and married to Henry duke of Beaufort; and Arabella, fiter to John Churchill duke of Marlborough.

Edward Bosca wen, whose name occurs upon the roll of the battle of Hastings, attended the Conqueror as grand master of the engines of war, and superintendant of the carriages, for which reason the horse-hames, or collars, were borne as the cognizance of the family, and are continued to the present day.

Motto.—Ne quarete ne spernere honorum.—"Neither seek nor despise honours."

EDWARD BOSCAWEN, VISCOUNT FALMOUTH, and Baron Bocca wen-Rofe, born May 10, 1807; succeeded his father, the late Vifcount, February 14, 1808.

The family of Bosca wen has pedigree as far back as the reign of king John; and ranked at that time among persons of the first consequence in the county of Cornwall. Nicholas Bosca wen, in the reign of Charles I. raised a regiment of horse for the service of the parliament. His eldest fon, Nicholas Bosca wen, admiral, was created Baron of Bossca wen, and Vifcount Bolingbrooke, with remainder to the heir of his body. daughter of Robert Surman, of Valentine-houfe, in the county of Eflex, esquire, and had issue, William-Augustus Spencer, born January, 1749. Hugh, knight, during all of his majesty's household, died September 4, 1795. Eleanor, died young. Lucy, married to Sir Charles Frederic, knight of the bath, and died in 1784. Charlotte, married Henry Moore, fourth earl of Drogheda, in 1765: Died without issue in 1785. Anne, married Sir Cecili Bishopp, bart, of Parham, in Sussex, and died in May 1747, leaving issue, Diana, died young. Mary, married to John, son and heir of Sir Frederic Evelyn, bart, of Wootton, in Surrey, and died in 1749. Henrietta, Elizabeth, and Catharine, died unmarried. Matilda, daughter of Sir St. Martin, in Conway, married August 16, 1733; married Jane, daughter of——Woodward, esq, and had issue, Hugh, who died young, and Nicholas, in the army, born March 1756; married April 2, 1784, Mary Mary Browne. William-Frederic, died unmarried. Henry, died unmarried. The viscount died October 25, 1736, and was succeeded by his eldest son, Hugh, second viscount, a general in the army, and captain of the band of gentleman pensioners, born in 1707; married May 6, 1736, Hannah-Catherine-Maria, daughter of Thomas Smith, esq, and relitc of Richard Ruffell, esq, and dying July 4, 1782, without issue, was succeeded by his nephew, George Evelyn, third viscount; who married December 26, 1753, Miss Crewe, who had issue: John Crewe, of Crewe-hall, in the county of Chester, married May 6, 1736, Hannah-Catharine-Maria, daughter of——Woodward, unmaried, Henry, died unmarried. The viscount died October 25, 1736, being second in command under Sir Cloudefey Shovel, and afterwards William III. embraced the maritime profession; and was particularly instrumental, with admiral Russell, after the battle of 1708, and 1715, to counteract the invasion of the Pretender; and was created a baronet by George I. November 15, 1715. He was appointed com-
HERALDRY

WORTH, and a Baronet, LL. D. a Lord of the King's Bed-chamber; born November 18, 1745; succeeded his father, the late viscount, October 31, 1774; married February 4, 1788, Mary countess of Ligonier, relict of the late viscount Ligonier, and daughter of the first earl of Northington.

The family of Noel is descended in the female line from sir Roger, the fourth in descent from John Wentworth, younger brother of William, ancestor to the earl of Strafford. Sir Roger had issue, 1. Sir Philip, who added the title of the barony of Lancastria by the gift of civil wars; 2. Henry, ancestor to John, who was created a baronet by James I. June 21, 1611. Sir Henry, his son, had issue, 1. Sir Richard, father of Thomas, who had summons to parliament by the title of baron Wentworth of Nettlefield, in the reign of Henry VIII. he was lord chamberlain of the household to Edward VI., and died March 3, 1552. 2. Margery, married to sir John Seymour of Wolfhall, in the county of Wilts, knight; by whom she had issue, 1. Sir Richard, father of Thomas, who had issue, 2. Judith, born November 3, 1751, and married to Sir William Noel, baronet, and Margaret his wife.

John, son of William Lamb, of Wellingborough in the county of Northampton, married in 1746, Mary countess of Suffolk, daughter and direct issue of the first earl of Devonshire, and of Hugh. 3. William, born July 31, 1396. 4. Philip. 5. Peter, who was lord chamberlain of the household to Edward III. governor of Calais, and knight of the garter. Hugh, son of Hugh second earl of Devonshire, married Matilda, daughter of John of Kent, and half-sister to the renowned Edward the Black Prince.
Edward, third earl of Devonshire, was earl-marshall and joint lord high admiral of England, in the reign of Richard II, and had issue, 1. Edward, commander in chief of the fleet in the reign of Henry V. He died in 1417. 2. Hugh, fourth earl of Devonshire, who succeeded his brother in the command of the fleet, and died June 16, 1422. Thomas, fifth earl of Devonshire, fled Hugh, adhered to the house of Lancaster in the civil wars, and married Margaret, daughter of John Beaufort, earl of Somerset, and grand-daughter of John of Gaunt, duke of Lancaster, by which lady he had issue, 1. Thomas, sixth duke of Devonshire, who was taken prisoner at the battle of Towton, March 29, 1461, and beheaded. 2. Hugh, seventh earl of Devonshire, who was exiled for high treason for his adherence to the house of Lancaster, and beheaded March 4, 1466. Upon his death, the dignity of Earl of Devonshire was conferred upon Humphrey, son of Humphrey Stafford, duke of Buckingham. 3. John, who was restored to the title of earl of Devonshire by the great earl of Warwick, commonly called the King-maker, and killed at the battle of Tewkesbury, May 4, 1471. Hugh, son of Hugh, brother of Edward third earl of Devonshire, was killed, together with earl John, at the battle of Tewkesbury; and Edward, his son, having been greatly instrumental in placing the crown upon the head of Henry VII, by that act restored to his title of earl of Devonshire. William, tenth earl of Devonshire, his son, married Catharine, youngest daughter of Edward IV, and, in consequence of this marriage, was detained in confinement during a great part of the reign of Henry VII.

Henry, eleventh earl of Devonshire, the issue of this marriage, was 1. Henry VIII, June 18, 1575, created marquis of Exeter; and, in 1572, declared heir apparent to the crown. According to the arbitrary proceedings of this monarch, the marquis of Exeter was some years afterward indicted of high treason upon frivolous pretences, and beheaded January 9, 1539. Edward, second marquis of Exeter, his son, was confined in the Tower of London from the death of his father till the accession of queen Mary. By that princes he was greatly distinguished, and received from her overtures of marriage; but he displayed a manifest preference for the character and accomplishments of the princes afterwards queen Elizabeth; in consequence of which they were both费away. In the following year he was liberated upon the mediation of king Philip; and, going over to the continent, died October 4, 1566. Upon his death all the dignities of his family became extinct.

Philip, fourth son of Hugh second earl of Devonshire, served in the wars of Edward III, in France; and was created viscount Courtenay, in 1383, lord lieutent of the kingdom of Ireland; in which office he continued for ten years. He had issue, 1. Richard, chancellor of the university of Oxford, who was elected, in 1443, lord bishop of Norwich, and died September 14, 1415. 2. John. Philip, son of John, had issue, 1. William, who adhered to the party of the house of York. 2. Peter, who was elected, in 1478, lord bishop of Exeter, and translated in 1486, to the see of Winchester. He died in 1491. Francis, fifth in descent from William, had issue, 1. William, who was created a baronet by Charles II, soon after the restoration. 2. Francis, who died of his wounds in the battle of Solebay, May 28, 1669.

Sir William, second baronet, his grandson, had issue, 1. Sir William, third baronet. 2. Henry Reginald, who married Catharine, daughter of Allen first earl Bathurst; by which lady he had issue, Henry Reginald, who, embracing the clerical profession, was made prebendary of Bredell, and afterward to bishop of Exeter, and died June 9, 1803, having married Elizabeth, daughter of Thomas, second earl of Effingham, and left issue, of whom the eldest son, William, married, November 29, 1803, lady Henrietta LeGle, daughter of Sir Lucas Pepsy, bart, and the countess of Rothes. Peregrine, married, first, Lucy, daughter of Benjamin Inclendon, of Pilton, esquire, who died in 1773; and secondly, Angelia Glynn, daughter of Sir — Glynn, bart. but died without issue in December 1785. Mary, and Anne-Sophia, died unmarried. Edward, and Philip, esquire, of Heanton Court, in Devon, and died in 1764, leaving issue, Isabel, married to John Andrews, M.D. of Exeter, by whom she had issue. Bridget, married William Hbert, of Bowringleigh, in Devon, esquire, by whom she had issue, Mary, married, first, to John Langton, of Park, in Bovey-Castle, and secondly, to John Day, of Okeigh, in Devon, esquire, and died in 1734. Elizabeth died young. Their father died in 1736, and was succeeded by his third son, Sir William Courtenay, born in 1710, who married, in April 1744, Frances, daughter of Heneage, second earl of Ayleford, by whom she had issue, William, second viscount; Elizabeth, Anne, died young; Mary, died in 1723; Frances, married in 1770, to Sir John Wrottesley, bart. brother to Elizabeth duchess of Grafton, by whom she was left a widow, April 23, 1787, with several children. Lucy, married to John Cotes, of Salop, esquire, and died in December 1708, leaving issue, Charlotte, married, September 12, 1782. Alexander, of the Isle of Man, by whose father was, by George III, created viscount Courtenay of Powderham Castle, and died May 16, 1762. William, second viscount, his son, married, May 7, 1762, Frances Clack, of Wallington, in Berkshire, by which lady he had issue, Frances, married to Sir John Courtenay, bart. of Evington, in Kent, by whom she had issue, three daughters and one son, viz. 1. Frances, born in June 1731. 2. Charlotte, born March 1784. 3. Isabella, born March 1786. 4. John, born February 1737. Charlotte, born July 14, 1764; married to Thomas Gifford, esq. of Callington, in Staffordshire; and has issue: 1. Thomas-William, born March 25, 1739; 2. Charlotte, born April 1736; 3. Francis-John, born September 1751; 4. Lucy-Harriet, born October 6, 1754; 5. Sophia-Elizabeth, born November 1, 1753; 6. Anne-Barbara, born October 16, 1754; 7. Walter-Peter, born September 23, 1756; 8. Barbara-Denys, born September 4, 1758. Isabella, born in June 1765, was unfortunately burnt by her clothes catching fire, March 4, 1773. Elizabeth, born September 2, 1756; married to Charles-Henry Somerville, second son of Henry, fifth duke of Beaufort, and has issue, William, the present viscount; Lucy, born June 13, 1770; married the honourable John Vaughan, second son of William, first earl of Lichfield; and has issue: 1. Thomas-William, born March 25, 1793; 2. Charlotte, born January 6, 1784; married to Francis John, born September 1771; 3. Lucy-Harriet, born October 6, 1774; 4. Sophia-Elizabeth, born November 1, 1753; 5. Anne-Barbara, born October 16, 1754; 7. Walter-Peter, born September 23, 1756; 8. Barbara-Denys, born September 4, 1758. Isabella, born in June 1765, was unfortunately burnt by her clothes catching fire, March 4, 1773. Elizabeth, born September 2, 1756; married to Charles-Henry Somerville, second son of Henry, fifth duke of Beaufort, and has issue, William, the present viscount; Lucy, born June 13, 1770; married the honourable John Vaughan, second son of William, first earl of Lichfield; and has issue: 1. Thomas-William, born March 25, 1793; 2. Charlotte, born January 6, 1774; 3. Lucy-Harriet, born October 6, 1774; 4. Sophia-Elizabeth, born November 1, 1753; 5. Anne-Barbara, born October 16, 1754; 7. Walter-Peter, born September 23, 1756; 8. Barbara-Denys, born September 4, 1758. Isabella, born in June 1765, was unfortunately burnt by her clothes catching fire, March 4, 1773.
WARD, and Baron Ward of Birmingham, Recorder of Kidderminster; born January 21, 1759; succeeded his half-brother, John, the late vicount, October 8, 1788; married, August 11, 1780, Julia, second daughter of Godfrey Bosville, of Gunthwaite, in the county of York, esquire, by whom he has issue, son, John, William, heir apparent, born August 9, 1781.

The title of Ward was of considerable repute in the reign of Richard II. Edward Ward, in the reign of James I., had issue, 1. Thomas, whose son Edward was created a baronet by Charles II., December 9, 1660. 2. William, whose son Humble married Frances, baroness Dudley, grand-daughter and heir of Edward, late lord Dudley, created baronet of Ward of Birmingham. The issue of this marriage was Edward, who succeeded to the baronies; and William. Upon the death of William, fourth lord Dudley and fifth lord Ward, grandson of lord Edward, in May 1740, the barony of Dudley devolved upon Ferdinando Dudley, son of William, lord Dudley, of Hales-Owen, esquire, and of Frances, sister to lord William. Ferdinando lord Dudley died October 31, 1737, and the title came into abeyance. The title of lord Ward devolved upon John, grandson of William, younger son of Humble, first lord Ward.

John, sixth lord Ward, was by George III. created viscount Dudley and Ward, and married, first, Anna Maria, daughter of Charles Bouchier, of the city of Dublin, esquire; by which lady he had issue, John, second lord viscount Dudley and Ward, lord Dudley, married, secondly, Mary, daughter and heir of John Carver, of the city of Westminster, esquire; by which lady, who died May 31, 1785, he had issue, William, and third lord viscount Dudley and Ward. Lord Dudley, the father, died May 6, 1774, and was succeeded by John, the second viscount, born February 22, 1744; married, July 12, 1788, Mrs. Baker, and dying without male issue, October 8, 1788, was succeeded by his half-brother, William, the present and third viscount. The viscountesses married, secondly, August 14, 1790, Benjamin Jennings, esquire, who dying August 7, 1791, she married, thirdly, December 9, 1791, captain J. Smith, of the royal navy.

Creations.—Baron of Dudley, of the county of Stafford, March 14, 1787; married, July 12, 1788, Mrs. Baker, and dying without male issue, October 8, 1788, was succeeded by his half-brother, William, the present and third viscount. The viscountesses married, secondly, August 14, 1790, Benjamin Jennings, esquire, who dying August 7, 1791, she married, thirdly, December 9, 1791, captain J. Smith, of the royal navy.

Residences.—Eafton Lodge, in the county of Essex. —Town-house, Grosvener-square.

Armorial Bearings.—See the annexed Engraving. Motto.—Manus jufa nardus.—"The just hand is like precious ointment."

TREVOR HAMPDEN, VISCOUNT HAMPDEN.

THOMAS TREVOR HAMPDEN, VISCOUNT HAMPDEN, and Baron Trevor, of Bromham; born September 11, 1747; succeeded his father, the late viscount, August 22, 1783; married, first, June 13, 1768, Catharine, only daughter of general David Graeme, by which lady, who died May 26, 1804, he had no issue; and, secondly, June 12, 1805, Miss Brown, sister to lady Wedderburn.

The family of Trevor has been traced, by the Welsh genealogists, to the close of the third century. Caradoc, third in descent, was earl of Hereford and Marchiogien, in the reign of king Arthur; and Tudor earl of Hereford, his great-grandson, was the first who bore the surname of Trevor. Colonel Mark Trevor, a descendant of the elder branch of this family, adhered to the party of Charles I. and was created by Charles II. in 1661, lord viscount Dungannon, of the kingdom of Ireland, which title became extinct in 1670. Thomas, descended from the younger branch, was constituted by Charles I. one of the justices of the court of common pleas; which office he exchanged for that of lord chief baron of the court of exchequer. He died December 21, 1666, leaving issue, 1. Thomas, who was created a viscount by Charles I. August 11, 1641. 2. John, born August 9, 1651; succeeded his father in his baronetcy, and Charles, his cousin, the late viscount, June 30, 1773; married, June 12, 1776, Mrs. Anne Horton.

The family of Maynard is in the line of those ancient chiefs, who came over to England with William the Conqueror. John Maynard, in the reign of queen Mary, was one of the thirty-nine members of parliament who abjured themselves, rather than join in receiving the pope's authority. Henry, his son, was secretary to Cecilia, and high treasurer of England in the reign of queen Elizabeth. He had issue, 1. William, created a baronet by James I. June 29, 1611; and May 30, 1620, baron Maynard, of Wicklow, in the kingdom of Ireland. By Charles I. he was further created, March 14, 1668, Baron of Little Eaton, in the county of Derby, and of Little Eaton, in the county of Derby, and of Little Eaton, in the county of Derby, and of Little Eaton, in the county of Derby.

Charles, sixth lord Maynard, his grandson, was by George III. created baron Maynard, of Much Eaton, and viscount Maynard, with remainder to his brother William, of Waltons, in the county of Essex, baronet. Upon the death of Charles, first lord viscount Maynard, the title of viscount Maynard devolved to the present possessor, and the title of baron Maynard, of Little Eaton, in the kingdom of Great Britain, and baron Maynard, of Wicklow, in the kingdom of Ireland, became extinct.

William, son of Charles, son of Henry, secretary to lord Burleigh, was created a baronet by Charles II. February 1, 1681. Sir William, third baronet, his son, married Charlotte, daughter of Sir John Parham, in the county of Suffolk, baronet, by which lady, who died March 16, 1762, he had issue, 1. Charles, the second viscount. 2. William, who embraced the profession of the army, and was killed in the American war. 3. Henry, born October 30, 1758. Sir William, father of lord Maynard, died in January 1772; and lord Charles, the first viscount, dying without issue, June 30, 1775, was succeeded by Charles, the present and second viscount Maynard. The presumptive heir is Henry, brother to the viscount.

Creations.—Baron and Viscount Maynard, October 18, 1766.

Residences.—Eafton Lodge, in the county of Essex. —Town-house, Grosvener-square.

Armorial Bearings.—See the annexed Engraving. Motto.—Manus jufa nardus.—"The just hand is like precious ointment."

MAYNARD, VISCOUNT MAYNARD.

CHARLES MAYNARD, VISCOUNT MAYNARD, and Baron Maynard, of Much-Eaton, and a Baronet; born August 9, 1751; succeeded his father in his baronetcy, and Charles, his cousin, the late viscount, June 30, 1773; married, June 12, 1776, Mrs. Anne Horton.

The family of Maynard is in the line of those ancient chiefs, who came over to England with William the Conqueror. John Maynard, in the reign of queen Mary, was one of the thirty-nine members of parliament who abjured themselves, rather than join in receiving the pope's authority. Henry, his son, was secretary to Cecilia, and high treasurer of England in the reign of queen Elizabeth. He had issue, 1. William, created a baronet by James I. June 29, 1611; and May 30, 1620, baron Maynard, of Wicklow, in the kingdom of Ireland. By Charles I. he was further created, March 14, 1668, Baron of Little Eaton, in the county of Derby, and of Little Eaton, in the county of Derby.

Charles, sixth lord Maynard, his grandson, was by George III. created baron Maynard, of Much Eaton, and viscount Maynard, with remainder to his brother William, of Waltons, in the county of Essex, baronet. Upon the death of Charles, first lord viscount Maynard, the title of viscount Maynard devolved to the present possessor, and the title of baron Maynard, of Little Eaton, in the kingdom of Great Britain, and baron Maynard, of Wicklow, in the kingdom of Ireland, became extinct.
was elected, in 1744, lord bishop of Saint David's, and translated to the see of Durham. He died June 9, 1771, and lord vifcount Sackville, his father, June 19, 1750.

Robert, fourth lord Trevor, affumed the surname of Hampden, in conformity with the will of the last survivor of that name, which had been rendered illuflrious in the annals of Great Britain by the noble fand of John Hampden, his maternal ancestor, againft the illegal im- position of fhip-money in the reign of Charles I. for particular parts, which fee the articles England, vol. vi. p. 669; and Hampden, p. 199 of this volume. By George III. he was created vifcount Hampden, of Hampden, in the county of Buckingham; and married Con- fiantia, daughter of Peter Anthony de Huybert, lord of Van Kranningen, in the republic of the United Provinces; by whom lady, who died June 15, 1766, he had issue, 1. Thomas, his fuccessor. 2. John, born February 24, 1749, and appointed, April 8, 1780, minifter plenipotentia- ry to the elector palatine, and to the diet of Ratbion; which office he exchanged, February 22, 1783, for that of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotien- tary to the elettor palatine, and to the diet of Ratbion; which office he exchanged, February 22, 1783, for that of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotien- tary to the elettor palatine, and to the diet of Ratbion; which office he exchanged, February 22, 1783, for that of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraordinary and minifter plenipotentia- ry to the court of Turin. He married, August 5, 1773, Har- of envoy extraor-
died May 25, 1806, he had issue, Samuel and Thomas-Smith, both died infants; Henry, lord Hood, heir apparent, born August 25, 1753, married, September 12, 1774, Jane, daughter of Francis Wheeler, of Whirby, in the county of Durham; and Elizabeth, by which lady he had issue, 1. Louisa. 2. Charlotte; both died infants. 3. Susan, born June 7, 1779, married, April 16, 1805, Francis Mason, esq. of the royal navy. 4. Elizabeth-Herriet, died an infant. 5. Francis-Wheeler, born October 4, 1781, married Caroline, daughter of Sir Andrew-Snape Hanover, bart. comptroller of the navy. 6. Selina, born November 10, 1782. 7. Samuel, born December 7, 1788.

His lordship's father was bred to the church, and resided many years vicar of Butley in Somersethire, and afterwards of Thorncombe in Devon: he married Mary, daughter of Richard Hopkins, of Beauminster, in the county of Dorset, esquire, by whom, who died October 10, 1756, he had the following issue: Samuel, the present viscount; Alexander, now viscount Bridport; Anne, died unmarried; Elizabeth, married Edward Walker, esq. alderman of Exeter, and has issue; Arthur-William, in holy orders, died unmarried; Richard, John, Mary, all died young; and Henry.

CREATIONS.—Baron Catherington in Ireland, September 12, 1788; Viscount Hood, in England, June 1, 1796.

RESIDENCES.—Greenwich Park, in the county of Kent; and Catherington House, in Hampshire.

ARMORIAL BEARINGS.—See the annexed Engraving. Lord viscount Hood is on the list of those brave and patriotic Englishmen, who have nobly stood forward in our own time, at the hazard and peril of their lives, in discomfiting and destroying the common enemy of our country; and for which his lordship has been most deservedly emolodied, and distinguished in his armorial bearings, which are as follow: Azure, a fret or; on a chief fable, three crescents of the second; his paternal coat, quarterly, 1st, Gules, a trident, bend sinister, a mermaid, in her exterior hand an anchor holding a palm-branch, the emblem of victory. 2nd, Sable, a dragon, rampant, azure; the dexter chief charged with a naval crown, and subsidi d'or. 3rd, Azure, a fasces, in bend sinister, proper. 4th, Azure, a ship, a sail of the line, in bend sinister, proper. His lordship's father was born, 1731, and was elevated to the peerage, he was chosen member for the city of Westminster.

DUNCAN, VISCOUNT DUNCAN.

ROBERT DUNCAN, VISCOUNT DUNCAN, of Camperdown, Baron Duncan of Lundie, in Perthshire; succeeded his father, the late viscount, August 4, 1804; married, January 1805, Janet, daughter of the late Sir Hugh-Hamilton Dalrymple, of Burgenny, and North Berwick, bart, and had issue a son, born in October, and died in November, 1805.

His lordship is descended from a very ancient family, long resident at Lundie, in North Britain, and which, on the death of colonel Duncan, eldest brother to the first viscount, became possessed of the family estate in Perthshire. Adam Duncan, father of the present viscount, entered early into the royal navy, and on various occasions greatly distinguished himself, particularly under the late viscount Keppel, and in the severe action with the Dutch fleet, commanded by admiral de Winter, whom he took prisoner, off Camperdown; for which heroic conduct he was advanced to the peerage, by the title of viscount Duncan of Camperdown. His lordship was honoured with the Order of Merit, of St. Alexander Newkie, by the emperor of Russia, for the respect shown to several Russian officers who served under his command. His lordship married Henrietta, daughter of the right honourable Robert Dundas, lord president of the court of seclusion, in North Britain, and had issue, Robert, the present and second viscount; Henry, in the royal navy; another son, and five daughters, one of whom married, May 19, 1800, Sir Hugh-Dalrymple Hamilton, bart, and Henrietta married, December 5, 1804, to major Ferguson. The presumptive heir is the viscount's brother.

CREATIONS.—Viscount and Baron Duncan, October 30, 1797.

ARMORIAL BEARINGS.—See the annexed Engraving. The armorial bearings of lord viscount Duncan are the reward of valour and signal services. They are: Gules, a ship, a sail of the line, beat a French squadron of twenty-four ships, most of superior force. In January 1782, he failed to the relief of St. Christopher's, then invested by a French fleet, commanded by the count de Graffe, of twenty-nine ships of the line; lord Hood's confiding only twenty-two. Having succeeded in drawing them from their moorings, he had the address to manoeuvre his ships so as to take up their anchorage, thus interposing himself between the island and the enemy; by which skilful adroitness of seamanship he preserved St. Christopher's, and eventually brought on that memorable engagement of the 12th of April, in the same year, in which, having been joined by the invincible Rodney, the count de Graffe himself was taken, together with a number of his ships, and the rest crippled or dispersed. In 1793, he gained possession of Toulon, destroyed its arsenal, and a great number of ships of the line. For his services and valour he twice received the thanks of his majesty, and was appointed to his present station, and armed by the king's special command, as symbolic of his lordship's profifional Creation.—Viscount Sidmouth, January 12, 1805.

Arms.—See the annexed Engraving.

Motto.—Libertas sub rege pio—"Liberty under a pious king."

ANSON, VISCOUNT ANSON.

Admiral Anson, afterwards lord Anson, married lady Elizabeth Yorke, daughter of Philip Earl of Hardwicke, lord high chancellor of Great Britain; but by her, who died in June 1769, he had no issue. A biographical sketch of his life, his voyage round the world, and other distinguished services rendered to his country, are recited in Anson, vol. i. p. 745. His majesty, George II., on the occasion of his return from his voyage in the year 1757, raised him to the honour of the peerage, by letters patent, bearing date June 13, 1747. His lordship died suddenly at his seat of Moot Park, in Hertfordshire, June 6, 1762, just at the moment of his return from his voyage. His majesty, George III., to the dignity of a peer of the United Kingdom of Great Britain and Ireland, by his majesty's authority, May 11, 1788, raised him to the honour of the peerage, by the style and titles of Thomas Anson, baron Soberton, in the county of Hants; and viscount Anson, of Shugborough and Orgrav, in the county of Stafford, by letters patent, bearing date May 27, 1808. His majesty's grand-father, Launcelot-Charles Lake, esq. great-grandson of sir Thomas Lake, of Canons, in the county of Montgomery, and brother of sir Edward Price-Lloyd, bart. His majesty's grandfather, Launcelot-Charles Lake, esq. great-grandson of sir Thomas Lake, of Canons, in the county of Montgomery, and brother of sir Edward Price-Lloyd, bart. succeeded his father, the late viscount, February 20, 1808.

His lordship's grand-father, Launcelot-Charles Lake, esq. great-grandson of sir Thomas Lake, of Canons, in the county of Montgomery, and brother of sir Edward Price-Lloyd, bart. succeeded his father, the late viscount, February 20, 1808.

LAKE, VISCOUNT LAKE.

FRANCIS-GERARD LAKE, BARON LAKE, of Delhi, and Lutwary, in Hindoofan, and Viscount Lake, of Afton-Clinton, in the county of Bucks; a Colonel in the army, and a Captain in the First Regiment of Foot Guards; born March 31, 1773; married, in January 1800, Prifcaelia, relit of sir Bellingham Graham, bart.; succeeded his father, the late viscount, February 20, 1808.

His lordship died February 20, 1808, when he was succeeded by his son, the present second viscount.

CREATIONS.—Baron Cathcart, in 1447; Viscount, November 5, 1607.

RESIDENCES.—Shaw Park, Clackmannanshire, in Scotland; Town-house, Gloucester place.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—"I hope to speed."

ENGLISH BARONS.

A BARON is the next order of nobility immediately below a VISCOUNT and is obviously a title of great antiquity in most nations of Europe; having been first given to those distinguished persons who held the government of certain provinces, under the feudal tenure, in fee from the king: which fee explained at large under the article BARON, vol. ii. p. 741.

STAPLETON, BARON LE DESPENCER.

THOMAS STAPLETON, BARON LE DESPENCER, and a Baronet; born November 10, 1766; succeeded to the baronetage on the death of his father, January 1, 1781; and to the barony on the death of the baron, May 16, 1788; married Elizabeth Elliot, esq. of Antigua, and has issue, William, heir apparent, born June 30, 1782, in the Royal Navy; Charles-Murray, a captain in the 39th regiment of foot, born December 21, 1783; Emma, born February 27, 1796; William, born December 2, 1797; Mary-Anne, born August 12, 1798; Miles-John, born March 21, 1801.

The family of Stapleton is in the line of those persons who passed over to Ireland with Richard de Clare earl of Pembroke, surnamed Strongbow, in the reign of Henry II. John Edmund Stapleton, of Thorleebeg, in the county of Tipperary, lost his estate by adhering to Charles i. in the civil wars. William, his grandson, accompanied Charles ii. in his exile; and was soon after the restoration appointed captain-general of the Leeward Islands in the West Indies. He was by that monarch created a 1 Baron, December 20, 1660, and died in August 1666.

William, fourth baronet, his grandson, married Catharine, daughter and heir of William Paul, of Braywick, in the county of Berks, esquire, and of Catharine, daughter of Vere, fifth Earl of Wiltmore; in consequence of which marriage, the barony of Le Despencer devolved upon the family of Stapleton. Thomas, fifth baronet, his son, married November 27, 1765, Mary, daughter of Henry, younger brother of Thomas eighth Earl of Wiltmore; by which lady he had issue, 1. Thomas, lord Le Despencer. 2. Mary, born January 15, 1768. 3. Catharine, born January 15, 1769.

The barony of Le Despencer was originally bestowed upon Hugh Le Despencer, the father, by Edward II. and afterwards defended in the female line to the Beauchamps lords Bergavenny, the Nevilles lords Abergavenny, and the Fitzsimons earls of Wiltmore. The late lord Le Despencer was the son of Mary, third daughter of Vere, fourth Earl of Wiltmore, who married Sir Francis Dathweard, bart. and died August 19, 1710, leaving a son, Francis, who succeeded to the barony, on the death of John, seventh Earl of Wiltmore, but died without issue, December 12, 1743, when Rachel, his sister, succeeded, and died without issue, June 16, 1758, when the barony descended to the present lord, who is descended from Catharine, third daughter of Vere, fourth Earl of Wiltmore, who married William Paul, esq. of Braywick, in the county of Berks, and died September 25, 1737, leaving issue, Catharine, who married Sir William Stapleton, bart. of Oxfordshire, and died June 27, 1753, having had issue, William, who died unmarried. Thomas, the late baronet, born February.

Residences.—Mereworth Castle, in the county of Kent; and Grey's Court, in the county of Oxford.—Town-house, Hanover-square.

Armorial Bearings.—See the annexed Engraving.

Motto.—Ne vale fano.—"Difgrace not the altar."

CLIFFORD, BARON DE CLIFFORD.

EDWARD-SOUTHWELL CLIFFORD, BARON DE CLIFFORD, Baron Welfmoreland, and Vefey; born June 23, 1757; succeeded his father, the late lord, November 1, 1777; married, February 1789, Mary-Elizabeth Bourke, second daughter of Joseph, third earl of Meath, and daughter of the late lord bishop of Exeter. The family of Clifford is descended from William, younger son of Richard, fourth duke of Normandy, who came over to England with his nephew, William the Conqueror. Walter, son of William, assumed the surname of Clifford, from the castle of Clifford, which was assigned to him, with the lordship of the county of Hereford; and had issue, 1. Walter, grandfather of Roger, who married Isabella, daughter of Robert de Vipont, baron of Welfmoreland, in whose right the title of Welfmoreland descended to the family of Clifford. Roger de Clifford was killed in the wars of Edward I. against the principality of Wales, November 6, 1283. 2. Robert, the fair concubine of Henry II. so much celebrated by the old writers of romance. She bore to that monarch William Longsword, who was created earl of Salisbury.

Robert, son of Roger, had fummons to parliament by the title of baron Clifford, of Appleby, in the reign of Edward I. and was constituted by Edward II. in 1370, earl marshal of England. He was killed in the battle of Bannockburn, June 23, 1314, leaving issue, Roger, second lord Clifford, who was one of the nobles that were beheaded with Thomas earl of Lancaster, grandson of Henry III. March 29, 1322. Roger, fifth lord Clifford, granted to Robert, his son, and his heirs, the castle of Welfmoreland, and had issue, 1. Thomas, sixth lord Clifford, grandson of Robert, was a nobleman of gallantry and merit; and had issue, 2. George-Thickness Tuchet, baron of Welfmoreland, in whose right the title of Welfmoreland descended to the family of Clifford. The family of Southwell has been traced back to the reign of Henry III. and John Southwell, in the reign of Richard II. had issue, 1. Robert, father of Francis, who had issue, Richard; and Francis, appointed principal secretary of state for the kingdom of Ireland. In proof of his literary fame, he was five times elected president of the Royal Society; and died September 11, 1702. Edward, his son, succeeded him in the office of principal secretary of state for the kingdom of Ireland; and had issue, Edward, who married Catharine, daughter and heir of Edward lord viscount Stondon, son of Louis Watton earl of Rockingham.

Edward, the issue of this marriage, received summons to parliament in right of his mother in May 1776, by the titles of baron Clifford, Welfmoreland, and Vefey. He married Sophia, daughter of Samuel Campbell, of Mount Campbell, in the county of Leitrim, in the kingdom of Ireland, esquire; by which lady he had issue, Edward, the present lord; Robert-Campbell, died July 15, 1793; Henry, died in 1777; John, died in 1778; Mary, died August 14, 1789; Catharine, died in July 1801, having married colonel George Countisbury, late of the 4th regiment of foot; by whom he had issue, Sophia, born June 1797, and Sophia, born November 1795; Sophia, born June 10, 1771, married John viscount Sydney, by whom he had issue, and died November 1795; Elizabeth, born June 11, 1776, married William-Charles earl of Albermarle, and has issue; Henrietta, born May 1778, married Frederic, third son of the late Peter Delamere, esquire, and died in 1800, leaving an infant son, who survived but a few weeks. His lordship died November 1, 1777, when he was succeeded by his son Edward, the present and eighteenth lord Clifford.

John, ninth lord Clifford, was one of the principal leaders of the party of the house of Lancaster, in the cruel wars waged with the house of York, which wasted much of the blood in England. This nobleman married Margaret, daughter and heir of Henry Brom, esq. of Bromley, in the county of Kent; and had issue, Henry, second earl of Cornwall, who married Edward Boyle, second earl of Cork, afterwards created earl of Burlington, in the county of York, who married Elizabeth, his daughter, and heiress, was by Charles I. in 1643, created in her right baron Clifford, of Laneborough, in the county of York. This title became extinct in 1753.

Thomas, sixth earl of Thanet, grandson of Richard, third earl of Dorset, and of Anne Clifford, was admitted, December 12, 1691, to the titles of baron Clifford, Welfmoreland, and Vefey; and had issue, Catherine, married to Edward lord viscount Stondon, son of Louis Watton earl of Rockingham; by whom he had issue, Catharine, married to Edward Southwell, of King's Weston, in the county of Gloucester, esquire. 2. Margaret, married to Thomas Coke, earl of Leicester, who was admitted, August 13, 1734, to the titles of baronets Clifford, Welfmoreland, and Vefey. Upon her death, February 28, 1775, the honours descended to the family of Southwell.

The family of Southwell has been traced back to the reign of Henry III. and John Southwell, in the reign of Richard II. had issue, 1. Robert, father of Francis, who had issue, Richard; and Francis, appointed principal secretary of state for the kingdom of Ireland.

Residences.—Mereworth Castle, in the county of Kent; and Grey's Court, in the county of Oxford.—Town-house, Hanover-square.

Armorial Bearings.—See the annexed Engraving.

Motto.—Le roy le veut.—"The king will have it so."
Heraldry.

The family of Touchet is in the list of those Norman chiefs, who came over to England with William the Conqueror. William Touchet, in the reign of Edward I. had a commission to parliament in 1299, by the title of lord Touchet of Lewenhale. William, his son, took part with the traitors against Edward II. and was beheaded together with Thomas earl of Lancaster, grandson of Henry III. March 23, 1322. Robert, the son of William, adhered to the party of the earl of Lancaster, but afterwards went over to Edward II. John, grandson of Robert, greatly distinguished himself in the wars of Edward III. for the crown of France; and was killed in the battle of Rochelle, June 22, 1370, in which the earl of Pembroke and his whole fleet were captured. He was baron of the fee, devolved on his lordship, who came extinct; but his lordship being the only son of the late lord, was descended from Bridget, a daughter of Arabella, baroness Clinton and Saye, only daughter of Theophilus, sixth earl of Lincoln. Baron Clinton, the late lord, was descended from Bridget, a daughter of the same baroness, who married Francis Trefusis, of Trefusis, in the county of Cornwall, esquire, by whom she had issue, Samuel Trefusis, father of Robert Trefusis, who married Elizabeth Aflleck, by whom he had issue, Robert-Cotton Trefusis, who married, May 4, 1713, Anne St. John, daughter and heir of John, tenth lord St. John of Bletsoe, who died in 1775, by whom she had issue, Robert; George-William Trefusis, the late baron Clinton, born October 9, 1764, married, April 28, 1786, to Marianne Gault, a Swiss lady, by whom, who died February 7, 1798, he had issue, Robert-Cotton-St.-John, the present lord; Marianne, died March 3, 1806; Anne Matilda; Charles-Rodolphus; George; and Louisa. His lordship, dying August 28, 1797, was succeeded by his son, Robert-Cotton-St.-John, the present lord. The heir presumptive is Charles, brother to the present lord.

Creation.—Baron Clinton, February 6, 1693.

Residence.—Trefusis Castle, in the county of Cornwall.

Armorial bearings.—See the annexed engraving. Motto.—Je tiens.—"I hold it."

Trefusis, Baron Clinton and Saye.

Robert-Cotton-St.-John Trefusis, Baron Clinton and Saye; born April 28, 1787; succeeded his father, the late baron, August 28, 1797; who had succeeded to the barony on the death of the late earl of Orford, descended from Samuel Rolle, son of Arabella, baronets Clinton and Saye, only daughter of Theophilus, sixth earl of Lincoln. Baron Clinton, the late lord, was descended from Bridget, a daughter of the same baroness, who married Francis Trefusis, of Trefusis, in the county of Cornwall, esquire, by whom she had issue, Samuel Trefusis, father of Robert Trefusis, who married Elizabeth Aflleck, by whom he had issue, Robert-Cotton Trefusis, who married, May 4, 1713, Anne St. John, daughter and heir of John, tenth lord St. John of Bletsoe, who died in 1775, by whom she had issue, Robert; George-William Trefusis, the late baron Clinton, born October 9, 1764, married, April 28, 1786, to Marianne Gault, a Swiss lady, by whom, who died February 7, 1798, he had issue, Robert-Cotton-St.-John, the present lord; Marianne, died March 3, 1806; Anne Matilda; Charles-Rodolphus; George; and Louisa. His lordship, dying August 28, 1797, was succeeded by his son, Robert-Cotton-St.-John, the present lord. The heir presumptive is Charles, brother to the present lord.

Creation.—Baron Clinton, February 6, 1693.

Residence.—Trefusis Castle, in the county of Cornwall.

Armorial bearings.—See the annexed engraving. Motto.—Tout vintent de Dieu.—"All things come from God."

YELVERTON, BARON GREY.

Henry Yelverton, Baron Grey, of Rythyn, Haslings, Weyford, and Valance; born September 8, 1780; succeeded to that title on the death of Henry, third earl of Suffex, and vicount Longueville, April 22, 1797, when the earldom and vicounty became extinct; but his lordship being the only son of lady Barbara Gould, only daughter of the above-mentioned earl, who died without issue male; the baronies of Grey de Rythyn, Haslings, Weyford, and Valance, being baronies in fee, devolved on his lordship, who was enjoined by his grandfather's will to take the name and arms of Yelverton.

The family of Yelverton is descended from Sir William Yelverton in the reign of Henry VI. who was constituted, February 6, 1441, one of the judges of the court of King's Bench; and, October 9, 1472, exchanged this office for that of one of the judges of the court of Common Pleas. William, fourth in descent from Sir William Yelverton, was created, January 6, 1454, lord high treasurer of England, and died September 26, 1459. James, fourth lord Yelverton, his son, being implicated with the refractory barons against Edward II. and was beheaded, February 6, 1296. His lordship married, in 1776, Elizabeth, daughter and heir of Henry, fifth lord Arundel of Wardour, and died in October 1740, having married Elizabeth, daughter and heir of Henry, fifth lord Arundel of Wardour; by whom she had issue, Elizabeth, the present lady; Elizabeth, married Philip Thicknesse, March 25, 1752; Charles, who married, July 15, 1736, Mrs. Wilder; John, the eighth earl, died in 1777, and was succeeded in the English barony of Audley by his nephew, George, the present and sixteenth lord.

Creation.—Baron Yelverton, October 29, 1613; but originally, January 6, 1586.

Residence.—Sandridge Park, in the county of Wilts.

Armorial bearings.—See the annexed engraving. Motto.—Je tiens.—"I hold it."

Trefusis, Baron Clinton and Saye.

Robert-Cotton-St.-John Trefusis, Baron Clinton and Saye; born April 28, 1787; succeeded his father, the late baron, August 28, 1797; who had succeeded to the barony on the death of the late earl of Orford, descended from Samuel Rolle, son of Arabella, baronets Clinton and Saye, only daughter of Theophilus, sixth earl of Lincoln. Baron Clinton, the late lord, was descended from Bridget, a daughter of the same baroness, who married Francis Trefusis, of Trefusis, in the county of Cornwall, esquire, by whom she had issue, Samuel Trefusis, father of Robert Trefusis, who married Elizabeth Aflleck, by whom he had issue, Robert-Cotton Trefusis, who married, May 4, 1713, Anne St. John, daughter and heir of John, tenth lord St. John of Bletsoe, who died in 1775, by whom she had issue, Robert; George-William Trefusis, the late baron Clinton, born October 9, 1764, married, April 28, 1786, to Marianne Gault, a Swiss lady, by whom, who died February 7, 1798, he had issue, Robert-Cotton-St.-John, the present lord; Marianne, died March 3, 1806; Anne Matilda; Charles-Rodolphus; George; and Louisa. His lordship, dying August 28, 1797, was succeeded by his son, Robert-Cotton-St.-John, the present lord. The heir presumptive is Charles, brother to the present lord.

Creation.—Baron Clinton, February 6, 1693.

Residence.—Trefusis Castle, in the county of Cornwall.

Armorial bearings.—See the annexed engraving. Motto.—Tout vintent de Dieu.—"All things come from God."
March 12, 1617, for that of attorney-general. He was prosecuted in the court of Star-chamber, upon the information of Jack Cade, July 4, 1451.

... had a daughter, born July 29, 1781, the title of Viscount Saye and Sele.

... William, the issue of this marriage, had issue, 1. Roger, whose son Richard married Joan, grand-daughter and heir of Thomas Lord Dacre; in right of which marriage he assumed the title of Dacre. 2. James, who was created by Henry VI. Baron Saye and Sele; and constituted lord chancellor of England, leaving behind him a son, born October 30, 1449, for that of lord high treasurer of England. He adhered to the party of William la Poé, Duke of Suffolk, and was cruelly murdered by the rioters in the insurrection of Jack Cade, July 4, 1451.

... John, who had issue, Robert, fifth lord Viscount Saye and Sele. 4. Richard, grandfather of Richard, sixth lord Viscount Saye and Sele; upon whose death, July 29, 1751, the title of Viscount Saye and Sele became extinct.

... William, second lord Viscount Longueville. He was by George I. created earl of Suffolk; and married Lucy, daughter of Henry Pelham, of Lewes, in the county of Sussex, esquire; by which lady, who died May 25, 1730, he had issue, 1. George-Augustus, second earl of Suffolk. 2. Henry, third and last earl of Suffolk; who married, first, October 15, 1597, Hedwig, daughter of John Hall, esquire, of Mansfield Woodhouse, in the county of Nottingham; and by her, who died January 11, 1777, had issue, Talbot, who died an infant. Barbara, married to Edward Thoroton Gould, esquire, and died April 9, 1751, having had issue, 1. Barbara, who died young; 2. Mary, married October 15, 1597, the fourth baronet, Frederic Powys, brother to lord Lilloard; 3. Henry, the present lord Viscount of Suffolk. The last earl of Suffolk married, secondly, January 28, 1778, Mary, daughter of John Vaughan, esquire, of Briftol, by whom he had no issue; and his lady died June 6, 1796. His lordship dying April 22, 1799, the earldom of Suffolk became extinct, with the present peer, Henry, succeeded to the barony only. — The heir presumptive was Mary, sister of the present lord.

Creation.—Baron Grey de Suffolk, 28 Edward III.

Residence.—Brandon House, in the county of Warwick.

Armorial Bearings.—See the annexed Engraving.

Motto.—Foy en toit. — “Faith in all things.”

TWEELTON, BARON SAYE AND SELE.

GREGORY-WILLIAM TWEELTON, BARON SAYE AND SELE; born April 24, 1795; succeeded his father, July 29, 1781. He married, first, January 28, 1778, Maria-Marry, eldest daughter of lord Eardley, and had issue, Maria-Elizabeth, born June 23, 1795; and William-Thomas, heir apparent, born April 24, 1798.

The barony of Saye has descended to its present possessor from the family of Ffennes, whose ancestor, John de Ffennes, was hereditary governor of Dover Castle, and was Warden of the Cinque Ports. Ingelem, third in descent from John, was killed at the battle of Acre, in the Holy Land, in 1500. Ingelem, third in descent from Ingelem, adhered to the party of Henry III. in his wars against the barons. He had issue, 1. William. 2. Giles, great-grandfather of William, who married Joan, daughter of Geoffrey Say, Lord Say and Sele. William, the issue of this marriage, had issue, 1. Roger, whose son Richard married Joan, grand-daughter and heir of Thomas lord Dacre; in right of which marriage he assumed the title of Dacre. 2. James, who was created by Henry VI. Baron Saye and Sele; and constituted lord chancellor of England, leaving behind him a son, born October 30, 1449, for that of lord high treasurer of England. He adhered to the party of William la Poé, Duke of Suffolk, and was cruelly murdered by the rioters in the insurrection of Jack Cade, July 4, 1451.
TON; born August 22, 1752; succeeded his father, the late lord, October 3, 1781; married, June 15, 1775, Mary, daughter and co-heir of Marmaduke Lord Langdale, and sister to lady Clifford; by whom he has issue, William, heir apparent, born June 6, 1776; married, October 1800, Catharine, daughter of Thomas Weld, esq. of Lutworth Castle, in the county of Dorset. Constan
tia, born June 30, 1777; Marmaduke-Charles, died an infant; a daughter, born March 7, 1782; a daughter, born June 28, 1783; another daughter, born 1784; a daughter, born January 4, 1785; married, Nov. 23, 1802, to Joseph, second son of Thomas Weld, esq. a daughter, born September 19, 1787; and a son, born December 6, 1790.

The family of Stourton is descended from Botolph Stourton, of Stourton, in the county of Wilts, who defended the pafs of Glastonbury against William the Conqueror. Still he obtained from that prince the terms he required. William Stourton, in the reign of Richard II., married Elizabeth, daughter of Sir John Moigne; and dying in 1413, had issue, Margaret, married to William Claret, esq. and John, who, in the reign of Henry VI., was created lord Stourton, from whom descended Charles, grandfather of the present lord, and brother to the two preceding lords, both of whom died without issue. He married Catharine, daughter of Robert Franquet, esq. of Bifton, in Dorsetshire; by whom he had issue, Charles, who succeeded to the title on the death of his uncle, the thirteenth lord, who died April 1744, without issue; which Charles, the fourteenth lord, died March 21, 1753, also without issue. William, the fifteenth lord, who succeeded his brother, married Miss Winifred, daughter of William Howard, esq. youngest son of Thomas, father of Edward, ninth duke of Norfolk; by which lady he had issue, 1. Catharine, born August 16, 1750. 2. Charlotte, born September 16, 1751.

The family of Stourton is descended from Botolph Stourton, of Stourton, in the county of Wilts, who defended the pafs of Glastonbury against William the Conqueror. Still he obtained from that prince the terms he required. William Stourton, in the reign of Richard II., married Elizabeth, daughter of Sir John Moigne; and dying in 1413, had issue, Margaret, married to William Claret, esq. and John, who, in the reign of Henry VI., was created lord Stourton, from whom descended Charles, grandfather of the present lord, and brother to the two preceding lords, both of whom died without issue. He married Catharine, daughter of Robert Franquet, esq. of Bifton, in Dorsetshire; by whom he had issue, Charles, who succeeded to the title on the death of his uncle, the thirteenth lord, who died April 1744, without issue; which Charles, the fourteenth lord, died March 21, 1753, also without issue. William, the fifteenth lord, who succeeded his brother, married Miss Winifred, daughter of William Howard, esq. youngest son of Thomas, father of Edward, ninth duke of Norfolk; by which lady he had issue, 1. Catharine, born August 16, 1750. 2. Charlotte, born September 16, 1751.

Creation.—Baron Stourton, May 13, 1488.

Residences.—Stourton Caflle, in Staffordshire; and Thornville Park, in the county of York.—Town-houfe, Berkley-square.

Armorial Bearings.—See the annexed Engraving. The armorial bearings of this ancient family, like those of the earl of PORTFORTH, are derived from the primeval situtation of their family seat. The arms of Baron Stourton are: Sable, a bend or, between six fountains proper. Supporters. Two fow-fags proper, sealed on their backs and branded or. Crest, a demi-grey friar, habited in ruffet, of the park pale of Stourton. Motto. Loyal je ferai durant ma vie. —Loyal will I be while I live. Stourton, in the hundred of Mere, in the county of Wilts, the natal residence of the Stourtons, takes its name from the river Stour, which rifes there from six fountains or springs; three within the park pafs of Stourton House, and three without. The family of lord Stourton wrote themselves of Stourton about the time of the Conquest; and from their possessions there, and connection with the place, adopted the six fountains for their arms, as descriptive of the spot whence they originated. Leland, speaking of Stourton House in Henry VIIIth's time, says, "The goodly gate-houfe and iftore of the lord Stourton's houfe in Stourton was budylyd ex fociis Gallorum," which is probable enough, as we find the family taking an active part in the wars in France during the reigns of Henry V. and VI. This estate has been alienated, being in the possession of the opulent family of Hare; and the lords Stourton have for many years resided at Stourton Caffle in Staffordshire; contiguous to and fronting over Stour, which has been the occasion of some mistakes.

In the reign of Henry IV. William de Stourton marrying Elizabeth, daughter of Sir John le Moigne, of Madderston, in Wilts, as noticed above, obtained with her "a fair estate," and from this marriage the creft of the lords Stourton is derived. Le Moigne, (or the monk,) has been a name of great antiquity and eminence in all the western counties. Some have translated it to Monk, as the family of Monk duke of Alenmarle, originally Le Moigne; others have corrupted and anglicized it to Lemon. Cadm, Leda, &c.

VERNEY, BARON WILLOUGHBY DE BROKE.

JOHN PEYTO VERNEY, BARON WILLOUGHBY DE BROKE, D.C.L. A Lord of the King's Bedchamber, born August 4, 1738; married, October 8, 1761, Louisa, daughter of Francis first earl of Guildford; by which lady, who died February 2, 1798, he had issue, John-Peyto, heir apparent, born June 28, 1762; George, died June 11, 1773; Louisa, died April 25, 1768; Sarah, died December 21, 1769; Louisa, born June 20, 1769; married to the reverend Robert Barnard, prebendary of Winchefter; Maria, died March 22, 1772; Francis, died July 18, 1774; Henry, born April 5, 1773; William, died November 4, 1783; Francis, died in December 1783; Henrietta, died in February 1784.

Robert, grandson of Thomas, younger son of Robert the third lord Willoughby de Broke, early distinguished himself on the side of Henry earl of Richmond, afterwards Henry VII. and, upon the defeat of Stafford duke of Buckingham, fled to that prince upon the continent. He shared in the decisive battle of Bosworth, August 22, 1485; and by Henry VII. was created baron Willoughby de Broke. He was commander in chief of the army sent to the relief of the duke of Bretagne, in 1487; and one of the commanders at the battle of Blackheath, June 22, 1497. Robert, second lord Willoughby de Broke, was a leader in the expedition against Fontarabia, in 1512; and had issue, Edward, father of Elizabeth, married to Fulke Grevile. The issue of her marriage was Fulke, whose father in law Broke of Beauchamp's Court. 2. Margaret, married to Sir Richard Verney had issue, of Compton Marford, in the county of Warwick. Sir Richard Verney had issue, by this marriage, 1. Grevile, whose male issue became extinct in William his great grandson, August 23, 1685. 2. Richard, who was admitted to the title of lord Willoughby de Broke in the reign of William III. February 13, 1695.

George, second lord Willoughby de Broke of the family of Verney, D. D. his son, who was dean of Windsor, married Margaret, daughter and heir of Sir John Heath, knight; by which lady he had the following issue, and died December 26, 1733: George, who died young; Philip, who died an infant; Thomas, married to Eleanor, daughter of lord Leigh; and, dying May 5, 1710, left issue by his lady, who died January 8, 1759, Eleanor, married to George Bowes, esq. of Gibide, in the county of Durham; which lady died without issue; Richard, the late lord, died August 11, 1752, without issue. John, born October 23, 1699; married Abigail, daughter of Edward Harley, esq. and left issue, 1. John-Peyto, the present lord. 2. Margaret, who died in 1732. 3. Sarah, who died unmarried, August 27, 1763. Margaret, married to Anthony Duncombe, late lord Feverfham, and died without issue, October 9, 1755.

Creation.—Baron Willoughby de Broke, August 12, 1495.

Residences.—Compton Verney, in the county of Warwick.—Town-houfe, Hill-square, Berkley-square.

Armorial Bearings.—See the annexed Engraving. Motto. Virtue prevails. —Virtue prevails.

ST. JOHN, BARON ST. JOHN.

ST. ANDREW ST. JOHN, BARON ST. JOHN, of Bletsoe, and a Baronet; born August 22, 1739; succeeded his brother, the late lord, December 26, 1805; married, July 16, 1807, eldest daughter of Sir Charles-Wilhelm-Boughton, bart.
The family of St. John is descended from Hugh de Port, who was proprietor of the barony of Basing, in the county of Southampton, at the time that William the Conqueror came into England. William de Port, third in deceit from Hugh, assumed the surname of St. John, in right of his grandmother Muriel, daughter of Roger, count of Southampton, and heir of John, lord Beauchamp, of Bletsoe; through the families of St. Philibert and Poinings, to Port, who was proprietor of the barony of Bating, in the county of Lincoln; and had issue, 1. John, 2. Oliver, ancestor to lord vitcount Bolingbroke. Oliver, grandson of John, was created by queen Elizabeth, baron St. John, of Bletsoe, and was grandmother of Henry VII. He had issue, 1. John, 2. Oliver, ancestor to lord vitcount Bolingbroke. Oliver, grandson of John, was created by queen Elizabeth, baron St. John, of Bletsoe, and was grandmother of Henry VII.

Oliver, fourth lord St. John, was created by James I. December 28, 1624, earl of Bolingbroke in the county of Lincoln; and had issue, 1. Oliver lord St. John, who embraced the party of the parliament in the civil wars of Charles I. and was killed at the battle of Edgehill, October 23, 1643; 2. Oliver, father of Oliver, earl of Bolingbroke, and of Paulet third earl of Bolingbroke; upon whose death, October 5, 1711, that title became extinct, and the title of baron St. John devolved upon Sir St. Andrew, son of Sir Oliver, who had been created a baronet by Charles II. John, tenth lord St. John, married Elizabeth, daughter of Sir Ambrose Crowley, knight, of Greenwich; by which lady, who died October 24, 1769, he had issue, 1. John, eleventh lord. Andrew, who died in 1726, Mary, born November 21, 1728; married to Thomas Erle Drax, esq. of Charborough, in Dorsetshire. Ambrose, died young. St. Andrew, D. D. dean of Worcester, died March 23, 1755; having married Sarah, daughter of Thomas Chute, esq. of Bromley, in Kent, by whom he had issue, 1. Ambrose, married to Miss Hamlyn; 2. John, born December 24, 1757, married to Miss Fleming, daughter of Richard Fleming, esquire; 3. Thomas, who died July 17, 1775; 4. Another son; 5. A daughter. Elizabeth, died 1780. Jane, married to M. Ball, esq. of Bar- bar, married to George-William earl of Coventry, and died in 1800, leaving issue. Anne, married to Robert-Cotton Trefufts, esq. and died March 1776, by whom she had issue, Robert-George-William, the late baron Clinton and syde, Henry, born June 1, 1745, a captain in the navy, married Mary, daughter of — Schuyler, esq. of New York, and died April 1782, leaving issue a son, Henry, who married Miss Lagré. Lettie, who died October 16, 1791. Ambrose, born October 17, 1743, in holy orders, and died July 18, 1785. His lordship, dying June 24, 1779, was succeeded by his eldest son, John, the eleventh lord, born November 25, 1775; married Susannah-Louisa, daughter of Peter Sinfon, esq. of Lon- don; by which lady, who died in November 1800, he had issue, John-Peter, who died an infant. Susannah, died July 12, 1800. Henry-Beauchamp, the twelfth lord. St. Andrew, the present lord, Matilda, born January 50, 1761; married to William Villiers, esq. Elizabeth-Bar- bara, born February 22, 1763; married to Henry Vaughan, esq. of Powick, in Worcestershire. Charlotte, born March 12, 1763; married to Joseph Yates, esq. only son of the late judge Yates, and has issue a son and a daughter, and died July 24, 1803. George, born October 19, 1764, a colonel in the army; married Lavinia, daughter of William Breton, esq. who has since assumed the name of Wolstenholme; and whom other daughter, Maria, married the honourable Thomas Parker, brother to the earl of Macclesfield. The colonel, with his lady, and four children, were unfortunately drowned on board the Prince of Wales East-Indiaman, in 1804, on their passage from Bombay to England. Louisa-Theodora, born October 5, 1765, died an infant. His lordship dying in June 1767, was succeeded by his son, Henry-Beauchamp, the twelfth lord, born August 3, 1758; married in 1802, 1. Emma, second daughter of the late Samuel Whitbread, esq. of Cardington, in Bedfordshire, and had issue, 1. Emma, born in January 1782; married, in February 1806, the Rev. G. Forster, vicar of Whitchurch. 2. Angulta, born December 1782. 3. Margaret, born October 31, 1785. Barbara, born September 19, 1789. His lordship diedmesh in 1803, leaving his issue male, and was succeeded by his brother, Sir Andrew, the present and thirteenth lord.

Creation.—Baron St. John, of Bletsoe, January 13, 1538.

Residences.—Bletsoe Park, in the county of Bed¬ ford.—Town-house, Curzon street.

Armorial Bearings.—See the annexed Engraving.

Motto.—Data fata fecutus. —"Complying with his declared fate."

Ellis, Baron Howard of Walden.

Charles-Augustus Ellis, Baron Howard of Walden, born June 29, 1799; succeeded to the barony July 5, 1823, on the death of Frederic Hervey, fourth earl of Bristol, and lord bishop of Derry.

Thomas lord Howard, second son of Thomas fourth duke of Norfolk, by his second marriage with Margaret Audley, daughter and heir of Thomas lord Audley of Walden, was summoned to parliament October 24, 1577, and took his seat as a baron, by the declaration of Thomas lord Howard of Walden, by patent to him and the heirs of his body; in consequence of which the title was carried into the family of the Griffins, by his descendant in the female line. Sir Thomas Griffin, in the reign of Edward III. married Elizabeth, daughter and heir of Warren Latimer, lord Latimer of Braybrooke. Edward, sixth in descent from Sir Thomas, was constituted by Henry VIII. June 8, 1545, solicitor-general; which office he exchanged, May 21, 1552, for that of attorney-general, and was continued in that employment both by queen Mary and queen Elizabeth. He died in 1569. Edward, fourth in descent from Edward Griffin, by James I. December 28, 1623, became lord Howard of Walden, was summoned to parliament October 24, 1627, and took his seat as a baron. Sir George-William, the late baron Clinton and syde, Henry, born June 1, 1745, a captain in the navy, married Mary, daughter of — Schuyler, esq. of New York, and died March 1776, by whom she had issue, Robert-George-William, the late baron Clinton and syde, Henry, who married Miss Lagré. Lettie, who died October 16, 1791. Ambrose, born October 17, 1743, in holy orders, and died July 18, 1785. His lordship, dying June 24, 1779, was succeeded by his eldest son, John, the eleventh lord, born November 25, 1775; married Susannah-Louisa, daughter of Peter Sinfon, esq. of Lon- don; by which lady, who died in November 1800, he had issue, John-Peter, who died an infant. Susannah, died July 12, 1800. Henry-Beauchamp, the twelfth lord. St. Andrew, the present lord, Matilda, born January 50, 1761; married to William Villiers, esq. Elizabeth-Bar- bara, born February 22, 1763; married to Henry Vaughan, esq. of Powick, in Worcestershire. Charlotte, born March 12, 1763; married to Joseph Yates, esq. only son of the late judge Yates, and has issue a son and a daughter, and died July 24, 1803. George, born October 19, 1764, a colonel in the army; married Lavinia, daughter of William Breton, esq. who has since assumed the name of Wolstenholme; and whom other daughter, Maria, married the honourable Thomas Parker, brother to the earl of Macclesfield. The colonel, with his lady, and four children, were unfortunately drowned on board the Prince of Wales East-Indiaman, in 1804, on their passage from Bombay to England. Louisa-Theodora, born October 5, 1765, died an infant. His lordship dying in June 1767, was succeeded by his son, Henry-Beauchamp, the twelfth lord, born August 3, 1758; married in 1802, 1. Emma, second daughter of the late Samuel Whitbread, esq. of Cardington, in Bedfordshire, and had issue, 1. Emma, born in January 1782; married, in February 1806, the Rev. G. Forster, vicar of Whitchurch. 2. Angulta, born December 1782. 3. Margaret, born October 31, 1785. Barbara, born September 19, 1789. His lordship died in 1803, leaving his issue male, and was succeeded by his brother, Sir Andrew, the present and thirteenth lord.

Creation.—Baron St. John, of Bletsoe, January 13, 1538.

Residences.—Bletsoe Park, in the county of Bed¬ ford.—Town-house, Curzon street.

Armorial Bearings.—See the annexed Engraving.

Motto.—Data fata fecutus. —"Complying with his declared fate."

Ellis, Baron Howard of Walden.

Charles-Augustus Ellis, Baron Howard of Walden, born June 29, 1799; succeeded to the barony July 5, 1823, on the death of Frederic Hervey, fourth earl of Bristol, and lord bishop of Derry.
of Griffin, and is the present lord Braybrooke. His lordship married, first, in 1749, Anna-Maria, daughter of John baron Schutz, who died in 1764; and, secondly, June 7, 1765, Catharine, daughter of William Clayton, esquire, of Buckland, in the county of Bucks, esquire, by her, who died in August 1807; had no issue; and, dying himself on May 23, 1797, the baron of Howard of Walden devoted upon Frederic Hervey, fourth earl of Bristol, and lord bishop of Derry; who dying July 13, 1803, was succeeded by Charles-Augustus Ellis, eldest son of Elizabeth-Catherine-Caroline, daughter and heir of John-Augustus, lord Hervey, eldest son of Frederic, fourth earl of Bristol; who married, August 2, 1798, Charles-Rose Ellis, esq. M.P. for Seaforz; and, dying in January 1834, left issue by him, Charles-Augustus, the present lord; Augusta-Frederic; and Eliza-Georgiana-Caroline. Their heir presumptive is Augusta-Frederic, his lordship's brother.

CREATION.—Baron Howard of Walden, October 24, 1597.

RESIDENCE.—Claremont Park, in the county of Surrey.

ARMORIAL BEARINGS.—See the annexed Engraving.

Motto.—Vixit qui vixit.

PETRE, BARON PETRE.

ROBERT-EDWARD PETRE, BARON PETRE, F.R.S. succeeded his father, the late lord, July 2, 1821; married Maria-Bridget, eldest daughter of Henry Howard, 2d Glostop, esquire; and has issue, Maria; Juliana, married, April 30, 1805, to Stephen Phillips, esq. Henrietta; William, heir apparent; Charles; Elizabeth; Anne; Anna-Maria; and Robert-Thomas, born June 6, 1802.

The family of Petre was in considerable repute in the reign of Henry VI. William Petre, in the reign of Henry VII, was confirmed by that monarch one of the commissioners to visit and inquire into the state of all the monasteries throughout England; and farther promoted, in 1543, to be one of the principal secretaries of state; in which office he was continued by Edward VI, and queen Mary, and part of the reign of queen Elizabeth. By the will of Henry VIII. he was declared one of the twelve counsellors appointed to affit the sixteen executors during the minority of his son. He died January 13, 1572. John, his son, was by James I. created baron Petre of Writtle. William, fourth lord Petre, his great grandson, was committed to the Tower in the year 1678, and impeached of high treason upon the deposition of Titus Oates. He died in confinement, January 5, 1683.

Robert-James, eighth lord Petre, grandson of Thomas sixth lord Petre, brother of William fourth lord Petre, married Anne, daughter of James Ratcliffe earl of Derwentwater; by which lady, who died March 31, 1760, he had issue, Robert-Edward; Catharine, married to George Henage, esq. of Hainton, in Lincolnshire, and married, May 15, 1503. John, his son, had issue, 1. John, 2. Thomas, ancollo of Richard, who was created by Charles II. March 23, 1664, baron Arundel of Tremadoc; and by her has issue, Mary-Christiana, born March 10, 1764; married to her cousin, James-Edward Arundel, esq. and died February 14, 1805.

THE FAMILY OF ARUNDEL.

HENRY ARUNDEL, BARON ARUNDEL, of WARDOUR, and a Count of the Holy Roman Empire; born March 31, 1740; succeeded his father, the late lord, September 12, 1796; married, May 31, 1753, Mary, daughter of B. Conquest, of Inrham, in the county of Lincoln, esquire; and by her has issue, Eleanor-Mary, born March 20, 1766; married to Charles Everard Arundel, esq. and died February 14, 1805; and his lady married, secondly, January 17, 1788, Juliana, second daughter of Henry Howard, of Glostop, esquire, and left issue, Robert-Edward, Juliana, and Catharine; and dying July 2, 1801, was succeeded by her son, Robert-Edward, the present and tenth lord.

CREATION.—Baron Petre, of Writtle, in the county of Essex, July 21, 1603.

RESIDENCES.—Thorndon Hall, in the county of Essex; Buckenham House, in the county of Norfolk; and Dunket Hall, in Lancashire.—Town-house, Grosvenor-street.

ARMORIAL BEARINGS.—See the annexed Engraving.

Motto.—Sans Dieu rien. — "We are nothing without God."

SPENCER, BARON SPENCER.

GEORGE SPENCER, BARON SPENCER, Baron of WORMLEIGHTON, in the county of Warwick; born March 6, 1766; married, September 17, 1791, lady Susan Stewart, daughter of John earl of Galloway, and had issue, George earl of Sunderland; her apparent; and other children. His lordship is the eldest son of George duke of Marlborough; by lady Caroline Russell, only daughter of John fourth duke of Bedford. His lordship was called up by writ to the house of peers, February 1806, by the style and title of Baron Spencer, of Wormleighton. For particulars of his lordship's illustrious family, see the biographical account of the DUKES OF MARLBOROUGH.

CREATION.—Baron of Wormleighton, July 21, 1603.

RESIDENCE.—White Knights, in the county of Berkshire.

ARMORIAL BEARINGS.—See the annexed Engraving.

Motto.—Duc nos defende et duc.—"God defends the right."

ARUNDEL, BARON ARUNDEL.

THE FAMILY OF ARUNDEL has pedigree beyond the time of William the Conqueror. Sir John de Arundel, in the reign of Richard II. was constituted by that monarch earl marshal of England. John, his son, had issue, 1. John, 2. Thomas, ancestor of Richard, who was created by Charles II. March 23, 1664, baron Arundel of Tremadoc, in the county of Cornwall, which title became extinct in 1773. 3. Humphrey, father of John, who was created, in 1466, lord bishop of Litchfield and Coventry; and translated, in 1501, to the see of Exeter. He died May 15, 1503. John, grandson of John, grandson of Sir John Arundel, was one of those valiant commanders who distinguished themselves in the wars of Henry VI. for the crown of France. Thomas, fifth in descent from this distinguished leader, married Margaret, grand-daughter of Thomas second duke of Norfolk, and child of Catherine fifth conforl to Henry VIII. He was wrongfully beheaded, February 26, 1553, upon a charge of conspiring with Edward first duke of Somerset, the murder of John Dudley duke of Northumberland.

Thomas, his grandson, distinguished himself in the wars of Rodolph II of Germany against the Turks; and in consideration of his valour, and his taking their standard with his own hand, he was created, December 14, 1595, count of the holy Roman empire.

By James I. he was advanced to the dignity of a baron, by
HERALDRY.

Arundel of Wardour

English Boions.

London. Published as the Act directs Aug. 6, 1811.
by the title of lord Arundel of Wardour, and died Nov.
ember 7, 1639. Thomas, second lord Arundel, his son, distinguished himself for the side of Charles I. in the civil wars. His conduct heroically defended the castle of Wardour against the parliamentary forces for several days; and they being driven off by the return of lord Arundel, he was killed in the battle of Landown, July 5, 1643.

Henry, third lord Arundel, his son, was committed to the Tower in 1678, and impeached of high treason upon the deposition of the infamous Titus Oates. He was enlarged in 1683; and was constituted, by James II. March 11, 1686, lord keeper of the privy seal. He died December 28, 1696. The house of Arundel, fourth in descent, had issue, 1. Henry, fifth lord Arundel. 2. Thomas, who was killed at the battle of the Boyne, July 1, 1690.

Henry, sixth lord Arundel, married, first, Eleanor-Eizabeth, daughter of baron Everard, of Liege, by whom he had issue, Henry, the seventh lord, Thomas, who married, 19, 270, Mary, eldest daughter of John Porter, esq., and died May 11, 1768. James-Everard-Arundel, died March 20, 1803, having married Anne, daughter of John Windham, esq. of Ashcombe, in the county of Wilts; by which lady, who died April 10, 1765, he had issue, 1. James-Everard, who died young. 2. Eleanor-Anne, born November 2, 1752. 3. Mary-Windham, born December 2, 1753. Married to Arundel, died November 21, 1803, having married lordfhip's fon-in-law. He succeeded by his eldest son, the present and eighth lord.

Sir Anthony, grandfather of Rowland fourth lord Dormer.

Robert, second lord Dormer, was created by Charles I. in 1628, viscount Afcot in the county of Hereford, and earl of Carnarvon. He embraced the party of that monarch in the civil wars; and evinced himself to be a noteworth and able officer of great honour and integrity. He was killed at the battle of Newbury, Sept. 29, 1643. Upon the death of Charles second earl of Carnarvon, his son, Nov. 29, 1709, the titles of viscount Afcot and earl of Carnarvon became extinct. Charles, fifth lord Dormer, died July 2, 1725, leaving issue, 1. Charles, sixth lord Dormer, who died March 7, 1763. 2. John, seventh lord Dormer.

John, seventh lord Dormer, married Mary, daughter of sir Cecil Bithop, of Parkham, in the county of Suffolk, baronet; by whom he had issue, Charles, eighth lord Dormer. Robert, who died in June 1729. John, born February 13, 1730. James, born May 27, 1735; married Mary, daughter of Patrick Purcell, esq. of Caddiz, in Spain, by whom he had issue, James, born February 16, 1763; John, who died young; Elizabeth, died an infant; and Anne, born January 22, 1767. Elizabeth, born May 15, 1744; married, November 21, 1755, George, fifteenth earl of Shrewbury. Catharine, born July 16, 1757. Barbara, died unmarried. His lordship died October 7, 1785, and was succeeded by his son, who married, first, August 9, 1749, Mary, sister to George, fifteenth earl of Shrewbury; by whom lady, who died May 18, 1753, he had issue, 1. Mary, who died young. 2. Charles, his successor. His lordship married, secondly, Mrs. Mordaunt, relict of general Mordaunt, by whom he had issue, 3. Anne, born in 1759; married Edward Gould, of Woodhouse, in Nottinghamshire, esquire; and had issue two sons, Charles and Frederick; and two daughters, twins, Evelyn and Lucy, born March 1771. 4. Robert-Evelyn Pierrepont, married, November 6, 1795, lady Elizabeth Ker, daughter of William-John, fifth marquis of Lottian. 5. Elizabeth-Lucy, married Henry-Bligh Portman, of Bryanfone, in Dorsetshire, esquire, and has a son, born June 4, 1804. 6. John-Stanhope, born in 1772. 7. Frances, born in 1776; married Robert Knight, of Barrels, in Warwicksire, esquire, and has had issue a son, deceased, and two daughters. His lordship died March 29, 1804, and was succeeded by his eldest son, Charles, the ninth and present lord. The heir presumptive is Robert-Evelyn, his brother.

Creation.—Bifon Dormer of Wenge, June 30, 1615.
Residences.—Wenge, near Shaftesbury, in the county of Wilts.—Town-house, in Chandos-street.
Armorial Bearings.—See the annexed Engraving.
Motto.—Ca e Dio vuole io voglio. —"What God wills I will."

ROPER, BARON TEYNHAM.

JOHN ROPER, BARON TEYNHAM, born in 1763; succeeded his brother Henry, January 10, 1800.

The family of Roper was of considerable eminence in the reign of Henry II. and their name, which was original in Sufsex, has been widely extended by several marriages. Sir Christopher, father of John, who was created by James I. baron Teynham of Teynham.

Henry, eighth lord Teynham, fifth in descent from John, had issue, 1. Philip, ninth lord Teynham. 2. Henry, tenth lord Teynham. His lordship married, secondly, Anne, baronets Dacre; but by her he had no issue. Henry, tenth lord Teynham, married, first, Catherine, daughter of Edmund Powel, of Sandford, in the county of Oxford, esquire; by whom lady, who died in the month of July 1765, he had issue seven sons and two daughters: 1. 7 E. Henry,
Henry, born May 7, 1733, who succeeded his father. 2. John, married to Anne-Gabriella, daughter of Sir Francis Head, bart. of the Hermitage, in Kent, and widow of Mr. Mendez, esq. of London, by whom he had one son, who died in his infancy. Charles, died September 15, 1747. 4. Francis, married to Miss Mary Lyttelton, by whom he had issue, Henry, born in 1757; and who took the name of Curzon, by his majesty's permission; he married, May 21, 1788, Bridget, daughter of Thomas Hawkins, esq. of New Coast, in the county of Kent, and had issue, Edward; Maria; Flavia, since dead; Charles; Charlotte; Francis, died in 1792. 5. Philip, born October 13, 1763; married in 1767, Miss Barbara Lyttelton, sister of his brother's lady, who died April 10, 1785, and has issue, Barbara, married to Sir Samuel Chambers, of Woodlock House, in Kent, and has issue, Frances, who died young. Anne, married, in 1759, to Gawen Ayshford, esq., and has issue, Philip-Henry, in the army. Maria, Elizabeth, Catharine, married, in 1803, to Thomas-Johnson Pearce, esq. Louisa, died in 1823; and Emma-Thereza, married November 26, 1803, to Frederic Holbrooke, esq., and had issue, a daughter, born September 26, 1804. 6. Anthony, died an infant. 7. Catharine, married to Thomas Moyle, second son to Sir George Moyle, bart., of Talacre, in Flintshire. 8. Winifred, who died in 1794. 9. Thomas, born February 2, 1745. Her ladyship dying August 20, 1765, his lordship married, secondly, in March 1776, Anne, daughter of John Brinkhurst, of the Moor, in Buck-kinghamshire, esquire; which lady dying in January 1785, without issue, his lordship married, thirdly, in 1772, the widow of Thomas Davis, esq. who survived him. He died April 29, 1781. Henry, eleventh lord Teynham, was born May 7, 1773; and married, June 2, 1753, Wilhelmina, daughter of Sir Francis Head, bart. of the Hermitage, in Kent; which lady having, without issue, he married, secondly, Elizabeth, the widow of John Milla, esq. of Woodford Bridge, in the county of Essex, by whom he had issue as follows: 1. Betty-Maria, married to Francis-Henry Tyler, esq. died March 1, 1788, leaving issue one son. 2. Catharine, born August 2, 1702. 3. Philip, died in infancy. 4. Henry, the late lord, born May 3, 1764. 5. John, the present lord, born in 1767. His lordship died December 10, 1786, and was succeeded by his eldest son, Henry, twelfth lord; who dying January 19, 1800, unmarried, his honours and estate devolved to his only brother, John, the present and thirteenth lord Teynham. If his lordship dies without issue male, the title will descend to Henry Curzon, esq. of Water-perry, in Oxfordshire, his first cousin, being eldest son of Francis (his lordship's uncle), fourth son of Henry, tenth lord Teynham.

Creation.—Baron Teynham, July 9, 1616.

Residences.—Linend Head, in the county of Kent.

Town-house, Half-Moon-street, Picaaddly.

Armorial Bearings.—See the annexed Engraving.

Motto.—Spect me in Deo.—"My hope is in God."
married, March 24, 1709, Harriet-Catharine Townshend, youngest daughter of Thomas viccount Sydney; and has issue: Henry, lord Eldon, heir apparent, born August 15, 1756; and another son, born January 6, 1778.—For particulars of his family, see Duke of Bucleuch, among the Dukes of Scotland.

**Armorial Bearings.**—See the annexed Engraving.

**Motto.**—"Ame—'t I love.'

**CLIFFORD, BARON CLIFFORD.**

The barons Clifford of Chudleigh are descended from Louis, son of Roger, fifth lord Clifford of Appleby, who espoused the party of John Wickliffe, the celebrated reformer. Thomas, ninth in descent from Louis, made a considerable figure in the court of Charles II. By that monarch he was created baron Clifford of Chudleigh and constituted, November 28, 1672, lord high treasurer of England. He died in September 1673.

Hugh, fourth lord Clifford, married, first, Elizabeth, daughter of Edward Blunt, esq. to the duchesses of Norfolk, by Arabella, daughter of Sir John Guite, bart. by which lady he had issue, Elizabeth, died an infant. Mary, married to Sir Edward Smythe, of Atton Burnell, in Shropshire. Hugh, fifth lord. Edward, born December 31, 1777. Henry, died an infant; and Thomas, a posthumous son, who married Barbara, daughter and co-heir of James lord Aiton; and by her, who died August 17, 1786, has issue: 1. Thomas-Hugh, born December 4, 1782; 2. Edward-James, died an infant; 3. Henry, born March 2, 1788; 4. Walter, born March 13, 1773. 5. James-Francis, born August 16, 1774. 6. Barbara-Elizabeth, died September 6, 1792. 7. Mary, married to Charles, eldest son of Sir William Wolfeley, bart. 8. Anne, born April 26, 1779. 9. Lucy Bridget, married to John Weld, esq. of Lulworth Castle, Dorsetshire. 10. Constanlia, born February 30, 1766. Hugh, fourth lord Clifford, dying March 26, 1782, was succeeded by Hugh, his fifth lord, who married Anne, sister to Henry-George Lee, earl of Litchfield; and by her, who died August 17, 1786, has issue: 1. James-Rothwell, died unmarried; 2. Henry, the present lord; 3. Robert, F. R. and F. S. A. born November 28, 1759; succeeded by his brother Charles, the present and seventh lord.

**Creation.**—Baron Clifford of Chudleigh, April 23, 1672.

**Residences.**—Ugbrook Park, in the county of Devon; and East Park Hall, in Lancashire.—Town-house, in Bruton-street.

**Armorial Bearings.**—See the annexed Engraving.

**Motto.**—"Semper paratus."—"Always ready."

**ASHBURNHAM, BARON ASHBURNHAM.**

GEORGE ASHBURNHAM, BARON ASHBURNHAM, of Ashburnham, in the county of Suffex, viscount St. Alph, called up to the House of Peers, October 16, 1834, by the style and title of Baron Ashburnham; born December 25, 1763; married, first, August 25, 1788, Sophia, third daughter of Thomas, first marquis of Bath; by which lady, who died April 10, 1793, he had issue, George, heir apparent, born October 9, 1785; Elizabeth; Sophia, died in 1807; and John. His lordship married, secondly, July 25, 1795, lady Charlotte Percy, daughter of Algernon earl of Beverley. His lordship is the only son of John earl of Ashburnham; for an account of whose family, see that article, p. 517.

**Creation.**—Baron Ashburnham, May 30, 1689.

**Residence.**—Barking Hall, in the county of Suffex.

**Armorial Bearings.**—See the annexed Engraving.

**Motto.**—"Leroyl Eiat."—"The king and constitution."

**BOYLE, BARON BOYLE.**

EDMUND BOYLE, BARON BOYLE, of Marlton, in England; a General in the army; and Earl of Cork and Orrery, in Ireland. See the Irish Earls.

**HAMILTON, BARON DUTTON.**

ALEXANDER HAMILTON, BARON DUTTON, F. R. S. and F. S. A. (Marquis of Douglas and Clydesdale, in Scotland,) eldest son of Archibald, Duke of Hamilton and Brandon. His lordship was summoned to parliament, November 4, 1806, by the style and title of baron Dutton, in Cheviot; creation September 10, 1803; and by that title he also is a representative in parliament, November 4, 1806. For his lordship's armoirial bearings, &c. see Duke of Brandon, p. 472.

**DRUMMOND, BARON HAYE.**

THOMAS-ROBERT-HAYE DRUMMOND, BARON HAYE, of Pedwardin, in England; and Earl of Kinnoul, &c. in Scotland. See Earl of Kinnoul, among the Scots Peers.

**WILLOUGHBY, BARON MIDDLETON.**

HENRY-WILLIAM WILLOUGHBY, BARON MIDDLETON, and a Baronet; born April 24, 1761; succeeded his father, June 14, 1800. Married, August 3, 1793, Jane, daughter of the late Sir Robert Lawley, bart.

The family of Willoughby has been traced back to the Norman Conquest. Christopher, fifth in descent from William fifth lord Willoughby de Broke, had issue, 1. Christopher, whose son William was created by Edward VI, February 16, 1547, baron Willoughby of Parham, in the county of Suffolk; which title became extinct October 28, 1779. 2. Thomas, who was appointed by Henry VIII, October 29, 1537, lord chief justice of the court of Common Pleas, and died September 29, 1545. Francis, fourth in descent from lord chief justice Willoughby, acquired considerable reputation in the science of natural history, and died July 3, 1672. His works, which were published after his decease, are chiefly, Ornithologia Libri Trois, et Historia Piscum Libri Quatuor. He had issue Francis, created a baronet by Charles II, April 21, 1677, with remainder to his brother and Thomas.

Francis,
Francis, second lord Middleton, succeeded his father, April 2, 1729; and married Mary, daughter of Thomas Edwards, esq. by which lady he had Francis, the third lord; Thomas, the fourth lord; and Anne, who died in 1776. His lordship, dying August 4, 1758, was succeeded by his son, Francis, third lord, who died without issue, in December 1774, and was succeeded by his brother, Thomas, the fourth lord, who died also without issue, January 19, 1781, having married Miss Chadwick, who survived his lordship; and married, secondly, Edward Miller-Munday, esq. He was succeeded by his cousin, Henry, the fifth lord, born December 19, 1736; who was succeeded by his cousin, Thomas, January 19, 1781; who married, December 25, 1736, Dorothy, daughter and co-heir of George Cartwright, of Offington, in the county of Sussex, esquire, by whom he had issue, Henry, the present lord, and three daughters; Dorothy, married to Richard Langley, esq. Henrietta, married to Richard-Lumley Saville, earl of Scarborough. His lordship, dying June 14, 1800, was succeeded by his only son, Henry, the present lord.—The presumptive heir is Captain Digby Willoughby, of the royal navy.

Creation.—Baron of Ockham, May 29, 1725.

Residences.—Ockham Court, in the county of Surrey; and Meyneys, in Somersetshire.—Town-house, George-street, Westminster.

Armorial Bearings.—See the annexed Engraving.

Motto.—Labor ipse volupias.—"Labour itself is but pleasure."

MONSON, BARON MONSON.

JOHN-GEORGE MONSON, BARON MONSON, and a baronet; born September 3, 1723; succeeded his father, the late lord, May 20, 1786; married, October 30, 1807, lady Sarah Saville, eldest daughter of John earl of Mexborough.

The family of Monson is descended from John Monson, who served in the wars of Henry V. for the crown of France. William, third in descent from John, had issue, 1. John. 2. Robert, who was constituted, October 23, 1573, one of the justices of the court of Common Pleas, and died Sept. 30, 1583. John, son of John, had issue, 1. Thomas. 2. William, who was created a baronet, an admiral, and distinguished himself in the naval service of queen Elizabeth. He wrote "Tracts upon Naval Affairs," in six books; and died in February 1642. 3. Robert, whose daughter Sarah married sir Vincent Corbet, of Morton Corbet, in the county of Salop, baronet; and was created by Charles II. October 23, 1679, viscount Corbet, of Linchdale in the county of Buckingham, for life.

Thomas, eldest son of John, was created a baronet by James I. June 2, 1611. He was author of several books of piety and devotion; and had issue, 1. Sir John, second baronet, who adhered to the party of Charles I. in the civil wars. He was grandfather of Sir Henry, third baronet, who refused to take the oaths to king William the third; and of George. 2. William, who was created by Charles I. in 1628, baron of Ballingard, and viscount Callame, in the kingdom of Ireland.

John, fifth baronet, son of Sir Henry, third baronet, was created by George II. baron Monson of Burton, in the county of Lincoln; and constituted, in June 1733, captain of the band of gentlemen pensioners; and was further promoted, June 25, 1773, to be first lord commissioneer of trade and plantations. He married Margaret, daughter of Louis Watson, earl of Rockingham; by which lady, who died February 24, 1752, he had issue, 1. John, second lord Monson. 2. Louis, lord Monson, and a baronet; born February 17, 1755; who embraced the military profession, and distinguished himself in the war of 1755, particularly at the capture of the island of Maumee, July 27, 1762. Upon the introduction of some new regulations for the government of the territories of the East India company, in 1773, he went out with Sir John Clavering and Philip Francis, esq. as additional members of the supreme council of Bengal. He died in 1786; and lord Monson, his father, July 13, 1748.

John, second lord Monson, married, June 23, 1752, Theodosia, daughter of John Maddison, of Harpswell in the county of Lincoln, esquire; by which lady he had issue, John, the third lord. George-Leney, born October 17, 1755; married Mrs. Smith, of Hawkehurst, in the county of Essex, and has issue, one daughter, Evelyn-Tyrwhit, died young. Charles, a major general in the army, died January 11, 1800. William, a colonel in the army, married at Calcutta, January 10, 1786, Miss Anne Debonnaire, and has issue, William-John, born May 14, 1796. Thomas, in holy orders, married, July 20, 1790, Miss Annabella Green, and has issue, John, born July 7, 1793; and a daughter, who died an infant. Catharine, born September 22, 1794. Charlotte-Grace, born March 29, 1799; married Henry Pickle.
Percy, esq. of Bedale, in Yorkshire, and died July 19, 1793, leaving three daughters; Charlotte, Mariann, and Harriet. Theodosia-Margaret, born September 20, 1762; married, March 9, 1782, Sir John Shaw, bart. of Elsham, in the county of Lincoln. His lordship died an infant. His lordship died July 20, 1774, and was succeeded by his son, John, third lord, born May 20, 1753; married, July 13, 1777, Elizabeth Capel, daughter of the fourth earl of Effex, and has issue, John-George, the present lord. Elizabeth, born August 24, 1779; Charlotte, born February 17, 1782. His lordship, dying May 20, 1786, was succeeded by his only son, John-George, the fourth lord. The heir presumptive is George-Henry, uncle to his lordship.

Creation.—Baron Monson, May 28, 1728.

Residence.—Burton-house, in the county of Lincoln.—Town-house, Seymour-place.

Arms. —See the annexed Engraving.

Motto. —Prêt pour mon pays. —"Ready for my country."

BROMLEY, BARON MONTFORT.

HENRY BROMLEY, BARON MONTFORT, Baron of Horfeheath, in Cambridgshire, S.C. L. born May 24, 1777; succeeded his father, the late lord, October 24, 1799; married September 5, 1793, Miss Elizabeth Watts.

The family of Bromley was of high reputation in the reign of King John. William Bromley, in the reign of Edward III. had issue, 1. John. 2. Richard, father of John, born February 24, 1394. His lordship, dying May 20, 1365, was succeeded by his only son, John-George, the fourth lord. The heir presumptive is George-Henry, uncle to his lordship.

Creation.—Baron Monson, May 28, 1728.

Residence.—Burton-house, in the county of Lincoln.—Town-house, Seymour-place.

Arms. —See the annexed Engraving.

Motto. —Prêt pour mon pays. —"Ready for my country."

PONSONBY, BARON PONSONBY.

WILLIAM PONSONBY, BARON PONSONBY, of Syonby, and Earl of Belborough, and Viscount Dun-cannon, in Ireland. —See Earl of Bessborough, among the Irish Earls.

LEGGE, BARON STAWELL.

HENRY-STAWELL-BILSON LEGGE, BARON STAWELL, of Somerton, in the county of Somerset, Patent Surveyor of the Customs in the Port of London; M. A. born February 28, 1774; the late baronets Stawell, August 6, 1780; married, July 1, 1779, Mary, daughter of vicount Curzon, by which lady, who died September 19, 1804, he had issue, Mary, born July 27, 1780; married, August 11, 1803, the honourable John Dutton, only son of James lord Sheffield; and a son, born January 10, 1785; since dead.

Lord Stawell is maternally descended from Adam de Stawell, who lived in the reign of William the Conqueror. John, his descendant, fought on the side of Henry VII. at the battle of Bosworth, August 22, 1485; and was killed at the siege of Tournonne, in 1533. John, fourth in descent from John, suffered greatly for his loyalty to Charles I. He was taken prisoner at the siege of Exeter, April 9, 1646, and sent to Newgate by order of the rump-parliament, in violation of the terms of surrender; and he was afterwards several times indicted of high treason, at the instance of Oliver Cromwell, and three times arraigned for his life. He had issue, 1. Ralph, who was created by Charles II. January 15, 1663, baron Stawell of Somerton. 2. George, who greatly distinguished himself in the service of Charles I. 3. Upon the death of Edward fourth lord Stawell, son of Ralph first lord Stawell, April 13, 1755, the barony became extinct, but was revived by George II. in favour of Mary his daughter, who married Henry Bilson Legge, son of William first earl of Dartmouth; and so the family of baron Stawell, the present lord Stawell. She married fecondly, Wills Hill earl of Hillborough, and first marquis of Downshire.

Creation.—Baron Stawell, of Somerton in the county of Somerset, May 20, 1760.

Residences.—Mapleden-house, in the county of Berks.—Town-house, Grosvenor-place.

Armorial Bearings. —See the annexed Engraving.

Motto. —En parole je vis. —"By the word I live."

WATSON, BARON SONDES.

LEWIS-RICHARD WATSON, BARON SONDES, of Lees-Court, in Kent; born May 24, 1793; succeeded his father, the late lord, June 20, 1806.

The family of Watton was eminently distinguished as early as the reign of Henry VI. Lewis Watton, in the reign of James I. was by that monarch created a baronet, June 23, 1621; and by Charles I. January 29, 1645, in consideration of his loyalty in the period of the civil wars, was advanced to the dignity of baron Rockingham, in favour of Mary his daughter, who married Henry Bilson Legge, son of William first earl of Dartmouth; and so the family of baron Stawell, the present lord Stawell. Lewis, third lord Rockingham, married Anne, daughter of Thomas Wentworth earl of Strafford, prime minister of Charles I. by which lady he had issue, Lewis, third lord Rockingham; and Thomas, who assumed the name of Wentworth, in compliance with the will of William earl of Strafford, his maternal uncle.

Lewis, third lord Rockingham, married Catharine, daughter and heir of George Sondes, baron of Throwley, vicount Sondes of Lees-Court, and earl of Reverham; and was created by George I. October 19, 1714, baron of Throwley, vicount Lees-Court, and earl of Rockingham. He had issue, 1. Lewis, second earl of Rockingham. 2. Thomas, third earl of Rockingham; upon whose death, February 26, 1746, the honours which had been bequeathed upon his father became extinct, and the title of baron Rockingham descended to Thomas son of Thomas Wentworth, earl of Rockingham; and so the family of baron Rockingham, the present lord Rockingham. 3. Lewis, second lord Rockingham; and 4. Thoma s, fifth lord Rockingham, by whom the had issue John, second lord Monson; and Lewis lord Sondes.

Thomas, fifth lord Rockingham, was created by George II. May 28, 1728, baron of Melton in the county of York; and November 19, 1734, baron of Walth in the county of
of York, and of Harrowden in the county of Northampton, viscount Higham of E. gham Ferrers in that county, and earl of Maltone; and April 19, 1746, marquis of Rockingham. He married Mary, daughter of Daniel Sixtus of Winchelsea, by which lady, who died May 30, 1761, he had issue. 1. Charles, second marquis of Rockingham. 2. Mary, married May 31, 1764, to John Milbank, esquire. 3. Charlotte, born February 11, 1752. 4. Henrietta-Alicia, born December 7, 1757, and married to William Sturgeon, esquire. Lord Rockingham, by George I., September 17, 1750, baron of Malton in the county of York, was distinguished by the repeal of the American stamp act. He married Mary, daughter and heir of Thomas Bright, of Badsworth, in the county of York, esquire. Upon his death, July 3, 1752, his titles became extinct. Lewis, lord Sondes, brother to the second lord Monson, was advanced to the peerage, May 20, 1760, on the death of his maternal uncle, Thomas earl of Rockingham. He married the lady named Waton in compliance with his will. He married Frances, second daughter of Henry Pelham, brother to Thomas, late duke of Newcastle, by whom he had issue, Lewis-Thomas, the second lord. Henry, born April 20, 1755. Charles, born October 24, 1761; died April 16, 1769. George, born February 10, 1778. His lordship, dying March 30, 1795, was succeeded by his eldest son, Lewis-Thomas, the second lord. Henry, born August 10, 1796; Lewis-Richard, the present lord; born January 6, 1800. His lordship died June 30, 1860, and was succeeded by his eldest son, Lewis-Richard, the present lord. The presumptive heir is Henry, brother to his lordship.

Creation.—Baron Sondes, May 25, 1760. Residence.—Lees-Court, in the county of Kent; and Rockingham-Castle, in Northamptonshire. Armorial Bearings.—See the annexed Engraving. Motto.—Effo quod esse volueris. —"Be what you seem to be."

ROBINSON, BARON GRANTHAM.

THOMAS-PHILIP-WEDDELL ROBINSON, baron GRANTHAM, of Grantham, in the county of Lincoln, and a baronet; born December 8, 1781; succeeded his father, the late lord, July 20, 1786; and, by permission of his majesty, took the name of Weddell; he married, July 20, 1805, Henrietta-Frances Cole, youngest daughter of William Willoughby, earl of Enniskillen, and had issue a daughter, born June 8, 1806.

The family of Robinson was in high repute in the reign of queen Elizabeth. William Robinson, in the reign of Charles I., had issue, 1. Mertcele, created a baronet by Charles II. July 30, 1660, which title became extinct by his death, February 6, 1689. 2. Thomas, William, son of Thomas, was created a baronet by William and Mary, February 3, 1689. He married, February 26, 1736. 2. Sir Tancred, third baronet, a rear-admiral of his majesty's fleet. He married Mary, daughter and heir of William Norton, of Disforth, in the county of York, esquire; by which lady he had issue for William, fourth baronet, who died March 4, 1770; Sir Norton, fifth baronet; Mary, married to Thomas Pierce, of Pierceburgh in the county of York, esquire; Elizabeth; and Margaret. Sir Tancred's fleet. He married Mary, daughter and heir of Daniel Sixtus of Winchelsea, by which lady, who died May 30, 1761, he had issue. 1. Charles, second marquis of Rockingham. 2. Mary, married May 31, 1764, to John Milbank, esquire. 3. Charlotte, born February 11, 1752. 4. Henrietta-Alicia, born December 7, 1757, and married to William Sturgeon, esquire. Lord Rockingham, by George I., September 17, 1750, baron of Malton in the county of York, was distinguished by the repeal of the American stamp act. He married Mary, daughter and heir of Thomas Bright, of Badsworth, in the county of York, esquire. Upon his death, July 3, 1752, his titles became extinct. Lewis, lord Sondes, brother to the second lord Monson, was advanced to the peerage, May 20, 1760, on the death of his maternal uncle, Thomas earl of Rockingham. He married the lady named Waton in compliance with his will. He married Frances, second daughter of Henry Pelham, brother to Thomas, late duke of Newcastle, by whom he had issue, Lewis-Thomas, the second lord. Henry, born April 20, 1755. Charles, born October 24, 1761; died April 16, 1769. George, born February 10, 1778. His lordship, dying March 30, 1795, was succeeded by his eldest son, Lewis-Thomas, the second lord. Henry, born August 10, 1796; Lewis-Richard, the present lord; born January 6, 1800. His lordship died June 30, 1860, and was succeeded by his eldest son, Lewis-Richard, the present lord. The presumptive heir is Henry, brother to his lordship.

Creation.—Baron Sondes, May 25, 1760. Residence.—Lees-Court, in the county of Kent; and Rockingham-Castle, in Northamptonshire. Armorial Bearings.—See the annexed Engraving. Motto.—Effo quod esse volueris. —"Be what you seem to be."

CURZON, BARON SCARSDALE.

NATHANIEL CURZON, BARON SCARSDALE, and a Baronet; born September 27, 1752; succeeded his father, the late lord, December 5, 1804; married, July 1777, Sophia-Susanna, daughter of Edward viifcount Wentworth, by which lady, who died June 28, 1832, he had issue, Sophia-Caroline, born January 13, 1779; married, in September 1800, viscount Tamworth, eldest son of earl Ferrers; and Nathaniel, heir apparent, born January 3, 1781.

The family of Curzon is of Norman extraction, and came over to England with William the Conqueror. John Curzon, in the reign of Henry IV. had issue 1. Richard. 2. Henry, whose grandson Robert had a considerable command at the battle of Guinegate, commonly called the battle of the Spurs, in 1575. John, seventh in descent from Richard, was created a baronet by Charles I., August 11, 1641.

Sir Nathaniel, fourth baronet, his grandson, married Mary, daughter of sir Ralph Atherton, of Middleton, in the county of Lancaster, baronet; by which lady, who died March 18, 1776, he had issue John, who died an infant; Nathaniel, the first lord Scarisface; and Atherton, viscount Tankerville. Sir Nathaniel died in 1779; and was succeeded by his eldest son, Nathaniel, who was, April 9, 1784, created Baron Scarisface, of Scarisface, in Derbyshire; born December 23, 1727; married, October 27, 1753.
and of Portmore, by whom he had issue, Nathaniel, his successor. Caroline, born May 6, 1753; Charles, born March 22, 1758; John, born October 27, 1760; David-Francis, born July 18, 1762, in holy orders; Henry, born May 8, 1765; Juliana, born August 13, 1773. His lordship, dying December 5, 1784, was succeeded by his son, Nathaniel, the present and second lord.

**Creation.**—Baron Scarfde, April 9, 1761.

**Residence.**—Kedleston-Hall, near Derby.

**Arms.**—See the annexed Engraving. **Motto.**—Honor Hidelitatis pramium. **Heraldry.** 569

JOHN JAMES PERCEVAL, LORD LOVELL and HOLLAND, Baron Lovell and Holland, of Emsore, in Somersetshire; also Earl of Egmont; Viscount and Baron Perceval, in Ireland. See Earl of Egmont, among the Irish Earls.

**VERNON, BARON VERNON.**

GEORGE-VENABLES VERNON, BARON VERNON, Baron of Kinderton, in the county of Chester, born May 9, 1727. He succeeded his father, John Vernon, who came over to England with William the Conqueror; and was created by Hugh Lupus, lord palatine of Chester, in 1086, which he held for life; being the last person to whom that office was permanently granted. He died June 30, 1467. Henry, his grandson, was governor and treasurer to Arthur, prince...
prince of Wales, son of Henry VII. Humphrey, his
son, had issue. 1. George, whose grandson Henry was
created a baronet by Charles II. November 23, 1660. 2. Tho-
mus, Henry, fifth in descent from Thomas, married
Anne, grand-daughter and heir of Peter Venables lord
Kindererton.

George Venables, the issue of this marriage, and father
of the present lord, was created by George III. Baron
Vernon, of Kindererton, in Cheshire. He married first,
Mary, daughter and co-heir of Thomas Howard, sixth
lord Effingham; by which lady, who died in February
1740, he had issue, George-Venables, his successor.
Henry, Howard, and Mary, who all died young. Mary,
born December 19, 1739; married to George-Fenyon,
elfe, of Oxton, in Stourbridge, nephew of first Lord
Anfion, and father of viscount Anfion; and has issue ten
children. His lordship married, secondly, in December
1741, Anne, daughter of sir Thomas Lee, bart. of Hart-
well, in Bucks, and by her, who died December 22,
1744, he had no issue. He married, thirdly, April 10,
1745, Martha, elder sister of Simon, first earl of Harcourt; by
whom, who died April 8, 1794, he had issue, Elizabeth,
moved to the present earl of Harcourt. Henry, mar-
rried to Miss Sedley, daughter and heir of Sir Charles
Sedley, bart. and has taken the name and arms of Sedley;

brother. 2. Francis, the present lord. 3. Mary, mar-
rried to Thomas Leigh, esq. of Adlington, in Glou-
cestershire. 4. Arabella, married to John Bentworth,
esq. of Esat-Hyde, in the county of Bedford, and died
June 23, 1806. Rowland-Louis, a colonel in the foot-
guards, died unmarried; Charles, married, first, Miss
Wyatt; and had issue one son, since deceased. He mar-
rried, secondly, Anne-Louisa, daughter of Theodore
Georges, esq. whom he had issue, Anna-Arabella,
born December 18, 1749. Matthew, first lord Ducie,
dying May 27, 1755, was succeeded by Matthew, his
eldest son, the second lord; who, obtained a new pa-
tent, April 23, 1763, granting to his heirs male, and, in
default of such issue, then to his nephews, Thomas and
Francis Reynolds, esquires, and their heirs male, the
dignity of baron Ducie of Tortworth. His lordship
died unmarried, December 25, 1770, and was succeeded
by his nephew, Thomas, the third lord; who, dying
without issue, in 1785, was succeeded by his brother,
Francis, the present and fourth lord.

CREATION.—Baron Ducie, by patent, April 23, 1763.

RESIDENCES.—Tortworth Castle, and Spring Park,
in the county of Gloucester.—Town-houses, in Dover-
dicket, Piccadilly.

ARMORIAL BEARINGS.—See the annexed Engraving.

MOTTO.—"Perseverando."—"By perseverance."

CAMPBELL, BARON SUNDRIDGE.

GEORGE-WILLIAM CAMPBELL, BARON SUN-
DRIDGE, of Combe Bank, Kent, and Baron Hamilton,
of Hamilton, in Leicesshire, in right of his mother.
His lordship is Duke of Argyll, in Scotland; which fee.

HAWKE, BARON HAWKE.

EDWARD-HARVEY HAWKE, BARON HAWKE,
Baron of Towton, in Yorkshire; born May 3, 1774; suc-
cceeded his father lord Hawke, March 27, 1805; mar-
rried, August 28, 1798, Frances-Anne, sole heir of colo-
nel Harvey, of Womelley, in Yorkshire; and has issue,
Edward-William Harvey, heir apparent.

Edward, first lord Hawke, was the son of Edward
Hawke, of Lincoln's Inn, esquire, barrister at law, and
of Elizabeth, daughter of Nathaniel Bladen, esq. fifth
to colonel Bladen, and relict of colonel Ruthven. He
early embraced the maritime profession, and was pro-
moted, in 1734, to the rank of captain in his ma-
jecty's navy. In 1747, he was advanced to the rank of
rear admiral; and in 1756, he succeeded admiral Byng
in the command of the Mediterranean fleet. The pre-
eminent services he rendered to his country, most de-
servedly gained him the peerage, as well as the repect
and veneration of all men.—For his exploits, see the
article HAWKE, p. 262, of this volume.—He married Ca-
tharine, daughter and heir of Walter Brooke, of Burton
Hall, in Yorkshire, esq. by whom he had issue, Martin-
Bladen, his successor; Edward, born 1746, died a lieu-
tenant-colonel in garrison at Dublin, October 2, 1773;
Chaloner, died a cornet in the Scots-Greys, by a tile
from his horse, September 17, 1777; Catharine, born
1758.
1732. His lordship died October 17, 1734, and was succeeded by his son, Martin-Bladen, the second lord, born April 20, 1744; married Caffandra, daughter of the late Sir Edward Turner, of Ambridge, in Oxfordshire, baronet, by whom he had issue, Caffandra-Juliana, married, first, to Samuel Eling, esq. of the island of Barbadoes; and secondly, to Thomas Brownlow, esq. of Belton, in Lincolnshire, and a baronet, by whom she had issue, the present lord; Martin-Bladen-Edward, born April 1, 1772; Catherine, who died March 3, 1790; Catharine-Isabella, died August 10, 1786; and Annabella-Elliza-Caffandra, born August 24, 1757. His lordship dying March 27, 1805, was succeeded by his son, the third lord.

CREATION.—Baron Brownlow, May 20, 1776.

RESIDENCES.—Belton House, in the county of Lincoln.—Town-house, in Hill-Street, Berkeley-square.

ARMORIAL BEARINGS.—See the annexed Engraving.

Motto.—"Opera illius mea fann.—""His works are my work."

### PITF, BARON RIVERS.

GEORGE PITT, BARON RIVERS, of Stratfield-Say, and Baron Rivers, of Sudley Castle; a Lord of the King's Bed Chamber; born September 16, 1733; succeeded his father, the late lord, May 7, 1803.

The family of Pitt was of considerable reputation in the reign of Henry VI. John Pitt, in the reign of queen Elizabeth, had issue, 1. Sir William, his grandson George, married Jane, daughter of John Savage, earl Rivers, and widow of George, sixth lord Chandos; from whom descended his lordship's great-grandfather, George Pitt, esq. who married first, Lucy, daughter of Thomas Cocks, esq. of Baverstock, in the county of Wilts; by which lady, who died November 19, 1697, he had issue, George, his successor; Thomas, and Lucy, who both died unmarried. He married, secondly, Lora, daughter and heir of Audeley Grey, of Kington, in the county of Dorset, esquire, and had issue, Grey, who died young; William, who married Miss Elizabeth Wyman; John, who married Maria, daughter of Marcus Morgan, esq. and had issue, 1. William-Morton, who married Margaret, daughter of John Gambia, esq. by whom he has a daughter, Sophia. 2. George, who died in 1768. 3. Charles, who died an infant. 4. John, who died young. 5. Maria-Elizabeth, who married to Francis Gwyn, esq. of Ford Abbey, in Devonshire; Anne; Mary, who died unmarried. George Pitt, esq. father of the first lord, died in October 1745, having married Miss Louisa Bernier, by which lady, who died February 7, 1781, he had issue, the first lord Rivers; James, and John, who both died young; William-Augustus, a general in the army, and colonel of the first regiment of dragoons guards; married, January 21, 1763, Mary, daughter of Scoope, second viscount Howe; Lucy, married October 9, 1746, to James Kerr, of Scotland, esquire, and died in December 1790; Mary, died August 1794.

George, first lord Rivers, married Penelope, daughter and co-heir of Sir Richard Atkin, bart. of Chalham, in the county of Surrey; by which lady, who died February 8, 1795, he had issue, George, the present lord; Penelope, married the late Earl Ligonier, which marriage was dissolved by act of parliament; Louisa, married, March 21, 1773, Peter Beckford, of Stepeton, in the county of Dorset, esquire; and by her had issue, William-Horace; and Harriet, married to Henry Seymour, esq. of Hanford, in Dorsetshire. Maria, born March 29, 1756, married to James-Fox Lane, esq. His lordship, dying May 7, 1803, was succeeded by his only son, George, the present and second lord. The presumptive heir is William-Augustus Pitt, uncle to his lordship; the present and second lord. The presumptive heir is William-Augustus Pitt, uncle to his lordship; the present and second lord. DE CARDonnel, BARON DYNevOR.

GEORGE, TALBOT RICE DE CARDonnel, BARON DYNevOR, of DYNevor, in Caernarvonshire; and Lord-lieutenant and Cylch-Rotulorum of that county; born October 8, 1765; succeeded his mother the late baroness, March 14, 1793, who, by her majesty's permission, assumed the name of De Cardonnel, and married, October 20, 1794, Frances Townshend, daughter of Thomas, first viscount Sydney; and has issue, George, heir apparent, born August 5, 1795; Frances, born June 21, 1796; Cecil, born June 23, 1797; and a daughter, born November 7, 1799.

The family of Rice is descended from Vryan Reged, lord of Kidwell; and Yktenen, in South Wales, who married Margaret La Faye, daughter of Gorobus duke of Cornwall. Sir Rice ap Thomas Fitz Vryan, eighteenth in descent from this marriage, distinguished himself at the battle of Bovurith on the side of Henry VII. August 21, 1485; and was elected, in 1555, knight of the most noble order of the garter. George, first earl Talbot, died young. William, second earl Talbot, was advanced to that dignity, March 19, 1761, and received the barony of Dynvor, with remainder to his female issue, in 1780; he married, Mary, daughter and heir of Adam De Cardonnel, esq. by whom he had issue, William, who died young; and Cecil, who married, in 1775, George Rice, esq. of Newton,
NEWTON, in Caermarthenshire. The earl, her father, dying in May 1752, without male issue, the earldom became extinct; but the barony of Talbot of Henfel descended to his nephew, the late earl, who was advanced to the earldom and viscounty, June 3, 1784: and the barony of Dynevor, 1702, Charlotte, second daughter of the late general Lafcelles. Henrietta-Cecilia, married to Magens-Dorrien Magens, esq. and has issue Cecilia; George-William; Maria; Anne-Frances; and a daughter, born September 9, 1801. Lucy, born May 29, 1763, died young. Maria, born April 5, 1773; married John Markham, esq. of one of the grace the late archbishop of York, and rear-admiral of the white. Her ladyship died March 14, 1793, and was succeeded by George-Talbot, the present lord.

CREATIONS. —Baron Dynevor, October 17, 1780.

RESIDENCES. —Dynevor-Castle, in Caermarthenshire; and Barrington-Park, in the county of Gloucester.

MOTTO. —Secret et hard. —" Secret and bold."

DE GREY, BARON WALSINGHAM.

THOMAS DE GREY, BARON WALSINGHAM, of Walthingham, in the county of Norfolk; Comptroller of the First Fruits and Tithes, and Chairman of the Committees in the House of Lords. Born July 14, 1702, succeeded his father, the late lord, May 9, 1801; married, April 30, 1772, Augusta-Georgiana-Elizabeth, daughter of William, first lord Bolton; by whom he has issue, 1. George, heir apparent; born June 22, 1776, a lieutenant-colonel in the army; married Matilda, daughter of Paul Cobh Methuen, esq. of Conham-House, in Wiltshire. 2. Thomas, born April 10, 1778, in holy orders; married, Elizabeth, youngest daughter of the honourable and right reverend Dr. Brownlow North, bishop of Winchester, by whom he has issue, Elizabeth-Augusta, born July 26, 1803; Thomas, born July 6, 1804; William-Brownlow, born July 27, 1805; Charlotte-Harriet, died an infant. 3. Georgiana, born June 28, 1773. 4. Charlotte, married, September 18, 1806, William Golling, esq. of Rochampton, in the county of Surrey. 5. Augusta-Mary, born July 7, 1780.

The family of De Grey is descended from William, younger brother of John, first lord Grey de Wilton. Thomas, thirteenth in descent from William, had issue, 1. Thomas, who died May 23, 1751. 2. William, the father, died December 18, 1755. William, younger son of Thomas, embraced the profession of the law; and was constituted, December 16, 1764, solicitor-general to his majesty; which office he exchanged, August 6, 1766, for that of attorney-general. He was farther succeeded, January 26, 1771, lord chief justice of the court of king's bench; by his most honourable and learned successor, who died June 7, 1780, was soon after created baron Walthingham, of Walthingham. He married, November 22, 1743, Mary, daughter of William Cooper, of the park, in the county of Hertford, esquire; by whom he had issue, William, who died in September 1802, he had issue, William, who died an infant. Charlotte, married to Joseph Windham of Crefingham, in the county of Norfolk, esquire; and Thomas, his successor. His lordship died May 9, 1783, and was succeeded by his son, Thomas, second and present lord.

CREATION.—Baron Walthingham, October 17, 1780.

RESIDENCES.—Merton-hall, in the county of Norfolk. —Town-houle, Upper Harley-street.

ARMORIAL BEARINGS.—See the annexed Engraving. 

MOTTO. —Spirited, not inactive."

FITZ.
GEORGE - FERDINAND FITZROY, BARON SOUTHAMPTON: a General in the Army, and Colonel of the 34th Regiment of Infantry; born August 7, 1761; succeeded his father, the late lord, March 21, 1797; married, in June 1784, Laura Keppel, daughter of the late Lord Keppel, who died June 1798, by whom he had issue one daughter. His lordship married, secondly, December 2, 1802, Frances-Isabella Seymour, second daughter of Lord Seymour, son of Francis, first marquis of Hertford; and his issue Anne-Caroline, born September 3, 1803; and Charles, heir apparent, born September 25, 1804.

George-Ferdinand, fifth lord Southampton, married Anne, daughter and co-heir of Sir Peter Warren, vice-admiral of the red squadron; by whom, who died July 13, 1807, he had issue, Anne-Caroline, who died an infant. Susanna-Maria, died January 27, 1795. Charlotte, married to viccount Dungannon, of the kingdom of Ireland. Emily, married to William, second lord Bagot-Louis, married to James Allen, esq., of Bromsgrove, in Worcestershire. Georgiana, born October 13, 1782. George-Ferdinand, the present lord. Charles, a major-general in the army. William, died August 28, 1786. Henry, married Anne, daughter of the late lord of Mornington, and sister to Richard, marquis Wellesley, and had issue two children; and died March 19, 1794; his ladyship married, secondly, Culling Smith, esq., of Warren, who died at Vienna, May 24, 1796. Frederic, born October 10, 1796. William, a lieutenant-colonel in the army, married to Misses Clarke, sister to Sir Simon Clarke, baronet. Robert, born May 25, 1775; and Edward-Somercot, born October 25, 1776; both deceased; and a daughter, married, January 20, 1807, the honourable Frederic Ponsonby, brother to lord Ponsonby. Charles, the first lord, died March 21, 1797; and was succeeded by his son, the present and second lord.

Creation.—Baron Southampton, October 17, 1780.

Residence.—Fitzroy-Place, in the county of Middlesex.

Armorial Bearings.—See the annexed Engraving.

Motto.—Et ducis et pretium redi. —"At once the ornament and reward of virtue."

DUNNING, BARON ASHBURTON.

RICHARD-BARRE DUNNING, LORD ASHBURTON, Baron Ashburton, in Devonshire; born September 20, 1732; succeeded his father, the late lord, August 18, 1783; married, September 17, 1780, Anne, daughter of the late William Cunninghame, esq., of Lainham.

John Dunning, in the reign of George II. had issue, 1. John, 2. Mary, born in September 1733. John, the father, died December 1780. John, son of John, embraced the profession of the law, and was constituted, December 23, 1767, solicitor-general to the king; which office he resigned in March 1770. He was a considerable leader in the opposition to the administration of lord North; and is described by Mr. Edmund Burke as "the first man of his profession," and he adds that "there is not a man of any profession, or in any situation, of more ercft and independent spirit, of a more proud honour, a more manly mind, a more firm and determined integrity." By George III. he was created baron Ashburton, and constituted, April 13, 1782, chancellor of the exchequer, and one of the members of the cabinet-council in the administration of the marquis of Rockingham. He died August 18, 1783; having married, March 31, 1780, Elizabeth, daughter of John Baring, of Larkbeare, in the county of Devonshire; by whom he had issue Richard-Barre, the present and second lord; and Mary, married to Robert Ashburnham, of ashburnham in the county of Devon, April 8, 1782.

Residence.—Roe-Hall, in the county of Sutherland.

Armorial Bearings.—See the annexed Engraving.

Motto.—Studitis et rebus honos. —"By learning and virtue."

NORTON, BARON GRANTLEY.

WILLIAM NORTON, BARON GRANTLEY, Baron of Markenfield, in Yorkshire; Recorder of Guildford, and Lord High Steward of Allertonshire; born February 13, 1743; succeeded his father, Fletcher, the late lord, January 1, 1789; married, September 25, 1791, Miss Midgley, daughter of Jonathan Midgley, of Beverley, esq., by which lady, who died April 22, 1795, he had a son, born November 16, 1792, died November 13, 1793; and a second son, born January 29, 1794, and died in March following.

The family of Norton is descended from Egbert Coniers, whose ancestors came over to England with William the Conqueror. Roger, his son, married Margaret, daughter and heir of Richard Norton, of Norton, in the county of York; in right of which marriage the family assumed the surname of Norton. Richard, sixth descendant from Roger, joined the insurrection of Charles the noble earl of Weefmorland, and Thomas seventh earl of Shrewsbury, from which family he was excluded by Richard, married Elizabeth, daughter of William Serjeanton, of Hanlh, in the county of York, esquire; by which lady, who died September 10, 1774, he had issue, Fletcher, and Mary, married to John Braithwaite, of Shano, in the county of York, esquire, and died February 22, 1719.

Fletcher, son of Thomas, being bred to the law, was, in December 1761, appointed solicitor-general; and, in November 1763, he was made attorney-general. In 1769, he was appointed chief justice in eyre, south of Trent; and, in 1770, was chosen speaker of the house of commons, in which station he continued till 1780; when he was advanced to the peerage; he married, May 21, 1743, Grace, daughter of Sir William Chapple, knight, one of the judges of the court of King's Bench; by which lady, who died October 30, 1803, he had issue, William, his successor. Fletcher, one of the barons of the exchequer, in Scotland; born November 16, 1744; married to Miss Caroline Elizaude Balmain. Chapple, born April 5, 1746, a general in the army. Edward, who died in 1786. Thomas, died an infant. Grace, born November 8, 1752; married, November 19, 1779, John Charles earl of Portmouth. His lordship died January 1, 1789, and was succeeded by his son, the present lord Grantley. The presumptive heir is Fletcher, his lordship's brother.

Creation.—Baron Grantley, April 9, 1782.

Residences.—Grantley Park, in Yorkshire; and Woneith, in the county of Surrey. — Town-house, in Sloane-street.

Armorial Bearings.—See the annexed Engraving.

Motto.—Das numerantur avorum. —"I follow a long train of ancestors."

RODNEY, BARON RODNEY.

GEORGE RODNEY, LORD RODNEY, Baron Rodney, of Rodney-Stoke, in the county of Somerset, and a Baronet; Lord-Lieutenant of Radnorshire; born June 17, 1752; succeeded his father, George, the late lord, January 20, 1802.

Henry Rodney, in the reign of George I. was a cornet in the horse-guards; and married Mary, daughter and co-heir of sir Henry Newton, knight, judge of the high court of admiralty; by which lady, who died in January 1737, he had the following issue: George-Bridges, lord Rodney; Maria Constance, married to Charles Netherston, esq.; and died April 18, 1783; Catherine, died an infant; Henry, died in 1776; James, married, fifth, in 1751, Anne, daughter of Stephen Newcombe, esq., go-
vener of Benooleen, in the East Indies; who dying February 27, 1774, he married, secondly, Sarah, daughter of Nicholas Ruffell, esq. and died Nov. 19, 1793. George-Bridges, the eldest son, was born in Feb. 1718; and, having entered at an early age into the royal navy, performed, under different appointments, those important services to his country, which were the ultimate cause of his advancement to the peerage. For his numerous and brilliant exploits, see the biographical sketch of his life, under the head Rodney. He married, first, January 11, 1753, Jane, daughter of Charles Compton, esq. and after to Spencer earl of Northampton; by which lady, who died January 15, 1757, he had his second son, James, a captain in the navy, lost at sea in 1776; Jane, died an infant. His lordship married, secondly, Henrietta, daughter of John Clies, esq. a merchant of Lisbon, by whom he had issue, George, the second lord Rodney. His lordship married, thirdly, Henrietta, born January 27, 1769; Sarah, born May 24, 1772; and ten other sons, and one daughter. His lordship died January 20, 1804, was succeeded by his eldest son, and third lord Rodney. — The presumptive heir is lord George Thynne, second son of his brother, the first lord Rodney, born January 17, 1791: and married, secondly, October 13, 1799, Louisa Stratford, second daughter of John, third earl of Aldborough, in Ireland. Jane, born December 24, 1765; married to Mr. Chambers, feon of Sir William Chambers, knight, and his wife. Henrietta, born January 27, 1769; Sarah, born April 17, 1770; Margaret Anne, born May 7, 1775; Edward, born June 18, 1776. His lordship died May 24, 1792, and was succeeded by his eldest son, George, the second lord, born December 25, 1772; married April 10, 1781, to Martha, daughter of the late Honourable Thomas Harley, alderman of London, and had issue, George, his succesor, born January 14, 1782, and ten other sons, and one daughter. His lordship died January 20, 1804, and was succeeded by George, his eldest son, and third lord Rodney. — The presumptive heir is his lordship's brother. — Creation. — Baron Rodney, June 19, 1782. — Residences. — Town-house, in Grafton-street. — Armorial Bearings. — See the annexed Engraving. — Motto. — Non generant aquilz columbas. — Eagles do not breed crows.

Hastings, Lord Rawdon.

FRANCIS-RawDon Hastings, Lord RAwDON, Baron of Rawdon in Yorkshire; Earl of Moira Vol. IX, No. 607.

in Ireland; and Constable of the Tower of London. — See Earl of Moira, among the Peers of Ireland.

Carteret, Baron Carteret.

Henry-Frederic Carteret, Baron CARterET, of Hawnes, in Bedfordshire; High Bailiff of Jersey; LL. D. born November 17, 1735.

This nobleman is the second son of Thomas, second lord, viccount Weymouth; and next brother to the first marquis of Bath. He assumed the surname of Carteret in compliance with the will of his maternal grandfather, John Carteret, earl Granville. He was constellated, April 19, 1764, master of the household to the king; which office he exchanged, December 19, 1770, for that of joint postmaster-general. By George III, he was created baron Carteret of Hawnes, with remainder to the second and younger sons of Thomas, lord, viccount Weymouth. — The presumptive heir is Lord George Thynne, second son of his brother, the first marquis of Bath.

Creation. — Baron Carteret of Hawnes, in the county of Bedford, January 29, 1784.

Residences. — Hawnes-place, in the county of Bedford; and Carteret, in the county of Cornwall.

Armorial Bearings. — See the annexed Engraving.

Motto. — Loyal duty. — Loyal duty.

Eliot, Baron Eliot.

John-Craggs Eliot, Lord Eliot, Baron Eliot, of St. Germain's, in the county of Cornwall; M. A. born September 25, 1751; succeeded his father, the late lord, February 25, 1794; married, September 8, 1790, Caroline York, esquire to Philip earl of Hardwicke.

The family of Eliot was of high distinction in the reign of Edward IV. Sir John Eliot, in the reign of Charles I. was one of the committee appointed by the house of lords, of common council, to manage the impeachment of George Villiers duke of Buckingham. He died November 27, 1623. Richard, third in descent from Sir John Eliot, married Harriet, daughter of the right honourable James Craggs, secretary of state to George I. by which lady, who married secondly John, son of James, seventh earl of Abbercorn of the kingdom of Scotland, and died in 1769, he had issue, Edward, first lord Eliot, married to Hugh Harriet, esq. in the royal navy. 3. Harriet, married to Pendock Neale, of Tofferton, in the county of Nottingham, esquire; and died January 27, 1776. 4. Elizabeth, married to Charles first lord Somers; and died January 1, 1771. 5. Catharine.

John-Craggs Eliot, Lord Eliot, of St. Germain's, in the county of Cornwall; M. A. born September 28, 1761; succeeded his father, the late lord, February 25, 1794; married, September 8, 1790, Caroline York, esquire to Philip earl of Hardwicke.

The family of Eliot was of high distinction in the reign of Edward IV. Sir John Eliot, in the reign of Charles I. was one of the committee appointed by the house of commons to manage the impeachment of George Villiers duke of Buckingham. He died November 27, 1623. Catharine.
plea; and Viscount Bulkeley, of the kingdom of Ireland; which see among the Peers of Ireland.

COCKS, BARON SOMERS.

JOHN-SOMERS COCKS, LORD SOMERS, Baron of Evechal, in Worcestershire; born May 6, 1786; succeeded his father, Charles, the late lord, January 30, 1806.

The family of Cocks has pedigree as far as the reign of Edward I. Thomas Cocks, in the reign of queen Elizabeth, had issue 1. Thomas 2. Richard, father of Richard, who was created a baronet by Charles II. February 7, 1666. Richard, the elder son, had issue 1. Thomas, grandfather of Mary. 2. Charles, who married Mary, sister and co-heir of John lord Somers, of Evechal, lord high chancellor of England; by which lady he had issue, Catharine, married to James Harris, esq. of Salibury, ancestor of the present earl of Malmelecbury, and died in 1755. Elizabeth, died young; Margaret, married to Philip York, esq. afterwards earl of Hardwicke, and lord chancellor of Great Britain: he died in 1761, leaving issue the present earl of Hardwicke, and the lady of the first lord Anon. The sons were, James, who married, first, in 1718, Elizabeth, daughter of Richard earl of Bradford, by whom he had no living issue. He married, secondly, Frances, daughter of William lord Berkeley, of Stratton, who died February 3, 1739, leaving a son, James, who died unmarried in 1758, when the whole of the family estate descended to his uncle, John Cocks, who married Mary, sole daughter of his uncle, the reverend Thomas Cocks, and died in 1726, leaving issue the reverend Thomas Cocks, and died in January 1789.

The family of Cocks was of considerable eminence in the reign of queen Elizabeth. John Parker, in the reign of George II. married Catharine, daughter of John, first earl Poulet; by which lady, who died August 16, 1758, he had issue, 1. John. 2. Montagu-Edmund, who married, in 1773, Charity, daughter of Paul Ourry, of Salibury, in the county of Middlesex, by which lady he had issue, Montagu, and Frances. 3. Hemetta, married to Henry Lambert, of Hope End, in the county of Hereford, esquire. 5. Bridget, married to Redmond Kelly, of Ilievorth, in the county of Middlesex, esquire. John, the father, died April 15, 1768.

John, the elder son, was created by George III. baron Boringdon, of Boringdon. He married, first, in 1763, Frances, daughter of Jofiah Hert, archbishop of Tuam, by lady Elizabeth Fitzmaurice, eldest daughter of Thomas first earl of Kerry; but by her, who died in 1764, he had no issue; and, secondly, May 18, 1769, Thereza, second daughter of Thomas first lord Grantham; by which lady, who died December 21, 1775, he had issue, John, his successor, and Thereza, married, April 17, 1789, the honourable George Villiers, brother to Thomas earl of Clarendon. His lordship died in January 1789, when he was succeeded by his son, John, the present lord.

Creation.—Baron Boringdon, May 18, 1784.

Residences.—Saltram, and Filton, in the county of Devon.—Town-houfe, Berkeley-fquare.

Armorial Bearings.—See the annexed Engraving.

Motto.—Fidelia certa merces. — "Fidelity has its certain reward."

HILL, BARON BERWICK.

THOMAS NOEL HILL, BARON BERWICK, of Attingham, in the county of Salop; D.C.L. and F.R.S. born October 21, 1770; succeeded his father, the late lord, in January 1789.

The family of Hill has been traced beyond the era of the reign of Henry III. Humphrey Hill, in the reign of Henry VII. had issue, 1. Ralph. 2. Thomas, father of Sir Rowland Hill, a most distinguished lord-mayor of London, who was created in 1679, died in 1702, and was many exentive charters in the reign of Edward VI.

Rowland, fifth in descent from Ralph, adhered to the party of Charles I. in the civil wars, and contributed largely towards the exigencies of the king. He had issue, 1. Richard, who was employed in several foreign embassies, particularly to Victor Amadeus, king of Sardinia; and was afterwards paymaster-general of the army in Flanders, during the reigns of king William and queen Anne. He died June 11, 1727. 2. John, father of Rowland, who was, by George I. in confirmation of the public services of Richard his uncle, created a baronet, January 20, 1727, with remainder to Samuel and Thomas, his cousins. He married, June 27, 1735, Jane, daughter of Sir Brian Broughton, of Broughton, in the county of Stafford, baronet; by which lady he had issue, 1. Sir Richard, the third baronet. 2. Rowland, who embraced the clerical profession. 3. Jane. 4. Elizabeth. Sir Rowland, the father, died in 1783.

Thomas, third nephew, married Sufan-Mary, eldest daughter and co-heir with Frances her sister, countesses of Hertford, and one of the judges of the court of Common Pleas; by which lady, who died February 14, 1760, he had issue, 1. Noel,
Noel, first lord Berwick. 2. Maria, married, first, to Sir Brian Broughton Delves, of Broughton, in the county of Stafford, baronet; and, secondly, to Henry Errington, of Beaufort, in the county of Northumberland, esquire; half-brother to Charles, first earl of Sefton. Thomas, the father, died, in June 1782.

Noel, the eldest son, was created a peer by George III. and married, November 18, 1778, Anne, daughter of Henry Vernon, esq. of Hilton, in Staffordshire, cousin of lord Vernon; by which lady he had issue six children: Thomas-Noel, his successor; William, envoy extraordinary and minister plenipotentiary to the court of Sardinia; Richard, in holy orders, married, in October 1770, for the late William of Moffy Uwe, esq. by which lady he has Richard-Noel, and other issue; Henrietta-Maria, married to Charles lord Bruce, only son of Thomas-Bruce Brudenell, earl of Aylebury, by whom she has issue, George-Augustus-Frederic, to whom her majesty's flood sons; Anne; and Amelia-Louisa. His lordship died in January 1782, when he was succeeded by his son, Thomas-Noel, the present lord. The presumptive heir is William, next brother to his lordship.

Creation.—Baron Berwick, May 19, 1784.

Residences.—Attingham House, near Shrewsbury.—Town-house, Grosvener-square.

Armorial Bearings.—See the annexed Engraving. Motto.—"Qui uti fidei bona."—"Nobility is an honour to him who does what he ought."

DUTTON, BARON SHERBORNE.

JAMES DUTTON, Lord SHERBORNE, Baron Sherborne, in the county of Gloucester; born in October 1744; married, July 7, 1773, Mary, daughter of Wellery-Blackbards Cook, esq. of Longdon, in the county of Derby; by which lady he has issue, John, heir apparent, born in February 1779; married, August 11, 1803, the honourable Mary Legge, only daughter of Henry lord Stawell; Elizabeth-Jane, born May 28, 1775; married, January 14, 1803, viscount An-dover, son of John earl of Suffolk and Berkshire; Anne-Margaret, born November 1776; married, April 26, 1806, prince Bariatinsky, of the Russian empire, and died at St. Peterburgh, in March 1807, leaving issue a son; Frances-Mary, born in December 1777.

The family of Dutton is descended from Odar, who is in the list of thoze ancient warriors who came over to Englands in the Conquest. Hugh, his grandson, assumed the surname of Dutton. William Dutton, in the reign of queen Elizabeth, had issue, 1. John, who was committed to the prison of Gloucester for refusing to contribute to the bencovolves required by Charles I., though he afterwards distinguished himself on behalf of the sovereign. 2. Ralph, whose grandson Ralph was created a baronet by Charles II. June 22, 1678; and had issue, 1. Sir John, second baronet; upon whose death, February 1, 1743, the title became extinct. 2. Anne, married to James Naper, of Loughtrow, in the county of Meath, in the kingdom of Ireland, esquire; by whom she had issue, James-Leno; Anne; married to Archibald lord Douglas, of Huntly; William, married, first, November 17, 1758, Anne, daughter of Henry Vernon, of Halkhill, in Northumberland; and married, secondly, July 28, 1787, Mifs Travell, and died November 28, 1791, leaving issue a son, Thomas, died in 1791; and six daughters; Suannah, married to John Potter, esq. by which lady, who died October 1, 1783, he had issue one son, John, born in 1755, who died in 1773; and six daughters, Suannah, and Rhoda, who died young; Sophia-Alice, married to —— Jadi, esq. and died July 24, 1793; Elizabeth, married, May 1805; and issue three sons, and three daughters. 3. James, married, first, November 17, 1758, Fanny, daughter of Mr. Johnson, of Wiston, in the county of Yorks; and had issue, ——; his son, married, first, to a lady; and, secondly, to a lady, and had issue.

James-Leno, the eldest son, assumed the name of Dutton, in compliance with the will of his maternal uncle; and married Jane, daughter of Christopher Bond, of Newland, in the county of Gloucester, esquire; by which lady he had issue, Jane, now lord Shirburn; William-Noel, married, first, November 17, 1758, to a lady, who bore the name and arms of Naper, and married, June 5, 1787, Mifs Travell, and died November 28, 1791, leaving issue a son; Thomas, died an infant; Ralph, born in 1755, died February 25, 1784; having married Mifs Honur Gubbins, of Bath, who died without issue, in January 1807; Jane, and Jemima, died infants; Anne, married, in 1760, Samuel Blackwell, esq. of Amneyec Park, in the county of Gloucester; Mary, married, in 1769, to Thomas Maister, esq. of Cirencester, in the county of Gloucester; Frances, married, in September 1771, Charles Lambert, of Bean Park, in Meath, esquire; Jane, married, in 1775, Thomas-William Cock, of Holkham Hall, in Norfolk, esquire, and died July 20, 1800, leaving issue two daughters, one of whom married the late viscount Andover, and, secondly, April 16, 1806, captain Digby, of the royal navy; and Jane, married Thomas Viscount Aton.

Creation.—Baron Sherborne, May 20, 1784.

Residence.—Sherborne Lodge, in the county of Gloucester.

Armorial Bearings.—See the annexed Engraving. Motto.—Servo et fidem.—"I will keep the faith."

GORDON, BARON GORDON.

GEORGE GORDON, Baron GORDON, of Hunt ley, Marquis of Huntley, in North Britain, a Major-general in the Army, and Colonel of the 43d Regiment of Foot; born February 2, 1770. His lordship is the eldest son of Alexander duke of Gordon; and was summoned to parliament, April 11, 1807, and placed in his father's barony of Gordon, granted July 12, 1784.—See DUKE OF GORDON, among the Peers of Scotland.

DOUGLAS, BARON DOUGLAS.

JAMES DOUGLAS, BARON DOUGLAS, of Amebury, created an English baron, August 8, 1786; Duke of Queenberry, &c. in Scotland.—See DUKE OF QUEEN-BERRY, among the Peers of Scotland.

Residences.—Ameybury Park, in the county of Wilts; and Richmond, in Surrey.—Town-house, in Piccadilly.

SCOTT, BARON MONTAGU.

HENRY-JAMES-MONTAGU SCOTT, Baron MONTAGU, of Boughton, in Northamptonshire, D.C.L. born December 16, 1776; married, November 22, 1804, the honourable Jane-Margaret Douglas, daughter of Archibald lord Douglas, by lady Lucy Graham, daughter of William marquis of Graham. His lordship succeeded to this barony, May 25, 1790, on the death of his grandfather, George, last duke of Montagu, agreeably to the limitation of the patent granted in 1765, when he took the name of Montagu. His lordship is the second son of Henry duke of Buccleuch.—See Duke of BUCCLEUCH, among the Peers of Scotland.

Residences.—Boughton House, in the county of Northampton.—Town-house, in Privy Gardens.

BERESFORD, BARON TYRONE.

HENRY DE LA POER BERESFORD, BARON TYRONE, of Haverfordwell; created an English baron, August 8, 1786, and Marquis of Waterford, in Ireland.—See MARQUIS OF WATERFORD, among the Peers of IRELAND.

BOYLE, BARON CARLETON.

HENRY BOYLE, Baron CARLETON, in Yorkshire, created August 8, 1786; and Earl of Shannon, in Ireland.—See EARL OF SHANNON, among the Peers of IRELAND.

Residences.—Castle Martyr, in Corkshire.—Town-house, George-street, Hanover-square.

DELAVAL, BARON DELAVAL.

JOHN-HUSSEY DELAVAL, Baron DELAVAL, of Delaval, in the county of Northumberland; and Baron Delaval, of Redford, in Ireland, married, first, Suannah, daughter of R. Robinson, esq. and widow of John Potter, esq. by which lady, who died October 1, 1783, he had issue one son, John, born in 1755, who died in 1773; and six daughters, Suannah, and Rhoda, who died young; Sophia-Ann, married to —— Jadi, esq. and died July 24, 1793; Elizabeth, married, May 1805; and issue three sons, and three daughters.
HERALDRY.

19, 1781, George Tuchet, sixteenth lord Audley, and died July 11, 1782, leaving issue; Frances, married to John-Penton Cawthorn, esquire; and Sarah, married to George Carpenter, second earl of Tyrconnel. His lordship married, secondly, January 5, 1783, Miss Knight.

The ancient family of Delaval is descended from Gouldbrand, her of Gouldbrand's, in the kingdom of Norway, whose daughter, married to the banner of William the Conqueror at the battle of Hastings, bore his regiment and with his standard. The motto is: "God be my conductor." —Dim me conduif'.

George Carpenter, second earl of Tyrconnel. His lordship married, first, Frances, daughter of Sir Henry Delaval, and died July 1, 1785, leaving issue; Frances, married to Sir Henry Delaval, was a bearer of one of the principal seals of the Duchy of Normandy. The arms of Delaval are: Or, a chevron between three garbs sable, for Blake.

Rhoda, daughter of Robert Appreece, of Washingley, in the county of Northumberland, and widow of lord Naftau Paulett, had issue, 1. Mary, eldest daughter of Edward King, of Ashkain castle, in the county of Kent, and widow of lord Suffield, second son of Philip third earl of Chesterfield, and, secondly, to captain Morris; Sarah, married, Jane, who died August 4, 1779, he had issue, Harbord Harbord, the present baron Suffield; Robert, born September 28, 1767; Catharine, married, October 19, 1802, John Petre, esquire, born November 10, 1792.

William Morden, the father of lord Suffield, assumed, in January 1742, the name of Harbord, in compliance with the will of Harbord Harbord, elder son of Sir Robert Harbord, eldest son of Sir Robert Harbord, to whose fortune and estates he succeeded. In May 1744, he was made a knight of the bath; and was created a baronet by George II. March 22, 1746; and was afterwards advanced to the peerage by George III. He married Elizabeth, daughter of Robert Bristole, of Banthorpe, in the county of Norfolk, and died August 8, 1777. He had issue, Harbord Harbord, the present baron Suffield; Robert, born September 18, 1785; and several other children.

CREATION.—Baron Suffield, of the county of Norfolk, August 24, 1786.

RESIDENCES.—Gunton Park, and Suffield Hall, in the county of Norfolk. — Townhouse, in Ashwell-street.

ARMORIAL BEARINGS.—See the annexed Engraving. MOTTO.—Equanimity of mind.

CARLETON, BARON DORCHESTER.

Guy Carleton, Lord Dorchester, Baron of Dorchester, in the county of Oxford; Knight of the Bath; a general in the army, colonel of the 4th Regiment of Dragoons, and Governor of Fort Charlemont, in Ireland. He married, May 21, 1772, lady Mary Howard, daughter of Thomas second earl of Effingham, and elder to the present earl; by which lady he had issue, Guy, who died young; Thomas, a captain in the army, died February 4, 1806; having married Priscilla, daughter of William Bellord, esquire, and niece of the late Sir Adam Williamson, knight of the bath; by whom he had issue, Maria-Pelham, born June 27, 1795; William, died October 23, 1790; Laurencet, deceased; George, born September 25, 1781, heir apparent, a colonel in the army; married, in October 1805, Mary-ettes, eldest daughter of Edward King, of Ashkain Hall, esquire; Charles, died young; Dudley, born June 22, 1790; Richard, born February 10, 1792; Maria, born August 20, 1777; Frances, born February 3, 1785; married, in 1802, the reverend John Orde, vicar of King's-cres, in Hampshire.

This nobleman early in life embraced the military profession; and having passed through the inferior ranks of the army, was constituted April 21, 1772, colonel of the 47th regiment of foot; and May 25, in that year, major-general of his majesty's forces; and declared, in December 1774, captain-general and governor in chief of the province of Canada. He endured considerable hardships in a forward position, and undertook the fortiess of Quebec by the Americans, under the command of general Arnold, in the close of the year 1775; but at length, falling out of the garison, he defeated the besiegers, and killed general...
general Montgomery. Receiving succours from England in the following spring, he drove the enemy to the frontiers of New York, and destroyed all their maritime preparations upon Lake Champlain; and thus to his valour and intrepidity we owe the preservation of the Canadas, which now form the principal part of British America. (See vol. i. p. 424.) He was appointed January 1, 1776, to the rank of general in America, and soon after elected knight of the military order of the bath. He was promoted, August 29, 1777, to the rank of lieutenant-general of his majesty's forces; and, having restored the government of Canada, was chosen, in 1780, by the inhabitants of that province to be their king. He was appointed to the command of the 4th regiment of dragoons at New York, and was promoted to the rank of general in America, and was made governor of fort Charleson. On his lordship's return from the government of Canada, he was advanced to the rank of general, appointed to the command of the 4th regiment of dragoon guards, and made governor of fort Charlemont in Ireland.

The family of Carleton had residence for many centuries at Carleton-hall, in the county of Cumberland; it was raised to the peerage by the title and style of viscount Dorchester and baron of Imbercourt, in 1628; which now form the principal part of British America. (See vol. i. p. 424.) He was appointed January 1, 1776, to the rank of general in America, and soon after elected knight of the military order of the bath. He was promoted, August 29, 1777, to the rank of lieutenant-general of his majesty's forces; and, having restored the government of Canada, was chosen, in 1780, by the inhabitants of that province to be their king. He was appointed to the command of the 4th regiment of dragoons at New York, and was promoted to the rank of general in America, and was made governor of fort Charleson in Ireland. On his lordship's return from the government of Canada, he was advanced to the rank of general, appointed to the command of the 4th regiment of dragoon guards, and made governor of fort Charlemont in Ireland.

yon, the late lord, April 5, 1803; married, January 1803. Margaret, daughter of Sir Thomas Hamner, bart. of Bettisfield, in the county of Flint; and has issue, a daughter, born June 1807.

Eliza Kenyon is descended from Adam de Lowton, who lived in the reign of Henry II. and whose grandson, Jordan, assumed the surname of Kenyon. Roger, tenth in descent from Jordan, had issue, 1. George. 2. Thomas. 3. Edward, who was governor of Fort St. George in the East Indies, and died in 1701. George, the eldest of issue, George, who married, October 23, 1731, Peregrina, daughter of Robert Eddowes, of Eagle Hall, in the county palatine of Chester, esquire; by which lady he had issue, 1. Anne, born July 25, 1732. 2. George, born December 28, 1734; who married, first, February 25, 1759, Margaret, daughter of Thomas Banks, of Wigan, in the county palatine of Lancaster, esquire; by which lady he had issue, Margaret, born December 10, 1759, and married to Sir Thomas Hamner, of Hamner, in the county of Flint, baronet. He married, secondly, Ellen, daughter of William Curghey, eqy, by which lady he had issue, Elizabeth, Peregrina, and Jane. 3. Peregrina, born August 10, 1736. 4. Mary, born July 10, 1741, and married to Lord Kenyon. 5. Robert, who married, July 25, 1771, Sarah, daughter of Otho Cooke, eqy, and died May 6, 1787. 6. Alice, born in August 1744. George, the father, died December 29, 1780.

Thomas, second son of Roger, had issue, Lloyd, who married Jane, daughter of Robert Eddowes, of Eagle Hall, in the county palatine of Chester, esquire; by which lady, who died August 25, 1771, he had issue, Thomas, born in September 1771, and died in May 1770; Lloyd, the first lord, born October 5, 1772; married his cousin Mary, third daughter of George Kenyon, of Pecle, eqy, by whom (who survived him, and died in August 1808) he had three sons, viz. Lloyd, died September 15, 1802; George, the present baron; and Thomas, born September 27, 1780; married, in 1803, Charlotte, sister to William Lloyd, eqy, of Afton, and has a son, born in June 1804. Richard, who died October 26, 1751. Roger, married to Mary, only daughter of Edward Lloyd, eqy, of Penyllin, in Denbighshire, and had issue by her three sons and two daughters, viz. Edward-Lloyd, George, and Thomas; Jane, and Anna-Maria. His lordship's superior abilities in the law, occasioned his being appointed to the office of attorney-general in 1782, and chief justice of Chester; in 1784, master of the rolls; and, in 1788, lord chief justice of the court of King's Bench. His lordship having married, April 5, 1785, was succeeded by his eldest son, George, the present lord.—The presumptive heir is Thomas, his lordship's brother.

Creation.—Baron Kenyon, of Gredington, June 7, 1788.

Residences.—Gredington Hall, in the county of Flint; and Marthgate, in Surrey.—Town-house, in Lincoln's-inn-fields.

Armorial Bearings.—See the annexed Engraving.

Motto.—Magna imitatur crucem sejusinum. — "Bear affections with magnanimity."

GRiffin, Baron Braybrooke.

Richard-Aldworth-Neville Griffin, Lord Braybrooke, Baron of Braybrooke, in the county of Northampton; Provost Marshal of Jamaica; Lord Lieutenant, Vice Admiral, and Cuts of Rotulorum, of the county of Essex; Recorder of Salisbury; High Steward of Wingham, and Hereditary Visitor of McGillen College, Cambridge; F. R. S. and succeeded in the family of Jenkyn to the estate of Lord Howard de Walden, May 25, 1797. His lordship was born July 3, 1790; married, June 9, 1790, Catharine Grenville, youngest daughter of the late right honourable George Grenville, and sister to George marquis of Buckingham; by which lady, who died November 6, 1796, he had issue, Catharine, born February 23, 1785; Richard, heir apparent, born September 26, 1783; Francis, died May 8, 1786; Mary, died September 30, 1786; Elizabeth, married to Sir Wyndham Collete, in Flintshire, baronet; Henry, born March 1, 1788; George, born August 17, 1789; Caroline, born October 6, 1792; and William, who died in April 1803.

His lordship is descended from the ancient family of the Nevilles, of Billingbear, in the county of Berks, who have been seated there ever since the original grant of the Nevilles, of Billingbear, near Wokingham, in Berkshire. His lordship's father was Richard Griffin, eldest son of Edward VI. to Sir Henry Neville, one of the gentlemen of his privy chamber, who was second son of lord Aber-gavenny. Pursuant to the will of the late lord Howard de Walden, and conformable to act of parliament, lord Braybrooke changed his name, in 1798, from Neville to Griffin.

Creation.—Baron Braybrooke, September 5, 1788.

Residences.—Adeley House, in the county of Essex; and Billingbear, near Wokingham, in Efssex.—Town-house, in New Burlington-street.

Armorial Bearings.—See the annexed Engraving.

Motto.—Ne vitus est. — "Forn no mean with."

AMHERST, Baron Amherst.

William Pitt Amherst, Lord Amherst, Baron Amherst, of Montreal, in Kent; a Lord of the King's Bedchamber; born January 1773; succeeded his uncle, the late lord, August 3, 1797; married July 24, 1800, Sarah countess of Plymouth, daughter and co-heir of Andrew Archer, laft lord Archer; and has issue a daughter, born July 9, 1801; a son, and heir apparent, born August 29, 1802; William-Pitt, who married March 26, 1803; a son, born November 24, 1803; and a son, born in February 1809.

The family of Amherst is descended from Hamo, a Saxon baron, who was sheriff of the county of Kent in the reign of William the Conqueror. Hamo, his descendant, was lord bishop of Rochester; and Hamo, in the reign of Edward III. wrote himself Hamo de Hurst. The genealogy has been regularly traced from the reign of Richard II.

Jeffery Amherst, in the reign of George I. was a beneficer of the Society of Gray's Inn; and married Elizabeth, daughter of Thomas Kerril, of Hadlow, in the county of Kent, esquire; by which lady, who died May 1, 1752, he had issue, Sackville, born in 1715, and died in 1761; Jeffery, born Jan. 29, 1717, commander-in-chief of the army in America, in the war against the French, from 1758 to 1764, was made a knight of the Bath in 1764; and was created baron Amherst by George III. in reward of his long and great services to his country; for particulars of which, see the article Amherst, vol. i. p. 473. He married, first, Jane, daughter of Thomas Dalton, eqy, of Hampton, in Kent, who died without issue, January 7, 1765; his lordship married, secondly, Elizabeth, eldest daughter of the honourable general George Carey, son of vicecount Falkland, by whom he had no issue. His lordship was colonel of the second regiment of lifeguards, colonel-in-chief of the 60th regiment of foot, governor of Guernsey, and a field-marshall; and, dying August 3, 1797, was succeeded by his nephew, the present lord. John, who died, an admiral of the blue, February 12, 1778, married Anne, daughter of Thomas Lindzee, eqy, by whom he had no issue, and died February 14, 1778; Thomas, Sidney, and Charles, died in their infancy; William, born in 1732, died-de-camp to his majesty, and colonel of the 3rd regiment of foot, lieutenant-governor of St. John's in the island of Newfoundland, and a lieutenant-general in the army; died May 23, 1781, having married, March 31, 1766, Elizabeth, daughter of Thomas Patterson, eqy, and by her had issue, 1. William-Pitt, the present lord. 2. Elizabeth, born in February...
briary 1774. 3. Harriet, born in October 1775, died young. Elizabeth, born in 1714, married the reverend John Thomas, rector of Nutgrove, in Chehshire, and died in 1759. Margaret, died unmarried in 1735; Mary, born in December 1720, died an infant.

Creations. — Baron Amberlief, of Holmesdale, in the county of Kent, May 20, 1776. Baron Amberlief, of Montreal, in the county of Kent, August 30, 1728, named after Montreal, which he took from the French in America.

Residences. — Montreal, in the county of Kent. — Town-houfe, in Lower Grosvenor-street.

The Armorial Bearings of lord Amberlief, as given in the annexed Engraving, are: Gules, three fances or tilting-fores erect in fefs or, their heads argent. This bearing was granted to the family of Amberlief in 1611, as a token of their prowefs at jousts and tournaments.

Crest. — On a mount vert, three fuch fores; the centre one erect, the other two in faltire, girt with a wreath of laurel proper.

Supporters. — Two Canadian war-Indians, of a copper colour; rings in their nores and ears, and bracelets on their arms and wrists proper, their crofts-belts over their shoulders. To one a powder-horn pendant, to the other a scrapping-knife; each of their waffes covered with a short apron gules; their gaiters blue, feam'd or; their legs fettered and fastened by a chain to the brace¬let on the outer wiff proper, the dexter Indian holding in his exterior hand a tomahawk: thence a wiff proper. Thefe supporters were granted to Jeffrey lord Amberlief, when he was invested a knight of the Bath, in allusion to his extenfive conquefts in America.

Motto. — Cofcor concordia crefte. — "Concord infures victory."

CHICHESTER, BARON FISHERWICK.

GEORGE-AUGUSTUS CHICHESTER, BARON FISHERWICK, in the county of Stafford, July 9, 1790; and Marquis of Donegal, in Ireland. — See Marquis of Donegal among the Peers of Ireland.

DUFF, BARON FIFE.

JAMES DUFF, BARON FIFE, in Great Britain, July 9, 1790; and Earl of Fife, in Scotland. — See Earl of Fife among the Peers of Scotland.

GRIMSTON, BARON VERULAM.

JAMES-BUCKNALL GRIMSTON, BARON VERULAM, of Gorhambury, in Hertfordshire, July 9, 1790; and Viscount Grimston, in Ireland. — See Viscount Grimston among the Peers of Ireland.

DOUGLAS, BARON DOUGLAS.

ARCHIBALD DOUGLAS, BARON DOUGLAS, of Douglas Castle; Lord Lieutenant and Hereditary Sheriff for Forfarshire; married, June 1771, Lucy, sister to the present duke, and only daughter of William, fifth marquis and second duke, of Montrose; by which lady, who died February 13, 1779, he had nine three sons, Archibald, heir apparent; Charles; and William, born March 2, 1773, who died February 10, 1780; and one daughter, Jane-Margaret, married, November 25, 1804, Henry-James, lord Montagu, second son of Henry duke of Buccleuch. His lordship married, secondly, May 13, 1783, lady Frances Scott, sister to the present duke of Buccleuch; by whom he had five sons and two daughters. His lordship is maternally descended from lady Jane Douglas, only sister and heir of the late duke of Douglas, &c. of Scotland; and paternally from the house of Stewart, by the marriage of lady Jane with fir John Stewart, of Grantully, in Scotland, baronet, by whom she had two sons, viz. Archibald and Sholto, the latter of whom died young; but the eldest, Archibald, was declared heir-at-law to the late duke of Douglas, on September 9, 1761, succeeded to his real estate, and is the present peer.

GAGE, BARON GAGE.

HENRY-HALL GAGE, BARON GAGE, of High Meadow; and Viscount Gage, of the kingdom of Ireland. — See Viscount Gage among the Peers of Ireland.

GRENVILLE, BARON GRENVILLE.

WILLIAM-WYNDHAM GRENVILLE, BARON GRENVILLE, of Wotton, in the county of Buckingham; Auditor of the Exchequer, Elder Brother of the Trinity-houfe, a Governor of the Charter-houfe, D.C.L. and F.S.A. born October 25, 1739; married, July 18, 1792, the honourable Anne Pitt, daughter of Thomas, first lord Camelloyd. His lordship is second brother to George marquis of Buckingham; was appointed Speaker of the Houfe of Commons, in 1739; secretary of State in 1790; and in 1806, first lord commiffioner of the treasury; created lord Grenville, of Wotton. — See Marquis of Buckingham, for particulars of this illustrious family, armorial bearings, &c.

Creation. — Baron Grenville, November 25, 1790.

DOUGLAS, BARON DOUGLAS.

GEORGE DOUGLAS, BARON DOUGLAS, of Lochieven, was created an English peer August 11, 1791; and is also Earl of Morton in Scotland. — See Earl of Morton, among the Peers of Scotland.

THURLOW, BARON THURLOW.

EDWARD THURLOW, BARON THURLOW; Patentee of the Bankrupts' Office, and Clerk of the CUT¬
odies of Idiots and Lunatics in possession; a Clerk of the Hanaper, and one of the Prothonotaries of the Court of Chancery; born June 11, 1784; succeeded his uncle, Edward, the late lord, September 12, 1806.

Thomas Thurlow, rector of Ashfield, in the county of Suffolk, father of the first lord, married Mifs Elizabeth Smith, of that place; by whom he had issue, Edward, afterwards lord Thurlow. 2. Thomas, born September 19, 1757; on whom the barony of Thurlow was granted in reversion; and three daughters, Amelia; Elizabeth; and Anne, who married, April 12, 1804, Charles Godfrey, esq. of the royal artillery. 3. John, an alderman of the city of Norwich, who died March 4, 1782, having married Jofeph, daughter of John Moore, esq. by which lady, he had issue, Edward, Smith, prebendary of Norwich, to whom the barony of Thurlow was granted in remainder, in default of issue male of his uncle and his cousins, Edward, the present lord, and Thomas.

Edward, first lord Thurlow, being bred to the law, was, in May 1770, conftituted foliciitor-general to his majesty; which office he exchanged January 23, 1773, for that of attorney-general. By George III. he was created baron Thurlow of Ashfield; and was promoted, June 2, 1778, to be lord high chancellor of Great Britain, which office he resigned in April 1783. The feals were again delivered to him, December
HENRY Phipps, Lord Mulgrave, of Mulgrave, Baron Mulgrave, of New Ross, in Ireland; First Lord of the Admiralty, Lord Lieutenant, Custos Rotulorum, and Vice-Admiral of the North Riding of Yorkshire, a Lieutenant-general in the Army, Governor of Scarborough, and Colonel of the thirty first regiment of foot; F.S.A. born February 14, 1755; appointed chancellor of the duchy of Lancaster in 1804, and principal secretary of state for the foreign department in 1805.

He succeeded his brother, the late lord, October 19, 1792; married, October 20, 1795, Sophia, daughter of William Maling, of West Hennington, in the county palatine of Durham, esquire; and has issue, Henry-Confinantine, heir apparent, born May 15, 1796; Henrietta-Sophia, born May 28, 1799; Augusta-Maria, born September 3, 1802; Charles-Beamont, born December 27, 1804.

Constantine Phipps, great-grandfather of the late lord, was, in 1714, lord chancellor of Ireland, and died in 1723, leaving only one son, William. His lordship's grandfather, William Phipps, married, February 26, 1718, Catharine, only daughter of James Earl of Anglesey, by whom he had issue, Constantine, the first lord Mulgrave; and James, who died without issue.

Constantine was advanced to the peerage of Ireland by George III. and married Lepel, eldest daughter of John Lord Harvey, who died in 1782, by whom he had issue, Constantine-John, the late lord, who was created a peer of Great Britain. His lordship was born in 1744; married, June 20, 1785, Elizabeth-Anne, daughter of Nathaniel Cholmondeley, esquire of Whity, in Yorkshire; by whom, who died May 22, 1788, he had issue, Anne-Elizabeth-Cholmondeley, born May 19, 1788; but dying without male issue, October 10, 1792, his English title became extinct, but his Irish honours descended to his brother, Henry; Charles, a captain in the Royal Navy, died unmarried, October 20, 1786; Henry, the present lord; Edmund, born 1760; Augustus, born in 1762, married, August 1792, Maria, eldest daughter of Peter Thellulon, esquire of Broadwood Hall, near Doncaster, in Yorkshire; Henrietta-Maria, born March 1717, married, August 1718, to the present lord, and has issue.

His lordship's dying September 16, 1775, was succeeded by his son, Constantine-John, the late lord; who dying October 10, 1792, was succeeded by his brother, Henry, the present lord, who was created a peer of Great Britain, August 13, 1794, by the title of baron Mulgrave, of Mulgrave, in Yorkshire.

Creating Baron Mulgrave, in Ireland, August 13, 1794; Baron Mulgrave, in England, August 13, 1794.

Residences.—Mulgrave Castle, in the county of York.—Town-residence, at the Admiralty. Armorial Bearings.—See the annexed Engraving. Motto.—Fertusique virtus.—"Content in virtue."

LYTTLETON, BARON LYTTLETON.

GEORGE-FULKE LYTTELTON, LORD LYTTELTON, Baron of Frankley in Worcestershire, Baron Weichton of Balamore; succeeded his father, the late lord, in September 1808.

The family of Lyttleton were very early seated at South Lyttleton, in the county of Worcester. In the reign of Henry III. 1235, Thomas de Lyttleton married Emma de Frankley, an heir and lady of the manor; and his grandson, Thomas de Lyttleton, in the reign of Edward II. was chosen knight of the shire for the county of Worcester; from whom descended John Lyttleton, who took part in the murder of the earl of Leicester. Sir Thomas Lyttleton, bart., married, May 8, 1708, Christiana,
tian, daughter of sir Richard Temple, bart. of Stowe, in Buckinghamshire, and had issue, 1. George, first lord Lyttelton. 2. Thomas, died unmarried. 3. Charles, lord bishop of Carlisle, died unmarried. 4. Richard, died young. 5. Sir Richard, knight of the bath; married lady Rachel Ruffell, died daughter of Sir Lionel, second duke of Bedford, and had issue, second daughter, for Henley Bridgewater, and died without issue, October 1, 1770. 6. William-Henry, the late baron. 7. Christian, married Sir Thomas Pitt, esq. of Boscococ, father of the first lord Camford, and died June 4, 1720. 8. Anne, married the reverend Francis Ayliffe, D. D. and died March 3, 1796. 9. Mary, died young, for Sir Penelope. 10. Penelope, died. 11. Heiter, married John Fitzmaurice, esq. of Springfield Castle, in the county of Limerick, Ireland.

George, first lord Lyttelton, was born January 17, 1763, and married, June 15, 1784, Lady, daughter of Hugh Fortescue, esq. of Filleigh, in Devonshire; by which lady, who died January 19, 1787, he had issue, 1. Thomas, the second lord. 2. Lucy, married to Arthur Amelee, earl of Mount Norris. His lordship married, secondly, August 10, 1794, Elizabeth, daughter of field-marshall sir Robert Rich, bart, who died September 27, 1795; and his lordship dying August 22, 1795, was succeeded by his only son, Thomas, the second lord, who died without issue in 1779, when the barony of Lyttelton became extinct; but the ancient baronetcy devolved on his uncle, William-Henry Lyttelton, lord Welcote, who, after serving in many embassies, was created baron Welcote, of Ballmore; and was afterwards advanced to the title of lord Lyttelton, baron of Frankley, in the county of Worcester. He was born December 20, 1734; married, in June 1761, Mary, daughter and co-heir of James Macartney, esq. of Longford, in Ireland; by which lady, who died in 1765, he had issue, Heiter, born March 17, 1764, married to Richard-Coll Hoare, bart of Stourhead, in the county of Wilts; George-Fulke, the present lord, born December 20, 1724; married, in 1765, he had issue, Heder, born March 17, 1762, married to sir Richard-Colt Hoare, bart. of Stour-
came William Peachey, of Newgrove, near Petworth; and Edmund Peachey, of Eartham, in the county of Sussex, who had an only son, Edward, who died in 1679, having been twice married; and left issue by Anne, his second wife, three sons, Edward, William, and John; and two daughters, Anne and Sarah. Edward, the eldest of the sons, had two sons and two daughters, and died in 1685. John, the second son, was twice married, and died May 25, 1693, leaving an only daughter Elizabeth, married to Sir Richard Farringdon, knight. William, the second son, married Mary, daughter and coheiress of Hall, of Petworth, in the county of Sussex, who had an only son, Edward, who died in 1657.

He married the second, third, fifth, seventh, and eighth, the sons, the second, third, sixth, seventh, and eighth, died unmarried, viz. Edward; William, an officer in the guards, killed at the battle of Almanza, in Spain; Henry; Edward; William; John; Bulstrode; George; Charles, who died in Peru; and James, in the service of the East-India company, died February 15, 1771.

Bulstrode, the fifth son, assumed the name of Knight, in addition to that of Peachey, on his marriage, June 8, 1725, with Elizabeth, relish of William-woodward Knight, of Wealden, in the county of Sussex, esq. but left no issue. Henry was created a baronet by George II. March 1, 1736, with remainder to John, his fourth brother, who married Jane, daughter of William Jarret, esq. of the city of London; by whom he had issue two sons, William, who died an infant, and Henry, who died at the age of twenty; and three daughters, Jane, married to Gawan-Harris Naff, of Petworth, esq. and Elizabeth, and Eleanor, who both died unmarried. The male issue of sir Henry Peachey thus becoming extinct in his own line, the title of baronet, pursuant to limitation, devolved on his next brother, sir John Peachey; who married Henrietta, daughter of George London, of Long Ditton, in the county of Surrey, esquire; by which lady he had issue two sons, John and James, and three daughters, Henrietta and Rebecca, both of whom died unmarried; and Mary, who married Michael Scare, esq. of the Grove, near Tring, in Hertfordshire. Sir John Peachey dying April 12, 1744, was succeeded in his title and estate by his eldest son, John, who married Elizabeth, daughter of John-Meres Fagge, esq. of Glenley, in Sussex, by whom he had no issue; and, dying July 3, 1757, the title and estate devolved on his only brother, John, the late peer, who was born March 8, 1732; married, August 19, 1747, lady Georgiana-Carolina, eldest daughter of Henry, first earl of Deloraine; by which lady he had issue one son, and one daughter, viz. John, his successor; and Georgiana, married, April 1, 1771, to the earl of Warwick and Brooke; and died April 1, 1772, without issue. His lordship was appointed, in 1751, groom of the bedchamber to his present majesty, when prince of Wales; and, in 1752, he succeeded the earl of Cardigan as master of the robes to the king; and, dying February 1, 1768, was succeeded by his only son, John, the present and second lord.

Creation.—Baron Dundas, of Selfy, of Selfy, in the county of Sussex, August 13, 1794.

Residences.—Wealden House, in the county of Sussex; and Newells Park, in Hertfordshire.—Townhouse, in Lower Grosvenor-street.

Arms.—See the annexed Engraving. Motto.—"Mindful and faithful."

Dundas, Baron Dundas.

THOMAS DUNDAS, Baron Dundas, of Ake, in the North Riding of the county of York, and a Baronet; Lord Lieutenant and Vice Admiral of the shires of Orkney and Shetland; F.R.S. and F.A.S. married, May 24, 1754, lady Charlotte Wentworth, sister of William earl Fitzwilliam; and has issue, Lawrence, heir apparent, married to Mrs. Hale, daughter of Mr. Hale; Charles-Lawrence, married lady Caroline Beancler, sister to Aubrey duke of St. Alban's; William, who died in 1796; George-Heneage-Lawrence, a captain in the royal navy; Thomas-Lawrence, in holy orders; Robert-Lawrence, a colonel in the army; Margaret, married to Arch. Spiers, esq. Charlotte, married, July 3, 1773, to Charles Bruce, of Kinnaird, esquire, and died June 17, 1806; Mary, married to John, son of William earl Fitzwilliam; Frances-Laura, married, January 24, 1805, Robert Chaloner, esq. of Guilborough, in Yorkshire; Mary; Isabella.

The family of Dundas is of high antiquity. In 1431, James de Dundas married Euphan, daughter of sir Alexander Bruce, of Kinnaird, esquire. He was created a baronet, November 11, 1625, with limitation to his male issue, and in default thereof, to his brother Thomas. Sir Lawrence married Margaret, daughter of Alexander Bruce, of Kennet, esquire, by Mary Balfour, daughter of lord Burleigh, and died September 24, 1781, leaving issue one son, Thomas, the present lord.

Creation.—Baron Dundas, August 13, 1794.

Residences.—Ake Hall, and Upleatham Park, in the county of York.—Townhouse, in Arlington-street.

Arms.—See the annexed Engraving. Motto.—"Try."

Pellham, Baron Yarborough.

Charles-Anderson Pellham, Baron Yarborough, in the county of Lincoln, D.C.L. born July 3, 1748; took the surname and arms of Pellham, in compliance with the will of his great-uncle, Charles Pellham, of Brockley, in Lincolnshire, married July 25, 1770, Sophia, sole heir of George Aurifche, of Chelsea, in the county of Middlesex, esquire; and by her had issue, Charles-Anderson, heir apparent, married, August 11, 1806, Miss Simpson, daughter of the honourable John-Bridgeman Simpson, son of Henry lord Bradford; Sophia, born September 15, 1774; Sophia, born October 3, 1775, married to Dudley North, esq. of Glenham, Hall.
HOOD, BARON HOOD.
HENRY HOOD, BARON HOOD, of Catherington, in the county of Hampshire, created a peer by George I., and succeeded his brother, the late lord, March 27, 1795.
Residence.—Catherington, near Portsmouth, in Hampshire.
Armoirial Bearings.—See the annexed Engraving.
Motto.—Vincit amor patriae.—“The love of my country predominates.”

STUART, BARON STUART.
FRANCIS STUART, BARON STUART, of Castle Stuart, in the county of Inverness, created a peer by George III., and married, May 28, 1796.—See EARL OF MORAY, among the PEERS OF SCOTLAND.

JOHN CHRISTOPHER BURTON DAWNAY, BARON DAWNAY, of Cowick, in the county of York; created May 28, 1796. His lordship is also Viscount Downe.—See VISCOUNT DOWNE, among the PEERS OF IRELAND.

BRODRICK, BARON BRODRICK.
GEORGE BRODRICK, BARON BRODRICK, of Pepper Harrow, in the county of Surrey; created May 28, 1796, with remainder to the heirs male of his family, George, late viscount Midleton. His lordship is also Viscount Midleton.—See VISCOUNT MIDLETON, among the PEERS OF IRELAND.
Motto.—“Gradus diverso via ana.”—“The same way by different steps.”

BURRELL, BARON GWYDIR.
PETER BURRELL, BARON GWYDIR, of Gwydir, in Caernarvonshire, and a Baronet; Deputy Great Chamberlain of England, F.R.S. married, February 23, 1779, Priscilla, Barbara-Elizabeth-Lindsey, daughter and co-heir of Peregrine duke of Ancaster, and baroness Willoughby de Eresby; by which lady he has issue, Peter-Robert, heir apparent, born March 1782; married, October 20, 1807, Clementia, daughter and heir of James Drummond lord Perth; and by this marriage acquired the property of Cillya, daughter and heir of Alan de Dunstanyille; which Alan married the daughter of Reginald Fitzhenry, earl highest officer in the kingdom at that period. In the time when signed Magna Charta, and married into the Dunstanyille family, took an active part; two of them signed Magna Charta, and married into the Dunstanville family. William Burrell married, in 1150, Cecilia, daughter and heir of Alan de Dunstanville; which Alan married the daughter of Reginald Fitzhenry, earl of Cornwall, and by this marriage acquired the property of Teydih, in that county.

Francis Basset, grandson of lord de Dunstanville, had two sons by his lady, Mary Pendarves, viz. John Pendarves Basset, and Francis, his lordship's father; the former married Anne, daughter of Sir Edmund Prideaux, bart; John died in 1759, left issue; when Francis, the father of the present lord, succeeded to the family estate, and married Margaret, daughter of Sir John St. Aubyn, of Clowance, in the county of Cornwall, bart, who died in 1769, leaving issue, two sons and four daughters, viz. Francis, the present baron; John, who married Miss Mary Wingfield; Margaret, married to John Rogers, esq. of Penrose, in Cornwall; Cecilia; Mary; and Catharine. On his lordship's decease, the barony of De Dunstanville will become extinct, but the barony of Ballet will descend to his daughter, and her issue male.

CREATIONS.—Baron De Dunstanville, June 17, 1796. Baron Ballet, of Stratton, November 7, 1795.

ARMORIAL BEARINGS.—See the annexed Engraving. Motto.—“Pro rege et populo.”—“For king and for people.”

LASCELLES, BARON HAREWOOD.
EDWARD LASCELLES, BARON HAREWOOD, of Harewood, in the county of York; married, in 1761, Miss Chaloner, daughter of William Chaloner, esq. of Guilsborough, in the county of York; by which lady, who died February 22, 1805, he has issue, Edward, heir apparent, born January 10, 1764; Henry, born December 25, 1767; married, in 1794, Henrietta Saunders, daughter of the late Sir John Saunders Sebright, bart. of Beachwood, in Hertfordshire, by whom he has a son, Edmund Lascelles, born June 8, 1790; Francis, born June 1763; married the honourable John Douglas, son of the earl of Morton, by his second wife, Bridget, daughter of Sir John Heathcote, bart. of Normanton, in Rutlandshire, and has issue, Frances, born January 10, 1786; Anne, died an infant; George-Sholto, born December 23, 1789; Charles, born March 10, 1790; Harriet, born June 8, 1792; Charlotte, born July 14, 1793; and Emma-Elizabeth, born October 8, 1794. Mary-Anne, born November 22, 1775.

His lordship is descended from an ancient family in Yorkshire. His father's uncle, Edwin Lascelles, esq. was created baron Barewood in 1790; but dying without male issue, in 1795, the title became extinct. The estate defending to his lordship, he was raised by George III. to the same dignity.

7 L
POWLET, BARON BOLTON.

WILLIAM ORDE POWLET, BARON BOLTON, of Bolton Castle, in the county of York; born October 31, 1782; succeeded his father, the late lord, July 30, 1807.

John Orde, esq., father of Thomas, first lord Bolton, died in 1784, having married, first, Anne, daughter of Edward Ward, of Nunnikirk, in the county of Northumberland; by whom he had issue one son, William Orde, esq., of Morpeth. He married, secondly, Anne, widow of the rev. William Pye, clerk; and by her he had issue, Thomas, first lord Bolton; John, now sir John Orde, bart., knight of the bath, and admiral of the late, and died in 1790, leaving three daughters. Sir John Orde married, first, Margaret, daughter of Stephen, esq., of Beaufort, South Carolina, who died in 1791, leaving no issue. He married, secondly, in December 1793, Jane, eldest daughter of John Freke, esq., of Royden, in the county of Norfolk. Thomas Orde, born August 30, 1748, was created by George III. baron Bolton, of Bolton Castle; and, on the death of Harry Powlet, sixth and last duke of Bolton, in 1794, he assumed the name and arms of Powlet; married, April 7, 1778, Jane-Mary, daughter of Charles, fifth duke of Bolton, and had issue, Mary-Jane, born May 22, 1781; died February 1806. William, the present baron; Anne, died November 1804; Thomas, born October 16, 1787; and Charles, who died August 1806. His lordship, dying July 30, 1807, was succeeded by his son, the present second lord. — The presumptive heir is Thomas, only brother of his lordship.

Creation.—Baron Bolton, October 20, 1797.

Residences.—Backwood Park, in the county of Southampton; and Bolton Hall, in Yorkshire.—Townhouse, in Gloucester-place.

Arms.—See the annexed Engraving.

Motto.—Aimez l'loyauté. — "Love loyalty."

KYNNMOUND, BARON MINTO.

GILBERT-ELLIOT-MURRAY KYNNMOUND, BARON MINTO, in the county of Roxburgh, and a baronet; Governor-General of Bengal, D.C.L. and F.R.S., born April 23, 1751; married, January 3, 1777, Anna, eldest daughter and co-heir of sir Edmund Bacon, bart., father of the present lord Minto, who died in 1784; having married, first, Anne, daughter of Pryce Stephens, esq., of Beaufort, South Carolina, who died in March 1759, he had issue, Ilabella. Gilbert, the present lord Minto. Robert, his majesty's late minister at Dresden, letter of the royal demesnes of the duchy of Lancaster, taking, on his promotion to the bench, the title of Minto, as his father had done. He married Helen Stuart, daughter of sir Robert Stuart, bart. of Allanbank, Berwickshire, by whom he had issue, Eleanor, married to John Rutherford, esq., of Edgerston; Gilbert, who succeeded him; Robert, who died an officer in the royal navy; and four other children, who died young.—The third sir Gilbert Elliot, bart., father of the present lord Minto, married Agnes Murray Kyynymound, heiress of Melgun, in Forfar, and Lochgelly and Kyynymound, in Fife; by which lady he had issue, Habella, the present lord Minto. Hugh, his majesty's late minister at Dresden, letter of the royal demesnes of the duchy of Lancaster, taking, on his promotion to the bench, the title of Minto, as his father had done. He married the late lady Murray, who died in the East Indies. Robert, son of this illustrious family, was one of the chosen knights who attended on the person of Henry V. in his wars in France. From him descended sir Armine Wodehouse, who died in 1784; having married Leticia, eldest daughter and co-heir of sir Edmund Bacon, bart. by which lady, who died in 1790, he had issue, four sons, viz. Edmund, who died in 1755; John, the present baron; Philip, born in May 1745; A. M. prebendary of Norwich, married, July 29, 1775, Apollonia, daughter and co-heir of sir John Neave, of Wood Eaton, in the county of Oxford, and has issue four sons and four daughters; Thomas, born in 1747, a barrister at law; married, September 21, 1769, daughter of Pryce Campbell, esq. of Stackpole Court, in the county of Pembroke; and sister to John lord Cawdor.

Creation.—Baron Minto, October 26, 1797.

Residences.—Kemberley Hall, in the county of Norfolk.—Town-house, in Upper Brook-street.

Arms.—See the annexed Engraving.

Motto.—Suisiet et fortes. — "Mildly, but firmly."

WODEHOUSE, BARON WODEHOUSE.

JOHN WODEHOUSE, BARON WODEHOUSE, of Kimberley, in the county of Norfolk; and a baronet; Recorder of Falmouth; born April 4, 1744; married, in March 1769, Sophia, daughter and heiress of the honourable Charles Berkeley, of Bruton Abbey, in Somersetshire, brother to lord Berkeley, of Stratton, whose titles became extinct in 1773; by which lady he had issue, John, heir apparent, married November 15, 1796, to Miss Norris, only daughter of the late John Norris, esq., of Wilton Park, in Hereford; Philip, captain in the royal navy, born in 1773; Armine, born in 1774; William, born August 4, 1782, in holy orders, married February 11, 1807, the eldest daughter of Thomas Hufley, esq. of Galtrim, in Ireland; Sophia, born December 26, 1769; and Frances, born June 21, 1770.

The great ancestor of this family received knighthood in the reign of Henry I. from whom descended John Wodehouse, who attended Henry V. in his wars in France. From him descended sir Armine Wodehouse, bart., who died May 2, 1777, having married Leticia, eldest daughter and co-heir of sir Edmund Bacon, bart. by which lady, who died in March 1759, he had issue, four sons, viz. Edmund, who died in 1755; John, the present baron; Philip, born in May 1745; A. M. prebendary of Norwich, married, July 29, 1775, Apollonia, daughter and co-heir of sir John Neave, of Wood Eaton, in the county of Oxford, and has issue four sons and four daughters; Thomas, born in 1747, a barrister at law; married, September 21, 1769, daughter of Pryce Campbell, esq. of Stackpole Court, in the county of Pembroke; and sister to John lord Cawdor.

Creation.—Baron Wodehouse, October 26, 1797.

Residences.—Kemberley Hall, in the county of Norfolk.—Town-house, in Upper Brook-street.

Arms.—See the annexed Engraving.

Motto.—Suaviter et fortes. — "Mildly, but firmly."

The Armorial Bearings of this illustrious family, as shown in the annexed Engraving, were given as the reward of valour and prowess in arms. They are: Sable, a chevron or, goutte de sang, (or charged with drops of blood), between three cinquefoiles ermine. Crest.—A dexter hand issuing from clouds proper, holding a club, with the motto over it, Frappe fort. — "Strike home."

Supporters.—Two savages proper, wreathed about the temples and waists with oak-leaves vert; each with a club over his exterior shoulder of the same.

Motto.—On the scroll, AGINCOURT.

The renowned John Wodehouse, above referred to, was one of the chosen knights who attended on the person of Henry V. and, fighting near the royal standard, at Agincourt, performed wonders against the enemy, and acquired immortal renown. The king, for his gallant conduct, granted him the profits issuing out of his manor of Thetford, and made himeward of the royal demesnes of the duchy of Lancaster. And as a perpetual token of his valor, he approved the crest of the hand and club, with its appropriate motto.

The wild man, the ancient crest of the family, won
in the croissades, formed the supports of the valorous knight, in the ever to be remembered battle of Agincourt.—See the article ENGLAND, vol. vi. p. 609.

RUSHOUT, BARON NORTHWICK.

JOHN RUSHOUT, BARON NORTHWICK, of Northwick Park, in the county of Worcester, and a Baronet; F. S. A. succeeded his father, the late lord, October 26, 1800.

The family of Rushout was related to the dukes of Normandy; and before the conquest bore the same arms as the three first kings of that magnaminous race. James Rushout, lineally descended from this stock, was created a baronet by Charles II. and, at the revolution, he raised a regiment in support of King William. He married Milis Pyttts, of Harrow, and left two sons and three daughters, viz. James and John; the daughters were, Alice, who married into the Sandys family; the second daughter married Edmund Pyttts, esq. and the third became the second wife of the fourth Earl of Northampton. Of the sons, James, the eldest, left one son, who died young, his brother John then succeeding; he married Anne Compton, daughter of George, fourth earl of Northampton, and died March 2, 1775, leaving issue John, the late lord, born July 12, 1749; married, June 8, 1766, Rebecca, daughter of Humphry Bowles, of Wanstead, in the county of Essex, esq. and, dying October 26, 1785, was succeeded by his present lord, George Rushout, esq; married, January 10, 1803, Caroline Stewart, daughter to John earl of Galloway, and has a daughter, born October 26, 1803. Anne Henrietta, Elizabeth, born December 6, 1744; married to Sidney Bowles, esq. and had two daughters. His lordship, dying October 29, 1800, was succeeded by his son John, the present lord.—His lordship is the honurable and reverend George Rushout, his lordship's only brother.

Creation.—Baron Northwick, October 26, 1797.

Residences.—Northwick Park, in the county of Worcester; and Harrow-on-the-Hill, in Middlesex.—Town-house, in Cavendish-square.

Armorial Bearings.—See the annexed Engraving.

Motto.—"Parta tua turri. —"I will defend that I have won."
of Ambone Surtees, of Newcastle-upon-Tyne, esquire; by whom he had issue, John, who died December 24, 1805, having married, Augst 22, 1804, Miss Ridley, only daughter of Mr. Matthew-White Ridley, bart. of Blagdon, in the county of Northumberland, and had issue a son, Elizabeth; William-Henry; and Frances. His lordship, on April 14, 1801, constituted lord high chancellor of Great Britain, which office he resigned in February 1806; and to which he was re-appointed in 1817.

His lordship's family have been long seated in the town and county of Newcastle-upon-Tyne; his father, William Scott, esq. was a man of most respectable character; he married, and had issue, 1. Henry, merchant in Newcastle; 2. Sir William, knight, D.C.L. bred to his grand father, William Scott, esq. was a man of most respectable character; he married, and had issue, 1. Henry, merchant in Newcastle; 2. Sir William, knight, D.C.L. bred to his grand father, William Scott, esq. who died in 1753, he had issue, William; John, who died in 1753; John, who died in 1753; and 4. Catharine, who married, April 9, 1787, Jane, daughter and heir of William Littleri-Poynz Meynell, esq. by his wife, Judith, daughter of Thomas Altham, esq. of the island of Barbadoes; by which lady, who died in 1752, he had issue, William; John, who died in the East Indies; Thomas, a lieutenant in the army, died young; Selina, married to Henry Galley, esquire; and Alleyn, the present lord.

C REATION.—Baron Eldon, July 18, 1799.

RESIDENCES.—Newby Park, in the county of York; and Kemmfer, in the county of Northumberland.—Town-house, in Piccadilly.

ARMOI RIALBEARINGS.—See the annexed Engraving.

MOTTO.—Sed fas et labores.'—'Honour without a stain.'

FITZGIEBON, BARON FITZGIEBON.

JOHN FITZGIEBON, BARON FITZGIEBON, of Sidbury, in the county of Devon; and Earl of Clare, Viscounl and Baron Fitzgibbon, in Ireland.—See EARL OF CLARE, among the Peers of Ireland.

MOORE, BARON MOORE.

CHARLES MOORE, BARON MOORE, of Moore Place, in the county of Kent; and Marquis of Drogheda, in Ireland.—See MARQUIS OF DROGHEDA, among the Peers of Ireland.

TOTTENHAM, BARON LOFTUS.

JOHN TOTTENHAM, BARON LOFTUS, of Long Loftus, in the county of York; and Marquis of Ely, in Ireland.—See MARQUIS OF ELY, among the Peers of Ireland.

BUTLER, BARON BUTLER.

WALTER BUTLER, BARON BUTLER, of Lanthony, in the county of Monmouth; and Earl of Ormond and Ossory, in Ireland.—See EARL OF ORMOND AND OSSORY, among the Peers of Ireland.

PROBY, BARON CARYSFORT.

JOHN-JOSHUA PROBY, BARON CARYSFORT, of Norman Crofts, in the county of Huntingdon; and Earl of Carysfort, in Ireland.—See EARL OF CARYSFORT, among the Peers of Ireland.

ARDEN, BARON ALVANLEY.

WILLIAM ARDEN, BARON ALVANLEY, of Alvany, in Cheshire, an officer in the Second Regiment of Foot Guards; succeeded his father, the late lord, March 19, 1804.

Richard, first baron Alvanley, father of the present lord, was son of J. Arden, of Arden, in the county of Chester, esquire; born in 1725; and, being bred to the study of the law, was successively appointed, in 1782, solicitor-general; and in 1784, attorney-general, master of the rolls, and chief justice of the court of Common Pleas; and afterwards advanced to the prerogative.

His lordship married Miss Bootle, daughter of Richard, William Bootle, esq. and had issue, 1. William, the present baron; 2. Richard; 3. Frances; and 4. Catharine. His lordship, dying March 19, 1804, was succeeded by his eldest son, William, the present lord.—The heir presumptive is Richard, brother to his lordship.

C REATION.—Baron Alvanley, May 22, 1801.

RESIDENCES.—Harpenden, near London; and Torporley House, in Cheshire.—Town-house, Great George-street, Westminster.

ARMOI RIALBEARINGS.—See the annexed Engraving.

MOTTO.—Pulat is vinces.—'Conquer by patience.'

FITZHERBERT, BARON ST. HELENS.

ALLEYNE FITZHERBERT, BARON ST. HELENS, in the Isle of Wight, and county of Southampton. His lordship is also Baron St. Helens, in Ireland; a Lord of the King's Bench, a Trustee of the British and Hunterian Museums, Baron St. Helens in Ireland; and a Privy Councillor also there; F.S.A.

William Fitzherbert, of Tissington, in the county of Derby, esquire, his lordship's father, died in 1775, having married Mary, daughter of Littleton-Poynz Meynell, esq. by his wife, Judith, daughter of Thomas Altham, esq. of the island of Barbadoes; by which lady, who died in 1752, he had issue, William; John, who died in the East Indies; Thomas, a lieutenant in the army, died young; Selina, married to Henry Galley, esquire; and Alleyn, the present lord.

C REATION.—Baron St. Helens, July 15, 1801.

RESIDENCES.—Mickudden Place, in the county of Derby.—Town-house, in Old Burlington-street.

ARMOI RIALBEARINGS.—See the annexed Engraving.

MOTTO.—Inteminiatis honoribus.—'Uneptoned honour.'

ELPHINSTONE, BARON KEITH.

GEORGE-KEITH ELPHINSTONE, BARON KEITH, in England, with remainder to his lordship's only daughter; Baron Keith, of Stonehaven, Marischal of Scotland, an Admiral of the Navy, and Peer of the Realm, by the Military Order of the Bath, and of the Crescent; Secretary, Chamberlain, Keeper of the Signet, and Counsellor of State, for Scotland, and for Cornwall, to the Prince of Wales, and Treasurer and Comptroller of the Household to the Duke of Clarence; F.S.A. born in 1747; married, April 9, 1787, Jane, daughter and heir of William Mercer, of Aldie, in the county of Perth; by which lady, who died December 12, 1789, he had issue, Margaret-Mercer, heir apparent, on whom the English barony of Keith is in remainder. His lordship married, secondly, February 4, 1803, Miss Thrale, eldest daughter of the late Henry Thrale, esq.

His lordship is the youngest son of Charles, tenth lord Elphinstone, King of the Keep of Scotland, who married Clementina, only daughter of John Fleming, esquire at Wigtoun; by which lady he had issue, John, eleventh lord Elphinstone; Charles, esquire in the Prince George man of war, in 1758; William Fullarton, a director of the East-India company; George Keith, created, in July 1777, lord Keith, in Ireland; and Earl of Keith, in 1777, William Adam, esq. sergeant at law, and chancellor to the prince of Wales; by whom, who died February 4, 1800, he had issue, Primrose; Charlotte, died July 4, 1801; Clementina, married to James, late lord Perth; by whom she had issue, James, who died young, and Clementina. Charles, lord Keith's father, died in 1725; he had issue, John, the seventh and present lord Elphinstone, who is nephew to lord Keith.

C REATION.—Baron Keith, in England, December 15, 1801.

HUTCHINSON, BARON HUTCHINSON.

JOHN-HELY HUTCHINSON, Lord Hutchinson, Baron of Alexandria, of Knocklofty, in the county of Tipperary, Knight of the Bath, of the county of Southampton; and Ardal, in Kincardine-shire—Town-house, in Harley-street.

He entered into command; and, on the fall of Sir Ralph Abercromby, at an early period into the military service; and in the celebrated battle of Alexandria, the chief com¬mand of the forces in Egypt devolved on his lordship; for particulars of all which see the article EGYPT, vol. vi. p. 335-338.

Creation.—Baron Hutchinson of Alexandria, December 6, 1806.

Residence.—Welbeck-street, London.

Armorial Bearings.—See the annexed Engraving.

Motto.—Fortiter gerit crucem. "He bravely supports the cross."

MITFORD, BARON REDESDALE.

JOHN MITFORD, Baron Redesdale, of Redesdale, in the county of Northumberland; a Privy Councillor in Ireland, F.R.S. and F.S.A. married, June 6, 1803, lady Frances Perceval, daughter of John, second earl of Egmont, by Catharine, baronets of Arden, sister of Spencer, eighth earl of Northampton; and has issue a daughter, born April 10, 1804.

Sir John Mitford, knight, lord of Mitford Castle in the time of William the Conqueror, was ancestor, through his only daughter, of the Bertrams, barons of Mitford; but from his brother Matthew descended the Mitfords from Charles II. From him, in the fifth descent, was married, in 1796, Louisa, daughter of Anthony Wyke, esq. attorney-general of Montserrat; she died June 11, 1784, who had been created a peeress, May 23, 1770, and was married to John first earl of Egmont; by whom she had issue, Charles-George, the present baron; Elizabeth, eldest daughter of the late Sir Thomas-Spencer Wilton, bart., of Charlton, in the county of Kent; by which lady he had issue, Catharine Compton, daughter of Charles Compton, esq. He succeeded to the barony on the death of his mother, June 11, 1784, who had been created a peeress, May 23, 1770, and was married to John first earl of Egmont; by whom she had issue, Charles-George, the present baron; the right honourable Spencer, chancellor of the exchequer, esq. married to Jane, second daughter of the late Sir Thomas-Spencer Wilton, bart. Mary, born July 15, 1785; Helena, born August 27, 1796; Charles-Thomas, born November 20, 1791, died February 17, 1793; John, heir apparent, born April 13, 1795; George-James, born March 15, 1794; Edward, born July 30, 1795; a son, born December 25, 1796; another son, born November 22, 1799.

His lordship is maternally descended from the earl of Northampton, and paternally from the earl of Egmont, to which last earl his lordship is the eldest son, by lady Catharine Compton, daughter of Charles Compton, esq.

Creation.—Baron Redesdale, February 15, 1803.

Residence.—Mitcham, in the county of Surrey.

Armorial Bearings.—See the annexed Engraving.

Motto.—Equabiliter et diligentiter. "Steadily, and diligently."

LAW, BARON ELLENBOROUGH.

EDWARD LAW, Baron Ellenborough, of Ellenborough, in the county of Cumberland; Lord Chief Justice of the King's Bench, an official Trustee of the British Museum, and a Governor of the Charter House; F.S.A., married, in October 1784, Miss Towry, daughter of George-Philipps Towry, esquire; by which lady he has issue, Edward; heir apparent, Charles-Ewan, Mary, John, Elizabeth, and Anne.

The family of Law has been long respectable in the county of Cumberland. His lordship's father, Edmund Law, who was master of the ordnance, married, in 1758, Elizabeth, widow of Peter Wilton, esq., of Ardal, in Kincardine shire; by which lady he had issue, John Edward, born in 1760, and was married to Johnfirst earl of Egmont; by whom he had issue, William; and, February 18, 1801, was chosen Speaker of the house of commons, to which he resigned on being appointed lord chancellor of Ireland.

Creation.—Baron Ellenborough, April 19, 1802.

Residence.—Bloombury-square, London.

Armorial Bearings.—See the annexed Engraving.

Motto.—Compositum jus fugeque animi. "Law and equity."

PERCEVAL, BARON ARDEN.

CHARLES-GEORGE PERCEVAL, Baron Arden, of Arden, in the county of Warwick; also Baron Arden, of Loholt Castle, in the county of Cork; a Lord of the King's Bedchamber, F.R.S. and F.S.A. born October 15, 1766; married, March 11, 1787, Margareta-Elizabeth, eldest daughter of the late Sir Thomas-Spencer Wilton, baronet, of Charlton, in the county of Kent; by which lady he had issue, William, born February 18, 1766, Frances, daughter of James Molley, of Dublin, esquire, and had issue: William, who died in December 1790, unmarried. Bertram, married, May 24, 1806, Frances, daughter of John Vernon, of Clontarf Castle, esquire. Henry, a captain in the royal navy; married, in 1796, Louisa, daughter of Anthony Wyke, esq. attorney-general of Montserrat; he died in May 1803, having had issue, William-Reveley, who died June 14, 1803; Frances, born August 8, 1797; and Louisa, born December 21, 1798. John, born May 25, 1772. Bertram, born October 1, 1774. Charles, born in September 1775. Frances, born June 22, 1768. John, the present baron. Mary, died unmarried. Frances, born in Philadelphia, born in 1772. His lordship was successively nominated solicitor and attorney-general; and, February 18, 1801, was chosen Speaker of the house of commons, to which he resigned on being appointed lord chancellor of Ireland.

Creation.—Baron Redesdale, February 15, 1803.
Thomas Walpole, esq., nephew of Horatio earl of Orford, and has issue a daughter, born October 2, 1804; and a son, born in September 1805.

Creation.—Baron Arden, July 28, 1802.

Residences.—Lohort Castle, in Corkshire, Ireland; and Nook House, in the county of Surrey.—Townhouse, in Bruton-street.

Armorial Bearings.—See the annexed Engraving.

Motto.—Sub urce candida.—"Under the white crofs."

HOLROYD, BARON SHEFFIELD.

JOHN-BAKER HOLROYD, BARON SHEFFIELD, of Sheffield, in the county of York; also Lord Sheffield, Baron of Dunamore, in the county of Meath; and Lord Sheffield, Baron of Roscommon, in Ireland, with remainder, in failure of issue male, severally to his daughters, and their issue male; F.R.S. and F.S.A. married, first, in 1797, Abigail, daughter of Louis Wey, esq., by which lady, who died April 3, 1793, he had issue, John, William, who died young; Maria-Josepha, married to Sir Thomas Stanley, bart. of Alderley, in Cheshire, and has issue, Maria-Margaret, Lucy, Louisa, and Isabella; Louisa-Dorothea, married, March 14, 1797; and has issue, Cuthbert, the present lord; Wilford, in the royal county of Northumberland, Vice-admiral of the Red; born in 1750; married, Patience, daughter and co-heir of Erazinus Blackett, esq., alderman of Newcastle-upon-Tyne; and has issue, Sarah, born in 1793; and Mary—Patience, born in 1792.

His lordship is descended from Sir Cuthbert Collingwood, Baron Sheffield, Equestrian of the Red, and was, September 4, 1781, created a baronet; in 1778, comptroller of the navy; and 1805, first lord of the admiralty, which office he resigned February 4, 1806.

Creation.—Baron Sheffield, July 29, 1802.

Residences.—Greave Hall, in Yorksire; and Sheffield Place, in the county of Suffolk.—Town-house in Prinvy Garden.

Armorial Bearings.—See the annexed Engraving.

Motto.—Quem ten Deus effe sujicit.—"Be what God commands you to be."

CREWE, BARON CREWE.

JOHN CREWE, BARON CREWE, of Crewe, in the county palatine of Chester; married, in 1755, Frances-Anne, daughter of Fulke Greville, esq. only son of the honourable Algernon Greville, second son of Fulke Greville, fifth lord Brooke, by Mary, daughter and co-heir of lord Arthur Somerset, fifth son of Henry duke of Beaufort; and has issue, John, heir apparent, a colonel in the army; married, May 5, 1807, Misses Hungerford, of Calne, in the county of Wilts; and Emma. His lordship is descended from an ancient family long seated in the county of Cheshire. John Crewe, his lordship's father, dying in 1752, left issue by his wife, the daughter of Richard Shuttleworth, esq., of Gofworth, in Lancashire; John, the present lord; Richard; a daughter, married to Dr. John Hinchlife, late lord bishop of Peterborough; and Emma. John Crewe, his lordship's father, married, in December 1776, to lieutenant-general John-Tadwell Watson, colonel of the 8th royal veteran battalion; and has issue.

Creation.—Baron Crewe, February 25, 1806.

Residences.—Crewe Hall, near Nantwich, in Cheshire.—Town-house, in Grosvenor-square.

LYGON, BARON BEAUCHAMP.

The family of Lygon is of great antiquity in the county of Worcestershire. In the reign of Henry VII, they derived additional honours by the marriage of Richard Lygon, esq. with Anne, daughter and co-heir of Richard Beauchamp, lord Beauchamp, of Povyke. From this union descended Reginald Lygon, esq. father of the present peer, who died December 25, 1789. He married Susan, daughter of William Hamer, of Bettisfield, in the county of Flint, esquire; by which lady, who died in 1755, he had issue, 1. William, the present lord; 2. Elizabeth, who married the honourable John Yorke, fourth son of Philip, first earl of Haidwicke, and left issue an only child, Jemima, born June 5, 1763, married, November 18, 1784, the right honourable Reginald Pole Carew, of Cornwall, and died July 16, 1804, leaving issue, Charlotte-Jemima; Jemima; Joseph; Elizabeth; Harriet; Agneta; and Amabel.

Creation.—Baron Beauchamp, February 25, 1806.

Residences.—Madresfield Court, in the county of Worcestershire.

Armorial Bearings.—See the annexed Engraving.

Motto.—Ex fide foris.—"Strong through faith."

PONSONBY, BARON PONSONBY.

JOHN PONSONBY, BARON PONSONBY, of Imokilly, in the county of Cork, in the United Kingdom of Great Britain and Ireland; succeeded his father, the late lord, November 5, 1806; married, January 13, 1803, lady Elizabeth-Frances Villiers, sixth daughter of George fourth earl of Jersey.

His lordship's grandfather, John Ponsonby, second son of Brabazon earl of Beaufort, in Ireland, and baron Ponsonby, of Syonby, in England, born in March 1713, was chosen speaker of the house of commons, and several times one of the justices of thepeace. He married, September 22, 1743, lady Elizabeth Cavendish, second daughter of William, third duke of Devonshire, and died December 12, 1789, leaving issue, 1. William-Brabazon, late lord Ponsonby, of Imokilly. 2. John, who died in 1761. 3. George, appointed lord chancellor of Ireland, March 25, 1806; and married lady Mary Butler, eldest daughter of Brinley, second earl of Llandough. 4. Richard, died young. 5. Frederic, died July 28, 1769. 6. Catharine, born April 29, 1747; married to Richard Boyle, earl of Shannon. 7. Frances, born February 18, 1757; married to Cornelius O'Callaghan, viscount Lismore. 8. Caroline, died in 1768. 9. Charlotte, born December 22, 1761; married to Dennis-Bowes Daly, esq. 10. Henrietta, born March 12, 1765. William Brabazon, the eldest son, and third baron, married, December 25, 1766, the honourable Louisa Molesworth, fourth daughter of Richard, third viscount Molesworth, and had issue, 1. John, the present lord; 2. Richard, in holy orders; 3. George, married, April 7, 1787, the eldest daughter of John-Jacob Gledstanes, of Abbeytown, Tipperary. 4. Frederic-Cavendish, a major in the 23d regiment of dragoons; married, January 20, 1807, the honourable Miss Fitzroy, sister to lord Southampton. Mary-Elizabeth, married, November 10, 1794, Charles earl Grey, and has issue. His lordship, dying November 5, 1806, was succeeded by his eldest son, John, the present...
HERALDRY.

1. Robert,紧迫 May 3, 1775; he married, secondly, September 23, 1784, George Clayton, of Longsuck Hall, in Lancashire, esquire, and has issue, George, born November 9, 1787; Frances, born July 29, 1783; William, born June 17, 1790; and Elizabeth, born October 15, 1792.

2. Creation.—Baron Gardner, of Uttoxeter, in the county of Stafford, November 15, 1806.

3. Residences.—Uttoxeter, in Staffordshire; Townhouse, in Cornwall Place.

Motto.—See the annexed Engraving. 

GAMBIER, BARON GAMBIER.

James Gambier, Baron Gambier, of Iver, in the county of Buckingham; Admiral of the Blue, a Lord Commissioner of the Admiralty; born October 13, 1753; married Louisa, second daughter of Daniel Matthew, esquire of Felix Hall, in the county of Essex, and has no issue.

His lordship is descended from a very ancient and numerous family; of Norman extraction. Nicholas Gambier, his great-grandfather, settled in England in 1690. He had two sons: James, born in 1692, and Henry, born in 1694. James, who was a barrister, married Miss Mary Mead, by whom he had issue, Susan, who married the late Sir Samuel Cornth, bart; John; James; Samuel; Robert; and Margaret, who married Charles lord Barham; and several other children, who, as well as Samuel and Robert, died without issue. Henry, who was a lieutenant-general, married Deborah Stiles, of the island of Bermuda, by whom he had issue, Samuel, a commissioner of his majesty's navy, who married Jane, fourth daughter of the aforementioned Daniel Matthew, esquire of Felix Hall, by whom he had issue, Susan, who married the late Sir Samuel Cornth, bart; John; James; Samuel; Robert; and Margaret, who married Charles baron Barham; and several other children, who, as well as Samuel and Robert, died without issue.

His lordship is descended from a very ancient and numerous family; of Norman extraction. Nicholas Gambier, his great-grandfather, settled in England in 1690. He had two sons: James, born in 1692, and Henry, born in 1694. James, who was a barrister, married Miss Mary Mead, by whom he had issue, Susan, who married the late Sir Samuel Cornth, bart; John; James; Samuel; Robert; and Margaret, who married Charles lord Barham; and several other children, who, as well as Samuel and Robert, died without issue. Henry, who was a lieutenant-general, married Deborah Stiles, of the island of Bermuda, by whom he had issue, Susan, who married the late Sir Samuel Cornth, bart; John; James; Samuel; Robert; and Margaret, who married Charles lord Barham; and several other children, who, as well as Samuel and Robert, died without issue. Henry, who was a lieutenant-general, married Deborah Stiles, of the island of Bermuda, by whom he had issue, Susan, who married the late Sir Samuel Cornth, bart; John; James; Samuel; Robert; and Margaret, who married Charles lord Barham; and several other children, who, as well as Samuel and Robert, died without issue. DE ROS, BARONESS DE ROS.

CHARLOTTE-FITZGERALD DE ROS, BARONESS DE ROS, co-heir of Frances, lady Willoughby, of Parham, daughter of John-Manners, fourth earl of Rutland. Her ladyship married, August 4, 1791, lord Henry Fitzgerald, third son of James duke of Leinster, and has issue: 1. Charlotte-Fitzgerald de Ros, born January 9, 1793, married, July 17, 1759, Charlotte, daughter and co-heir of sir Charles Hanbury Williams, by lady Frances Coonghyng, and had issue; 2. Richard-Barrett, esq., born March 6, 1763; married, September 22, 1782; and Olivia-Cecilia, born January 12, 1787.

BRAND, BARONESS DACRE.

GERTRUDE BRAND, BARONESS Dacre; born August 15, 1790; succeeded her brother, Charles-Trevor Roper, late lord Dacre, July 4, 1794; he dying without issue, and it being a barony in fee, defecded to her ladyship, who married, April 10, 1771, Thomas Brand, esq. of the Hoo, in Hertfordshire; by whom, who died February 21, 1794, she had issue, Gertrude, born October 25, 1772; Thomas, born March 15, 1774; Henry, born July 27, 1777; a captain in the second regiment of guards; married, July 21, 1806, Pyne, eldest daughter of the honourable Maurice Crofby, dean of Limerick, and brother of William earl of Glandore.

Thomas lord Dacre was, by Charles II. created earl of Suffolk; which title, on his decease without issue male, became extinct. He married lady Anne Fitzroy, daughter of Barbara countess of Castlemain, afterwards duchess of Cleveland; and by her had two sons, Charles and Henry, who died young; and two daughters, Barbara and Anne, who became his heirs. Lady Barbara married lieutenant-general Charles Skelton; but dying without issue, in 1741, lady Anne became sole heir to her father, and therefore became baroness and barony having been till then in abeyance between the two fathers. She married, first, Richard-Barrett Lennard, esq. and by him had issue a posthumous son, named Thomas, who succeeded to the title on the death of his mother. She married, secondly, Henry Roper, eighth lord Teynham, and thirdly, Robert, son of Henry Moore, third earl of Drogheda. By her marriage with the eighth lord Teynham, she became his third wife; and by him had two sons, and one daughter, viz. 1. Charles, born May 28, 1724; married Gertrude, sister and co-heir of John Trevor, esq. of Glynd, in the county of Suffolk; and had two sons, Charles-Trevor Roper, the late lord Dacre, who succeeded to that title on the death of the former lord, January 12, 1786, and other children. On the death of her husband, she remarried, in October 1797, with Fulke Greville, brother to the earl of Warwick and Brooke, by whom she had issue; 2. Edmund-Emilius, born October 12, 1797; John-Frederick, born March 16, 1788; Richard, born in 1762, died October 13, 1788, and Charlotte-Georgiana-Elizabeth, her ladyship's eldest son; who by creation, March 1736, died unmarried; and Gertrude, who married Thomas-Wallop, esq. of the Hoo, in Hertfordshire, and is the present baroness Dacre. 3. George-Benjamin, born September 3, 1722; died young. 3. Richard-Henry, married, first, to Miss Chetwynd; and, after her decease, to Miss Mary Tennison, and had issue. 4. Anne. The heir apparent is Thomas, her ladyship's eldest son, who, from the early date of creation, November 5, 1797, will take precedence of all the English barons, as high as baron Grey of Ruthyn, whose date of creation is 1322.

ARMORIAL BEARINGS.—See the annexed Engraving.

BURRELL, BARONESS WILLOUGHBY DE ERESBY.

PRISCILLA - BARBARA - ELIZABETH BURRELL, BARONESS WILLOUGHBY DE ERESBY, born February 16, 1761; married February 23, 1779, sir Peter Burrell, bart. of Beckenham, in the county of Kent, now lord Gwydir; by whom she has issue, Peter-Robert, born in March 1782; married October 20, 1797, the honourable Mifs Daniels and Isabella-Suzannah countess of Beverley; 2. Henrietta-Mabel, born June 14, 1745; married March 2, 1773, Mary, only daughter and heir of sir Thomas Fludyer, knight, and had issue; 3. Richard-Henry, married, first, to Miss Chetwynd; and, after her decease, to Miss Mary Tennison, and had issue. 4. Anne. The heir apparent is Thomas, her ladyship's eldest son, who, from the early date of creation, November 5, 1797, will take precedence of all the English barons, as high as baron Grey of Ruthyn, whose date of creation is 1322.

ARMORIAL BEARINGS.—See the annexed Engraving.

CAMPBELL, BARONESS LUCAS.

AMABELLA - HUME CAMPBELL, BARONESS LUCAS; born January 12, 1713; succeeded her mother, Jemima de Courcey, marquis of Exeter, lord Gwydir. Her ladyship married, July 16, 1752, Alexander lord Poole, only son of Hugh, third and last earl of Marchmont, created lord Hume, of Berwick, in 1776, who died March 27, 1791, without issue, when that title became extinct.
The heir presumptive is lord Grantham, who, on his succession, from the date of creation, May 7, 1663, will take precedence immediately before baron Clifford.—See Baron Grantham, p. 568.

Residence.—Westr Houfe, in the county of Bedford.

Armorial Bearings.—See the annexed Engraving.

CURZON, BARONESS HOWE.

SOPHIA CHARLOTTE CURZON, BARONESS HOWE, of Langor, in Nottinghamshire, a dignity granted her father, Richard, the late earl, with remainder to his daughters, in June 1788. She succeeded to the barony on his death, August 15, 1793, was born February 19, 1762; married, July 31, 1787, Pennafeton Curzon, baronet, eldest son of the late lord Curzon, nephew to lord Scarfiled, who died in 1757; and by his wife, the present baronets, has issue, George-Augustus-William, born May 14, 1786; married, July 31, 1787, Miss Leigh, eldest daughter of Egerton Leigh, of High Chetwynd Blundell, coheir of Montague viscount Blundell and baron of Edenderry.

From this illustrious family proceeded the barons of the Vine, now extinct: and the lords Sandys of Omberley, which became extinct on the death of Edwin lord Sandys, in 1796; but was revived in his niece, Mary Sandys, marchioness of Downshire, the peerage, the valour of her gallant husband was recorded to distant posterity, by an honourable augmentation, assigned by his majesty George III. to their coat of arms. Embattlements issuant in chief a dexter arm embawed in armour proper, garnisshed or, encircled by a wreath of sinifter, intended to represent those (styled by the French « The invincible standard.» In base the arms of Abercromby, the motto, ut vivas; « Live, that you may live.» See the annexed Engraving. —Residence, Lambeth Palace, Surrey.

LENNOX (CHARLES), DUKE OF LENNOX, in Scotland, Richmond in England, and Aubigny in France; Earl of March and Darley.—See DUKE of RICHMOND among the Peers of ENGLAND.

GORDON (ALEXANDER), DUKE of GORDON, Marquis and Earl of Huntly, and Earl of Enzie, Baron Gordon of Strathbogie, in Scotland; and Earl of Northwich, and Baron Gordon of Huntly, Glouceftershire, in England; Knight of the Thistle, Keeper of the Great Seal of Scotland; Chancellor of King's College Aber- deen; Lord Lieutenant of Aberdeenhire, and hereditary Keeper of Inverness Castle; succeeded his father, the late duke, in August 1752; married, October 18, 1767, Jane, daughter of Sir William Maxwell, bart, by whom he has issue, George, marquis of Huntly, heir apparent, born
born February 2, 1770; summoned to the House of Lords, April 11, 1797, as Baron Gordon, of Huntley, in Glengarry, a greater general in the army, and colonel of the 43d regiment of foot. Charlotte, married, September 28, 1782, to Lieutenant-General Lennox, now Duke of Richmond. Madelina, married, first, April 3, 1789, Sir Richard Sinclair, bart. and has issue; and, secondly, November 25, 1789, Charles Palmer, esq. of Luckley, near Hastings, Norfolk. George, third, May 8, 1775, William Duke of Mancheffer, and has issue. Louisa, married, April 17, 1797, Charles Marquis Cornwallis, and has issue. Georgiana, married, June 23, 1803, John Duke of Bedford. Alexander, born November 3, 1785, a captain in the 53d regiment of foot. The family of Gordon is descended from Adam de Gordon, and distinguished himself in the reign of King Malcolm Canmore, by slaying and destroying a huge wild boar, which then ravaged the borders of Scotland; for at that period the wild boar was common in England and Scotland. This enterprise was considered almost as important and meritorious as the destruction of the famous Calydonian boar by Meleager; and in consequence of this exploit, Adam de Gordon painted upon his shield three boars' heads, which have ever since been borne by the family, and occupy the first quarter in the coat of arms of the Duke of Gordon.

The pedigree of this illustrious family is coeval with the Norman kings, and has perpetuated its offspring, the grands, earls, and marquises of Huntley; and in consequence of this exploit, Adam de Gordon painted upon his shield three boars' heads, which have ever since been borne by the family, and occupy the first quarter in the coat of arms of the Duke of Gordon.

of great celebrity, in the kingdom of Scotland. Sir William Douglas was created, by Malcolm III. king of Scotland, in 1061, baron Douglas. William, lord Douglas, his descendant, was created by David II. 1356, earl of Douglas; and had issue, 1. William, second earl of Douglas. 2. George, who married Margaret, daughter of John Stuart, earl of Angus; and in whose right he Successor was created, by Charles I. in 1633, marquis of Douglas, and is ancestor to the present duke of Hamilton.

William, earl of Douglas, descended from the elder branch, married Margaret, daughter of Donald earl of Moray, whose right he succeeded to that title. James, his descendant, was created by Charles I. in 1633, marquis of Douglas, and is ancestor to the present duke of Hamilton.

William, grandson of William, younger son of James earl of Douglas, was killed in the defence of James III. in the action of Kincardie, July 22, 1485. William, his grandson, was killed in the famous battle of Flodden Field, September 9, 1513. William, his grandson, distinguished himself against Mary queen of Scots, at the battle of Langside, May 13, 1568.

The earl of Douglas, his father, was killed at the battle of Otterburn, July 31, 1388.

James, second earl of Queenberry, his son, suffered considerably for his loyalty to the house of Stuart, in the ensuing civil wars.

Charles, third earl of Queenberry, his son, was constituted by Charles II. June 1, 1660, lord justice general of the kingdom of Scotland; and created, February 11, 1683, baron Douglas of Kinmound, Middletby, and Donneick, viscount of Nith, Tortherald and Ros, earl of Drumlanrig and Sanguchar, and marquis of Queenberry. He exchanged, May 12, in that year, the office of lord justice general, for that of lord high treasurer of Scotland, and was farther created, November 3, 1688, marquis of Dumfries, and duke of Queenberry. By James II. he was appointed, in May 1685, lord high commissioner to the Scottish parliament; and in February 1686, lord president of the privy council of that kingdom. He died March 23, 1695, leaving issue, James, second duke of Queenberry; and William, second duke of Queenberry.

James, second duke of Queenberry, entered early into the patriotic measures of the revolution; and was constituted by king William III. in 1695, lord keeper of the privy seal of the kingdom of Scotland; and was twice his majesty's lord high commissioner to the Scottish parliament. Upon the accession of Queen Anne, he exchanged, May 8, 1702, the office of lord keeper of the privy seal, for that of secretary of state for the kingdom of Scotland; and was twice her majesty's lord high commissioner to the Scottish parliament. In 1704, he resigned all his employments, and was again constituted, in 1705, lord keeper of the privy seal for the kingdom of Scotland. He was declared, May 6, 1706, lord high commissioner to the parliament, by which the union between the two kingdoms was ratified and enacted; and for which services he was created, May 26, 1708, baron of Rippon in the county of York, marquis of Beverley in that county, and duke of Dover in the county of Kent. He exchanged, February 3, 1710, the office of lord keeper of the privy seal, for that of secretary of state for the kingdom of Scotland, and died July 6, 1712.

Charles, third duke of Queenberry, his son, was created by queen Anne, in 1706, earl of Salway, and was constituted, by George III. June 23, 1761, lord keeper of the privy seal of the kingdom of Scotland; which office he exchanged, April 16, 1763, for that of lord justice general of that kingdom. He married Catharine, second daughter of Henry Hyde, earl of Rochester; and, together with his amiable dwch, attached himself to the encouragement and protection of literature, and was the patron of Gay, and other literary characters. Her grace died in 1777, leaving issue two sons, and a daughter, viz. Henry, earl of Drumlanrig, born October 30, 1721; married, Elizabeth, daughter of John earl of Hopetoun and was killed by the accidental going off of his pifol, in his journey from Scotland to London, October 20, 1754; and his lady died in April 1756, without issue. Charles, who succeeded as earl of Drumlanrig, died in October 1756, unmarried. Catharine, died young.

His grace dying without male issue, October 22, 1778, was succeeded by his eldest son, William, first duke of Queenberry, as follows: William, second son of William, first duke, created earl of March, second son of William, first duke, created earl of March, married Jane Hay, daughter of John, first marquis of Tweedale, and left a daughter, Isabella, who died, unmarried, in April 1791; and a son, William, his heir, who married Anne Hamilton, daughter of John earl of Selkirk and Ruglane, and by her, who, in 1746, married, secondly, Anthony Sawyer, esq. had issue, James, the present duke; and three daughters, Isabella, Mary, and Jane. Charles, the third and last duke, dying, was succeeded by James, the third and last earl, and first marquis of Drumlanrig, who married Margaret, daughter of Robert, earl of Queenberry.—The heir presumptive is Sir Charles Douglas, bart. to the earldom of Queenberry, and barony of Hawick; but the dukedom will become extinct.

CAMPBELL (GEORGE-WILLIAM), Duke, Marquis, and Earl of ARGYLL, Marquis of Lorn and Kintyre, Earl of Campbell and Cowal, Viscount Lockhow and Glenilla, Lord of Inverary, Mull, Morven, and Tyrie; and Baron Sandrige and Hamilton, in England: Hereditary Master of the King's Household, Admiral of the Western Isles, Keeper of Dunoon Castle, and of Dun lainnage and Carric, and Hereditary Sheriff of Argyll; born September 23, 1706, succeeded his father, the late duke, May 24, 1806.

The ancient and noble family of Campbell is descended from Diarmed O'Dwbin, lord of Lochow, who lived in the reign of king Fergus I. of Lorn. Iar O'Dwbin was lord treasurer of Scotland; and Gillespie, his son, in law, changed his surname of O'Dwbin to Campbell, in the reign of king Malcolm Canmore. Sir Colin More, fifth in descent from Gillespie, adhered to the party of Robert Bruce in his contest for the crown of Scotland, and was killed in a conflict with Argusdon, lord of Lorn, which occasioned an unceasing feud between their families. He had issue, 1. Sir Neil. 2. Donald, ancestor of Robert Campbell earl of Loudoun, and Hugh Campbell earl Marchmont of the kingdom of Scotland.

Sir Neil signalised himself in the party of king Robert Bruce; and married Mary, sister of that monarch, by whom he had issue, 1. Sir Colin, ancestor of John earl of Breadalbane, of the kingdom of Scotland. Colin, second lord Campbell, was created by James II. in 1457, earl of the county of Argyll.
Argyll, and constituted, in 1664, master of the household to James III. He was farther promoted, in 1674, to the lord high chancellor of Scotland, and married Isabella, daughter of John Stuart, 1st Stuart, lord Lorn; in right of which marriage he assumed the title of Lorn, and died in 1693.

Archibald, second earl of Argyll, the issue of the above marriage, was constituted by James IV. in 1685, lord high chancellor of Scotland; and in 1692, created earl of Cowal. He died in 1705.

Archibald, third earl of Argyll, his son, was created by James V. in 1514, lord justiciary general of the kingdom of Scotland; and in 1529, heritable master of his majesty's household. He died in 1547, and was one of the earliest converts to the Protestant religion.

He had issue, 1. Archibald, fifth earl of Argyll, who was a zealous promoter of the reformation, and was deeply engaged in the political and religious transactions of that period. He entered into the cabinet of Stirling, in 1555, in consequence of which he was attainted by the Scottish parliament; but in the midst of the subsequent disorders he became reconciled to queen Mary, and commanded in chief on her behalf at the battle of Langside, May 15, 1568. He was constituted by James VI. January 17, 1574, lord high chancellor of Scotland; and married Jane, natural daughter of James V. He died September 12, 1575.

2. Colin, sixth earl of Argyll, who was constituted by James VI. April 16, 1579, lord high chancellor of Scotland; and died in 1584.

Archibald, seventh earl of Argyll, his son, commanded in chief at the battle of Glenlivet, in 1594; and distinguished himself in the suppression of the subsequent interregnum, as well as in the Spanish service against the States General. He disinterestedly surrendered to the crown, in 1625, the office of heritable lord justiciary general of the kingdom of Scotland. He had issue, 1. Archibald, eighth earl of Argyll. 2. James, who was created by James VI. in 1622, baron Kintyre, and by Charles I. March 28, 1624, baron Lundie, and earl of Irvine, which titles became extinct at his death.

Archibald, eighth earl of Argyll, was the great leader of the Scozzish covenanters, in 1639; and was created, by Charles I. November 15, 1641, marquis of Argyll. He in 1642, married to Isabella, natural daughter of James V. He died September 28, 1642, after having been mortally wounded at the battle of Drumoile, in 1642.

Archibald, seveth earl of Argyll, his son, commanded in chief, in 1642, and in 1644, distinguished himself at the battle of Pikney, September 10, 1645; and was one of the earliest converts to the Protestant religion.

He had issue, 1. Archibald, ninth earl of Argyll, was the great leader of the Covenanters, in 1681, baron Inverary, Mull, Morven, and Tyriell; viscount Lochow and Glenilla, earl of Campbell and Cowal, marquis of Lorn and Kintyre, and duke of Argyll. He died September 28, 1693, leaving issue, 1. John, second duke of Argyll. 2. Archibald, third duke of Argyll.

2. John, second duke of Argyll, bravely distinguished himself in the wars of queen Anne, with John duke of Marlborough; and was appointed by the queen, in 1705, lord high commissioner to the parliament of Scotland; and was one of the most considerable supporters of the act of union in 1707; and was constituted, in January 1714, ambassador extraordinary and minister plenipotentiary to Charles III. titular king of Spain, and commander in chief of her majesty's forces in that kingdom. He was again created, in June 1715, to the office of lord high commissioner in chief of her majesty's forces in the kingdom of Scotland; and was extremely active in suppressing the rebellion of the year 1715. He resigned all his employments in June 1718; and was farther declared, in February 1719, lord steward of the household to George I. and created, April 30, in that year, duke of Greenwich in the county of Kent. He exchanged, June 3, 1725, the office of lord steward for that of master general of the office of ordnance; which employment he resigned in May 1730.

2. John, fourth duke of Argyll, brother to John, the second duke, was created by queen Anne, October 29, 1706, baron Ormby, Dunoon, and Arros; viscount Hay, and earl of Hay, of the kingdom of Scotland. He was constituted, in 1710, lord justiciary general of the kingdom of Scotland for life; and in 1744, lord clerk registrar of that kingdom, which office he resigned in 1716. He was further constituted, in 1721, lord keeper of the privy seal of the kingdom of Scotland; and exchanged that office, in 1733, for the place of master general of the office of ordnance; which employment he resigned in May 1730.

2. John, fifth duke, born in 1726, a field-marshal in the army, and constable of the third regiment of foot guards.
guards, married, March 3, 1759, Elizabeth, second daughter of John Gunning, esq. by Bridget Bourke, daughter of John vicount Mayo; her grace was created baroness Hamilton, May 14, 1776; by which lady, who died during the life-time of his grace, he had issue, George, who died an infant. George-William, the present duke. John-Douglas-Henry, born December 21, 1777; married, January 24, 1802, Miss Campbell, daughter of William Campbell, esq. of Fairfield. August, born March 31, 1760; married Captain Clavering, son of the late Sir John Clavering, K. B. and has issue, Charlotte-Susan-Maria, born June 21, 1775; married, January 1804, Miss Campbell, daughter of Patrick, 3. Mungo, who married Agnes, daughter of Sir Andrew Murray of Balvaird, and niece to David, first lord vicount Stormont; in consequence of which marriage he succeeded as heir of entail to the title of lord vicount Stormont. Upon his death the title reverted, first to James Murray earl of Annandale, and afterwards to the descendants of a first cousin of David first lord vicount Stormont, in which line it still remains.

William, second earl of Tullibardine, during the life-time of his father, was particularly instrumental infavoring the life of James VI. in the tumult of the conspiracy of the earl of Gowrie, August 5, 1600. He married Dorothea, daughter and heir of John Stuart, earl of Bute, and to the earl of Mansfield. William, son of the first earl of Athol, was created, February 17, 1670, to John, his only son. James, fourth earl of Tullibardine, son of Patrick third earl of Tullibardine, suffered death in 1646, in the eighteenth year of his age, for his loyalty to Charles I. and William, fifth earl of Tullibardine, his brother, died without issue, January 26, 1670; upon which event the title reverted to John second earl of Athol.

John, first earl of Athol of the family of Murray, adhered to Charles I. upon the rupture in 1629; and his death, in 1642, was regarded as a great loss to the royal cause. John, second earl of Athol, and fifth earl of Tullibardine, displayed an unshaken attachment to the royal cause during the predominance of the commonwealth; and was constituted, in 1663, lord justice general of the kingdom of Scotland; to which office he added, in 1674, that of lord privy seal of the same kingdom. By Charles II. he was created, February 17, 1670, marquis of Athol. He attached himself to the duke of Lauderdale, principal secretary of state for the kingdom of Scotland, in 1663; and was constituted, in 1663, lord justice general of the kingdom of Scotland; to which office he added, in 1674, that of lord privy seal of the same kingdom. By Charles II. he was created, February 17, 1670, marquis of Athol. He attached himself to the duke of Lauderdale, principal secretary of state for the kingdom of Scotland, and in his arbitration brought three thousand men against the insurrection of the western counties; but upon his arrival, finding the country perfectly quiet, he changed his plan, and immediately set out for the court of London, to represent the improper conduct of the duke. He was principally concerned in suppressing the invasion of Archibald, ninth earl of Argyll, in 1685; which nobleman was thereupon beheaded upon a sentence that had unjustly been obtained against him four years before. He resigned the office of lord justice general in 1674, and that of lord privy seal at the era of the revolution. He married Amelia Sophia, daughter of James seventh earl of Derby; by which lady he had issue, 1. John, second marquis of Athol. 2. Charles, created by James II. August 16, 1686, earl of Dummore, in the county of Perth. 3. William, who married Margaret, daughter and heir of Robert lord Nairn; in consequence of which marriage he succeeded to the title, and took the surname of Nairn. 4. Mungo, who died in the expedition to the islemans of Faroe, in 1677. The marquis of Athol died May 6, 1693.
John, second marquis of Athol, was among the first who declared in favour of William III. and was constituted, during the life-time of his father, in 1666, joint secretary of state for the kingdom of Scotland, and in the following year lord high commissioner to the parliament of Scotland; soon after which he resigned his employ- ment. Upon his father's death, July 27, 1707, he was constituted, upon the accession of queen Anne, lord keeper of the privy seal, for that of lord keeper of the great seal, and the title of baron Strange, in the kingdom of Scotland; and was admitted, March 14, 1737, in right of the privy seal for the kingdom of Scotland; by which lady he had issue, John, third duke of Athol; and was constituted, in 1780, governor of Fort Tullibardine, who took part in the rebellion of 1715, and invaded the kingdom of Scotland with a body of Spanish forces, with which he was defeated at the battle of Glenfield, June 10, 1719. Being taken prisoner after this battle of Culloden, April 16, 1746, he died in the Tower of London in the following year.

James, second duke of Athol. 4. Charles, who was taken prisoner at the battle of Preston Pans, and died a few years after. 5. George, lord Murray, who married Emilia, daughter and heir of John Murray, of Strowan and Glencarle, in the kingdom of Scotland, esquire; by which lady he had issue, John, third duke of Athol; and secondly, Charlotte, baronesse Strange of Knockyn; and secon- dly, in 1749, Jane, daughter of John Drummond, of Megginch, in the kingdom of Scotland, esquire; which lady married secondly Adam, son of Alexander fourth duke of Gordon. He died January 8, 1764, without male issue, and was succeeded by his son Charles, second duke of Athol, born December 5, 1757; and died April 1770.

James, son of the late duke of Athol, as stated was admitted, March 14, 1737, in right of his grandmother, to the office of lord of Man and the Isles, and the title of baron Strange of Knockyn, in the county of Salop. He exchanged the office of lord keeper of the privy seal for the kingdom of Scotland; April 16, 1765. He married, first, Jane, daughter of sir John Frederic of the county of Salop. He exchanged the office of lord keeper of the privy seal for the kingdom of Scotland; by which lady he had issue, John, third duke of Athol; and George, lord George Murray died October 15, 1750.

6. Susan, married to William Gordon, second earl of Aberdeen of the Kingdom of Scotland. 7. Mary, married to James Ogilvie, sixth earl of Findlater of the kingdom of Scotland. The duke of Athol died November 14, 1744.

James, second duke of Athol, was constituted, in 1733, lord keeper of the privy seal for the kingdom of Scotland; and was admitted, March 14, 1737, in right of his grandmother, to the office of lord of Man and the Isles, and the title of baron Strange of Knockyn, in the county of Salop. He exchanged the office of lord keeper of the privy seal, for that of lord keeper of the great seal, for the kingdom of Scotland, April 16, 1765. He married, first, Jane, daughter of sir John Frederic of the county of Salop. He exchanged the office of lord keeper of the privy seal for the kingdom of Scotland; by which lady he had issue, John, third duke of Athol; and secondly, in 1749, Jane, daughter of John Drummond, of Megginch, in the kingdom of Scotland, esquire; which lady married secondly Adam, son of Alexander fourth duke of Gordon. He died January 8, 1764, without male issue, and was succeeded by his son Charles, second duke of Athol, born December 5, 1757; and died April 1770.

James, second duke of Athol, was constituted, in 1733, lord keeper of the privy seal for the kingdom of Scotland; and was admitted, March 14, 1737, in right of his grandmother, to the office of lord of Man and the Isles, and the title of baron Strange of Knockyn, in the county of Salop. He exchanged the office of lord keeper of the privy seal for the kingdom of Scotland; by which lady he had issue, John, third duke of Athol; and George, lord George Murray died October 15, 1750.

6. Susan, married to William Gordon, second earl of Aberdeen of the Kingdom of Scotland. 7. Mary, married to James Ogilvie, sixth earl of Findlater of the kingdom of Scotland. The duke of Athol died November 14, 1744.

James, second duke of Athol, was constituted, in 1733, lord keeper of the privy seal for the kingdom of Scotland; and was admitted, March 14, 1737, in right of his grandmother, to the office of lord of Man and the Isles, and the title of baron Strange of Knockyn, in the county of Salop. He exchanged the office of lord keeper of the privy seal for the kingdom of Scotland; by which lady he had issue, John, third duke of Athol; and secondly, in 1749, Jane, daughter of John Drummond, of Megginch, in the kingdom of Scotland, esquire; which lady married secondly Adam, son of Alexander fourth duke of Gordon. He died January 8, 1764, without male issue, and was succeeded by his son Charles, second duke of Athol, born December 5, 1757; and died April 1770.

James, second duke of Athol, was constituted, in 1733, lord keeper of the privy seal for the kingdom of Scotland; and was admitted, March 14, 1737, in right of his grandmother, to the office of lord of Man and the Isles, and the title of baron Strange of Knockyn, in the county of Salop. He exchanged the office of lord keeper of the privy seal for the kingdom of Scotland; by which lady he had issue, John, third duke of Athol; and George, lord George Murray died October 15, 1750.

6. Susan, married to William Gordon, second earl of Aberdeen of the Kingdom of Scotland. 7. Mary, married to James Ogilvie, sixth earl of Findlater of the kingdom of Scotland. The duke of Athol died November 14, 1744.

James, second duke of Athol, was constituted, in 1733, lord keeper of the privy seal for the kingdom of Scotland; and was admitted, March 14, 1737, in right of his grandmother, to the office of lord of Man and the Isles, and the title of baron Strange of Knockyn, in the county of Salop. annuities to them granted, covenanted never to acknowledge any other king of England but Edward and his successors, descended from Lionel duke of Clarence, and that they would be ready to serve him in all his wars against the Scots in Britain and Ireland. Thus revolting from his natural prince James III. and connecting himself with his adversary, James sent John Stuart earl of Athol, ancestor of the present duke, to subdue him, and John Stuart, the first earl of Athol, with his future fellows, took part with Edward in forcing the king, by whom he completely succeeded. It was then setting forward on this expedition against the Rebrides, that the earl of Athol affirmed the motto of "Furth fortune, and fill the fettors;" which afterwards was confirmed to his successors, and to which enterprize their supporters, &c. allude. Over a great part of the interior, Mountrose, in Banyfishie, in Kincardine, extends a scroll, whereon is the motto of the Athol family in the more ancient orthography, "Furth fortnight, and fill the fettors."

GRAHAM (JAMES), DUKE, MARQUIS, and EARL, of MONROSE, Marquis and Baron of Graham, Dun¬daff, Kincairn, Mindock, and Kinaber, in Scotland; and Earl Graham, and Lord Bellford, in the county of Northumberland, in England; Knight of the Thistle, Master of the Horse to the King, Lord Justice General of Scotland, Lord Lieutenant of Stirlingshire, Hereditary Sheriff of Dumfartshire, Chancellor of the University of Glagow, President of the Society of Antiquaries of Scotland, President Baron, of the Royal Bank of Scotland, D.C.L. born February 8, 1755; succeeded his father, the late duke, September 23, 1790; married, March 5, 1785, Jemima-Elizabeth, daughter of John, earl of Abnubram, by whom he had issue a son, born September 4, 1785, the marchioness died fourteen days after, and the child on April 9, 1787. His grace married, secondly, July 24, 1790, Charlotte, sister to William duke of Manchester, by which lady he has issue, a daughter, born June 3, 1791; another daughter, born September 30, 1792; a third daughter, born October 2, 1793; a son, marquis of Graham, heir apparent, born July 16, 1799; a daughter, born June 22, 1803; and a son, born February 2, 1807.

The family of Graham is descended from Greme, who was placed at the head of the Scottish government during the minority of king Eugene II. whose accession to the crown is dated A.D. 419. He had many fierce engagements with the Britons; and, by forcing the rampart they had erected between the firths of Forth and Clyde, gained so much reputation, that from him that trench received the name of Graham's Dyke, which it retains to the present day.

Sir David Graham, in the reign of king Alexander III. had polloion of the barony of Kincardine; and was father of sir Patrick, who was killed at the battle of Dunbar, fighting against the English, in 1513, and sir John, who was the supporter and friend of the celebrated sir William Wallace, and was killed at the battle of Falkirk, July 22, 1299. Sir David, the grandson of sir Patrick, was a fireuous adherent to the family of Bruce, and was taken prisoner, together with king David, at the battle of Durham, October 27, 1346. Patrick, his son, born under the style of lord of Graham, Dundaff, and Kincardine; and by a younger son was ancestor of the extinct earls of Menteith.

William, lord Graham, defended from the elder branch, distinguished himself by his loyalty to James III. and was by James IV. March 31, 1504, advanced to the dignity of earl of Montrose, in the county of Forfar. He had five sons, William, lord of Montrose, and Andrew, who was elected first protestant bishop of Dumblaine, in 1575, and died in 1606. Earl William the father was killed, together with king James IV. in the battle of Flodden Field, September 7, 1513. William, second earl of Montrose, had issue Robert, commonly called Master of Montrose, who was killed at the battle of Pinkie, September 10, 1569, John, third earl of Montrose, son of Robert, was appointed by James VI. May 1, 1584, lord high treasurer of Scotland; which office he resigned in 1583; and was farther constituted, in January 1598, lord high chancellor of the kingdom of Scotland, in which office he continued till the year 1604. At the same time he was appointed regent of the kingdom of Scotland, and received a commiffion from the Scottish covenanters; but, being deputed to negotiate with Charles I. at Berwick, in 1639, he became reconciled to his sovereign; and ever after devoted himself to his service. In 1643, he was created marquis of Montrose, and received a commiffion from the king, constituting him captain general and commander in chief of the forces in Scotland. Upon this occasion, by almost incredible efforts, he raised a small army, and gained six victories in one year against a great superiority of numbers. He then marched to Edinburgh, and put himself in possession of the metropolis, but was at length defeated, September 13, 1645, by a detachment from the English. In the following year, when king Charles surrendered himself to the Scottifh army at Newark, he received orders from the sovereign to retire from the kingdom, which he obeyed. Having resided for some time at Paris, he contracted an acquaintance with cardinal de Retz, by whom his genius and courage are highly celebrated. In 1650, his commiffion of captain-general was renewed by Charles II. and, having collected a small force of about five hundred men, he failed for Scotland. Here he was defeated and taken prisoner, and was treated by the adherents of the covenant, who were then negotiating with the king, with every unmannerly species of indignity. Being brought before the Scottish parliament, the marquis displayed the utmost firmness and dignity, and was sentenced to be hanged upon a gibbet thirty feet high, and then to have his head stuck up at Edinburgh, and his legs and arms at four principal towns of the kingdom. When this judgment was pronounced, he replied, "that he was prouder to have his head let upon the gate of the city than to have his picture hanged even in the bed-chamber of the king his master;" adding, "that he wished that he had limbs enough to be dispersed into all the cities of Christendom, there to remain as testimonies of the cause for which he suffered." He was executed May 21, 1650.

James, second marquis of Montrose, his son, was created to his honours and estate at the restoration, by Charles II. and had issue James, third marquis of Montrose; who was constituted, in 1665, lord president of the privy council of the kingdom of Scotland, and died April 23, 1684. James fourth marquis of Montrose, his son, was constituted by queen Anne, in 1705, lord high admiral of the kingdom of Scotland, which office he exchanged in the following year for that of lord president of the privy council, in which post he continued till the union. By the same princess he was farther created, April 24, 1707, marquis of Graham, and duke of Montrose, with remainder to his heirs of entail, and declared, February 28, 1709, lord keeper of the privy seal of the kingdom of Scotland, which office he exchanged, upon the accession of George I. he was raised, September 24, 1714, to the office of principal secretary of state for the kingdom of Scotland, which office he exchanged, July 9, 1716, for that of lord clerk register; and was further constituted, November 11, in that year, lord keeper of the great seal. He married Christian Car¬negy, daughter of David, third earl of Northesk; by which
which lady, who died in 1744, he had issue a daughter, Margaret, who died young; and four sons; James, died in his infancy; David; William; George; and ten other children, who all died in their infancy. His grace died in 1741, and was succeeded by the late duke. King George I. was pleased to advance his eldest son, David, marquis of Graham, to the peerage of England, in 1742, first of his name; and Baron Graham, of Belford, in the county of Northumberland, with remainder to his two brothers, William and George: but David dying in 1731, unmarried, and George, a captain in the navy, dying in 1746, William, the second son of the late duke, succeeded his father, in 1742, as duke of Montrose, having fought in the English armies on the death of his brother David, in 1731, married, in October 1741, Lucy, daughter of John, second duke of Rutland; by which lady, who died June 15, 1788, he had issue, James, the present duke; Lucy, born July 15, 1751; married, June 1777, Archibald Douglas, present baron Douglas, nephew to the late duke of Douglas. His grace died September 23, 1790, and was succeeded by his only son, James, the present duke.  

**CREATIONS.**—Earl of Tweedale, in the county of Forfar, March 3, 1524; Marquis, May 16, 1644; and Marquis Graham, and Duke of Montrose, April 4, 1707; also Earl Graham, and Baron Belford, in the county of Northumberland, May 25, 1712. —Glasgow, in the county of Lanark; Kincardine, in the county of Perth; Minder Cañle, in the county of Dumfart; and Buchanan, in the county ofRoss.—Town-house, Grosvenor-square.

ERIAL DRY.

CRAUFURD (GEORGE-LINDSEY), EARL OF CRAUFURD AND LINDSEY, VISCOUNT AND BARON GARNOCK, BARON CRAUFURD AND SPINZLY; LORD LIEU-\TANT OF FIFE, AND A MAJOR-GENERAL IN THE ARMY; born in 1758; succeeded his father, the late earl, June 25, 1781.

Sir David Lindsay, of Glenelk, son of Sir Alexander, who, by Robert III. king of Scotland, was created earl of Craufurd in 1399, married Jane, daughter of King James II. in recompence of faithful services, created earl of Garnock, and, dying in 1399, left issue, by Margaret Stuart, daughter of King James, created viscount Garnock, who, by Queen Anne, in 1703, created viscount Mount Craufurd, which he afterwards changed to the title of Garnock; and, dying in 1709, left issue, by Margaret Stuart, daughter of James Earl of Bute, five sons and three daughters; Patrick, the eldest, married Miss Hume, and had issue, Patrick, the next viscount; who was succeeded by George, the late viscount. John Lindsay, seventeenth earl of Craufurd, dying without issue in 1749, having succeeded to the title of earl of Craufurd, took the surname of Craufurd. His lordship married, December 26, 1755, Jane, eldest daughter of Robert Hamilton, esquire; by which lady, who died May 5, 1794, he had issue three sons and two daughters: George, his successor; Robert; Bute; Jane, married, October 16, 1779, Archibald, twelfth earl of Eglinton, and died in January 1778; Mary. His lordship married June 25, 1781, and was succeeded by his son, George, the present and nineteenth earl. —The presumptive heir is Robert, brother to the present earl.

CREATIONS.—Earl of Craufurd, in the county of Lanark, 1799; Baron of Spinzly, 1799; Earl of Lindsay, in the county of Ayr, 1833; Baron and Viscount Garnock, April 20, 1793. MOTO.—Indure furth.

HAY-CARR (WILLIAM), EARL OF ERROL, Baron Hay, of Slanes, Hereditary Lord High Constable and Knight Marshal of Scotland; born March 12, 1772; succeeded his brother, the late earl, June 14, 1778; married, June 7, 1792. Miss Jane Bell; by which lady, who died May 1, 1761, he had issue one daughter, Mary, married to the reverend George Moore, esquire; Mary, married to Sir William Carm, bart., esquire, of Etal, in Northumberland, by whom he had issue three sons and nine daughters, viz. Charlotte, married to the reverend William Holwell; Isabella, married to Charles Cameron, esquire; Maria-Elizabeth, William Hay-Carr, the present earl; Frances, who died in August 1806; Emeline; Jemima; and James. His lordship died June 3, 1778, and was succeeded by George, nineteenth earl; who married, January 25, 1790, Elizabeth-Jemima Blake, second daughter of Joseph Blake, esquire, of Ardrey, in the county of Galway; and dying, without issue, June 14, 1798, was succeeded by his next brother, William, the present earl. —The presumptive heir is James, his lordship's brother.

CREATIONS.—Baron Hay, of Slanes, and Earl of Errol, March 17, 1452. MOTO.—Succum jagun.—"Adhere to the yoke."

SINCLAIR (JAMES), EARL OF CAITHNESS, and Lord Berriedale, Lord Lieutenant of Caithness-shire; married, in 1784, Jane, daughter of —Campbell, of Barcaldine, esquire; and has issue, Alexander Lord Berriedale, heir apparent, born February 25, 1800; a son, born September 1801; and other issue, of whom lady Helen died in October 1803; and Lady Janet, the eldest daughter, married, May 10, 1805, James Buchanan, of Ardencarron, esquire.

His lordship's father, William, the tenth earl, descended from John, grandson of the fourth earl, and succeeded in 1767. He married Barbara, daughter of Mr. Sinclair; by which lady, who died in 1795, they had issue two sons, William and John; William died at New York, in December 1761, and a daughter, Janet, married, on July 31, 1784, to James Traill, esquire. His lordship died in November 1799, when he was succeeded by his only surviving son, John, the late lord, who died, unmarried, April 5, 1789; and was succeeded by John, the
the present and twelfth earl, descended from Alexander, second son of William, the second earl.

**Creation.**—Earl of the county of Caithness, April 29, 1456.

**Motto.**—Commit thy work to God.

**DOUGLAS (GEORGE), EARL OF MORTON, and Lord Aberdour,** in Fifehire; and Baron Douglas, of Lochleven; Knight of the Thistle, Lord Chamberlain of her Majesty’s Household; born in 1579; succeeded his father, George, first earl, September 27, 1795.

His lordship's grandfather, James Douglas, fourteenth earl of Morton, married, first, Agatha, daughter of Halliburton, of Pittcur, esquire; by which lady he had issue, Charles, who died young; Sholto-Charles, the fifteenth earl; James; George; Robert; Frances; Mary, married to Charles Gordon, fourth earl of Abney, and his issue. His lordship married, secondly, Bridget, daughter of Sir John Heathcote, bart., of Northamton, in Rutlandshire, and had issue by her, who died March 3, 1805; John, married to Frances Lascelle, eldest daughter of Edward lord Harwood, and has issue; of which his eldest daughter married, April 24, 1604, the honourable counsellor Stuart, second son of John earl of Galway. Bridget, born April 28, 1658, married the honourable William-Henry Bouvierre, brother of the earl of Radnor, and has issue. The earl, dying October 10, 1763, was succeeded by his son, Sholto-Charles, the fifteenth earl, who married Catharine, daughter of John Hamilton, esquire, by whom he had issue one son, George; and Jane, married 1774, to the eldest son, John, that son’s only son, George, the sixteenth earl. The presumptive heir is James, the earl’s uncle.

**Creations.**—Earl of Morton, March 14, 1577, and Baron Douglas, of Lochleven, in the peerage of England, August 11, 1791.

**Residences.**—Aberdour Castle, Fifehire.—Townhouses, in Park-street, Piccadilly.

**Motto.**—Lock feker. **— Be sincere.**

**ERSKINE (DAVID-STUART), EARL OF BUCHAN, and Baron Cardrofs, of Monteith and Auchterdown,** in the county of Perth; succeeded his father, November 1, 1767; married, October 15, 1771, Margaret, daughter of William Fraser, of Fraferfield, esquire, nephew to the late earl of Buchan.

David, the grandfather of the present earl, was the ninth earl of Buchan, and married, in 1679, Frances, daughter and sole heir of Henry Fairfax, of Hurlf, in the county of Berks, esquire, eldest son of Henry, second son of Thomas vicount Fairfax, in Ireland, by whom he had issue, Henry-David, who succeeded to the earldom; Catharine-Anne, married to William Fraser, esquire, son of Alexander lord Saltoun, by whom she had issue, William Fraser, of Fraferfield, esquire, father of Margaret, who married her cousin, the present earl and Frances, married to colonel Gardner, killed in the battle of Prestonpans, in 1745; and also eight sons and five daughters, who died unmarried. His lordship married, secondly, Isabella, daughter of sir William Blackett, bart., by whom he had issue; and, dying October 11, 1745, was succeeded by his eldest son, the present earl, born April 6, 1710; married, January 31, 1739, Agnes, second daughter of sir James Stuart, of Coltness and Goodtref, esquire, and had issue, Mary, married to sir William Wardlaw, bart., by whom she had issue, 1. Anne-Agnes, died May 5, 1804. 2. David-Stuart, the present earl. 3. Henry, married to Christiana, daughter of George Foulis, colonel William Stuart, second son of John earl of Galway, by whom he had issue, 2. Sir Henry Griften, who died without issue. 3. Sir Henry Griften, married, first, to Margaret, daughter of William, the second earl, and had issue, 2. Susanna, married to sir John Foulis, of Barrowland, and her issue, 2. Sir Archibald Foulis, who married, first, to Margaret, daughter of the late earl of Buchan, and had issue two sons and four daughters; 1. Catharine, married to James earl of Galloway; 2. Grace, married to the earl of Carnwath; 3. Eupheme, married to George Lockhart, esquire; 4. Margaret, married to sir Alexander, who married, first, to Margaret, daughter of sir Henry, the eldest son of the earl of Buchan, and had issue, two sons and seven daughters, viz. James, died young; Alexander, the tenth earl; Archibald, the eleventh earl; Thomas, died unmarried; George, the twelfth earl; James, the thirteenth earl; Mary, married to sir John Heathcote, bart., of Northamton, in Rutlandshire, and had issue, Mary, born March 5, 1787, married, March 29, 1803, to Archibald Lord Montgomery, of Skermont and Coilsfield, by the title of Baron Ardroffan; succeeded Archibald Lord Montgomery, heir apparent, a colonel in the army; married, March 29, 1803, to Archibald Lord Montgomery, eleventh daughter of the late earl of Eglinton, and Lady Mary Montgomery; the eldest daughter of Archibald, eleventh earl of Eglinton; Roger, who died January 1799; Litha, married to Dundas Macqueen, esquire, and Jane.

Alexander, the sixth earl of Eglinton, died in 1661, and left issue the following sons: 1. Hugh, the seventh earl. 2. Sir Henry Griften, who died without issue. 3. James, a colonel in the army, who died in Ireland. 4. James, of Coilsfield, a colonel in the army, and presided over the present earl, Robert, a general in the army. Hugh succeeded his father, as seventh earl; married Mary, daughter of John earl of Rothes; and was succeeded by his son, Alexander, the eighth earl, who married Elizabeth, daughter of William earl of Dumfries; who was succeeded by his eldest son, Alexander, the ninth earl; married, first, to Margaret, daughter of William lord Cockrane, eldest son of the earl of Dundonald, and had issue two sons, who both died young, and four daughters; 1. Catharine, married to James earl of Galloway; 2. Grace, married to the earl of Carnwath; 3. Eupheme, married to George Lockhart, esquire; 4. Margaret, married to sir Alexander Maxwell, bart. His lordship married, secondly, Anne, daughter of George earl of Abercied; and had issue, one daughter, Mary, married to sir David Conyngham, bart. His lordship married, thirdly, Sufanna, daughter of sir Archibald Kennedy, bart. and had issue, three sons and four daughters, viz. James, died young; Alexander, the tenth earl; Archibald, the eleventh earl; and had issue, 2. sir Archibald Kennedy, bart., by whom she had issue, 1. Catharine, married to sir John, lord Cochrane, eldest son of the late earl, and had issue two sons, who both died unmarried, the honours and estates of Eglinton devolved upon the above-named col- onel James Montgomery, of Coilsfield, fourth son of Alexander, ninth earl of Eglinton; who married, first, Jane, daughter of William Primrose, of Carnwath, and her issue, 2. Sir Archibald Kennedy, bart., by whom she had issue two daughters; and, secondly, Catharine Arbuckle, widow of John Baillie, esquire, by which lady he had issue a son, Alexander, of Coilsfield, who married Lillias, daughter and heir of sir Robert Montgomery, of Skelmorlie, and had issue by this marriage; and, dying, without male issue, successive males, descended from the family of Coilsfield, and had issue, Hugh Montgomery, the present and twelfth earl.
Ninth earl, died also without issue, November 30, 1775.

William Home, of the United Kingdom, February 15, 1786.

Eglinton Castle, Ayrshire.

TOWNHOUSE, HOLLES-STREET, CAVENDISH-SQUARE.

MOTTO.—“Take good care.”

KENNEDY (ARCHIBALD), EARL OF CASSILS, and Lord Kennedy, Baron Ailfe, of the United Kingdom, in the county of Ayr, 1503; Baron Ardrofian, of the United Kingdom, February 15, 1786.

POWHERS—HOLLES-STREET, CAVENDISH-SQUARE.

MOTTO.—“Salus per Christum redemptionem.” —“Salvation through Christ my redeemer.”

STUART (FRANCIS), EARL OF MORAY, Baron Doune, and Baron Stuart, of Cafllefinn, in the county of Inverness; Lord Lieutenant of Elginshire; and Baron Stuart of Great Britain; married, in June 1763, Jane, eldest daughter of John lord Gray; by which lady, who died in 1786, he had issue, five sons and four daughters, viz. James, lord Doune, died July 11, 1776; John lord Doune, died July 6, 1791; Francis lord Doune, heir apparent, born June 26, 1755; Miss Scott, by marriage daughter of major-general Scott, who died August 3, 1798; and his lordship married, secondly, January 7, 1801, Margaret-Jane, daughter of Sir Philip Ainslie, of Pitton, bart. and has issue by both marriages. Archibald, married to Cornelia, daughter of Edmund Pleydell, esquire; Charles; Margaret, died September 1788; Grace, married to George Douglas, esq. of Cavers, and has issue a son, born October 10, 1790; and a daughter, born October 2, 1793; Jane; and Anne.

Frances, eighth earl of Moray, married Jane Elphinston, daughter of John lord Balmerino, and left two sons, James lord Doune; and Francis, who married Ellen Montgomery, daughter of the ninth earl of Eglinton, by whom she had a daughter, Anne, married to Mr.-obertson, and another daughter, Anne, married to John Stuart, esq. of Blair-hall, by whom she was left a widow, and died in January 1783. His lordship, dying in 1779, was succeeded by his eldest son, James, the ninth earl; who married Anne, daughter of Murray, first earl of Tullibardine, and had issue, John, the second earl; James; Frederick; Anne, who married William Hay, the eldest son of the first earl of Errol; and dying in 1615, was succeeded by his second son, John, who married, first, Martha, daughter of John Erkine, sixth earl of Mar; and, secondly, Elizabeth Maule, daughter of Patrick, first earl of Panmure; by which lady he had issue, Patrick, his successor; and Elizabeth, who married, first, Charles Gordon, earl of Aboyne; and, secondly, captain Alexander Grant. The earl died in 1649, and was succeeded by Patrick, the third earl, who, with the approbation of Charles II. changed his title from Kinghorn to Strathmore, and was one of the privy council in that reign; and also one of the extraordinary lords of session; he married

BOWES (JOHN-LYON), EARL OF STRATHMORE AND KINNOHORN, Lord Lyon and Glamis; born in April 1768; succeeded his father, the late earl, in 1776.

Patrick Lyon, eleventh lord Glamis, was one of the privy council to James VI. and lord treasurer of Scotland, and in 1606, was created earl of Kinghorn. He married Anne, daughter of Murray, first earl of Tullibardine, and had issue, John, the second earl; James; Frederick; Anne, who married William Hay, the eldest son of the first earl of Errol; and dying in 1615, was succeeded by his second son, John, who married, first, Martha, daughter of John Erkine, sixth earl of Mar; and, secondly, Elizabeth Maule, daughter of Patrick, first earl of Panmure; by which lady he had issue, Patrick, his successor; and Elizabeth, who married, first, Charles Gordon, earl of Aboyne; and, secondly, captain Alexander Grant. The earl died in 1649, and was succeeded by Patrick, the third earl, who, with the approbation of Charles II. changed his title from Kinghorn to Strathmore, and was one of the privy council in that reign; and also one of the extraordinary lords of session; he married
married Helen Middleton, daughter of John, tenth earl of Melrose, and by her had issue, John, the fourth earl, and Patrick; Griessel, who married David Ogilvy, third earl of Airlie; and Elizabeth, married to Charles Gordon, second earl of Abony; and, after his decease, to Patrick, third lord Kinlaith. Patrick, on his death, in 1599, was succeeded by John, the fourth earl, who was of the privy council to queen Anne; he married Elizabeth Stanhope, daughter of Philip, second earl of Chesterfield, and had issue, John, the fifth earl; Charles, James, and Thomas, successive earls; and two daughters, of whom Helen married Robert Stewart, seventh lord Blantyre; and Mary, who died in 1767. The earl, on his death, was succeeded by his son, John, the fifth earl, who died at the battle of Dunkeld. Charles, his brother, and fifth earl, succeeded, and married Susan Cochrane, daughter of John, fourth earl of Dundonald; but having been accidentally killed at Forfar, in 1728, by James Carnegie, of Fainhaven, was succeeded by his brother, and sixth earl; who dying without issue, in 1735, was succeeded by Thomas, the seventh earl.

Thomas, the eighth earl of Strathmore, married Jane, daughter of James Nicholson, esquire; by which lady, who died May 13, 1768, he had issue, John, the ninth earl; James, who was created baronet, was succeeded by his son, John, the tenth earl. The countess married, firstly, to a Mr. Bowes, and died in May 1800. The earl married, secondly, January 16, 1777, Andrew Robinson Stoney, esquire.

Thomas, first earl of Kellie, died in 1599, and was succeeded by his grandson, Thomas, second earl of Kellie, who was a steady adherent to king Charles. He died in 1644, and was succeeded by his brother, Alexander, third earl, who also adhered most faithfully to the royal family, and suffered many hardships, being taken prisoner at the battle of Worcester, and was in confinement many years. After the restoration, he was appointed governor of the fort and town of Ayre, lieutenant-colonel of the guards, and one of his majesty's most honourable privy council; he married Mary Kilpatrick, daughter to lieutenant-general Kilpatrick; by whom he had issue, one daughter, Anne, married to her cousin, for Alexander Erskine, of Cambo; the second daughter, Mary Dalziel, sister of Robert, third earl of Carnwath; by which lady he had one son, his successor, and two daughters, Elizabeth and Mary. The earl died in 1677, and was succeeded by his son, Alexander, fourth earl of Kellie; who married Anne, daughter of Coln, third earl of Balcarres; by whom he had issue, one son, and one daughter, Jane, married to Walter Scott, of Harden, esquire. This earl was a great opponent of the union; and was succeeded by his son, Alexander, fifth earl, who died in 1710, and was succeeded by his brother, John, sixth earl; who also died unmarried, in November 1754; the second daughter, Anne, unmarried; Janet, married to Robert Anstruther, of Anstruther, baronet, and died in 1770, leaving three sons and three daughters. Alexander, fifth earl of Kellie, died in 1756, and was succeeded by his eldest son, Thomas, sixth earl of Kellie, who died at Brufells in October 1781; and was succeeded by his brother, Archibald, seventh earl of Kellie; who served many years in the army, and was one of the representatives of the Scots peers in the late parliament. Andrew died in 1793, and Archibald, dying unmarried, was succeeded by his son, Thomas, seventh earl of Kellie, who died at Brufells in October 1781; and was succeeded by his brother, Archibald, seventh earl of Kellie; who served many years in the army, and was one of the representatives of the Scots peers in the late parliament. Andrew died in 1793, and Archibald, dying unmarried, was succeeded by his eldest son, Thomas, eighth earl of Kellie, who died in 1799; and was succeeded by his nephew, the late earl, November 1799; married Miss Gordon, daughter of captain Boyde: his lordship's second wife was a daughter of Sir James Forbes, bart. and his third wife was a daughter of Sir Thomas Kerr; by his second wife he had two sons and three daughters; whereas Thomas, the eldest

HAMILTON (CHARLES), EARL OF HADDINGTON, and Baron of Binning and Byres; succeeded his father, May 19, 1794; and in April 1799, married Sophia Hope, daughter of the second earl of Hopetoun; and has issue, Thomas lord Binning, heir apparent; married, November 15, 1802, lady Maria Parker, only daughter of George earl of Maccleish.

Thomas Hamilton, great ancestor of the present earl, was, by James VI. made one of the senators in the college of justice, secretary of state, and created baron Binning, and earl of Melros, which he afterwards changed to the title of Haddington; in 1627, he was constable lord privy seal, which office he held for ten years. He married, firstly, a daughter of James Bothwick, esquire, by whom he had a daughter, Christiana, married to John lord Lindsay, by whom she had a son, John, the fourteenth earl of Crawford; and, secondly, to Robert lord Boyce: his lordship's second wife was a daughter of Sir James Forbes, bart. and his third wife was a daughter of Sir Thomas Kerr; by his second wife he had three sons and three daughters; whereas Thomas, the eldest
The countesses remarried, in February 1796, Janies Dal-vere. "—Baron of Binning, November 30, 1613; and Earl of Haddington, in Earl Lothian, March 20, 1619.

**Residence.**—Tyningham Castle, in Haddingtonshire, Scotland.

**Motto.**—Priorit et perpetua. "—'Uirtue, when wounded, is increased."

**MAITLAND (JAMES), EARL OF LAUDERDALE, Viscount Maitland; Baron of Thirltian, Mufelburgh, and Bolton; and a Peer of the United Kingdom, by the title of Baron Lauderdale, of Thirltian; Hereditary Royal Standard-bearer of Scotland; and a Baronet; succeeded his father, the late earl, August 17, 1789; married, August 15, 1782, Eleanor, only daughter and heir of Anthony Todd, esquire; by whom he has a son, James, viscount Maitland, heir apparent, born July 12, 1784; and other issue. The family of Maitland is descended from James II. king of Scotland. The grandson of the first lord viscount Maitland enjoyed the distinguished confidence of Charles II. at the restoration, by whom he was, in 1672, created marquis of March, and duke of Lauderdale; and, in 1674, was farther advanced to the English honours of baron Peterham, and earl of Guildford; but dying without issue male, in 1682, these titles became extinct.

Charles, sixth earl of Lauderdale, married Elizabeth Ogilvy, daughter of James, fourth earl of Findlater and Seilid, the last successor of his father, James, second earl of Lauderdale, who died without issue, and was succeeded by his eldest son, Charles, married, first, to Miss Barclay, heir of Towie, by whom he had no surviving issue; secondly, to Miss Hildane, of Gleneagles, without issue; and, thirdly, to Janet, daughter of Sir Richard Moncreif, baronet; George, an archdeacon in Ireland, died in 1672; Richard, adjutant-general in America, died August 24, 1773; Alexander, a general in the army, and colonel of the 40th regiment of foot; Frederic, a captain in the navy, married to Miss Dick, and died December 16, 1786, leaving issue a daughter, married, April 4, 1793, to Henry Scrymgour, esquire; Patrick, married to the countess-dowager of Rothes, and died May 17, 1797, leaving issue one daughter, Mary Turner, born in 1725; John, died January 29, 1791; Elizabeth, married, first, to James Ogilvy, esquire of Rothiemay; and, secondly, to general Anfrather; Margaret, died unmarried; Janet, married Thomas Dundas, of Fingask, esquire, and died December 30, 1805; Thomas, a general in the army, who died in the West Indies; and Charles, M. P. for the reign of Brikes. His lordship, dying July 19, 1744, was succeeded by his son, James, the seventh earl, who was born in 1718, and married Mary, daughter and co-heir of Sir Thomas Lombe.
Lombe, bart. by which lady, who died on July 18, 1789, he had four, Valdave-Charles Lander, who died young; James, the present earl; Thomas, a privy councilor, governor and commander of the forces in the field; and a gentleman in the army. He died in October 1768.

William-Mordaunt, a brigadier-general in the army, married April 28, 1797, Miss Napier, daughter of major-general Napier; Charles, died young; Hannah, died young; Elizabeth, married to David Gavim, esq., by whom she had issue a daughter, who married, September 2, 1794, John Haye, of Penderine, by which marriage he had issue, Mary-Julian, married to Thomas Hogg, esquire; Hannah-Charlotte, married to the fifth marquis of Tweedale, and died May 8, 1804, leaving issue; June, married, December 22, 1787, Samuel Long, esquire; Anne, married, July 1, 1793, Francis Dawswook, esq. The earl died August 17, 1799, and was succeeded by his eldest surviving son, James, the present and eighth earl.

**CREATIONS.**—Baron Maitland, of Thirlifian, in the county of Berwick, May 18, 1709; Victof Maitland, 1676; and Earl of Lauderdale, in the county aforesaid, March 24, 1623; and a peer of the United Kingdom, by the title of Baron Lauderdale, of Thirlifian, February 23, 1704.

**Residence.**—Lauder Castle, in Berwickshire.

**Motto.**—Conjicio el animis. —“By wisdom and courage.”

**HAYE-DRUMMOND (THOMAS - ROBERT), EARL OF KINNOUL, VISCOUNT DUNLIP, AND BARON HAYE, OF PEDWARDINE, IN ENGLAND; LORD LION, KING AT ARMS, born April 5, 1783; succeeded his father, the late earl, April 12, 1804.

George, son of Patrick Haye, and nephew of James, baron Haye, of Bewicke, and viscount Doncaster, having been instrumental in defacing James VI. from the confraricey of the earl of Gowrie, Augast 5, 1600, was, in reward of his loyalty, constituted by that monarch, in 1616, lordregister of the kingdom of Scotland; which office he exchanged, in 1622, for that of lord high chancellor. He was created by Charles I. May 4, 1627, baron Haye, of Kinnoull, and viscount Dunion, of D union, in the county of Perth, and May 25, 1633, earl of Kinnooul, in that county. He died December 16, 1674.

George, second earl of Kinnoull, his son, was constituted, in 1632, captain of the yeomen of the guard to Charles I. and adhered to that monarch throughout the civil wars. He resigned the office of captain of the yeomen of the guard in 1653; and died October 5, 1644. Upon the death of his father, fifth earl of Kinnoull, in his great-grandfather, the present earl; Francis-John, born September 17, 1765; Sarah-Maria, born June 21, 1788. The earl died April 12, 1804, and was succeeded by his eldest son, Thomas-Robert, the present and tenth earl. —The heir presumptive is Francis-John, the earl’s brother.

**CREATIONS.**—Lord Haye, and Viscount Dunion, May 4, 1627; Earl of Kinnoull, May 15, 1633; and Baron Haye, of Pedwardine, in England, December 31, 1711.

**Residences.**—Dunlop Castle, in the county of Perth; and Broadworth, in the county of York. —Town-house, in Upper Harley-street.

**Motto.** — Renove animos. — “Rouse your courage.”

**CRICHTON (JOHN-STUART), EARL OF DUMFRIES, VICOUNT AYR, BARON CRICHTON, OF SANQUHAR AND CUMNOCK, EARL OF WINDSOR; ELDEST SON OF THE LATE JOHN VICOUNT MONTPHYNTON, SON OF THE PRESENT MARQUIS OF DUMFRIES, BORN AUG. 3, 1793; SUCCEEDED HIS GRANDFATHER AS EARL OF DUMFRIES, APRIL 7, 1803.

William, the second earl, procured a patent to his heirs-general; and dying, in 1691, was succeeded by an infant son, William, who died a minor, and was succeeded by his father, Penelope, in 1694.

The counts married Dalmah, second son of John first earl of Stair, and by him had issue five sons and two daughters, viz. Patrick, the late earl; William; Crichton; Stair; and James, succeeded as third earl of Stair, and died in 1760; Charles; Hugh; and George; three of which last died unmarried. Elizabeth, married John M’Dowal, of Freugh, esquire, and left five sons and two daughters, viz. Patrick, the late earl; William Crichton; Stair; officers in the royal navy; John; Penelope, married William M’Ghie, of Belmargie, esquire; Penelope, died unmarried; the counts of Dumfries died in 1744, and was succeeded by her eldest son, William lord Crichton, the fourth earl. He married Anne, daughter of William, second earl of Aberdeen, and had issue a son, William
lord Crichton, who died young; Anne, countess of Dumfries, died April 15, 1753; and his brother, James, third earl of Stair, dying in November 1760, succeeded to the title of Stair. He married Anne, daughter of William Duff, of Crombie, Esq., and dying without surviving issue, in 1768, the title of Stair descended to John Dalrymple, Esq., son of George Dalrymple, Baron of the exchequer, who was third son of John, first earl of Stair; and the title of Dumfries descended to John Dalrymple, of Windsor, eldest son of John marquis of Bute; and by her left issue, John, the present earl, and a posthumous son, Patrick-James-Herbert, born October 25, 1794. The earl, dying on April 7, 1830, was succeeded by his grandson, John, the present and sixth earl. The presumptive heir is Patrick, brother to the earl.

CREATIONS.—Baron Crichton, of Sandghar and Cumber, 1634; Viscount Ayr, in the County of Ayr, in 1625, and Earl of Dumfries, June 10, 1633.

RESIDENCE.—Dumfries House, in Ayrshire.

MOTTO.—"God fend grace."

BRUCE (THOMAS), EARL OF ELGIN AND KINCARDINE, Baron Bruce, of Kinloch and Torry, Knight of the Garter, and a Colonel in the Army, Lord Lieutenant and Sheriff of Fife; succeeded his brother, the late Earl, in 1777; married, March 11, 1799, Miss Nisbet, daughter of the late William-Hamilton Nisbet, Esq., of Dirleton; and has issue, a son, Lord Bruce, heir apparent, born April 8, 1800; a daughter, born March 4, 1801; and another daughter, born January 21, 1806. The earl, after the expulsion of the French from France, was appointed ambassador to the Court of Constantinople, where he received the most distinguished honours from the sultan, Selim III, lately massacred, by whom he was honoured with the Turkish order of the Crescent, in 1801, which his majesty granted him permission to wear, March 20, 1802.

Robert Bruce, of Kinloch, and Blairhall, of Elginshire, had a brother, George, from whom descended the earl of Kincardin; and Edward, who, in 1619, was created Baron of Kinloch, whose son, Thomas, was created Earl of Elgin, and a Baron of England, by the title of Lord Bruce of Worton; and, dying in 1623, his son Robert was, by William II, created Lord Bruce, Viscount Amphil, and Earl of Aylesbury; whose grandson, Thomas, was the grandfather of the princes of Stolberg. Charles, the fourth, in 1711, was called up to the house of peers by writ, as Lord Bruce of Worton, and succeeded, in 1744, as Earl of Elgin and Aylesbury. In April 1746, he was created Baron Bruce, of Tottonham, in Wiltshire, with remainder to his nephew, Thomas Bruce Brudenell, the youngest son of George Earl of Cardigan, by Elizabeth Bruce; and his lordship dying in February following without male issue, the title of Lord Bruce, of Tottonham, descended to his nephew, Thomas Brudenell.

This earl married three wives: first, Anne, eldest daughter and co-heiress to William marquis of Hallifax, by whom he had two sons, and two daughters; George, who died young; and Robert, who marrying Frances, daughter of Sir William Blacket, Bart., died without issue. Mary was the first wife of Henry Brydges, Duke of Chandos, by whom she had William-Robert, the late earl, who died unmarried, July 3, 1777; and he was succeeded by his brother, Thomas, the eleventh and present Earl.

CREATIONS.—Baron Bruce, of Kinloch, July 8, 1625; Earl of Elgin, June 10, 1633, and Earl of Kincardin; and Edward, who, in 1610, was created Baron of Skelton, for the establishment, married, first, Miss Blount, daughter of Mr. Blount; and, after the battle of Culloden, escaped into France, where he died in 1787, with whom the dignity of the family was suspended; but leaving no issue, it descended to his next brother, Francis-Charters Wemyss, Baron Bruce, of Torry, December 26, 1667.

RESIDENCE.—Abercfield House, in Fifehire.

MOTTO.—"Fatum."—"We have been."
Sutherland, daughter of William earl of Sutherland, by whom he had a son, born October 8, 1728, and other children. The daughters were, Frances, married to Sir James Stewart, baronet, who died in 1729; Walpole, married to M. Chaffel de la Barthe, a French gentleman, and Anne, married to John Hinton, esq. Helen, married to Hugh Dalempyle, esq. of Foddal. Francis Chartyes, the late earl, was born in 1723; and married, in 1745, Catharine, daughter of Alexander, second duke of Gordon; by which lady, who died in 1746, he had issue, Francis, lord Elcho; who succeeded to the titles and estate on the death of his father, in September 1808.

*CREATIONS.*—Baron Elcho, April 1, 1628; and Earl of Wemyss, in the county of Fife, May 15, 1623.

*RESIDENCES.*—Wemyss Castle, in Fifehire, and Amisetfield Park, in Haddingtonshire.

**MOTTO.**—*Fe, je, et age.*—"I think."

**Ramsay (George), Earl of Dalhousie,** and Lord Ramsay; a Brigadier-general in the Army; Lieutenant-colonel of the Second Regiment of Foot; and a Director Extraordinary of the Bank of Scotland; born in 1729; succeeded his father, November 15, 1787; married, May 14, 1805, Miss Brown.

William, the fourth earl, grandfather of the present earl, marrying Jane, daughter of George lord Ros, by her had three sons, Charles, George, and Malcolm; and two daughters. George, lord Ramsay, the eldest son, married Jane, daughter of Harry Man, of Kelly, esquire, and died, in January 1764, was succeeded by his brother, George, sixth earl, who married, August 27, 1757, Miss Glen, niece of governor Glen; by whom he had the present earl; William, who changed his name to Maule on his father's death, married Miss Hunter, and had Lucy, who died in March 1806, and other issue; James, a lieutenant-colonel in the army; and Andrew, in the East India Company's civil establishment, married, January 29, 1800, Miss Rachel Cock, of R umpore, in Hindoostan. His daughter, Elizabeth, married, July 1, 1786, in Thomas Moncrieffe. Charles-Frederick, uncle to lord Dalhousie, died on December 16, 1796. His lordship died, November 15, 1787, and was succeeded by his son, George, the present and seventh earl. The presumptive heir is Maule-William, the earl's brother.

*CREATIONS.*—Lord Ramsay, August 25, 1618; and John Dalhousie, of Dalhousie, in Mid-Lothian, June 19, 1623.

*RESIDENCE.*—Dalhousie Castle, in Mid-Lothian.

**MOTTO.**—*Ora et labora.*—"Pray and labour."

**Stuart (Charles), Earl and Baron of Traquair,** and Lord Linton; succeeded his father, the late earl, in April 1759; married, August 19, 1773, Miss Ravenston; by which lady, who died July 11, 1796, he had issue, a son, John, lord Linton, heir apparent, born in January 1783; and a daughter, born August 16, 1784.

His lordship's grandfather, Charles, the fourth earl, succeeded his brother, William, in 1744. He married Mary, daughter of Robert Maxwell, fourth earl of Nithideale; by whom he had issue, Charles, the fifth earl; John, the sixth earl; Lucy; Anne; Mary, married to John Drummond, esq. and died in 1773; Catharine, married to William lord Maxwell; Barbara, died November 15, 1774; Margaret, died April 12, 1793. Anne, his wife, died, April 28, 1758, was succeeded by his son, Charles, the fifth earl, married to Theresa, daughter of sir aldwin Conyers, and she died in 1778; and his lordship dying without issue, in 1764, was succeeded by his brother, John, sixth earl; who married Christiana, daughter of sir Peter Amielun, of Anstrutherfield, baronet; by which lady, who died in 1778, he had issue, Charles, the present and seventh earl.

*CREATIONS.*—Baron Linton, and Earl of Traquair, in the county of Peebles, June 21, 1633.

*RESIDENCE.*—Traquair Castle, in Tweedaleshire.

**MOTTO.**—*Judic mout.*

**Ogilvie (James), Earl of Finlatter and Seafield,** Viscount Redhaven, and Baron Delkford; succeeded his father, the late earl, in 1770; married Christiana-Theresia, daughter of Joseph, count Murray, of Bught.

James, the fifth earl, who succeeded his father in 1770, married, first, Elizabeth, daughter of Thomas, sixth earl of Kinnoul, and had a son, James, the fifth earl of Finlatter; and two daughters, Anne, married to John earl of Hopetoun; and Margaret, married to Ludovic Grant, of that ilk. His lordship married, to his second wife, Sophia Hope, daughter of Charles earl of Hopetoun, who died April 26, 1761. He was succeeded by his son, James, who married Mary, daughter of John duke of Athol; by which lady, who died December 29, 1799, he had two sons, James and John; he was succeeded by James, the present and seventh earl, in 1770. The present earl is the presumptive heir; to the titles of Seafield, and Ogilvie, of Inchmartin, to that of Finlatter.

*CREATIONS.*—Baron Delkford, October 4, 1616; Earl of Finlatter, February 20, 1637; both in the county of Banff; Viscount Redhaven, June 28, 1688; and Earl of Seafield, in the county of Fife, June 24, 1791.

*RESIDENCE.*—Alder-Eichies, in Banfshire.

**MOTTO.**—*Toujours.*—"Always."

**Leslie (Alexander), Earl of Leven and Melville,** Viscount Balgonie and Kircaldie; Baron Melville, Ruth, Monimieal, and Balwarie; and Comptroller of the Customs in Scotland; succeeded his father, the late earl, in 1694; married, August 12, 1724, Jane, only daughter of John Thornton, of Clapman, in Surrey, esquire; by whom he had issue, David, Viscount Balgonie, in the royal navy, heir apparent, born June 22, 1785; John-Thornton-Leesie-Melville; William-Henry; Lucy, died young; Robert-Samuel; Lucy; Jane-Elizabeth; Mary-Anne; Alexander.

George lord Melville, was, by William III, created earl of Melville; and marrying Catharine, grand-daughter and heir to the earl of Leven, by her had issue, David, his heir; who became earl of Leven and Melville, and was succeeded by his grandson, David; who dying young, the titles devolved on his uncle, Alexander; who married, first, Mary, daughter of John Erkine, of Carnock, by whom he had David, the late earl; and, secondly, to Elizabeth, daughter of David Moneypenny, of Pitmilly, esquire; by which lady, who died in 1783, he had Alexander, a lieutenant-general in the army, and colonel of the 9th regiment of foot, who married Mary, daughter of Thomas Tullisheid, esq. by whom he had issue, Mary-Anne, married in 1787, to John Rutherford, esq. of Kegerton; Anne, married to George, sixth earl of Norkeith; Betty, married to John Earl of Hopetoun; Mary, married to James Walker, esq. His lordship, dying September 2, 1754, was succeeded by his son David, the sixth earl, lord high commissioner to the general assembly, and married, first, to Margaret, daughter of William Neshby, of Dilton, esquire, by whom he had issue, 1. Alexander, the present earl.

2. William, killed in America, in January 1777; David, a brigadier-general in the army, married Rebecca, daughter the reverend Dr. Giles, of Glasgow, 3. John, a major-general in the army, married to Miss Vandergraft, of Ceylon. 5. Jane, married for John Smart, M.P. for the county of Kincardine, and has issue; a daughter, married to William Forbes, esq. eldest son of Sir William Forbes, of Pittligge, baronet. 6. Mary-Elizabeth, married James, fourth lord Ruthven, and has issue, 7. Charlotte. The earl dying,
TOLLEMACHE (WILBRAHAM), EARL OF DYSTART, and Lord Huntingtower, and a Baronet; High Steward of Ipswich; born in 1733; succeeded his brother, the late earl, February 22, 1799; married, February 6, 1773, Anne Maria Lewis, eldest daughter of David Lewis, esq. of Malvern, in the county of Warwick, who died without issue, September 14, 1804.

Of this noble family, which is of English extraction, there lived in the 25th of Edward I. Hugh de Tollema, a chief baron, who held of the crown the manor of Bentley, in the county of Suffolk; and, in the 29th, married to Sir W. Wolfely baron, and lady Jane, their mother, by whom he had issue, John Tollemache, of Woodhey, in the county of Cheshire, baronet; and Catharine, to John Bridges, marquis of Caernarvon, heir apparent to James, late duke of Chandos, and died in January 1754. Lionel, lord Huntingtower, their brother, who died in his father's lifetime, in 1712, left a son, Lionel, the late earl, born in June 1707, who, on the death of his grandfather, in 1712, succeeded to the title. In 1721, he married Grace, eldest daughter of John Carteret, earl of Granville; and in 1726, succeeded to the earldom of Selkirk. In 1731, he married Grace, eldest daughter of John Carte, earl of Granville, and by her, who died July 23, 1755, he had issue, Lionel, eldest son of the late lord William Manners, by which marriage he had no issue. He married, secondly, April 29, 1751, a captain in the navy, cast away in the Repulse.

Charlotte, who married Henry Wolfeley, esq. third son of Sir W. Wolfeley bart. and lady Jane, his mother, married, secondly, March 4, 1803, G. D. Ferris, who died Aug. 28, 1802. Lionel, the third earl, died Feb. 25, 1799, without issue, and was succeeded by his only brother, Wilbraham, the present and fourth earl. The presumptive heir is Sir William Manners, nephew to the earl.

DOUGLAS (THOMAS), EARL OF SELKIRK, Lord Daer and Shortcleugh, and Lord Lieutenant of the Stewartry of Kirkudbright; succeeded his father, the late earl, May 24, 1799.

William, the first earl of Selkirk, after his marriage with the duchess of Hamilton, was created duke of Hamilton; and in 1697, renounced the honour of earl of Selkirk into the hands of James VII. king of Scotland. His majesty was pleased to confer the title, with the first precedence, on the duke's third son, Charles Hamilton, who, dying unmarried in 1739, was succeeded by his next brother, John, who, in 1697, had been created earl of Ruglen; and he married, first, Anne, daughter of John, seventh earl of Carlis, by whom he had issue, and died in 1751, Anne, died November 1, 1776; and to his great-nephew, Dunbar, the late earl of Selkirk, who married Helen, daughter of John Hamilton, grandson of the earl of Haddington, by whom he had issue, Sholto-Baillie, who died young; Baillie-William, died November 5, 1794; John, died August 6, 1797; Dunbar, died November 1796; Alexander, died at Guadaloupe, in 1784; Thomas, the present earl; Isabella, died November 9, 1796, to Sir James Hall, bart. and had issue, Mary; Elizabeth, married August 1, 1806, to Sir James Montgomery, bart. and Catharine. His lordship died May 24, 1799, when he was succeeded by his son Thomas, the present earl. His lordship is the author of "Observations on the present State of the Highlands of Scotland," which work appears to have been the result of his lordship's exercistion in extending the blestings of agriculture, and a superior breed of sheep, into North Britain; and the crime of banishing the plough to make room for sheep. But the mind of lord Selkirk was of too high an order to content himself with this ill-judged complaint; and, while he lamented the sufferings of some individuals, he discerned the interests which the community polfed in the revolution that he was gradually affecting. As a well-wisher to the improved husbandry, his benevolence prompted him to become the benefactor of those who suffered through its introduction; and he conceived the laudable project which was at once to provide for their comfort, and to advance his country's welfare. The advantageous change in the rural economy of the Highlands, is confessed on all hands; and to those who applaud the principles of Dr. Adam Smith, the admired author of the "Wealth of Nations," and the more recent illustrations of Mr. Mal- thus, the well-founded claim of the earl of Selkirk to public approbation will be sufficiently obvious, as well for his genuine philanthropy, as for the information conveyed through the pages of his work; in which precision of ideas, and facility of style, unite with importance of the matter, to stamp a high value on it, and to establish the qualifications of its noble author to excel in the republic of letters.
Switch Earls.
LINDSAY (ALEXANDER), EARL OF BALCAR- 
RAS, and Lord Lindsay, of Cumbernauld; A General 
in the Army, and Colonel of the 63d Regiment of Foot; 
succeeded his father, James, the late earl, in February 
1767; married, in May 1789, Elizabeth, daughter of 
Charles Dalrymple, esq. by whom he had issue, Eliza-
abeth-Kelth; James, lord Lindsay, born August 23, 
1784, a major in the army, and heir apparent; Charles; 
Robert; Richard and Edwin, twins; and Anne. 

John, the ancestor of this noble family, was, by 
James VI. made one of the senators of the college of 
justice, secretary of state, and a commissioner of the trea-
ury. He married Margaret Lyon; and, dying in 1590, 
left David his heir, who was created lord Lindsay; he 
mustied Sophia, daughter of Alexander Seton, earl of 
Dunfermline, and left a son, Alexander, second lord; 
who was, by Charles II. created earl of Balcarres; he 
mustied Anne Mackenzie, daughter of Colin earl of Sea-
forth; and had issue two sons, Charles, second earl, and 
Colin, third earl; and the third son, and, on his 
dearth, was succeeded by his son Charles, the second 
earl; who dying unmarried, was succeeded by his bro-
ther Colin, third earl, who mustied three wives. By 
the first, Jane Carnegie, daughter of David, second 
earl of Northesk, he had a daughter, Anne, who married 
Christian, earl of Kellie, and left a son, John, second 
Earl; who dying unmarried, was succeeded by his bro-
thor Colin, second earl, of Rox-
burgh, he had a daughter, married to John Fleming, 
sixth earl of Wigtoun: by his third wife, Margaret 
Campbell, daughter of James, second earl of London, 
he had two sons, Alexander and James; and two daugh-
ters, of whom Eleanor was mustied to James Fraser, 
of Dunfermline, third son of William, the second lord Salt-
er Alexander, the eldest son and fourth earl, succeeded 
to the title in 1721; but dying, in 1746, without issue, was 
succeeded by his brother James, the fifth earl, who, in 
1749, mustied Anne, daughter of sir Robert Dalrymple, 
of North Berwick, by which lady he had issue, 1. Alex-
der, the present earl. 2. Robert, a major-general in 
the army, and who died in the West Indies, mustied to 
Mifs Dick, daughter of sir Alexander Dick. 3. Colin, 
deeased. 4. James, killed in the action off Cuddalore 
in Hindoos. 5. William, drowned in his passage to the 
East Indies. 6. Charles, lord bishop of Kildare, 
married Mifs Fydel, and, secondly, Mifs Couinaker. 
7. John, lieutenant-colonel in the army, married lady 
Guilford. 8. Hugh, married Jane, daughter of Alex-
der Gordon, brother to the earl of Aberdeen, and has 
issue. 9. Anne, married to Andrew Barnard, esq. son of 
the late bishop of Limeric. 10. Margaret, married to 
Alexander Fordyce, esq. 11. Elizabeth, married to 
Philip earl of Hardwicke. James, their father, dying in 
1779, was succeeded by his son Alexander, the sixth and 
present earl. 

CREATIONS.—Lord Lindsay, June 7, 1633; Earl of 
Balcarres, in the county of Fife, in 1651. 

RESIDENCE.—Hargh Hall, in Lancahire. 
Motto.—suffer corpa, nonem domen.—The stars my 
camp, the Deity my light. 

RADCLIFFE (ANTHONY-JAMES), EARL 
OF NEWBURY, Vitcount-Kinnaird, and Baron of Flang 
Oraig; born in 1757; succeeded his father, the late 
early, January 2, 1798; married, June 30, 1789, Anne 
Webb, first cousin to the countess of Stafford. 
Sir James Levington, bart. son and heir of sir John 
Levington, of Kinnaird, one of the gentlemen of the 
bedchamber to Charles I. was raised to the dignity of 
vitcount Newbury. After the death of his royal mat-
ther, he quitted England, and joined Charles II. at the 

Heraldry. 

URALER.
Hague in 1650, whom he attended till his restoration, when he was constituted captain of his majesty's guard, and raised to the dignity of Earl of Newburgh, December 31, 1660. He married Catharine, daughter of Thomasius earl of Suffolk, and widow of George lord Aubigny; by whom he had issue Charles, his heir; and, dying in December 1670, was succeeded by Charles, second earl of Newburgh, who married Frances, daughter of Francis lord Bridenell, and sister to George earl of Cardigan; and, dying in 1694, by her left issue an only daughter, Charlotte, countess of Newburgh, who married, first, Thomas Clifford, son and heir apparent of Hugh, third lord Clifford, of Chudleigh, by whom she had two daughters, Frances and Anne. The countess married, secondly, Charles Radcliffe, third son of Francis earl of Derwentwater; by whom she had three sons, James Bartholomew Radcliffe, the third earl, who married Barbara, daughter and heir of Anthony Kemp, of Silindon, in Sussex, esquire, by a daughter of viscount Montagu; and by which lady, who died September 12, 1797, he had issue Anne, who died November 26, 1785; and James Anthony, the present earl. Clement Radcliffe, died May 18, 1788. Charles, deceased. Also four daughters, Charlotte, Barbara, Thomason, and Mary. RESIDENCES.—Silindon Park, in the county of Sussex.

MOTTO.—Si je puis. — "If I can."

GORDON (GEORGE), EARL OF ABOYNE, and Baron Gordon, of Glenlivet and Strathaven; succeeded his father, the late earl, December 28, 1794; married, April 4, 1793, Mila Cope, second daughter of Sir Charles Cope, bart., and has issue, George lord Strathaven, heir apparent, born January 4, 1792; another son, born December 22, 1792; a third son, born January 27, 1794; a daughter, born January 4, 1796; another daughter, born October 15, 1797; a son, born August 15, 1799; a daughter, born August 31, 1802; a son, born February 23, 1806.

This branch of the family of Gordon sprung from George second marquis of Huntley, who married Anne, daughter of the seventh earl of Argyll; by whom he had three sons; George, killed at the battle of Alford, in his father's lifetime, and had no issue; Louis, marquis of Huntley, who succeeded his father, and held the duchy of the dukes of Gordon; and Charles, who having manifested his loyalty to Charles I., and rendered important services to Charles II. during the interregnum, was, in recompense of those services, raised to the dignity of earl of Aboyne. He married Elizabeth, daughter of John, earl of Kinghorn; and had issue, three sons; Charles, second earl; George, and John; and a daughter, Elizabeth, married to a son of George earl of Cromartie. His lordship died in 1780, and was succeeded by his eldest son Charles, second earl of Aboyne; who died in 1795, having married Elizabeth, daughter of Patrick Lyon, earl of Kinghorn, (who changed his title to that of Strathmore,) which lady died June 5, 1796, and left issue three children, his eldest son, married to George Kinnaird, esq., ancestor of the lords Kinnaird; Elizabeth, died unmarried; Grace, married to James Grant, esq.; and John, his successor, who married Miss Grace Lockhart, daughter of George Lockhart, esq., and by her (who married, secondly, the elder earl of Murray, and died unmarried), left issue two sons and a daughter, Grace, married to William Graham, esq.; John, the third earl, dying in 1732, was succeeded by his eldest son, Charles, the fourth earl; who married, first, Margaret, daughter of the seventh earl of Galloway; by which lady he had the following issue: George, the present earl; Catharine, died young; Margaret, married to William Beckford, esq., by whom she had issue two daughters, and died in 1736. His lordship married, secondly, in May 1776, Mary, daughter of James, fourteenth earl of Morton, by whom he had issue Douglas Gordon Hallyburton, a major, and quarter-master general to the army; born December 2, 1746. James Batholomew, third earl, died January 2, 1768, and was succeeded by Anthony James, the fourth and present earl. The presumptive heir is Francis Eyre, esq., of Walworth Castle, Northamptonshire.

COCHRAN (ARCHIBALD), EARL OF DUNDONALD, and Lord Cochran; married, October 7, 1741, Anne, daughter of captain Gilchrist, of the royal navy; by which lady, who died November 13, 1784, he had issue five sons, of which Thomas, lord Cochran, a captain in the royal navy, and heir apparent, born December 24, 1775, is M.P. for the city of Westminster; William Erskine, a lieutenant in the fifteenth dragoons; Archibald, a captain in the royal navy. His lordship married, secondly, April 12, 1788, Mrs. Mayne. William Cochran, who was created, by Charles II. Baron Cochran and Earl of Dundonald, married Eupheme, daughter of Sir William Scott, of Airdrogs, and had two sons; viz. William, and John, the ancestor of the present earl; and a daughter, Grisel, married to George lord Rofs. William lord Cochran, dying before his grandfather; William, married to Grizel, daughter of John, the sixteenth earl of Sutherland; Jane, to John, nineteenth earl of Sutherland; Mary, to Robert, second lord Graham; Robert, married to Eupheme, daughter of Sir William Scott, of Airdrogs; Alexander, married to Eupheme, daughter of Sir William Scott, of Airdrogs; George, the present lord; Eupheme, daughter of Sir William Scott, of Airdrogs; and John, the present earl. Bogington, a major, and quarter-master general to the army; born October 10, 1777; Archibald, a captain in the royal navy. His lordship married, secondly, in May 1776, Mary, daughter of William Beckford, esq. by whom (she had issue two daughters, and died in 1786. His lordship's eldest son George, the present earl; Catharine, died young; Margaret, married to William Beckford, esq., by whom she had issue two daughters, and died in 1736. His lordship married, secondly, in May 1776, Mary, daughter of James, fourteenth earl of Morton, by whom he had issue Douglas Gordon Hallyburton, a major, and quarter-master general to the army; born December 2, 1746. James Batholomew, third earl, died January 2, 1768, and was succeeded by Anthony James, the fourth and present earl. The presumptive heir is Francis Eyre, esq., of Walworth Castle, Northamptonshire.
had two daughters. The eighth earl married Elizabeth, daughter of James Kerr, esq. by whom he had a son, William, who died young; and a daughter, Grizel. After the death of his first counts, his lordship married, secondly, the heiress of Archibald Stewart, of that ilk, by whom he had issue, Archibald, the present earl; Charles, a major in the army, aide-de-camp to Earl Cornwallis, killed at York Town, Virginia; and his widow married, February 19, 1789, Charles Owen Cambridge, esq.; John, married Mrs. Birch, and died November 1804; James, Balli, a lieutenant-colonel in the army, and lieutenant-colonel of the 5th regiment of foot; Sir Alexander Forrester, K. B., a rear-admiral of the white; married, in April 1783, Lady Whate, widow of Sir Jacob Whate, bart. and has issue, three sons and two daughters; George-Augustus, M. P., for Grampound; Andrew, M. P., for Grampound, married, first, in November 1758, Georgiana, daughter of the Earl of Hopetoun; by which marriage, the Earl of Dundonald, in the county of Ayr, May 12, 1769.

Residence—Culross Abbey, in Perthshire.

RESIDENCE.—Carmichael House, in Lanercashire.

Motto.—Toujours prefr. — "Always ready."

DALRYMPLE (JOHN), EARL, VISCOUNT, and BARON, OF STAIR, and VISCOUNT DALRYMPLE, and a Baronet; succeeded his father, the late earl, in October 1759.

He was, the second viscount, who succeeded John, his father, was the first earl of Stair, sworn of the privy council to queen Anne, and was one of the commissioners in the treaty of union. He married Elizabeth, daughter and heir of Sir John Dundas, of Newlon, in the county of Linlithgow; by which lady he had issue three sons, and one daughter, Margaret, married to Hugh Campbell, third earl of Loudon. The sons were, John; William; and George. John, the eldest, succeeding his father, married Eleanor, widow of James viscount Primrose, and daughter of James Campbell, second earl of Loudon; but by her he had no issue. His lordship affigned his title, which he thought he had a right to do by his patent, to John, son of his brother George; but, the same being contested in the house of peers, their lordships determined it in favour of James, second surviving son of the earl’s brother William; who dying without issue, Nov. 1760, the titles went to his brother John, who was also earl of Dumfries in right of his mother. He married Anne, daughter of William earl of Albemarle, but by her he had no issue. He dying without issue, in July 1763, was succeeded, as earl of Stair, by his cousin, John, the fifth earl. William, married to Penelope Crichton, countess of Dumfries in her own right, and died December 1744; he had a daughter, Margaret, and three sons, William lord Crichton,
ton, who died in October 1744; John, earl of Dumfries, died without issue male, in 1756. James, third earl, died without issue, in 1760, and was succeeded by his elder brother, John, earl of Dumfries, and fourth earl Stair. George, youngest son of the first earl, died in August 1745, having married Euphemia, daughter of Sir Andrew Mytton, of Gogar, baronet, and had issue: John, the fifth earl, to whom his uncle left his estate; and his younger sister, Mrs. Mills Middleton, daughter of the late George Middleton, esq. by which lady, who died February 3, 1798, he had issue: John, the present and sixth earl, who succeeded him in October 1789; William, a general in the army, married to Missf. Mills, daughter of Mrs. Mills; and Eleanor, married to Mr. Ferguson, of Craigmearoch, esquire, and Euphemia. The presumptive heir is William, brother of the late earl.

Creations.—Baron and Viscount Stair, in the county of Ayr, April 20, 1790; and Earl of Stair, and Viscount Dalrymple, of Newkiln and Stranraer, April 3, 1793.

Residence.—Culthorne Castle, in Ayrshire.

Motto.—Fide et fiducia. "By faith and courage."

Residences.—Halkhead Park, in Renfrewshire; and Kelburn House, in Ayrshire. —Town-house, Upper Seymour-street.

Motto.—Dulces priddict. "The Lord will provide."

STUART (JOHN), EARL OF BUTE, and Viscount Baron Mount Stuart; likewise Marquis of Bute, Earl of Windfor, and Baron Mount Stuart, and Baron Cardif, of Cardif Castle, in England. —See Marquis of Bute, among the Peers of England.

JOHNSTON (JAMES-HOPE), EARL OF HOPE-TOUN, Viscount Athtrie, and Lord Hope; Lord Lieutenant and Hereditary Sheriff of Linlithgowshire; and Keeper of Lochmaben; born in 1741; succeeded his father, the late earl, July 12, 1751; married, August 23, 1766, lady Elizabeth Carnegie, daughter of the fifth earl of Northfie, and his wife, daughter of Mr. Hope, of the navy; and had issue: George, who succeeded his father, and was created a baronet, in 1703, by the king; the present and second earl; who married Helen, daughter of William Morrison, of Preston Grange, by whom he had issue: David, David, John, and James, who all died unmarried; Mary, married to Mr. Hope; and Elizabeth, married to Mr. Baillie, of Killearn.

Residences.——Bute, in Renfrewshire; and Cardif Castle, in England. —See Lords Bute, among the Peers of Scotland.
by her had two sons and eight daughters; of whom, Sophia was second wife to James, fifth earl of Fingland, and Seafield; Henrietta, married Francis, fifth lord Napier; Margaret, married John Dundas, esquire; Helen, married James Watson, of Saughton, esquire, and died in 1769: Christiana, married Thomas Graham, of Balgowan; Charlotte, married Thomas lord Erskine; and two of the ladies. The second son, took the name of Weir, having married the heir of Sir William Weir, bart. of Blackwood, by whom she had two sons and a daughter; and on whose death, he married, secondly, Anna, daughter of Henry, first earl of Darlington, by whom he had two sons, and from her she was divorced. He married, thirdly, in 1763, Miss N. Dunbar, by whom he had a son, and three daughters; and died December 30, 1791, leaving his lady with child, who was delivered of a posthumous son, January 20, 1792. The eldest son died September 8, 1794. His second daughter, Charlotte Weir, married John Knight, esquire, of Leight-castle, in Worcestershire.

John, the eldest son, succeeded his father as second earl, and married Anne Ogilvy, daughter of James fifth earl of Fingland; by which lady, who died in February 1753, he had issue, Charles, who died in 1767; James, the present earl; John, and William, who died young; Henry, who died August 27, 1776; Elizabeth, married to George careval, son of the third duke of Queensberry, and died without issue; and nineteen others. He was created a baronet, and married, January 1, 1787; Sophia, married to lord Binning, eldest son of the earl of Haddington. His lordship, married, secondly, Jane, daughter of Robert Oliphant, esquire, by whom he had issue, John, a major-general in the army, and colonel of the 93d regiment of foot; Charles, a major-general in the army, and lieutenant-colonel of the 7th regiment of dragoon guards; married, in April 1767, the eldest daughter of George-Finch hatton, esquire, of Eastwell Park, in the county of Kent; Alexander, a brigadier-general in the army, and lieutenant-governor of Edinburgh-castle; and two daughters, who married Henry viscount Melville. The youngest, Charlotte, married, on August 8, 1793, Charles Hope, esquire, and his issue, a son, born August 27, 1795. The earl married, thirdly, June 14, 1767, lady Betty Leslie, daughter of the fifth earl of Leven; by which lady he had issue two sons, and four daughters; John, married, August 3, 1735, Miss Hope, daughter of Charles Hope, esquire; and Mary-Anne, married, December 12, 1749, Peter Murray, esquire, son of Sir William Murray, bart. of Ochtertyre. His lordship, dying February 12, 1781, was succeeded by his eldest son, James, the present and third earl. —The presumptive heir is the earl's half-brother.

CREATIONS.—Earl of Hopetoun, and Baron Hope, in the county of Lanark, April 17, 1703.

RESIDENCES.—Mandale Park, in Dumfries-shire; and Hopetoun House, in Linlithgowshire.

MOTTO.—At fles non fraudla. —"My hope is not broken."

COLYBAR (WILLIAM-CHARLES), EARL AND BARON OF PORTMORE, VISCOUNT MILLINGTON; succeeded his father, the late earl, July 4, 1785; married, November 5, 1779, Mary Leslie, fifer to the present countess of Rothes; by which lady, who died March 21, 1799, he had issue, viscount Millington, heir apparent, born March 30, 1772, a colonel in the army; married, May 26, 1793, Mary-Elizabetli, daughter of the present duke of Acaffer, who died February 10, 1797, aged 26, leaving a son, Brownlow-Charles, born August 4, 1796. William, a major in the army; Catharine-Caroline, born November 5, 1779; and Francis, born January 30, 1781, and died in May 1786.

Sir W. Colyar, in 1654, having contributed to reduce Ireland, was created viscount Millington, June 28, 1686, in reward of his services, advanced to the dignity of earl of Portmore. He was promoted to the rank of major-general, in May 1702; was appointed commander in chief of queen Anne's forces in Portugal, in the room of the earl of Galway; in January following, was made a general of infantry; and in 1712, commanded part of the army in Flanders, under James duke of Ormond; and marrying Catharine, daughter of sir Charles Sedley, baronet, who, by James VII. was created countess of Dorchester. In 1731, after the death of his wife, he had issue, Edward, the eldest, David lord Milcston, married Bridget, daughter of John, third son of Balthazar, second viscount Campden, by his fourth wife, by whom he had several children; but he, and all his children, dying before the earl, Charles, his brother, succeeded to the title, and married, in 1732, Juliana, duchess dowager of Leeds, daughter of Roger Hele, esquire; by whom, who died November 20, 1794, he had issue, Caroline, born December 1733; who, in 1759, married Nathaniel lord Scarlade; Juliana, born in 1735, married James Dawkins, esquire, of Stadline-Charlton, in Wiltshire, and has issue several children; William-Charles, the present earl. Charles, the late earl, died July 4, 1785, when the present and third earl succeeded.

CREATIONS.—Baron of Portmore, June 1, 1679; Viscount Millington, and Earl of Portmore, April 16, 1703.

RESIDENCE.—Portmore Castle, in Roxburghshire.

MOTTO.——Advance. —VISCOUNTS OF SCOTLAND.

CARY (CHARLES-JOHN), VISCOUNT FALKLAND, and Baron Cary, a Captain in the Royal Navy; succeeded his brother, the late viscount, May 22, 1770. His lordship was born in November 1768; married, August 25, 1802, Miss Aiton, and has issue a son, and heir apparent, born November 5, 1803.

Sir Henry Cary, the first viscount Falkland, married Elizabeth, daughter of sir Laurence Tanfield, chief baron of the exchequer; by which lady he had issue, Lucius, the second viscount; and Anne, married to James, second earl of Home. The viscount, dying, was succeeded by his son, Lucius, the second viscount, who married Letitia, daughter of Richard Morrison, of Tooley Park, in Leicester-shire, esquire; and had issue, Henry, the third viscount, who was a distinguished patron of poetry and literature. He wrote a play, intitled the Marriage Night; and on his death, was succeeded by his son, Anthony, the fourth viscount, who, under Charles II. was paymaster of the forces in the north. William III. was one of the privy council, and twice a commissioner of the admiralty. Dying, in 1654, he left a daughter, Frances, married to John Villiers, earl of Grandison; and one son, Lucius-Henry, fifth viscount; who married, first, Dorothy, daughter of Francis Mulcaster, of the city of London, esquire, and had two sons; but he, and all his children, dying before the earl, Lucius, the late viscount; and George, a general in the army, who married Isabella, daughter of Arthur Ingram, of Barraby, in Yorkshire, esquire; by whom he had issue Elizabeth, married to Jeffery, first lord Amherst; Catharine, married to sir John Ruffel, bart. His lordship, dying in France, was succeeded by his son, Lucas-Ferdinand, the first viscount; who married, first, in April 1734, Jane, daughter and heir of Richard Butler, esquire, widow of lord Vilers, son of the earl of Grandison; by whom he had one son, Lucius-Ferdinand, and four daughters; Jane; Frances; Mary, married to the reverend John Law, archdeacon of Rochester; and Charlotte, married to Anthony Chapman, esquire. He married, secondly, in October 1752, Sarah, daughter and heir of Thomas Inwen, esquire, and widow of Henry earl of Suffolk; which lady died May 28, 1776. His only son, Lucas-Ferdinand, married Anne, daughter of colonel Charles Leith; by whom, who died in 1783, he had two sons; Henry-Thomas, the seventh viscount, born February 27, 1776; Charles, born November 20, 1779. Louisa-Caroline, married to major John Grattan, adjutant-general of his majesty's forces in India, by whom he
ARBUTHNOT (JOHN), Viscount and Baron ARBUTHNOT; born January 16, 1733; succeeded his father, the late viscount, February 27, 1790.

Sir Robert Arbuthnot, who, for his loyalty to Charles I., was created viscount and baron Arbuthnot, married lady Margery Carnegie, daughter of David, first earl of Southesk; by which lady he had issue a son, Robert, the second viscount, who married, first, Mary Keith, daughter of the sixth earl of Marischal, by whom he had Robert, his heir; secondly, Catharine, daughter of John Gordon, esquire; by which lady he had John, and other children; thirdly, Catharine, daughter of Hugh, sixth lord Lovat; and dying, was succeeded by his brother, Robert, the third viscount; who married Anne, daughter of George, eighteenth earl of Sutherland; by whom he had two sons, Robert, fourth viscount, and John, fifth viscount; and, dying in 1692, was succeeded by Robert, fourth viscount; who, dying unmarried, was succeeded by his brother, John, fifth viscount, who married Jane, daughter of William Morrison, of Preffon Grange, esquire; but dying without issue, in May 1756, the title descended to his cousin, John, the sixth viscount; who married, first, Miss Mary Douglas, of Bridgeford; who dying without surviving issue, his lordship married, secondly, Jane, daughter of Alexander Arbuthnot, of Findourie; by which lady, who died March 15, 1786, he had issue, Robert; Hugh, a major in the 52d regiment of foot; Charlotte; and Margaret. His lordship died April 20, 1791, when he was succeeded by his son Robert, seventh viscount; who married Habella, daughter of — Graham, of Morphine, esquire, and had issue, John, the present viscount. His lordship died February 27, 1790, when he was succeeded by his son, John, the eighth viscount.—The presumptive heir is Henry J. Arbuthnot.

CREATIONS.—Viscount and Baron, November 16, 1617.

RESIDENCE.—Hatton Park, in Kincardineshire.

Motto.—Laud Deo.—"Praise be to God!"

BARONS OF SCOTLAND.

SOMERVILLE (JOHN), Lord SOMERVILLE, a Lord of the King's Bedchamber; succeeded his uncle, the late Lord Somerville, in 1792.

Sir Gaultier de Somerville, lord of Whichnour, came into England with William the Conqueror. Sir Gaultier, his eldest son, succeeded him in his English estates; and William, his second son, contracted a friendship with David I. king of Scotland, when that prince was in England, and accompanied him to Edinburgh. He died in 1162; and William de Somerville, his eldest son, obtained from king William the Lion, the barony of Linlawn. He left a son, William, who was the great ancestor of sir Thomas Somerville, first lord Somerville, and Alexander lord Darnley; and by which marriage he got the barony of Cambuskeneth. He was succeeded by his eldest son, William, second lord, who married Janet, daughter of sir J. Mowat, of Stenhouse; and was succeeded by his eldest son, John, in 1436, third lord, who commanded the Clydfeldie horse at the battle of Sark, in 1479. He was also at the siege of Roxburgh, where James II. was slain, in 1460; he married Helen, daughter of Adam lord Hails, and had issue a daughter, married to the eldest son of Duncan Campbell, esq. of Lochow; and a son, William, who married a daughter of Hugh lord Montgomery, but, dying before his father, his brother, the fourth lord, succeeded his grandfather in 1491; and, dying without issue, was succeeded, in 1542, by his brother Hugh, the fifth lord, who was taken prisoner at the battle of Solway, and palled the time of his captivity in England at the feast of the earl of Suffolk; he married Janet, daughter of William Maitland, esq. of Erelington; and was succeeded by his eldest son, James, the sixth lord, who married Agnes, daughter of lord Euanvale and, dying in 1570, was succeeded by his eldest son, Hugh, seventh lord; he married Eleanor, daughter of George lord Seaton; and, his second son dying unmarried, his third son, Gilbert, eighth lord, succeeded to the title, in 1597; and dying without issue, was succeeded by his brother, Hugh, the ninth lord, who, on the pages of honour to James VI., married a daughter of lord Hamilton, of Raploch; and was succeeded by James, his eldest son, who married Lillias, daughter of sir James Bannayme, of Newhall; and left issue a son, James, who married Martha, daughter of — Bannayme, of Coughou; and James, his eldest son, married Elizabeth, daughter of G. Graham, esq. but was unfortunately killed in his father's lifetime, in endeavouring to part two of his friends, who were fighting; therefore his eldest son, James, succeeded his grandfather; and married a daughter of lord Murray, of Deanach. He was also succeeded by his eldest son, James, whose peerage was confirmed by the house of lords in 1722, where he afterwards sat as one of the sixteen peers for Scotland. William Somerville, esq. the last of the English branch of the family, dying soon after, bequeathed to him the estate of Aiton Somerville, in Gloucestershire, which had been in the possession of the Somervilles since the conquest; which James, the twenty-fifth lord, married, first, Anne Bayntoun, of Spy Park, in the county of Wiltis, grand-daughter of Wilmot, earl of Rochester; by her he had issue, James, the late lord, Hugh, who married, first, Elizabeth, only daughter of C. Letbridge, esq. of Welfaw, in the county of Devon; who died in 1765, and left issue one son, John, the present lord. He married, secondly, Mary, eldest daughter of the honourable Wriothesley Digby, of Meryden, in Warwickshire, who died September 8, 1796, leaving issue four sons, and four daughters. 3. Anne, who married George Burges, esq. and died in 1778, leaving issue a son, and two daughters. James, twenty-fifth lord, married, secondly, Frances, daughter and co-heir of J. Rotherham, esq. of Much Waltham, in Essex; by which lady he had issue one daughter, who died young; and his lordship, dying in 1765, was succeeded by his eldest son, James, the late lord; who, dying April 17, 1796, was succeeded by his nephew, John, the present lord.—The presumptive heir is his lordship's brother.

CREATION.—Baron Somerville, in 1424.

RESIDENCE.—Somerville House, in Mid Lothian.

Motto.—Fear God in life.

FORBES (JAMES-OCHANCAR), Lord FORBES, a Major-general in the Army, and second Major of the
Second Regiment of Foot Guards; succeeded his father, the late lord, July 29, 1804; married, July 2, 1792, Elisabeth, eldest daughter of Walter Hunter, esq. of Polmoody and has issue.

Sir James Forbes, who was knighted by James II. in 1719, married, afterward August 10, 1719, to Elizabeth, daughter of William Keith, the first Earl Marischal; by which lady he had two sons, William, his heir; and Patrick, from whom descends Sir Arthur Forbes, bart. father of Arthur, first earl of Granard, in Ireland; and dying, was succeeded by his son, William, second lord; who married, Christian, daughter of Alexander Gordon, third Earl of Huntley, and ancestor of the dukes of Gordon; and by her had three sons, Alexander, Arthur, and John; and on his death was succeeded by his eldest son, Alexander, third lord; who, dying without issue, was succeeded by his next brother, Arthur, fourth lord; who, also dying without issue, was succeeded by his only brother, John, fifth lord, married to Christian, daughter of Sir John Lundy; by which lady he had a son, William; and three daughters; and his lordship, dying, was succeeded by his son, William, the sixth lord; who married a daughter and co-heir of Sir William Keith, of Inverury; and by her had eight daughters; of whom Jane married James, fifth lord, of Carnoustie, and had five sons, from the youngest of whom the family of Forbes of Blackton is descended. His lordship, on his death, was succeeded by his eldest son, John, seventh lord; who married Jane, daughter of James Seton, of Torth, esquire, by whom he had Arthur, his successor; and, dying, was succeeded by his son, Arthur, eighth lord; who married, first, Jane, daughter of Alexander Lord Elphinstone; and by her had a son, William, who succeeded him; and a daughter, Barbara, who married George Mackenzie, second Earl of Seaforth. He married, secondly, Margaret Gordon, daughter of George, fourth Earl of Huntley; and, dying, was succeeded by William, ninth lord; who served with distinguished reputation under the great Gustavus Adolphus, King of Sweden, in his war with the Imperialists; and at the beginning of a civil war in Great Britain, he was one of the commanders in the army sent from Scotland to Ireland, to suppress the Irish rebellion in 1643. He married Anne, daughter of Sir John Forbes, of Pitligio; and had issue, William, who succeeded him; and his lordship, dying, was succeeded by his son William, the tenth lord; who married Jane, daughter of John Campbell, of Calder, esquire; by whom he had three sons, William; Arthur; Archibald; and two daughters; of whom, Mary married William Sutherland, son of James, second Lord Duffus; and, dying, was succeeded by his eldest son, William, the eleventh lord, who married, fifth, Margaret, daughter of Alexander Lord Kellet; and fourthly, Anne, daughter of James Brody, esq. and had issue, two sons, William, and James; and one daughter; and, dying, in 1716, was succeeded by William, his eldest son, the twelfth lord; who married Dorothy, daughter of William Dale, esq. by whom he had issue, William; and, dying, was succeeded by his son, William, the thirteenth lord; who dying a minor, in 1738, was succeeded by his uncle, James, the fourteenth lord; who married Mary Forbes, sister to Alexander Lord Pitligio, by whom he had two sons, and three daughters; of whom, Sophia married —— Cumming, of Kinnimount, esquire; and, dying, was succeeded by his son, James, the fifteenth lord, who married, fifth, Mary Forbes, sister to Alexander Lord Pitligio, and relict of John Forbes, esquire; by whom he had issue, James; Sophia, married to Charles Cumming, esquire; Mary, married to James Gordon, esquire; Anne, married to Thomas Erskine, esquire. His lordship married, secondly, Elizabeth; daughter of Sir James Gordon; by which lady, who died Nov. 5th, 1777, he had issue, James, the sixteenth lord; who married Catharine, only daughter of Sir Robert Innes, bart. by whom, who died April 16, 1805, he had issue, Margery, married, first, to John lord Melchoed, eldest son of the earl of Crighton; and, secondly, March 11, 1794, to John, fourth duke of Athol, and had issue, Mary-Elizabeth, married, July 9, 1785, to John Hay, esq. barrister, in Edinburgh, and died in November 1785; James-Ochancan, the present lord; Robert-Alaster-Cum, a captain in the royal navy; Andrew-Francis; and William, who died February 1, 1792. His lordship, dying July 29, 1804, was succeeded by his eldest son, the present lord.

Creation.—Baron Forbes, 1440.

Residence.—Castle Forbes, in Aberdeen.

Motto.—Grace my guide.

CATHCART (WILLIAM), Lord CATHCART; Viscount Cathcart, and Baron Grevock, of the United Kingdom.—See Viscount Cathcart, among the peers of England, p. 536.

FRASER (ALEXANDER-GEORGE), Lord SALTOUN and ABERNEATHY, a Captain in the Guards; born April 22, 1785; succeeded his father, the late lord, September 13, 1798.

Alexander, third lord Saltoun, married Mary Gordon, daughter of George, fourth Earl of Carnarvon; by which lady, who died in February 1751, he had Alexander, his successor; William, who died without issue; George, the fifth lord; Anne; and Sophia. Alexander succeeded his father, and died in 1751, without issue; whereupon his next surviving brother succeeded. George, the fifth lord, was born in 1750; he married, in 1759, Eleonora, daughter of John Gordon, esquire; and, dying in 1781, left issue, Alexander, the sixth lord, born in 1748; married, in June 1754, Margery, daughter of Simon Fraer, esq. by whom he had Alexander-George, the present lord; Simon, born July 31, 1747; Margaret, born August 29, 1749; William, born October 13, 1741; Eleonora, born July 13, 1748; George, an officer in the army, died January 8, 1799; Henrietta; and Mary. Eleonora married, first, Sir George Ramlay, of Bann, baronet, who was killed in a duel, but had no issue; and the married, secondly, in August 1792, Duncan Campbell, of Lochnell, esquire. Alexander, the sixth lord, dying September 13, 1793, his son, George-Alexander, the present and seventh lord, succeeded. —The presumptive heir is his lordship's brother.

Creation.—Baron Saltoun and Abernethy, 1445.

Residence.—Philorth Castle, in Aberdeen.

Motto.—In God is all.

GRAY (WILLIAM-JOHN), Lord Gray, Postmaster-general in Scotland; born March 1754; succeeded his brother, the late lord, in 1786.

Sir Andrew Gray was among those disaffected persons who, in the reign of James II., were confirmed hereditary lords; he obtained a licence from that king to build the castle of Haltley, in the Carse of Gowry, which his family possessed for several ages, now called Castle Lyon, belonging to the earl of Strathmore; and by Elizabeth his wife, daughter of Sir John Wemyss, of Kincairn, he had issue two daughters; and Andrew, the second lord, from whom descended John, the twelfth lord, who married Eleanor Stewart, daughter of Alexander Lord Blantyre; by whom he had issue, two sons, and one daughter; John, the thirteenth lord; Charles; Anne, married to William Gray, of Baillegaro, esquire; and his lordship, dying in 1738, was succeeded by John; who, in 1741, married Miss Blair, of Kinaunas, near Perth; by whom, who died January 23, 1750, he had issue, Andrew, who died young; Charles, his successor; and William-John, who succeeded his brother; Francis, who married, February 17, 1754, Miss Mary Anne Johnston; Jane, married to Francis lord Donne, son of the earl of Moray, and died in 1787; Helen, married to William Sterling, esq. and died in 1775; Margaret; Barbara, died.
HERALDRY.

[Diagram of heraldic crests and figures representing various families and places such as Caust, Elibank, Ruthven, Kirkcudbright, etc.]
died October 5, 1794; Elizabeth, married to sir Philip Aulff; Anne, married to George Paterfon, esquire; Charlotte, died unmarried; Mary, died young. His lordship died in August 1782, and was succeeded by his son, Charles, the late lord; on whose death, in 1786, unmarried, his brother, the present and fiftteenth lord, succeeded. The presumptive heir is Francis, brother to the present lord.

Creation.—Baron Gray, in 1445.

Residence.—Kilmarnock Castle, in Perthshire.

Motto.—Ancestor, salt anchor.

ELPHINSTONE (JOHN), LORD ELPHINSTONE, Lord Lieutenant of Dumbartonshire, a Major General in the Army, and Colonel of the 42d Regiment; born December 26, 1775; succeeded his father, the late lord, November 5, 1783; was succeeded by John, the eleventh lord, who married Anne, daughter of James, third lord Ruthven, and by her had issue, John, the twelfth lord; and several daughters; of whom the youngest married, September 3, 1805, David Erksine, of Cardross, esquire. Charles, succeeding to the estate of the earl of Wigtoun, took the name of Fleming; and dying, August 19, 1794, was succeeded by his son, John, the present and twelfth lord. The presumptive heir is Charles Elphinstone Fleming, a captain in the royal navy, his lordship's brother.

Creation.—Baron Elphinstone, 1509.

Residence.—Cumberland House, Dumfriethshire.

Motto. — "Caute caufed it."

SANDILANDS (JAMES), LORD TORPHICHEH, in Wigtounshire; born in 1759; succeeded his father in 1765; married, April 7, 1795, Anne, only surviving daughter of sir James Inglis, of Crammond, bart.

James, grandfather of Walter, sixth lord Torphichen, married four wives, viz. first, Jane, daughter of Alexander Lindsay, esquire, by whom he had no issue; secondly, Catherine, daughter of William Alexander, and sifter to William, second earl of Stirling, by whom he had issue Anne and Catharine; thirdly, Anne, daughter of Alexander, sixth lord Elphinstone. His fourth wife was Chrifiana, daughter and sole heir of James Primrose, esquire, brother to Archibald Primrose, ancestor of the earl of Roseberry and the viscount Primrose; by which lady he had one surviving son, James, his successor; and two daughters: Chrifiana, married to Robert Pringle, esquire, and Magdalen, who died unmarried. His lordship, dying in 1796, was succeeded by James, his eldest son, who married Jane, daughter of Patrick, first earl of Marchmont, and had eight sons, and three daughters: James, died unmarried; Walter, the late lord; Patrick, died without issue; Alexander, died young; Andrew; George, died young; Charles; Robert; Grizel; Chrifiana, died unmarried; Wilhelmina-Caroline. His lordship was succeeded by his son, Walter, the late lord, in 1753; who married Elizabeth, daughter of Dr. Sandilands, by whom he had issue, James, the present lord; Alexander; Walter; and Hugh; and, dying in 1763, was succeeded by the present lord—The presumptive heir is Alexander, his lordship's brother.

Residences.—Calder House, in Mid-Lothian.

STEWART (ROBERT-WALTER), LORD BLANTYRE, in the county of Lanark; Lieutenant Colonel of the 42d Regiment; born December 26, 1775; succeeded his father, the late lord, November 5, 1783; married, July 31, 1806, lady Carmichael.

Walter Stewart, commissary, of Blantyre, and gentleman of the bed-chamber to James VI. by whom he was created a baron, dying in 1616, left, by Nichol his wife, daughter of James Somerville, two sons: William, his successor; and Walter. William, second lord, succeeded, married Ellen, daughter of sir William Scott, of Ardros; and had two sons, William, third lord, who succeeded; and, dying without issue, Alexander, his brother, and fourth lord, succeeded, and married Margaret, daughter of sir John Shaw, of Grench, bart., and had a son Alexander, the fifth lord; who succeeded, and married Anne, daughter of sir Robert Hamilton, of Patsmon, one of the judges of the court of feilion; and, dying in 1704, left four sons: Walter; Robert; John; Hugh; and as many daughters; of whom, Eleanor married John, twelfth lord Gray. Walter, sixth lord, succeeded his father, but dying unmarried, in 1713, was succeeded by his brother Robert, seventh lord Blantyre, who married first, Helen, daughter of John, fourth earl of Strathmore, but by her had no issue;
Colville (John), Lord Colville, of Culros;Inspector general of the Out-ports in Scotland; succeeded his brother, the late Lord, May 22, 1799; married July 18, 1795, Miss Webber, who died August 1, 1788, leaving alive five sons, and three daughters, viz. Charles, died in infancy; Isabella, Alexander, and Elizabeth, both died infants; James, who died February 18, 1786; Anne, died unmarried; John, in the royal navy, married Miss Ford, sister to Sir Francis Ford, Bart., by whom she had James-Edmund, the ninth and present lord; and died, January 2, 1775; married, April 13, 1784, Miss Isabel, daughter of Sir John Clavering, by whom she has issue, Frederic-William; Edward, Charles; George; and four daughters. Frederick, born November 25, 1774, died an infant. James, died without issue, in 1785, married Miss Eliza Turner, by whom she had James-Edmund, the ninth and present lord.

Creation.—By Royal charter, March 2, 1626; and advanced him to the title of Lord Colville, in 1609.

Motto.—Thou shalt want, ere I want.

NAPIER (Francis), Lord NAPIER, of Merchiston; Lord High Commissioner to the General Assembly of the Church of Scotland, and Lord-Lieutenant of Selkirkshire; born February 25, 1753; succeeded his father, January 2, 1775; married, April 13, 1784, Maria, aged eight years, eldest daughter of Sir John Clavering, Bart., by whom she has issue, Mary Margaret, born September 9, 1785; William John, heir apparent, born October 15, 1786; Charlotte, born January 18, 1788, and died June 6, 1789; Anne, born December 11, 1789; Sophia, born December 21, 1791; Francis, born July 30, 1793; Charles, born October 24, 1794; and a son, born June 1, 1795.

Sir Archibald Napier, knight, was gentleman of the privy chamber to James VI. and attended that monarch when he went to England to take possession of the crown on the death of queen Elizabeth. He was made one of the privy council in 1615, treasurer-deputy of Scotland in 1622, lord justice clerk, and one of the judges of the court of sewers, in 1623. Charles I. created him a baronet, Marci 2, 1626; and advanced him to the title of lord Napier, in 1627. He married Margaret, daughter of John, fourth earl of Montrose, by whom he had issue one son, Archibald, and two daughters; Margaret, married to Sir George Stirling, of Keir; and Lilias. Archibald, second lord Napier, distinguished himself in the civil wars, under his uncle the marquis of Montrose; and died in Holland, in 1660, leaving issue by his wife, Elizabeth, daughter of John, eighth earl of Mar, two sons, and three daughters, viz. Archibald, his heir; John, killed in a sea-fight against the Dutch, in 1674; Jane, married to Sir Thomas Nicholson, of Garnoch; Margaret, and one daughter.

Archibald, third lord Napier, obtained a new patent from Charles II. further granting the honours to his heirs female; and dying a bachelor, in 1683, was succeeded by his nephew, Sir Thomas Nicholson, of Garnoch, only child of his eldest sister. Thomas, fourth lord Napier, dying under age, without issue, was succeeded by his aunt, Margaret, who became baroness of Napier. Her ladyship married John Brisbane, esq. secretary to the admiralty, by whom she had one son, John, in the royal navy, who died on-board the Deptford man-of-war, on the coast of Guinea, in 1704; and one daughter, Elizabeth, married to William Scott, son and heir of Sir Francis Scott, of Thirlestane, bart., by whom she had one son, Francis, afterwards lord Napier; and two daughters, Margaret; and Anne-Isabella-Elizabeth. Margaret, lady
lady Napier, dying in 1706, was succeeded by her grandson.

Francis, who became the fifth lord Napier, and attorney-general of Napier, in consequence of a claueus in the last-mentioned patent, married, first, lady Henrietta Hope, daughter of Charles, first earl of Hopetoun; and by her had issue five sons and a daughter: William, his heir; Charles, a captain in the navy, who married Grizel, daughter of Sir John Warrender, of Lochend, bart. and secondly, Christian, daughter of Gabriel Hamilton, of Weilburn, eq. Francis, a lieuten-ant-colonel of marines, married Elizabeth, daughter of John Greenaway, eq. of Portsmouth, and died in 1779. John, a lieutenant in the army, who died in Germany in 1793. Mark, a major-general in the army, married, first, Anne, daughter of John Nelfon, eq. of Craignaff; and, secondly, Margaret, daughter of Alexander Simpson, eq. of Conraig; Henrietta, died an infant. His lordship married, secondly, Mary, daughter of George Johnston, eq. of Dublin; by which lady, who died September 25, 1795, he had issue five sons and three daughters: George, a colonel in the army, died in 1769; Patrick, a colon in the navy; James John, a lieutenant of marines, killed on-board the Fox frigate, in 1776. Stewart, a lieutenant of marines, died in 1778; Elizabeth, died an infant; Hether, married to Samuel Johnston, eq. who died in 1780, Alexander, procurator fiscal in the island of Ceylon, and two daughters; and Mary, who died in 1765. His lordship, dying April 11, 1773, was succeeded by his eldest son, William, sixth lord; who married Mainie-Anne, daughter of Charles, eighth lord Cathcart, by whom he had one son, Francis, and four daughters: Mainie-Schaw, married the Rev. Alexander D.D., and died in 1806. Henrietta; Mary; Elizabeth, died in 1778; and Jane-Williams, died in 1779. His lordship was lieutenant-colonel in the army, and deputy-adjutant-general of the forces in North Britain; and, dying January 5, 1775, was succeeded by his son, Francis, the seventh and present lord.

Creation.—Baron Napier, May 4, 1647.

Residence.—Thirlsflane Castle, in Selkirkshire.

Motto.—Ready, aye, ready!

FAIRFAX (BRYAN), LORD FAIRFAX, of Came¬
ron, in holy orders; married Elizabeth Carey, and has a male heir. His lordship is the only surviving son of William Fairfax, fourth son of Henry, fourth lord Fairfax; and his claim to this barony was confirmed by the house of peers in 1800.

Sir Thomas Fairfax, of Denton, in the county of York, was created baron Fairfax, by Charles I. He married Helen Alke, and died in 1649, leaving issue, Ferdinando, the second lord, who married, first, lady Mary Sheffield; and second, Rhoda Chapman; and died in 1647, leaving issue Thomas, third lord; who married Anne, daughter of Horatio, lord Vere, of Til¬bury; and died in 1679, without issue male. Henry, of Oglethorpe, in the county of York, second son of the first lord, married Mary, daughter of Sir Henry Chol¬ley, and died in April, 1665, leaving a son, Henry, who succeeded as fourth lord, and married Frances, daughter of Sir Robert Barwick, of Tollton, in the county of York, and died in 1688, leaving issue, Thomas and Henry. The elder, married, first, lord Fairfax, who married Catharine, daughter and heir of the lord Colepepper, and left issue, three sons, viz. Thomas, the sixth lord, died unmarried in 1781; Henry Colepepper, second son, died in the lifetime of his eldest brother, in 1734, without issue; Robert, third son, succeeded his eldest brother as the seventh lord; was twice married, but died, without issue, in 1793; when the whole male issue of Thomas, eldest son of Henry, lord Fairfax, became extinct. The title and dignity then de¬

cribed to John Dive, eq. William and Richard died with¬
Walter, of whom Philip, the eldest, being the heir and, dying unmarried, in 1755, the honour devolved upon Walter, son of Edward, uncle to the two last lords; which Walter, eighth lord, married Miss Anne Hutchinson; Walter Hutchinson, the present lord; William, the present lord, died July 29, 1805, when he was succeeded by his eldest son, Walter Hutchinson, the present and ninth lord.

**Creation.**—Baronet, May 22, 1677; and Lord Advocate, in the county of Forfar, November 28, 1677.

**Motto.**—Namis et patria aeternitatem. 

**Residence.**—Aston House, in the county of Forfar.

**Mackay (Eric), Lord Reay,** in the county of Caithness, and a Baronet; succeeded his cousin, the late lord, in 1797.

Donald Mackay was the first Baron Reay; created by Charles II. He married Barbara, fifth sister of Colin MacKenzie, first earl of Seaforth; and left issue John, the second earl; who was succeeded by George, who married first, Margaret, daughter of lieutenant-general Hugh Mackay; and by her he had issue, Donald; and, secondly, Jane, daughter of John Sinclair, of Ullibster, esquire, and by her he had issue; by his third wife he had George, an advocate, and other issue; and, dying, left four sons and four daughters: Donald, his successor; Hugh, of Bighouse, a colonel in the army, who left no issue, but was succeeded in his estate by his grandson, Mr. Mackay, of Bighouse; who, in 1767, married John Mackay, of Inlandbank, esquire, guardian of the late lord Reay, and a defendant by the main issue from the same family; by whom he had issue, John, the second earl; and a daughter, Anne, daughter of Eric Sutherland, lord Duffus; by whom he had Eric, who succeeded on the death of Hugh, sixth lord, who has two brothers, Germans, Alexander and Donald, and Mary and Anne. Alexander Mackay, fourth son of George, third lord, married Miss Kerr, daughter of William Kerr, of Etal, in the county of Northumberland; by whom he had no issue; and died a lieutenant-general in the army, May 31, 1789. George, third lord, died in 1748, when he was succeeded by his son, Donald, fourth lord, who married Marianne, daughter of Sir Robert Dalrymple, by whom he had Eric, his successor; and, secondly, Christian, daughter of Mr. Sutherland, by whom he had issue, Hugh, the late lord, who died January 26, 1797, unmarried; upon whom, Eric, the present lord, succeeded; and a daughter, Mary, married to major Edgar. George, fifth lord, who succeeded in 1761, married Marianne, daughter of his uncle, Charles, laird, in 1757; but third lord, married his lordship married, secondly, a daughter of Mr. Farley, by whom he had issue three daughters, who survived him; he married, thirdly, a sister of Sir William Gordon, but by whom he had no issue; and, dying in 1768, was succeeded by his brother, Hugh, the sixth lord, who died in 1797, and was succeeded by Eric, the present and seventh lord.

**Creation.**—Baron Reay, June 20, 1678.

**Residence.**—Reay Castle, in the county of Caithness.

**Motto.**—Manus forte. "With a strong hand."

**Maclellan (Sholto-Henry), Lord Kirkcudbright;** born August 15, 1771; succeeded his father, John, late lord, December 25, 1801.

Sir William Maclellan, who obtained many lands in Galloway from James IV. married Elizabeth, a daughter of the family of Murray; and being slain at the battle of Flodden, in 1513, left issue Thomas, his heir, who was created in 1516, in a feud in the High-fleet of Edinburgh, by the barons of Drumlanrig and Lochinvar. Thomas, his son, succeeding, married Grizel, daughter of John Maxwell, lord Herries, and had three sons: Robert, William, and John. Robert, first lord, the eldest, was knighted by James VI. to whom, as well as to Charles I. he was gentleman of the bed-chamber; and by letters patent under the great seal of Scotland, was created a baron; but, dying without issue, the honour descended to his nephew, Thomas, the son of his brother, William, the second lord; which Thomas marrying lady Jane Douglas, daughter of William, first earl of Queenberry, and dying also without issue, the title descended to John Maclellan, the third lord of Burg, son of John, younger brother to the first lord; he married Anne, daughter of Sir Robert Maxwell, of Orchardston, and, dying in 1665, left a son, William, the fourth lord; who dying unmarried, the title lay dormant till 1722, when he was succeeded by his uncle's son, James Maclellan, the fifth lord, who claimed the peerage in 1729; but dying without issue, in 1734, he was succeeded by his cousin, William Maclellan; who married Margaret Murray, and, dying in 1776, was succeeded by John, the seventh and last lord, whose title was confirmed by the house of peers, May 3, 1773; he married Miss Bannister of the county of Southampton; by which lady, who died June 15, 1797, he had issue, Elizabeth, born April 12, 1769; married, May 21, 1793, to Finlay Ferguson, esquire, Sholto-Henry, the present lord; Camden-Grey, born April 20, 1774. His lordship, dying December 24, 1801, was succeeded by his eldest son, Sholto-Henry, eighth and present lord. The presumptive heir is Camden-Grey, brother to his lordship.

**Creation.**—Baron Kirkcudbright, May 25, 1853.

**Motto.**—"Think on."

**Murray (Alexander), Lord Elibank, and a Baronet; Lord-lieutenant of Tweedaleshire; succeeded his uncle, the late lord, November 12, 1783; married Miss Montolieu, daughter of colonel Montolieu; by which lady, who died January 19, 1802, he has issue, Alexander, heir apparent, married, March 3, 1855, Miss Oliphant, of Banchilton; Elizabeth; Mary; and George. Patrick, who succeeded as fourth lord Elibank, married a daughter of George Stirling, of Edinburgh, esquire; by whom he had issue five sons; Patrick, the fifth lord, who died in 1778; George, the sixth and present lord; Gideon, the seventh lord; whom William and Lincoln, married the honourable Miss Montolieu; daughter of Sir St. Hippolite, and died June 1778, leaving issue; Alexander, the present lord; and David, who married, October 8, 1783, Elizabeth, daughter of the right honourable Thomas Harley, son of Robert, first earl of Oxford, by whom he had issue a son, and three daughters; and their father died May 8, 1794; James, a general in the army, and late governor of Minorca; who died in June 1794, leaving a son, James, Patrick, born in 1783, a captain in the army, married, January 1803, to Elizabeth, daughter of Edward Ruthworth, esquire, and two daughters; Barbara, married to Sir James Johnston, father of Sir William Pulteney, and grandfather of the countess of Bath; Elizabeth; Anne, married to James Ferguson, esquire, one of the lords of session in Scotland, and died in January 1793; Janet, married to Sir Robert Murray, father of Sir James Pulteney, baronet, a lieutenant-general in the army, who married, July 1794, Henrietta-Laura, countess of Bath; Mary; Helen, married to James Stewart, esquire. His lordship died in 1735; leaving issue, Eric, the eldest son, Patrick, fifth lord, who married Mary-Margareta, lady dowager North, widow of William lord North and Grey;
Grey, and, dying August 9, 1778, without issue, he was succeeded by his next brother, George, the sixth lord, an admiral of the British navy, who attended lord Anson in his voyage round the world; married lady Isabella Mackenzie, daughter of George earl of Cromarty, January 2, 1727; had four daughters, and five sons, of whom sir William, the youngest, was beheaded at Glasgow, for his loyalty to Charles I. and from him his lordship is lineally descended.

Andrew Rollo was knighted by James VI. and created a baron by Charles II. He married Catharine, daughter of James Drummond, lord Madder, and had four daughters, and five sons, of whom sir William, the youngest, was beheaded at Glasgow, for his loyalty to Charles I. and from him his lordship is lineally descended.

Rollo (John), Lord Rollo; born in 1773; succeeded his father, the late lord, in 1783; married, June 11, 1806, Agnes, daughter of George, esq. of Gayfield Place.

Vol. IX. No. 613.
married the reverend Mr. Dana, and had issue two sons, George, a lieutenant-colonel in the army; and Henry, who died June 6, 1798; Margaret. His lordship dying August 1, 1767, was succeeded by his son, George, the seventh lord; married, July 23, 1777, to Elizabeth, daughter and sole heir of Griffith Rannfo, esq. of New Palace Yard, Wemminster; by which lady, who died October 21, 1805, he had issue, George-William-Ran- 

Born in June 1788; William, born June 4, 1792, and died November 29, 1804, to William Courtenay, esq. eldest son of John Lindfay, the fourteenth earl of Craufurd, by O'Bryen (Mary), Countess of the Islands of Corkney, Viscountess Kirkwall, and Baroness Degeh-
The family of Fitzgerald is descended from Maurice, his father, William, who, among the chief-tains that accompanied Richard, surnamed Strongbow, earl of Pembroke, in the conquest of Ireland. Gerald, his son, was created, by king John, in 1205, earl of Offaly, and was made chief justice of Ireland. Maurice, second lord Offaly, his son, was constituted by Henry III. in 1229 and 1232, lord justice of the kingdom of Ireland. This nobleman, like his predecessor, performed many eminent feats in battle; having defeated and killed Richard Marshal earl of Pembroke; and taken prisoner Cormac Macarthy O'Melaghlin, a leader of the insurgents. He afterwards marched against the O'Donnells and the O'Neills; and assisted Henry III. in 1244, in an expedition against the Welsh. At length, he took upon him the title of St. Francis, and died in religious retirement, May 8, 1257; leaving issue, Thomas, third lord Offaly; and Maurice, who was constituted by Henry III. June 23, 1275, lord justice of the kingdom of Ireland.

John, fourth lord Offaly, his son, and Maurice, his elder brother, raised an army for the suppression of the insurgent Macarthy More, in 1261; and were killed in fighting against him. Thomas, fifth lord Offaly, grandson of John, was carried while an infant in the cradle by an ape to the top of the steeple of the abbey of Lismore, and afterwards brought down again and restored to his cradle; in memory of which singular event, his posterity have ever since borne an ape for their crest, and two apes for their supporters. He was constituted by Edward I. April 5, 1295, lord justice of the kingdom of Ireland, and had issue, John, seventh lord Offaly, and Maurice, created by Edward III. August 27, 1329, earl of Desmond. Lord Desmond was constituted, July 20, 1355, lord justice of Ireland; and upon various occasions headed an army in defence of his country. The branch of Desmond disfigured the point of seniority with the ancestors of the duke of Leinster; and the title became extinct in 1627.

John, seventh lord Offaly, performed considerable services against Edward Bruce, and the Scottish invaders, in 1325; and was by Edward II. May 13, 1316, created earl of Kildare. Thomas, second earl of Kildare, his son, was constituted lord justice of the kingdom of Ireland. Maurice, fourth earl of Kildare, his son, served with great reputation under Edward III. at the siege of Calais. Gerald, fifth earl of Kildare, his son, was appointed by Henry IV. September 7, 1405, lord justice of the kingdom of Ireland. Thomas, seventh earl of Kildare, his grandson, was constituted by Henry VI. in 1445, lord deputy of the kingdom of Ireland, which office he exchanged, in 1463, for that of lord high chancellor of that kingdom. Gerald, eighth earl of Kildare, his son, succeeded his father in the office of lord deputy of the kingdom of Ireland; and, after
Gerald, ninth earl of Kildare, his son, was constituted February 18, 1504, lord high treasurer of the kingdom of Ireland, which office he exchanged, upon the decease of his father, for that of lord lieutenant of Ormond, his brother-in-law, he was deprived of his government in 1519, and again restored, August 4, 1524. Two years after, he was imprisoned in the Tower of London, and, being restored to his office, was again summoned to appear before Henry VIII. in 1530. During his absence he left Thomas lord Offley, afterwards tenth earl of Kildare, his son, to command in his room. A report being propagated, that earl Gerald had been beheaded in London, the young nobleman, together with his uncles James, Oliver, Richard, John, and Walter, met the English government at defiance; and committed various hostilities in open arms. He was at length taken prisoner, and together with his five uncles sent to London, and suffered death February 2, 1536. Earl Gerald, his father, opprobred with grief at the inconsiderate conduct of his son, died in confinement, December 12, 1534. He had issue, among other children, William Elizabeth, who was created by the famous Henry earl of Surrey, son of Thomas third duke of Norfolk, under the appellation of "the fair Geraldine.

Gerald, eleventh earl of Kildare, son of Gerald, was restored to his estates by Edward VI. and to his titles by queen Mary. Soon after the accession of queen Elizabeth, he performed eminent services against the rebels Tyrconel, who was by James I. appointed lord lieutenant of the kingdom of Ireland, he was thrown into confinement till the period of the battle of the Boyne, July 1, 1690; upon which occasion he escaped from his guard, and exerted himself with great spirit and intrepidity to preserve the peace of the metropolis. He was father of Robert, nineteenth earl of Kildare, who was the last bearer of the title, and bore the issue of the present royal family upon the death of queen Anne. Earl Robert had issue, James, twentieth earl of Kildare; and Margaretta, married to Wills Hill, earl of Hillborough. She died January 15, 1676. James, twentieth earl of Kildare, was by George II. constituted, in March 1760, master general of the office of ordnance in the kingdom of Ireland; and created viscount Leinster of Tulfow in the kingdom of Great Britain. He was, by George III. farther created earl of Offley, and marquis of Kildare, in the kingdom of Ireland; and duke of Leinster in that kingdom. He married, February 7, 1747, Emily, daughter of Charles, second duke of Richmond; by which lady he had issue, George, earl of Offley, born January 15, 1748, and died in 1762. William Robert, the second duke. James, born June 30, 1726, created, October 20, 1800, lord Lecale, of Ardglud. Henry, born July 30, 1760, married Charlotte, daughter and heir of the honourable Boyle Walingham, of Shannon. Edward, born October 25, 1765, married, in December 1792, Pamela, daughter of the duke of Orleans; and died June 4, 1798, leaving issue, Edward, Pamela, and Lucy.

Robert-Stephen, born January 15, 1765, late ambassador to the court of Lisbon; married Sophia, daughter of Charles Fielding, esq. by Sophia Finch, sister of George earl of Winchelsea and Nottingham, and daughter of the honourable William Finch, by his first wife Charlotte Ferron; daughter of John, earl of Pembroke; by whom he has issue Matilda, Emily, Robert-George, Charles-Fielding, Sophia-Charlotte, and Geraldine-Augusta. Gerald, born in 1766, and left at sea. Augustus-Joseph, died an infant. George-Simon, born in 1783; Emilia-Maria-Margaret, born March 15, 1772; married to Charles Coote, earl of Bellamont, who died November 1800, leaving issue four daughters and co-heirs, Mary, Prudentia, Emily, and Louisa; upon which the earldom of Bellamont became extinct; Charlotte-Mary-gertrude, married to Joseph-Holden Strutt, esq. of terling Place, in the county of Essex, and has issue, Emily-Anne, John-James, and Charlotte-Elizabeth, Sophia-Eliza-Mary, born September 26, 1762; Fanny-Charles-Elizabeth, died in 1762; Lucy-Anne, born February 5, 1771, married, in 1802, Thomas Foley, esq. of Albermarle, in Carmarthenshire, and a captain in the royal navy; also Henrietta-Catherine, Caroline-Elizabeth-Mabel, Louisa, and Caroline, who died young. After the death of the late duke, the duchess was married to Henry William Papillon, fourth baron of George Ogilvie, first baron of Miltown and Achantyam; and by her grace she has issue, two daughters and one son, viz. Cecilia-Margaret, married to Charles Locke, esq. Emily-Charlotte, married to Charles G. Beaucler, only son of the late honourable Thomas Beaucler, by lady Diana, sister to George third duke of Marlborough. His grace died November 20, 1773, and was succeeded by his eldest son, William-Robert, the second duke, born March 13, 1749; married, November 4, 1775, Emilia-Olivia St. George, only daughter and heir of Uher lord St. George, baron of Hatley St. George, by which lady, who died June 23, 1798, he had issue, 1. George, marquis of Kildare, born June 20, 1783, to whom his majesty George III. food fponor, died February 10, 1784. 2. Augustus-Frederic, the present duke, to whom his royal highness the prince of Wales food fponor. 3. William-Charles, born January 4, 1793. 4. St. George-Richard, born August 14, 1794. 5. Henry-Wentworth, died an infant. 6. Mary-Rebecca, born in 1777; married to lieutenant-general sir Charles Ros. 7. Emily-Elizabeth, married, in 1821, John-Joseph Henry, esq. nephew of Francis earl of Moira. 8. Geraldine-Mabel, died in 1790. 9. Elizabeth-Mary, married, in 1805, to sir Edward Littlehales, bart. of Aghone, in the county of Sligo. 10. Isabella-Charlotte, born in 1780. 11. Cecilia-Olivia, married in 1806, to Thomas, third lord Foley. 12. Olivia-Leititia-Catharine, married in 1806, to Charles, eighth lord Kinnaird. 13. Augusta-Ostavia, died young. His grace died October 20, 1805, when he was succeeded by his eldest son, Augustus-Frederic, the present and third duke. —The presumptive heir is William Charles, next brother of the duke.

CREATIONS.—Baron Offley, in King's County, 1015; Earl of the town of Kildare, May 14, 1416; Marquis of Kildare, and Earl of Offley, March 3, 1761; Duke of Leinster, November 26, 1766; Viscount Leinster, of Tulfow, in the county of Buckingham, February 21, 1747. Residence.—Leinster House, in the county of Dublin. Motto.—"From a foe—"I will burn."

IRISH MARQUISES.

DERRSD (HENRY DE LA POER), MARQUIS OF WATERFORD, Earl of Tyrone, Viscount Tyrone, Baron De la Poer, Baron Beresford, of Beresford, in Ireland; Baron of Waterford; father to the present duke of Britan; Governor and Czutzs Rotulorum of the City and County of Waterford; born May 23, 1772; succeeded his father, the late marquis, December 3, 1800; married, August 29, 1805, lady Susan-Hulsey Carpenter, daughter
daughter and heir of George earl of Tyrconnell, by Sarah, youngest daughter of John lord Delaval.

The family of Beresford was of considerable eminence in the reign of William II. John Beresford, who was knighted by Richard II. had issue, Thomas, who served with Richard II. in the war against the Scots; and Humphrey, grandfather of Tristram, who was created a baronet of the kingdom of Ireland, by Charles II. in 1662. Sir Tristram, third baronet, his grandson, signified himself on the side of William III. at the period of the revolution; and was attainted by the Irish parliament convened by James II. May 7, 1689.

Sir Marcus, fourth baronet, his son, married Catharine, baroness La Poer, daughter and heir of James La Poer, earl of Tyrone; and was created by George I. Baron Beresford, and viscount Tyrone, of the kingdom of Ireland, and by George II. earl of that county. The issue of this marriage was, George De la Poer, the late marquis; John, born March 14, 1737, died in November 1805, having married, first, November 17, 1760, Anne-Constantia Ligondes, grand-daughter of the count de Ligondes; by which marriage, their eldest son, William, the 1st Marquis of Waterford, by his marriage to Sarah, first daughter of Henry, earl of Portland, and by her had issue, George, 2nd marquis; John-George, lord bishop of Raphoe, brother to the marquis. The present and 2nd marquis, the right honourable Theophilus Jones. Sir John Rawdon, earl of Moira, of the kingdom of Ireland; and died August 22, 1742, he had issue, Anne, married to John Rawdon, earl of Moira, of the kingdom of Ireland.

The family of Beresford was of considerable eminence in the reign of William II. John Beresford, who was knighted by Richard II. had issue, Thomas, who served with Richard II. in the war against the Scots; and Humphrey, grandfather of Tristram, who was created a baronet of the kingdom of Ireland, by Charles II. in 1662. Frances, married to the second duke of Bolton, and relict of Henry O'Neal, esq. of Shanes Cafile; Alice, married, 1657, his Catharina Hume, bart. of Castle Hume, descended from the barons of Polworth; Elizabeth, married, 1704, George Rochfort, esq. by whom she was mother of the first earl of Belvidere.

Henry, the fourth earl of Drogheda, succeeded his grandfather in the earldom; and married Charlotte, daughter of Hugh, first viscount Falmouth; and, dying April 4, 1745, was succeeded by his only brother, Edward, the fifth earl; who married, first, lady Sarah Ponfonby, daughter of the first earl of Belborough, and had issue, Henry, lord Moore, who died in France; Charles, lord Moore; Ponfonby, married to the honourable Elizabeth Moore, daughter of Stephen, first viscount Mountcathell; and, secondly, to Catharine, sister of Frederic lord Ahtoun; Edward, in holy orders; Sarah, married, August 13, 1745, William Pole, esq. and succeeded to the court of Madrid; poles of Middlesex. The earl married, secondly, Bridget, niece of Thomas lord Southwell; by which lady, who died July 27, 1761, he had issue, William, who died August 8, 1763; Robert, married to Margaret, daughter of James Stephenson, esq. and had, issue, Sarah-Henrietta, married in 1798, William French, esq. brother of Frederic lord Ahtoun; Frances, and Elizabeth-Richard. The earl, together with his son, the honourable and reverend Edward Loftus, was lost in his passage to Dublin, October 28, 1738; when he was succeeded by Charles lord Moore, the sixth earl, eighth viscount, and first marquis.

CREATIONS.—Lord Moore, Baron of Melliont, July 21, 1616; Viscount Moore, February 7, 1621; June 14, 1661, Earl of Drogheda; Marquess, June 27, 1713; and Baron Moore, in England, January 13, 1781. RESIDENCE.—Moore Place, in the county of Kent. MOTTO.—Fortis cadere, cadere non potest. —'The brave may fall, but cannot yield.'

WELLESLEY (RICHARD-COLLEY), MARQUIS WELLESLEY, of Norragh, Earl of Mornington, Viscount Wellesley, of Dengan Castle, Baron Mornington, in Ireland; and Baron Wellesley, of Wellesley, in Somersetshire; Knight of St. Patrick, and Knight of the Garter; born June 20, 1760; succeeded his father, the late earl of Mornington, May 22, 1784; married, November 29, 1794, Hyacinthe-Gabrielle, only daughter of Pierre Rolland, esq.
tri-coloured flag of the republic of France, viz. Argent, gules, and azure.—Supporters. Two lions rampant, gules, ducally gorged and chained, the dexter lion only gardant, bearing with his mouth the banner of Myfure securit and fulbined by his dexter paw, the sinister lion securit, in like manner, with his exterior paw, the French republican flag.

His lordship received the thanks of both houses of parliament, following the public declaration, dated Whitehall, December 13, 1799:—"The king has pleased to grant to the most honourable Richard marquis Wellesley, of Orragh, in the kingdom of Ireland, and baron Wellesley in this kingdom, knight of the most illustrious order of St. Patrick, in consideration of his great and eminent public service, in the arduous and difficult government of the British possessions in the East Indies, from the time of taking upon him the said government, to the glorious termination of the war with the late sultan of Myfure, his royal licence and authority to bear, as an honourable augmentation to his coat of arms, an inescutcheon purpure, charged with an estoile radiated wavy, between eight spots of the royal tiger, in pairs, sable proper; representing the standard of the said sultan, taken at Seringapatam, and presented to the said Richard marquis Wellesley, at Madras, on his majesty's birthday, the 4th of June, 1799: and also, that a representation of the said standard, and of the tri-coloured flag, and another at the same time, be added to the supporters and crest of the said marquis Wellesley; the same being first duly exemplified according to the laws of arms, and registered in the Heralds' Office; and also to order, that his majesty's said concession, and especial mark of his royal favour, be registered in the College of Arms."  

Motto.—Perse unum et necessarium.—"Moreover one thing is needful."

TAYLOR (THOMAS), MARQUIS OF HEADFORT, Earl of Bective, Viscount Headfort, Knight of St. Patrick; born November 15, 1737; succeeded his father, the late earl, February 4, 1793; married, December 4, 1778, Mary, daughter and heir of George Quin, esq. of Queenborough, in the county of Clare, and has issue, Thomas earl of Bective, heir apparent, born May 4, 1775; Mary, born January 25, 1782; Elizabeth Jane, born August 25, 1790; George, born March 19, 1792.

The family of Taylor was originally seated in the county of Suffolk; from whence they passed over to Ireland. Sir Thomas, the first baronet, born in 1662, married Anne, daughter of Sir Robert Cotton, bart. and had issue, Sarah, who died in 1753; Henrietta, married to Richard Moore, esq. of Bawn, in Tipperary. Sir Thomas, the third baronet, and first earl, married Jane, daughter of Elizabeth vicounte Langford, by the right honourable Hercules-Rowley, and had issue, Thomas vicount Headfort; Hercules-Langford, who died in 1759; and Clotworthy, married to Frances Rowley, niece and heir of vicount Doneraile; John, born in 1686; and died unmarried November 11, 1738, to Marianne St. Leger, daughter of the honourable Richard St. Leger, second son of vicount Doneraile; Henrietta, married in 1734, to Chamber-Drabaz, esq. Catharine, born in 1735.  

The earl died February 24, 1794, and was succeeded by his eldest son, Thomas, the second earl and first marquis.

Motto.—Consequitur quodcumque petit.—"He attains whatever he pursues."

BROWNE (JOHN-DENIS), MARQUIS OF SLIGO, Earl of Altamont, Viscount Welbport, and a Peer of the United Kingdom, by the title of Baron Montagle, of Welbport, in Mayo; Knight of St. Patrick, Governor of County Mayo; and a member of the House of Commons, for the county of Clare; born June 11, 1756; succeeded his father, the late earl, December 28, 1780; married, May 21, 1773, lady Louisa-Catharine Howe, daughter and co-heir of Richard earl Howe, and sister of Charlotte-Sophia barone's Howe, and his issue, Howe-Peter, earl of Altamont; born May 22, 1758, the first earl, married Anne, sister of Arthur earl of Arran; by which lady, who died March 7, 1771, he had issue, Peter vicount Welbport; Arthur a colonel in the army; George, married Dorcas, co-heir of James Moorg, esq. of Newtown, and died without issue male; James, prime justice of assize, in Ireland, died unmarried in 1763; Henry, married Miss Lynch, daughter of sir Henry Lynch, bart. John, married Miss Mary Cocks, and, secondly, Rosalind, daughter of Henry Gilder, esq. Anne, married in 1763, Rofs Mahon, esq. of Castle Gore, in Galway. The earl, dying July 4, 1778, was succeeded by Peter vicount Welbport, the second earl; who married Elizabeth, daughter and heiress of Robert Kelly, esq. chief justice of Jamaica; by which lady, who died August 1, 1759, he had issue, John Denis, vicount Welbport; Denis, a privy counsellor in Ireland, married in 1750, Anne, daughter of Rofs Mahon, esq. and had issue, Anne, married to Otway-Cuffe, first earl of Dylart; Mary, died in 1778; Elizabeth, married to Rofs Mahon, esq. of Castle-bar; and Charlotte, married to John Mahon, esq. His lordship died Dec. 28, 1780, and was succeeded by his eldest son John Denis, vicount Welbport, who became the third earl, and first marquis.

Motto.—Suivez raison.—"Follow reason."

LOFTUS (JOHN), MARQUIS OF ELY, Earl of Ely, Viscount Loftus, of Ely, Baron Loftus, of Loftus Hall, in Ireland, Baron Loftus, of Long Loftus, in Yorkshire, a Privy Counsellor, Governor of Fermagham, and a colonel of the Wexford militia; born February 15, 1770; succeeded his father, the late marquis, March 22, 1806.

His lordship's great grandfather, Nicholas, vicount Loftus, of Ely, died in the year 1687; and married, first, Anne Ponsonby, second daughter of William vicount Duncan; and, secondly, Letitia, widow of Arthur, third vicount Loftus, of Ely, only daughter of sir John Rowley, who died without issue, July 19, 1765. His lordship died, December 31, 1785, leaving issue, by his first lady, 1. Nicholas. 2. Henry. 3. Mary, married to William Alcock, esq. of Wilton. 4. Anne, married Charles Tottenham, esq. 5. Elizabeth, married to John Tottenham, bart. Nicholas, the second vicount Loftus, was created earl of Ely in 1766; and married Mary, daughter and heir of sir Guifavus Hume, bart. of Castle-Hume, in Fermagham, and died October 31, 1766, leaving issue by his lady, who died October 30, 1766, an only son, Nicholas, the second earl, born September 11, 1738, and died unmarried November 12, 1769, when the earldom became extinct; but the title of vicount devolved on his uncle, Henry, the fourth vicount, born November 11, 1709, created earl of Ely in 1771. His lordship married, first, in 1745, lady Henrietta, daughter of Henry Monro, esq. of Roe's Hall, in Downshire, who died without issue in August 1774; and he married, secondly, in 1775, Anne, daughter of Hugh Boffouy, esq. by
HERALDRY.

Irish Earls.
IRISH EARLS.

BUTLER (WALTER), EARL OF ORMOND and OSSORY, Viscount Thurlow, Baron of Arklow, a Privy Councillor in Ireland, and a Peer of Great Britain, by the title of Lord Butler, of Llanthony; Knight of St. Patrick; F.S.A. born in 1779; succeeded his father, the late earl, January 30, 1796; married, March 17, 1806, Anne, daughter and heir of Joseph-Pryce Clarke, esq. of Sutton-Hall, in Derbyshire.

Walter, grandfather of the present earl, married Eleanor, eldest daughter of Nicholas Morris, of the Court, in the county of Dublin, esquire, son of Sir John Morris, bart. a branch of the house of Montmorres, by which lady, who died in January 1794, having taken the title of countess dowager of Ormond, upon her son being acknowledged as earl of Ormond; he left issue, John, earl of Ormond; and three daughters, viz. 1. Susan, married to J. Cavanagh, of Borres, in Carlow, esquire, by whom she had issue. 2. Frances, married to Mr. Cavanagh, of that town, and family, and died in January 1808; by whom she had the celebrated recluse of Llangollen Vale. John, the only son, was acknowledged as heir to the title and estate of the illustrious house of Ormond, in 1792; and married, February 26, 1799, Anne, daughter and heir of John, late earl of Wandesford; by whom he had issue, Walter, the present earl; John-Wandesford, born in 1772, died in 1795; James-Wandesford, born in 1779, married, in 1807, Grace-Louisa, daughter of the honourable John Staples, of Lidian; Elizabeth, born in 1777; married her cousin, Mr. Cavanagh, son of Susan, fifth of the late earl; Charles, born in 1781; Eleanor, born in 1784. His lordship died in January 1796, when he was succeeded by Charles II. It is related that, when the present earl, the pretended heir is James-Wandesford, his lordship's brother.

CREATIONS.—Earl, 1727; Baron Butler in England, January 13, 1802.

Residence.—Sutton Hall, in the county of Derby.

Motto.—Depthies extoller. "Though deprest, I am exalted."

DE BURGH (ULICK-JOHN), EARL OF CLANRICARDE and Baron Dunkellin, born December 20, 1802; succeeded his father, the late earl, July 27, 1808.

John Smyth de Burgh, the eleventh earl, born November 11, 1720, married Hefer, daughter of Sir Henry Vizetbgcolor, but, in January 1736, by which lady, who died December 20, 1802, he had issue, 1. Henry, lord Dunkellin; 2. John-Thomas, born October 22, 1774; 3. Louisa, born 1745, Vol. IX. No. 614.

By Anne, sister of Edward lord Eliot. The earl died, without issue, May 8, 1753, when the titles of earl of Ely, and viscount Loftus, became extinct; but the estates devolved to his nephew, Charles, son of the honourable Elizabeth Loftus, by Sir John Tottonham, bart., born January 25, 1738. On succeeding to the estates of his uncle, he assumed the name and arms of Loftus; and was created baron and viscount Loftus, and earl and marquis of Ely. His lordship was the eldest co-heir of Robert Myhill, esq. by which lady, who died February 21, 1807, he had issue, 1. John, viscount Loftus; 2. Robert Ponsonby, lord bishop of Killaloe, born September 5, 1773; married, May 28, 1807, Alicia, third daughter of viscount Hardwicke, by whose third wife, Anne-Elizabeth Monk, sister of Margery, the marquise, dying March 22, 1806, was succeeded by his eldest son, John, the present and second marquis. —The presumptive heir is Robert, bishop of Killaloe, only brother of the marquis.

CREATIONS.—Baron, June 28; Viscount, December 1759; Marquis, December 29, 1800; Baron Loftus, in England, January 9, 1801.

Residences.—Loftus Hall, in the county of Wexford.—Townhouse, in Prince's-street, Cavendish-square.

Motto.—Prend mes et que je suis. "Take me as I am." —Round the crest, Loyal au mort. "Loyal in death."

BOYLE (EDMUND), EARL OF CORK and ORRERY, Viscount Dungarvon, Baron Boyle, of Yougall, Lord Broghill; and Baron Boyle, of Marldon, in England; a Major-general in the Army; born October 21, 1677; succeeded his father, the late earl, in October 1789; married, October 9, 1795, Habella-Henrietta Poyntz, third daughter of William Poyntz, esq. of Midgham House, in the county of Berks; and she had issue, Edmund-William, viscount Dungarvon, heir apparent, born April 2, 1798; Habella; Elizabeth; George-Richard, born in 1799; Charles, born in 1800; and Lucy-Giuranina, born in 1804.

The family of Boyle was of distinguished eminence in the reign of Henry III. Roger Boyle had issue, 1. Roger, father of John, who was elected in the reign of James I. in 1618, lord bishop of Cork, Cloyne, and Ros, in the kingdom of Ireland; which office he resigned in 1651; 2. Michael, who had issue Michael, elected in 1619, lord bishop of Waterford, and died December 27, 1655; and Richard, born in 1620, lord bishop of Cork, Cloyne, and Ros, afterwards translated to the archiepiscopal see of Tuam. His grace died March 29, 1644, leaving issue Michael, elected in 1660, lord bishop of Cork, Cloyne, and Ros, and translated in 1663 to the archiepiscopal see of Dublin, and in 1678 to the metropolitan see of Armagh; and constituted, July 11, 1665, lord high chancellor of the kingdom of Ireland; which office he resigned in 1688, and died December 10, 1702. Morgan, his son, was created, by James I. September 29, 1616, lord Boyle of Yougall, in the county of Cork; and October 15, 1620, viscount Dungarvon, in the county of Waterford; and earl of Cork, of the kingdom of Ireland, which title is extinct.

Richard, younger son of Roger son of Roger, was created, by James I. September 29, 1616, baron Boyle, of Yougall, in the county of Cork; and October 15, 1620, viscount Dungarvon, in the county of Waterford; and earl of Cork, of the kingdom of Ireland, which title is extinct, by Charles I. in 1628, baron of Bandonbridge, and viscount Boyle, of Kinalmeasky, in the kingdom of Ireland. He was
was killed at the battle of Lifcarrol, in the Irish rebellion, September 3, 1642; and his titles became extinct. 2. Roger, second earl of Cork, who was created by Charles II. in 1660, lord viscount Shannon of the kingdom of Ireland. Richard, second lord viscount Shannon, his grandson, greatly distinguished himself in the wars of William III. and queen Anne; and was constituted by George II. in 1730, commander in chief of the forces in Ireland. Upon his death, December 3, 1735, this title became extinct.

Richard, second earl of Cork, had a principal command at the battle of Lifcarrol, September 3, 1662. He married Elizabeth, daughter and heir of Henry sixth earl of Cumberland; and was created by Charles I. November 4, 1664, baron Clifford, of Laneborough, in the county of York; and by Charles II. March 20, 1664, earl of Burlington, in the same county. He was constituted, November 16, 1660, lord high treasurer of Ireland; and was attainted by the fifth parliament assembled by James II. in 1689. He had issue, 1. Charles lord Clifford, father of Charles second earl of Burlington; and of Henry, who was constituted by queen Anne, May 8, 1701, chancellor and undertreasurer of the exchequer; which office he exchanged for his peerage, and resigned upon the dismission of the whig administration in 1710. By George I. he was created, October 26, 1714, baron Carleton, of Carleton, in the county of York; and constituted, June 25, 1721, lord president of the council. Upon his death, March 21, 1725, this title became extinct. 2. Richard, who was killed in the battle of Solebay, June 3, 1665.

Richard, third earl of Burlington, son of Charles second earl of Burlington, was constituted, June 21, 1731, captain of the band of gentlemen pensioners; which office he resigned in 1733. He was the intimate friend of Mr. Pope, and patron of the celebrated wits of his age; and obtained considerable fame for his munificence and encouragement of the noble science of architecture. Upon his death, December 3, 1753, his English honours became extinct; and his Irish titles defended to John, fifth earl of Orrery.

Roger, third son of Richard, first earl of Cork, was one of the most accomplished characters of the age in which he lived. He was created by Charles I. baron Broghill of Broghill; and he greatly contributed to the victory of Lifcarrol, September 3, 1662. After the death of King Charles, he formed the project of a descent into Ireland in favour of his son and successor; but, being discovered by Cromwell, was compelled to engage in the opposite party. But when the crown of these realms was offered to Cromwell, lord Broghill, who sat in the English parliament as one of the representatives of the kingdom of Ireland, made two speeches in favour of a monarchical regal government. After the death of the usurper, he again entered into projects for the reformation of Charles II. and prepared matters for the reception of that monarch in Ireland, at the interface of thee realms. Upon his fourth visit to England by general Monk. Soon after the reformation he was created earl of Orrery of the kingdom of Ireland, and constituted president of the province of Munster; which office he resigned in 1672. He had the reputation of being an author himself; and was the munificent patron of literary men. He had issue, 1. Roger, second earl of Orrery. 2. Henry, father of Henry, first earl of Shannon, of the kingdom of Ireland. The earl died October 16, 1679.

Charles, fourth earl of Orrery, son of Roger second earl of Orrery, is justly considered as one of the literary ornaments of the reign of queen Anne. He was also the inventor of that most ingenious astronomical instrument called the Orrery. As a soldier, he served with distinguished merit in the wars of the duke of Marlborough.

By queen Anne he was created baron Boyle of Marlston, in the county of Somersef; notwithstanding which he was in the reign of George I. committed on false grounds to the Tower. See his life, in the article BOYLE, above referred to. He died August 25, 1737.

His fifth son, Richard, was also the author of several celebrated works; as set forth in the article above-mentioned. Upon the death of Richard, third earl of Burlington, he succeeded to the Irish honours of the elder branch of his family. He married first, Henrietta, daughter of George Hamilton, first earl of Orkney, by which lady he had issue, 1. Charles, lord viscount Dungarvon, who married, May 11, 1753, Sufannah, daughter of Henry Hoare, of Stourhead, in the county of Wilts, esquire; by which lady, (who married, secondly, Thomas Bruce earl of Aylebury, and died February 4, 1783,) he had issue Henrietta, married, in 1777, to the right honourable John O'Neil, of Skanes, in the kingdom of Ireland; Lord Dungarvon died September 16, 1759. 2. Hamilton, sixth earl of Cork. 3. Elizabeth, born May 7, 1731, married Thomas Worlsey, esquire, son of Sir James Worlsey, of Appuldurcombe Park, in the Isle of Wight, baronet. His lordship married, secondly, Margaret, daughter and heir of John Hamilton of Caledon, in the kingdom of Ireland, esquire; by which lady, who died November 24, 1763, he had issue, 1. Edmund, the seventh earl. 2. Lucy, born May 27, 1744, and married to George, lord viscount Torrington. John, fifth earl of Cork, died November 22, 1763; when he was succeeded by his second son Hamilton, the sixth earl, who died unmarried, January 17, 1764.

Edmund, the seventh earl, his brother, married Anne, daughter of Kelland Courtney, esquire, niece to John, fourth earl of Sandwich, from whom he was separated in 1783, having had issue, Richard, viscount Dungarvon, born in 1765; died young. Lucy-Isabella, born August 10, 1766, died September 7, 1801, having married, secondly, Charles Henry, second baronet, to Orlando, second lord Bradford; and by her had issue, Edmund, the present earl. Courtney, born September 3, 1769, married Caroline-Amelia Poyntz, daughter of William Poyntz, esquire, of Midgham House, in Berkshire; and has issue. Charles, died unmarried in November 1800. The counts died December 19, 1783; and his lordship re-married, June 27, 1786, the honourable Mary Moncktoh, youngest daughter of John, fifth viscount Galway; and died in October 1798, when he was succeeded by his son Edmund, the eighth and present earl.

C正确的ions.—Baron, September 16, 1666; Viscount and Earl, October 16, 1679; Baron, February 28, 1681; Earl, September 5, 1669; Baron Boyle, in England, September 16, 1712.

Residences.—Marston Hall, in the county of Somersef.—Town-house, Park-street.

Motto.—Honour virtutis premium. —“Honour is the reward of virtue.”

NUGENT (GEORGE-FREDERIC), EARL OF WESTMEATH, Baron Delvin, Governor and Custo of Rotulorum of the County of Westmeath, and a Privy Counsellor in Ireland; born November 18, 1760; succeeded his father, the late earl, September 7, 1791, married, first, April 27, 1789, Mary, eldest daughter of St. John Jefferyes, of Barney Castle, in the coun-
ty of Cork, esquire; and has issue by her, (whose mar-
riage was disallowed by act of parliament in 1766.) George-
Thomas; John, lord Delvin, heir apparent, born July 17,
1743 ; Louisa-Maria, died young; a daughter, born in
October 1788; Frederick, died in March 1803. His lord-
ship married, secondly, February 2, 1799, lady Elizabeth-
Emily Moore, eldest daughter of Charles marquis of
Drogheda, by which lady he has issue, Elizabeth-Emily,
born December 20, 1798 ; Catharine-Anne, born May 30,
1801; Henry-Edmund, born October 30, 1803; and
Robert-Seymour, born June 5, 1805.

Richard lord Delvin, was created, in 1621, earl of
Welfmeath; and was ancestor of John, the fifth earl,
who married Margaret, daughter of count Molza, of
the duchy of Modena, in Italy; by which lady, who died
in February 1776, he had issue Thomas lord Delvin,
late earl of Welfmeath; Edward Charles, who died in
1775; Francis, and an only daughter. His lordship
married July 3, 1754; and was succeeded by his eldest son,
Thomas, the sixth earl; who married, first, in 1742,
Mary, daughter and heir of Walter Durand Stapleton,
of the island of Hispaniola, esquire; which lady died in
the West Indies, in 1750, leaving issue, Richard Nu-
gent, lord Delvin, born in 1744, who was killed in a
duel in 1761. He married, secondly, Catharine, daugh-
ter of Henry White, esquire, and by her, who died August
6, 1772, had three sons and one daughter, viz. Thomas,
died an infant; George-Frederic, the present earl; and
Henry, died in 1776; Catharine, married to the honour-
able Robert Rodney, brother of the second lord Rodney,
and died February 1794, by whom she left issue. The
earl, dying September 7, 1791, was succeeded by his
deceased son, Richard, the sixth earl.

Creation.—Earl of Welfmeath, 1621.
Residence.—Cafletown Delvin, in the county of Welfmeath.
Motto.—Decepi.—"I have resolved.

DILLON (PATRICK), EARL OF ROSCOMMON,
Baron of Kilkenny; born March 15, 1769; suc-
cceeded his father, the late earl, August 26, 1782; mar-
rried, July 10, 1789, Margaret, youngest daughter of
Ignatius Begg, esquire, of Belrea, in the county of Ros-
common; and has issue a daughter, Maria, born June 2,
1788. John, the tenth earl of Roscommon, married, first,

CREATIONS.—Baron, February 11, 1618; Vicount and Earl, 1647.

Motto.—Ut guamaque paras.atus.—"Armed on every side."

O'BRYEN (WILLIAM), EARL OF INCHiquin, Baron of Burren, and Lord Inquin, in Ireland; succeeded his uncle, Murrough marquis of Thomond, the late earl, February 10, 1798; married Elizabeth, only daughter and heir of Thomas Trotter, esq. of Duleek; by which lady he has issue two daughters, Susan, and Sarah; and two sons, James, heir apparent, a captain in the royal navy, and Edward, also a captain in the royal navy.

William, third earl of Inquin, married Mary, youngest sister to the first earl of Jersey; by whom he had issue, William lord O'Bryen, his successor; Charles, died without issue; James, married, secondly, Sarah, daughter and co-heir of Sir Henry Gould, bart. one of the judges of the court of Common Pleas; by whom he had issue, Richard-Henry, Robert-Gilbert, born March 24, 1783, and died February 19, 1785; Honora-Elizabeth-Heffner, married, in 1805, to captain Woodgate; Alicia-Margaretta-Northmore, born August 1, 1785; Sophia-Ann, married, May 15, 1793; Richard-Henry, died April 10, 1788; George-Frideric-Augustus vicount Kilcornell, heir apparent, born March 9, 1785, in the Coldstream regiment of foot-guard; Edward-Henry- Wentworth-Villiers, born May 4, 1791. Charles, baron of Cavan, was the first vicount Kilcornell, and earl of Cavan; from whom descended Richard, the fourth earl, who married Margaret, daughter of Sir Patrick Trant, and had issue, Ford lord Lambert, and three daughters, viz. Gertrude, married to William earl of Kerry; and, secondly, July 7, 1750, to James Talbot, esq. of Talbot, married to Warner Wellesley, esq., ancestor of lord Rollofley. Castellina, died unmarried. Ford, the fifth earl, married, March 24, 1775; died December 18, 1785, and had issue, Ford lord Lambert, and three daughters, viz. Sophia, who died May 1775; and Gertrude, married to Sir Michael Croome, bart., and, dying September 29, 1772, was succeeded by Richard, son of the honourable Henry Lambert, second son of the third earl; who married, first, Sophia, heiress of the honourable Oliver Lambert, fourth son of Charles third earl of Cavan; but by whom he had no issue; and he married, secondly, November 13, 1764; Elizabeth, eldest daughter of George Davis, esq. of Duleek; by whom he had two sons, and two daughters. William, the fourth earl of Inquin, in his Irish titles; but the marquise, and barony of Thomond in England, became extinct.

CREATION.—Baron Inchinquin, 1536; and Earl of Inchinquin, 1654.

RESIDENCE.—Town-house, St. James's-square.

MOTTO.—Figuire de effux.—"Strength is from above."
HERALDRY

Irish Earls.

"London Published at the Subscription Libraries, W. and J. Jones"
TALBOT (CHARLES), EARL OF WEXFORD and WATERFORD, in Ireland, and Baron Talbot; also Earl of Shrewsbury, in England.—See EARL OF SHREWSBURY, among the PEERS OF ENGLAND, p. 489.

FORBES (GEORGE), EARL OF GRANARD, Viscount Forbes, Baron of Clanehugh; a Peer of the United Kingdom, by the title of Baron Granard, of Culloden, in the county of Leicestershire, and Governor of Londonderry; born June 14, 1760; succeeded his father, the late earl, April 10, 1789; married May 10, 1779, Selina-Frances, fourth daughter of John Rawdon earl of Moira, (by lady Elizabeth Haig baronets Hungerford) born April 9, 1759; by which lady he has issue, George-Thomas, viscount Forbes, heir apparent, born May 3, 1785, a major-general in the army, by his wife Elizabeth-Mary, born December 3, 1786, married, October 15, 1807, George-Augustus-Henry-Anne lord Rancliffe, Selina-Frances, died in 1791; Adelaide-Do. lady he has issue, George-John, viscount Forbes, heir-apparent, born October 15, 1807, Frances-Reginald, born October 15, 1807, George-Augustus-Henry-Anne lord apparent, born May 3, 1785, a major-general in the army, who married Mary, daughter of Dr. John Conway Colthurst, bart. William, the second earl, dying April 2, 1769, was succeeded by his eldest son, George, the sixth and present earl. Creations.—Baron and Viscount, November 22, 1675; Earl, December 35, 1684; Baron Granard, of Culloden, in Leicestershire, February 15, 1806.

MOTTO.—Fate mavis incipient gloriae. —"The flame of glory is the torch of the mind."

RHYNHART DE REEDE DE GINKELL (FREDERIC-CHRISTIAN), EARL OF ATHLONE, Baron of Aghrim; succeeded his father, the late earl, in 1745; married Anne-Elizabeth-Christine, daughter of Tull de Seerofkerkin; by which lady he has issue five sons and four daughters; viz. Frederic-William viscount Aghrim, heir apparent, a captain in the 18th regiment of dragoons, born October 21, 1766; married, first, in March 1789, Mifs Munter, who died in September 1795, without issue; and he married, secondly, November 11, 1800, Mifs Eden, daughter of sir John Eden, bart. Charles-William-Louis, born in 1772, and died in 1793; Ryann-Diederick-Jacob, a lieutenant in the dragoon guards, born July 2, 1773; John-Gerrard-Rynann, born December 11, 1774; Jane-Helena, married to John Groves, esq. knight of the shire for Athlone, and co-heir of Peter Daly, esq. of Lanford, in Galway; by which lady, who died May 19, 1778, he had issue, one son, George, the fifth earl, by his wife Elizabeth-Preston, fecond filler of, John lord Tara. 2. Frederic. 3. Anne Georgiana, married, in 1797, to colonel Archibald-M'Neil. 4. Augustus, married, in 1798, to general Leith. 5. Georgiana-Louisa, married, June 19, 1806, to sir William Call, bart. of Whitecraigs, in the county of Cornwall. 6. Elizabeth, born in December 1780. The earl, dying April 16, 1790, was succeeded by his eldest son, George, the sixth and present earl. Creations.—Baron and Viscount, November 22, 1675; Earl, December 35, 1684; Baron Granard, of Culloden, in Leicestershire, February 15, 1806.

MOTTO.—Virtute, non verbis. —"By valour, not by words."

BLIGH (JOHN), EARL OF DARNLEY, Viscount Darnley of Athboy, Baron Clifton of Rathmore, in Ireland; and Lord Clifton of Leighton Bromswold, in England; Hereditary High Steward of Gravefend and Milton; D.C.L. born June 30, 1767; succeeded his father, the late earl, July 31, 1818; married, September 19, 1791, Elizabeth, third daughter of the late right honourable William Brownlow, of Lurgan, in Ireland; by whom he has issue, John lord Clifton, heir apparent, born June 18, 1792; Catharine, died January 10, 1802; Mary; William, died October 18, 1807; James; and Elizabeth.
The family of Bligh is descended from Sir Gervase Clifton, by whom James I. created baron Clifton of Leighton Bromswold. Catharine, baroness Clifton, his daughter, married John Darlington, baron Bolton, Methuen, and Aubigne, earl of Lenox, and duke of Lenox of the kingdom of Scotland, who was descended from a younger branch of the family of Henry lord Darnley, confort to queen Mary, and titular king of Scotland. The duke of Lenox was created by James I. in 1619, earl of March, in the county of York; and was confirmed, in 1644, by Charles I. in the capacity of great chamberlain of the kingdom of Scotland. He died in 1645, leaving issue by his former baroness Clifton, 1. James, his successor. 2. Bernard. 3. George.

James, duke of Lenox, was constituted by Charles I. in 1625, heritable lord high admiral of the kingdom of Scotland; and created, in 1641, duke of Richmond, in the county of Down, in his stead. He left issue, 1. Charles, third duke of Richmond; and, secondly, he was farther declared, in 1649, lord rewar'd of the household to Charles I., and died March 26, 1655, leaving issue Esmé, second duke of Richmond.

Bernard, second son of Esmé duke of Lenox, distinguished himself on the side of Charles I. in the civil wars, particularly at the battles of Newbury and Naseby. In consideration of his services, he was created, in 1644, baron Clifton of Newbury in the county of Berks, and earl of Clifton in the county of Stafford, with remainder to George his brother. He was killed in an engagement at Rowton Heath, September 26, 1745.

George, younger son of Esmé duke of Lenox, was killed in the battle of Kineton, fighting for the royal cause. He left issue, 1. Charles, third duke of Richmond; and, secondly, he was farther declared, in 1649, lord rewar'd of the household to Charles I., and died March 26, 1655, leaving issue Esmé, second duke of Richmond.

Bernard, second son of Esmé duke of Lenox, distinguished himself on the side of Charles I. in the civil wars, particularly at the battles of Newbury and Naseby. In consideration of his services, he was created, in 1644, baron Clifton of Newbury in the county of Berks, and earl of Clifton in the county of Stafford, with remainder to George his brother. He was killed in an engagement at Rowton Heath, September 26, 1745.

Theodosia, the issue of this marriage, married John Bligh, whose grandfather went to Ireland during the protectorate of Oliver Cromwell, as an agent over the forfeited estates. In consequence of this marriage, he was created by George I. September 14, 1721, baron Clifton of Rathmore in the county of Meath; and, secondly, by Geo. II. March 7, 1723, viscount Darnley of Athboy in the same county; and, June 29, 1725, earl of Darnley, of the kingdom of Ireland. He had issue, by Theodosia, his consort, 1. Edward, second earl of Darnley, who died July 20, 1747. 2. John, third earl of Darnley. 3. Anne, married, first, September 17, 1747, to Robert Hawkins Magill, of Gill Hall, in the county of Down, in his own right; and, secondly, in the year 1748, to Bernard Ward, first lord viscount Bangor, of the kingdom of Ireland. Earl John, the father, died September 12, 1728.

John, third earl of Darnley, married, September 11, 1706, Mary, daughter and heir of John Stoyte, of the county of Wiltshire, whose family derived the name of Lovel from a feudal barony granted to one Roger Lupus of that county in the eleventh century. The Lovels of England claim descent from a Roger Lovel who purchased in 1198, a manor of Aveloe in the county of Somerset, with the appurtenances. He had issue, by Theodosia, his consort, 1. Waleran, who succeeded to his father's estates in the duchy of Normandy. This branch produced many eminent men; and became extinct in 1351. 2. William. 3. Richard.

William, third son of John and Auberie, had issue, 1. Philip, who had summons to parliament among the barons in the reign of Edward III.; and whose powers bore the title of lord Lovel of Tichmarsh, in the county of Northampton. John, second lord Lovel, his son, had issue, 1. John, third lord Lovel, who died 1730, aged 80, without issue. John, fifth lord Lovel, married Isabella, daughter and heir of Hugh lord Burnel, of Hylgate, in the county of Salop; and, in whose right he succeeded to the title of Burnel. 2. Philip, who was constituted, by Henry I. lord high treasurer of England.

John, eighth lord Lovel, grandson of John, fifth lord Lovel, was engaged in the wars of Edward III., the crown of France, and of Richard II. in the kingdom of Ireland.
Ireland. He took part with the rebellious barons against this latter prince; but afterwards became reconciled to the king, and was admitted into his favour. He married Mary, grand-daughter and heir of Robert lord Holland, elder brother of Thomas earl of Kent; in whose right he succeeded to the title of Holland. William, tenth lord Lovel, his grandson, married Alice, daughter and heir of John lord Deincourt; in whose right he succeeded to the titles of baron Deincourt of Blankley, in the county of Lincoln; baron Grey of Ruthwell, in the county of Dumfriess; and baron Fitzalan of Bedal, in the county of York. By this lady he had issue, 1. John, eleventh lord Lovel. 2. William.

John, eleventh lord Lovel, adhered to the party of the house of Lancaster in the civil wars; and died January 9, 1464. Francis, twelfth lord Lovel, his son, was by Edward IV. January 4, 1483, created viscount Lovel. He was second in command under Richard duke of Gloucester, afterwards Richard III., in his expedition into Scotland; and was the particular favourite of that monarch. By king Richard he was constituted lord chamberlain of the household, and chief butler of England. He fled to the continent after the battle of Bosworth; and, returning in the affair of Lambert Simnel, was killed at the battle of Stoke fields, June 6, 1485; and his eldest son was afterwards created by Henry VII.

William, second son of William tenth lord Lovel, married Eleanor, daughter and heir of Robert lord Morley, in whose right he succeeded to the titles of Morley, Marshal, Hengham, and Rhie, and to the office of hereditary marshal of the kingdom of Ireland. He had issue, 1. Henry, second lord Morley, who married Elizabeth, daughter and heir of John de la Pole duke of Suffolk, and father of John of Lincoln, who had been declared heir apparent to the crown by Richard III. He was killed at the siege of Dinxmud, in 1489. 2. Alice, married to Sir William Parker, knight; who in her right succeeded to the titles of Morley, Marshal, Hengham, and Rhie, and to the office of hereditary marshal of the kingdom of Ireland. The male issue of this marriage died in 1566, and the titles have since remained dormant.

Richard, younger son of William and Auberie, assumed the original family name of Perceval, and loft a leg in the expedition of Richard I. surnamed Coeur de Lion, to the Holy Land; in which he bore a high command. Richard, his son, had issue, 1. Robert, engaged in the invasion of Ireland in the reign of Henry II. and had summons to the parliament of that kingdom by the title of baron Perceval, in 1285. Robert, third lord Perceval, his son, was killed in fighting against the natives, October 22, 1303; leaving issue, Thomas, fourth lord Perceval; and issue whose descendants in 1511, the title became extinct. 2. John, grandson of Walter, who greatly distinguished himself at the battle of Crefyll, August 26, 1346; and had issue Ralph; and John.

Ralph, grandson of Ralph, engaged with Henry Stafford duke of Buckingham, in the cause of Richard III., and was killed at the battle of Bosworth, August 22, 1485. John, fourth in descent from Sir Ralph, was, from his singular ingenuity and learning, employed by queen Elizabeth to decipher the intercepted dispatches of the king of Spain, at the period of the famous armada; and, being from that time distinguished by the government, he obtained the paramount lordship of Dunhallow, and of the territories of Poble O'Callaghan, and Poble O'Keeffe, in the kingdom of Ireland. Sir Philip, his son, was one of the most considerable personages in the kingdom, and suffered greatly by the civil wars of Charles I. He was appointed, March 25, 1642, military-general of the army of Ireland; and was one of the king's commissioners at the treaty of Oxford, in 1644. He died November 10, 1647.

John, fifth baronet, is said to have been principally instrumental in advising Richard Cromwell to resign the pro-
Henrietta Frances Spencer, second daughter of John, first Earl Spencer, and sister to Georgiana duchess of Devonshire; and has issue, John William viscount Dun- cannon, heir apparent, born August 31, 1781; married, November 4, 1804, lady Margaret Prince, third daughter of the Earl of Wexford;Frederick Cavendish, born July 6, 1783; William Francis Spencer, born in 1787; and Caroline, married, June 3, 1805, the Honourable William Lambe, eldest son of Peniston viscount Melbourne.

His lordship's grandfather, Brabazon, second viscount Duncombe, was the first Earl of Bathurst; his lordship was born in 1679; and married, first, Sarah Margetson, daughter and heiress of James Margetson, of Compton, co. Stafforshire; by whom he had issue: Margaret, married to John Gough, esq.; and Sophia, married to John, Earl of Huntingdon; 2. Sophia, born in 1682, died in infancy. The Earl, dying March 11, 1793, was succeeded by his eldest son, Frederick, the third and present Earl.

3. William, third Earl of Selborne; by which lady he had issue: Frederick, the present Earl; Catharine, married to Aubrey Beauclerk, fourth Duke of St. Albans, and having issue by her, the Right Honorable Sir William Fownes Bart.; Letitia, married to Sir John Baldwin, Bart., and had issue, Richard, the present Earl; 4. James, born April 26, 1791; married, August 15, 1818, Henrietta Frances Spencer, second daughter of George, third Marquis of Lansdowne, and has issue: John, born January 24, 1838, a general in the army; Mary, married, April 20, 1796, Stephen Fox, second Lord Holland, and had issue the present Lord Holland and Caroline; 5. Anne, married to General Richard Fitzpatrick, only brother to the Earl of Clancarty; and had issue by her, who died March 28, 1759, a son, born December 1755, issue deceased; and three daughters; the youngest of whom died an infant; and 6. Juliana, married to Richard, the present Earl of Clancarty; and had issue, Richard, the present Earl; and two eldest daughters, who died in infancy.

The family is descended from the ancient princes of Offaly. Richard Fitzpatrick, lineally descended from John, second son of Florence, third Lord Offaly, was the first, Baron Gowan; and married Anne, daughter and co-heir of Sir John Robinson, Bart., of Farmingwood, in Nottinghamshire; by which lady he had issue, John, the second lord; and Richard, who married Miss Anne Utter, and had issue by her, who died March 28, 1759, a son, born December 1755, issue deceased; and three daughters; the youngest of whom died an infant; and William, born January 24, 1768, Anne, only daughter and heir of Henry Liddell, lord Ravenworth; by which lady, who died February 1804, he has issue, Anne, born February 24, 1770; and Gertrude.

This family is descended from the ancient princes of Offaly. Richard Fitzpatrick, lineally descended from John, second son of Florence, third Lord Offaly, was the first, Baron Gowan; and married Anne, daughter and co-heir of Sir John Robinson, Bart., of Farmingwood, in Nottinghamshire; by which lady he had issue, John, the second lord; and Richard, who married Miss Anne Utter, and had issue by her, who died March 28, 1759, a son, born December 1755, issue deceased; and three daughters; the youngest of whom died an infant; and the present Earl, dying September 23, 1773, married, March 26, 1768, Anne, only daughter and heir of Henry Liddell, lord Ravenworth; by which lady, who died February 1804, he has issue, Anne, born February 24, 1770; and Gertrude.

Residences. — Baron, April 27, 1755; Earl, October 5, 1751; Baron of Upper Offaly, in England, August 12, 1794.

Butler (Henry Thomas), Earl of Carrick, Viscount Ikerin; born May 19, 1746; succeeded his father, the late Earl, April 15, 1774; married, August 7, 1774, Sarah, daughter and co-heir of Edward Taylor, esq. of Alkeaton; by which lady he has issue: 1. Somerset Richard, viscount Ikerin, heir apparent, born September 23, 1779. 2. Henry Edward, born December 5, 1779. 3. Pierce, born January 18, 1782, in holy orders; married, in 1806, Maria Sophia, third daughter of John Vernon, esq. of Clonafcar Castle. 4. James, born April 26, 1791. 5. Anne, married to the reverend Henry Maxwell, second son of the bishop of Meath, nephew of the Earl of Farnham. 6. Juliana, married to Somerset Earl of Belmore. 7. Harriet, married to Francis Savile, esq. 8. Sarah, born July 21, 1787.

Somerset Hamilton Butler, eighth viscount, was the first Earl of Carrick; and married, May 18, 1745, Juliana Boyle, eldest daughter of Henry, first Earl of Shannon; by which lady, who died February 23, 1804, he had issue: Henry Thomas, viscount Ikerin, the present Earl; Jane, who died an infant; Pierce, married to Catherine, eldest daughter of Richard Roth, esq. Margaret, married, October 7, 1768, Edmund Butler, eleventh viscount Montgomerie; Henrietta, married, October 3, 1772, Armagh Earl of Belmore, and died January 1774. The Earl, dying April 15, 1774, was succeeded by his eldest son, Henry Thomas, ninth viscount, and second Earl.
and was created by George II. March 20, 1756, baron of Castle Martyr, in the county of Cork, viscount Boyle of Bandon, and earl of Shannon, in the kingdom of Ireland. He married, first, Catharine, daughter of Childrey Coote, esq. of Killifeer, nephew of Charles earl of Mountnor, who died without issue, May 5, 1725; and his heir apparent, Gervase Boyle, youngest daughter of Charles, third earl of Cork, by whom he died December 12, 1746, he had issue, 1. Richard viscount Boyle. 2. Henry, who assumed the name and arms of Wallingham, and married Lucy, daughter of John Martin, esq. and died March 27, 1726, leaving issue, Henry, who died in 1737. 3. William, died April 13, 1755, died January 7, 1755, by which he assumed the name of Wallingham, on the death of his brother, Henry, and was loit on-board the Thunderer, of which he was commander, in a violent hurricane in the West Indies, October 1779; married Charlotte, daughter and co-heir of sir Charles-Hubery Williams, knight of the bath; and had issue, Richard, born in 1762, died October 13, 1788; and Charlotte, baroness de Roths in her own right, married, August 4, 1791, Lord Henry FitzGerald, third son of James duke of Lenfler. 6. Juliana, married Somerlet-Hamilton Butler, earl of Carrick, and died February 23, 1645. 7. Mary, died April 11, 1740. 8. Jane, died April 23, 1748. The earl, dying April 23, 1755, was succeeded by his eldest son, Richard, the second earl, born January 30, 1727; appointed master-general of the ordnance, and a privy counsellor, in 1765; a lord of the treasury in 1781, knight of St. Patrick in 1783, and created a peer of Great Britain, by the title of baron Carpenter. 9. Catharine, eldest daughter of the right honourable John Ponsonby, speaker of the house of commons in Ireland, and brother of William, second earl of Belborough; by which lady he had issue, Henry viscount Boyle; and Catharine-Henrietta, married, February 12, 1784, Francis Bernard, earl of Bandon. The earl, dying May 20, 1807, was succeeded by his only son, Henry, the third and present earl. CReaTIONS.—Baron, Viscount, and Earl, March 20, 1756; Baron Carpenter, in England, September 1766. The earl died March 9, 1762, and was succeeded by his eldest son, George, the second earl, born June 30, 1750; and married to lady Frances Manners, eldest daughter of John marquis of Granby; which marriage was dissolved by act of parliament, in October 1777. The earl married, secondly, July 3, 1780, Sarah, youngest daughter of John Hufsey, lord Delaval, and by her, who died October 7, 1800, he had issue, George, viscount Carlingford, died July 1789; Susan-Hufsey, born June 15, 1784, married, August 20, 1803, Henry De la Poer Beresford, marquis of Waterford; and the earl, dying April 15, 1805, was succeeded by his nephew, George, the present and third earl.—The presumptive heir is John-Dalerval, only brother of the earl.

CREATIONS.—Baron, May 29, 1719; Viscount and Earl, May 28, 1761.

RESIDENCE.—Claremont Lodge, in the county of Surrey.

MOTTO.—Per acuta bella. — "By stratagems of war."

HASTINGS (FRANCIS-RAWDON), EARL OF MOIRA, Baron Rawdon, of Moira, in Ireland, Lord Rawdon, of Rawdon, in England, Constable of the Tower of London, Lord Lieutenant and Custos Rotulorum of the Tower Division, a General in the Army, Colonel of the Enniskillen Regiment of Infantry; and, one of the Council of the Prince of Wales in Cornwall; F.R.S. P.S.A. and M.R.I.A. born December 7, 1754; succeeded his father, John, the late earl, born June 20, 1753; married, July 12, 1804, Flora-Muir Campbell, countess of Loudon in her own right, and has issue, a daughter, Flora, born February 11, 1805; and a son, lord Mauchlane and baron Rawdon, heir apparent, born February 4, 1808.

The ancient and illustrious family of Rawdon, is descended from Paulyn de Rovdoun, one of the chiefs or thanes, in the reign of William the Conqueror. John, thirteenth in descent from Paulyn, had issue, 1. John. 2. Ralph, whose grandson Marmaduke acted with singular courage and loyalty on the behalf of Charles I. in the civil wars. He died April 28, 1666. Thomas, his fon, was dangerously wounded in both the first and second battles of Newbury.

George, fourth in descent from John, son of John, distinguished himself by his exertions against the Irish rebels, in 1641; and, having contributed to the restoration of Charles II. was by that monarch created a baronet of England, May 20, 1665. Sir Arthur, second baron, his son, exerted himself in Ireland, in behalf of William III. at the period of the restoration. Sir John, third baronet, his son, married Dorothy, daughter of sir Richard Levinge, knight, lord chief justice of the court

of Ireland.
of Common Pleas in the kingdom of Ireland; by which lady, who married, secondly, Dr. George Cobb, lord archbishop of Dublin, and died September 23, 1733, he had issue: 1. Sir John, fourth baronet. 2. Arthur, born in 1723, who married Arabella, daughter and heir of Chehilire, of Halwood, in the county palatine of Chester, esquire. Sir John, the father, died February 2, 1711.

Sir John, fourth baronet, was created by George II. baron Rawdon, of Moira, in the county of Down, in the kingdom of Ireland; and by George III. advanced to the dignity of earl of Moira, in that kingdom. He married, first, November 10, 1741, Helena, daughter of John, ninth earl of Moira, who died June 11, 1746, he had issue, Catharine, born January 25, 1747; married to Joseph Henry, of Straffan, in the county of Kildare, esquire; and Helena, born May 27, 1744, married to Stephen Moore, earl of Montcalmel. The earl married, secondly, December 23, 1746, Anne, daughter of Theophilus, married to Miss Frances Hall. 4. Selina—married to Jofepli Henry, of Straffan, in the county of first, November xo, 1741, Helena, daughter of John, the dignity of earl of Moira, in that kingdom. He married, secondly, April 16, 1762, Caroline, eldest daughter of Sir Thomas-Pym Yorke, John-William, and Mary; Anne-Jane, born April 1793, a colonel in the army, and captain in the 3d regiment of marines, and captain in the royal navy; Richard- Bruce, in holy orders, married, November 19, 1800, the honourable Helena Powys, eldest daughter of Thomas, first lord Lilford; and Mary, who died young.

James, the first earl of Courtown, was created by George III. He married, February 24, 1726, Elizabeth, daughter of Edward Smyth, bishop of Down and Connor, by which lady he had issue, Edward, born in 1723, a major-general in the army; married to Letitia, daughter of William Blacker, esq.; Robert, born February 5, 1768, a colonel of marines, and captain in the royal navy; Richard-Brache, in holy orders, married, November 19, 1800, the honourable Helena Powys, eldest daughter of Thomas, first lord Lilford; and Mary, who died young.

James, the first earl of Courtown, was created by George III. He married, February 24, 1726, Elizabeth, daughter of Edward Smyth, bishop of Down and Connor, by which lady he had issue, Edward, born in 1723, a major-general in the army; married to Letitia, daughter of William Blacker, esq.; Robert, born February 5, 1768, a colonel of marines, and captain in the royal navy; Richard-Brache, in holy orders, married, November 19, 1800, the honourable Helena Powys, eldest daughter of Thomas, first lord Lilford; and Mary, who died young.

Creation.—Vizcount, December 22, 1628; Earl, November 30, 1771.

Motto.—Videce vicere.—"Conquer, and live."

The family of Molyneux is of very high antiquity.

The Earl (George), Earl of Kingston, Vizcount and Earl, of Kingston, Baron of Kingston, Governor of the county of Cork, and Recorder of Boyle; born April 9, 1741; succeeded his father, the late earl, April 17, 1799; married, May 5, 1794, Helena Moore, only daughter of Stephen earl of Montcalm, by lady Helena Rawdon, sister to Francis earl of Moira; and has issue, Thomas, Edward, Robert, Emma, Isabella-Letitia; and Frances, married to Thomas Tench.

JOSCELYN (ROBERT), EARL OF RODEN, Vizcount Joscelyn, Baron of Newport, Knight of St. Patrick, Auditor general of the Exchequer in Ireland, Cuyttus Rotulorum of the County of Louth, and a Privy Councillor; born October 26, 1756; succeeded his father, Robert, the late earl, June 22, 1797; married, first, February 5, 1783, Frances-Theodosis, eldest daughter of Robert Blair, dean of Elm, brother of John earl of Darly, and has issue, Robert vizcount Joscelyn, heir apparent. His lordship married, secondly, July 5, 1804, Juliana-Anne, youngest daughter of John Orde, esq. of Wiltwood, in the county of Northumberland; by which lady he has issue a daughter.

The family of Joscelyn is of very high antiquity.

Egidius Joscelyn, a nobleman of Britan, passed into England in the reign of Edward the Confessor; and was father of sir Gilbert Joscelyn, who returned into Norman'dy, and came back with William the Conqueror, from whom they afterwards obtained the manors of Spielberghain. He left issue two sons, Gilbért, and Geoofry. The eldest was born at Spielberghain, and founded the Cicerian monastery of monks at that place, who were from him called Gilbertines; and died in 1186. Geoofry de Joscelyn, the second son, inherited the citates; and from whom descened Thomas Joscelyn, who married, in 1529, Maud, daughter and co-heir of sir John Hyde, of Hyde-hall, in the county of Surrey. He mar-riage the family became possessed of Hyde Hall, now belonging to the earl of Roden. Sir Robert Joscelyn, lineal descendent of Thomas, a baronet in 1665, and had issue, by Jane, co-heir of Robert Strange, esq. of Somerford,
Somerford, in Wilts, Sir Strange, the second baronet, ancestor of Sir Conyers, who dying without issue, the title devolved to the earl of Roden; and Thomas, the eldest son, who, by Agnes, daughter of Thomas Bray, equestrian, an only son, and heir to Robert, lord chief justice of Ireland; who succeeded, and married, first, Charlotte, co-heiress of Charles Anderson, of Worcs, esquire, who died February 23, 1747; and he married, secondly, November 15, 1754, Frances, dowager of Richard earl of Kofs, who died May 25, 1772; and his lordship, dying December 5, 1796, was succeeded by Robert, viscount, who was advanced to the dignity of earl of Roden by George II. The earl married, December 11, 1753, lady Anne Hamilton, eldest daughter of James earl of Clanbrassil, heir of her brother James, the late earl of Clanbrassil; and had issue, Robert viscount Jocelyn; George, born December 7, 1764; Percy, in holy orders; John; Harriet, married to the honourable Christopher Skeffington, brother to the earl of Maestricht; Caroline; Charlotte; Sophia, married, April 8, 1798, to James Arbuckle, esquire; Louisa, married, May 27, 1800, to colonel Orde, and died September 1, 1807; and Emilia. His lordship, dying June 22, 1797, was succeeded by his son Robert, the second earl, born July 6, 1776; Earl, July 20, 1776.

Meade (Richard), earl of Clanwilliam, in the county of Cork, viscount Clanwilliam, Baron Gillford, and a baronet; born August 7, 1755; succeeded his father, the late earl, September 15, 1805.

John, the first earl of Clanwilliam, born April 31, 1744; married, August 20, 1765, Theodosia, daughter and heiress of Robert-Hawkins Magill, esquire, by lady Anne Bligh, second daughter of John earl of Darney; by whom he had issue, John; Richard, the second earl; Robert, a brigadier-general in the army; Percy, in holy orders; married, first, Elizabeth, daughter of Thomas Lord Bishop of Dromore, and niece of John, third duke of Dorset; and secondly, by which lady he had issue, Richard, the fourth earl of Clanwilliam, born May 2, 1777; Earl, July 6, 1785; married, first, to the Honourable Catherine, daughter of Sir Henry Coxe; and secondly, to Elizabeth, daughter of Sir John Skippon, of Denny, in Kirkcudbrightshire; and had issue by her, who died September 12, 1805.

Sedgwick (John), of Sedgewick, was created, by William III., baron Scarsdale, and viscount Sedgwick, of the county of York; and had issue by his first wife, who died November 20, 1777; Caroline; Charlotte; Sophia; and issue by his second wife, lady Charlotte, who died May 13, 1755; by which lady, who died December 31, 1777, he had issue, Robert, the first earl; Robert, who died May 2, 1805; Sackville, and niece of John, third duke of Dorset; and Rachel-Maria-Arabella-Sarah. The earl died October 19, 1785, and was succeeded by his son, Richard, the second earl; born May 30, 1765; married, first, to the Honourable Catherine, daughter of Sir Henry Coxe; and secondly, to Elizabeth, daughter of Sir John Skippon, of Denny, in Kirkcudbrightshire; and had issue by her, who died September 12, 1805.
Heraldry.

Irish Earls.
heir of the honourable Nicholas Herbert, of Great
Glenham, in the county of Suffolk, uncle of the earl of Pembroke; but by this lady he had no issue; and who
dying April 14, 1785, his lordship married, secondly,
March 21, 1788, Anna-Elizabeth, daughter of John,
third lord Henricker, and niece by the marriage of Charles
Hartpole, by which marriage he had no issue by her, but who married, secondly, December
1801, George Powell, esq. and died July 14, 1802.
His lordship, dying January 2, 1800, was succeeded by
his brother John, the third and present earl.—The pre-
sumptive heir is the honourable and reverend Francis
Pakenham, brother to the baron.

Motto.—Filius vitae virtus. — "Virtue is the road to life."

MAXWELL (JOHN-JAMES), EARL OF FARNHAM, VIFCOUNT MAXWELL, BARON OF FARNHAM, AND GOVERNOR OF CAVAN; born in 1760; succeeded his father, the late earl, October 17, 1800; married Grace, only daughter of Thomas Cuffe, esq. of Grange, in the county of Kilkenny, and has issue lord viscount Maxwell, heir apparent.

Robert, the second baron, was the first earl of Farnham; and married, first, December 27, 1759, Henrietta, countess dowager of Stafford, sole heir of Philip Cantillon, esq. by which lady, who died August 35, 1761, he had issue, John lord Maxwell, who died in 1773; Henrietta, married to the right honourable Denis Daly, of Dunfandale, in Galway. The earl married, secondly, December 1, 1771, Sarah, sister of Dudley lord Sidney, and died November 16, 1779, when the earldom became extinct, and the barony devolved on his brother, Barry, the third lord, who was created viscount and earl of Farnham by George III. His lordship married, first, January 15, 1751, Margaret, daughter and co-heir of Robert King, esq. of Drefford, in the county of Meath; and by her, who died December 4, 1766, he had issue, John-James lord Maxwell; Anne, married to Richard Fox, esq. and Judith. His lordship married, secondly, February 7, 1772, daughter of Sir Robert Burdett, esq. and had issue, Grace, married to Ralph Gore, esq. nephew to the earl of Rofs; Elizabeth, died January 1782. The earl, dying October 7, 1800, was succeeded by John-James, the fourth baron, and second earl.

Creation.—Baron, 1756; Vifcount, 1752; and Earl, June 22, 1785.

Residence.—Newton Barry, in the county of Wexford.

Motto.—Je tis pris. — "I am ready."

LUTTRELL (HENRY-LAWES), EARL OF CARHAMPTON, VIFCOUNT CARHAMPTON, OF Cuffelhaven, BARON IRNHAM, OF LUTTRELLTOWN, GOVERNOR OF DUBLIN, A PRIVY COUNSELLOR IN IRELAND, A GENERAL IN THE ARMY, AND COLONEL OF THE SIXTH REGIMENT OF DRAGOON GUARDS; born August 7, 1743, succeeded his father, the late earl, January 14, 1787; married, June 25, 1776, Jane, daughter of George Boyd, esq.

Simon Luttrell, created baron Irnham, of Luttrelltown, born in 1713, was the first earl of Carhampton; and married, in 1737, Maria, daughter and heir of sir Nicholas Lawes; by which lady he had issue, 1. Henry-Lawes, the present earl. 2. Temple-Simon, married, April 26, 1778, Mifs Gould, daughter of sir Henry Gould, one of the judges of the court of common pleas in England, and co-heir with her father, Honora, countess of Cavan, and died February 14, 1803, without issue. 3. John, a commissioner of excise in London, married, in July 1766, Elizabeth Olmius, only daughter of John Luttrell, Esq. of Newton Barry, in the county of Mayo, and sole heir of her brother, the last lord Walham, who died without issue, December 20, 1766; and he assumed the name of Olmius, and had issue by her, who died June 14, 1777, John, died in 1769; Frances-Maria, married to sir Simon Stuart, bart.; and James, who died in 1772. He married, secondly, Maria, daughter of John Morgan, esq. of the Inner Temple, and has issue by her, Maria-Anne, born May 1799. 4. James, a captain in the royal navy, and has issue, Henry and Elizabeth. The earl, dying January 14, 1787, was succeeded by his eldest son, Henry-Lawes, the present earl. — The presumptive heir is John-Luttrell-Olmius, only brother to the earl.

Creation.—Baron, October 13, 1758; Vifcount, January 9, 1801; Earl, June 23, 1785.

Residence.—Luttrelltown, in the county of Dublin.

Motto.—En Dieu et vie cachée. — "In God is my trust."

BOURKE (JOHN), EARL OF MAYO, VIFCOUNT MAYO, OF Monocoyen, BARON OF Naas; born June 18, 1766; succeeded his father, the late earl, August 20, 1794; married, May 24, 1793, Arabella, daughter of William Mackworth Praed, esq. of Britton House, in Devonshire.

John, first earl of Mayo, and grandfather to the present earl, married, in 1755, Maria, daughter and co-heir of the right honourable Joseph Deane, lord chief baron of the exchequer, by Elizabeth, daughter of John Parker, archbishop of Dublin; by which lady, who died July 21, 1774, he had issue, Theobald, who died young; John, lord Naas; Joseph, archbishop of Tuam; who married, secondly, Agnes, daughter of Sir Joseph Earl of Miltoun; and, dying without issue, was succeeded by his brother, Joseph, third earl of Mayo, and archbishop of Tuam; who married,

16. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

17. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

18. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

19. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

20. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

21. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

22. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

23. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

24. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.

25. John, lord Montfort, born October 13, 1709, married, October 17, 1758, Elizabeth, eldest daughter of Hugh Willoughby, earl of Euston, and died May 22, 1803; succeeded by his eldest son, afterwards earl of Stafford.
Richard Butler, the first viscount Montgomeret, was the son of Sir Pierce Butler, eighth earl of Ormond, lord treasurer of Ireland, in the reign of Edward VI. His lordship's grandfather, Edmund, the tenth viscount, married, in 1744, Charlotte, daughter of Sir Simon Montgomeret, bart., by whom he died March 17, 1778, he had issue, Edmund, his successor; Richard, in holy orders, died in 1795; Simon, married to Miss Lynch, daughter of Edward Lynch, esq. of Hampstead, and died May 19, 1797; Eleanor, died in 1762; and Anne-Amelia. The viscount died February 9, 1779, and was succeeded by his eldest son, Edmund, the eleventh viscount, born July 27, 1755; married, October 7, 1768, Henrietta Butler, daughter of Somerset Hamilton, earl of Carrick, by which lady, who died June 20, 1785, he had issue, Edmund, earl of Kilkenney; Somerset-Richard, married Mrs. Kelly; Henry, born in 1773; Pierce, born in 1774; and Charlotte-Juliana, married to John-Carrington Smith, esq. The viscount, dying July 17, 1792, was succeeded by his eldest son, Edmund, the twelfth viscount, and first and present earl.—The presumptive heir is Somerset-Richard, next brother of the earl, to the viscountcy only.

CREATIONS.—Viscount, October 13, 1593; Earl, December 20, 1793.

Motto.—Dei petrus est dormitor. "Depraved, to be exalted."

ANNESLEY (ARTHUR), EARL OF MONTNORRIS, of Montnorris Castle, Baron Altham, and a Baronet; Governor of Wexford, and a Privy Councillor in Ireland; F. R. S. and F. S. A.; born August 3, 1744; succeeded his father, who was the seventh viscount Valentia, and sixth earl of Anglesey, February 14, 1761; married, first, May 10, 1767, Lucy-Fortescue Lyttelton, esq., secondly, May 10, 1783, Henrietta Butler, daughter of Somerford Hamil, and had issue, Anne-Amelia. The viscount died February 9, 1779; his lordship's father, Richard, the second viscount, born November 21, 1797; married, secondly, December 20, 1793, Mary, daughter of William viscount Courtenay, and has issue, George-Arthur, born October 2, 1793; Thomas-Lyttelton; Charles-Henry, deceased; Juliana-Lucy, married to John-Maxwell Barry, bishop of Meath, and sole heir of her brother Thomas, the second lord Lyttelton; by which lady, who died May 20, 1793, he had issue, John, George-Viscount Valentia, heir apparent, born November 2, 1769; married, Septembers, 1790; the present viscount, born November 21, 1797; married, secondly, December 20, 1793, Sarah, third daughter of Sir Henry Cavendish, bart., of Doveridge Hall, in the county of Derby, by Sarah baroness Waterpark, and has issue, 1. Henry, born March 24, 1792; 2. Richard, died in February 1807; 3. Catharine, born July 18, 1790; 4. Frances, born May 28, 1793; 5. Juliana, born November 21, 1797.

Francis Annisley, knight and baronet, and principal secretary of state in Ireland, was created baron Montnorris, and viscount Valentia, in 1621; and his son, Arthur, April 20, 1661, was created baron Annisley, of Newport Pagnell, and earl of Anglesey; from whom the late earl was descended. His lordship's father, Richard earl of Anglesey in England, and viscount Valentia, &c, in Ireland, left issue the present earl, and several daughters; and, his lordship dying February 14, 1761, his son succeeded to his Irish honours; but the English have ever since lain dormant.

CREATION.—Earl of Montnorris, in 1793.

Motto.—Montnorris Castle, in the county of Armagh.

Motto.—Virtutis amore. "Love virtue."

CUFFE (JOHN-OTWAY), EARL OF DESART, Viscount Castlecuffe, Baron of Defart; born February 20, 1788; succeeded his father, the late earl, August 9, 1804.

John, the second baron Defart, born November 16, 1723.
1738, married Sophia, daughter and heir of Bretridge Badham, eqq. of Rockfield, in the county of Cork, widow of Richard Thornhill, eqq. by which lady, who died August 2, 1768, he had issue, Sophia, born in 1753; Lucy, married to William Weldon, eqq. and Catharine, married to his Charles Buxton, bart. His lordship created November 25, 1767, without issue male, and was succeeded by his brother, Otway, the third lord, created viscount and earl of Delfart; and married, August 18, 1785, Anne, daughter of John, second earl of Altonmany, and father of the marquis of Sligo; and had issue, John-Otway, viscount Castlecuffe; Elizabeth; and Louisa-Dorothea. The earl, dying August 9, 1804, was succeeded by his only son, John-Otway, the present and second earl.—The presumptive heir is the Honourable Hamilton Cuffe, uncle of the present earl, to the barony of Delfart only.

**CREATIONS.**—Baron, September 10, 1733; Viscount, December 13, 1780; Earl, December 20, 1792.

**RESIDENCE.**—Cuffe-Castle, in the kingdom of Ireland.

**MOTTO.**—*Virtus requiecit necia forde.*—"Virtue diminishes a mean reproach."

Irish Viscounts.

PRESTON (JENICO), Viscount Gormanston, a Trustee of the Royal College of St. Patrick's in Maynooth; born January 2, 1777; succeeded his father, the late viscount, December 17, 1786; married, December 19, 1794, Margaret, daughter of Thomas viscount Southwell; by which lady, he has issue, Edward-Anthony-John, heir apparent, born June 3, 1796; Arthur-Anthony, born June 9, 1798; Jenico-Charles, born September 24, 1800; Robert, born January 23, 1802; Charles, born April 28, 1803; and a daughter, Harriet-Sophia.

His lordship is descendent in a direct line from Sir Robert Preston, created viscount Gormanston in 1478. Sir Robert de Preston, of Gormanston in Ireland, and lord of Preston in Lancashire, was knighted in the field in 1361, by Lionel duke of Clarence; in 1365, he was chief baron of the exchequer; in 1383, keeper of the seals; and was lord high steward of Ireland. He married Margaret, heir of Walter de Birmingham, lord of Carberry; and was ancestor of Sir Robert Preston, in the government of Ireland, for Richard duke of York; and created, in 1478, viscount Gormanston, as stated above.

Jenico, the seventh viscount Gormanston, married, first, Frances, fifth daughter of Frances earl of Scarf- dale, by Anne, sister of Henry viscount Falkland, who died without issue, July 29, 1682; and his lordship married, secondly, November 1683, Margaret, daughter of Caryl, third viscount Molyneux; and, dying without issue male, was succeeded by his nephew, Jenico, the eighth viscount; who was succeeded by his brother, Anthony, the ninth lord, who married Mary Prefdon, the only child of his uncle, the seventh viscount, and died September 25, 1716, leaving issue an only son, Jenico, the tenth viscount, born in 1707, married, February 9, 1725, Thomasine, eldest daughter of John, eleventh lord Trimlestown; by which lady, who died January 15, 1778, he had issue, Anthony, his successor; married secondly, in 1797, Frances, daughter of Sir Charles-William lord Tullamore; and was ancestor of Sir Charles-William, lord Tullamore, in the barony of Tullamore, county Offaly, in Ireland; also Earl of Jersey, Viscount Villiers, of Dartford, and Baron of Hoo, in England.—See EARL OF JERSEY, among the Peers of England, p. 508.

Dillon (Charles), Viscount Dillon, of Castello Gallen, Knight of St. Patrick, Condatable of Athlone, Governor of the Counties of Mayo and Roscommon, and a Privy Councillor in Ireland; born November 6, 1745; succeeded his father, the late viscount, November 3, 1787; married, August 19, 1776, Henrietta-Maria, daughter of Constance lord Mulgrave; by which lady, who died December 1, 1782, he has issue, Henry-Augustus, heir apparent, born October 28, 1777, a colonel in the army; France-Charlotte, born February
Irish Earls

Irish Viscounts

London: Published as the Act directs Nov. 1st 1824 by G. Kears
Henry, the eleventh viscount, married, October 26, 1744, Charlotte, eldest daughter of George Henry, second earl of Lichfield, and sole heir to the estates of the earls of Lichfield; by which lady, who died June 11, 1794, he had issue, Charles, his successor; Arthur, born September 3, 1750, colonel of Dillon's regiment; Harry, born June 25, 1759, colonel of the first regiment of the Irish brigade; Robert, born May 22, 1759, the eldest daughter of Dominick Henry Trout, esq., by whom he has issue, Maria, born March 10, 1756; Charlotte, born August 11, 1757; and Frederic, born August 28, 1758, to whom his royal highness the duke of York foon after his accession, in 1727, married Frances, daughter and heiress of Catherina, born June 4, 1725, died May 24, 1779; Laura, born April 21, 1754; Charlotte, born September 11, 1755, married to Valentine earl of Kenmare, and died August 15, 1792. The viscount, dying November 3, 1787, was succeeded by his eldest son, Charles, the twelfth and present viscount.—Creation, 1727.

Residence.—Loughlin Castle, in the county of Mayo.

Motto.—Dum spiro spero.—"While I breathe I hope."

Netterville (John), Viscount Netterville, of Doult, was born in 1744; succeeded his father, the late viscount, March 19, 1790.

Sir Formal Netterville, descended from Charles duke of Normandy, was one of the English knights who settled in Ireland in the reign of Henry II. He married Philippa, daughter of William de Vefey, by Isabel, daughter of William earl of Salisbury, son of Henry II, by Kofamond, daughter of Walter lord Clifford; and was ancestor of Nicholas, created viscount Netterville, of Douth, in 1622. John, the second viscount, married, in 1631, Elizabeth, eldest daughter of Richard earl of Portland, lord high treasurer of England, whole son, Nicholas, was father of John, the fourth viscount, who married, May 30, 1704, Frances, eldest daughter of Richard viscount Rof; and died December 12, 1727, leaving issue, Nicholas, the fifth viscount, married, February 28, 1731, to Catharine, daughter of Samuel Burton, esq. of Burton Hall, in the county of Carlow; by which lady, who died May 24, 1750, he had issue, John; Frances, married to William Blake, and died in 1758; and Anne, died in 1756. His lordship, dying March 19, 1750, was succeeded by his only son, John, the present and sixth viscount.—Creation, 1727.

Motto.—Cruci dum spiro spero.—"While I breathe, I trust in the cross."

Needham (John), Viscount Killmorey, succeeded his father, the tenth viscount, May 29, 1791; married, January 10, 1792, Frances, eldest daughter of Sir Robert Salisbury Cotton, bart. of Combermere Abbey, in the county of Chester.

Thomas, the sixth viscount, who succeeded his father, in 1668, married Frances, daughter and heir of Francis Leveson Fowler, esq. of Harnage Grange, in Shropshire; and had issue by her, (who married, secondly, May 2, 1690, Theoplius Haftings, earl of Huntingdon, and, thirdly, the chevalier de Ligongier,) Robert, the seventh viscount, who married Mary, daughter of John Offley, esq. of Crew, in Cheshire; by which lady, who died May 30, 1752, he had issue, Robert, earl; Thomas; Francis; John; Anne, died in 1791; and Mary, died in 1783; Elizabeth, deceased; Henrietta, died in 1777. The viscount died October 2, 1750, and was succeeded by his eldest son, Robert, the eighth viscount, who died unmarried in 1716, was succeeded by his next brother, Thomas, the ninth viscount, married, June 25, 1728, Mary, daughter and co-heir of Sir John Flitlhall, Bart. of Efinle, who died without issue, August 18, 1744. The viscount died February 3, 1748, and was succeeded by his brother, John, the tenth viscount, a colonel in the army; married, January 14, 1738, Anne, widow of Peter Shakeley, esq. of the city of Chelfter; and had issue by her, who died August 9, 1766. Thomas, died April 19, 1793; Robert, his successor; Francis, a lieutenant-general in the army, married, February 20, 1757, Anne, second daughter of Thomas Fether, esq. of Aifon, in the county of Middlesex, and has issue eleven children. The viscount died May 22, 1791, and was succeeded by his eldest son, Robert, the eleventh and present viscount. The presumptive heir is the honourable lieutenant-general Francis Needham, only brother to the viscount.—Creation, 1622.

Residence.—Shovington Hall, in the county of Salop.

Motto.—Nunc aut nunquam.—"Now or never."

Saunderson (Richard-Lumley), Viscount Lumley, of Waterford, in Ireland; also Earl of Scarborough, and Viscount and Baron Lumley, of Lumley Castle, in England.—See Earl of Scarborough, among the Peers of England, p. 595.

Smythe (Percy-Clinton-Sydney), Viscount Strangford, in the county of Down; born August 31, 1780, appointed Envoy Extraordinary, and Minifrer Plenipotentiary to the Court of Liffion, October 7, 1806; succeeded his father, the late viscount, October 1, 1801. Philip, sixth viscount, married, in 1741, Mary, daughter of Anthony Jephfon, of Mallow, esquire, by whom he had issue, Percy Clinton, the present viscount; Lionel-Charles Hewitt, died November 25, 1807; Eliza Maria Sidney, born September 3, 1781; Louisa Sarah Sydney, married, November 17, 1807, to John Eld, esq. of Seighford, in Staffordshire. The viscount, dying October 1, 1801, was succeeded by his eldest son, Percy Clinton-Sydney, the present viscount. The presumptive heir is Lionel, his lordship's brother.—Creation, 1628.

Motto.—Virtus incendit viras.—"Virtue inspires courage."

Taffe (Rodolphus), Viscount Taffe, of Corren, and Baron of Ballymote; succeeded his father, the late viscount, December 30, 1769; married, and has issue, a son, heir apparent; and another son.

Nicholas, sixth viscount Taffe, was poiffessed of a considerable estate in Silefia; and, entering into the service of the emperor Charles VI. distinguiihed himself by the name of count Taffe, during the war in 1738, with the Turks; and at the battle of Belgrade, he behaved with such remarkable bravery, that he gained the victory with great honour. His lordship married Mary Anne, countess de Spender, daughter and heir of count Spender, of Lintz, in Upper Austria; by which lady he had issue, 1. John, born January 1, 1740, married Maria countess Choteck, and died before his father; December 15, 1768, leaving issue, Rodolhus; another son; and a daughter; 2. Francis, a general in the Austrian service, and count of Taffe, in the empire; married, at Brusheis, in 1773, the eldest daughter of John lord Bellow, but had no issue by her, who died February 7, 1792. The viscount died December 30, 1769, at the castle of Elinshaw, in Bohemia, and was
was succeeded by his grandson, Rodolphus, the seventh and present viscount.—CREATIONS, 1628.

MOTTO.—In hoc signo vixi men. —"In this sign is my hope."

JONES (THOMAS), Viscount RANELAGH,
in the County of Wicklow, Baron of Navan; born February 2, 1765; succeeded his brother, the late viscount, February 24, 1800; married, August 21, 1804, Miss Stephens, daughter of Sir Philip Stephens, bart. of St. Faith, in the county of Norfolk, who died without issue, June 17, 1805.

Richard, third viscount Ranelagh, was appointed vice-treasurer of Ireland, June 4, 1784, and married, first, Elizabeth, daughter of Francis lord Willoughby, of Parham, and had issue, Arthur, Edward, and Elizabeth, who all died young; Elizabeth, married, June 1634, John, eighteenth earl of Kildare, and died without issue; Frances, married Thomas earl of Coningsby; Catharine, died April 14, 1759. The earl married, secondly, Margaret, daughter of James, third earl of Salisbury, and widow of Lord Stawell; and dying without issue male, January 5, 1771, the titles of viscount Ranelagh, and baron of Navan, lay dormant until 1759, when they were claimed by Charles Jones, the fourth in descent from the honourable Thomas Jones, second son of Roger, first viscount Ranelagh; which Thomas married Elizabeth, daughter of John Harrison, esq. of the city of Winchester, and had issue, Roger, heir, and Thomas, who died without issue; and the fourth viscount Ranelagh, married Sarah, daughter of Thomas Montgomery, esq. and had issue, Charles and Thomas, who were successively viscounts; also Richard, married to Sophia, daughter of John Gildart, esq. of Blackley Hurst, in Lancashire, and died November 27, 1803; John, died young; Benjamin, born September 17, 1770; John, born June 4, 1772; Robert, died young; William-Richard-Montgomery, born September 13, 1776; Alexander, born March 9, 1778; Robert, died young; Mary, married to the honourable Robert Molewirth, second son of Robert, fifth viscount Molewirth; Sarah, Margaret, who died young. The viscount, dying April 20, 1798, was succeeded by his eldest son, Charles, the fifth viscount, born October 29, 1761, a captain in the royal navy, who died unmarried, February 24, 1800, and was succeeded by his next brother, Thomas, the sixth viscount.—The presumptive heir is the viscount's brother.—CREATIONS, Vicount and Baron, 1628.

MOTTO.—Celsitus mihi vises.—"My strength is from heaven."

FITZWILLIAM (RICHARD), Viscount FITZ-WILLIAM, of Meryon; Baron Fitzwilliam, of Thorn Castle; Vice-admiral of Leinster; born August 1745; succeeded his father, the late viscount, May 23, 1776.

The fifth viscount, married Frances, eldest daughter of Sir John Shelley, bart. of Michael Grove, in the county of Suffolk, by Bridget, only daughter of George lord Abergavenny, and had issue by her, 1. Richard, his successor. 2. William, born September 7, 1722; married, September 9, 1759, Miss Bouchier, only daughter of Thomas Bouchier, esq.; 3. John, born March 12, 1724, a lieutenant-general in the army, and colonel of the second regiment of foot; married to Barbara, daughter of Dr. Chandler, bishop of Durham, and died in 1789. 4. Mary, married, first, August 28, 1733, Henry Herbert, earl of Pembroke and Montgomery; and, secondly, September 1751, North Ludlow Bernard, esq.; 5. Frances, married May 18, 1732, George Evans, secondly, 1743, and was succeeded by his eldest son, Richard, the sixth viscount, born July 1711; married, May 3, 1744, Catharine, daughter of Sir Matthew Decker, bart. and had issue by her, who died March 8, 1788, Richard, his successor; William, married, August 25, 1782, the young daughter and heir of Sir James Bampfylde, esq. of a matter in chancery; John; Thomas, married to Agnes, daughter and co-heiress of Thomas Macclesfield, esq. of Chesterfield, in Derbyshire. The viscount, dying May 25, 1775, was succeeded by his eldest son, Richard, the seventh viscount.—The presumptive heir is William, brother to the viscount.—CREATION, 1629.

MOTTO.—Deo adjuvante, non timendum.—"God affisting, nothing is to be feared."

Cockayne (Borlase), Viscount CULLEN; succeeded his father, the late viscount, June 7, 1802.

Charles Cockayne, first viscount Cullen, married Mary, eldest daughter of Henry o'Bryan, fifth earl of Thomond, by Mary, daughter of William lord Borton; and had issue by her, who died November 30, 1715, Charles, his successor; Trentham; George; Elizabeth; and Mary. Charles, the third viscount, married Anne, sister of Borlase Warren, esq. of Stapleford, in Nottinghamshire; and was father of Charles, the fifth viscount, who married his cousin Anne, daughter of Borlase Warren, esq. of Stapleford, and had issue by her, who died July 1754, Charles, deceased; Borlase, his successor; John, died unmarried; and Anna, to the second Nathaniel, M. P. for Northampton; he married Anne, daughter of Broughton, in Northumberland, and had issue, Frances, married to William Bennett, bishop of Cloyne. The viscount married, secondly, Sophia, daughter of John Baxter, esq. and by her, who died July 12, 1802, he had issue, William, constable of Limerick, married, to Borlase, the sixth and present viscount.—The heir presumptive is William, only brother of the viscount.—CREATIONS, Vicount and Baron, August 15, 1642.

 Residence.—Rushoton Hall, in the county of Northampton.

MOTTO.—Virtus in arduis.—"Virtue in difficulties."

Waren Bulkeley (Thomas-James), Viscount BULKELEY, of Cadell, in Ireland; Baron Bulkeley, in England; Lord Lieutenant of Cheshire; Chamberlain of North Wales, and Hereditary Constable of Beaumaris Castle; born December 10, 1752; married, April 26, 1777, Elizabeth-Harriet, only daughter and heir of Sir George Warren, knight of the bath.

Richard, fourth viscount Bulkeley, constable of Beaumaris Castle, and chamberlain of Wales, (which dignities have been enjoyed by this noble family, almost without interruption, from the reign of queen Elizabeth,) married Bridget, eldest daughter of James, first Earl of Abingdon, by Eleanor, daughter and co-heiress of Sir Henry Lee, bart. of Ditchley, in Oxfordshire; and had issue by her, who died June 1753, Richard, and James, who were successively viscounts; Bridget, died unmarried; Eleanor, married, George Harvey, esq. of Teddington, in Oxfordshire; Anne, married, William Bertie, D.D. brother of Willoughby, third earl of Abingdon; Elizabeth, married William Price, esq. of Bulace, Lulmey, and Sarah, both deceased. The viscount died June 4, 1724, and was succeeded by his eldest son, Richard, the fifth viscount, born in 1708, constable of Beaumaris Castle, and chamberlain of Wales; married, January 12, 1732, Miss Owen, daughter and heir of Louis Owen, esq. of Peniarth, in Merionethshire, but had no issue by her; who married, secondly, May 1739, Edward Williams,
Williams, youngest son of John Williams, esq. and grandson of sir William Williams, bart. speaker of the house of commons. The vicount died March 15, 1738, and was succeeded by his brother, James, the fifth vicount, August 17, 1749. Emma, daughter and heir of Thomas Rowland, esq. of Carew, in the Isle of Anglesey, and had issue by her, Bridget, who died in 1766; and Eleanor-Maria, died an infant. The vicount died April 23, 1752, leaving his lady enfent of a son, Thomas-James, who became the seventh vicount, and was created a peer of Great Britain May 21, 1754, by the title of Lord Bulkeley, baron of Beaumaris. Creation, 1643.

Residences.—Baron-Hill, in Anglesey; Poynton, in Cheshire; and Reyer, in the county of Bucks.—Townhouse, in Wigmore-street.

Motto.—Ne tenere nec timide.—"Neither rashly nor timidly.

CHOLMONDELEY (GEORGE-JAMES), Viscount CHOLMONDELEY, of Kels, Baron Cholmondeley, of Newburgh; Earl of Cholmondeley, and viscount Malpas, and a Baronet, in England.—See Earl of Cholmondeley, among the Peers of England, p. 599.

DOWNE (JOHN-CHRISTOPHER-BURTON), Viscount DOWNE; Baron Downay, of Cowick, in the Pecage of England, and a Baronet; born November 15, 1784; succeeded his father, John, the late viccount, December 21, 1780; married, January 7, 1801, Margaret-Jane, daughter of sir Philip Amnle, bart.

Sir John Downay, bart. of Cowick, in the county of York, was the first vicount Downay; whose only son, Henry, the second vicount, married Mildred, daughter of William Godfrey, esq. of Thunick, in Lincolnshire; and had issue by her, who died September 1725, John; William; Henry, a prebendary of Canterbury; married Elizabeth, eldest daughter of sir Thomas D'Aeth, bart. of Knowlton, in Kent, and died July 1753; Christopher, married to Miss Rundall, of Macdon, in Yorkshire, who died January 3, 1759; George, a captain in the royal navy; Godfrey; Mildred, married to sir William Fowles, bart. Dorothy, married, first, to Robert Shaftoe, esq. and secondly, to Thomas Eden, prebendary of Durham; fourth son of Sir Robert Eden, bart. of Welt Auckland, and died without issue, November 26, 1734. The vicount died in May 1744, and was succeeded by his grandson, Henry-Pleydell, third vicount, the eldest son of the honourable John Downay, who died before his father, July 31, 1740; who John married, August 19, 1758, Mary, daughter of Robert Pleydell, esq. of Ampul Crucis, in Gloucestershire, and heir of her brother; and had issue, Henry-Pleydell, and John, who were successively viccounts. Henry-Pleydell, the third vicount, born April 8, 1775, was a colonel in the army, and lieutenant-colonel of the 25th regiment of foot, which he commanded at the battle of Minden, in 1759. He died December 9, 1762, of a wound he received at the battle of Camper, near Wefel; and was succeeded by his only brother, John, the fourth vicount, born April 8, 1763; married, May 20, 1763, Laura, daughter and heir of Sir William Burton, esq. of Lundenham, in Rutlandshire, by Elizabeth, daughter of George Pitt, esq. of Strathfielday, in the county of Southampteton; and had issue, John-Chephofer, his successor; William-Henry, born August 20, 1772; Marmaduke, born July 27, 1777, in holy orders; Thomas, born May 29, 1779; Catharine, born August 25, 1768; Lora, born June 17, 1774, died young. The vicount, dying Dec. 21, 1780, was succeeded by his eldest son, John-Chethofer, the fifth and present vicount, born August 1, 1754, and had issue, William-Henry, next brother of the vicount.

Creation.—Viscount Downay, 1681; Baron Downay, 1796.

HOWE (WILLIAM), Viscount HOWE, Baron of Clenawley, and a Baronet; Knight of the Bath, a General in the Army, Colonel of the 9th Regiment of Dragona, and Governor of Plymouth; succeeded his brother, the late earl, August 5, 1799, when the English earldom became extinct. He married Frances, fourth daughter of the right honourable William Conolly, of Caflletown, in Kildare, by lady Anne Wentworth, eldest daughter of Thomas, third earl of Stratford.

The family of Howe was of considerable note in the reign of Henry VIII. John Howe, in the reign of queen Elizabeth, married Jane, sister of sir Richard Grubham, of Wilhord, in the county of Wilts, knight; by which lady, through whom a considerable property descended to the family, he had issue, 1. George, created a baronet June 20, 1660, which title became extinct in his fon. 2. John, created a baronet September 22, 1660, and had issue, sir Richard Grubham, second baronet; and John, father of Scrope; and of John, father of John, first lord Chedworth.

Scrope, grandson of sir John, first baronet, was a distinguished leader in the whig party during the reigns of Charles II. and James II. He was one of those, who, June 26, 1660, delivered a presentment to the grand jury of the county of Middlesex, against the duke of York, and account of his adherence to the Roman-catholic religion. After the accession of that prince, he concerted measures with William, fourth earl of Devonshire, for bringing about the revolution; and, on account of his patriotism and ability in that transaction, was created by William III. May 16, 1701, baron Clenawley, in the county of Fermanagh, and viscount Downay, in the kingdom of Ireland. He died January 16, 1712.

Emanuel Scrope, second lord viscount Howe of the kingdom of Ireland, his son, succeeded to the baronetage upon the failure of the elder branch, July 3, 1730; and married Mary-Sophia-Charlotte, daughter of baron Kilmansegg, of the electorate of Hanover, murther of the forces to George I. and of Sophia-Charlotte, countess of Leinster, in the kingdom of Ireland; by which lady, who died June 13, 1765, he had issue, 1. George-Augustus, third lord viscount Howe, who embraced the profession of the army, and was killed at Ticonderoga, in the war of 1755. 2. Richard, the late earl Howe, in England. 3. Charlotte, married to Robert Pettipiaze, of Swinbrook, in the county of Oxford, esquire, and died in 1785. 4. Mary, married to William-Auguslus, brother to George lord Rivers, of Strathfieyay.

William, third son of Emanuel, second viscount, embraced the military profession; and, having served with distinction in the preceding war, was selected, in 1775, to be commandant in chief of the forces destined to reduce the disaffected colonies of North America, upon which occasion he was elected knight of the most honourable order of the bath. The campaign of that year was attended with several brilliant actions. General Howe forced the American lines at Long Island, captured the town of New York, repulsed the main army of the Americans at the White Plains, and drove the enemy across the province of New Jersey, and the Delaware, into Philadelphia; and the following year was distinguished by the capture of Philadelphia, and the successful actions of the Brandwine, and German Town. See the article America, vol. i. p. 449. In 1778, he resigned his command; and was promoted to the rank of major-general in the army, May 25, 1773; to the rank of general, January 13, 1777; to the rank of lieutenant-general in the office of ordnance, April 23, 1782; and to that of colonel of the nineteenth regiment of dragons, April 21, 1786.
He was also appointed lieutenant-governor of the Isle of Wight.

Richard, the fourth viscount, was admiral of the fleet, general of marines, knight of the garter, and first lord of the admiralty; created for his eminent services a peer of Great Britain, by the title of viscount Howe, of Langar, April 20, 1782; advanced to the dignity of earl Howe, June 7, 1788; and baron Howe, of Langar, August 19, 1788, with remainder in failure of issue male to his daughters. He married, March 19, 1755, Mary, daughter of Chiverton Harropp, esq. of Welby, in Leicestershire; and had issue by her, who died August 5, 1800, Sophia-Charlotte, married July 31, 1787, the honourable Penn Ashton Curzon, eldest son of Ashton viscount Curzon; Mary-Juliana, died April 11, 1800; Louisa-Catherine, married to John Denis, marquis of Sligo. The earl, dying August 5, 1799, without issue male, the English earldom and viscountcy became extinct; but he was succeeded in his English barony of Howe, of Langar, by his eldest daughter, Sophia-Charlotte; and in the hereditary Irish honours, by his only brother, William, the present and fifth viscount. See Baroness Howe, among the English Peeresses, p. 595. — Creation, 1716.

Residence.—Swords, in the county of Dublin.

Motto.—Finiti amor patriae. — "The love of my country prevails."

CHEWYND (RICHARD), Viscount CHEWYND, of Beerven, in the county of Kerry, Baron of Rathdowne, in the county of Dublin, and Clerk extraordinary to the Privy Council in Ireland; born September 12, 1757; succeeded his father, the late viscount, November 12, 1791; married, July 30, 1791, Charlotte, sister to Ralph-William Cartwright, of Aylsham, in Hampshire, esquire, and knight of the spire for the county of Northampton; by whom she had issue, Charlotte, born September 14, 1793; either, born September 22, 1797; Mary-Catharine, and Susannah, twins, both dead; Richard-Walter, heir apparent, born December 14, 1798; Mary-Anne, born April 17, 1791; and William-John, born November 20, 1804, died January 1805.

Walter Chewynd, the first viscount, married Mary, daughter and co-heir of John Berkeley, viscount Fitzharding, who died June 3, 1741; and his lordship, dying without issue, February 21, 1756, was succeeded by his brother, John, who had the two sons, the eldest of whom died in 1741; and William-Richard, the youngest, in 1755, leaving one daughter, married to John Parsons, esq. and two other daughters; Catharine, married to John Talbot, esq. brother to William lord Talbot, to whom she was second wife; and by him had issue, John-Chewynd Talbot, esq. born in 1749, married to Charlotte, daughter of Wills, first marquess of Downshire; and Frances, who died in 1805. John, the second viscount, died June 21, 1767, and was succeeded by his brother, William, the third viscount; who married Miss Honora Baker; by whom, who died in 1726, he had issue, Mary, married to the honourable and reverend Henry Peers, esq. of the king'sInner chamber; and died in 1758; Deborah, died in 1758; Lucy, died in 1759; and either; Thomas, died at sea; John, in holy orders, married to Miss Judith Pigott, whom he had issue two daughters, and one son; William, married to Miss Penelope Carelton, and was killed in an action with the rebels, at Saintfield, in Ireland, June 1789. His lordship, dying April 30, 1770, was succeeded by his eldest son, William, the fourth viscount, born November 23, 1721; married to Susannah, daughter of sir Jonathan Cope, bart., who had issue, William, who died in 1779; John-Whitmore, died in 1788; Richard, the present viscount; Granville-Aslon, married to Martha, daughter of the late Henry Stopylton, esq. of Wighill, in Yorkshire; and has issue, Henry-Richard, Harriet, Honora, Charlotte, Esther-Susannah, Margaret, Diana-Clara, and Granville-William. His lordship had also two daughters; Susannah, born May 25, 1752, married to Munbee Goulburn, of Jamaica, esquire, who died in November 1795, leaving issue three sons; and Amanda-Clara, married, in May 1805, lord Robert Seymour, third son of Francis, late marquis of Hertford. His lordship, dying November 12, 1791, was succeeded by his son, Richard, the present and fifth viscount. — Creation, 1716.

Residence.—Beerven, in the county of Kerry.

Motto.—
Motto.—*Probitas verus honos.*—“Probitas is true honour.”

BRIDDRICK (GEORGE), Viscount MIDLETON, Baron Briddrick, of Midleton, in Ireland, and Baron Briddrick, of Pepper Harrow, in England, born November 1, 1754; succeeded his father, the late viscount, September 22, 1765; married, first, December 4, 1778, Frances Pelham, second daughter of Thomas Earl of Chichester; by which lady, who died June 26, 1783, he had issue, Frances-Anne, eldest daughter, born August 24, 1783; and Mary, second daughter, born in the county of Sussex, effuqre. The viccount married, secondly, June 15, 1797, Maria, daughter of Richard Benyon, esq., of Gides-hall, in the county of Essex; and has issue, Mary, born March 28, 1799; Charlotte, born February 28, 1802; Harriet, born August 10, 1804; George Alan, heir apparent, born June 10, 1805; and Emma, born August 13, 1807.

Alan, second vicount Midleton, born January 1701, succeeded to the title, August 29, 1728, on the death of his father, Alan vicount Midleton, lord chancellor of Ireland; and married Mary, youngest daughter of Algernon, second earl of Essex; by which alliance, who died March 12, 1762, he had issue, an only son, George, the third vicount, born October 3, 1730, married to Albinia, eldest daughter of the honourable Thomas Townshend, and of title of Thomas, first vicount Sydney; and had issue by her, George, his successor; Thomas, born January 1, 1735, Henry, a colonel in the army, died at Lisbon, 1755; Charles, archbishop of Cadiz; and primate of Munster, married to Mary, daughter of Richard Woodward, bishop of Clonny, and has issue Charles, George, Mary, Albinia, Louisa, and Frances; William, late lord of the treasury; John, a brigadier general in the army; Albinia, died young; Mary; and Harriet, who died an infant. The vicount, dying September 22, 1765, was succeeded by his eldest son, George, the present and fourth vicount.

CREATIONS.—Baron, April 13, 1715; Vicount, August 15, 1724; Baron Briddrick, in England, May 28, 1796.

RESIDENCES.—Middleton Park, in the county of Cork; and Pepper Harrow Park, in the county of Surrey.—Town-house, in Curzon-street.

Motto. — *Cuscide corona.*—“From a lance to a crown.”

HAMILTON (GUSTAVUS), Viscount BOYNE, and Baron Hamilton of Stakallen, born December 18, 1749; succeeded his father, the late viscount, July 30, 1789; married, April 11, 1773, Martha, daughter of Sir Quaile Somerville, of Somerville, in the county of Meath, bart., and has issue, Sarah, born February 25, 1775; Georgiana, born February 14, 1776; Gustavus, heir apparent, born April 25, 1777; and Richard Somerville, born June 1, 1778, in the royal navy.

Frederic, third vicount Boyne, succeeded his first cousin, Gustavus, second vicount Boyne, who died unmarried in 1746. His lordship married Elizabeth, daughter of Benjamin Hadley, esq., and died January 2, 1772, without issue; when the honours devolved on his brother, John, the fourth vicount, born March 21, 1744; and married Georgiana, second daughter of William Bury, esq., by the honourable Jane Moore, daughter of Charles Lord Tullamore; by which lady, he had issue, Gustavus, his heir; Charles, a captain in the 12th regiment of dragoons, married Miss Lyther, daughter of Christopher-Kirwan Lyther, esq., and died without issue male; Edward, second son, and Richard, both died young; William, died in 1779; Richard, born July 21, 1774; Jane, and Dorothy, both died in their infancy; Catharine, married to Hugh Montgomery Lyons, esq.; Elizabeth, Georgiana, and Mary-Anne, all died young; Barbara, born December 9, 1766; Sophia, born December 3, 1767; and Anne, born March 2, 1771. The vicount, dying July 30, 1789, was succeeded by Gustavus, the fifth and present vicount.

CREATIONS.—Baron, October 1715; Vicount, August 20, 1717.

HERALDRY.—Hanover Hall, in the county of Suffolk.

Motto.—*Nec teneo nec svern.*—“Neither fear, nor despair.”

ALLEN (JOSHUA), Viscount ALLEN, Baron Allen, of Stillsorgan; born April 16, 1735; succeeded his brother, John, the late viscount, November 10, 1753; married, August 5, 1781, Frances, eldest daughter of Gaynor Barry, esq., of Dornmouth, in the county of Meath, by which lady he has issue, Joshua-William, heir apparent, in the 3d regiment of guards; Frances Elizabeth; and Letitia-Dorothea.

Joshua, the first vicount Allen, married, in 1782, Mary, eldest daughter of the right honourable Robert Fitzgerald, and father of Robert, nineteenth earl of Kildare; and had issue, Joshua, his successor; Robert, born in 1687, married to Frances, daughter of Robert Johnson, baron of the exchequer, and died December 16, 1743, leaving issue, Mary, married to Robert Body, esq.; Frances, married to William-Paul Warren, esq.; and Richard. Elizabeth, Annabella, and Julia, who all three died young. His lordship, dying September 12, 1795, was succeeded by his eldest son, Alexander-Wentworth, the present and second lord.—The presumptive heir is Godfrey, brother to present lord.—Creation, July 13, 1776.

Motto.—Per mare, per terras.—"Both by sea and by land."

EDWARDES (WILLIAM), LORD KENSINGTON; born April 24, 1777; succeeded his father, December 6, 1801; married Miss Thomas, and has issue, Edward-Henry, heir apparent, born November 15, 1784; Caroline, born December 13, 1799; William, born February 3, 1800; and a daughter, born May 13, 1802.

His lordship is descended from the noble family of Rich, earls of Warwick and Holland, and barons of Kennington. Robert, earl of Warwick and Holland, married Anne, daughter of Edward earl of Manchester, by which lady he had issue, Edward, his heir; and Elizabeth, married to Francis Edwards, of Haverfordwest, esquire, descended from an ancient family in Wales, by whom he had issue, Edward-Henry, Francis, William, and Lucy. Edward, earl of Warwick and Holland, married Charlotte, daughter of Sir Thomas Middleton, of Chirle Castle; and, dying July 31, 1791, left an only son, Edward-Henry, his heir; and his lady, surviving, was married, in 1795, to the celebrated writer, Joseph Addition, esq. Edward-Henry, earl of Warwick and Holland, dying unmarried, August 16, 1798; his estates devolved to William Edwards, youngest and only surviving grandson of Robert earl of Warwick and Holland, who has created baron Kennington, and married, February 14, 1786, Elizabeth, youngest daughter and co-heir of William Warren, of Longbridge, in Pembroke-shire, esquire, by whom he had issue, William, his heir; and his lordship, dying December 13, 1801, was succeeded by his only son, the present and second lord.—Creation, July 20, 1776.

Residence.—Knighthorne, in the county of Pembroke.

Motto.—Gardez la foi.—"Keep the faith."

LYTTLTON (WILLIAM HENRY), BARON WESTCOTE, of Balnabe, Lord Lyttleton, Baron of Frankley in Worcestershire, High Steward and Recorder of Bewdley.—See Lord Lyttleton, among the Peers of England, p. 582.

ONGLEY (ROBERT), BARON ONGLEY, of Old Warden; born September 20, 1770; succeeded his father, the late lord, October 23, 1785; married, July 11, 1801, Frances, only daughter of Sir John Burgoyne, bart. of Sutton, in the county of Bedford.

His lordship's father, Robert-Henry, first lord Ongley, assumed the name and arms of Ongley, on succeeding to the estates of his great-uncle, Sir Samuel Ongley, of Kent. His lordship married, May 4, 1762, Frances, daughter and co-heiress of Richard Gosforth, esq. of

8 K. Langton
Langton Hall, in the county of Essex, and had issue, Robert, lord Ongley; Samuel, born in 1774; Frances; Catharine, married to colonel Freemantle; Anne; Sarah, married to William Phillimore, esq. His lordship, dying October 23, 1775, was succeeded by his eldest son, Robert, the present and second lord.—The presumptive heir is Samuel, his lordship's only brother.

Motto.—Misi cura futuri.—"I am careful for the future."

MASSEY (HUGH), BARON MASSEY, of Duntryleague; born October 24, 1761; succeeded his father, the late lord, May 10, 1790; married, March 12, 1792, Margaret-Evelina, youngest daughter of William Barton, esq. of Grove-Place, in the county of Tipperary, by which lady he had issue, Hugh-Hamon, heir apparent, born February 13, 1793; George-Wiliam, born October 24, 1761; succeeded his father, the late lord, May 10, 1790; married, March 12, 1792, Caroline, eldest daughter of William Phillimore, esq. His lordship, dying May 10, 1790, was succeeded by his eldest son, Hugh, the present and third baron Massey.—Creation, July 1776.

Residence.—Duntryleague, in the county of Limeric.

Motto.—Pro libertate patria.—"For the liberty of my country."

ROBINSON (MORRIS), BARON ROKEBY, of Armagh, in Ireland, and an English Baronet; succeeded his uncle, the late lord, November 30, 1800.

Thomas Robinson, his lordship's great-grandfather, who died in 1719, married Grace, eldest daughter of Sir Henry Stapleton, of Myton, in the county of York, baronet, by whom he left issue one daughter, Elizabeth; and a son, William, who died February 24, 1719, having married, in 1699, Anne, daughter and heir of Robert Walters, esq. of Cundall, in the North Riding of Yorkshire. By this lady, who died in July 1730, he had issue, Matthew, the late Lord Robinson, born January 12, 1794; John, born June 21, 1793; a son, born July 1810; and a daughter, born March 17, 1802.

The family of Massey derive their name from the lordship of Malby, in Normandy, their place of residence at the time that duchy was conquered by Rollo, in 876, at which period they were styled lords of Malby. Hugh, the first baronet, married Catharine, daughter of Edward Taylor, esq. of Ballynor, in the county of Limeric, co-heir with her sisters, the countesses of Carbery and Limeric, by which lady he had issue, Hugh, the present and first baronet, born July 28, 1772; John; Mary; and Sarah. His lordship, dying May 10, 1790, was succeeded by his eldest son, Hugh, the present and third baron Massey.—Creation, July 1776.

Residence.—Duntryleague, in the county of Limeric.

Motto.—Forte et fidelis nihil difficile.—"Nothing is difficult to the brave and the faithful."

TONSON (WILLIAM), LORD RIVERSDALE, Baron Riverdale, of Rathcormurch; born December 8, 1775; succeeded his father, the late lord, December 8, 1775; married, October 21, 1799, Charlotte, widow of the late Rev. William Freind, dean of Canterbury, and left three sons and one daughter.—The presumptive heir is Matthew, his present and second lord.

Motto.—Mild cura futuri.—"Care for the future.

Holroyd (John-Baker), Baron Dunamore, in the county of Meath, in Ireland; and Baron Sheffield, of Sheffield, in England.—See Baron Sheffield, among the peers of England, p. 592.

Deane (Robert-Tilson), Baron Mus-Kerry; a Privy Councilor in Ireland, and Governor of Limeric; born October 19, 1747; married, in May 1775, Anne, heir of John Fitzmaurice, esq. of Springfield Castle, in the county of Limeric; and had issue, Robert Fitzmaurice, born May 24, 1776, and died January 18, 1796; John Thomas, heir apparent, born September 27, 1777, a major in the army; William, born August 3, 1792; and Matthew, born March 19, 1795.

Sir Matthew, the fourth baronet, married Salisbury, daughter and heir of Robert Davies, esq. of Manley Hall, in the county of Cheshir; but dying without issue, June 10, 1751, was succeeded by his only brother, Sir Robert, the fifth baronet, created Baron of Muskerry, January 5, 1801.

Motto.—Forte et fidelis nihil difficile.—"Nothing is difficult to the brave and the faithful."
in Scotland, and brother of lieutenant-general Sir David Baird; Charlotte, born December 25, 1785. His lordship, dying December 4, 1787, was succeeded by his eldest son, who succeeded in the baronetcy and present barony. His presumptive heir is Charles Ludlow, his lordship's brother.—Creation, October 15, 1783.

Residence.—Baron-ltown Castle, in the county of Wexford.

Motto.—Fidelis ad uram. —"Faithful to their allies."

EDEN (William), Baron Auckland, in Ireland; and Lord Auckland, of Wexford, in England.—See Baron Auckland, among the Peers of England, p. 582.

BROWNE (James-Caulfeild), Baron Kilmaine, and a Baronet; Governor of Mayo-shire; born March 16, 1753; succeeded his father, John, the late lord, June 7, 1793; married, July 25, 1795, Anne, fourth daughter of the late Right Honourable Henry Cavendish, bart. of Doveridge Hall, in Derbyshire; by which lady he has issue, John-Caunfield, heir apparent, born June 11, 1794; Sarah-Louiza, born March 7, 1796; Henry-Montague, born October 3, 1799; George-Augustus, born February 18, 1801; and Augustus-Caulefield-James, born November 15, 1803.

Sir Thomas, his heir apparent; 2. Jane; 3. Tereza, married to Sir Charles Turner, bart., of Kirkleatham, in Yorkshire; 4. Charlotte; 5. Catharine. Sir Robert Newcomen was created a baronet in 1653, and was ancestor of Sir Beverley Newcomen, bart., and has issue by him, who assigned the name and arms of Newcomen, and died August 21, 1807. Sir Beverley Newcomen, bart., has issue by him, who assigned the name and arms of Newcomen, and died August 21, 1807; 1. Sir Beverley, who assigned the name and arms of Newcomen, and died August 21, 1807; 2. Sir Beverley, who assigned the name and arms of Newcomen, and died August 21, 1807; 3. Sir Beverley, who assigned the name and arms of Newcomen, and died August 21, 1807; 4. Sir Beverley, who assigned the name and arms of Newcomen, and died August 21, 1807; 5. Sir Beverley, who assigned the name and arms of Newcomen, and died August 21, 1807.

Residence.—Mortoun Park, Longfordshire.

VERNEY (MARY), BARONESS OF FERMAGH; born October 25, 1737. Her ladyship is the only daughter and heir of the honourable John Verney, eldest son of Ralph viccount Fermanagh, and baron Verney (created earl of Verney after the death of his son), who, dying before his father, never enjoyed the honours; and, on the death of his uncle, Ralph, the last earl Verney, she was created baroness Fermanagh, with the dignity of baron Fermanagh to her issue male. Sir Ralph Verney, who succeeded his father in the baronetcy, June 23, 1717, was created earl Verney in 1743. His lordship married Catharine, daughter and co-heir of Henry Pelchall, esq., by which lady, who died November 27, 1758, he had two sons and two daughters; John, the eldest son, married, July 6, 1736, Mary, third daughter of Jofiah Nicholson, esq., but, dying June 3, 1737, left her issue of a daughter, the present baronet Fermanagh; and his widow re-married, December 9, 1741, Richard Calvert, esq., brother to Sir William Calvert, alderman of London; Elizabeth, who married, June 25, 1747, Bennet, third earl of Harborough; and Catharine, who died August 17, 1763. His lordship, dying October 4, 1752, was succeeded by his second and only surviving son, Ralph, late earl Verney, who married, September 11, 1740, Mary, daughter of Henry Herring, of London, merchant; but she died without issue by him; Oriel, his heir, married, March 25, 1773, the present peeress Fermanagh, on March 25, following, when his titles became extinct.

Residence.—Belturbet, Cavanshire.

TOLER (GRACE), BARONESS NORWOOD, of Knock Alton Castle; married, June 2, 1778, John lord Norbury, and has issue, a son, Daniel, heir apparent, and other children. Her ladyship's father, Hector Graham, esq., who died in September 1806, descended from the Montrose family, married Grace, daughter of Robert Maxwell, brother of John lord Farnham, by whom he had issue, Grace, the present peeress Norwood, created a peeress of Ireland, November 7, 1797, with remainder to her issue male by John lord Norbury. For her ladyship's issue, see Lord Norbury, p. 664.

CROFTON (ANNE), BARONESS CROFTON, of Mote, in the county of Roscommon; born January 11, 1751; married, April 13, 1762, sir Edward Crofton, bart., and had issue by him, who died September 30, 1777, for Edward, heir apparent, born October 23, 1778; married, September 12, 1797, Charlotte, the fifth daughter of John, sixth earl of Galloway; Henry Thomas-Marcus, born September 4, 1755; George Alfred, a lieutenant in the royal navy, born September 11, 1756; William-Gorges, born August 27, 1757; Catharine-Anne, died an infant; Caroline, born October 10, 1757; Louisa, died June 8, 1766; Lieutenant-colonel Peregrine Maitland, nephew of the earl of Languard, and died November 5, 1805; Frances, married, April 2, 1802, to St. George Caulfeild, esq., of Donnafonde Castle, in Roscommon, defended from the lords Charlemont, and has issue a son, born March 15, 1806; Harriet, married, May 21, 1806, James Caulfeild, esq., of the county of Tyrone, and has issue, a son, born in 1807; Augusta, born January 5, 1792.

Sir Edward Crofton, the fifth baronet, married Mary, fifer of David Nixon, esq., and died in 1743, leaving issue one son and one daughter, viz., sir Edward, the fifth baronet, born in 1719, and married, June 17, 1743, Martha Damer, created baronetess Crofton; mistress of Chester, but died in 1746, without issue; and Catharine, born in 1723, to whom the family-estate devolved on the death of her brother; she married, in 1745, Marcus Lowther, esq., who assigned the name and arms of Crofton, was created a baronet in 1653, and died in January 1784; they had issue, the late lord Edward Crofton, born August 17, 1746; Gorges, born July 17, 1746; Hamilton, died in 1795; Catharine, married to sir James Somerville, in the county of Mccath, and died in 1778, leaving issue, sir Marcus Somerville, and another son; Sophia, born in 1737, married the honourable baron Mdcge, and died in 1778; Marcus, born in 1738, died in 1755; Frederic, born in 1759; William, died in 1794. Sir Edward, the late baronet, married Anne, created baroness Crofton, of Mote, in 1797, daughter and heir of Thomas Croker, esq., of Buckwellton, in Kildare; and he died September 30, 1797.

NUGENT-TEMPLE, (MARY-ELIZABETHGRANVILLE), BARONESS NUGENT, of Carlowtown, in Wealtmeath; married, April 16, 1775, George marquis of Buckingham, and has issue; for which see MARQUIS OF BUCKINGHAM, among the PEEKS OF ENGLAND, p. 480.

Her ladyship is descended from sir Thomas Nugent, of Carlowtown, in Wealtmeath, younger brother of Richard Nugent, eighth lord Delvin, whose descendant, Richard, the tenth lord, was created earl of Wealtmeath in 1627. Robert, the sixth in descent, was created viccount Clare and baron Nugent in 1766, and earl Nugent in 1776. His lordship married, first, July 14, 1739, Emilia, second daughter of Peter, fourth earl of Fingall, who died without issue, August 16, 1731. The earl married, secondly, Anne, daughter of James Crages, esq., secretary of state to George I. and widow of Robert Knight, esq., of Gosfield Hall, in Essex, who died without issue. The earl married, thirdly, January 4, 1757, Elizabeth, widow of Augustus, fourth earl of Berkeley, and daughter of Henry Bathurst, of Dorchastore, in Dorsetshire; and had issue by her, who died June 30, 1792, Mary-Elizabeth, created, December 27, 1809, baroness Nugent, with remainder to her second son, lord George-Granville Nugent-Temple, born December 30, 1788. The earl dying without issue, in 1779, the title of baron Nugent devolved, according to the terms of the patent, to his son-in-law, George marquis of Buckingham.

John Kearney, D.D. Lord Bishop of Ossory. 2700l.

Lord George John De la Poer Beresford, D.D. brother to Henry marquis of Waterford, Lord Bishop of Raphoe. 3000l.

BARONETS.

The title of Baronet is a degree of honour next below a Baron, having precedence of all Knights, excepting those of the most noble Order of the Garter, and the Knights Banneret created under the royal banner. The dignity of every order of knighthood is merely temporary, and can only be enjoyed by the person on whom it is conferred, during life; whereas the dignity of a Baronet is given by patent, and cloths the six degrees of honour which are hereditary in families, and puts by the established law of titulary descent.—See the article BARONET, vol. ii. p. 756.

Vol. IX. No. 618.

Sir Oliver Lambert having quelled the obstinate rebellion in the province of Ulster in Ireland, king James, in order to keep it in subjection, instituted the hereditary dignity of BARONET, May 16, 1611, upon the conditions noticed generally in p. 442 of this volume; but, particularly, they engaged each to maintain thirty foot-soldiers in Ireland for three years, at a-day, and to pay the first year's wages into the Exchequer, at one payment, upon passing their patents; which, with the fees of honour, amounted to near 3000l. The occasion of their institution accounts for their bearing the arms of the province of Ulster. On a field argent a mural crown, or, gules; thence the badge of baronety.

The Baronets, from their original institution, were carefully selected among the most distinguished families of the gentry, with the indispensable requisite of an honourable descent; the honour of the title being next to peerage, and secured by royal covenant of his majesty, James I, that neither he nor his successors should ever create any hereditary honour between them and the peers of the realm. They have generally become a consequential part in the concerns of their respective counties; and, like the peers, are a part of the aristocracy of the country—but without being marked, by the cautious jealousy of our constitution, an unfit to interfere in parliamentary elections. Enjoying these advantages, we may observe, that new peers have been so generally selected from among the baronets, that the latter have been emphatically termed—the family of nobility.

When a Baronet is advanced to the Peerage, he may, if he choose, and without infringing any particular rules of Heraldry, preserve in his arms the badge of Ulster; but the nobility frequently leave it out of their armorial bearings, considering it as the symbol of a dignity of an inferior luster, accidentally immerged in the higher splendour of the Peerage.

ENGLISH BARONETS.

BACON, of Redgrave in Suffolk; created May 22, 1611.—Sir EDMUND BACON, premier baronet of England, and the fifteenth since the first creation, was born in 1749; succeeded his uncle in 1773; married, Jan. 1778, Anne, daughter of Sir W. B. Proctor, bart. K. B. by whom he has issue, Edmund, born in 1793; married, Aug. 27, 1801, Mary—Anne, daughter of Dalwood Bacon, esq. Anne Frances, born 1781, and married, Dec. 1803, to E. T. Huxley, esq. Maria, married, Feb. 1, 1808, Capt. Hodge, 2d dragoons; Nicholas; and Henry.—This family is descended from Grimbould, who came into England with William the conqueror, and settled in Norfolk. His great-grandson Robert took the name of Bacon, and from him descended the celebrated sir Isaac Bacon, and from a branch of the same family came sir Nicholas Bacon, bart. lord-keeper in the reign of queen Elizabeth; and that prodigy of human talents and acquirements, Francis Bacon, viscount of St. Alban's, lord Verulam. For the biography of these celebrated personages, see vol. ii. p. 605-607.—Motto, Mediocria fina, Mediocrity is fiable.—Family Seat, Raveningham, Norfolk.

HOUGHTON, of Houghton Tower, Lancashire; created May 22, 1611.—Sir HENRY PHILIP HOGHTON, the seventh baronet, was born June 12, 1768; succeeded his father, sir Henry, March 9, 1793; married the widow of Thomas-Townley Parker, esq.—This family, originally of Clifden and Hogsden, have been of importance in the county of Lancaster in former ages.—Motto, Malgré le tort, In spite of wrong.—Family Seats, Houghton Tower, and Walton Hall, both in Lancashire; and Hedingham Castle, in Essex.

PEYTON, of Itcham, Cambridgeshire; created May 22, 1611.—Sir WILLIAM PEYTON, the seventh baronet, succeeded sir John, his half-brother, in 1772; married, March 25, 1773, the relic of Felix Culver, esq.
The Peytons are of the same family as the Uffords, earls of Suffolk, who descended from William Muley, a Norman baron, who was sheriff of Yorkshire, 3 Will. I., and from him received the grants of many lordships and manors; and among others, he possessed those of Sibton and Peyto Hall, in Suffolk, in the time of the latter, which were confirmed in his right in 1677, leaving issue James, his eldest son, who in 1545, married Margaret, daughter of John Clanlen, esq. of Bathe, and Arthur Bennington, a major in the 3rd regiment of dragoons, and was a son and heir of William and John. The poverty of the latter had for many generations considerable possessions in Suffolk and Nottinghamshire.

The first of this family, whom we find by the name of Peyton, is Reginald de Peyton, second son to Walter, lord of Sibton, in Suffolk. This Reginald flourished in the reign of King John, and had two sons, William and John. The family seat of the Peytons was at Rowton Moor, in 1645; but, recovering his liberty, he afterwards took Carlisle by surprise, and was a second time made governor of Carlisle. He had a warrant from the Marquis of Newcastle to raise a new regiment of foot, and to garrison Carlisle; upon the surrender of which he was made colonel of it. He was taken prisoner at Rowton Moor, in 1645; but, recovering his liberty, he afterwards took Carlisle by surprize, and was a second time appointed governor. After the battle of Worcester, Sir Philip attended on Charles II. in France, Holland, and Scotland, from whence he retired to the Isle of Man, which he bravely defended under the counts of Derby, until it was reduced to the last extremity; and then, to the last extremity; he had leave to retire to any part of England. At the restoration of Charles II., he was admitted to the command of Carlisle. He afterwards took Carlisle by surprise, and was a second time appointed governor. After the battle of Worcester, he attended on Charles II. in France, Holland, and Scotland, from whence he retired to the Isle of Man, which he bravely defended under the counts of Derby, until it was reduced to the last extremity; and then, to the last extremity; he had leave to retire to any part of England. At the restoration of Charles II., he was made governor of Carlisle. He had a warrant for creating him baron Muirgrave of Hartley Castle, but never took out the patent. He died Feb. 1677-8, aged seventy years, in great honour and esteem. — Motto, Sans changer, Without changing. — Family Seats, Eden Hall, Cumberland; and Kempston Park, Middlesex.

COPE, of Hanwell, Oxfordshire; created June 29, 1611. — Sir Denzil COPE, the tenth baronet, succeeded his uncle, the rev. Sir Richard, Nov. 25, 1636. — This family descends from John Cope, sq. a very eminent person in the reigns of Richard II. and Henry IV. — Motto, Equo adile anima, Be ready with constancy. — Family Seats, Bramfell, near Hertford Bridge, in Hampshire.

GRESLEY, of Drakelow, Derbyshire; created June 29, 1611. — Sir Roger RESLEY, the eighth baronet, succeeded his father, Sir Richard, April 2, 1656. — The origin of this family, which took its name from Gresley in Derbyshire, is derived from Malahulcius, uncle to the famous Kollo duke of Normandy; from which Malahulcius descended Roger de Toyne, standard-bearer of Normandy, whose younger sons, Robert and Nigel, accompanied William into England; and the former, at the time of the great battle of Shrewsbury, possessed near one hundred and fifty lordships, whereof Stafford being his residence, he thence furnished himself, and was ancestor to the noble race of the Stafford...
of whom Humphrey was created duke of Buckingham by Henry VI., with precedence before all dukes, both in England and France, the blood-royal excepted. Nigel, the younger son, held Drachelow, Thorpe, Kingston, Morton, and other lordships in Derbyshire and Staffordshire, as appears by Doomeyday Book; and is the direct ancestor of this family.—Motto, _Rectio fata quam fortuna._

Herald.—Family Seat, Drakelow, in Derbyshire; and Knipperley, in Staffordshire.

MOLYNEUX, of Teveral, Nottinghamshire; created June 29, 1611.—Sir Francis Molyneux, the seventh baronet, LL.D. gentleman usher of the black rod, a noble Norman, who came into England with the Conqueror. Family Seat, Wellow, in Nottinghamshire.

HARINGTON, of Reddington, Rutlandshire; created June 29, 1611.—Sir John Edward Harrington, the eighth baronet, succeeded his father, Sir James, in 1793; born in 1760; married, in 1787, Marianne, daughter of Thomas Philpot, esq., by which lady he has issue, James, born Sept. 30, 1788; Edward, born Oct. 26, 1793; Richard, April 26, 1800; Robert, Sept. 22, 1801; Maria, April 26, 1803; and is the present baronet, the oldest surviving son of the late Sir James Harrington, from polishing (from the time of Rich. I.) a lordship of that name in the county of Cumberland, and the Saxon kings of England, and also from William the Conqueror, for his services, to have made an expedition to the Holy Land for many generations, from the time of Richard, John, and Henry the Dukes of Normandy, have equal pretensions with that illustrious family. Motto, In a firm knot. Family Seats, Drakelow, Thorpe, Kingefley, Burton on the Water, Gloucestershire; and Maffingham, in Norfolk.

Mordaunt, of Maffingham, Norfolk; created June 29, 1611.—Sir Charles Mordaunt, the eighth baronet, succeeded his father, John, Nov. 18, 1806; married, for the second time, Frances, daughter and female heiress of Frederick, 3rd Viscount De Dinan, in Brittany; by whom he has issue, Robert, born April 26, 1781; Charles, born April 26, 1800; and is the present baronet, the eldest surviving son of the late Sir Charles Mordaunt, from polishing (from the time of Rich. I.) a lordship of that name in the county of Rutland, and the Saxon kings of England, and also from William the Conqueror, for his services, to have made an expedition to the Holy Land for many generations, from the time of Richard, John, and Henry the Dukes of Normandy, have equal pretensions with that illustrious family. Motto, Nada fermo, in a firm knot. Family Seats, Burton on the Water, Gloucestershire; and Maffingham, in Norfolk.

Worsley Holmes, of Pitford and Newport, in the Isle of Wight; created June 29, 1611.—Sir Henry Worsley Holmes, the eighth baronet, in holy orders, LL.D. born Dec. 1735; succeeded his cousin, Sir Richard Worlley, in 1805; married Elizabeth, eldest daughter of Leonard lord Holmes; and has issue by her, now living, Leonard Thomas, born July 1787; Margaret, 1789; Richard Fleming, 1791. Sir Henry, on the death of the said Leonard lord Holmes, 1804, succeeded to his estates, and took the name of Holmes, in purity of the will of his maternal uncle, Thomas lord Holmes.—Sir Elias de Worldeley, or Worldeley, who flourished soon after the conquest, took his name from his lordship so called in Lancahire. He is mentioned, in the chronicles of the holy wars, to have made an expedition to Palefime, where he fought many battles, and died at Rhodes. Sir Richard Worlley, the late baronet, F.R.S., of Appuldorcles, Parke, by the gift of his brother, Sir Elias, has an indelible History of the Isle of Wight, born March 1753; married Seymour, daughter and co-heiress of the late Sir John Fleming, bart. of Brompton Park, in Middlesex; and had issue one son, and one daughter, both deceas'd. Sir Richard dined inter alia, and without issue, his estates devolved on his niece, daughter of the hon. John Simpson, second son of Henry Bridgman, the first lord Bradford; but he was succeeded in his title by his cousin, the rev. Henry Worlley Holmes, of Pitford, who is deceased, in the fourth generation, from Thomas, second surviving son of Richard, the first baronet. Motto, Ydeo, The Isle of Wight. Family Seats, Pitford Houle, and Newport, Isle of Wight.

Twysden, of Radyon Hall, Eaf Peckham, Kent; created June 29, 1611.—Sir William Twysden, the seventh baronet, succeeded his father in 1671; married, 1656, Frances, daughter of Alexander Wynch, esq., late governor of Madras; by whom he has William, Francis, James, Frances, Flora, Mary, Elizabeth, and Isabella Camilla. Sir William Twysden, bart., of Twysden Borough, or Twysden, now usually called Burrs Farm, in the hundred of Wilt Barnefield, in Kent, was the ancient inheritance of this family, from which they took their name. Adam de Twysden poiffessed this estate in the reign of Edward I.—Family Seat, Radyon Hall, Eaf Peckham, Kent.
Hales, of Woodchurch, Kent; created June 29, 1611.—Sir Edward Hales, the sixth baronet, succeeded his father, Sir Edward, in August 1674; married, in 1675, Anna, second daughter of George Waton, esq. of Maffachusetts, in North America, and had issue, one son and two daughters. He was knighted in the presence of St. John of Jerusalem, and admiral of the north parts of England, in the reign of Edward III., and was constable of England, Feb. 1, 1381; but in the same year, in the beginning of the insurrection under Wat Tyler, had his head struck off on Tower Hill. Of this family, before they were advanced to the baronetage, were three dignitaries of the law, viz. Christopher Hales, knt. attorney-general and master of the rolls in the reign of Henry VIII. John Hales, who was a baron of the exchequer; and Sir James, his son, one of the judges of the common pleas, who was the only judge that refused to sign the will of Henry VIII., for disinheriting the princesses Mary and Elizabeth. Edward Hales, the first baronet, served in several parliaments; took part with those that raised the rebellion against Charles I., and died in September 1654. The second Sir Edward, in his younger years, risked his person and fortune in endeavouring the rescue of king Charles I. from his imprisonment in the Isle of Wight. He died in 1663, five years after the Restoration. The third Sir Edward, his son and heir, was in much favour with James II. under whom he had a regiment of foot, was one of his privy council, and a lord of the admiralty. Sir Edward Hales, the first baronet, married Either, daughter of Miles San-...

meet him, and, to cover his own crimes, complained of her looseness with others, who so enraged her husband, that when he approached to receive him with joyful embraces, he mortally stabbed her. The family had large possessions in Warwickshire and other counties for many generations. One of those was Thomas de Burdett, esq., who from the 7th to the 14th of Edward IV., in communion for conferring the peace: but in 1477 he incurred the king's displeasure for his affection to the duke of Clarence. So strict were the eyes and ears of his enemies, that an advantage was soon taken to deprive him of his life; for, hearing that the king had killed a white buck in his park at Ainslie, which he let manage by, he passionately wished the horns in the belly of him who moved the king so to do; for which words he was arraigned and convicted of high treason, upon inference of a mischievous meaning to the king himself, and was beheaded in 1477. Thomas, the eighteenth in descent from de Burdett, was first advanced to the dignity of a baronet. He married Jane, daughter and heir of William Frauncys, of Foremark, esquire; which feat has, since that time, been the chief residence of the family. He was esteemed a charitable good man, and afforded to the famous archbishop Sheldon an agreeable sanctuary at Bramcote, during the exile of Charles II. Sledley Burdett, brother to the present baronet, was unfortunately drowned in the Rhine, with George-Samuel, the last vificount Montague. They were anxious to pass the famous water-falls of Schaffhaufen, which had been unfortunately seized by the collar, attempt, had ordered guards to be placed for the purpose of preventing the execution of it. Such however was the force of their curiosity, that they found means to elude every precaution. Having provided themselves with a small flat-bottomed punt, as they were about to step into it, lord Montague's servant stumped short, and as it were insensibly feized his master by the collar, declaring that for the moment he should forget the respect of the servant in the duty of the man. His lordship however extricated himself at the expense of part of his collar and neckcloth, and pulled off immediately, with his companion. They got over the first fall in safety, and began to shout, and wave their handkerchiefs, in token of good success. They then pulled down the second fall, by far more dangerous than the first; from which time they were never heard of. It is supposed that the boat, hurried by the violence of the cataract, jumped over two rocks. —Family Seat, Foremark, in Derbyshire; and Rambury, Wilts.

Mackworth, of Normanton, Rutlandshire; created June 4, 1619. —Sir Henry Mackworth, the seventh baronet, succeeded his father, sir Henry, Oct. 23, 1773. —Mackworth, in Derbyshire, gave name to this ancient family, seated there for many generations; one of whom was of the retinue to the famous James lord Audley, who was very instrumental in obtaining the glorious victory at Poictiers, under the Black Prince. —Family Seat, Garnet, Norfolk.

Hicks, of Beverston, Gloucestershire; created July 21, 1619. —Sir William Hicks, the seventh baronet, succeeded his father, sir Howe Hicks, Aug. 1601; married, in Auguf 1753, the daughter of the late Thomas Lobb Chute, of the vine, in Hampshire; and has left a large fortune to the family. The name of Hicks has been a constant dweller in Gloucestershire. John Hicks, of Tew, in Gloucestershire, died 2 Henry VII. Robert Hicks, son and heir of the said John, was a Citizen of London, and raised a very great estate. He had issue two sons, Michael and Baptiff. Baptiff, the youngs, died a merchant in two lifetimes, acquired a large fortune, and came afterwards to great honours: he was knighted by James I. and was created a peer, 4 Charles I. by the title of baron Hicks, and viscount Campden, which honours were afterwards enjoyed by the earls of Gainborough, until 1799, when the title became extinct. —Family Seat, Witcombe Park, near Gloucester.

Mill, of Camoys Court, Sussex; created Dec. 31, 1619. —Sir Charles Mill, the tenth baronet, succeeded the rev. sir Charles, July 19, 1792; and married, Oct. 1800, Selina, daughter of John Morfehead, of Trenant Park, in Cornwall, baronet. —The family of Mill is of considerable antiquity, and has flourished for many generations in Sussex. John Atte Mille, was lord of Gretham, in Sussex, 50 Edw. III. —Motto, Aedes Diei, Help, O God. —Family Seats, Motton-houfe, and Newton Berry, both in Hampshire.

Foulis, of Ingleby, Yorkshire; created Feb. 6, 1619. —Sir William Foulis, the eighth baronet, succeeded his father, sir William, in 1621. —This surname is of French extraction, and is derived from the word foulis, which signifies leys, to which their arms allude, being three bay-leaves, &c. —Taylor, in his History of Gavelkind, states, that one of this name was a considerable man in Kent before the Norman invasion, and that, being treated with great severity by William I., he fled into Scotland. The family appears to have been numerous, and considerable proprietors of land there in very early times; for there are several baronies and fine feats in the counties of Perth, Angus, Rofs, &c. which bear the name of Foulis, and probably have been the property of people of this name. Reginaldus de Foulis is witness in the first charter to the lord high steward of Scotland, in the reign of Alexander II. but the immediate ancestor of the family was William de Foulis, who lived in the reigns of Robert I. and III. David, third son of James Foulis, being in great favour with James VI. accompanied him into England, and was knighted, May 15, 1603, and had afterwards the dignity of baronet conferred upon him; he was cofferer to prince Henry, eldest son of king James, and after his death he bore the same office under prince Charles; afterwards Charles I. He was made one of his majesty's council for the northern parts, and eufus rotulorum and deputy lieutenant for the north riding of Yorks; but as he appeared with some zeal, in 1632, against the commision which was illused to compel gentlemen to compound for not having taken the honour of knighthood, to which they were obliged by an obsolete law he and his eldest son, Henry, were cenfured for it in the court of Star-chamber, in 1633; sir David was declared incapable of all the offices and places which he held, was committed prisoner to the Fleet during his majesty's pleasure, fined 3000l. to the king, and 3000l. to lord Wentworth; for the payment of which fines, he was forced to sell part of his estate. His son and heir, Henry, was also committed prisoner to the Fleet during his majesty's pleasure, and fined 300l. —Family Seat, Ingleby Manor, near Stokelsey, in Cleveland, in the north riding of Yorkshire.

Berney, of Parkhall, in Reedham, Norfolk; created May 5, 1620. —Sir John Berney, the seventh baronet, succeeded his father, John Berney, Nov. 1st, 1678; married, Sept. 9, 1779, Henrietta, daughter of George earl of Abergavenny; by whom he has issue, Hanford, born Dec. 1730, a captain in the West Norfolk militia; John, born 1752, a lieutenant in the royal navy; Henry, born 1755; George; Elizabeth; Mary-Anne. —This family took their name from the town of Berney, near Walfingham in Norfolk, where they were seated at the time of the conquest. —Motto, Nil temere ntque timore. Neither rash nor fearful. —Family Seat, Kirby Bedon, in Norfolk.

Pakington, of Welfwood Park, Worchestershire; created June 22, 1620. —Sir John Pakington, the eighth baronet, L.L.D., succeeded for Herbert-Perrott, 80
his father, 1595.—The antiquity of this family is mani-
fest from their foundation of the monastery of Kenet-
worth in the reign of Henry I. Robert Pakington
lived in the reign of Henry IV. John, son of Sir John
Pakington, K. B. a great favourite of queen Elizabeth,
was alderman for Aylebury. He was a member for Aylebury,
and died Oct. 29, 1624, in the twenty-fourth year of his
age. Sir John, his only son, was elected one of the
knights for Worcestershire, in 15 Charles I. and, when
the rebellion broke out, was a member for Aylebury.
He was entrusted by the king, in 1642, with a commis-
sion for arraying men for his service in Worceftershire;
on account of which he was taken prisoner, committed
to the Tower, and fined 2000l. had his estate seque-
tered, his house, in Buckinghamshire, (one of the best
in that county,) levelled with the ground, and such
great waftes committed in his woods, that an estimate of
his losfs, now remaining in the hand-writing of his lady,
amounts to 32,761. Notwithstanding he had suffered
so much for his loyalty, he had the courage to go with
a troop of horse to Charles II. at the battle of Worce-
fter, and was taken prisoner there; but when the rebels
tried him for his life, (upon an indictment of his raising
and leading a troop at the battle of Worcefter,) they
complained they could not swear against him; he was
therefore acquitted, and set at liberty, but was after-
wards fined 760l. His lady was one of the daughters
of Thomas lord Coventry, keeper of the great fefal of
England, a most accompliflied perfon, and bright ex-
wards fined 760l. His lady was one of the daughters
of Thomas lord Coventry, keeper of the great fefal of
England, a most accompliflied perfon, and brilliant ex-
ample for wifdom and piety; (lie was the reputed au-
thor of the Whole Duty of Man. She was buried, May
13, 1679, and for John, Jan. 5, following. Sir John, the
fourth baronet, in 1702, made a complaint to the house
of commons, againft William bishop of Worcefter, and
Mr. Lloyd his fon, for interfering in the election for the
county of Worcefter, in confequence of which, they
were cenfured by the house, and his bishop was removed
from his place of lord almoner to the queen. Sir John
was constantly elected one of the knights for Worcefter-
shire, in every parliament from his firft being chosen, at
nineteen years of age; (except once, when he voluntarily
declined it,) to his death, notwithstanding the powerful
opposition which was generally made againft him; and
was recorder of the city of Worcefter.—Family Seat,
Wefwood Park, in Worceftershire.

BISHOPP, of Parham Park, Suffex; created July
24, 1620.—Sir Cecil Bifshopp, the firteenth baronet,
Dec. 29, 1744, succeeded his father, Sir
Cecil, Sept. 1779; married, in July 1782, Harriet-Anne,
daughter of William Southwell, efq., of Frampton,
Gloucefhire, uncle of Edward lord de Clifford, and
has two fons and two daughters: Cecil, a lieutenant in
the firft regiment of guards, married, April 6; 1805,
and the church.—Family Seat, Parham Park, in Suflex.

BISHOP, of Parham Park, Suffex; created July
Fredrick Raff, of Parham Park, Suffex; created July
24, 1620.—Sir Cecil Bifshopp, the firteenth baronet,
Dec. 29, 1744, succeeded his father, Sir
Cecil, Sept. 1779; married, in July 1782, Harriet-Anne,
daughter of William Southwell, efq., of Frampton,
Gloucefhire, uncle of Edward lord de Clifford, and
has two fons and two daughters: Cecil, a lieutenant in
the firft regiment of guards, married, April 6; 1805,
and the church.—Family Seat, Parham Park, in Suflex.

BISHOP, parvum a dominio, Saxone, qui in
his father, 1595.—The antiquity of this family is mani-
manifest from their foundation of the monastery of Kenet-
worth in the reign of Henry I. Robert Pakington
lived in the reign of Henry IV. John, son of Sir John
Pakington, K. B. a great favourite of queen Elizabeth,
was alderman for Aylebury. He was a member for Aylebury,
and died Oct. 29, 1624, in the twenty-fourth year of his
age. Sir John, his only son, was elected one of the
knights for Worcestershire, in 15 Charles I. and, when
the rebellion broke out, was a member for Aylebury.
He was entrusted by the king, in 1642, with a commis-
sion for arraying men for his service in Worceftershire;
on account of which he was taken prisoner, committed
to the Tower, and fined 2000l. had his estate seque-
tered, his house, in Buckinghamshire, (one of the best
in that county,) levelled with the ground, and such
great waftes committed in his woods, that an estimate of
his losss, now remaining in the hand-writing of his lady,
amounts to 32,761. Notwithstanding he had suffered
so much for his loyalty, he had the courage to go with
a troop of horse to Charles II. at the battle of Worce-
fter, and was taken prisoner there; but when the rebels
tried him for his life, (upon an indictment of his raising
and leading a troop at the battle of Worcefter,) they
complained they could not swear against him; he was
therefore acquitted, and set at liberty, but was after-
wards fined 760l. His lady was one of the daughters
of Thomas lord Coventry, keeper of the great fefal of
England, a most accompliflied perfon, and brilliant ex-
ample for wifdom and piety; (lie was the reputed au-
thor of the Whole Duty of Man. She was buried, May
13, 1679, and for John, Jan. 5, following. Sir John, the
fourth baronet, in 1702, made a complaint to the house
of commons, againft William bishop of Worcefter, and
Mr. Lloyd his fon, for interfering in the election for the
county of Worcefter, in confequence of which, they
were cenfured by the house, and his bishop was removed
from his place of lord almoner to the queen. Sir John
was constantly elected one of the knights for Worcefter-
shire, in every parliament from his firft being chosen, at
nineteen years of age; (except once, when he voluntarily
declined it,) to his death, notwithstanding the powerful
opposition which was generally made againft him; and
was recorder of the city of Worcefter.—Family Seat,
Wefwood Park, in Worceftershire.
ward, March 27, 1824; James, February 28, 1784; John-Michael, Feb. 22, 1788; George, April 15, 1789; Mary-Barbara, August 24, 1790, who died in June 1792; Roger-Robert, Feb. 15, 1793; Elizabeth-Charlotte, June 14, 1798; and Lucy-Mary, March 22, 1800.

This family is of Saxon origin. Sir Robert de Tichborne, a valiant and daring knight, lord of Tichborne, in Hampshire, in the reign of Henry II, and by marriage with Mabel, sole heir of the family of Lymerfon, in the Isle of Wight, had also possession of that estate; and in the succeeding generations this family continued to be of great note and consequence in the county of Hants, which they frequented residence. Benjamin Tichborne created a baronet, and received other honours and emoluments from king James I. to whom he had rendered himself particularly acceptable, by his forwardness in proclaiming his accession to the crown of England, throughout his country, without waiting for any orders from government. Henry, his grandson, distinguished himself in Ireland during the great rebellion in that country, in which this branch of the family settled; and Henry, great grandson of the above-named Sir Benjamin (after having been created a baronet), was advanced to the peerage of Ireland, by the title of lord Tichborne. But this peerage became extinct with him, his only son (except two who died young) having been, in his father's lifetime, cast away and lost, in his pottage from Ireland to England. — Motto, Pagna pro patria, Fight for your country. — Family Seat, at Tichborne-Houte, in Hampshire.

PALMER, of Wingham, Kent; created June 29, 1624. — Sir CHARLES-HARCOURT PALMER, the fifth baronet; succeeded his grandfather, Sir Charles, Nov. 5, 1773. — The Palmers of Wingham are descended from a very ancient family, at Angmerin, in the county of Sussex. The surname of Palmer owes its rise to that zeal which for some ages drew many persons of distinction to embark in the crusades for carrying on the Holy War. The soldiers who returned home frequently brought a branch of palm, of the growth of Palestine, and wore it as a figured badge and token that they had performed their vows of fighting against the infidels; and from this they were called 'Palmers,' as Sir Henry Spelman tells us. In the number of these warriors were some of the ancestors of this ancient family. The fifth baronet, Sir Thomas Palmer, of Wingham, (who was a knight of the order of Calais, in the reign of Philip and Mary,) was knighted for his valour at the taking of Cadiz, and afterwards advanced to the dignity of a baronet. — Motto, Palma virtutis. The palm of virtue. — Family Seat, Dorney Court, near Windsor, Bucks.

RIVERS, of Chafford, Kent; created October 5, 1771. — Sir HENRY RIVERS, the ninth baronet; succeeded his father, Sir James, Sept. 27, 1805. — Of this name of Rivers, anciently written Ripariis and Rivers, there have been many eminent persons, in former ages. Richard de Ripariis, by his wife Maud, daughter of Richard Lucy, had a son, Richard, a noble baron, in the reign of king John, (and, by descent from his mother, lord of Angue, in Essex,) whose grandson and heir, John de Rivers, was summoned among the barons from 25 Edw. I. 1258, to 9 Edw. II. Nicholas de la Rivers was summoned in 22 Edw. I. 1259, to appear with horse and arms. From this Nicholas it is probable this family is descended. — Motto, Secus rivos aquarum, By rivers of water. — Residence, at Norwich.

HEWET, of Headley Hall, Yorkshire; created Oct. 13, 1773. — Sir Thomas HEWET, the eighth baronet; succeeded his brother, Sir Bing; and married Mary, daughter of Jernegan. — Family Seat, at Tichborne-Houte, in Hampshire. — The family of Hewet is of ancient extraction. Robert Hewet, esq. possessed a considerable estate at Killamarch, in Derbyshire, in the reign of Henry VIII. He left two sons, Robert, who died without issue, and William, who succeeded his father, and died in 1599, aged 47. He left four sons, John, Solomon, Thomas, and William. From the three last are descended the families of Hewet, of Pibury in Oxfordshire (of which was Sir Thomas Hewet, created a baronet, July 19, 1660, without issue); the Hewets, of Shire Olds, in Nottinghamshire, both now extinct; and the Hewets, of Stretton, in Leicestershire. — Motto, Ne te quaeguis extra, Seek not beyond. — Family Seat, Saville Place, in Essex.

JERNINGHAM, or JERNEGAN, of Coffsley, alias Coffey, alias Coffsley, in Hampshire; created Oct. 16, 1621. — Sir WILIAM JERNINGHAM, the fifth baronet; succeeded his father, Sir George, Jan. 24, 1774; married, in June 1767, Frances, eldest daughter of Henry visecount Dillion of Ireland, by Charlotte Lee, eldest daughter and heir of George, second and last earl of Lichfield, by whom he had three sons and two daughters, viz. George-Wil- liam, who married, Dec. 26, 1799, Frances, youngest daughter and co-heir of Edward Sulward, of Haughtby, in Suffolk, esquire; William-Charles, an officer in the English army, but lately in the Austrian service, in which he greatly signalized himself during the late wars; married, Oct. 19, 1803, Miss Wright, daughter of Thomas Wright, esq. of Fitzwaters, Essex; Edward, of Linslade, and Miss Inn, married, Oct. 15, 1802, Miss Wright, daughter of the late Nathaniel Middleton, of Town Hill, Hants, esquire; Mary, who died an infant; and Charlotte-Georgiana, married to Sir Richard Beding- field, bart. by whom she has issue. — This family is said to be of Danish extraction. The first met upon record is Jernegan, who is mentioned as a witness to a deed without date, by which Bryan, son of Scotland, confirmed the church of Melfonbi to the monks of Caftle Acre, and died about the year 1183. He married Sybilla, who in 1183, paid 100l. of her gift into the Exchequer. His son was called Hugh, or Hubert, Jernegan: he gave a large sum of money to king Henry II, and paid it into the Exchequer anno 1183. — Motto, Virtus basta vita, Virtue is the support of life. — Family Seats, Coffsley, or Coffsleey Hall, Norfolk; and Shifnal Manor, Shropshire.

STEPNEY, of Prendergast, Pembroke-shire; created November 24, 1621. — Sir JOHN STEPNEY, the seventh baronet; succeeded his father, Sir Thomas, Oct. 7, 1773; has been minister at the courts of Dresden and Berlin, successively. — They are the heirs of the family of Jernegan, who is mentioned as a witness to a deed without date, by which Bryan, son of Scotland, confirmed the church of Melfonbi to the monks of Castle Acre, and died about the year 1183. He married Sybilla, who in 1183, paid 100l. of her gift into the Exchequer. His son was called Hugh, or Hubert, Jernegan; he gave a large sum of money to king Henry II, and paid it into the Exchequer anno 1183. — Motto, Fide et vigilantia, By faith and vigilance. — Family Seats, Prendergast, near Haverfordwell, Pembroke-shire.

WAKE, of Clevedon, Somersetshire; created Dec. 5, 1621. — Sir WILLIAM WAKE, the ninth baronet, was born April 5, 1669; succeeded his father, Sir William, in 1685; married, in 1703, Anne, daughter of Jernegan, of Remshaw, in Derbyshire, esquire, who died Nov. 22, 1731, leaving a son and heir. Sir William married, secondly, April 22, 1733, a daughter of the late admiral Gambier. — The Wakes are mentioned by Stukeley as deducing their genealogy from Ostac, who was late admiral Gambier. — Sir William Stepney, esq. of Fitzwaters, Essex; Edward, of Linlade, and Miss Inn, married, Oct. 15, 1802, Miss Wright, daughter of the late Nathaniel Middleton, of Town Hill, Hants, esquire; Mary, who died an infant; and Charlotte-Georgiana, married to Sir Richard Bedingfield, bart. by whom she has issue. — This family is said to be of Danish extraction. The first met upon record is Jernegan, who is mentioned as a witness to a deed without date, by which Bryan, son of Scotland, confirmed the church of Melfonbi to the monks of Caftle Acre, and died about the year 1183. He married Sybilla, who in 1183, paid 100l. of her gift into the Exchequer. His son was called Hugh, or Hubert, Jernegan; he gave a large sum of money to king Henry II, and paid it into the Exchequer anno 1183. — Motto, Virtus basta vita, Virtue is the support of life. — Family Seats, Coffsley, or Coffsleey Hall, Norfolk; and Shifnal Manor, Shropshire.

HOTHAM,
HOTHAM, of Scarborough, Yorkshire; created Jan. 4, 1621.—Sir Charles Hotham, the tenth baronet; succeeded his father, Sir John, the right rev., the lord bishop of Clogher, in 1796. —This family is descended from John de Trehoufe, lord of Kilkeney, in Ireland, who for his good services at the battle of Haedings, had a manor of the castle and feftor of Colley Wobc, in Northamptonshire, and Hotham, in Yorkshire. The fourth, in a direct defcent from this Sir John de Trehoufe, was Peter de Trehoufe, who, from his residence at Hotham, affirmed that surname, which his defcendants ever after retained: he was living in 1188. The twentieth in lineal defcent, who were nearly all knighted, was Sir John Hotham, the first baronet, who was governor of Hull in 1643. He and his fon were discovered unfortunate gentlemen, and suffered death on Tower Hill.—Fall Riding of Yorkshire; and Chichester in Kent.

MANSEL, of Muddlecombe, Carmarthenshire; created July 14, 1621.—Sir William Mansel, the eighth baronet, born April 29, 1795, succeeded his father, Sir William, Jan. 3, 1812. —This family is descended from Philip Manfel, who came into England with William the Conqueror. —Motto, Quest exitu, valde exitu; What he will, that will be, the future. —Family Seats, Scarbrough and South Dalton, in the East Riding of Yorkshire; and Chichester in Kent.

PRIDEAUX, of Netherton, Devonshire; created July 17, 1622.—Sir John Wilmot Prideaux, the seventh baronet, succeeded his grandfather, Sir John, in Aug. 1766. —The name of Prideaux is of undoubted antiquity in Cornwall and Devonshire; their first residence was in the county of Cork, in Ireland.

HESILRIGGE, of Nofely, Leicestershire; created July 21, 1622.—Sir Thomas Maynard Hesilrige, the tenth baronet; succeeded his nephew, Sir Arthur, in 1803; married Mary, daughter of Edmund Tyrell, esq. of Gipping Hall, in Suffolk. —This family is descended from Roger de Hesilrige, who was knighted in the reign of William the Conqueror, from a place of that name in Normandy; he settled in Cumberland, and the place took his name. —Motto, Pro aris et focis, For our altars and hearths; or, For God and our country. —Family Seat, Farway, in Devonshire.

BURTON, of Stockerfon, Leicestershire; created July 22, 1622.—Sir Charles Burton, the fourth baronet, succeeded his father, Sir Thomas, in 1735. —The first that is mentioned of this ancient family, which had formerly large possessions, and were of great esteem and reputation in the counties of Rutland and Leicestershire, is Henry, fon of Richard de Burton, whose fon, Nicholas de Burton, was knighted of the shire for Rutland in 1316. Thomas Burton, the second baronet, eminently distinguished himself in behalf of Charles I. and suffered imprisonment and imprisonment for the royal cause. —Family Seat, Hoxen Hall, Suffolk.

DRAKE, of Buckland, Devonshire; created Aug. 9, 1622.—Sir Francis-Henry Drake, the fifth baronet, succeeded his uncle, Sir Francis Henry, Feb. 22, 1794; married, in 1745, Anne Frances, daughter of Thomas Molyneux, esq. —The first perfon of note in this family is Sir Francis Drake, one of our most distinguished naval heroes, in the reign of Elizabeth. —See the article Drake, vol. vi. p. 63. —Motto, O veneris, divino, By divine assistance, and under it, Si portus magna, Th tus great things from small. —Family Seat, Buckland-Monochorum, near Tavillock, Devon.

SKIPWITH, of Prestwood, Leicestershire; created Dec. 20, 1623.—Sir Grey Skipwith, the eighth baronet, succeeded Sir Peyto, Oct. 9, 1805. —This family, descended from the lords and barons of Skipwith, in the east riding of Yorkshire, is descended from Robert de Efcotville, baron of Cottingham, in the reign of William the Conqueror. Robert, his fon, became possessed of a great inheritance, by marriage with Ecuenburga, daughter and heir of Hugh, son of Baldrick, a great Saxon thaner; and among other lands he obtained the manor of Skipwith, or Skipwic (as anciently written). He had three sons; from Robert, the eldest, descended the barons of Cottingham, whose male line terminated Sir Henry III. Patrick, the youngest son, being possessed of the lordship of Skipwith, by gift of his father, his descendants assumed their name from that town, according to the custom of the age. —Sir Grey Skipwith, the twentieth in descendent from Robert de Efcotville, was the first baronet. The third baronet, Sir Grey, after the death of Charles I., went, with several other gentlemen, to Virginia, to avoid the usurper Cromwell; and there the descendent, till the present, have resided. —Family Seat, at Barton, in Warwickshire.

HARPUR, of Calke, Derbyshire; created Sept. 8, 1626.—Sir Henry Harpur, the seventh baronet, was born May 13, 1753; succeeded his father, Sir Henry, Dec. 20, 1803; married, in 1791, Miss Harpy, by whom he had issue, Henry, born Sept. 33, 1793, died an infant; Louisa-Matilda, born Nov. 12, 1793; George, Feb. 2, 1795; Selina, Jan. 8, 1798; Henrietta-Charlotte, March 19, 1800; Henry-Robert, Sept. 4, 1801; Edmund-Louis, Aug. 1, 1803; Charles-Hugh, born April 4, 1805. —This family was originally seated at Cheston, in Warwickshire, of which place was Gilbert le Harpur, far of Roger, grandson of Hugh, who lived in the reign of Henry I. —Family Seat, Calke, in Derbyshire.

SEBRIGHT, of Besford, Worcestershire; created Dec. 20, 1626.—Sir John Saunders Sebright, the seventh baronet, succeeded his father, Sir John, in March, 1794, and is M.P. in the present parliament for the county of Herts; he married, in Aug. 1793, Hannah, daughter of Richard Crofts, of Harling, in Norfolk, esquire, by whom he had three daughters; Frederica-Ansude Saunders; Emily; Caroline. —The Sebrights were originally of Sebright Hall, in Much Hadlow, in Sussex, where they were seated in the time of Hen. II. and until the reign of Hen. VIII. Sir Edward Sebright, the first baronet, was a warm royalist, and was obliged to pay 1109l. composition for his estate to the lord sequestrators. —Family Seat, Besford Court, in Worcestershire; and Beechwood, in Hertfordshire.

DERING, of Surenden-Dering, Kent; created Feb. 1, 1626.—Sir Edward Dering, the seventh baronet, born in 1757; succeeded his father, Sir Edward, in 1798; married, in April 1782, Anne, daughter of William Hale, of King's Walden in Hertfordshire, esquire, by whom he had, Edward, born April 1783; Chomley, born May 1, 1785, a captain in the West Kent militia; Charlotte, born May 1787; and married, Feb. 20, 1808, Thomas Hearne, son of Sir John, C. L. s. T. There is a tradition by which this family is traced to a very ancient Saxon origin; but Hailed, in his History of Kent, says, the only account he has been able to gather from the family papers is, that the family of Dering is descended from Norman de Morinis, whose ancestor Vitalis Fitz-Olbert, lived in the reign of Hen. II. and which Norman had a son named Deringus de Morinis. —Edward, the fifteenth in descendent from Deringus, was knighted Jan. 22, 1618; made lieutenant of Dover Castle, and created a baronet on Feb. 1, 1626, and was afterwards one of the knights in parliament for Kent. He was a man of parts and learning, his vanity to shew which, induced him to present to the house of commons a bill for extirpating
extirpating bishops, dean, and chapters, which he did with two verses of Ovid, the application of which was said to be his greatest motive:

Cuneta prius tentanda, sed immemorabile vulnus
Enfe recidendum est, ne pars fincera trah'afa'ri;
Cuneta prius tentanda, sed immemorabile vulnus
Enfe recidendum est, ne pars fincera trah'afa'ri.

His repentance and apology for his conduct offended the republicans so much, that he was declared a delinquent by the commonwealth; but, escaping to the king, he had the command of a regiment of horse, which poor illused made him relinquish; and, retiring with his wife and children to one of his farm-houses, he there died on June 22, 1644. During his continuance with the king, his whole estate was confiscated, his newly-finished house was four several times plundered by the parliament's soldiers, his goods and stock were all seized and taken away, his farm-houses and fences ruined and destroyed, his woods and timbers felled; so that few suffered more than he did for his inconsistent conduct.—Motto, Terrae

Vere, were young ladies learned beyond their sex and fame; two of his daughters, Mary and Sophia, married Sept. 19, 1704, the daughter of Richard Buller, of Leominster, in the county of Northampton; Vere, born September 13, 1777, in holy orders, Sir Edmund, Dec. 15, 1774; married, in 1766, Susanna, daughter of —— Barrett, esq. by whom he has four sons; Justinian, born April 24, 1773, lieutenant-colonel of the Northampton militia; Vere, born September 13, 1774, who married Miss Chambers, niece to sir William Chambers, esq. of Edinburgh; Edmund, born Dec. 15, 1775, in the royal navy; and Henry, born Feb. 14, 1777, in holy orders, married Sept. 19, 1804, the daughter of Richard Buller, of Devonshire Place, esq. Alto seven daughters: Susanna, married in 1809, George Britzke, esq. of the secretory of state's office; Harriot, Sophia, married to Tho. London, of Langley, knight, who was one of the esquires of the body to Henry VIII.—Family Seat, Waterton Place, near Maidstone, in Kent.

ISHAM, of Lamport, Northamptonshire; created May 30, 1637.—Sir Justinian Isham, the seventh baronet, born July 18, 1743; succeeded his uncle, sir Edmund, Dec. 15, 1772; married, in 1766, Susanna, daughter of —— Barrett, esq. by whom he has four sons; Justinian, born April 24, 1773, lieutenant-colonel of the Northampton militia; Vere, born September 13, 1774, who married Miss Chambers, niece to sir William Chambers, esq. of Edinburgh; Edmund, born Dec. 15, 1775, in the royal navy; and Henry, born Feb. 14, 1777, in holy orders, married Sept. 19, 1804, the daughter of Richard Buller, of Devonshire Place, esq. Alto seven daughters: Susanna, married in 1809, George Britzke, esq. of the secretory of state's office; Harriot, Sophia, married to Tho. London, of Langley, knight, who was one of the esquires of the body to Henry VIII.—Family Seat, Waterton Place, near Maidstone, in Kent.

GORING, of Highden, Suffolk, as BOWYER, of Leicestershire, as BOWYER, of Leicestershire; created May 13, 1370.—Sir Thomas Bowyer, the fourth baronet; succeeded his father, sir Edward, Jan. 2, 1741-2; married Frances, daughter of Christopher Horton, of Catto, in Derbyshire, esquire, who died without issue, Aug. 20, 1751. Sir Edward raised a company in lord Gower's regiment, in the rebellion of 1745. He has represented the county of Stafford in the preceeding and four preceding parliaments. The family of Littellton was settled at Frankley, in Worcestershire. One of the ancestors of this baronet (who were of figure in the county of Stafford for some centuries) was Sir Thomas Littellton, a learned judge of the court of common pleas in the time of Edward IV. and author of the celebrated Treatise upon Tenures, which, with an elaborate commentary of sir Edward Coke, is the book so well known under the name of Coke upon Littellton. Edward Littellton, esq. advanced to the dignity of a baronet. He was raised by the sequestrators at 3357. Esq. for composition for his estate, on account of his loyalty. Sir Edward, the second baronet, had two sons, who at different times lost their lives in fighting duels.—Motto, Ung Diss & ung rov, One God and one king.—Family seat, Teddelsey Hay, in Staffordshire.

STONHOUSE, of Radley, Berkshire; created May 7, 1628.—Sir Thomas Stonhouse, the thirteenth baronet, succeeded his father, the Rev. Dr. Sir James, in 1795.—Whether this family took their surname from Stonhouse, in Gloucestershire, is a point not yet determined; but they were formerly called Stonhouse before Henry Stonhouse was returned for Guildford, in the reign of Edward II. to the parliament held at Rippon, in Yorkshire. Sir George, the third baronet, was fined for his loyalty to Charles I. and paid 1460l. composition for his estate to the sequestrators. He had three sons, George, John, and James; and one daughter, Elizabeth. This family have been very well known and have figured in the history of this country, according to the first patent. Sir George, the eldest son, married a lady of the family of Barlow, in the county of Northampton, and having been their corner. The county of Northampton he continued to represent to the day of his death, which was May 13, 1730, aged 72.—Motto, Over the crest, Ofendo, non offendo; I bow, not boast. To the arms, On things transitory, refteth no glory.—Family Seat, Lamport, in Northamptonshire.
upon the title was extinguished, and put an end to an unfortunate branch of a good family. Sir John, the second son of George, the third baronet, the eldest above-named being disinherited, succeeded him in the estate and title granted by the latter patent. This branch of the family became extinct in 1792, by the death of the Rev. Sir James, the eleventh baronet. The title ceased to bear date 1670, instead of 1628.—Family Seat, Cleave, in Wilthire.

WREY, of Trebitch, Cornwall; created July 30, 1628.—Sir Bourchier WREY, the sixth baronet, succeeded his father, Sir Bourchier, April 23, 1784; married, first, in 1786, Anne, daughter of Sir Robert Palk, of Haldon House, in Devonshire, baronet, by whom he has issue, Anna Eleanor; Bourchier; Robert-Bourchier. He married, secondly, in 1793, Anne, daughter of John Osborne, esq. by whom he has one daughter, Eleanor-Elizabeth, and one son, Henry-Bourchier. This family is suppos'd, to be descended from Bourchier, who lived in the time of St. Stephen; others believe they took their name from their habitation in Devonshire. Sir Chichester, the second baronet, born in 1628, faithfully adhered to Charles I. and took up arms in his cause. About 1626, he married Anna, relict of James Earl of Middlesex, and third daughter and co-heir of Edward Bourchier, Earl of Oxford, by whom he became entitled to a joint claim on the barony of Fitzwarine, and also possessed of a great estate in the county of Devon, and the noble seat of Tawstock, where the family now occasionally resides. After the restoration, he was made colonel of the duke of York's regiment, and governor of Sherrif's; served in parliament for Letchworth, in Cornwall; and died in May 1668. Sir Bourchier, his eldest son, succeeded; he had been created a knight of the bath at the coronation of Charles II. and soon after was a captain in the regiment of which his father was colonel. He served under the duke of Monmouth, at the siege of Maestricht, and died July 28, 1696.—Motto, Le bon temps viendra. The appointed time will come.—Family Seat, Trebitch, Cornwall; and Tawstock Houfe, in Devonshire.

TRELAWNY, of Trelawny, Cornwall; created July 1, 1668.—The Rev. Sir Harry TRELAWNY, the seventh baronet, M.A. succeeded his father, Sir William, in December 1772; married, in 1778, Anne, daughter of the Rev. James Brown, rector of Portishead, and vicar of Kingstow, Somerset; and has issue, Anna-Lettitia; John; William-Louis, a captain in the royal navies, who has taken the name of Salisbury, in compliance with the will of Owen Salisbury Brearley, esq. He married, in August, 1807, Patience, daughter of John Philip Carpenter, esq. of Mount Tavy, Devonshire; Hanclina, a captain in the royal artillery, married Martha, daughter of Joseph Rogers, esq. Mary, married her brother, and is buried, with all her issue, in the church of Trelawny, Trelan, Tronle, Trione, or as in Domeday Book, Trelone, a lordship of the parish of Alterman in the same county, John Trelawny, esq. born April 27, 1692, was the first baronet. Sir Jonathan, the third baronet, was bred to the church, and consecrated, in 1685, bishop of Bruton. He was one of the seven bishops committed to the Tower by James II. After the revolution, he was transferred to the see of Exeter, and from thence, in 1707, to that of Winchester; he died July 19, 1721. Sir Harry, the fifth baronet, nephew to the bishop, was aid-de-camp to the duke of Marlborough, and was in parliament two or three sessions, but at last lived very privately. He was a man of great learning, and dying in an advanced age, in 1792, was succeeded in the baronetcy by his nephew, who was a captain in the royal navy, and governor of Jamaica; where, after a long and tedious illness, he died, December 11, 1772. On this melancholy event, the next day being Saturday, the 12th, the honourable the house of assembly of Jamaica came to the following resolution.—Resolved: That, in order to testify the grateful respect which this house entertained of his late excellency's merit, the senfe they have of the great and universal satisfaction which his mild and equitable administration gave to all ranks of people, and great regret which they feel at his loss, it be made the request of this house to lady Trelawny, that her ladyship conveys that his Excellency's funeral be at the public expense.* In consequence of this vote, a joint committee of the honourable council and assembly was appointed to arrange the funeral; which, notwithstanding the shortness of time, was conducted with equal propriety and magnificence. Accordingly, on Sunday evening, the 13th instant, the body was enclosed in a coffin of lead, placed in an outer shell, covered with silk, and richly furnished, lay in state in the council-chamber, which was hung with black, and illuminated with large tapers of wax; and, to their great honour, the members of the legislature, the officers of the navy, army, and militia, the magistrates, and all ranks of people, seemed to vie with each other in showing the most grateful testimony of respect and regard to the governor's memory. Sir William had married his first wife, Letitia, daughter of the late baronet, and left two children, Harry, his successor, and Letitia-Anne, married to Paul Treby Treby, esq. of Plympton, Devonshire. —Motto, Sermoni confona facilt. Deeds answering to words. Virtus patrimonii nobilior, Virtue is the noblest inheritance.—Family Seat, Trelawny, in Cornwall.

CONVERS, of Horden, Durham; created July 14, 1648.—Sir Thomas CONVERS, the ninth baronet, succeeded his nephew, Sir George, in 1803; married Isabella, daughter of James Lawther, of Cowes, Yorkshire, left three children, Jane, Elizabeth, and Dorothy; and three sons, who all died in their infancy. Of this ancient family, originally written Coigniers, denominated from a place of that name in France, was Roger de Coigniers, who came into England about the end of the reign of William the Conqueror, to whom the bishop of Durham, who died in 1095, gave the constableship of Durham. His descendants were constantly of high consideration in the county of Durham; and the elder branch became ennobled in the person of Sir William, first lord Conyers; but this honour became extinct in the third male heir. —Family Seat, at Chester le Street, in Durham.

ASTON, of Alton, Cheshire; created July 25, 1658.—Sir Willoughby ASTON, the sixth baronet, succeeded his father, Sir Willoughby, August 24, 1772; married, December 25, 1772, Jane, second daughter of Robert Henley, second and last earl of Norththing, which title became extinct in 1787.—The family of Alton is of very great antiquity, and have resided at Alton, in Cheshire, from the time of Edward the Confessor; from an ancient manuscript, it appears these lords were descended from the Saxons. Sir Thomas, the twenty-fifth in lineal descent from Odard de Efton, was the first baronet. On the breaking out of the civil war, he took part with the king, and raised a party of horse; but was
was afterwards taken in a skirmish in Staffordshire, and
was prisoner to Stafford; where, in endeavouring to es¬
scape, he received a wound in the head, which, with other wounds he had before re¬
ceived, threw him into a fever, of which he died, March 24, 1645.—Motto, Prés d'accomplir, Ready to per¬
form.—Family Seat, Fareham, Hants.

WISEMAN, of Canfield Hall, Essex; created Aug.
29, 1628.—Sir THOMAS WISEMAN, the sixth baronet, suc¬
cceeded his cousin, Sir William, May 25, 1774; he mar¬
rried Dec. 3, 1757, Mary, daughter of Michael Den¬
en, esq., master-attendant of his majesty's dockyard at
Chatham, and by her, who died June 11, 1766, had thre¬
e three sons: Edmund, who died suddenly, May 7, 1784; (who by Jennima, his wife, daughter of Michael Arne, left one son, William Saldonfall Wise man, born March 5, 1784, in the navy; and a daughter, Marianne, born in 1785). This was the first baronet, and married Sophia Atine, only daughter of George Templer, esq. 1628.—Sir William Templer Pole, the seventh baronet, born Nov. 28, 1628.—Sir William WOLSELEY, the fifth baronet; born Aug. 24, 1740; succeeded his father, Sir William, in 1775; married, 1775, Miss Chambers, of Wim belton, in Surrey, by whom he has Robert, lieutenant-colonel of the second Staffordshire militia, married, in Feb. 1804, the only daughter of the late Rev. Archdeca n Hand; Charles, who married, in 1792, Mary, second daughter of the Hon. Thomas Clifford; a daughter, who married, in 1803, lieutenant-colonel Thomas Brown, late of the 95th regiment of infantry.—This is a family of great antiquity, and has been long seated in the county of Stafford: the first mentioned in the pedi¬
gree is Siward, lord of Wile. The fifth in descent from him was Robert, who was lord of Wollesey, and
in 1384, Ralph, another descendant, in the possession of the barons of the exchequer in the reign of Edward IV. Robert, the first baronet, was clerk of the king's letters patent. His fifth son, William, accompanied king William into Ireland, and commanded the Inniskills at the battle of the Boyne: after which he was made
vice-count or sheriff of Elgin, and Alexander Wise man, viscount of Foris and Innervan. Not long after this, Sir Simon Wismen was found to be possessor of lands at
cotes, in Northampt onshire. The present baronet is
the great grandson of Sir Edmund Wileman, knt. second
son of the first baronet.—Residence, Northfleet, Kent.

NIGHTINGALE, of Kneef worth Hall, Cambridge¬
shire: created Sept. 4, 1628.—Sir CHARLES Athel¬
ston NIGHTINGALE, the seventh baronet, born Nov.
1, 1784; succeeded his father, Sir Edward, Dec. 16, 1805; married, in Dec. 1809, Simon Wise man, esq. who has, Henry, born Jan. 1800; Edward, born March 28, 1785; married, Dec. 22, 1798, Penelope, daughter of the late Sir John Parker Moyley, bart. by whom he has, Henry, born Jan. 1800; Edward, born March 1803; Frederic-Simon, born June 1804.—This family is
descended from a noble Norman family, denominated
Every, of Eginton, Derbyshire; created May 25, 1641.—Sir HENRY EVERY, the ninth baronet, was born June 4, 1777; succeeded his father, Sir Edward, Dec.
28, 1785; married, Dec. 22, 1798, Penelope, daughter of the late Sir John Parker Moyley, bart. by whom he has, Henry, born Jan. 1800; Edward, born March 1803; Frederic-Simon, born June 1804.—This family is
descended from a noble Norman family, denominated
Every; of whom a particular account is to be found in the genealogy of Percy, earl of Egmont in Ireland, and
lord Lovel and Holland in Great Britain, who
quarrels the face arms. See p. 640.—Family Seat, Egston, in Derbyshire.

LANGLEY, of Higham-Gobion, Bedfordshire; created May 29, 1641.—Sir HENRY LANGLEY, the sixth baronet, succeeded his father, Sir Henry, April 17, 1785; married, Dec. 18, 1785, Frances, daughter and heir of John Pole, of Devonshire, esquire, the grandfather and great-grandfather of which John, who were returned members for the city of Exeter in parliament 12 Edw. III. as was Thomas, another of the same family, for Barnstaple, in the 15th of the same reign. Sir John, the third baronet, in 1633, was a member in that parliament which settled the crown on king Wil¬
liam, as he was also of those parliament men which were summoned 1 and 20 Wm. III. Sir John William, the late baronet, served the office of the
riff of his native county in 1392. He built the present manor-house, which stands about half a mile from the former one, a great part of which still remains, and is a venerable monument of antiquity; he also added con¬
derably to the family estate, by purchases from lord
Pettke, and sir George Yonge, bart. and after a life of public service to his country, in the capacity of an
active justice of the peace, died on the 30th Nov., 1799, and was buried in Shute church.—Motto, Pollet vixius. Virtue is of great power.—Family Seat, Shute, Devon.

VAVASOUR, of Hafelow, Yorkshire: created Oct.
24, 1625.—Sir THOMAS VAVASOUR, the seventh bar¬
onet, succeeded his brother, Sir Walter, November 3, 1802.—This famous and very ancient family of Vava¬four, or Valvafor, have their name from their office, being formerly the king's valvaforis, (a degree then little inferior to a baron.) Sir Manger le Valvafor is mentioned in Doomsday Book.—Family Seat, Hafelow, Yorkshire.

WOLSELEY, of Wolveley, Staffordshire; created Nov.
58, 1628.—Sir WILLIAM WOLSELEY, the fifth baronet; born Aug. 24, 1740; succeeded his father, Sir William, in 1775; married, 1775, Miss Chambers, of Wim belton, in Surrey, by whom he has Robert, lieutenant-colonel of the second Staffordshire militia, married, in Feb. 1804, the only daughter of the late Rev. Archdeca
Hand; Charles, who married, in 1792, Mary, second daughter of the Hon. Thomas Clifford; a daughter, who married, in 1803, lieutenant-colonel Thomas Brown, late of the 95th regiment of infantry.—This is a family of great antiquity, and has been long seated in the county of Stafford: the first mentioned in the pedi¬
egree is Siward, lord of Wile. The fifth in descent from him was Robert, who was lord of Wollesey, and
in 1384, Ralph, another descendant, in the possession of the barons of the exchequer in the reign of Edward IV. Robert, the first baronet, was clerk of the king's letters patent. His fifth son, William, accompanied king William into Ireland, and commanded the Inniskills at the battle of the Boyne: after which he was made
vice-count or sheriff of Elgin, and Alexander Wise man, viscount of Foris and Innervan. Not long after this, Sir Simon Wismen was found to be possessor of lands at
cotes, in Northampt onshire. The present baronet is
the great grandson of Sir Edmund Wileman, knt. second
son of the first baronet.—Residence, Northfleet, Kent.

NIGHTINGALE, of Kneef worth Hall, Cambridge¬
shire: created Sept. 4, 1628.—Sir CHARLES Athel¬
ston NIGHTINGALE, the seventh baronet, born Nov.
1, 1784; succeeded his father, Sir Edward, Dec. 16, 1805; married, in Dec. 1809, Simon Wise man, esq. who has, Henry, born Jan. 1800; Edward, born March 28, 1785; married, Dec. 22, 1798, Penelope, daughter of the late Sir John Parker Moyley, bart. by whom he has, Henry, born Jan. 1800; Edward, born March 1803; Frederic-Simon, born June 1804.—This family is
descended from a noble Norman family, denominated
Every, of Eginton, Derbyshire; created May 25, 1641.—Sir HENRY EVERY, the ninth baronet, was born June 4, 1777; succeeded his father, Sir Edward, Dec.
28, 1785; married, Dec. 22, 1798, Penelope, daughter of the late Sir John Parker Moyley, bart. by whom he has, Henry, born Jan. 1800; Edward, born March 1803; Frederic-Simon, born June 1804.—This family is
descended from a noble Norman family, denominated
Every; of whom a particular account is to be found in the genealogy of Percy, earl of Egmont in Ireland, and
lord Lovel and Holland in Great Britain, who
quarrels the face arms. See p. 640.—Family Seat, Egston, in Derbyshire.

LANGLEY, of Higham-Gobion, Bedfordshire; created May 29, 1641.—Sir HENRY LANGLEY, the sixth baronet, succeeded his father, Sir Henry, April 17, 1785; married, Dec. 18, 1785, Frances, daughter and heir of John Pole, of Devonshire, esquire, the grandfather and great-grandfather of which John, who were returned members for the city of Exeter in parliament 12 Edw. III. as was Thomas, another of the same family, for Barnstaple, in the 15th of the same reign. Sir John, the third baronet, in 1633, was a member in that parliament which settled the crown on king Wil¬
liam, as he was also of those parliament men which were summoned 1 and 20 Wm. III. Sir John William, the late baronet, served the office of the
riff of his native county in 1392. He built the present manor-house, which stands about half a mile from the former one, a great part of which still remains, and is a venerable monument of antiquity; he also added con¬
derably to the family estate, by purchases from lord
Pettke, and sir George Yonge, bart. and after a life of public service to his country, in the capacity of an
active justice of the peace, died on the 30th Nov., 1799, and was buried in Shute church.—Motto, Pollet vixius. Virtue is of great power.—Family Seat, Shute, Devon.
shire.—Wyamarus and Jordayne, two brothers, were living at the time of the conquest; the first enjoyed, by the gift of William the Conqueror, in 1066, as marks of his royal favor and reward, the lordships of North and South Cave, and other manors in Yorkshire; all which the said Wyamarus conveyed to his brother, Jordayne, in the 7th year of William Rufus, in which reign Wyamarus died without issue. Jordayne de Cave, heir to his brother, was so furnished from his lordship of Cave. The nineteenth in descent from him was, Sir Thomas, the first baronet, who, dying without issue, in 1387, the gift of William the Conqueror, in 1069, as marks of his royal favor and reward, the lordships of North and South Cave, and other manors in Yorkshire; all which the said Wyamarus conveyed to his brother, Jordayne, in the 7th year of William Rufus, in which reign Wyamarus died without issue. Jordayne de Cave, heir to his brother, was so furnished from his lordship of Cave. The nineteenth in descent from him was, Sir Thomas, the first baronet, who, dying without issue, in 1387, was created baronet in 1661. His eldest son, Sir William, married, in 1690, after the death of his father, his eldest daughter, Anne, who was born in 1625, and was the daughter of Sir John Cotton, knt. lord of the manor, who lived in the 13th century. Sir John, the first baronet, was high sheriff of Cambridgeshire when the rebellion broke out, and proclaimed the earl of Essex a traitor in every market town; he also raised his standard at Waltham, in which place he was entrusted to carry the plate of the university of Cambridge to the king at Oxford, which he safely delivered, through many difficulties, being followed by a body of Cromwell's horse: he was soon after obliged, for his loyalty, to leave his country, and lived some years abroad. He was born in Sept. 1615, and died about 1690, aged 74. Sir John, his son, the second baronet, was recorder of Cambridge, and one of its representatives in parliament all king William's, and part of queen Anne's, reign. He died in Jan. 1712. Sir John Hinde, his only son and heir, was treasurier of the royal chamber, and one of the lords commissioners of trade and plantations; also member in several parliaments, for the town of Cambridge, and afterwards for Marlborough, which he represented to the time of his death, on Feb. 4, 1759, in the 64th year of his age.—Motto, Fidelitas victor, Fidelity prevails.—Family Seats, Landwade and Maddington, both in Cambridgeshire.

BURGOYNE, of Sutton, Bedfordshire; created July 15, 1641.—Sir MONTAGUE BURGOYNE, the eighth baronet, succeeded his father, Sir John, in 1726, a colonel in the army; married, Oct. 16, 1715, the eldest daughter of Sir John Betham, bart. of Wilmot, in the county of Devon, by whom he has a son, born Oct. 16, 1715. This family has been seated in the county of Bedford, according to tradition, ever since king John's time. Robert Burgoyne, esq. was a peron of considerable note in the time of Henry VIII. and one of the auditors of the Exchequer. He was also one of the commissioners of the mint, and by that kag to take the surrender of the monasteries in several counties.—Family Seats, Sutton, Bedfordshire.

NORTHCOTE, of Hayne, Devonshire; created July 16, 1641.—Sir STAFFORD-NORTHCOTE, the seventh baronet, succeeded his father, Sir Stafford, March 13, 1771; married, May 6, 1791, Jacquetta, daughter of Charles Baring, esq. by whom he had a son, born 1792; married, in 1798, and another daughter, that in the time of Henry I. Galfridus Miles had his seat at Northcote, in the parish of East Down, in Devonshire; and that John Fitz Gausfrid held divers lands there, and in the hundreds of Witheridge, North Tawton, Black Torrington, &c. and changed his name to Northcote. John, the sixteenth in descent from him, was the first baronet of this family, and was born in 1599.—Christi crux est noster, Christ's cross is my light.—Family Seat, Hayne, in Devonshire.

STICKLAND, of Boynton, Yorkshire; created July 20, 1641.—Sir GEORGE STICKLAND, the fifth baronet, succeeded his father, Sir William, Sept. 1, 1735. He has had five sons; William, who, in April 1778, married a daughter of Nathaniel Cholmley, of Howham, esquire; George, who, in 1772, married the daughter of the late C. Cragg, esq. Charles, who was a captain in the 84th regiment of foot, and died at Gibraltar, Dec. 1795; Walter, married, Aug. 31, 1803, Miss West, youngest daughter of Maximilian Western, esq. of Cockethorpe, in Oxfordshire; Henry-Eustathius, married, Dec. 23, 1805, Miss Cartwright, daughter of Rev. Edmund Cartwright, son of Woburn, in the county of Bedford. Sir George has also had several daughters, the eldest is married to Stickland Freeman, of Fawley Court, esquire.—There have been several persons of great eminence and reputation in this family, and their an-
cient seat was at Strickland Hall, in the county of Weftmorland. Sir Walter de Strickland, kn. (as the name was anciently written,) was returned one of the knights for Weftmorland, in several parliaments, in the reign of Edward I. Sir William, the first baronet, was a considerer in Oliver Cromwell's time, and one of those whom the protector summoned to take place as a lord, and to have that dignity in all commissions: he died about 1671. Sir William, the late baronet, was lord, and to have that dignity in all. commissions: he

---

CHICHESTER, of Raleigh, Devonshire; created Aug. 4, 1641.—Sir.—Chichester, of Raleigh, the seventh baronet, succeeded his father, Sir Edward, in Jan. 1774. He took the name and arms of Raleigh, in 1768, on succeeding to an estate in Worcestershire. After spending much of his early life in India, he was elected member for Eveham in 1769, and again in 1774, in which year he was appointed secretary to the board of control for the affairs of India. In 1774, he was created a baronet, by the title of sir Charles-William-Booughton, Duke of Newcastle and of Downton Hall in Salop; but, on succeeding to the family baronetage, he assumed his original surname. In 1796, he was elected for Bramber, but vacated his seat in 1799, on being appointed one of the commissioners for auditing the public accounts. He married, in 1782, Catherine, daughter and heiress of William-Pierce Hall, of Downton Hall, in Salop, esquire, by whom he had issue, Catherine-Maria, who died in her infancy; Louisa, married, July 16, 1807, St. Andrew lord St. John; Caroline, married, March 26, 1808, the Rev. R. H. Johnson; and William-Edward. Of this ancient family was Robert de Boveton, who had issue, Richard, father of William, who lived in the reign of Edward III. His great grandson, Thomas, is mentioned by Dugdale, to be pious of the manor and seat at Laviord, by marriage, about 1450, with Elizabeth, daughter and heiress of Geoffrey de Alleley, of that place, whom he chose for his residence. Sir Theodorus-Edward Alleley Boughton, second baronet, second son, of Sir John Boughton, by his wife, Theodosia of John Donellan, esq. whose whole history excited too much of the public attention to be passed over in this place. The sudden death of Sir Theodorus, at Lawford Hall, on the 29th of August 1769, in his 21st year, created such strong suspicions, and such as were pointed to Sir John Donellan, by various odd and questionable circumstances in his behaviour, that the body was taken up for examination, after it had been deposited in the family-vault at Newbold; and, in purview of the verdict of a coroner's inquest, Mr. Donellan was committed to prison at Warwick; where he was, on the 29th of March following, indicted for the supposed murder, before Mr. Justice Buller; was found guilty after a trial which lasted twelve hours, and executed at Warwick, April 2, 1781. The possession of the Boughton estate, which Donellan expected to inherit in right of his wife, was no doubt his inducement to poison his friend and brother.—Motto, Owe bowan Dee dovun. Every good thing is from God.—Family Seats, Routledge, in Worcestershire; Downton Hall, in Shropshire; and Coney Routte, Chichwick, in Middlesex.

---

GOODRICKE,
GOODRICKE, of Ribston, Yorkshire; created Aug. 14, 1611.—Sir Harry-James Goodricke, the seventh baronet, born Sept. 26, 1797; succeeded his father, Sir Henry, March 25, 1803.—Goodricke is a Saxon name, signifying "God's jurisdiction." It is mentioned by Ingulphus, and other historians of the Saxon times, and is inscribed upon several old Saxon coins. It appears from the visitation of Robert Glover, Somerset, that the family flourished for several generations at Nortingley or Nortonscroft, in Somersetshire, all whose names, marriages, and issues, are specified in the family pedigree. At length, Henry, the third son of Robert Goodricke, baronet, of Nortingley, marrying an heiress, the daughter of Thomas Stickford, esq. in Lincolnshire, the family flourished in that county, where, after six generations, William Goodricke, esq. had three sons, John, Thomas, and Henry. Thomas was in great favour with king Henry VIII.; and was employed by him in several negotiations with foreign princes. He was one of the thirty-two commissioners empowered to reform the canon laws, and was one of the compilers of the English liturgy. He was twenty years bishop of Ely: and by king Edward the Sixth was made lord chancellor of England, from which office he was removed by queen Mary, and died unmarried, May 19, 1553. In this year, the third baronet purchased Ribston and other estates in Yorkshire, of Charles Brandon, duke of Suffolk, and died 1556. From him defcended Sir John, the first baronet, who was born April 20, 1617, and suffered much in the civil wars, for his loyalty to the king. He had his estate sequestrated, and paid 1343l. 10s. composition to the sequestrators.

KAYE, of Woodhouse, alias Woodhouse; created Feb. 4, 1641.—The Rev. Sir Richard Kaye, the sixth baronet, I.L.D., succeeded his brother, Sir Thomas William, May 13, 1785; married, March 24, 1798, Miss Thordor, of Lincoln; by whom he has a son and heir, born May 23, 1797; and a daughter, born Jan. 15, 1800; and a daughter, born Aug. 23, 1799. He was one of the thirty-two Trollope, esq. who distinguished himself in the French wars, in the time of Henry VI. and was killed at Towton fight, as also Thomas Trollope, of Thorby, esquire; who married Margaret, daughter and co-heir of Roger, youngest son of Thomas Lumley, esq. by Elizabeth Plantagenet, daughter and co-heir of the late Lacy, esquire; and of the lady Elizabeth Lacy, are supposed to be of this family.

Family Seat, Cawthorpe, in Lincolnshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.

LAWLEY, of Spoonhill, Shropshire; created Aug. 16, 1641.—Sir Robert Lawley, the sixth baronet, succeeded his father, Sir Robert, March 11, 1793; married in Sept. 1793, Maria, daughter of Joseph Denison, esq.—It appears by deeds in this family, that Thomas Lawley, esq. was cousin and heir of John lord Wenlock, privy councillor to King William III. Family Seat, Ribston Hall, and Altofts, in Yorkshire.
Tons, who came to England with William the Conqueror; Soddington in Worceftershire, and Morley in Shropshire.

His fourth son, was a captain at Worcefter fight.—Motto, William, was major in the queen's regiment. Peter, the own regiment, when prince, of Wales. His third son, John, was lieutenant-colonel in Charles I's forces; whereupon he was forced to secure himself at Coughton plundered and made a garrison of, by the parliament forces; whereupon he was forced to secure himself at Worcefter, and died Jan. 16, 1565. Sir Francis, his only surviving son, and successor, added to the manor house at Coughton, and lived in great hospitality after the restoration. — Motto, Virtus sola velat virtus, Virtue alone is nobility. Family Seats, Buckland in Berkshire; and Coughton in Warwickshire.

THROCKMORTON, of Coughton, Warwickshire; created Sept. 1, 1643. —Sir John Courtenay Throckmorton, the fifth baronet, was born July 27, 1753; succeeded his grandfather, Sir Robert, Dec. 8, 1791; married, Aug. 19, 1782, Mary-Catharine, daughter of Thomas Giffard, of Chillington, in Staffordshire, esq. by his first wife, Barbara, daughter of Robert lord Bette. —Throckemerton, Throckmorton, or the Rockmoor-Town, from whence this family is denominated, is situated in the vale of Eveham, in Pershore hundred, in Worcestershire. John de Throckmorton, according to Sir William Dugdale, was lord of the manor of Throckmorton about forty years after the Norman conquest, 1135, which leaves no room to doubt but that this family possessed it at the entrance of the Normans, or long before, the etymology of the name being either British or Saxon. From this John descended Sir Robert, of Coughton, the first baronet, who, in the civil wars, had his estate confiscated, and his house at Coughton plundered and made a garrison of, by the parliament forces; whereupon he was forced to secure himself at Worcester, and died Jan. 16, 1565. Sir Francis, his only surviving son, and successor, added to the manor house at Coughton, and lived in great hospitality after the restoration. — Motto, Virtus sola velat virtus, Virtue alone is nobility. Family Seats, Buckland in Berkshire; and Coughton in Warwickshire.

HALTON, of Stamford, Essex; created Sept. 10, 1642. —Sir William Halton, the sixth baronet, succeeded his father, Sir Thomas, and married Mary, daughter of Richard Garner, of King's Ripton, in Huntingdonshire, esquire. —Family Seats, Reach, in Huntingdonshire.

BLount, of Soddington, Worcestershire; created Oct. 5, 1623. —Sir Edward Blount, the eighth baronet, LL. D. was born in 1793; succeeded his father, Sir Walter, Oct. 1803. This very ancient family is said to take its rise from the Blondi, or Blondi, in Italy, whose historians derive them from the Roman Flavi. Blount, lord of Guifnes, in France, had three sons, who came to England with William the Conqueror; one returned into France; the other two, Robert and William, gave a beginning to all the Blounts in this kingdom. Robert, was created by the Conqueror, baron of Ickworth in Suffolk; and married Gundred, daughter of the Earl Ferrers, continued to be of high note and estimation; among them were the barons Montjoye, and several earls of Devonshire. Sir Walter, the fifth baronet, was a great sufferer for Charles I. for whom he was long imprisoned, first at Oxford, then in the Tower of London: his brothers, and four sons, were all in the same service. His second son, John, was lieutenant-colonel in Charles the Second's own regiment, when prince of Wales. His third son, William, was major in the queen's regiment. Peter, the fourth son, was a captain at Worcester fight. — Motto, Lux tua via mea. Thy light my way. — Family Seats, Soddington in Worcestershire, and Morley in Shropshire.

LIDDELL, of Ravensworth Castle, Durham; created Nov. 2, 1642. —Sir Thomas Henry Liddell, the sixth baronet, succeeded his father, Sir Henry-George, Nov. 26, 1791; married, 1796, Maria-Suzanna, daughter and sole heir of John Simpson, of Bradley, in the county of Durham, esquire, by whom he has a son, born in Feb. 1797. —The Liddles were anciently lords of Liddell Castle, and barony of Buff; and have been proprietors of considerable coal works in the counties of Durham and Northumberland. Sir Thomas, the first baronet, was much esteemed, and had great interest in Northumberland, in which he exerted in support of Charles I. defending Newcastle against the Scots. He was taken prisoner, and on Feb. 13, 1645, upon petition, was admitted to compound; it appears that he paid 4000l. to the queen-regent for his estate. He was also so obnoxious to the then powers, that Sir Thomas is mentioned among those, in the propositions from the parliament, who were demanded to be removed from his majesty's councils, and to be restrained from coming within the verge of the court, and not, without advice or consent of both houses of parliament, to bear any office or employment. The late baronet, Sir George, was distinguished for a warm and generous spirit, which sometimes, however, carried him into romantic transactions. His eldest son, in the interests of his family, upon a wager, and his return with two Lapland girls, and some rein-deer, are well remembered. See Tour through Sweden, Swedish Lapland, &c. &c. by M. Confett, esq. The Lapland girls were returned safe to their native country, after an absence of several months, with 50l. and carriage of trinkets; and the rein-deer have bred in England. — Motto, Fama semper vivit. Fame always lives. —Family Seats, Ravensworth Castle, and Newton, both in the county of Durham; and Edlington, Northumberland.

HUNLOKE, of Wingerworth, Derbyshire; created Feb. 29, 1643. —Sir Thomas-Windsor Hunloke, the fourth baronet, succeeded his father, Sir Henry, Nov. 16, 1804; married, Oct. 1807, Miss Ecclefeon, daughter of Thomas Ecclefeon, esq. of Scarifbrick, Lancashire. —Robert de Ros, of Fusar, was only thirteen at the decease of his father, and paid 1000 marks to the crown, for livery of his lands, in 2 Richard I. and claimed from the crown the baronial estate and castle of Werke, or Warke, in Northumberland, which afterwards passed into a branch of the Grey family; he married Isabel, daughter of William Leo, king of Scotland, and had issue by her, William de Ros, in 17 Henry III. He was one of the twenty-five barons, elected by the whole body, to secure the king's performance of the great charter of that year. He died 11 Henry III. leaving issue William de Ros, or Ros, his eldest son and heir, who poiffessed from him the castle and manor of Helmsley, and Robert de Ros, a younger son, to whom he gave the castle and barony of Werke. He is the person to whom the first existing writ of summons to parliament, for the barony of de Ros, was directed. It was to attend the parliament of 49 Henry III. This writ was directed to Robert de Ros, without any mention of Hambake, or any further description whatever; he married Isabel, daughter of William de Albini, ancestor of the Fitz-Alians, earls of Arundel, and brother of Nigel de Albini, ancestor of the Mowbrays, dukes of Norfolk, but one who was of a different family, with the same Christian name, and sole heir of William de Albini, lord of Belvoir in Leicestershire, and whose father was great-grandson of Roger de Todeney, recorded in Domesday book as holding great possessions in Leicestershire and other counties; this Robert de Ros died in June 1285, or 15 Edw. I. and, having become a knight templar, he was buried in the Temple church, having issue by Isabel, his wife, who survived him, William de Ros, his heir; Robert, a younger son; and a daughter, Isabel. — The committee
committee of the house of lords, after a solemn investigation, May 7, 1865, resolved "that the barony of Roos remains in the co-heirs of Robert de Roos, who was summoned to parliament by the style of Robert de Roos Esquire; and that the said co-heirs are Sir Thomas Windsor Huldon, Bart., of Whifley, Derbyshire; George Earl of Essex; and lady Henry Fitzgerald. Sir Henry, the eldest baronet, testified his loyalty, by lending to Charles I. a considerable sum of money, in his most pressing necessity, even at a time when there was little probability of ever being repaid; he afterwards purchased and acceded a troop of horse, in the regiment of colonel John Frecheville, (afterwards lord Frecheville,) whereof he himself was lieutenant-colonel; and this young hero, not then twenty-two years of age, at the battle of Edge Hill fo signalized himself, that the king knighted him in the field of battle, and soon after created him a baronet. Not long after, making a bold attempt upon the enemy, near Bedworth Park, in Northamptonshire, in a skirmish with one of the adverse parties in ambush, he received a cut with a sword in his elbow, which so disabled his right hand, that it hung useless in a scar to his dying day; and for his loyalty to his sovereign, he was fined 150l. by the sequestrators. —Family Seat, Wingerworth, in Derbyshire.

HAGGERSTON, of Haggerston Castle, Northumberland; created Aug. 15, 1643. —Sir CARNABY HAGGERSTON, the fifth baronet, succeeded his father, Sir Thomas, Nov. 1, 1773; married Frances, daughter of William, son of Walter Smythe, esq., brother of Sir Edward Smythe, of Ed, in the county of Durham, baronet; by whom he has issue a daughter, married, in Jan. 1805, Sir Thomas Stanley, bart. of Hooton, in Cheshire.

—This name is of great antiquity in Scotland, and local from Halkerton. William and Richard Haggerdon are witnesses to a donation, in 1190. John de Haggerdon was one of the Scots barons, who swore fealty to king Edward, 1196. Sir Thomas, the first baronet, was colonel of a regiment in the service of Charles I. —Family Seat, Haggerston, in Northumberland.

HAMPSON, of Taplow, Buckinghamshire; created June 5, 1642. —Sir THOMAS-PHILIP HAMPSON, the seventh baronet, born Oct. 1762; succeeded his father, Sir George-Francis, Dec. 25, 1774; married, June 25, 1788, Jane, eldest daughter, and at length co-heir, of Peter Haddon, of the city of London, and of Rick in Cumbeland; by whom he has two children. The younger died 1791; who had his eldest son, George-Francis, born Oct. 22, 1789; and two daughters, Stella-Frances, who was born and died in 1790; and Stella-Anna, born and died in 1791. —Motto, Nunc aut tranquam, Now or never. —Residence, Great Cumberland Place.

O'NEILL, of Upper Clanaboy, Ireland; created Nov. 13, 1643. —Sir RANDAL O'NEILL, the fourth baronet, succeeded his father, Sir Henry; married Mrs. Margaret Thornkyns, by whom he has one son, William, born 1754; and one daughter, Rachael. —Wotton says this family is descended from Hugh Myley, who was king of Ulter in 1122. As Henry II. landed in Ireland; but as Henry II. did not land in Ireland till 1172, when Roger of Rogier was king, and who succeeded Murtough Mervin in 1168, probably this last-named prince must be the person supposed the ancestor of this family. His grandson, Hugh Boy O'Neill, (from whom the territories called the Clanaboy, in the counties of Down and Antrim, received their names,) recovered those countries from the English, (who had conquered them from the Irish,) in the reign of Henry II. and enjoyed the family estate of these islands till 1662, when he was called upon to pay a subsidy of 100l. A.D. 1662, for the public service. He was created earl of Tyrone, and was named lord O'Neill; he was the fourteenth in a lineal descent from the last king of Ulter. —Family Seat, Upper Clanaboy, in the county of Down, in Ireland.

BATHURST, of Lechlade, Gloucestershire; created Dec. 5, 1643. —Sir LAURENCE BATHURST, the sixth baronet, succeeded his father, Sir Francis. —The family of Bathurst was anciently seated in Suffolk, and from thence removed into Kent, where they possessed a considerable estate; they have spread themselves into other counties and other countries, and recently purchased a seat in Worcestershire. Sir George-Francis, the first baronet, for his loyalty to king Charles I, had his estate sequestered, which he compounded for 700l. Sir Francis, the late baronet, and his lady, with part of his family, embarked with general Oglethorpe, to encourage the new settlement of Georgia, where his lady died, in Jan. 1736. Soon after which, Sir Francis died there, and his younger son, Robert, was killed in an engagement in that country, with the Indians, whereupon the dignity came to his eldest son, Sir Lawrence, the present baronet, who resides in Georgia, if living; but the title is claimed by a brother.

ACTON, of Aldenham, Shropshire; created Jan. 17, 1645.—Sir JOHN-FRANCIS-EDWARD ACTON, the sixth baronet, was born in 1736; succeeded his cousin, Sir Richard, Nov. 20, 1771; married Mary-Anne, daughter of one of his brothers (by permission of the pope), by whom he has one son, Richard-Ferdinando, born July 14, 1801. —Sir John Francis-Edward, after having attained the rank of major-general in the Austrian service, removed to Naples, where he has filled several high civil and military offices. —Family Seats, Aldenham, and Round Acton, otherwise Acton Round, near Aldenham, in Shropshire.

There was an earlier baronety in this family, created in 1615, which became extinct on the death of the first baronet.

WEBB, of Oddstock, Wilts; created April 2, 1644. —Sir THOMAS WEBB, the sixth baronet, succeeded his uncle, Sir John, in 1796; married, March 14, 1799, the honourable Charlotte-Frances, daughter of Charles vicount Dillon.—William Webb, of Salisbury, merchant, who lived in the time of king Henry VIII. is the first we find of this family. His descendant, Sir John, was created a baronet, as a reward of his family's dangers both fired their blood in the king's service, and contributed, as far as they were able, with their purses, in his defence, as the patent expresseth. —Family Seats, Oddstock in Wiltshire, and Hatrhop in Gloucestershire.

VYVYAN, of Treloarwaen, Cornwall; created Feb. 12, 1645.—The Rev. Sir CAREW VYVYAN, the sixth baronet, M. A. born Jan. 11, 1735; succeeded his brother, Sir Richard, in 1783. —The ancient family of Vyvyan, was originally seated at Telkudrin, or Trivendin; now called Trevidden, in the parish of Buryan, in Cornwall, which estate still continues in the family. The first who is entered in the Visitations, books of the Heralds' office is Sir Yevel Vyvyan, knt. who lived in the thirteenth century; and from him descended Sir John-Francis, Edward Acton, who, by his loyalty to the last king of Ulter, and by a further reward and encouragement, the Ulterian (being part of the O'Neill's armies) was given as an augmentation to the arms of each baronet. The present Sir Randal O'Neill is supposed to be the fourteenth in a direct descent from the last king of Ulter. —Family Seat, Treloarwaen, near Helton, Cornwall.

Plate LXXI.
ACLAND, of Columb-John, Devonshire; created March 1, 1644-5.—Sir Thomas Acland, the tenth baronet, succeeded his father, Sir Thomas Dyke, May 17, 1791; married, April 17, 1794, Elizabeth, only daughter of H. Heare, of Mitcham Grove, esquire.—This family derives its name from the situation of its ancient seat, in the parish of Lankey, near Barnstable, being in the midst of large groves of oak (in Saxon signified by Ak or Ac), and from thence called the Ac or Oak land. In early times, their arms were, three oak-leaves, on a bend, between two lions rampant. The present sir Thomas is the twenty-third in a lineal descent from Hugh de Accale, seated at Accale in 1155. Sir John, the first baronet, created as above, with precedence before all baronets created since the year 1644, engaging very zealously in the service of Charles I. greatly impaired his fortune, not only by raising, but supporting at his own charge, a party, with which he Garrisoned his house at Columb-John; which at one time, as lord Clarendon takes notice, was the only force the king had in the county of Devon, to control the power of the earl of Stamford, then at Exeter. Upon the decline of the king's affairs, his house was plundered, and himself fined for his delinquency, by the commissioners at Goldsmith's Hall, 1800. which, not being thought sufficient, was afterwards, by vote in parliament, increased to 4000l. but upon great application it was reduced to the first fine. He was, in consideration of his services, advanced to the degree of a knight, but, at the time of the confusion of the civil wars, the letters patent were destroyed, and new ones not being granted till the year 1677, by reason of a long minority in this family, there was in them inserted a special clause of precedence, from the date of the first, namely, 1644.—Motto, Inextinguible, Immovable.—Family Seats, Columb-John, and Acland, both in Devonshire.

EDWARDES, of Shrewsbury; created March 21, 1644-5, and exemplified to Sir Francis, April 22, 1678.—His K. H. was not only by royal patent, but by possession at his wards, the eighth baronet, M. A. succeeded his father, Sir Thomas, in Aug. 1797; married Frances, daughter of John Gala, of Wellelofe-square, London, esquire; by whom he had five children; Frances, Henry, Juliana, Benjamin, and Charlotte.—The first ancestor mentioned in this family pedigree, is Ynir Carudoch, a nobleman in the times of the earl of Powis, and son of the prince of Powis, who descended from the king of Powis, who was descended from Gurtirther, (called by the English Vortgern,) earl of Eurgain and Ewyas, in Herefordshire, and afterwards king of the Britons, about the year 450. He married Rheingier, daughter and sole heir to the earl of Hereford, who was seated at Holt, and Ston-Stanton, in Leicestershire, and afterwards the earls of Hereford. He was much esteemed in the house of commons; and in the debate about the remonstrance, his speech not being agreeable to the prevailing party in the house, he was committed to the Tower, but was in a few days enlarged, and returned again to the house; he did his major service, and was one of his Commissioners at the treaty of Uxbridge. He was afterwards attorney-general to Charles II. and died May 5, 1670, aged 52.—Motto, Par la force, laboris. Let the reward equal the labour.—Family Seats, Carlton, in Northamptonshire.

LANGHAM, of Cotefbrooke, Northamptonshire; created June 7, 1660.—Sir William Langham, the eighth baronet, was born Feb. 10, 1771; succeeded his father, Sir James, Feb. 7, 1753; married, Aug. 20, in the same year, Henrietta Elizabeth-Frederica Vane, only daughter and heir of the hon. Charles Vane, of Mount-Ida in Norfolk, son of vicecount Barnard, and brother of the first earl of Darlington; by whom, who died Nov. 11, 1807, he has a son, William-Henry, born July 8, 1783; a daughter, Henrietta, born Dec. 21, 1775; and Charlotte, born July 30, 1784. This family is descended from William, son of Henry de Langham, who held land in Langham, in Rutlandshire, to Edw. I. The fourteenth in lineal descent from him was Sir John, the first baronet. He was knighted by Charles II. at the Hague (with James, his eldest son,) being one of those principal citizens in the city of London to wait on his majesty in Holland. He largely contributed to the support of the forces during their exile. He was heir apparent of London in 1643, and member of parliament for the said city in 1644, and for Southwark in 1660. He was one of the aldermen sent to the Tower in 1647; and again in 1649.—Motto, Nec fuit sse feror, 8 R Not.
Nor doth he let them be fierce, (allusive to the arms, which are three bear's heads.)—Family Seats, Cottesbrooke and Walgrave, in Northamptonshire.

CULLUM, of Hawfield, and Hardwice Houfe, Suffolk; created June 18, 1660.—Sir Thomas Gery Cullum, the seventh baronet, F. R. A., and L. S. S. succeeded his brother, Sir John, Oct. 19, 1785; married, in Sept. 1774, Mary, daughter of Robert Hanlon, of Noramlton, in Yorkfhire, efquire; by whom he has three children; Thomas-Gery, born Oct. 1777; in holy orders, married, Sept. 23, 1799, to Penelope, daughter of Samuel Brown, of Lynn, in Norfolk, efq., by whom he has three children: Francis, born in 1783; Bath King at Arms; Suanina, born in 1787, died May 2, 1803, and buried under the altar-tomb in Great Ealing church yard, with her great grandfather, Sir Thomas Gery, knt.—This family was feated at Thorndon, in Suffolk, at least as early as the 15th century, as appears by the will of Walter Cullum, proved Oct. 4, 1454, now extant in the archdeacon of Sudbury's office, at Bury St. Edmunds.—Motto, Sufinnumatur. Let him be supported. —Family Seats, Hawfield Place, and Hardwice Houfe, both in Suffolk.

STAPYTON, of Myton, Yorkshire; created June 25, 1660.—Sir Martin Stapylton, the eighth baronet, succeeded his father, Sir Martin, Jan. 31, 1654; married, May 5, 1659, Hecelia, daughter of Samuel Browne, of Lynn, in Norfolk, efq., by whom he has issue, Rhoda, born in 1790, died 1808; Anne, born in 1791; Editha, in 1793; Blanch, in 1795; Jacob, in 1797; Edward, in 1799; Hecelia, in 1800. Sir John Stapylton, one of the knights of the shire for Norfolk, was killed in the barons' wars, at Eveley, June 27, 1805; married, in May, 1790, Charles-Hoare, esq. and Penelope, daughter of Robert Flanfon, of Hardwick House, both in Suffolk.

ROBINSON, of London; created June 22, 1660.—Sir George Robinson, the fifth baronet, succeeded his father, Sir John, Aug. 31, 1765; he was a fellow of Trinity College, Cambridge, and married Dorothy, only daughter of John Cheifer, esq. of London, by whom he has, George; John; William-Villiers, married, in 1795, a daughter of Stamp Brookbank, efq. Charles, in holy orders, married, Feb. 28, 1805, Charlotte, daughter of Sir James Pennyman, bart. of Ormsby, in Cleveland, Yorkshire. Sir George has also several daughters, whom Sir Francis-Dorothea married in May, 1799, Charles-Hoare, efq. and Penelope, who married, in 1789, Robert Blencowe, efq. of the Inner Temple.—This family was originally feated in the north of England. Sir John Robinson, knt. an alderman, and lord mayor of London, was lieutenant of the Tower; and for the favours he did King Charles II. towards his reforation, was advanced to the dignity of a baronet.—Family Seats, Cranford in Northamptonshire, and Stratton Hall in Leicestershire.

HILLYARD, of Patrington, Yorkshire; created June 25, 1660.—Sir Robert D'Arcy Hillyard, the fourth baronet; succeeded his father, Sir Robert; and married, Sept. 23, 1769, Mary, daughter of Sir Edward Deering, bart. of Surrenden Deering in Kent; and had issue a fons: 1. Thomas; 2. Sir Jacob Astley, knt. who married his cousin, Elizabeth, daughter of Jacob, the first lord Aftley, and had one fons, Jacob, who was created a baronet, 15 Carb. I. and upon the death of his uncle, Sir Isaac Aftley, bart., became heir to his estate, and also poiffefled all the entailed lands of Jacob lord Aftley. Sir Jacob, having forty years repreffented the county of Norfolk in parliament, died in Augufi 1795.—Family Seat, Melton Conftable, in Norfolk.

BOWYER, of Denham Court, Buckinghamshire; created June 25, 1660.—Sir George Bowyer, the fifth baronet, succeeded his father, Sir Edward, Apr. 13, 1652; married, in 1789, Hecelia, youngeft daughter of Samuel Brown, of Lynn, in Norfolk, efq. by whom he has three children: Thomas-Gery, born in 1783, Bath King at Arms; Suanina, born in 1787, died May 2, 1803, and buried under the altar-tomb in Great Ealing church yard, with her great grandfather, Sir Robert did, and flew his adverfary; for which service he was made in the field a knight banneret. He was also with Charles I. at Oxford, when that garrifon furrendered; and foon after the reforation was, for his faithful fervices, (particularly at the battle of Marlton Moor, near York,) and fufferings for the royal caufe, created a baronet.—Motto, Motto, Motto. Have confidence, but be cautious.

STANLEY, of Alderley Park, Cheshire; created June 25, 1660.—Sir John-Thomas Stanley, the feventh baronet, born Nov. 26, 1766; succeeded his father, Sir John-Thomas, Nov. 29, 1807; married, Oct. 11, 1796,
HERALDRY.

London, Published at the Art office May 14, 1862.
1756, the Hon. Maria-Joseph Holroyd, eldest daughter of John Lord Sheffield; and has issue, Edward John, born May 2, 1801; William Owen, born Nov. 13, 1803; Maria-Margaret; Lucy-Anne; Louisa; Dorothy; and Isabella; and a son, born Feb. 22, 1808.—This is a younger branch of the Stanleys, earls of Derby. Adam de Audley, and his two sons, Luliph and Adam, came into England from Normandy with the Conqueror. Luliph's forerunners were Mahbhel and heir of Bay de Stolley, or Stanley, lord of the manor of Stanley, or Stanley, in Staffordshire. His descendants were of great note and renown in every generation. Amongst the most distinguished of them was Sir John de Stanley, who overthrew, at Winchester, a famous French champion, in the presence of King Edward III. He was afterwards governor of Edinburgh in Scotland; where, being reduced O'Neil, O'Connor, and several other chieftains, he was appointed lord lieutenant in 1379. In 1395, he signified himself at Roxburgh Castle, in Scotland, and was a negociator in the submiffion of Richard II. In Percy's rebellion he took the castles of Pomfret and York for the king. In 1387, he obtained a grant of the Isle of Man, for himself and his heirs for ever, with the style and title of king in Man. In 1409, he was made a knight of the garter, confiilable of Windsor Castle, and on the accession of Henry V. once more appointed lord lieutenant of Ireland. He died in 1413. Thomas lord Stanley, his grandson, had three sons: 1. Thomas, the heir of Derby of this family; 2. Sir William de Stanley, who made so distinguished a figure in the battle of Bosworth Field, and with his own hand placed the crown on the head of Henry VII. notwithstanding which that jealous prince took off his head on Tower Hill, in 1495. John, the third son of Thomas lord Stanley, was the ancestor of Sir Thomas, the fifth baronet.—Motto, Sans changer, Without changing.—Family Seat, Nether Alderley, in Cheshire.

SHUCKBURGH, of Shuckburgh, Warwickshire; created June 26, 1660.—Sir Thomas Shuckburgh, the seventh baronet, succeeded his brother, Sir George Augustus-William, Aug. 11, 1804; married C. Tydell, and has issue, C. Anne Emilia; P. Augusta; Frances; T. Stukeley; and R. Charles.—This family is of very great antiquity in the county of Warwick, and is supposed to be descended from a younger son of Turchill castle, who emigrated to this country, and has been seated at Shuckburgh, and have borne that name, at least ever since the year 1138. Sir Richard Shuckburgh, Knt. father to the first baronet, was representative for Warwickshire in parliament 1641. As Charles I. marched to Edgcomb near Banbury, on Oct. 24, 1642, he saw him hunting in the fields; upon which, he fetched a deep sigh, and asked, who that gentleman was that hunted so merrily that morning, when he was going to fight for his crown and dignity? and, being told it was Sir Richard Shuckburgh, he was ordered to be called to him, and was very graciously received; upon which he went immediately home, armed all his tenants, and the next day attended on him in the field, where he was kind and hospitable, and was present at the battle of Edgehill. After his majesty's retreat from those parts, where he went to his own seat, and fortified himself on the top of Shuckburgh Hill, where, being attacked by some of the parliamentary forces, he defended himself till he fell, with most of his tenants about him; but being taken up, and being percieved to be a royal captain, was wounded after the recollection, advanced to the dignity of the baronetage, and was represented for the county of Warwick in five parliaments; he was also master of the buck and houndonds to queen Anne.—Motto, Hac mans ob fa-trium, This hand for my country.—Family Seat, Shuckburgh, in Warwickshire.

STUART, of Hartley Mauditt, Hampshire; created June 27, 1660.—Sir Simon Stuart, the fourth baronet, succeeded his father, Sir Simon; married, in 1739, Frances-Maria, daughter of the Hon. John Olmius, brother to Henry earl of Carlhampton. Scots Jaffaillans and genealogists commence this family in the eighth century, when they were the Thanes of Lochabry; for seven centuries, till Bancho was assassinated by the usurper MacBeth, to evade a predilection, "That his race should succeed to the Scottish throne." Sir Alexander Stuart, Knt., descended from a younger son of one of the Lord High-Stuarts, Charles VI, king of France, gave him an additional coat-armour viz. Argent, on a chief Sable, a lion rampant, debruised with a ragged staff. Sir John Stuart, his son, was of the retinue of James, prince of Scotland, when he landed on the coast of England, in his voyage for France, and was detained here, 1406. He was knighted for his performances in a tournament, held in Smithfield, in Hen. IV, and was the first of this name and family who settled in England. Sir John, his son, was created knight of the bath, on the eve of the coronation of Catherine, consort to Henry V. Nicholas, of Hartley, a lineal descendant from him, was advanced to the degree of a baronet, and constituted one of the chamberlains of the exchequer.—Family Seats, Fawley, and the Salthams, in the county of Wilts.

WARBURTON, of Arley, Cheshire; created June 27, 1660.—Sir Peter Warton, the fifth baronet, was born Oct. 27, 1754; succeeded his father, Sir Peter, March 18, 1774; married, in Aug. 1781, Alice, daughter of the Rev. Mr. Parker.—This family is descended from Odard, or Oward, who came into England with William the Conqueror, and seated himself at Dutton; a good part whereof Hugh Lusps earl of Chester gave him, as appears from Domesday Book.—Family Seats, Arley, near Northwich; and Warburton, on the Mersey; both in Cheshire.

HUDSON, of Melton Mowbray, Leicestershire; created June 3, 1660.—Sir Charles Hudson, the seventh baronet, F.R.S, born Sept. 14, 1753; and succeeded his father, Sir Charles, Oct. 18, 1773.—Family Seats, Waniop Hall, Leicestershire.

HALES, of Beakbourne, Kent; created July 12, 1660.—Sir Philip Hales, the fifth baronet, one of the grooms of the bedchamber to the king, was the eldest son of his father, Sir Thomas-Pyne, March 18, 173; married, in 1775, Elizabeth, daughter and heir of Thomas Smith, of Keyworth, in Nottinghamshire, esq. by whom he has a daughter, Elizabeth.—Sir Robert, the first baronet of this branch, was great grandson of Thomas, elder brother of Edward, ancestor to the Hales of Woodchurch.—Motto, Fluxus constant, Strength is increased by unity.—Family Seat, Blackford House, Wilts.

BOOTHBY, of Broadlow Abf, Denbighshire; created July 13, 1660.—Sir Brooke Boothby, the sixth baronet, F.L.S. succeeded his father, Sir Brooke, 1789; he married Mifs Brilowt, of Wilthtide; and had one daughter, Penelope, born April 11, 1785; died March 12, 1791. The name and family of Boothby is of much greater antiquity, in this nation, than the Norman conquest. Camden, in his Britannia, speaking of Lincolnshire, says, "The hundred or wapentake of Boothby, Boothby-
Boothby, Paynell, a market town, and a gentleman's old seat, called Boothby, (at this time all in being, under that name,) were so denominated from one Boothby, of very ancient time there inhabiting; the heir-general of which married Paynell, lord of Bampton, in Devonshire, Theobaldus de Boothby was governor of Padstow Castle, in Yorkshire, which he held a long time against the civil wars between the House of York and then. Henry Boothby was created baronet by Charles I. by letters patent, dated Nov. 5, 1644, signed by his majesty's sign manual; but the civil wars prevented its passing the seals at that time. Sir William, his son, had the patent renewed after the restoration.—Motto, Mors Christi mors mortis mihi, Christ's death is death to my death.—Family Seats, Alhbourne, in Sussex; and Croperdy, three miles from Banbury, in Oxfordshire.

DIXIE, of Bofworth House, Leicestershire; created July 4, 1660.—Sir Beaumont Dixie, the sixth baronet, born in 1771, succeeded Sir Wolstan, July 12, 1806; he is great-grandson of Sir Wolstan, the third baronet.—Motto, Nemo bonum de super. For proof of this see in the ledger-book there; after which they resided in the neighbourhood, and is mentioned as the seat of Sir Walter Littleton, chancellor of Litchfield, that one of the Dixies married the daughter and heir of Wolstan, of Wolstan, in Warwickshire, about fcvn hundred years since; and, in confirmation of the same, a piece of ancient characters, viz. "Wolstan Dixie,—in the year of our Lord 1100." But Dugdale, in his Warwickshire, intimates, that Wolstan was so called, from one Boothby, named Wolstan, among whom Wolstan was a principal person. What I have said, I have said.—Family Seats, Bofworth House, Leicestershire.

Honywood; of Evington, Hunts; created July 19, 1660.—Sir John Courtenay Honywood, the fifth baronet, born in 1737; succeeded his father, Sir John, in March 1806.—The family of Honywood, anciently written Henevood, take their name from the manor of Hennewood, in the parish of Poiling, in Kent, where they resided in Henry III.'s reign, when Edmund de Hennewood, (or Honywood, as the name was afterwards spelt,) at that period, was a liberal benefactor to the priory of Horton, in that neighbourhood, and is mentioned as such in the ledger-book there; after which they resided at Hythe, for which port John Honywood served in parliament in the 40th of Richard II. and Thomas Honywood in the 5th of Henry VI. The pedigree begins with William Honywood, who died in the latter end of the reign of Henry II. —Motto, Onne bonum de fuper. Every good thing is from above.—Family Seats, Evington, near Canterbury.

Aubrey, of Llantrithyd, Glamorganshire; created July 23, 1660.—Sir John Aubrey, the sixth baronet, succeeded his father, Sir Thomas, Sept. 4, 1786; married, first, Mary, eldest daughter (and co-heir with her sister Emma, countess of Tankerville) of Sir James Colebrooke, of Gatton, in Surrey, from whom they derived large fortunes; and by her, who is deceas'd, had issue one son, John, who died in his infancy. Sir John married, secondly, Martha-Catharine, daughter of General Richard Carter, esq. of Chilton, in Bucks, eldest son and heir of judge Carter: this lady, with her sister, Julia, who died a minor, and unmarried, were co-heirs and only surviving issue of the said Richard Carter, esq. by Julia, his wife, daughter and sole heir of James Spilman, esq. and Helder, one of the former and co-heirs of the last Sir William Willy's, bart. of Farnham, in Cambridgeshire, and Canterbury, Kent. Sir John was appointed by his majesty, in July 1782, one of the lords of the admiralty; and in December 1783, one of the lords of the treasury, which he resigned in July 1789.—Motto, Ancistro, of the blood-royal of France, came into England with William the Conqueror, and is registered in the books of franchises and liberties, in the Chambers of London. William Aubrey, esq. second son to Sir Reginald, lord of Abermargr and Slough, married three daughters of William Gunter, by whom he had one son, Thomas Aubrey, esq. lord of Abermargr and Slough, who married Juenda, daughter of Tharhame ap Jno, lord of Commet, a man paternally descended from Brouham lord of Bercknock, which Brouham had thirty children. Many of his sons were lords of the provinces, and his daughter married to great princes; and the rest, that were not married, were religious, and are numbered among the saints, as our histories mention. William Aubrey, esq. and heir male of Thomas Aubrey, lord of Bercknock, Brenwood, and Bally, doctor of civil law, was a conspicuous ornament of his country in the reign of Edward VI. and during the two succeeding reigns. He was regius professor of law at Oxford, official principal and vicar-general in spirituals to the bishop of Canterbury, supreme judge of the royal army at St. Quintas, one of the council of the marches in Wales, a master in chancery; and, for the special favour of queen Elizabeth, he was admitted to her inner service, and made one of the masters of requests in ordinary. He was buried in St. Paul's cathedral, where was a handsome monument, with his bust, and under him his three sons and six daughters, with the arms of their wives and husbands, which, with the cathedral itself, was consumed in the great conflagration which happened Sept. 2, 1666. He died July 23, 1595, aged sixty-six years. His three sons were all knights.—Motto, Nemo bonum de super.—Family Seats, Llantrithyd, Glamorganshire; Chilton, Dorset, and Bercknock, all in Buckinghamshire; which last estate has paled, by several heirs female, from Nigel, who owned it at the conquest, to the Aubreys.

Description of the Bercknock Horn, now in the possession of Sir John Aubrey, bart.

King Edward the Confessor had a royal palace at Brill, or Breulh, in Bucks, to which he often retired for the pleasure of hunting in his forest of Brecknock. This forest, it is said, was much infected by a wild boar, which was at last slain by one Nigel, a huntsman, who presented the boar's head to the king; and, for a reward, the king gave to him one hundred of his land, called Derehyde, and a wood called Halewood, with the custody of the forest of Brecknock, to hold to him and his heirs, per annum coram, quod est charta præstàt forteræ. Upon this ground Nigel built a lodge, or mansion-house, called Berckfeld, in memory of the slain boar. For proof of this, in a large folio vellum book, containing transcripts of charters, and evidences relating to this state, (supposed to be written in or before the reign of Henry VI.)
rude delineation of the site of Borsfall-house and manor; and under it the figure of a man presenting on his knees to the king the head, the original horn, his breast end with silver, gilt, fitted with wreaths of leather, to hang about the neck, with an old brass seal ring, a plate of brass, with the sculpture of a horn, and several smaller plates of silver, gilt, with fleurs-de-lis, (supposed to be the arms of Lilicres, who intruded into this estate and office at or soon after the conquest,) has been all along considered among the curiosities of that ancient house or castle; and the arms are now to be seen in the windows, and in other parts. And what is still more remarkable, this very interesting memorial and instrument of ancient conveyance, and the curious plan of the manor, taken at this very time, by several heirs female, from the family of Nigel to that of Aubrey. The Borsfall horn and chartulary were, by permission of Sir John Aubrey, exhibited to the society of antiquaries by Mr. Southouse, member of the said society; who have caused to be engraved this very interesting memorial and instrument of ancient conveyance, and the curious plan of the manor, taken at the time of compiling the chartulary, as described by bishop Kennet. This horn is supposed to have belonged to the king or his forebears, and is of a dark-brown colour, variegated and veined like tortoise-shell: it is two feet four inches long on the convex bend, and twenty-three inches on the concave: the inside, at the large end, is three inches diameter; being perforated there to leave the thickness only of half an inch for about three inches deep; but further in it is thicker, being not so much, or nearly, perforated.—See the article Bos., vol. iii. p. 223.

MOSTYN, of Mostyn Hall, Flintshire; created Aug. 10, 1660.—Sir Thomas Mostyn, the fifth baronet, M.P. for the county of Flint, succeeded his father, Sir Peter Byrne, Feb. 12, 1770.—This family is supposed to have descended from the ancient house or castle of Borsfall, or to have come from Brittany, in France, where the name still is. Sir Nicholas Leicestifer, knt., was surnamed to Henry Lucy, earl of Lincoln, and constable of Cheleshe, about the year 1376.—Motto, Tu Dominum gloria mea. Thou, Lord, art my glory.—Family Seat, Tabley, near Knutsford, Cheshire.

WHELER, of Lemington Haltlang, Warwickshire; created Aug. 11, 1660.—The Rev. Sir Charles Wheeler, the seventh baronet, M.A. prebendary of York, and vicar of Lemington Haltlang, in Warwickshire, succeeded his brother, Sir William, in April 1799; married Lucy, one of the daughters, and at length co-heir, of the late right honourable Sir John Strange, master of the rolls, and had three sons and five daughters: Trevor, married Harriet, daughter of Richard Beraford, lord of Althorn, in Derbyshire, and has two sons, Francis, and four daughters, Harriet, Lucy, Maria, and Charlotte, all infants; Charles John, married Isabella, daughter of Clofo, esq. of Richmond, in Yorkshire, and has two sons, Edward and Charles John, and a daughter, Iabella; William, rector of Loddock, in Cornwall, unmarred; Penelope, wife of William Williames Bird, esq. of the Manor of Kenilworth, in Warwickshire; Jane, wife of George Dandridge, esq. of the Commandery, in Worcester; Sally, wife of Abraham Humey, esq. of Bilton Grange, in Warwickshire; Lucy, wife of the Rev. John Wife, second son of Matthew Wife, esq. of Lemington Priors, in Warwickshire; Sophia, married to the Rev. John Biddulph, second son of George Biddulph, rector of Althorn, in Derbyshire. All the daughters have issue.—This family is supposed to have been seated in Worcefeldhire as early as the reign of Edward II. Sir Charles, the second baronet, was colonel of a regiment of foot, governor of the Leeward Islands, and representative in parliament for the university of Cambridge for several years, 1661, having been formerly fellow of Trinity College; from which, with others, he was ejected, April 18, 1644, by the earl of Manchester, and had the honour to be one of the gentlemen intrusted to carry the plate of that university to king Charles I. He was in great distress. Trevor, his eldest son, major in his father's regiment of foot, died in the camp, near Cheltenham, Oct. 19, 1788. Admiral Sir Francis Wheeler, knt. third son of Sir Charles, was wrecked on the rocks of Scilly.
Scilly.—Motto, Fadce tenens, Even to the face.—Family Seat, Lemington Haifang, in Warwickshire.

LEE, of Hartwell, Buckinghamshire; created Aug. 16, 1660.—The Rev. Sir GEORGE LEE, the sixth baronet, born July 1767, rector of Hartwell, in the county of Bucks, and vicar of Stone; succeeded his brother, Sir William, Feb. 7, 1801.—This family had flourished long in this county previous to their advancement to the dignity of a baronet. It is stated, that they are a branch of the Leghs, of High Legh, and Lyme, in Cheshire; and that their immediate ancestor, retiring out of the way of the perfecution which the family underwent for taking part with Richard II. fettled in Buckinghamshire early in Henry IV's reign. Sir Thomas, the first baronet, married (to dupe the wills of Brown Williams, gentleman of great accomplishments, and at the reforation, for several years afterwards, as long as he lived, was returned to serve in parliament, and was much admired for his elegant speeches in the house of commons, where he was a leader in the debates. Sir William, the late baronet, was lieutenant-colonel of the 16th regiment of light dragoons, during the late war; and afterwards, exchanging into the 25th regiment of light dragoons, went, in May 1800, to join that regiment at Madras, where he died. —Motto, Per amrum invenire, True and becoming.—Family Seat, Hartwell, in Buckinghamshire.

SWINBURNE, of Capheaton, Northumberland; created Sept. 26, 1660.—Sir JOHN SWINBURNE, the sixth baronet, was born in 1672; succeeded his father, Sir Edward, in 1726; married Emma, daughter of Richard-Henry-Alexander Bennett, eqq. of Buckingham, in Kent, niece to Hugh duke of Northumberland, by whom he has a son, Edward, born in 1728, and several other children. This family takes its name from their ancient seat, Swinburne Castle, Northumberland, from which they claim atitle herebefore appertaining to the Umfravilles, barons of Prudham, of whom they held it. Some have efteemed them barons by tenure; but Sir William Dugdale has not noted them as such, though it is evident they had ample possessions, and were of equestrian dignity. John Swinburne, eqq. from his principles of loyalty, when the abbys and priories of Couton North, Carleton near Thirsk, and several other places in that county. Richard inherited a considerable estate in the parish of Nawton, from his brothers, William, of Lythe, and John, who had acquired in trade as a cloth-worker, in the reign of Elizabeth.—Family Seat, Beckingham, in Kent.

FAGG, of Willton, Suffolk; created Dec. 12, 1660.—The Rev. Sir JOHN FAGG, the sixth baronet, succeeded his father, Sir William, Nov. 14, 1751; married, Aug. 25, 1759, Anne, only daughter of Henry-John-William-Charles, decaeced; Sarah-Anne; John-Arnott, decaeced; Augusta; John-William-Thomas; Lucy; Jemina; and John-Charles.—Family Seat, Myffhol, near Canterbury, Kent.

FRANKLAND, of Thirskley, Yorkshire; created Dec. 24, 1660.—Sir THOMAS FRANKLAND, the sixth baronet, was born in September 1750; succeeded his father, Sir Thomas, Nov. 27, 1784; married, in 1775, Dorothy, daughter of William Smelt, eqq. niece of Leonard Smelt, eqq. subgovernor to his royal highness the prince of Wales; by whom he had issue, Henry, Robert, Sarah, Amelia, and Marianne, of whom only Robert survived, who was born July 1751.—This family is of great antiquity in Yorkshire, and it is probable that a Conqueror came over with it. They are the descendants of Julian, Sigga, Gilbert, William, and Robert, Frankland, or Frankland, as giving lands to the abbys and priories of Couton North, Carleton near Thirsk, and several other places in that county. Richard inherited a considerable estate in the parish of Nawton, from his brothers, William, of Lythe, and John, who had acquired in trade as a cloth-worker, in the reign of Elizabeth.—Family Seat, Great Thirskley Hall, near Thirsk, in the North Riding of Yorkshire.

LEGRAND, of Ganton, Yorkshire; created Dec. 29, 1660.—Sir JOHN LEGRAND, the sixth baronet, succeeded his father, Sir Digby, Feb. 4, 1773; married, June 22, 1782, a daughter of Henry Alton, of Alton, in Cheshire, eqq.—The family of Le Garde, which is of Norman extraction, became proprietors of Ganton, in Yorkshire, anno 1100, by the marriage of the heiress of that name, with whose descendants it still continues. —Motto, Per amrum invenire, True and becoming.—Family Seat, Ganton, near Scarborough, in Yorkshire.

BEDFORD, of Oxburgh, Norfolk; created Jan. 2, 1660.—Sir RICHARD BEDFORD, the fifth baronet, was born Aug. 23, 1767; succeeded his father Sir Richard, March 27, 1795; married, June 17, 1795, Charlotte-Jane, daughter of Sir William Jerningham, bart, by whom he has five children: Frances-Charlotte, born April 13, 1796; Matilda Mary, born April 6, 1797; Agnes-Mary, born 1798; Henry-Richard, born 1800; Charlotte-Eliza, born Jan. 5, 1802; and a son, born Sept. 3, 1803.—This is a family of great antiquity, and takes its name from a town in Suffolk; they have had the honour of knighthood many hundred years. Ogerus de Pegyey, a Norman, came into England with the Conqueror, and was one of the four knights of the lord Mallet, lord of the honour of Eye, in Suffolk, who gave him the manor of Bedingfield, in consequence of which he assumed the name of Bedingfield of Bedingfield. Sir Henry, distinguished loyalist in the civil wars, was the last baronet. After the reftoration of Charles II. he laid before that prince a calculation of the sufferings of the family, which appeared to be 47,1941. 3ls. 8d. His majesty replied, with concern, that it was too great for him to recompense. To which Mr. Bedingfield answered, that all he begged of his majesty was, that he might have quiet for the future, to which the prince assented.

BYRAM, of Bedingfield, in the North Riding of Yorkshire; created Dec. 3, 1660.—Sir EDMUND-MARK BYRAM, the seventh baronet, born Sept. 16, 1762; succeeded his cousin, Sir Rowland, Oct. 14, 1805.—Family Seat, Alton Hall, Yorkshire.

MONNOUX, of Wotton, Bedfordshire; created Dec. 4, 1660.—Sir PHILIP MONNOUX, the sixth baronet, succeeded his father, Sir Philip, April 17, 1805.—Family Seat, as above.

ANDERSON, of Broughton, Lincolnshire; created Dec. 13, 1660.—The Rev. Sir CHARLES ANDERSON, the seventh baronet, born Oct. 5, 1767; succeeded his father, Sir William, March 9, 1785; married, Dec. 15, 1802, the youngest daughter of the late Sir John Nelthorpe, bart. and has issue a son and heir, born Dec. 1804.—This family was originally from Scotland; they first settled in Northumberland, and from thence passed into Lincolnshire, where they must have passed a considerable estate. Sir Edmund, in 1582, was made lord chief justice of the common pleas, which office he held upwards of twenty-six years, to the time of his death, Aug. 11, 1605.—Family Seat, Kilwick Percy, in the East Riding of Yorkshire.

OSBORN, of Chickland, Bedfordshire; created Feb. 23, 1660.—Motto, De fisticio terrae, julem contemplans; Viewing the sun, I contemn all things beneath it.—Family Seat, Oxburgh, Norfolk.
11, 1660.—Sir George Osborn, the fourth baronet, a general of his majesty's forces, colonel of the 40th regiment of foot, and a groom of his majesty's bedchamber, was born May 19, 1642; succeeded his father, Sir Denmark, in 1723; married, first, in 1711, Anne, daughter of —Bannister, esq. by whom he has one son, John, M.P. for the county of Bedford, and colonel of the Bedford regiment of militia. Sir George married, secondly, Ann, daughter of Nicholas, esq. of Dunchurch, earl of Winchester and Nottingham.—Motto, Quammon in rebus inane, What folly in human affairs!—Family Seat, Chickfand Priory, in Bedfordshire.

Colleton, of London; created Feb. 18, 1660.—Sir James-Nassau Colleton, the fifth baronet, succeeded his cousin, Sir John-Snell, in July 1681. —This family is supposed to have entered England with William the Conqueror, from Normandy; for we find one family of his majesty's forces, colonel of the 40th regiment of militia. Sir George married, first, in 1771, Anne, daughter of a general of his majesty's forces, colonel of the 40th regiment of militia. Sir George married, secondly, June 6, 1787, lady Anne Windfor, daughter of Daniel Heneage Finch, daughter of Daniel Beaumont, and to their paternal arms,*viz. France armory, for the crest of the French inheritance; Theobald, the second, was archbishop of Paris; Louis, the third son, came to England, where he had the arms borne. They have been resident many years in Devonshire, and have expended large sums in the service of Charles I. and in recompence for his services, (in addition to the large possessions in America.—Family Seats, at Exeter, and at Exmouth, both in Devonshire.

Beaumont, of Stoughton Grange, Leicestershire; created Feb. 21, 1660.—Sir George-Howland Beaumont, the seventh baronet, succeeded his father, Sir George, in 1762; married Margaret, daughter of John Willes, esq. eldest son of lord chief justice Willes.—This family is descended, in a direct line, from Joachim de Beaumont, of the county of Estephen, in France, and from Thomas, who bore the same arms as now borne. The eldest son of Louis VIII. King of France, and maternally from Henry III. of England. Charles, younger son of Louis VIII. was called king of Jerusalem and Sicily. His second son, Louis, married Agnes, heiress of Beaumont, in France, and the sons of that marriage took the name of Beaumont, and to their paternal arms, *viz. France armory, for the crest of the French inheritance; theobald, the second, was archbishop of Paris; Louis, the third son, came to England, and was bishop of Durham. Henry, the fourth son, also seated himself in England, where he had the grants of many honours, and held various high employments in the state. He died in 1596. His son, John, third son of Beaumont, married Eleanor, fifth daughter of Henry Plantagenet, earl of Lancaster, grandson to Henry III. The eldest branch of his descendants ceased in the reign of Henry VII. The present baronet is descended from Thomas, second son of John, grandson of the above John lord Beaumont. Sir Thomas was one of the knights for Leicestershire in the first parliament of James I. was created a baronet Sept. 17, 1669, and afterwards created, 1672, vicount Beaumont, in Ireland. He was loyal to Charles I. and was obliged to compound for his estate. The English baronetage and Irish peerage both failed in the person of Thomas, who died in 1703. But from this branch of the family of Beaumont, the arms yield to the gown; or, war to peace.—Family Seat, Dunmow, in Essex.

Smythe, of Elche, Durham; created Feb. 22, 1660.—Sir Edward Smythe, the fifth baronet, succeeded his father, Sir Edward; married, Oct. 15, 1781, the daughter and heiress of Peter Holord, esq. of Wootton-Hall, Warwickshire, by whom he has one son, Edward, born in 1787.—Motto, Rej� fitter fidei, Ever true to the king.—Family Seats, the Hall, near Durham; Aiton Burnell, Shropshire; and Wootton Hall, Warwickshire.

Wilson, of East Bourne, Sussex; created March 4, 1660.—Sir Thomas-Maryon Wilson, the eighth baronet, succeeded his father, Sir Thomas, and was married, in Oct. 17, 1683, Elizabeth, daughter of Sir John Smith, captain James Smith, of the royal navy; and has issue a son, born April 10, 1684; and another son, born in January 1807.—This baronet is descended of an ancient family in Yorkshire, which hath spread itself into many branches. The first we find is Thomas, seated at Elton in Yorkshire, 1620, who bore the same arms as now borne.—Motto, Per legibus ac regibus, For law and custom.—Family Seat, Eltome, in the county of Sussex.

Read, of Barton, Berkshire; created March 4, 1660.—Sir John Read, the sixth baronet, born 1786; succeeded his father, Sir John, Nov. 18, 1789.—Of this ancient family, (which was originally of Morpeth, in Northumberland,) was John Read, esq. made sergeant at law, 1402; also Sir Robert Read, chief justice of the honor of Chester, who took the French king's arms yield to the gown; or, war to peace.—Family Seat, Shipton in Oxonshire, and Barton in Berkshire.

Broughton, of Broughton, Staffordshire; created March 10, 1660.—The Rev. Sir Thomas Broughton, the sixth baronet, succeeded his brother, sir Bryan, Jan. 16, 1766; married, in 1766, Mary, daughter of John Wicker, esq. of Halham, by whom he has a numerous issue; amongst whom are colnel Delvies, Broughton, who died in 1796, having married the eldest daughter of Philip Egerton, of Oulton Park, in Cheshire, esq. Maria, the eldest daughter; married—Trafford, esq. Elizabeth married John, William Clough, of Norton Conyers, in Yorkshire, esq. Henry-Delves, second son, in holy orders, married, June 15, 1807, the only daughter of John Pigott, of Bevere, in the county of Worcester, esq. Thomas-Delves, third son, married, in 1809, Mifs Rowlis Legh, heir of John-Rowlis Legh, of Adlington, in the county of Chester, esq. the youngest daughter married, in 1803, Capt. W. R. Broughton, of the royal navy. Sir Thomas married, fecondly, June 4, 1787, a lady, daughter of Other-Louis, fourth earl of Plymouth, who died Aug. 9, 1793; and, thirdly, in 1794, the relief of Scott Jackson, esq.—by a manuscript genealogy, in the possession of the present baronet, it appears that this family is descended from Delvies, of Delvies Hall, in Staffordshire, at the time of the conquest, one of which family was one of the squires to lord Audley, who took Sir Philip's lands and was prisoner at the battle of Poictiers, for which he had part of the arms borne by the present family granted to him. By the Broughtons they are descended from Richard de Vernon, fourth son of Hugo de Vernon, baron of Shipbrooke at the conquest; and by a pedigreed in the possession of the present baronet, it appears that all the other branches are at an end, or merged in other families; and that his name ought to be Vernon, and baron of Shipbrooke, if such a title, granted by the earls of Chester, could now be taken. There is an old castle in the pleasance-ground belonging to Sir Thomas, which is supposed to have been built in Edward III.'s reign, and which has for the support of the staircase six stone figures, of the Black Prince, lord Audley, and his bar- esquires. The first baronet was the eighteenth in descent from Richard de Vernon.—Family Seats, Broughton in Staffordshire, and Aytrrop in Lincolnshire.

Parsons, of Langley, Buckinghamshire; created April 9, 1661.—Sir Mark Parsons, the fourth baronet, succeeded his grandfather, sir William.—Residence, at Epmon.
CAYLEY, of Brompton, Yorkshire; created April 26, 1653.—Sir GEORGE CAYLEY, the fifth baronet, and president of the Philosophical Society at Manchester, succeeded his father, Sir George, in 1773; married, in 1795, a daughter of the Rev. George Walker, of Nottingham. This family is of great antiquity in the county of Norfolk; for, by the rolls in the Pipe-office, Adam de Cailli is mentioned, King John, to have accounted five pounds for licence to plead before the king, touching the dowry of the wife of Michael de Poings. From this Adam descended Thomas de Cailli, who lived in the reign of Edward I.—Family Seat, Brompton, near Scarborough, Yorkshire.

COOKE, of Wheatley, Yorkshire; created May 10, 1661.—Sir GEORGE COOKE, the seventh baronet, succeeded his father, Sir Bryan, March 4, 1766; married, first, in June 1776, Frances, sister of the late Sir William Middleton, of Belfay Castle, Northumberland, bart., and by her had issue three sons, one of whom is deceased, and three daughters; Louisa-Lucy, fifth daughter, married, in 1795, a daughter of the Rev. George Waller, has issue three sons; Harriet, third daughter, married, first, in June 1770, Frances, sister of the late Sir William Stanley, succeeded his father, Sir Bryan, March 4, 1766; married, in 1791, Clara, daughter of John de Gallars de la Barnardine, of Aujou, in France; by whom she has issue, James, born Feb. 12, 1793; Clara-Anna-Martha, Feb. 7, 1794; Agatha-Catherine, Aug. 12, 1795; Thomas-Charles, Oct. 5, 1796; Augustus-George, Jan. 24, 1799; William-Evibus, Jan. 21, 1809. Eustace, a noble Norman, was the first to England with William the Conqueror; the elder was Serlo de Burgo, who built the castle of Knareborough, and died without issue. John Monoculus, or the One-eyed, the second son, heir to his brother, had three sons; Pagan, who died without issue; Eustace; and William. These three brothers were living in 1133, and were with Stephen, Earl of Pembroke, to the royal court in Gloucestershire. From Eustace, the eldest surviving son, descended Sir James, the first baronet.—Family Seats, Axwell, Whitehough, and Greenacott, all in the county of Durham.

ASHBURNHAM, of Bromham, Suffolk; created May 15, 1661.—Sir WILLIAM ASHURNHAM, the fifth baronet, succeeded his father, the right reverend Sir William Ashburnham, lord bishop of Chester, Sept. 4, 1773; married Anne, daughter of the Rev. Francis Woodgate, of Monmouth, county of Suffolk, by whom he has issue; of whom Denny, third son, married, Feb. 27, 1802, the relict of T. F. Bancroft, esq. and the eldest daughter married, in December 1804, James-Eldridge West, esq., and the eldest daughter married, in the county of Durham. Serlo de Burgo, who built the castle of Knareborough, and the head of Serlo de Burgo, which was occasioned by the father dividing his estate between his two sons, Leland and Adam. To the first was left Aldeleigh, and to the second, from which the line of that name descended, to the father he gave Thake, in Staffordshire.—Family Seat, Hooton, in Cheshire.

STANLEY, of Hooton, Cheshire; created June 17, 1661.—Sir THOMAS STANLEY, the seventh baronet, succeeded his brother, Sir Maffey, in 1803; married, Jan. 1805, Miss Haggerston, daughter to Sir Carnaby Haggerston, bart., of Haggerston Castle, Northumberland, and niece to Mrs. Fitzherbert. The family of Stanley is of such antiquity, that it would be endless to trace their original farther than their taking that surname, which was occasioned by the father dividing his estate between his two sons, Leland and Adam. To the first was left Aldeleigh, and to the second, from which the line of that name descended, to the father he gave Thake, in Staffordshire.—Family Seat, Hooton, in Cheshire.

WILLIAMS, of Penrhyn, Carnarvonshire; created June 17, 1661.—Sir ROBERT WILLIAMS, the ninth baronet, born July 20, 1741; succeeded his father, Sir Hugh, Aug. 19, 1794; married, in June 1799, Ann, second daughter of the Rev. E. Hughes, of Kimmell, in Cardiganshire; by whom he has Harriet-Georgina, born June 4, 1802; Richard-Bulkely, born Sept. 25, 1801; and a second daughter, born Sept. 3, 1803. Sir Robert was elected representative in parliament for Carnarvonshire in 1799, 1795, 1802, 1806, and 1807. This family is lineally descended from Marchudd ap Cynan, lord of Abergeleu, in Denbighshire, of one of the fifteen tribes of North Wales, who lived in the time of Merfyn Frych, king of Man, being his brother's son. Merfyn married Efyth, the daughter and heir of Conon Tindethwy, king of the Britons. His povertv was wife and disdret men, in all their ages; and many of them were learned in the laws in the time of the kings and princes of Wales, and were judges; as Morgenen ap Gwydr, and Cynnerth his son, whose laws-book is yet extant, is the principal of all that remains. Ednyfed Fycham, who in the year 849. Of him was descended Ednyfed Fycham, who being general of the prince's host, was sent to the marches, to defend the frontier, and commanded the prince's host (Llewelyn ap Iorwerth), was sent to the marches, to defend the frontier, and afterwards vixual of the navy, and member of parliament for Hatfield.—Family Seat, Bromham, in Suffolk.

GLYNNE, of Bletfer, Oxfordshire; created May 20, 1661.—Sir STEPHEN-RICHARD GILLYN, the eighth baronet, born in May 1780, and immediately became baronet, being posthumous and only child of the reverend Sir Stephen, the last baronet; married, April 11, 1806, the honorable Mrs Neville, sister to Sir Richard-Aldworth lord Braybrooke, by Catharine, sister to George marquis of Buckingham, knight of the garter; and has issue a son, born August 1807.—This very ancient family is descended from Cilmin Droed-tu, of one of the fifteen tribes of North Wales; he lived in the time of Merfyn Frych, king of Man, being his brother's son. Merfyn married Efyth, the daughter and heir of Conon Tindethwy, king of the Britons. His povertv was wife and disdret men, in all their ages; and many of them were learned in the laws in the time of the kings and princes of Wales, and were judges; as Morgenen ap Gwydr, and Cynnerth his son, whose laws-book is yet extant, is the principal of all that remains.
HERALDRY.

Baronets.

London, Pub'd as the Act directs July 15, 1811.
TREVELYAN, of Nettlecom, Somersetshire; created Jan. 24, 1661.—Sir John Trevelyan, the fourth baronet, succeeded his father, Sir George, Dec. 28, 1768; married Louisa Marianna, daughter and co-heir of Peter Symond, esq., merchant, in London; and by her, who died Aug. 17, 1805, has four sons and one daughter: John, who married, Aug. 17, 1811, Maria, daughter of Thomas Spencer Wilson, of Charlton, in Kent, bart. (higher to Margaret, wife of Charles Lord Arden, and Jane, wife of the right honourable Spencer Perceval,) by whom he has a son, Walter-Calverley, and a daughter, Maria-Anne; and a third daughter, who married Harriet, third daughter of Sir Richard Neave, bart. by whom he has two children; Willoughby, who died in 1795; Louisa.—This ancient family takes its name from Trevilyan, in the parish of St. Vephe, near Foxey, in Cornwall; of which, and in that county, they were anciently possessed, at or soon after the conquest.—Motto, Time trieth troth.—Family Seats, Nettlecom, near Taunton, in Somersetshire; and Lecnhall, near Honiton, in Devonshire.

GAGE, of Hengrave, Suffolk; created July 15, 1662.—Sir Thomas Gage, the seventh baronet, was born 1781; succeeded his father, Sir Thomas, in November 1798.—This family is of Norman extraction, and descends from De Gage, or Gage, who founded king William I. in his expedition to England, and after the conquest was rewarded with large grants of lands in the forest of Dean, in Gloucestershire; adjacent to which forest he fixed his residence at Clerewall, otherwise Cleerwall. He also built a large house at Cirencester, where he died, and was buried in the Abbey; and his posterity reigned for many generations, in credit and esteem, of whom there were barons in parliament in the reign of Henry II. Sir John, one of his descendants, was a distinguished character in the reign of Henry VIII. and employed in many public appointments in that and the two succeeding reigns. The dignity of baronet was first employed in many public appointments in that and the two succeeding reigns. The dignity of baronet was first

YONGE, of Culliton, Devonshire; created Sept. 26, 1661.—The Right Hon. Sir George Yonge, the fifth baronet, K.B., F.R.S. and a privy councilor, succeeded his father, Sir Ralph, Jan. 8, 1743; married, in 1777, Judith Noel, fifth to Thomas, the present vicount Wentworth, by whom he has one daughter, Anne-Isabella, born May 17, 1792. Sir Ralph has represented the county of Durham in the present and four preceding parliaments. Lapal of this line in England was Mary, daughter of Sir Ralph de Windsor, so called from his being castellan or governor of the castle of Windfor; he had two sons, William, from whom the lords Windfor are descended, and Gerald, from whom are the Carew and Fitz-Gerald. Gerald, the younger son, was castellan or governor of the castle of Pembroke, in Wales, and in great favour with Henry VII. and married Nell, daughter of Prince Edward, prince of South Wales, whose dowry was the castle of Carew. By this lady he had three sons, William, Maurice, and David, who was bishop of St. David's in 1796. From Maurice Fitz-Gerald descends the noble family of Kildare, in Ireland.—Motto, Nil conscireendi, Conscious of no guilt.—Family Seat, Haccomb, near Chudleigh, in Devonshire.

MILBANKS, of Halnaby, Yorkshire; created Aug. 7, 1661.—Sir Ralph Milbanke, the sixth baronet, succeeded his father, Sir Ralph, Jan. 8, 1743; married, in 1777, Judith Noel, fifth to Thomas, the present vicount Wentworth, by whom he has one daughter, Anne-Isabella, born May 17, 1792. Sir Ralph has represented the county of Durham in the present and four preceding parliaments. Ralph of this line in England was Mary, daughter of Sir Ralph de Windsor, so called from his being castellan or governor of the castle of Windfor; he had two sons, William, from whom the lords Windfor are descended, and Gerald, from whom are the Carew and Fitz-Gerald. Gerald, the younger son, was castellan or governor of the castle of Pembroke, in Wales, and in great favour with Henry VII. and married Nell, daughter of Prince Edward, prince of South Wales, whose dowry was the castle of Carew. By this lady he had three sons, William, Maurice, and David, who was bishop of St. David's in 1796. From Maurice Fitz-Gerald descends the noble family of Kildare, in Ireland.—Motto, Nil conscireendi, Conscious of no guilt.—Family Seat, Haccomb, near Chudleigh, in Devonshire.

SMITH, of Hill Hall, Efl:ex; created Nov. 28, 1661.—Sir William Smith, the seventh baronet, colonel of the West-Efl:ex militia, succeeded his father, the reverend Sir William, Jan. 25, 1777; married, March 27, 1779, Anne, only daughter of John Wyndham, of Wagen, in Yorkshire, esq., who assumed the name of Bowyer; by whom he has had five sons and two daughters: William, born June 4, 1782, died in 1795, unmarricd; John, June 8, 1782; Edward, March 1, 1785; Joseph, May 19, 1792; Charlotte, Dec. 20, 1790; Caroline, April 12, 1796.—Family Seats, Hill Hall, and Harthall Hall, both in Efl:ex, Vol. IX. No. 520.

MONCK, (late Middleton,) of Belfay Castle, Northumberland; created Oct. 24, 1662.—Sir Charles Miles-Lambert Monck, the fifth baronet, born April 7, 1779; succeeded his father, Sir William Middleton, July 7, 1793; married, Sept. 11, 1834, Louisa-Lucia, fifth daughter of Sir George Cooke, bart. of Wheatley, in Yorkshire; and has issue, Charles-Atticus, born at Athens, July 17, 1835; and Louisa, born Feb. 25, and died Aug. 14, 1807. Sir Charles, in 1799, changed his name from Middleton to Monck, in compliance with the will of his grandfather, Laurence Monck, esq.—Family Seat, Belfay Castle, Northumberland.

GRAHAM, of Norton-Conyers, Yorkshire; created Nov. 17, 1662.—Sir Bellingham Graham, the seventh baronet, succeeded his father, Sir Bellingham, April 13, 1796.—The family of Graham, otherwise Graume, of Grange, is descended from Walter, lord high steward of Scotland, whose second son, Robert, lord high steward of Scotland and earl of Strathern, succeeded David Bruce as king of Scotland. David, his third son, was duke of Strathern, and earl of Caithness. The branch of this noble family from whom Sir Bellingham is descended, came into England with James I. —Family Seats, Norton Conyers in the North Riding, and Kippax in the West Riding of Yorkshire.
TANCRED, of Boroughbridge, Yorkshire; created Nov. 17, 1662.—Sir THOMAS TANCRED, the sixth baronet, was born in 1750, succeeded his father, Sir Thomas; married, their fourth daughter, daughter of the Rev. Offley Crowe, of Muxton, in Staffordshire. This family descended from Richard, who, after the conquest, possessed lands in Boroughbridge, where still remains the ancient family house. The name has been variously written, as Tanckard; Tankard, after the conquest: was possessed of lands in Boroughbridge; born Aug. 26, 1753; succeeded his father, Sir Richard, in 1756. This ancient family is descended from William de la Brooke, who was master of Leighton in Cheshire near 600 years ago, living there in good repute, 33 Hen. III. His eldest daughter, married, at Calcutta, March 6, 1805, Walter Harwar, esq., son of Sir Walter Harwar, bart.—D'Oyley, of Shottisham, Norfolk; created July 29, 1663.—Sir JOHN HADLEY D'OYLEY, the sixth baronet, was born in 1750; succeeded his father, Sir Hadley, in June 1753; married, in March 1785, the daughter of William, Coates, of Calcutta, esquire, who died Sept. 6, 1803, by whom he had issue. His second daughter, married, at Calcutta, March 6, 1805, Walter Harwar, esq., youngest son of Sir Walter Harwar, bart.—D'Oyley, of Shottisham, is a younger branch of the ancient and honourable family of this name in Oxfordshire. The history of both families is the same, to the time of Henry III. when John, son of Roger, was granted the patronage of the church of Oxford, held in the time of William D'Aubigny. His descendants were of considerable note, in several generations. Sir William, the first baronet, was knighted by Charles I. for his gallant behaviour in the service of Gustavus Adolphus, of Sweden. He represented the county of Norfolk in the convention-parliament, and was among the most zealous for the king's reformation.—Motto, Do not yll, quoynt D'Oyle.—Present Residence, Calcutta, in Bengal.

PENNYMAN, of Ormsby, in Cleveland, Yorkshire; created Feb. 22, 1663.—Sir PEnNYMAN, the eighth baronet, was born in 1750; succeeded his father, Sir James, in March 27, 1803. This family, it is said, came from Saxony before the conquest, and first settled in Kent. The name was originally written Penne-man, signifying "the chief-head-man." The pedigree of Sir William Pennyman is not now perfectly known, the pedigree being lost in the civil wars, wherein the family were great sufferers for their loyalty to Charles I. Sir William Pennyman, of Ormsby, esquire, grandfather to the first baronet, is not now perfectly known, the pedigree being lost in the civil wars, wherein the family were great sufferers for their loyalty to Charles I. Sir William Pennyman, of Ormsby, in Yorkshire, though of a younger branch, was the first baronet of the family, to be created by Charles I. He was in great favour with that prince, having, in the civil wars, maintained two troops of horse, and one company of foot, at his own expense. He died without issue, Aug. 22, 1643, and that title became extinct. Sir James, son and heir of James, uncle of Sir William Pennyman, bart., aforesaid, was a colonel in the army of Charles I., and was knighted in the field. Both father and son were great sufferers for their loyalty, and the latter was advanced to the dignity of a baronet after the restoration.—Motto, Fortiter et fiddiet, Courageously and faithfully. Family Seats, Ormsby, and Thornton, both in Cleveland, in the North-Riding of Yorkshire.

TEMPEST, of Tong, Yorkshire; created May 29, 1664.—Sir HENRY TEMPEST, the fourth baronet, was born in Jan. 1753; succeeded his father, Sir Henry, in the same year; married, Jan. 1791, to Miss S. Pittom,
SMYTH, of Upton, Essex; created March 30, 1665. —Sir GEORGE-HENRY SMYTH, the fifth baronet, succeeded his father, Sir Robert, in April 1802. —Family Seat, Berechurch Hall, Essex.

SHAW, of London; created April 15, 1665. —Sir JOHN-GEORGE SHAW, the fifth baronet, was born July 25, 1761; succeeded his father, Sir John, in 1779; married, March 9, 1782, Theodora-Margaret, third daughter of John, second lord Monson, by whom he was married, March 9, 1782, Theodora-Margaret, third daughter of John, second lord Monson, by whom he was married, March 9, 1782. —Family Seat, Rectory, Berechurch Hall, Essex.

DUCKFIELD, of Duckfield Hall, Cheshire; created June 16, 1665. —Sir NATHANIEL DUCKFIELD, the fifth baronet, late lieutenant-colonel of the Windsor Foresters, succeeded his cousin, Samuel, May 18, 1678; married, in 1783, a sister of John Ward, esq., of Squires in Kent, esquire; by whom he has had, Samuel-George; John-Lloyd; Catherine; Henry-Robert; Charles-Egerton; and two daughters, who died young. —Motto, Vincit qui petit. Hoc genus in toto. —Family Seats, Eltham Lodge, Kent; and Cotthall, Suffolk.

LAWS, of Brough, or Burgh, Hall, Yorkshire; created July 6, 1665. —Sir JOHN LAWS, the fifth baronet, was born Sept. 13, 1744; succeeded his father, Sir Henry, in Oct. 1781; married, first, Aug. 1, 1768, Elizabeth, second daughter of William Scarbrough, of Scarbricke in Lancashire, esquire, who died June 10, 1801, by whom he had issue, 1. Annsa, born May 26, 1769, married, in 1789, Thomas Strickland, of Sizergh, esquire; 2. Elizabeth, born July 10, 1770, married, Jan. 9, 1799, John Wright, of Kielved in Essex, esquire; by whom he has had nine children, five of which are living; namely, John, Eliza, William, Emma, and Henry; and 3. Henry, who died an infant. —Sir John married, secondly, Maria, eldest daughter of Miles Stapleton, esquire, and lady Gerry. —The family from whom this baronet is descended, were well known in the very early deeds; and evidences of the same papers, as appears by inquisitions then taken. The family Seat, Acomb, near York.

BURDET, of Burthwaite, Yorkshire; created July 29, 1665. —Sir CHARLES-WYNDHAM BURDET, the fifth baronet, a captain in the 30th regiment of infantry, born July 25, 1771; succeeded his father, Sir Charles, July 19, 1803. —From a very ancient pedigree of this family, in the possession of the present baronet, it appears that they, as well as the Burdets of Bramscote, are descended from Hugo de Burde; but the date being obliterated, the elder branch is not certainly known. —Family Seat, Acomb, near York.

OGLANDER, of Nunwell, in the Isle of Wight; created Dec. 12, 1665. —Sir WILLIAM OGLANDER, the fifth baronet, was born Sept. 13, 1769; succeeded his father, the late Sir William, Jan. 4, 1806; and is M.P. for Bodmin. —Richard de Okelande, the first of this family in England, came over from Caen, in Normandy, with William the Conqueror, and settled at Nunwell in the Isle of Wight; which he and his successors, in an unbroken male line, have, from that time to the present, made the place of their residence; and we find of them, in the very early deeds and evidences of the place, where the kings of Wessex, in paying their tribute, had their place of residence. —Motto, Serrena mania vitae. —Family Seat, Nunwell, in the Isle of Wight; and Farham, Dorsetshire.
Smith, rector of Burnham, Norfolk, (who died in Sept. 1800,) by whom he has one son, Roger, born Feb. 22, 1778, and six daughters; Sophia; Everilda, wife of the Rev. Thomas Burnard; Anna-Maria, married, May 13, 1803, John Gifford, surgeon, of Burnham, Norfolk; Louisa; Catherina; Frances, who died 1802; Caroline, married, Oct. 22, 1805, James Morris, of Hadley, in Middlesex, esquire.—This ancient family claimed Caroline, married, Oct. 22, 1805, James Morris, of Hadley, esquire was Nicholas Martin, who left only two ancient封 was Admiston Hall, in Dorsetshire, whose daughter, his heirs. Richard Martin, a younger brother of this family, removed to Long Melford in the reign of Richard II.—Motto, Initium sapientiae est timor Domini, the fear of the Lord is the beginning of wisdom.

Family Seat, Burnham, in Norfolk.

HANHAM, of Wimbourne, Dorsetshire; created May 24, 1667.—Sir JAMES HANHAM, the seventh baronet, succeeded his father, the Rev. Sir James, March 11, 1806; married, April 16, 1793, a daughter of lieutenant Pike, of the royal navy.—This family came originally out of Gloucestershire, and are denominated from Hanham, in that county. Peter de Hanham is the first we find mentioned, who lived in the thirteenth century.

—Deans' Court, near Wimbourne, in Dorsetshire; and Netton Park, in Wiltshire.

MOSTYN, of Talacre, Flintshire; created April 28, 1670.—Sir Piers MOSTYN, the sixth baronet, was born Dec. 23, 1749; succeeded his father, Sir Edward, in March 1755; married, in 1780, Miss Slaughter; and has issue Edward, born April 10, 1785.—This family is a branch of the Molynts of Mostyn, already treated of, being descended from Pyers Mostyn, of Talacre, esquire, second son of Richard ap Howel, of Mostyn.—Family Seats, Talacre, and Greenfield, both in Flintshire.

CROFT, of Croft Castle, Herefordshire; created Nov. 18, 1671.—The Rev. Sir HERBERT CROFT, the fifth baronet, B.D. succeeded his cousin, Sir John, in 1797; married, first, Sophia, daughter and heir of R. Cleeve, esq. by whom he had three daughters, Sophia, Mary-Anne, and Elizabeth; secondly, Elizabeth Lewis, sister of Henry-Greywood Lewis, of Malvern Hall, in Warwickshire, esquire, and of Sarah counts of Dyffart.—In the reign of Edward IV. Sir Richard Crot, of Croft Castle, at the battle of Tewkesbury, took prince Edward, eldest son of Henry VI. prisoner; whom, upon proclamation and promise of safety for his person, he produced, but he had no hand in the barbarous murder of that prince.—Motto, Ego sum eideri, To be rather than to seem.

Family Seat, Dunton Park, Berks.

ST. AUBYN, of Clowance, Cornwall; created Dec. 11, 1671.—Sir John ST. AUBYN, the fifth baronet, M.P. for Helston in Cornwall, F.R. and L.S. was born in 1751; succeeded his father, Sir John, in 1772.—Family Seats, Clowance, in Cornwall; and Woodburn Farm, Weybridge, Surrey.

EDEN, of Weel Auckland, Durham; created Nov. 13, 1672.—Sir John EDEN, the fourth baronet, succeeded his father, Sir Robert, June 23, 1753; married, first, June 26, 1721, Sarah daughter of John Thomas, son, of Kirby Hall, Yorkshire, esquire, who died without issue, March 12, 1766, aged 23. Sir John married, secondly, April 9, 1767, Dorothea, sole daughter of Peter Johnson, esq. recorder of York, by whom he has issue, Dorothy, born March 13, 1768, married, in Nov., R. E. Duncum, esquire, died March 7, 1775; Caroline, born Dec. 6, 1767, married, Feb. 10, 1771; Elizabeth, Jan. 6, 1772, died May 20, 1780; Caroline, born March 1773, died in April 1803; Robert, Oct. 25, 1774; Dulciabella, March 25, 1777; Morton-John, June 20, 1778; Anne, Aug. 31, 1779; Emilius, Nov. 9, 1780; Eleanor, Dec. 26, 1781; Harriet, April 15, 1783, married, Nov. 15, 1800, vicount Aghrim, eldest son of Frederic, ninth earl of Athlone, in Ireland.—Motto, Si fiat prudencia, If but prudence may be but prudence.—Family Seat, Windlestone, in the county of Durham.

BLACKETT, of Matson Hall, Newcastle-upon-Tyne; created Dec. 12, 1675.—Sir EDWARD BLACKETT, the sixth baronet, succeeded the late Sir Edward, Feb. 3, 1804; married, Aug. 8, 1801, a daughter of Benjamin Keane, esquire, of Welfton Lodge, Cambridge-shire, and has issue, William-Douglas, born Oct. 1803, died March 1807; and another son, born Feb. 1804; and another, Feb. 11, 1808.—This family has been seated for a long time in Northumberland, making several considerable alliances, and spreading into various branches. Sir John Blackett, ancestor of the present baronet, was knight of the shire for the county of Lancaster in the reign of Henry VI. from whom descended William, the first baronet, who by the produce of his mines and collieries acquired a very great fortune, and was member for Newcastle-upon-Tyne in several parliaments.—Motto, Nous travaillerons en loyauté, We will labour in hope.—Family Seat, Manton Hall, in Northumberland.

CLARGES, of St. Martin's-in-the-Fields, Middlesex; created Oct. 20, 1724.—Sir Thomas CLARGES, the fourth baronet, succeeded his father, Sir Thomas, Dec. 1724.—Family Seat, Atton, near Stevenegue, Herts.

WILLIAMS, of Eltham, Kent; created Nov. 2, 1674.—Sir EDMUND WILLIAMS, the seventh baronet, succeeded his father, Sir Edward, July 12, 1803.—This baronet is descended from the ancient family of Williams, of Tallulyn, in Brecknockshire, which is said to be serviceable to king John, against his rebellious barons, that he gave them for an addition to their arms, as a high mark of his esteem, a stag bearing the crown of England between his horns. Sir Thomas, the first baronet of this family, was so created in consequence of his faithful adherence and services to Charles II., and was physician to Charles II. and his brother, James II.

—Motto, Virtus incumba honori, Virtue reposes upon honour.

—Family Seat, Guernalt Lodge, in Brecknockshire.

FILMER, of Eaft Sutton, Kent; created Dec. 24, 1674.—The Rev. Sir EDMUND FILMER, the sixth baronet, succeeded his brother, the Rev. Sir Beverilam, Dec. 29, 1802; married, in May 1756, Annabella-Chris- tiana, eldest daughter of Sir John, the fourth baronet, and her ladyship's first wife, Annabella, daughter of William Gough, esquire, and of Sarah counts of Dyffart, by whom she has issue, William, in holy orders, vicar of Abbot's Langley, Herts, married Mifs Porter, and has issue; Mary, married, July 13, 1796, Sir John-Muggrave Chardin, bart. of Eden Hall, Cumber land, and has issue three sons and one daughter; William, in holy orders, rector of Lower Heyford, Oxfordshire, unmarried; Edmund, late captain in the army, married Mifs Sccone, and has issue six daughters; Anne, unmarried; Robert; Francis, in holy orders, rector of Crudnale, in Kent, married, Aug. 25, 1806, Mary-Anne, second daughter of the reverend Henry-Jack son Cloke, rector of Bentworth.—This family originally wrote their name, Finmore, Fylmcre, Pharmacy,how, of Filmore, in the reign of Edward III., and were seated in Kent, at a place called Filmore, where they were poss eovers of the manors of Herli, and divers lands.—Family Seat, Eaft Sutton, in Kent.

MORE, of More Hall, Lancashire; created Nov. 22, 1675.—Sir WILLIAM MORE, the fifth baronet, succeeded his father, Sir Joseph-Edmund, March 29, 1742. His eldest daughter, Eliza, born May 23, 1665, married, August 29, 1705, John Thomas, of Horton Lodge, in Surrey, esquire.—This family of More, or De la More, is of great antiquity, having been possessed of More and Bank Hall, Lancashire, for upwards of twenty generations, as appears, as well by divers ancient deeds remaining in the family, as by the

Baronets.
near Kilkenny, in Ireland.

—Sir the fourth baronet, colonel of Thomas Dyke, possession for many ages.—Family Seat, Duxbury, near speech he made in the house of commons, reflecting rah, youngeft daughter of John Philips, esq. of the leave the country, with the loss of his property.—Mot commencement of the troubles was elected a member of ronet, now extinct.—Family Seat, Kilcooley Abbey, near Kilkenny, in Ireland.

HEAD, of Hermitage, near Rochefier, in Kent; created June 19, 1676. —The Rev. Sir John HEAD, the feventh baronet, M.A. succeeded his father, Sir Edmund, Nov. 24, 1796; married, Oct. 8, 1801, Mifs Walker, of Ruffel Place, Middlefex, and has a fon, born in Feb. 1805.—This family is of great antiquity in Kent, and took the name of De Hede, from the ancient port now called Hithe, which was formerly called de Hede. One of this family was Hamo de Hede, who, in 1391, was bishop of Rochester, and confelior to Edward II.—The late baronet, Sir Edward, fettled as a merchant, in Charlefon, South Carolina, where he was chosen prefident of the court of trade and commerce; and at the commencement of the troubles was elected a member of the American congress, but no motives could induce him to accept the situation; he was therefore obliged to leave the country, with the los of his property.—Motto, Study quiet.—Family Seat, Great Hermitage, near Rochester, in Kent.

HOSKYNs, of Harwood, Herefordshire; created Dec. 18, 1676.—Sir Hangerford Hoskyns, the seventh baronet, born in July 1776; fucceeded his father, Sir Hungerford, in July 1802, married, Aug. 5, 1803, Sarah, youngest daughter of John Phillips, esq., of a fon, born, near Stockport, in Cheshire, by whom he had a fon and heir, born Sept. 19, 1804.—John Hoskyns, of Monkton, in Herefordshire, esquire, was the father of Sir Mr. Sergeant Holkyns, famous for his wit, who was committed to the Tower by James II; he made a speech he made in the house of commons, reflecting upon mercenary Scottish favourites.—Family Seats, Morehampton Park, and Harwood, in Herefordshire.

STANDISH, of Duxbury, Lancashire; created Feb. 8, 1676.—Sir Frank Standish, the third baronet, fucceeded his grandfather, Sir Thomas, Dec. 13, 1676.—This family is of great antiquity, being denominated from the lordship of Standish, in Lancashire, in their possession for many ages.—Family Seat, Duxbury, near Chorley, in Lancashire.

DUKE, of Horhem, Sussex; created March 3, 1676.—Sir Thomas Dyke, the fourth baronet, colonel of the Weft Kent militia; fucceeded his father, Sir John Dixon, in May 1803.—This family was seated at Dykesfield, in Cumberland, before the Norman conquest, but removed to Wardale, or Wardhale, in that county. A branch of the family very early removed into Suffolk, where they have ever since been seated at Henfield and other places; another branch lived, for several generations, at Cranbrook, in Kent, of which was Reginald de Dike, high sheriff of that county, 29 Edw. III. from whom descended Sir Thomas, the first baronet.—Family Seat, Lullingstone Castle, in Kent.

COTTON, of Cumbersm, Cheshire; created March 29, 1676.—Sir Robert Cotton, the fifth baronet, fucceeded his father, Sir Lynch-Salubury, in 1775; married Frances, daughter of James Ruffel Stapleton, esq. by whom he had 3 children: 1. Robert-Salubury, who died about 1798; 2. Stapleton, a major-general in the army, and lieutenant-colonel of the 14th regiment of dragoons; who married, Jan. 1, 1801, lady Anna Maria Clinton, daughter of the late, and heir of the present, duke of Newcastle; and by her, who died May 31, 1809, he has issue; William; Lyndall, married, Jan. 10, 1792, Robert vicount Kilmorey; Fe nebole, died in Dec. 1786; Heffer-Sophia, married, Jan. 1803, Sir Henry Mainwaring, bart. of Over Power, in Cheshire.—This ancient family was seated near Hodnett, in Shropshire, before the conquest. Sir Hugh Cotton, Knt., in the reign of King John, married a daughter of Hammond Tilty, esq., and after many descents lived Sir Robert, who was knighted at the restoration of Charles II. and afterwards created a baronet; he served in parliament for Cheshire thirty-six years.—Family Seats, Cumbermere, Lee, and Newhall, in Cheshire; Llwyneny, Cotton Hall, and Beraign, in Denbighshire.

POOLE, of Poole, Cheshire; created Oct. 25, 1677.—The Rev. Sir Henry POOLE, the fifth baronet, succeeded Sir Ferdinand, in title and estate, June 8, 1804.—This family is very ancient, and the title of many eminent branches; as the Poles of Devonshire, and others. They are denominated from the lordship of Poole, in Wirral hundred, in Cheshire; where, as Camden observes, they lived in a flourishing condition for many years. Robert Pull, alias POOLE, alias De La POOLE, was lord of Barretspool, 8 Edward I.—Family Seats, Poole, in Wirral, Cheshire; and Hooke, near Lewes, in Sussex.

OXENDEN, of Dene, Kent; created May 8, 1678.—Sir Henry Oxenden, the seventh baronet, succeeded his father, Sir Harry, June 15, 1803; married, June 29, 1735, Mary, daughter of colonel Graham, of Stonehouse, near Canterbury; and has issue two daughters: Mary, born 1794; and another, born Sept. 1804; and five sons: Henry, born 1755; George; Montagu; Charles; and Graham.—The family of Oxenden have been resident in Kent, from the reign of Edward III. Solomon Oxenden being the first mentioned in the several pedigrees of it; whole near relation, Richard Oxen den, was prior of Chrift Church, Canterbury, in that reign.—Family Seats, Wingham, and Broome Houle, both in Kent.

DYER, of Tottenham, Middlefex; created July 6, 1678.—Sir Thomas-Richard-Swinnerton Dyer, the sixth baronet, a lieutenant-colonel in the army, and lieutenant-colonel of the 14th regiment of foot, fucceeded his father, Sir John-Swinnerton, in 1808.—Family Seat, Spain's Hall, in Essex.

BECKWITH, of Aldborough, Yorkshire; created April 15, 1681.—Sir Jonathan Beckwith, the fourth baronet, fucceeded the late Sir Marmaduke.—This family is descended from Hugo de Malebif'e, who flourished in the reign of king Stephen. His descendants changed their name to Beckwith in the reign of Edward III.—Motto, Faire en bien, To enjoy innocently.—Family Seats, Aldborough, Walburne, and Allerton Gleadrow, all in Yorkshire.

BUNBURY, of Bunbury, Cheshire; created March 29, 1681.—Sir Thomas-Charles Bunbury, the fifth baronet, was born May 1747; fucceeded his father, the reverend Sir William, Jan. 11, 1754; married, June 12, 1765, lady Sarah Lennox, daughter of Charles, second duke of Richmond (by lady Sarah Cadogan, daughter and co-heir of William earl Cadogan), which marriage was dissolved by act of parliament, in 1775, and her ladyship re-married, in Aug. 1785, the honourable George Napier, son of his lordship, the present duke of Grane (by his second wife, daughter of Thomas-Charles has represented the county of Suffolk in nine parliaments.—The family of Bunbury, originally called St. Pierre, came over at the conquest, and shared the
the fortune of Hugh Lupus, first Norman earl of Chester: they had, amongst divers goodly lands and possessions, the manor or lordship of Bombay (a contrivance of Boniface Bury, to which faint the church of that place was dedicated), from whence this family have fins taken their denomination.—Motto, Firmum in vita nihil, Nothing is permanent in life. —Family Seat, Barton, in Suffolk.

PARKER, of London; created July 1, 1681. —Sir HARRY PARKER, the sixth baronet, succeeded his father, sir Hyde; married, in 1765, Bridget, daughter of William Creweff, esq. of Creweff, in Northumberland, by whom he has William, born in 1770; Louisa, born in 1777, wife of George-Robert Eyres, esq. Edmund, born in 1779; Hyde, born in 1785; and Sophia, born in 1787. —This ancient family appears to have settled at Hoberton, in Devonshire, early in the thirteenth century; one branch of it removed from thence, about the year 1600, to Borrindon and Saltmarsh, in the same county, the heir of which branch is John lord Barton, born in 1787. —Nothing is permanent in life. —Family Seat, Barton, in Suffolk.

Richard, of Bramblet: e Houfe, Suffolk; created Feb. 23, 1683-4. —This family having been resident in Spain for about forty years, it is impofible to aSertain whether there be an English baronet of this name now existing. —John Richards, esq. came into England with the queen, mother of Charles II. from Toulouse, in France. He had a numerous issue. James, his youngest son, was knighted by Charles II. for saving several men of war, and after wards advanced to the dignity of a baronet; he settled in Spain, where he died, being succeeded by his eldest son, by his first lady, Sir John, who was colonel of a regiment of foot in the Spanish service, in which he afterwards quitted, and took to merchandize, and carried on a considerable trade at Cadiz; but, dying unmarried, was succeeded by his half-brother, Sir Joseph, eldest son by the second lady, who died unmarried also, June 2, 1738. Sir Philip succeeded his brother, and married the eldest daughter of the duke de Montemar, who was general and commander in chief of the Spanish forces left in Italy in 1753; since which time we are not acquainted with the history of the family. —Motto, Honore et amore, With honour and love.

DASHWOOD, of Northbrooke, Oxfordshire; created May 16, 1684. —Sir HENRY-WATKIN DASHWOOD, the third baronet, succeeded his father, Sir James, Nov. 29, 1779; married, July 17, 1780, Mary-Ellyn, eldest daughter of — Graham, esq. (formerly a member of the council in Bengal,) and niece to William, late lord Newhaven, (which title became extinct in 1794,) by whom he had two sons, Henry-George-Mayne, born June 26, 1782, and died Nov. 1803; Anna-Maria, born Feb. 16, 1785; George, born Sept. 17, 1786; Charles, born Dec. 9, 1787, lieutenant in the third regiment of foot guards; Augustus, born Dec. 25, 1795; Georgiana-Carolina, born March 16, 1796. Sir Henry has represented the borough of Woodstock in nine parliaments. —This baronet is descended from the second marriage of George, lord of the said family, in Dorsetshire, and from whom it was transplanted into Somersetshire. George Dalhwood, esq. a younger son of the said family, in the reign of Charles II. undertook, with other perfons, the farming the whole revenue of the kingdom of Ireland, and afterwards was one of those who fanned the whole revenues of excife and hearth-money in England, so long as those revenues were continued in farm, and was (and when they were managed by commiilion) one of the commiilioners till his death in 1685. His eldest son was sir Robert, the first baronet; he served in several parliaments, in the reign of king William, for Banbury. —Family Seat, Kirtlington Park, near Woodstock, Oxfordshire.

BLOIS, Grandborough Hall, Suffolk; created April 13, 1686. —Sir JOHN BLOIS, the fifth baronet, succeeded his father, sir Ralph, in 1762; married, first, Sarah, youngest daughter of George Thornhill, of Diddington, in Huntingdonshire. —William Williams, by Chauncey Hare, in Jan. 1786, he has one son, Charles, who married, Jan. 19, 1789, Clara, daughter of Josely Price, of Clembelworth, in Yorkshire, esquire; and a daughter, Sarah. Sir John married, secondly, April 21, 1772, Lucretia, daughter of — Otley, esq. of the Island of St. Christopher's, and has issue two daughters and a son; Lucretia married, Jan. 14, 1805, Dr. Thomas Turner, son of Samuel Turner, esq. Lucy; and Ralph. —This ancient family derives its name from Blois, a city in France, and came into England at the conquest. The seat was at Norton, in Suffolk, till the reign of Henry VII. when it was removed to Grandborough Hall, now in the possession of the present baronet. —Motto, Je me fer en Dieu, I trust in God. —Family Seats, Grandborough, and Cockfield Hall, in Suffolk.

WILLIAMS-WYNN, of Wynnstay; created July 6, 1688. —Sir Watkin Williams-Wynn, the fifth baronet, born Oct. 26, 1772; succeeded his father, Sir Watkin, July 29, 1789. He is lord lieutenant and curator of the borough of Woodstock in nine parliaments. —Sir Henry Williams-Wynn, of Llantrisant, in Glamorgan, was the fourteenth in lineal descent from Cadod Harms, or the Handsome, a British chief; he reprefented the said information to be printed, eight thoufand pounds of which sum he was compelled to pay. Roger North attributes the feverity of this fine to the refentment of Jefuits, who had been reprimanded on his knees at the bar of the Houfe of Commons by Williams, when speak er. —After the revolution, this judgment was declared by the Houfe of Commons to be illegal, and against the freedom of parliament. He was one of the most eminent lawyers of his time, and appears by the debates and the flate-trials to have been the active and zealous advocate of the popular party in the reign of Charles II. but was afterwards made by James II. solicitor-general, and knighted in 1687, and was in 1688 created a baronet. —Rogers, after the revolution, was one of the king's counselors. The laft public act of his life was the introduction of the act for preventing charge and expense in the election of members, commonly called the treating act, which still continues one of the principal safeguards
safeguards of the independence and purity of parliament.

—Family Seats, Wynter, Denbighshire; and Llangewin, and Glanly, in Merionethshire.

MOLEWSORTH, of Penarrow, Cornwall; created Dec. 6, 1698. Sir Anthony Molewirth, the seventh baronet, succeeded his father, sir William, Feb. 23, 1798. The family of Molewirth, anciently resided in the counties of Northampton and Bedford, where they flourished for many ages, and particularly in the reigns of Edward I. and II. in the person of sir Walter de Molewirth, who attended Edward I. in his expedition to Scotland, and was chief of the district of Bedford and Bucks for the space of ten years; an office, in those early times, of great trust and authority. In 1366, when the king, on a grand Whituntes festival, to augment the glory of his intended expedition into Scotland, knighted Edward earl of Carnarvon, his eldest son, the young prince, immediately after that ceremony, at the altar in Westminster Abbey, conferred the honor of knighthood on noble and noble families, of which number was sir Walter de Molewirth. His descendants were of great note and consideration, and at length the dignity of baronet was conferred on two branches of the family nearly at the same time, both on account of their distinguished services in the cause of the revolution. Sir Robert, (of the elder branch,) who was first created a baronet, was afterwards, by George I. made a peer of Ireland, by the title of viscount Molewirth; which dignity his descendant now enjoys. Sir Hender, the first baronet under the se-

—Family Seats, Wynter, Denbighshire; and Llangewin, and Glanly, in Merionethshire.

MOLEWSORTH, of Penarrow, Cornwall; created Dec. 6, 1698. Sir Anthony Molewirth, the seventh baronet, succeeded his father, Sir William, Feb. 23, 1798. The family of Molewirth, anciently resided in the counties of Northampton and Bedford, where they flourished for many ages, and particularly in the reigns of Edward I. and II. in the person of Sir Walter de Molewirth, who attended Edward I. in his expedition to Scotland, and was chief of the district of Bedford and Bucks for the space of ten years; an office, in those early times, of great trust and authority. In 1366, when the king, on a grand Whituntes festival, to augment the glory of his intended expedition into Scotland, knighted Edward earl of Carnarvon, his eldest son, the young prince, immediately after that ceremony, at the altar in Westminster Abbey, conferred the honor of knighthood on noble and noble families, of which number was Sir Walter de Molewirth. His descendants were of great note and consideration, and at length the dignity of baronet was conferred on two branches of the family nearly at the same time, both on account of their distinguished services in the cause of the revolution. Sir Robert, (of the elder branch,) who was first created a baronet, was afterwards, by George I. made a peer of Ireland, by the title of viscount Molewirth; which dignity his descendant now enjoys. Sir Hender, the first baronet under the se-

THOMAS, of Wenvor Castle, Glamorganshire; created Dec. 4, 1694. Sir John Thomas, the seventh baronet, succeeded his father, Sir Owen, the late baronet, by the title of viscount Molewirth; which dignity his descendant now enjoys. This family is descended from Robert Ramsden, of Byrom, Yorkshire, created Nov. 30, 1697. He was a co-founder of the Abbey of Baldewas, Shropshire.

—Family Seats, Wynnystay, Denbighshire; and Llangedwyn, in Flintshire.

HERALDRY.

—Motto, Non sibi, sed eum qui stare solvere dignatus est.

—Family Seats, Wynnystay, Denbighshire; and Llangedwyn, in Flintshire.

HERALDRY.

—Motto, Non sibi, sed eum qui stare solvere dignatus est.

—Family Seats, Wynnystay, Denbighshire; and Llangedwyn, in Flintshire.
only son of Sir T. F. of Betley, baronet; Anne-Maria; Elizabeth; Louisa.—This family was seated at Chetwode, in Buckinghamshire, long before the conquest. John Chetwode, from whom this pedigree is clearly deduced, was knight and lord of the manor of Chetwode. His son Robert founded the priory of Chetwode, in the lifetime of his father.—Motto, Corona mea Christi, Christ is my crown.—Family Seats, Oakley, in Staffordshire; Chetwode and Agden, in Buckinghamshire; and Whitley, in Cheshire.

WEBSTER, of Copthall, Essex; created May 21, 1702.—Sir Godfrey Vassall Webster, the fifth baronet, succeeded his father, Sir Godfrey, June 3, 1800. —The Webster's are descended from an ancient family, seated at Lockington, in Yorkshire, before the reign of Richard II. —Family Residence, Battle Abbey, in Sussex.

DOLBEN, of Thongdon, alias Finedon, Northamptonshire; created April 1, 1706.—Sir William Dolben, the third baronet, L.L.D succeeded his father, the second, May 17, 1758, Judith, only daughter and heir of Somerset English, eqq. who died in 1771. He married, fecondly, Oct. 14, 1759, Charlotte, daughter of Gilbert Attlee, eqq. and widow of John Scotcher, eqq. by whom he has no issue. His only surviving child, John English, married Oct. 1779, Mary-Dorothy, daughter of William Hallet, jun. of Canons, in Middlesex, who died in Jan. 1807, by whom he had, William-Somerset, born in 1780; Caroline, born in 1781, died in 1789; Juliana, born in 1783; Harriet, born in 1785; died in 1785; Charlotte, born in 1787, married, Sept. 17, 1806, the reverend Samuel Woodfield Paul, of Northumberland, born in 1739.—This family has been ancient in Denbighshire, and has branched into several houses. The name is supposed to be taken from Dolben Maer, a place between Caernarvon and Penmorfa, John Dolben, the father of the first baronet, after serving as a military officer, and having been twice severely wounded in the service of Charles I. in the civil wars, became a clergyman, and, after several succession of promotions, was finally translated to the archbishopric of York in 1683, and died in 1685. His younger brother, William, was one of the judges of the court of King's Bench, and died in 1693. Sir Gilbert, the first baronet, was one of the judges of the court of Common Pleas, in Ireland, and the twenty years, in the reigns of William and Mary, queen Anne, and George I.—Family Seat, Thongdon, alias Finedon, in Northamptonshire.

FLEMING, of Rydal, Westmorland; created Oct. 4, 1705.—Sir George Fleming, the fifth baronet, succeeded his cousin, Sir Michael le Fleming, May 19, 1806; married, Feb. 4, 1807, Anne-Frederick, Elizabeth, daughter and sole heir of the late baronet. —This family derives its descent from Sir Michael le Fleming, knight, who was related to Baldwin, earl of Flanders, married about 1200, William the Conqueror, his son in law; who sent him five years after, with some of his countrymen, into Cumberland, to oppose the Scots. For which service, the Conqueror gave him the castle of Giseldon, and other estates in Lancashire and Cumberland; and also the castle of Catterick, and other estates in the county of York, and the castle of Richmond, the second son of Sir Michael, who was settled in Cumberland. The elder branch, who enjoyed the Lancashire estates, continued owners thereof, in a regular succession, until they came to Henry Grey, marquis of Dorset, and afterwards duke of Suffolk, father of the lady Jane Grey. Sir William, the first baronet, is called Fleming only, the name being subsequently changed to Freke. Sir George became anglicized by omitting the le; but the third baronet, Sir William, from his veneration for antiquity, was desirous to restore the primitive orthography of the family name, by inverting the particle le; and, in this infallible, effectually performed it, by incorporating the particle with his son's christian name at his baptism, who thereby bore the same name with the ancient founder of the family. He was christened Michael-le, and proceeded to the title; but upon his death, as above, the le was lost again. —Motto, Pam, copia, sapientia, Peace, plenty, wisdom: alluding to the crest, which is a serpent (wisdom) holding in his mouth a garland of olives (peace) and vines (plenty). —Family Seat, Rydal Hall, Westmorland.

MILLER, of Chichester, Sussex; created Oct. 9, 1705.—Sir Thomas Miller, the fifth baronet, succeeded his father, Sir John, April 19, 1772; has been twice married, and has issue: one of his daughters married for Sir John Gilman, and died 1803: his eldest son, John, died April 25, 1804. Sir Thomas represented the borough of Portsmouth in the last and present parliament.—Family Residence, Froyle, near Alton, in Hampshire.

DASHWOOD-KING, of West Wycombe, Bucks; created June 28, 1707.—Sir John Dashwood-King, the fourth baronet, succeeded his father, Sir John Dashwood, December 6, 1793; married, 1789, Mary-Anne, daughter of Theodore-Henry Broadhead, eqq. by whom he has, Mary; George-Henry; Francis; Elizabeth; John; Edmund; and Henry.—Family Seat, West Wycombe, in Buckinghamshire.

LAMBERT, of London; created Feb. 16, 1710-11.—Henry-John Lambert, the fifth baronet, succeeded his father, Sir Henry, in 1792.—This family is descended from John Lambert, of the Isle of Rhy, who lived in good reputation in that country, being bred to the law, though he came originally from the county of Devon, in England; of whom, John, the eldest son, was born in 1666. He left several children, and having been educated in England, settled here as a merchant: in 1770, the public credit having suffered on the change of ministry, he was the most zealous and forward to supply the treasury with money, in reward for which service he was created a baronet. —Motto, Sequitando si giunge.—Family Seat, Mount Ida, Norfolk.

LAKE, of the Middle Temple, London; created Oct. 17, 1711.—Sir Edward Lake, the fourth baronet, succeeded his father, Sir James-Winter, April 24, 1787.—This family is descended from Hugh de Caley, of Owby, in Norfolk, who died in 1286, and by Agnes, his wife, daughter and heir of Hamo de Hamfled, had one son, Sir William Caley, of Owby, knight, whose grandson, William, had one daughter and heir, who married John Lake, esquire. The dignity of baronet was first conferred on Sir Edward Lake, chancellor of the diocese of Lincoln, but the patent was not taken out until 1711. —Motto, Un dies, un reg, un cœur; One God, one king, one heart.—Family Seat, Mount Ida, Norfolk.

PREKE, of West Bilney, Norfolk; created June 4, 1713.—Sir John Preke, the fourth baronet, succeeded his father, Sir John, and married, Jan. 25, 1783, Catharine-Charlotte Gore, third daughter of Arthur Saunders, earl of Arran.—Francis Preke, esquire, a person of good repute at Somersettshire, was father of Robert, and was auditor of the treasury in the reigns of Henry VIII. and queen Elizabeth; and died worth upwards of one hundred thousand pounds.—Family Seat, Castle Freke, county of Cork, Ireland.

EVELYN, of Wotton Place, Surrey; created Aug. 6, 1713.—Sir Frederick Evelyn, the third baronet, succeeded his father, Sir John, in July 1767; married Miss Tuxton. —This family flourished originally at Evelyn, in the Salop. George Evelyn, esquire, the founder of this branch of the Evelyns, in Surrey, first carried the art of making gunpowder to perfection in England, in the reign of queen Elizabeth. Two of his descendants were created baronets; John in 1660, and Edward in 1682.
but for want of male issue both those titles became extinct. John Evelyn, esq., the learned author of Silva, and other celebrated works, was also of this family; and Sir John, his grandson, was the first baronet under the patent. —Family Seat, Wotton in Surrey, and Says Court in Kent.

COPE, of Brewern, Oxfordshire; created March 1, 1713.—The Rev. Sir Jonathan Cope, the fourth baronet, LL.D. succeeded his nephew, Dec. 25, 1781; is married to Miss Jane, daughter of Lieut.-Gen. Sir Thomas Cope, his youngest son, died at Madras, June 7, 1803. —For the antiquity and descent of this family, see Cope of Hanwell, p. 688. —Family Seat, Horton, Huntingdonshire.

STYLES, of London; created Dec. 12, 1714. —Sir John-Styles, the fourth baronet, M.A. born April 16, 1741, succeeded his father, Sir Francis-Halkin-Styles, Jan. 21, 1762. —This family has been long settled in Wiltshire. John Eyles received the honour of knighthood from James II. in the last year of whose reign he was lord-mayor of London. Francis, brother to Sir John, was an alderman, an eminent merchant, many years a director of the East-India Company, and the first baronet. The name of Styles has been frequently added to the original name from a matrimonial connection with the family of Joseph-Halkin Styles, esq.

—Family Seat, Hefford, Wiltshire.

SMITH, of Isfield, Suffield; created Dec. 2, 1714. —Sir Harvey Smith, the third baronet, born in 1734, succeeded his father, Sir Robert, Dec. 10, 1783. Sir Harvey was page of honour to the late king, aid-de-camp to general Wolfe at the siege of Quebec, and afterwards a colonel of the foot-guards. —This family is descended from James, second son of Sir Robert Smyth, of Upton, in Essex, bart. He was knighted by Charles II. and was lord-mayor of London the first of James II.

—Family Seat, Farnham in Suffolk.

WARRENDE, of Lochend, in East Lothian, Scotland.; created June 2, 1715. —Sir George Warrender, the fourth baronet, born in 1715, M.P. in the present parliament for Jedburgh, and lieutenant-colonel of the Berwickshire militia; succeeded his father, Sir Patrick, 1759. —This family draws its original descent from John De Warren, of Yorkshire; Robert de Warren settled in East Lothian, and he and his descendants, by a strange transposition, came to use the name of Warrender, as at present. Sir George, the first baronet, was an eminent merchant, and the several branches are in the magistracy of Edinburgh, and represented that city in the first parliament of George I. —Motto, Industria, Induftria. —Family Seat, Lochend, in East Lothian, Scotland.

D'AETH, of Knowlton, Kent; created July 16, 1716. —Sir D'Aeth, the fourth baronet, (a minor,) succeeded his father, Sir Narborough, March 12, 1808. —This family was originally of Aeth, in Flanders, from whence they derive their name, but have been long settled in England. William Death, or D'Aeth, of Dartford, gent. lived in the reign of Edward IV. —Family Seats, Knowlton Court, and North Cray Place, both in Kent.

MILNER, of Nun Appleton Hall, Yorkshire; created Feb. 16, 1716. —Sir William-Mordaunt Milner, the third baronet, succeeded his father, Sir William, in 1774; married, in 1774, Miss Sturt, daughter of Humphrey Sturt, esq. of Crichton House, Dorsetshire; and by her, who died in January 1805, had issue, William, married, in 1804, the daughter of the right honourable Theophilus Clement, which lady died May 28, 1805; the eldest daughter married, in 1804, Major Francis-Hartings Doyle. Sir William has represented the city of York in the present and three former parliaments. —Family Seat, Nun Appleton, near Tadcaster, Yorkshire.

ELTON, of the City of Bristol; created Oct. 31, 1717. —The Rev. Sir Abraham Elton, the fifth baronet, M.A. succeeded his father, Sir Abraham-Elton, in 1790; married, Nov. 7, 1776, Elizabeth, eldest daughter of Sir John Durbin, of Watton, in Somersfield, knt. merchant, and alderman of Bristol; by whom he has Charles Elton, born Oct. 31, 1778; Julia, born March 23, 1783, married, Jan. 29, 1807, Henry Hallam, esq., son of the Rev. Dr. John Hallam, one of the canons of Windfor; and other issue. —Family Seat, Cleveland, near Bristol.

BRIDGES, of Goodneston, Kent; created April 19, 1718. —Sir Brooke-William Bridges, the fourth baronet, a lieutenant in the royal navy, born June 22, 1767, succeeded his father, Sir Brooke, September 1791; married, Aug. 14, 1800, the eldest daughter of the late John Foote, esq. by whom, who died in January 1806, he had issue a son, born in June 1801; another son, born Aug. 2, 1802. —This family is of very great antiquity in Ireland, where several of the branches have now considerable estates; but the first that settled in England was John Bridges, of South Littleton, in Worcestershire, who, in November 1758, purchased an estate at Alcester in Warwickshire. —Family Seat, Goodneston, Kent.

BLUNT, of London; created June 17, 1720. —Sir Charles-Richard Blunt, the fourth baronet, judge and magistratet of the zillah of Beerbhoom, in Bengal, was born Dec. 6, 1775; succeeded his father, Sir Charles-William, March 29, 1802. —Residence, at Calcutta.

CODRINGTON, of Dodington, Gloucestershire; created April 21, 1721. —Sir William Codrington, the third baronet, succeeded his father, Sir William, March 11, 1792; married, in 1796, Mary, daughter of the late honourable William Ward. —This family is a younger branch of the Codringtons, of Codrington, in the county of Gloucester, which was a family of considerable eminence in that county in the time of Henry IV. John Codrington, esq., having been standard-bearer to Henry V. in his wars with France, Christopher Codrington, a younger son of this family, went with his fortune into Barbadoes, in the reign of Charles I. where he married, and died, leaving two sons, Christopher and John. Christopher became lieutenant-governor of the island of Barbadoes, and afterwards captain-general of the Leeward Islands, in which post he died, leaving two sons, one of them his own son, who is lord-mayor of All-Souls college, Oxford; but afterwards, taking himself to a military life, attended William III. in his wars in Flanders, where he greatly signified himself, and afterwards succeeded his father in the government of the Leeward Islands. He was also celebrated for his noble benefactions, having bequeathed to the college of All Souls, the sum of 10,000l. for the building of a library, and furnishing it with books, besides his own valuable library; he also gave an estate of 2000l. per annum to the Corporation for the Propagation of Christian Knowledge, for the building and endowment of a college at Barbadoes. He died April 7, 1710. —Family Seat, as above.

FREDERICK, of Westminster; created June 16, 1722. —Sir John Frederick, the fifth baronet, was born March 18, 1749; succeeded his father, Sir John, April 9, 1788; he married Mary, youngest daughter and co-heir of Richard Garth, of Morden, esq. by whom he had a son, John, born Sept. 20, 1779, captain in the guards, and was killed at the landing of the British army in America, under Sir Ralph Abercorn; another son, Richard, born 1780; and several other children. Sir John is M.P. for the county of Surrey. —This family is descended from Sir John Frederick, knt. son of Christopher Frederick, lord-mayor of London in 1662, who was one of the most considerable traders in the city. —Family Seat, Burwood House, Surrey.

$X MITCHELL,
MITCHELL, of West Shore, Scotland; created June 19, 1734.—Sir Andrew Mitchell, the fourth baronet, succeeded his brother, Sir John, the late baronet, in 1785. Sir Andrew is the sole representative of the ancient family of Bandith, Welshore, &e. designed Mitchell of that ilk.—Motto, Sapientia est adaeque. He is the wife who is affiduous.—Family Seat, West Shore, in Zetland, Scotland.

HILL, of Hawkestone, Shropshire; created Jan. 20, 1726.—Sir Richard Hill, the second baronet, succeeded his father, Sir Rowland, Aug. 7, 1783. This ancient and respectable family is descended from the same ancestors as that of Thomas-Noel Hill baron Berwick, and is a branch of the same family; for which see p. 576 of this volume.—Family Seat, Hawkestone Hall, near Ludlow, Shropshire.

CLAYTON, of Morden, Surrey; created Jan. 13, 1733.—Sir William Clayton, the fourth baronet, born April 16, 1763, succeeded his cousin, Sir Robert, May 10, 1799; married, July 16, 1785, Mary, daughter of Sir William Earl, bart. by whom he has five sons and two daughters: William-Robert, born Aug. 26, 1786; Catharine-Emilia, born Nov. 15, 1789; Earl-George, born April 9, 1794; John-Lloyd, born Aug. 19, 1795; Rice-Richard, born Nov. 15, 1797; Augusta-Philip, born in 1799; Mary-Caroline, born in 1800.—This family is descended from the Claytons in Northamptonshire. Sir Robert Clayton, kn.t, was, in 1769, lord-mayor of London, and has been many years insane.—Motto, Virtus in actione consistit, I am glad.

MITCHELL, of West Shore, Scotland; created Jane 24, 1733.—Sir Gregory Osborn, the fourth baronet, born Sept. 28, 1785, succeeded his father, Sir Gregory, Jan. 4, 1805.—Family Seats, Battlesfield, Bedforshire; and Ambroden, near Burton, Oxfordshire.

PAYNE, of St. Christopher's; created Oct. 31, 1772.—Sir John Payne, the fourth baronet, succeeded his father, Sir John, Apr. 1, 1724.—It is supposed this family came from Normandy with William the Conqueror, a place in that province, called Payne, seems to have given them, or to have received from them, that name:—Family Seat, Tempsford Hall, Bedfordshire.

ARMYTAGE, of Kirkles, Yorkshire; created July 4, 1738.—Sir George Armitage, the fourth baronet, succeeded his father, Sir George, in 1783; married, first, Aug. 12, 1783, Mary, eldest daughter of Sir Harcourt Harbord Harbord, bart, since created Lord Suffield, who died Aug. 12, 1799, leaving several daughters, and one son, who survived her, but is since dead. Sir George married, secondly, in 1791, Miss Bowles, daughter of Oldfield Bowles, by whom he has several children. This family is of great antiquity, being derived from John Armitage, of Rigbrowl, living in the reign of King Stephen. The dignity of a baronet was first conferred on an elder branch of this family by Charles I. in the person of Francis Armitage, whose sons and grandsons enjoyed the title, which becoming extinct, a fresh patent was granted to a cousin of the last branch.—Family Seat, Kirkles, (formerly a Benedictine nunnery,) near Huddersfield, in Yorkshire.

HULSE, of Lincoln's-Inn-Fields, Middlesex; created Feb. 17, 1733.—Sir Edward Hulse, the third baronet, born in 1744, succeeded his father, Sir Edward, 12 Dec. 1803; married, May 1795, Mary, daughter of John Lethieullier, esq. by whom he has three sons and two daughters: Eliza, the second daughter, died Dec. 1800; married, in May 1769, Mary, daughter of the late Hon. Henry Hobart, son of the late Hon. Henry Hobart, and nephew of Robert Earl of Buckinghamshire, to the Rev. Henry Hobart, son of the late Hon. Henry Hobart, and nephew of Robert Earl of Buckinghamshire; William, in holy orders, married the daughter of Thomas Wedrow and Anna his wife, sister of Arthur lord Capel, beheaded in 1648. He settled in London, and practised physic there for forty years. His eldest son was Sir Edward, the first baronet, born in 1682.—Family Seat, Bremore, in Hampshire.

GOOCH, of Virginia, created Nov. 2, 1746.—Sir Thomas Gooch, the fourth baronet, succeeded his father, Sir Thomas Gooch, the third baronet, Sept. 29, 1771; married Annamaria, daughter of William Hayward, of Surrey, eqq. by whom he has five sons and four daughters: Thomas-Sherlock, who married, 1796, Mariana, sister of Abraham Whitaker, of Liffier-House, Hertfordshire, eqq. by whom he has one son, Edward-Sherlock, and two daughters; Henry, who married a daughter of Mr. Whiffen, of Newcastle-upon-Tyne; Thomas, a lieutenant-colonel in the army, married Hannah, widow of Philip Webb, of Milford-House, Surrey, eqq. and daughter of Sir Robert Barker, bart. late commander-in-chief in India; Richard; Paul. The daughters are, Elizabeth, Matilda, and Sophia.—Sir-William, the first baronet, was born in the reign of Edward III. This family assumed the surname of Fetherstonhaugh, in the county palatine of Durham. Albany Fetherstonhaugh, a period to the name there; he had twice represented the county of York in parliament; now inherited by the present Sir Henry Fetherstonhaugh, in Northumberland, with its domains, which is the family seat, Stanwell Place, Middlesex. Sir Henry, who at the beginning of the reign of James I. was appointed receiver of all the king’s revenues in Cumberland and Westmoreland; and had issue a son, Timothy; which Timothy, in the succeeding reign, eloped with the caufe of the royal party, raised a troop of horse at his own expense, was knighted under the king’s banner, and fought bravely and successfully till the fatal battle of Worcester, Sept. 2, 1651, when he was taken prisoner, and beheaded at Bolton in Lancashire. This event hurt the eftate of this particular branch of the family; but not irretrievably, for the descendants of this gentleman are still very respectable both in fortune and character; the above-named Albany Fetherstonhaugh (father of Henry, and grandfather of Timothy) had a considerable estate, but was universally beloved, both by the inhabitants and the neighbouring Indians, whose character of his majesty’s sole agent and superintendent of Indian affairs for the northern parts of America, and colonel of the six united nations, their allies, and dependents.” He died at his seat at Johnstone’s Hall, where he appeared April 3, 1764, in the character of his majesty’s sole agent and superintendent of Indian affairs for the northern parts of America, and colonel of the six united nations, their allies, and dependents. He died at his seat at Johnson’s Hall, in the province of New York, 1774.—Motto, Deo regique. I owe to God and the king.—Family Seats, at Ely and Linton, in Kent.

JOHNSON, of Twickenham, Middlesex; created Nov. 27, 1753.—Sir John Johnson, the second baronet, succeeded his father, Sir William, in 1774; married, June 20, 1773, Polly, daughter of John Watts, eqq. of New York, by whom he has a son, who is a lieutenant-colonel in the army, and married to Sarah, daughter of Stephen de Lancey, eqq. and a daughter, Mary, married April 15, 1805, to Board Boves, eqq. lieutenant-colonel in the army, and lieutenant-colonel of the 6th regiment of foot.—Sir William, the late and first baronet, was descended from a good family in Ireland, and went to America under the care of his uncle, Sir Peter Warren, K.B. In 1735, the expedition against Crown Point, in America, was conducted by this gentleman, and afterwards he was a colonel, and afterwards a general. He had settled on the Mohawk river, and not only acquired a considerable estate, but was universally beloved, both by the inhabitants and the neighbouring Indians, who gained by his religious and humane behaviour towards them. He acquired great honour by his military services, and his activity in negociations was no less remarkable than his valour in the field. He brought the Senecas (one of the revolted tribes of the Iroquois, and the most inveterate enemies of the English) to a treaty, at his house, at Johnson’s Hall, where he appeared April 3, 1764, in the character of his majesty’s sole agent and superintendent of Indian affairs for the northern parts of America, and colonel of the six united nations, their allies, and dependents. He died at his seat at Johnson’s Hall, in the province of New York, 1774.—Motto, Deo regique. I owe to God and the king.—Family Seats, Twickenham, Middlesex.

Ridley, of Heaton and Blagdon, in Northumberland; created May 6, 1756.—Sir Matthew-White Ridley, the second baronet, succeeded his maternal uncle, Sir Matthew White, by virtue of a limitation in the
the patent, March 21, 1763; married, July 12, 1777, Sarah Colburne, daughter and heiress of Benjamin Colburne, esq. of Bath; by whom, who died Aug. 3, 1806, he had issue five sons and one daughter: 1. Matthew-White, born Aug. 18, 1778, married, Aug. 13, 1803, Laura Hawkins, youngest daughter of George Hawkins, esq. of Belfam, but he has issue two sons and one daughter: Samuel, born July 15, 1804; Laura, born June 10, 1805. 2. Nicholas-White, who succeeded to the property of his maternal uncle, William Colburne, esq. has assumed the name and arms of Colburne, in addition to that of Ridley, M.P. for Appleby. 3. Henry-Colburne; 4. Richard; 5. Charles-John; 6. Henrietta-Elizabeth, married, Aug. 20, 1804, the Rev. George Scott, (who died Dec. 24, 1805, esq. 6. Jessie, born Dec. 10, 1805,) eldest son of John Lord Eldon, lord high chancellor of Great Britain. Sir Matthew Ridley has been returned as representative for the town of Newcastle-upon-Tyne, in eight successive parliaments. —The family of White was originally of the county of Durham (hire; created 061. 31, 1757.—Sir Robert-Howe faith.— Family Seats, Blagdon, and Heaton, in Northum-}

Con}
feated in parliament the city of London, and the city of Coventry.—Family Seat, Ewell, Surrey.

COLEBROOKE, of Bath; created Oct. 12, 1739.—Sir Charles Colebrooke, the second baronet, A.S., born June 14, 1792; succeeded his brother, Sir James, May 19, 1761; married, July 23, 1754, Mary, only daughter and heir of Patrick Gaynor, of Antigua, esquire, by whom he had four sons and three daughters, whereof two daughters and three sons are living: 1. Mary, born April 26, 1755, wife of the chevalier Charles-Adrien de Peyron, in the service of Gustavus, king of Sweden; and by him had one son, Charles-Adolphus-Mary; the chevalier was killed in a duel, in 1784, by the count de la Marck, upon which melancholy occasion, the king of Sweden took his son under his immediate protection; in 1785, the mother took for her second husband, William Tail, esq. by whom she has had a son, George-William, born Oct. 2, 1792, and a daughter, Harriet, who is dead. 2. Louisa, born in Jan. 1764; married, 1789, Andrew Sutherland, esq. captain in his majesty's navy; he died at Gibraltar, in 1795, leaving a daughter, Louisa, born April 17, 1791, and a son, James Charles Colebrooke Sutherland, born Nov. 6, 1792. 3. George, born Aug. 2, 1794. 4. James Edward, born July 7, 1795, second judge of the court of appeal at Patna, in Bengal. 5. Henry Thomas, born June 15, 1798, chief judge of the court of Sudder Dewane, and Naib Adam, in Hindooftan. Having made a profound study of the Sanfert language, he undertook, on the death of Sir William Jones, to translate a Digest of the Hindoo Law, for the use of the courts of justice; he has been engaged likewise in a much more extended work, on the Agriculture and Commerce of Bengal; and also in making a Grammar of the Sanfert. Sir George's three sons hold the office of chirurgion-general in the Common Pleas, by letters patent. —Motto, Sola bona quae honesta, Nothing but what is honourable.

FLUDYER, of London; created Nov. 14, 1759.—Sir Samuel Brudenell Fludyer, the second baronet, succeeded his father, Sir Samuel, Jan. 18, 1768; married, in Oct. 1784, Maria, daughter of Robert Welton, esq. niece to the late duke of Montagu, (who died Oct. 11, 1803,) by whom he has a daughter, born April 18, 1793; a son, April 19, 1795; another son, born in Feb. 1800; a daughter, died Feb. 3, 1804. —Samuel Fludyer, an eminent clothier in London, left two sons, Samuel and Thomas. Thomas, the younger son, was knighted at Guildhall, Nov. 9, 1761, when their present majesty, the third son of Sir Robert, Doc. 30, 1765; and married, Feb. 1798, Sophia, only daughter of the REV. Nathaniel Hinde, vicar of Shifnal, in Shropshire; by whom he has one son, Thomas Henry, born Feb. 11, 1793; and two daughters.—This family derive their name probably from the lordship of Hefkey, in Hertfordshire, as anciently written, in Lancashire, of which they have been possessed from the conquest. The pedigree is regularly deduced from Richard de Hefkey, who lived in the thirteenth century, and whose descendants in several generations were knights. Thomas Hefkey, esq. lord of the manors of Hefkey, Rufford, &c. &c. father of the first baronet, was one of the representatives for the town of Prefton, in the fifth parliament of Great Britain. —Family Seat, Rufford Hall, near Ormskirk, Lancashire.

BAYNTUN, of Sancombe Park, Hertfordshire; created July 9, 1762.—Sir Andrew Bayntun, the second baronet, L.L.D. succeeded his father, Sir Edward, in Jan. 1780; married, June 25, 1777, Mary Alicia, eldest surviving daughter of George-William, present earl of Coventry, and by her (who died Jan. 8, 1784) had issue, two daughters, one of whom is married to the REV. J. Starkie, of Eveleigh. Sir Andrew was knighted, and lord-mayor in 1758. He resigned his office July 1, 1777, eleven years before his death. —Motto, Si oblitus commodi, Forgetful of his own convenience.—Family Seat, Pawley, Hants.

EvKESKETH, of Rufford, Lancashire; created May 5, 1759.—Sir Thomas Dalrymple Evesketh, the third baronet, born Jan. 13, 1735; succeeded his father, Sir Robert, Dec. 30, 1759; and married, Feb. 1798, Sophia, only daughter of the REV. Nathaniel Hinde, vicar of Shifnal, in Shropshire; by whom he has one son, Thomas Henry, born Feb. 11, 1793; and two daughters.—This family derive their name probably from the lordship of Helketh, in Lancashire, from which they have been possessed from the conquest. The pedigree is regularly deduced from Richard de Helketh, who lived in the thirteenth century, and whose descendants in several generations were knights. Thomas Helketh, esq. lord of the manors of Helketh, Rufford, &c. &c. father of the first baronet, was one of the representatives for the town of Prefton, in the fifth parliament of Great Britain. —Family Seat, Rufford Hall, near Ormskirk, Lancashire.

BAYNTUN, of Sancombe Park, Hertfordshire; created July 9, 1762.—Sir Andrew Bayntun, the second baronet, L.L.D. succeeded his father, Sir Edward, in Jan. 1780; married, June 25, 1777, Mary Alicia, eldest surviving daughter of George-William, present earl of Coventry, and by her (who died Jan. 8, 1784) had issue, two daughters, one of whom is married to the REV. J. Starkie, of Eveleigh. Sir Andrew was knighted, and lord-mayor in 1758. He resigned his office July 1, 1777, eleven years before his death. —Motto, Si oblitus commodi, Forgetful of his own convenience.—Family Seat, Pawley, Hants.

WATSON, of Fulmer, Bucks; created March 22, 1760.—Sir Charles Watson was created a baronet as above. He married, in 1789, Juliana, daughter of the late sir Joseph Copley, bart. by whom he has nine children:—Dr. John Watson, prebendary of Westminister, and rector of Castle Camps, in Cambridgeshire, married a half-sister of sir Charles Wager, by whom he had Charles, born in 1714, who was bred to the navy. In 1735 he was made a lieutenant, and in 1737 a post captain. He highly distinguished himself in the action of the third of May, 1745, when even the French admiral made the mark of his presence on the Princeps Louisa. In the following action, the same year, in which for Edward Hawke commanded, captain Watson again displayed his intrepidity; and on the 12th May, 1748, was raised to the rank of rear-admiral of the vol. IX. No. 627.
ronet, succeeded Sir John-Hugh, the late baronet, June 15, 1789; married, in 1800, Miss Morland.—This family, long feated at Ayton, in the Libality of Norham, in the county of Northumberland, obtained a seat in the county of Gloucester. John Smyth lived in 1789; married, in 1800, Miss Morland.—This family became extinct in 1741, and was revived as above.—Motto, Qui capit capitur, He who takes is taken. —Family Seat, Long Alfton, near Brifol; Pucklechurch, and Malze Hill, both in Gloucefthire.

BLAKISTON, of London; created April 22, 1763.—Sir Matthew BLAKISTON, the third baronet, suc¬ceeded his father, sir Matthew, Sept. 26, 1806.—Matthew BLAKISTON, esq., member of Parliament for Westminster, was elected an alderman of London, 1753, sheriff in 1753, and lord-mayor in 1760. In 1759 he was knighted, and afterwards created a baronet as above.—Family Seat, Bonn Villa, near Lymington, Hants.

HORTON, of Chaderton, Lancashire; created Jan. 1764.—Sir Watts HORTON, the second baronet, was born Nov. 17, 1733; succeeded his father, sir William, Feb. 15, 1764; married, June 17, 1785, Harriet Stanlie, daughter and heir to Edward, present earl of Derby, by whom he has issue.—Family Seat, Chaderton, in the county of Lancaster.

AMYAND, (now CORNEWALL,) of London, now of Moccas Court, Herefordshire; created Aug. 4, 1664.—Sir George CORNEWALL, the second baronet, LL.D. a trustee of the British Museum, succeeded his father, sir George Amyand, in 1764; married, in 1771, Catharine, daughter and heir to Velters Cornewall, of Moccas, Herefordshire, esquire, many years member for that county, and by royal licence took the name and arms of Cornewall in 1771. By this lady he has seven children: Catharine-Frances, married, in March 1796, to Samuel Peploe, esq. of Garnstone, in Herefordshire; Elizabeth, in 1783, married, Dec. 12, 1785, Henry-Fleming-Devereux, fourteenth viscount Hereford; Charles, in 1784; Harriet, in 1787, married, March 1803, Thomas-Frankland Lewis, esq. of Harpton Court, Radnorshire; Caroline, in 1789. Sir George represented the county of Hereford in parliament from 1774 to the present time.—The present baronet is the eldest son of the above-named knight, and was knighted April 22, 1806, by the collar of the Garter, in the name and arms of Moccas. He was born Nov. 5, 1765. In the latter end of the year 1770, our inscriptions of arms of a family who figure in these memoirs, we have upwards of three hundred.

KNOWLES, of Lovel Hill, near Windfor; created Oct. 31, 1765.—Sir Charles-Henry KNOWLES, the second baronet, vice-admiral of the red, succeeded his father, sir Charles, Dec. 9, 1777; married, Sept. 10, 1800, Charlotte, daughter of Charles Johnston, of Ludlow, esquire; and has issue, a son and heir, born 1801.—Family Seat, Mawby, near Boltey, Botleys, and Vauxhall, both in Surrey.

GORDON, of Newark-upon-Trent, Nottinghamshire; created Aug. 21, 1764.—Sir Jenion-WILLIAM GOR¬DON, the second baronet, succeeded his father, sir Samuel, in April, 1789; married, Oct. 1781, Harriet-Frances-Charlotte Finch, second daughter of the Hon. Ed¬ward-Tinf Hatton, youngest son of Daniel, sixth earl of Winthifley, by whom he has issue.—The Gordons of Newark, of Moccas Court, and descended from William Gordon of Chricklaw, youngest son of John, first lord of Lochenvar, who, after marrying his lady and family, with benefit of survivorship, was...

pliment of five hundred guineas was made for his pocket expenses. He had also two ailes-de-camp, at 500l. a year each. After some years he revisited his native country, and died in the fortieth year of his age; and was succeeded by his only son, the present baronet.—Motto, *Semper paratus,* Always ready.—Family Seat, Lovel Hill, Berks.

EAST, of Hall-Place, Berkshire; created June 5, 1766.—Sir William East, the second baronet, born Feb. 27, 1738; married, June 29, 1753, Hannah, second daughter of Henry Caimor, esq. of Tokington, in Gloucestershire; by whom he had two sons, and one daughter:—Motto, Viscount, I get forward.—Family Seat, Hall-Place, Westminster.

Caroline-Anne, eldest daughter of George Vanfittart, of Quarley, in Hampshire, esquire; this lady dying in 1794, Sir Thomas married, secondly, a daughter of Humphrey Minchin, of Soberon, in Hants, esquire, by whom he had no issue. His surviving children by his first lady are, Thomas-Swynner, married, April 21, 1793, Charlotte Margaret, second daughter of the late Sir Roger Molyne, bart. Catharine-Harriet, born Jan. 1766; Richard, Caroline, Louisa, Anne, and John-Swymmer-Poulbot, all died young.—The tradition in Somerfetshire is, that this family has been seated at Orchardley, near Frome Selwood, in that county, from the time of the first baronet. Sir Amian Champneys, knt. lived the reign of Henry II. He had one son, Sir Amian Champneys, knt. who married Anne, daughter of W. Courtenay, earl of Devonshire, by his wife Blanch, daughter of Louis king of France. In consequence of that alliance, this baronet has, for supporters, two lions, rampant, gules, crowned murally; and by a grant of Louis XIV. of France, the lions are charged one with the arms of France, and the other with those of Navarre.—Motto, Pro patria non timidas perdere, Not afraid to die for my country.—Family Seats, Orchardleigh, in Somerfetshire; and Droxford, in Hampshire.

Andrews, of Shaw, Berks; created Aug. 19, 1765.—Sir Joseph Andrews, the second baronet, was born Sept. 1765; succeeded his uncle, Sir Joseph, Dec. 29, 1800. This family migrated from Northamptonshire, about the beginning of the seventeenth century, to the neighbourhood of Canterbury. From thence Henry Andrews removed to London; and, in the fatal pestilence, which raged in 1665, was cut off, with his whole household, except one infant, Henry, who lived to a considerable age, and, having acquired some fortune by the disposal of his father's effects, thought it right to take up arms again in 1729; he died the next year. His grandson, Joseph, at an uncommon early age, was appointed paymaster to the forces serving in Scotland, 1715.—Motto, Virtus fortuna sapientia, Wisdom conquers fortune.—Family Seat, Shaw, in Berkshire.

Thomas, of Yatton Place, Suffolk; created Sept. 6, 1766.—Sir George Thomas, the third baronet, succeeded his father, Sir William, Dec. 28, 1777; married, firstly, at Geneva, Mad. Scales, of Pregny le Tour; secondly, Miss Montague, by whom he has one son, William-Louis-Georgio, who married Miss Welch, by whom he had one daughter, Sophia.—Sir George, the first baronet, was defeated of a gentleman's family originally of Mommouthshire. He was nine years governor of Pennsylvania, and thirteen years captain general and governor of the Leeward Islands, in which stations he received the approbation and thanks of both his sovereign and of the inhabitants; ever having had in view the words of his motto, "Honesty is the best policy."—Family Seat, Dale Park, near Arundel, Suffolk.

Wolff, of Cums Hall, Hampshire; created Oct. 18, 1766.—Sir Jacob Wolff, bart. L.L.D. born Jan. 2, 1739, O.S. succeeded his late uncle, baron Jacob Wolff, in 1759, in his estates; and the emperors of Germany, Francis I. honoured him also with the patent of a baron, in July 1761, wherein he is styled "Jacob Van Wolff, Knight and Baron of the Holy Roman Empire," and likewise to all his lawful children, and their issue, males and females. Sir Jacob, being naturalized, settled in Hampshire, and on the 13th of October 1766, was created a baronet as above. He married, Dec. 12, 1766, Anne, only daughter of the Right Hon. Edward Welton, by whom he has one daughter, born Oct. 5, 1771; married, firstly, Nov. 29, 1772, captain Parlow, late of the king's own regiment of dragoons, from whom she was divorced; and secondly, in 1808, Philip Ditcher, esq. of Reading, in Berkshire.—Sir Jacob is the son of Sir Charles Godfrey Wolff, of St. Peterburgh, descended, on the father's side, from a noble Silesian family, that had a fief under the emperors of Germany, near Breslau; but, when the religious troubles commenced in Silesia, they were forced to quit that country, and seek an asylum under the crown of Sweden, where the Lutheran religion prevailed. When Peter the Great conquered Livonia, this Charles Godfrey was carried, being then an infant, 1704, in captivity into Woloford, a town in the interior parts of the Russian empire; and, arriving at the age of maturity, settled at Moscow, where the present baronet was born.—Motto, Dante Deo, By God's gift.—Family Seat, Chumleigh, Devonshire.

Champneys, of Orchardleigh, Somersetshire; created Jan. 12, 1767.—Sir Thomas Champneys, created a baronet on the above date, was born Oct. 9, 1745; married, firstly, Caroline-Anne, daughter of Richard Cox, of Quarley, in Hampshire, esquire; this lady dying in 1794, Sir Thomas married, secondly, a daughter of Humphrey Minchin, of Soberon, in Hants, esquire, by whom he had no issue. His surviving children by his first lady are, Thomas-Swynner, married, April 21, 1793, Charlotte Margaret, second daughter of the late Sir Roger Molyne, bart. Catharine-Harriet, born Jan. 1766; Richard, Caroline, Louisa, Anne, and John-Swymmer-Poulbot, all died young.—The tradition in Somersetshire is, that this family has been seated at Orchardley, near Frome Selwood, in that county, from the time of the first baronet. Sir Amian Champneys, knt. lived the reign of Henry II. He had one son, Sir Amian Champneys, knt. who married Anne, daughter of W. Courtenay, earl of Devonshire, by his wife Blanch, daughter of Louis king of France. In consequence of that alliance, this baronet has, for supporters, two lions, rampant, gules, crowned murally; and by a grant of Louis XIV. of France, the lions are charged one with the arms of France, and the other with those of Navarre.—Motto, Pro patria non timidas perdere, Not afraid to die for my country.—Family Seats, Orchardleigh, in Somersetshire; and Droxford, in Hampshire.

Hort, of Castle Strange, Middlesex; created Aug. 29, 1767.—Sir Josiah-William Hort, the second baronet, born July 6, 1791; succeeded his father, Sir John, (second son of John, archbishop of Tuam,) Sept. 1807.—Family Seat, Hortland in Kildare, Ireland.

Burnaby, of Broughton Hall, Oxontershire; created Oct. 31, 1767.—Sir William-Crisp-Hood-Burnaby, the third baronet, succeeded his father, Sir William-Chaloner.—Motto, Pro rege, For the king.—Family Seat, Broughton Hall, in Oxfordshire.

Burnard, (now Neale,) of Wallampton, Hants; created March 20, 1769.—Sir Harry Burnard Neale, the second baronet, a captain in the royal navy; succeeded his uncle, Sir Harry Burnard, April 14, 1791; married, April 15, 1795, a daughter of the late Robert Neil, of Shaw House, in Wilts, esquire; in consequence of which marriage he assumed the name of Neale. Sir Harry represented Lymington in two parliaments.—Family Seat, Wallampton, Hampshire.

Hume, of Wormley Bury, Herts; created Aug. 4, 1769.—Sir Abraham Hume, the second baronet, F.R.S. representative in the present parliament for Hatfield, was created by the late Robert Neale, of Shaw House, in Wilts, esquire; in consequence of which marriage he assumed the name of Neale. Sir Harry represented Lymington in two parliaments.—Family Seat, Wallampton, Hampshire.

1772; married, May 28, 1793, the Right Hon. Charles Long, now representative in parliament for Hailmec, joint paymaster of his majesty's forces; and Sophia, born May 31, 1788.—This family is a branch of the ancient family of the earls of Home, which see p. 608 of this volume.—Motto, True to the end.—Family Seats, Wormley Bury, in Herts; and Fernyfide, in Brixworth.

BERNARD, of Nettleham, Lincolnshire; created April 5, 1769.—Sir JOHN BERNARD, the second baronet, succeeded his father, Sir Francis, June 16, 1779.—This family has flourished in Northamptonshire, and neighbouring counties, in different branches, for many centuries. Godfrey Bernard, esq. was living in Wembord, in Yorkshire, in the reign of Henry VIII. The thirteenth in lineal descent from him was Sir Francis, the first baronet, who was a bencher of the Middle Temple, and practised at the bar some years. In 1738, he was appointed governor of New Jersey, and in 1760 of Massachusetts Bay, of which province he continued governor ten years.—Crest, a demi-bear, muzzled and collared.—Motto, Bear and forbear.—Family Seats, Nettleham, near Lincoln; and Nether Winchendon, Bucks.

ALLEYNE, of the Island of Barbadoes; created March 20, 1769.—Sir REYNOLD-ABEL ALLEYNE, the second baronet; succeeded his father, Sir John Gay, in 1801.—Alanus de Buchenhall was lord of Buchenhall in the reign of Edward I. and from him the numerous branches of Allen, Alley and Alleyne, derive their descent. Reynold Alleyne, fourth son of Richard Alleyne, D.D. was one of the first adventurers to the island of Barbadoes, and acquired a considerable estate there. The family have ever since remained in that island. Sir John Gay, the first baronet, was born April 28, 1724. He was many years member, and afterwards president, of the assembly of St. Andrew's, in Barbadoes, where he filled the station of a Justice, and was sometime a moesancer, fed publica vota: Let not your own, but the public, wishes actuate you.—Family Seat, Mount Alleyne, Barbadoes.

YOUNG, of Dominica; created March 20, 1769.—Sir WILLIAM YOUNG, the second baronet, F.R.S. and F.S.A. governor of the island of Tobago; born in 1743; succeeded his father in 1778; married, first, in July 1777, Sarah, daughter of Charles Lawrence, esq. by whom he had issue, William-Lawrence, captain in the Bucks militia, married, Dec. 21, 1805, Louisa, second daughter of William Tuffnell, esq. of Langley, in Essex; and George, second daughter of Richard Talbot, of Malahide Castle, in Ireland, esquire, by whom he has no issue, and was appointed, in 1803, governor of the island of Tobago.—Sir William Young of Leiny, knight, by tradition called a Royal cavalier, was born in 1693. The fourth in descent from him was William, born in 1755. He was lieutenant governor of the island of Dominica, and created a baronet as above.—Motto, Prufis through.—Family Seat, Hartwell, Houfe, near Aylesbury, Bucks.

HARLAND, of Sproughton, Suffolk; created March 19, 1771.—Sir ROBERT HARLAND, the second baronet, was born in 1765; succeeded his father, Feb. 27, 1784; married, in May 1801, Arethusa, daughter of Henry Vernon, late of Great Thurlow, Suffolk, esquire, eldest son of the earl of Shipbrooke, in Ireland.—Family Seat, Wherstead Lodge, Suffolk.

BLAKE, of Langham, Suffolk; created Sept. 19, 1772.—Sir PATRICK BLAKE, the second baronet, succeeded his father, Sir Patrick, and married, Aug. 13, 1789, the only daughter of James Phipps, esq. of the island of St. Christopher.—Family Seat, as above.

ST. JOHN, (now MILDMAY,) of Moulsham Hall, Essex; created Sept. 9, 1772.—Sir HENRY CAREW-ST. JOHN MILDMAY, the fourth baronet, M.P. for the city of Winchester; succeeded his father, Sir Henry-Paul of St. John Mildmay, knt. which see p. 608 of this volume. The family of Mildmay is fo ancient as to have been of great consequence in the reign of King Stephen; and it appears that one of them attended Richard I. to the Holy Land; where, as an acknowledgement of his services, he received from that monarch an achievement and family book, which he kept up to this day. Sir Thomas Mildmay, knt. was created a baronet by James I. in 1611; but dying without issue, in 1620, the title became extinct, and the estates went to his brother. In the reign of James I. the family of Mildmay spread almost over the whole county of Essex, and were then possessed of considerable estates, namely:—Sir Thomas Mildmay, bart. of Moulsham; Sir Henry Mildmay, knt. of Woodham Walter; Sir Humphrey Mildmay, knt. of Danbury; Sir Henry Mildmay, knt. of Wanstead; Sir Thomas Mildmay, knt. of Springfield Barnes; Sir Henry Mildmay, knt. of Grace; Sir Walter Mildmay, knt. of Nettleham; Carew-Hervey Mildmay, esq. of Marks; Sir Robert Mildmay, knt. of Taring.

Benjamin, the great grandson of Sir Henry, was summoned to parliament Feb. 10, 1669, by the title of baron Fitzwaltzer. Charles, his eldest son, succeeded his father in the barony; and dying, in 1738, without issue, was succeeded by his brother, Benjamin, in 1790, created earl Fitzwalter and viscount Harwich, and married Frederica, widow of Robert Darcy, earl of Holderness, and one of the daughters and co-heirs of the duke of Schomberg; and dying, Feb. 29, 1756, without issue, this branch of the family became extinct in the male line.

William, second son of Sir Thomas Mildmay, was of distinguished eminence in the reign of Edward VI. From him was descended Sir William, who was created a baronet by his present majesty; and to him Benjamin earl Fitzwalter devised his property, in consequence of which he became feated at Moulsham Hall. Sir William married Anne, daughter of Humphrey-Mildmay; and dying, without issue, in 1772, left his estates to his widow, who, at her decease, in 1795, devized them to the late baronet. From the last mentioned Sir Thomas, descended also Carew-Hervey, who attaining the age of ninety-six years, died in 1780, and was the last surviving issue of the Milldneys.

From another of the very numerous branches of this family, descended John, and Henry; the former of whom lost his life at the battle of Newbury, fighting for Charles I. whilst the latter took an active part on the side of the parliament, and sat as one of the judges on the king's trial, but did not sign the warrant for the execution. He was sentenced in 1661, to be confined for life; but was afterwards released, and died at Antwerp. All the valetudinary property that he had accumulated was confiscated, excepting his estates at Shawford in Hampshire, and at Newton in Middlesex. Letitia, heiress in the male line of the branch, married with Humphrey, younger son of Carew. Their issue were, Carew, and Anne, wife of Sir William Mildmay of Moulsham, baronet. Carew resided at Shawford, and married Jane, daughter of William Pefcod, recorder of Wincheste, and in 1768, leaving three daughters: Jane, married to Sir Henry-St. John, the late baronet; Anne, to John Clerk, esq. of Worthing, in Hants; and Letitia, to George-William Ricketts, esq. of Twyford, in the same county. Their issue were, Carew, and Anne, wife of Sir William Mildmay of Moulsham, baronet. Carew reigned at Shawford, and married Jane, daughter of William Pefcod, recorder of Wincheste, and died in 1768, leaving three daughters: Jane, married to Sir Henry-St. John, the late baronet; Anne, to John Clerk, esq. of Worthing, in Hants; and Letitia, to George-William Ricketts, esq. of Twyford, in the same county. After his marriage, Sir Henry, the late baronet, succeeded, in right of his lady, on the decease of the widow of Sir William, in 1795, to the principal family-estate at Moulsham; and the representation of four branches...

Baronets,

[Plate image of heraldic shields with inscriptions and symbols.]
branches of the family, after a lapse of 260 years, have bow again centered in the same persons.

The family of St. John, so prominent descended from the Princes of Basing, in Hampshire, at the time of the conquest, and nominally derive their surname from William de St. John, who entered England with the Conqueror; and whose army he attended as grand master of the artillery. From him, the thirteenth in lineal descent was Sir Oliver St. John, who had two sons; for John, ancestor to Lord St. John, of Eltley; and Oliver, who died at Font-Arabia, in Spain, in 1592, and was the ancestor of the present baronet. This family have, through all their generations, allied themselves to ancient and noble families. Sir Paulet, the late Sir Henry. Paulet-St. John Mildmay's grandfather, married, first, a daughter of Sir John Ruthven, baronet; secondly, Maria, widow of Sir Haswell Tynte; and, thirdly, Jane, widow of William Pecford, Esq. recorder of Winchester. He was created a baronet in 1772, and died in 1780, aged seventy-six, and was succeeded by his eldest son by his second lady, Sir Henry-Paulet, grandfather of the present baronet, who married Dorothy-Maria, daughter and co-heir of Abraham Tucker, Esq. and, dying in 1784, was succeeded by his only son, Sir Henry-Paulet, (who assumed the name of Mildmay,) the late baronet; who dying at Bath, Nov. 11, 1805, was succeeded by his eldest son, Henry-Carew, the present baronet. —Motto, Allea Hora. —Family Seats, Millam Hall, and Marks, Berser Park, and Shawford, in Hants; Hazlegrove, Somersethire.

WILMOT, of Ofmafon, Derbyshire; created Sept. 19, 1772.—Sir Robert Wilmot, of Ofmafon, the second baronet, succeeded his father, Sir Robert, Nov. 14, 1772; married, first, Julia, second daughter of the late Hon. Admiral Byron, and relict of the Hon. William Byron, eldest son of lord Byron, who died March 13, 1758, by whom he has a son, Robert-John. He married, secondly, in 1785, Mariana, daughter and heir of the late Charles Howard, Esq. of Litchfield, by whom he has four children, Mary-Anne, Charles-Toley, Augusta, and Eardley-Nicholas. —This family is a younger branch of that of Chaddesden, in the county of Derby. Robert Wilmot, of Chaddesden, Esq., who was the common ancestor of the two families, had, by Dorothy, his wife, daughter and heir of Laurence Sluigley, four sons; of which, Nicholas, the youngest, to whom his father devied the Ofmafon and other estates in Derbyshire, was born in Dec. 1611, was a serjeant at law, and, in Aug. 1766, was appointed chief justice of the Common Pleas, but re¬ signed Sept. 25, 1772.—Sir Richard Wilmot, the second baronet, succeeded his father, Sir Edward, Nov. 14, 1772, born May 8, 1796; and Mary-Anne-Rachael, born March 16, 1798.—John Palliser, of Newmanby Wiltshire; in the north riding of Yorkshire; married Anne, daughter of Michael Mecke, Esq. by whom he had six children.

From Thomas, the eldest son, descended, in the fourth generation, Sir Hugh, who, after passing through every inferior gradation of rank in the navy with reputation, was at length promoted to be an admiral of the white, and was for several years governor of Greenwich Hospital. He represented the town of Huntington for a short time in parliament, and was created a baronet as above, with remainder, in default of his own issue male, to his nephew, George-Robinson Walters, a captain in the royal navy; he dying in the lifetime of Sir Hugh, the title, on the decease of the latter, and according to the limitation of the patent, descended to the captain's eldest son, who therefore bears the name and arms of Palliser and Walters. —Family Seat, Lee, in Kent.

HUGHES, of East Bergholt, Suffolk; created July 17, 1772.—Sir Richard Hughes, the second baronet, was born in 1729; succeeded his father in 1780; married about 1760, Jane, daughter of William Sloane, of South Stoneham, in Hampshire, Esquire; by whom he has had two sons and two daughters: Richard, a captain in the navy; John-Thomas, a professor of the civil law in Jamaica; Louisa, died unmarried; and Rose. Mary married to John Boulton, Esq., a major of the town of New Rochelle. Sir Richard was very early bred to the navy, became a post-captain in 1755; promoted to a flag in 1780; and is now an admiral of the red. —The family of Hughes is descended first from Gwath Voe Mawr, prince of Cardigan, by Morweth, daughter and heir of Ynyr king of Gwent; secondly, from Llewellyn with the golden chain of Ylle, by Efa, daughter of Bletonap Kynyn prince of Powis; thirdly, from Conan, son of Jago ap Hywel, of Jago ap Hywel of Wales; married to Rabulphi, daughter of Al¬ fayd king of Dublin; fourthly, from Ilwold Dda, king of South Wales; fifthly, from Lhuddock, eldest son of Tudor Trevor, a vacancies of Wales, seventhly, from
from Rees, son of Tudor king of South Wales, by Gwen-llian, daughter of Jelfyn ap Gwraint prince of Glamorgan, eightly, from Kynan, third son of Gwaith Voed, by Evi, sister of Jelfyn ap Gwraint prince of Glamorgan. Howel, the Good, King of All Wales, who died 965, married Joanne, daughter of Cader eal of Cornwall. From Owen, his eldest son, descended, in the twenty-second generation, Sir Richard, who had a large battle of captain in the navy in 1729; and, after serving for many years with great respectability, he was appointed to the station of commissioner of the dockyard at Portsmouth. When the present king first visited that grand naval arsenal, his majesty rested at the commissioner's house, and created him a baronet.—Family Seat, East Bergholt Lodge, in Suffolk.

COOTE, of Donnybrook, Dublin; created April 25, 1759. —Sir CHARLES COOTE, the second baronet, succeeded his father, Charles, the 1st earl of Bellamont, Nov. 1804. —The family of coote is of great antiquity, and has been ennobled in two branches. From the elder branch descended the earls of Mountrath, which title was created in 1615, and has, since that time, been the title of the family. The second baronet, succeeded his father, Sir John, in 1804.—The family of coote is of great antiquity, and has been ennobled in two branches. From the elder branch descended the earls of Mountrath, which title was created in 1615, and has, since that time, been the title of the family. The second baronet, succeeded his father, Sir John, in 1804.

CLAYTON, of Aston, Lancashire; created May 3, 1774. —Sir RICHARD CLAYTON was created a baronet as above, with remainder to the heirs male of his father, John Clayton, esq. He married, 1730, Anne, daughter of Charles White, esq. of Manchester; whom he had four daughters, Henrietta, born Feb. 16, 1723; who married, 1763, lieutenant-colonel Browne, of the 17th regiment. —Robert de Clayton came into England with William the Conqueror; and for his services was created a baronet, as above, with remainder to the heirs male of his issue.

EDMONSTONE, of Duntreath, Stirlingshire; created May 3, 1774. —Sir CHARLES EDMONSTONE, the fourth baronet, succeeded his father, Sir Archibald, in 1774. —Sir CHARLES EDMONSTONE, the fourth baronet, succeeded his father, Sir Archibald, in 1774.

LEMON, of Carclew, Cornwall; created May 3, 1774. —Sir WILLIAM LEMON, D.C.L., born in 1748, was created a baronet, as above. He served in parliament for Penryn, from Dec. 1769 to 1774; and at the general election, in 1774, he was returned for the county of Cornwall, which he has represented ever since. He married Jane, eldest daughter of James Buller, of Morval, in Cornwall, esquire, by Jane, daughter of Allen, first earl Bathurst; by whom he had, Anne, wife, Sept. 5, 1766, of Sir John Davie, bart. by whom he has four children; Maria, married, June 4, 1787, Francis Jocelyn, esq. of Henbury, in Cheffire; William, born 1774, died March 1779; Louisa, married, April 22, 1786, lieutenant-colonel George Henry Dyke, of the guards, third son of Sir John Dyke, bart. Harriet, born 1779, died young; Emma; Frances; Isabella; Jane, married, Feb. 4, 1805, Anthony Buller, of Morval, Cornwall, esquire, nephew of the late Sir Francis Buller, bart. one of the judges of the court of King's Bench; Charles, born 1785; Tryphena Odlav, died young; and Caroline Matilda.—Family Seat, Carclew, in Cornwall.

BLAKE, of Twisel Castle, Durham; created May 3, 1774. —Sir FRANCIS BLAKE, the second baronet, suceeded
ered his father, Sir Francis, March 30, 1730; married Elizabeth, only surviving daughter of Alexander Douglas, of Raeburness, a British baronet at Billo- rah, in Pería, by whom he had had, Elizabeth; Francis, colonel of the late north regiment of fencible infantry; Robert-Dudley, colonel in the army; Isabella; Sarah; William; Eleanor; married, February 23, 1765, Bethell-Earnshaw Stag, esq. of Yorkshire, and has issue, a daughter, born Nov. 12, 1768. The family is of British extraction, and traditionally descended from Ap

Lake, one of the knights of king Arthur's round table, as inscribed on the Plate at vol. ii. p. 226. In the reign of Henry II. one of this family, a high-spirited youth, accompanied Richard de Clare, earl of Pembroke, furred Strongbow, in his memorable successful expedition, in which he never returned; but, after various military exploits and public services, feated himself at Menlaw, in the county of Galway, where he built himself a castle, and where his posteriority in a right line have continued to flourish ever since. But the most eminent man of this family was the highly-celebrated Walter Burrell, who died in 1657, unmarried.

-Family Seats, Twisel Castle, Durham; and Fowberry Tower, Northumberland.

FOLKES, of Hillington, Norfolk; created May 3, 1774.—Sir Martín-Browne FOLKES, F.R.S. created a baronet as above, married, Dec. 28, 1777, Fanny, daughter and co-heir of Sir John Turner, of Warham in Norfolk, baronet, by whom he has had, Martin-William-Browne, who died without issue, in 1798, aged 20 years; Fanny-Mary, married, in May 1822, Gilbert-Harvey Weir, esq. Anna-Martina; William; Lucy; Caroline, three of which died young; William-John; Henry; Lucretia-Georgiana. Sir Martin is member in the present and was in the two last parliaments, for King's Lynn. Martin Folkes, esq. ancestor of the baronet, was a barrister at law, and afterwards attorney-general in the reign of queen Anne.—Motto, Quo fera fera, What will be will be. Principes obfta Semper jidelis, Always faithful. — Family Seat, Sydling St. Nicholas, Dorsetshire.

BURRELL, late RAYMOND, of Valentine Houfe, Esq.; created May 3, 1774.—Sir Charles-Merrick BURRELL, the second baronet, succeeded his father, Sir William, in 1766; M.P. for New Shoreham; married, in 1782, to a daughter of the earl of Warham in Norfolk, baronet, by whom he has had, Martin-William-Burrell, who died without issue, in 1798, aged 20 years; Fanny-Mary, married, in May 1822, Gilbert-Harvey Weir, esq. Anna-Martina; William; Lucy; Caroline, three of which died young; William-John; Henry; Lucretia-Georgiana. Sir Martin is member in the present and was in the two last parliaments, for King's Lynn. Martin Folkes, esq. ancestor of the baronet, was a barrister at law, and afterwards attorney-general in the reign of queen Anne.—Motto, Quo fera fera, What will be will be. Principes obfta Semper jidelis, Always faithful. — Family Seat, Sydling St. Nicholas, Dorsetshire.

Sir William Burrell, the late baronet, succeeded to the title on the death of Sir Charles Raymond, bart. of Valentine House, Esq., by agreement to the limitation of the patent, May 3, 1774; he married, in 1773, Sophia, daughter of Sir Charles Raymond, bart. by which lady he had issue, Charles-Merrick, the present baronet; William-Raymond, died young; Walter; Percy, captain in the 6th regiment of dragoons, killed while galling his men against the enemy, at Buenos Ayres, Aug. 5, 1807; Algernon-Peter, died young; Juliana, married, April 14, 1806, George-Henry Cutchley, esq. of Sunning-hill Park, Berkshir; and Emily-Amelia.—Motto, Sub libertate quiescit, Reit under liberty.—Family Seat, Kneip Castle, Suffolk.

GIBBES, of Fackley, Oxfordshire; created May 30, 1774.—Sir Philip GIBBES, created a baronet as above, was born March 7, 1730-31; married Agnes, daughter and heir of Samuel Osborne, of the island of Barbadoes, esquire, by whom he has two sons and two daughters; Philip, a member of the council of Barbadoes, married, March 19, 1807, Maria, third daughter of Robert Knipe, esq. of New Lodge, near Berkham-fruit, Herts; Samuel Osborne, died at Grenada, in Jan. 1806, having married the daughter of — Billhop, esq. of Exeter, who died at Grenada, Aug. 20, 1805; Elizabeth, married, Dec. 29, 1797, the second baronet, born May 19, 1797, the second baronet, born May 30, 1774.—Sir John WEBB DUNSTRE, the second baronet, born May 30, 1774, succeeded his father, Sir John, Nov. 13, 1807; married, May 13, 1797, Elizabeth-Anna, daughter of the reverend James Marriot, LL.D. of Horronden, in Kent, by Catharine Bofworth, the only representative and heir of Sir John Bofworth, chamberlain of the city of London, and receiver general for the county of Middlesex, (which offices he obtained by a contest, memorable for being one of the most severe ever known in that city,) and has issue, John-James, born April 10, 1800; William-Marriot, born Aug. 31, 1804; Anne-Eliza, born May 11, 1803; another daughter, born Feb. 18, 1808. This family is descended from Sir George Smith, who was high sheriff of the county of Devon, and of the city of Exeter, in the reign of queen Elizabeth. His family held considerable possessions there, and in Somersetshire. His daughter was wife of sir George, father of the famous general Monk, afterwards duke of Albemarle.—Motto, Venera fid disdain, Always faithful.—Family Seat, Sydling St. Nicholas, Dorsetshire.

SMITH, of Sydling St. Nicholas, Dorsetshire; created May 3, 1774.—Sir John-Wyldbore SMITH, the second baronet, born May 19, 1797; succeeded his father, Sir John, Nov. 13, 1807; married, May 13, 1797, Elizabeth-Anna, daughter of the reverend James Marriot, LL.D. of Horronden, in Kent, by Catharine Bofworth, the only representative and heir of Sir John Bofworth, chamberlain of the city of London, and receiver general for the county of Middlesex, (which offices he obtained by a contest, memorable for being one of the most severe ever known in that city,) and has issue, John-James, born April 10, 1800; William-Marriot, born Aug. 31, 1804; Anne-Eliza, born May 11, 1803; another daughter, born Feb. 18, 1808. This family is descended from Sir George Smith, who was high sheriff of the county of Devon, and of the city of Exeter, in the reign of queen Elizabeth. His family held considerable possessions there, and in Somersetshire. His daughter was wife of sir George, father of the famous general Monk, afterwards duke of Albemarle.—Motto, Venera fid disdain, Always faithful.—Family Seat, Sydling St. Nicholas, Dorsetshire.

DUNTZE, of Rockbere Houfe, Devonshire; created Oct. 28, 1775.—Sir John DUNTZE, the second baronet, succeeded his father, Sir John, Feb. 5, 1794; married, in June 1804, Dorothea, daughter of sir Thomas Carew, of Tiverton Caftle, Devonshire, baronet, who died Nov. 1, 1806, leaving issue a fon, born Oct. 1, 1806.—Family Seat, Payford, Devonshire.

PEPPERELL, of Kittery, New England; created Oct. 29, 1774.—Sir William PEPPERELL was created a baronet as above. He married, Nov. 12, 1757, Elizabeth, daughter of the honourable Isaac Royall, of his majesty's council in Massachusetts's Bay, esquire, who died Oct. 3, 1775 by whom he had three daughters: Elizabeth, born April 17, 1765; Mary, born Nov. 2, 1771; Harriet, born Dec. 17, 1773, married Charles-Thomas,
Thomas, eldest son of Sir Charles-Grave Hudson, of Wanlop, in Leicestershire, baronet; and a son, William. 

This family is descended from one of that name in the Wanlop, in Leicestershire, baronet; and a son, William, born Sept. 27, 1753. This family is descended from one of that name in the county of Cornwall. The great grandfather of the present baronet was the first of this family who settled in New England: he was distinguished by his riches, and his fations, both in a civil and military life. The title of baronet was first conferred on his son, William, in 1745, was commander in chief of the successful expedition against Cape Breton. On his death the title became extinct, but was revived in favour of Sir William, the present baronet.—Motto, Virtute parta tuenui, Defend what your valour has acquired.—Family Seat, Kittery, in New England. 

MONTGOMERY, of Magbie Hill, Peeblesshire; created Oct. 29, 1774.—Sir George Montgomery, the second baronet, successéd Sir William, the late baronet.—Family Seat, as above. 

WARREN, of Little Marlow, Bucks; created May 20, 1775.—The Right Hon. Sir John-Borlase Warren, knight of the Bath, and of the imperial order of the crescent, groom of the bedchamber to the duke of Clarence, vice-admiral of the blue squadron, commander in chief of the fleet in North America, and one of his majesty's most honourable privy council, was created a baronet as above. He married, in 1780, Caroline, youngest daughter of Sir John Clavering, by Lady Diana Wel, third daughter of John earl Delawarr, by Charlotte Maccarty, daughter of Donagh earl of Clancarty; by whom he had one son, in the foot guards; and a daughter, Frances-Maria, married, Aug. 25, 1802, to Charles-George Sedley, esq., of the honourable Henry Sedley. Sir John, during his cruzc off the coast of France, under the immediate orders of the admiralty, captured, destroyed, and recaptured, 250 vessels of various denominations. On his return from a cruise in the coast of Ireland, he received the unanimous thanks of both houses of parliament; was honoured with the freedom of the cities of London and Derry; appointed ambassador to the court of Peterburgh, where his integrity and general conduct particularly recommended him to the esteem of the present emperor Alexander. Appointed a captain in the royal navy, April 25, 1781; rear-admiral Feb. 14, 1796; and vice-admiral of the blue squadron, Nov. 9, 1802. The brilliant services of Sir John are too numerous to be given in this place; but for a more accurate detail we refer our readers to the article ENGLAND, vol. vi.—Sir John is descended from an ancient family, whose estates were situated in Buckinghamshire and Northamptonshire. The name of Warren is of Norman extraction; Sir John is related to the family of Cheifhe, and is descended from the ancient earls of Warren, of the Plantagenet family. The family of Borlase was very anciently situated in Cornwall, and afterwards removed into Buckinghamshire, where, by their hospitality, they became very popular, and were at different times members for that county, and for the boroughs of Wycombe and Marlow. John Borlase, of Cornwall, was the father of Sir John Borlase, one of the lords justices of Ireland, created a baronet May 4, 1643, and afterwards voted a delinquent, and compounded for 2400l. He died Aug. 13, 1672, and left one son, Sir John, who was member for Marlow in many parliaments, and died in 1688, when that baronetcy became extinct.—Motto, Leo de J uda eft robur nojrum, Our strength is the lion of Judah.—Family Seat, Stapleford, Northamptonshire. 

BOYD, of Danfon, Kent; created May 20, 1775.—Sir John Boyd, the second baronet, born October 27, 1753; succeeded his father, Sir John; married, Feb. 29, 1784, Margaret, fifth daughter of the late right honourable Thomas Harley, uncle of the present earl of Oxford, a privy councillor, and father of the city of London, by whom he had, John, born June 5, 1786; Augustus, born July 11, 1787; died March 1, 1788; Margaret, born April 4, 1791; and George, born March 10, 1793.—This family is descended from the earls of Kilmarock, in Scotland.—Motto, Confido, I trust.—Family Seat, Danfon, near Graveford, Kent. 

ETHERINGTON, of Kingston-upon-Hull, Yorkshire; created Nov. 11, 1775.—Sir Henry Etherington, created a baronet as above, married Maria-Confoanti, daughter of Sir Thomas of the precent for Charles, by whom he has issue.—This family is descended from the Etheringtons, of Great Driffield, in Yorkshire. One of their ancestors was knighted after the battle of Bosworth: the present baronet is of a younger branch.—Family Seat, North Ferriby, near Hull, Yorkshire. 

LEITH, of Burgh St. Peter's, Norfolk; created Nov. 11, 1775.—Sir George Leith, the second baronet, a lieutenant-colonel in the army, and parliament-governor of the Prince of Wales's Island; succeeded his father, Sir Alexander.—Family Seats, Sanbant, and Burgh St. Peter's, both in Norfolk. 

HAMILTON, of the Mount, Uxbridge, Middlesex; created July 6, 1776.—Sir Charles Hamilton, the second baronet, captain of his majesty's ship Temeraire, and M.P. for Hooton; succeeded his father, Sir John, Jan. 24, 1784; married, April 19, 1802, Henrietta-Marchia, only daughter of the late George Drummond, esq. of Stanmore, Middlesex. This baronet is descended from the illustrious house of Hamilton, in the male line, being the great grandson of William, eldest brother of James Hamilton, fifth earl of Abercorn, who settled at Clifton, in Kent, and was one of the burgesses. John Hamilton, captain in the royal navy, of Marlborough Houfe, near Portsmouth, was created a baronet for his judicious and gallant conduct, during the siege of Quebec, in 1775, by landing the guns and men of his majesty's ship in the river St. Lawrence, and thereby materially assisting in the preservation of that place, under the command of Sir Guy Carleton, now lord Dorchester, K.B. He had issue, for Charles, the present baronet; and Edward, born March 12, 1772, a captain in the navy, and created a knight by his majesty's letters patent in 1800, for his gallant achievement in cutting out his majesty's ship Hermione from Porto Cavallo in South America.—Motto, Through, the face of the creel.—Family Seats, The Mount, near Uxbridge; and Devonshire Place, London. 

MACKWORTH, of Gnoll, Glamorganshire; created Augtus 14, 1776.—Sir Digby Mackworth, the third baronet, succeeded his brother, 1792; formerly in the navy, colonel of the Oxford volunteers in 1798, and again in 1803, which he resigned in 1804. He married Jane, only daughter and heir of the reverend Matthew Darrell, by whom, who died in 1786, he had issue, Digby, born June 23, 1789; Frances-Juliana, born Oct. 14, 1790; Herbert, born Oct. 13, 1791; Charlotte-Harriet, born Aug. 5, 1796; Mary, born Oct. 6, 1797; Augustus, born Sept. 20; Anna-Maria, born June 19, 1802; Georgiana-Lucy, born Aug. 14, 1803; Arthur-Francis-John, born Sept. 7, 1806. This family has been many years of great respectability in South Wales. The grandfather and father of the present baronet represented the borough of Cardiff, in parliament, for upwards of fifty years.—Motto, Quell angus na ciyojalad, Rather death than shame.—Family Residence, Oxford. 

LAROCHES, of Bristol, Somersetshire; created Aug. 14, 1776.—Sir James Larches, created a baronet as above, was born in 1724; married, Dec. 16, 1754, betu-Rachael-Anne, daughter and heir of William Yeats,
mated a baronet May 16, 1684, and was ancelior of the

■

frrft captain of lord Rodney's fhip, in the viftory of

recovery of Newfoundland from the French in 1762;

as Robert, father of fir Frederic, was next

William, born Jan. 31, 1803; and another fon, born

born June 14, 1793; Marianne, born July a7, 1794;

Jane, daughter of Roger Morris, efq. by whom he had,

named George, obtained a licenfe to take the name of

advanced-to that dignity in

He was fucceeded by

two-fops; Henry and James; and two daughters, Mar¬

tcond daughter of fir Sewfter Peyton, by whom he had

third fon, was a colonel in the army, and married Al¬

dashiv.pp.d, efq. whils brother, Robert, was cre¬

nected to parliament in Edw. III. Rd. II. and

were forfeited by the attainder of their defeendant,

duced Northumberland, Henry I. his fon, to. effeft the

reduftion, and create a barrier againft Scotland, di vided

this family, which divided into many branches.; parti¬

furnmons to parliament in Edw. III. Rd. II. and

became the' chief feat of

were of the Feudal Barons. Some of the branches at length

were of Ford Caftle,

paricularly thofe of Ford Caftle,

lary of Herioun and Hern

in the Battle.Abbey Roll, “of such noblemen and

gentlemen of marque as came into England with the.

duke of Normandy.” The duke not having fully re¬

aised Northumberland, Henry I. his fon, to. effeft the

reduce, and create a barrier againft Scotland, divided

Northumberland into feudal baronies; one of which,

barony of Heron, whereof Haddifon was the head, he

granted in 1160 to the anceror of fir Richard. In 1266

defended to Emeline, the heir general of William

eron, her grandfather. She married John lord

Darcy; and in 1526 the baronies of Darcy and Heron

were forfeited by the attainer of their defcendant,

Thomas lord Darcy. Upon the defcendant of Haddifon

to Emeline Heron, Ford Coffie became the chief feat of

this family, which divided into many branches; particu¬

larly thole of Ford Coffie, Bokenfield, Chipchafe, Ap¬

plynde, Creffy, and Newar; the barons of which had

luminous to parliament in Edw. III. Rd. II. and

Hen. IV. Camden in his Britannia, calls this

bellofeg et clarà familia Heronorum. It is one of the 270 moft an¬

cient and noble families of England (the barons by te¬

ure), of which there remained only twenty-four male

branches in 1675, when Dugdale published his History

Feudal Barons. Some of the branches at last failed for want of male heirs; and others united again in

the ancers of the baronet. The pedigree is curioufly

preserved through all the branches; and it appears that

in 1526, on the death of John, the laft Heron of Boken¬

field, without male issue, Robert Heron, then of Newar,
his first cousin, became chief of the family; and his great grandfather, Richard, was created a baronet as above, with remainder, in default of issue male, to John Cockhill, of Cockhill, gent, ancestor of this family.

An earl of Great Britain.—Family Seat, Sprotlborough, in Yorkshire.

Family Seat, Leyfel, Staffordshire.

An earl of Cumberland.—Family Seat, Kelfton, Somersetshire.

If we have enough.—Family Seats, Pengwern, and Lippincott, of the City of Bristol, in Gloucestershire.

The guardian does not sleep.—Family Seat, Randall, near Leatherhead, in Surrey.

LOYD, of Pengwern, Flintshire; created July 25, 1778. —Sir Edward Price Loyd was created a baronet, as above, with remainder, in default of issue male, to Bell Loyd, of Bodfack, in Montgomeryshire, eqq. M.P. in the present parliament for Beaumaris; married Margaret, daughter of the late Sir Roger Molynt, bart.—Motto, Heb dido Heb, dom Ddym DDuwadygan, If we have God, we have enough.—Family Seats, Pengwern, and Pontrhyfyl Hall, Flintshire.

HAWKINS, of Kelston, Somersetshire; created July 25, 1778. —Sir John Hawkins, the second baronet, was born Feb. 9, 1752; succeeded his brother, Sir Casar, July 2, 1793; married, Aug. 11, 1804, the eldest daughter of John Surtees, eqq. of Seaton Burne, in Northumberland.—Family Seat, Kelston, Somersetshire.

Lippincott, of the City of Bristol; created July 25, 1778. —Sir Henry Lippincott, the second baronet, succeeded his father, Sir Henry, in 1781.—Motto, Scutæ dulcisque reææ, Upright in prosperity and peril.—Family Seat, Stoke, in Gloucestershire, near Bristol.

TAYLOR, of Leyfel, Staffordshire; created July 25, 1778.—Sir R. B. Taylor, the third baronet, was born October 1779, succeeded his father, Sir John, in 1788.—Family Seat, Leyfel, Staffordshire.

Copley, of Sprotborough, Yorkshire; created Aug. 15, 1778. —Sir Joseph Copley, the third baronet, succeeded his brother, Sir Lionel, April 11, 1801; married, May 23, 1799, Cecil Hamilton, daughter of the Hon. Rev. Frederic Hamilton, son of lord Archibald Hamilton, of William the third duke of Hamilton, whose former marriage with John James marquis of Abercorn, K.G., had been dissolved by act of parliament in 1798, and to whom he was united, Oct. 27, 1759, was pleased to grant the precedence of the daughter of an earl of Great Britain.—Family Seat, Sprotborough, Yorkshire.

Wombwell, of Wombwell, Yorkshire; created Aug. 26, 1778. —Sir George Wombwell, the second baronet, was born March 4, 1753; succeeded his father, Sir George, Nov. 2, 1793; married, July 19, 1794, lady Anne Belasyse, daughter of Henry Earl Fauconberg, by whom he has had three sons: George, born April 13, 1758; Lady Margaret, married Sir Walter, May 24, 1793; and Frederick—Henry, married, April 13, 1797, died Aug. 24, 1807.—The first of this family was Robert de Wombwell, living about the end of the fourteenth century; 4. Jordan.

This William died shortly after returning from the crossides in 1028, leaving two sons, Alduin and Galfridus. Alduin died 1035, and was succeeded by his sons, Galfridus, who married Petronilla, daughter and heir of Christian Rich, and Galfridus, who married the heiress of Bell Lloyd, of Bodfack, in Montgomeryshire, esq. The family acquired the estate of Wombwell, in Yorkshire, then held by the family of the Earls of Derwentwater.

The family of Wombwell is said to have been of ancient and noble family, being the son of Ralph Ballet, earl of Angouleme, in the earldom of Agen; and Galfridus II. Ridel, chief captain under Charlemagne, and was afterwards united to this family.

Sir John Cockhill, of Cockhill, gent, ancestor of this family, who married Agnes, daughter and heir of Albert II. earl of Perigord, by her he had two sons: Alduin, (so called after his paternal uncle, Alduin, the famous abbot of St. Dennis, and chief minister of France under Louis le Debonnaire,) who succeeded to the earldom of Angouleme; and Galfridus, who had for his inheritance the earldoms of Perigord and Agen, ancestor of the earls of Perigord, which branch was afterwards united to this family.

Wulgrinus died 886.

Alduin, earl of Angouleme, rebuilt the walls of this chief city of his principality, in order to defend it against the invasions of the Normans, who, at that time, grievously infested the country. He died 946, and was succeeded by his sons, William, furnamed sector-Ferror, or Taille-Cutter, and Galfridus, who acquired this name from his having, in an engagement with the Normans, cloven through, with one stroke of his sword, the body of Storis, their king, though clad in armour. He was succeeded, 963, by his son, Arnold earl of Angouleme, who became a monk, 998, and was succeeded by his son, William, who married Gerberga, daughter of Galfridus, the second earl of Agen, and sister of Hugon, earl of Angouleme.

This William died shortly after returning from the crossides in 1028, leaving two sons, Alduin and Galfridus. Alduin died 1034, and was succeeded by his brother, Galfridus, who married Petronilla, daughter and heir of Christian Rich, and Galfridus, who married the heiress of Bell Lloyd, of Bodfack, in Montgomeryshire, esq. The family acquired the estate of Wombwell, in Yorkshire, then held by the family of the Earls of Derwentwater.

The family of Wombwell is said to have been of ancient and noble family, being the son of Ralph Ballet, earl of Angouleme, in the earldom of Agen; and Galfridus II. Ridel, chief captain under Charlemagne, and was afterwards united to this family.

Sir John Cockhill, of Cockhill, gent, ancestor of this family, who married Agnes, daughter and heir of Albert II. earl of Perigord, by her he had two sons: Helias, who succeeded to the earldom of Perigord, whose line ended in Margaret, marrie
great possessions in England. He afterwards entered into
the church, and became the chief support of the king
against his chief subject. He married twice, and the
second wife, that fec was filled by Becket, who gave
him the name of the Archdevil of Canterbury. Galfridus
afterwards became Bishop of Ely, and grand jufliciary
of the realm. During the whole reign of Henry II, he
was employed in the most important services. He died
1189, leaving immense wealth, which Richard I. seized,
on account of his having died intestate. Galfridus, by
his first wife, had two sons, Galfridus and Richard. The
former, Galfridus V. succeeded to the principality of
Blaye, and is the celebrated troubador, whose poetry
and adventures are of the most singular nature which
the ages of chivalry ever produced. He died of love at
Tripoli. Richard, the second son, upon his brother's
death, succeeded to almost all the estates in England.
This Richard had reaffumed the surname of Baffet.
Galfridus's second wife was Sibilla, sister to William
Mauduit, Lord of Hanflap, and ancestrix of the earls of
Warwick. By her he left two sons and a daughter:
Hugh, the eldest son, is the direct ancestor of this fa-
mony. William, the second son, was high chancellor of
Scotland, under William the Lion. He died 1214.
Hugh Ridel obtained the principality of Blayc upon
the death of his half-brother, Galfridus V. and married
Margaret, daughter and heir of Peter de Sancto Me-
dardo, or Semerc. He was a most powerful baron, and
in the absence of Henry II. for W. the Lion, king of Scotland, when taken prisoner at the
battle of Alnwick. To that prince he was allied through
the Anjou, Cheffer, and St. Liz, families. Galfridus,
son of Hugh lord of Blayc, &c. was one of the barons
who Conpired against king John, 1212. It would far
exceed the limits of this division of the article Heraldy
to particularize the several succeeding personages of
this family, which seems to have preferred, in a great
measure, its grandeur and importance, until the reign
of Henry VI. when they entirely lost their possessions
in France, and much of their English property.
In the sixteenth century, John Ridel, eq. of Sallowe,
head of the family, removed into Scotland, where they
have ever since been seated. We shall only add, that fir
James-Milles Riddell, the present baronet, is the thirty-
third in descent from Wulgrinus, the first Earl of Angou-
letine and Perigord.—Motto, Over the crest, De Apulia;
under the arms, Ulile et aude, Profitable and pleasant.—
Family Seat, Arndamurchan, and Sunart, Argyllshire.

GUNNING, of Ritham, Kent; created Oct. 17, 1773.
—Sir Robert Gunning, Bart. K. B. was nominated,
in 1776, his Majesty's envoy extraordinary at the court
of Denmark, where he resided till 1771, when he was
named minifier plenipotentiary to Frederic the Great,
gentleman of Prussia; and in the following year went in the
fame character to the court of Peterburgh, where his
conduct meeting with the approbation of his majesty,
he was honoured with the encomiums of the
Baih; and, at the request of the king, was invested with
them, in the most distinguished manner, by the emprefs
of Russia. After some years residence there, he, upon
his return home, was created a baronet. He married,
in 1767, Anne, daughter of Robert Sutton, eq. who
left issue, 1. Charlotte, born Jan. 5, 1759; few years
married, sir J. Clavering, to the queen; married,
the Hon. Stephen Digby, brother to Henry earl Digby,
and by her, who died in 1794, he had one fon, Robert-
Henry, born September 1795, and one daughter, Ifabella,
born May 1794. 2. George-William, born Feb. 15, 1763;
moved, Feb. 10, 1794, Elizabeth, second daughter of
her father, and married, first lord Bradford, by whom
he has issue, Robert-Henry, born Dec. 26, 1795; George,
born Dec. 18, 1796; Henry, born Dec. 17, 1797; Or-
lando, born May 12, 1799; Spencer-Gricwold, born
Oct. 27, 1800; John, born Dec. 1801; Elizabeth, born
Jan. 27, 1803. 3. Isabella, born 1766, and married, Oct.
15, 1795, to major-general Ross.—About the period
of the reformation, there were two branches of the Gun-
nings, who held considerable property in the coun-
ties of Kent, Somerset, and Gloucefter. That in So-
merft and Glouceffer terminated in the perfon of Rob-
ert Gunning, of Cold Afton, in Gloucefferire. From
that in Kent defended Peter bishop of Ely, who died
in 1684. Richard Gunning, of this branch, settled in
Ireland in the reign of James I. he left one fon, John,
who married a daughter of Edward Malone, eq. and
was married, in the county of Roscommon, where he died
possessed of a very considerable property. He left two
fons, Barnaby and John. From Barnaby defended the
once-celebrated beauties the counties of Coventry and
duchess of Hamilton (afterwards of Argyll), and the
late major-general Gunning. John, the younger fon of
John, married Mary, daughter of William Maron, eq.
of the county of Dublin, by whom he had two sons,
Robert and John, who died unmarried. Robert, the
elder son, married his cousin, Catharine, daughter of
Thomas Edwards, eq. and, dying in 1750, left two fons,
Robert, now the baronet, and William, who, command-
ing a company in the second regiment of foot, highly
distinguished himself at the taking of Guadaloupe, where
he bravely fell, generally regretted. —Motto, Imperio
Regit unus aquo, One governs with equitable sway.—
Family Seat, Horton, in Northamptonshire.

RUMBOLD, of Farrand, Yorkshire; created March
23, 1779.—Sir Rumbold, the third baronet, suc-
ceded his father, for G. B. who died at Memel, Dec.
15, 1807.—The first baronet was the well-known fir
Thomas Rumbold, governor of Madras.—Family Seat,
Farrand, Yorkshire.

FARMER, of Mount Pleafant, Suffolk; created Oct.
26, 1779.—Sir George William Farmer was created
a baronet, as above to the knighthoods in his
 gallant father, captain Farmer, of bis majesty's ship
Quebec; married, 1786, Mifs Kenrick.—Captain Far-
nier, being on a cruise off Ufhan, in company with the
Rambler cutter, came up with and clofely engaged a
large French frigate, called the Surrveillante, mounting
42 guns, while the Rambler was engaged within a French
cutter, as superior in force as the French frigate was to
the Quebec. The action on both fides was warm and
bloody, for fix hours, when the French cutter bore
away; but the Rambler was too much disabled in her
masts and rigging to follow her with any hopes of coming
up. The commander, therefore, feeing both the frigates
damaged, and the Quebec take fire, endeavoured to get
to near the Quebec as possible, in hopes of taking
off some of her men; but, there being little wind, and a large
fwell, no other afliftance could be afforded than by hold-
ing out the boat, which picked up one master's mate,
bec's people, the enemy's frigate at the fame time, firing
two young midshipmen, and fourteen more of the Que-
bec's people, the enemy's frigate at the fame time firing
at the boat. The Quebec continued to burn very fierce-
y for four hours, when she blew up. No language can
express the gallantry and magnanimity displayed by
captain Farmer on this occasion, not only in the engage-
mant, but in the fatal catastrophe with which it was at-
tended. Having his arm broken towards the clofe of the
engagement, he tied his handkerchief round the
flufhe of the fheet-anchor, waiting

the dreadful explosion, which numbered him with de-
parted heroes!—Family Seat, Clairville, Suffex.

BANKS, of Revey Abbey, Lincolnshire; created
March 24, 1781.—The Right Hon. Sir Joseph
Banks, knighted, and made a baronet, was created
March 24, 1781; and Sept. 3, 1808.—Sir Joseph
Banks was created a baronet as above; and married
September 1790; Voltmuller, born November
to the lady of Sir Edward Knietchbull, bart.,
23 Edw. III. and married Eleanor, daughter
and heir of William Mowbray, esq. The tenth in de-
scendence from 1768 until his death.—Family Seat, as above.

INGILBY, of Ripley, Yorkshire; created March
24, 1781.—Sir John INGILBY, knight of the Bath, LL.D.
and presented her with robes of velvet, for which she
Workington (where she landed) to Carlisle, in 1568,
and was a family of
the Fletchers of Tallantire. Thomas, the eldest
son, had five sons: Sir Richard, the eldest, was
leaving an estate of the value of above twenty thousand
and presented her with robes of velvet, for which she
Workington (where she landed) to Carlisle, in 1568,
and was a family of
the Fletchers of Tallantire. Thomas, the eldest
son, had five sons: Sir Richard, the eldest, was
leaving an estate of the value of above twenty thousand
and presented her with robes of velvet, for which she
Workington (where she landed) to Carlisle, in 1568,
and was a family of
the Fletchers of Tallantire. Thomas, the eldest
son, had five sons: Sir Richard, the eldest, was
leaving an estate of the value of above twenty thousand
and presented her with robes of velvet, for which she
Workington (where she landed) to Carlisle, in 1568,

own expence, for Charles I. and was killed at Rawton Heath, near Chester, in 1645, and was succeeded in title and estate by his eldest surviving son, Sir George, who married Alice, daughter of Hugh vifcount Colverin, by whom he had one son, Henry, who dying unmarried, the title became extinct.—Motto, Mariæ, non Capitis; Fly away, and die by love.—Family Seats, Clea Hall, Cumberland; and Ashley Park, Suffolk.

PALK, of Haldon House, Devonshire; created May 24, 1782.—Sir LAWRENCE PALK, the second baronet, L.L.D. succeeded his father, Sir Robert, in 1798. He married, first, 1759, Mary, eldest daughter of John third earl of Dartney, who died in 1751, leaving a son, Robert, who died in the following year; secondly, in 1793, Dorothy-Elizabeth, eldest daughter of Wilmot earl of Lisburne, by whom he has six sons and two daughters now living: Lawrence-Vaughan; Robert-John; William; Henry; John; Edward; Arthur; Elizabeth-Mallet; and Mary. Sir Lawrence was formerly member for Albrierton, and now for Devon.—The family of Palk is descended from Henry Palk, who was poifessed of Ambrooke, in the county of Devon, in the reign of Henry VII.—Family Seat, Haldon, Devonshire.

AFFLECK, of Dalham Hall, Suffolk; created May 28, 1782.—Sir GILBERT AFFLECK, the second baronet, succeeded his father, Sir Edmund.—Family Seat, Dalham Hall, Suffolk.

BRISCO, of Crofton Place, Cumberland; created June 4, 1782.—Sir WASTELL BRISCO, the second baronet, born in 1770; succeeded his father, Sir John, Dec. 27, 1803; married, Nov. 18, 1806, Misg Letter.—Robert Brisco, of Brisco, the first we had mentioned of this family, was great grandfather of Robert, who lived in the reign of Edward I. I Sold, the younger son of the last-named Robert, married Margaret, daughter and heir of Sir John Crofton, knt. by which marriage he had the manor of Crofton, with divers other manors. From this the pedigree is minutely brought down to John Brisco, of Crofton, D.D. rector of Orton, and vicar of Afpatrie, whose eldest son, John, was created a baronet as above.—Family Seat, Crofton Place, Cumberland.

APREECE, of Walsingham, Huntingdonshire; created June 4, 1782.—Sir THOMAS-HUSBAY APREECE was a created baronet as above. He was born Nov. 15, 1744, and married Dorothea, youngest daughter and co-heir of Shuckburgh Alby, esq. of Queenby, in Leicestershire, by whom he had three children: Emily, wife of Mr. Peacock; Shuckburgh-Alby, born Dec. 17, 1765, was married, Dec. 28, 1782; having married, Oct. 16, 1799, Jane, daughter and heir of Charles Kerr, esq.; Thomas-George.—This family is of great antiquity, being descended from Gruffyth ap Rees prince of South Wales, who died July 25, 1202. He married Maud, daughter of Walter de Bruce, lord of Brecknock, from whom descended Blethen ap Maynerch, lord of Brecknock, who married Oen, daughter of Tudor king of South Wales. The fourth in descent from him was Rees ap Howell, whose poettery were denominated Ap Rees for several generations, but at length the present mode of writing it was adopted by Robert Apreece, esq. who was colonel in the army, and was killed at Lincoln, on the king's side, in the civil wars.—Motto; Labora ut in aeternum vivas, Labour for eternal life.—Family Seats, Walsingham, in Huntingdonshire; and Honington, in Lancashire.

VANE-TEMPEST, of Long Newton, Durham; created July 15, 1782.—Sir HENRY VANE-TEMPEST, the second baronet, succeeded his father, the reverend Sir Henry Vane, D.D. in June 1793; and in January 1795, further to the estates of his maternal uncle, John Templett, esq. and assumed that additional surname; he is representative in the present parliament for the county of Durham; married Anne-Catharine Macdonnell, countess of Antrim in Ireland in her own right, by whom he has issue Frances Vane, born Jan. 16, 1800.—This family is descended from Howell ap Vane, of Malmöthorpe, and continued in a direct line to Henry Vane, who was knighted at the battle of Poitiers. He married Grace, daughter and heir of sir Stephen de Leke, knt. The family of Vane descended from John, eldest son, Richard, was ancestor of the earls of Westmoreland. John, the youngest son, who was living in 1733, was great grandfather of sir Henry Vane, knt, collector and comptroller to Charles I.—Family Seat, Wynd Hall, Durham.

KENT, of Fornham St. Genevieve, Suffolk; created Aug. 3, 1783.—Sir CHARLES KENT, A.M., formerly CHARLES EGLETON, esq. was created a baronet as above; married Mary, daughter and co-heir of Sir John Wordsworth, of Wordsworth, in Yorkshire, esq. by whom he has issue, Mary; Sarah-Ann, married, in March 1837, Leonard-Walinke Childers, esq. Charles-Egleton, and Louisa. Sir Charles assumed the name of Kent, in pursuance of the will of his maternal grandfather.—Family Seat, Grantham House, Lincolnshire.

GEARY, of Oxenheath, in Kent; created Aug. 17, 1785.—Sir WILLIAM GEARY, the second baronet, succeeded his father, Sir Francis, in 1795; he is a director of Greenwich-hospital.—Motto, Chafe.—Family Seat, Oxenheath, Kent.

PARKER, of Baffingbourn, Essex; created Dec. 26, 1782.—Sir PETER PARKER was created a baronet as above; admiral of the fleet; married Miss Nugent, of the family of the earls of Westmzeth, and by her (who died Jan. 18, 1802) had issue, 1. Christopher, vice-admiral of the red, died May 26, 1804, having married Augusta, daughter of the honourable admiral John Byron, fon of William fourth lord Byron, and by her (who died March 10, 1784) left issue, Peter-John; John-George-Edward; Charles-Chris topher; and Julia-Maria. 2. Walter, died young, and two daughters. 3. Antoinette, married, in 1785, John Ellis, esq. of the island of Jamaica, and has issue, John; George; Elizabeth-Caroline; and Antoinette. 4. Anna, married, Sept. 10, 1780, George Ellis, esq. M.P. in 1796, for Seaford, author of the elegant Specimens of Early English Poets, and other classical works. Sir Peter is the son of rear-admiral Christopher Parker, descended from an ancient family in Ireland, who died in Henry-street, Dublin, Feb. 5, 1765, leaving issue, Sir Peter, the present baronet; and George, who died in 1791. Sir Peter was bred to the navy, appointed a lieutenant in 1743, and on May 6, 1747, was promoted to the rank of captain. In 1757 he commanded the Woolwich, of 44 guns, on the Leeward-Island station, where he remained until the evacuation of Guadeloupe, in which service he was very actively engaged. In 1762 he was appointed to the Buckingham, of 70 guns; in this ship he had the good fortune conferably to distinguish himself. In the spring of this year admiral Keppel (afterwards viscount Keppel) failed on the expedition against Bellisle; the Buckingham was employed on this expedition; the continued to be engaged in covering the newly-acquired conquest, and in blocking up the small remains of the French naval force in the contiguous ports. Immediately after the surrender of Bellisle, commodore Keppel detached a squadron under the command of sir Thomas Stanhope, for the purpose of attacking such ships as might be in the Baque Road, and of destroying the works which had been erected on the isle of Aix; the Buckingham was in this squadron, and to captain Parker was entrusted the performance of this latter service; at the close of July the fortifications were completely destroyed; but, previous to the accomplishment of this service, captain Parker had a brisk encounter with a number of prans belonging to the enemy, which, having been expressly constructed for the purpose of carrying very heavy cannon, were con-
dered by their inventors as extremely formidable: from the circumstance of their lying remarkably low in the water, the enemy had conceived that the guns of the English could not be brought to bear against them; but in this they were deceived, and the prams were, obliged, with much precipitation, to abandon their ill-judged attack.

In 1772 Sir Peter Parker was appointed to a command on the American station, with the rank of commodore. May 28, 1777, he was promoted to the rank of rear-admiral of the blue squadron. In November following he was appointed to command on the Jamaica station, as successor to admiral Guyot. Jan. 29, 1778, he was again promoted to be rear-admiral of the blue squadron. In 1779 he was farther advanced to the rank of vice-admiral of the blue. During the command of Sir Peter on the Jamaica station, the celebrated engagement among the honourable captains (now admirals) Cornwallis, and the French squadron, commanded by M. le Mufte Fiquet, took place. Sept. 26, 1780, he was made vice-admiral of the white. He continued his command on the Jamaica station during the year 1781, his cruisers being uniformly serviceable; but the following year, 1782, he returned to England in the Sandwich, and arrived at Spithead. This was the memorable year of Lord Rodney's splendid victory; and Sir Peter Parker had the honour of conveying to the British thrones the conte de Grasse, and several other French officers of rank, who were captured in the action. In 1787 he was elected for the borough of Malden. Sept. 24, 1787, he was advanced to the rank of admiral of the blue squadron, and on the 11th of April, 1794, to the same rank of the white. He continued commander in chief at Portsmouth till Sept. 16, 1799, when, on the death of admiral Earl Howe, he attained the summit of his high honours, in becoming admiral of the fleet. Sir Peter Parker's progress in the navy has been regular, steady, and uniform; his private and professional character stood unimpeached; and shortly after his arrival in England, his majesty was graciously pleased, in reward of his distinguished services, to create him a baronet of Great Britain. Sir Peter is deputy grand master of the society of Freemasons, under his royal highness the prince of Wales.

GARDINER, of Roch Court, Hants; created Dec. 21, 1782.—Sir John-Whalley-Smythe Gardiner, J.D.D., was created a baronet as above, and, in default of heirs male, to James Whalley, esq. and Thomas Whalley, of Foxley, in Berks, and their heirs male. Sir John married, first, 1757, Mifs Newcombe; and secondly, in August 1767, Frances, second daughter of the late Oswald Molrey, esq. of Bolsworth Castle, Cheshire, and sister of Sir Oswald Molrey, bart. —Family Seat, Clerk Hill, Lancaster.

GRAHAM, of Netherby, Cumberland; created Dec. 28, 1782.—Sir James Graham was created a baronet as above. He was born in April 1741; married, in 1761, lady Catherine Stewart, eldest daughter of John, seventh earl of Galloway, K.T., by whom he has one son, James, Robert-George, born June 7, 1792; and six daughters, Elizabeth Frances; Elizabeth Anne; Maria Catharine; Caroline; Georgiana Susan; and a daughter born 1795. The family of Graham, or Graeme, formerly Graeme, is descended from the earls of Menteith, in Scotland; and Malice Earl of Menteith came to that title in right of his mother, whose name was Stuart. He had issue, Patrick, who married a daughter of the lord Erskine; and John, from whom the principal Grahames in the borders are descended; he was summoned John with the Bright Sword. On some diffuse, he retired with many of his clan and kindred, and from the earls of Menteith, in Scotland; and from the reign of Henry IV. From John descended, in the fourth generation, Richard, who in the reign of James I. was in the service of the duke of Buckingham. He was created a baronet, and in the rebellion in 1642 armed in defence of his royal master. At the battle of Edgehill he received many wounds, and lay amongst the dead all night. He died in 1653. Sir Richard, his grandson, in 1689, was created viscount Prellon, and fat in the Scots parliament under that title. He was several years ambassador at the court of France, and on his return was made mafter of the wardrobe, and after that secretary of state to James II. Upon the revolution he was sent to the Tower, but in a short time was released. Afterwards, intending to go to king James, in France, he, with some others, was apprehended in a boat, on the river Thames, and committed prisoner to Newgate. Upon his trial he was found guilty of high treason, and received sentence accordingly, but by the intercession of friends he was pardoned, and died in 1693. Charles, his grandson, third viscount Prellon, dying without issue, in 1739, the title became extinct. —Motto, Reaon contents me. —Family Seat, Netherby, in the county of Cumberland.

SYKES, of Sledmere, Yorkshire; created March 4, 1783.—Sir Mark-Masterman Sykes, the third baronet, M.P. for the city of York, born Aug. 20, 1771, succeeded his father, Sir Christopher, September 1823; married, Nov. 11, 1795, Henrietta, daughter and heir of Henry Mafferman, of Lettington, in Yorkshire, esq. —Family Seat, Sledmere, in Yorkshire.

DALLING, of Burwood Park, Surrey; created March 4, 1783.—Sir William-Windham Dalling, the second baronet, succeeded his father, Sir John, 1794. —William Guise, esq. of Elmore, in Gloucestershire, died about 1755, aged fifty-seven. He married Cicely, daughter of John Dennis, by whom he had four sons; of whom Christopher, the eldest, was created a baronet, July 10, 1661, and married Rachel Corfolis, descended from a noble Italian family of that name, by whom he had a son, John, who married Elizabeth, daughter of Sir John Grubham Howe, bart. from whom descended the late Sir William Guise, bart. who married, 1753, to a minor, so that the title became extinct, but was next year revived as above. —Family Seat, Burwood Park, Surrey.

GUISE, of Highham, Gloucestershire; created Dec. 16, 1783.—Sir Berkeley-William Guise, the second baronet, succeeded his father, Sir John, 1794. —William Guise, esq. of Elmore, in Gloucestershire, died about 1755, aged fifty-seven. He married Cicely, daughter of John Dennis, by whom he had four sons; of whom Christopher, the eldest, was created a baronet, July 10, 1661, and married Rachel Corfolis, descended from a noble Italian family of that name, by whom he had a son, John, who married Elizabeth, daughter of Sir John Grubham Howe, bart. from whom descended the late Sir William Guise, bart. who married, 1753, to a minor, so that the title became extinct, but was next year revived as above. —Family Seat, Burwood Park, Surrey.

HAMOND, of Holly Grove, Berks; created December 10, 1783.—Sir Andrew-Snape Hamond, F.R.S., controller of the navy, an elder brother of the Trinity House, was knighted for his distinguished conduct at sea in 1778; and was created a baronet as above, with remainder, in default of issue male, to his nephew, Sir Andrew-Snape Douglas, kn. married Anne, daughter and heir of Henry Graeme, of Gortly, esq. and has issue.

BOEVEY, of Flaxley Abbey, (heretofore Barrow, of Hygrove,) Gloucestershire; created Dec. 10, 1783.—Sir Thomas-Crawley Boevey, the second baronet, born Feb. 14, 1757, succeeded to this title, by limitation of the patent, 1788, on the death of the late Sir Charles Barrow, bart. January 1784. He married, Feb. 20, 1759, Anne, second daughter of the reverend Thomas Savage, rector of Standish in Gloucestershire, by Eleanor, only daughter and heir of Thomas Barrow, esq. who was uncle
uncle of the late Sir Charles, by whom he has twelve children: Thomas Crawley, born Nov. 28, 1769, married, Oct. 28, 1807, Mary-Albinia, daughter of Sir Thomas-Hyde Page, kit. a captain in the royal engineers; Anne, Dec. 1775; Sarah, Feb. 1777; Catharine, Sept. 1772; John-Lloyd, Feb. 1775; Eleanor, Dec. 1778; Margaret, 1821, Richard Ireton-Wenger, esq., Charles, 1793; George, 1781; Mary, 1783; Elizabeth, 1784; Margaret, 1786; Joanna, 1788.—Motto, Est quod videris, Be rather than feem.—Family Seats, Flaxley Abbey, and St. Michael's, both in Gloucestershire.

MORSEHEAD, of Trenant Park, Cornwall; created Dec. 10, 1783.—Sir John Morsehead was created a baronet as above. July 20, 1797, he was appointed Sur- renderer to the prince of Wales; April 7, 1798, lord warden of the Flanaries, and chief steward of the duchy of Cornwall, in the counties of Cornwall and Devon; colonel of the Devon and Cornwall Miners, Jan. 26, 1799; married, in 1773, Elizabeth, daughter and co-heir of Sir Thomas Frederick, of Hampton, in Middlesex, and Hulcombe, in Surrey, bart. by whom he has issue, 1. Selina, married, in Jan. 1809, Sir Charles Mill, of Mottisfield, in Hampshire, bart. 2. Frederica-Trefire. 3. Eliza-Caroline. 4. John.—Family Seat, Trenant Park, Cornwall.

RYCROFT, of Farnham, Surrey; created Dec. 10, 1783.—Sir Nelson Rycroft, the second baronet, succeeded his father, Sir Richard, in May 1833; married, July 11, 1752, Miss Read, third daughter of Henry Read, of Creffield, in Norfolk, esq., who died in 1824.—Family Seat, Farnham, Surrey.

SMITH, of Newland Park, Yorkshire; created Dec. 10, 1783.—Sir Edward Smith, the second baronet, succeeded his father, Sir John-Silver, June 15, 1789; born Aug. 13, 1768; married, Sept. 29, 1804, Susan, youngest daughter of Henry Dawkins, of Standlynch, in Wiltshire, esq., by lady Jane Colyear, daughter of Charles second earl of Lonsdale, bart. 2. Frederica, married, 1781, Finch Finch, esq. of Shelford, in Cambridgeshire, and died 1780, leaving one son. 2. Juliana-May, wife of Sir Robert-John Buxton, bart. 3. Thomas, married, 1795, Anne, daughter and heir of Hugh Hare, esq. of Harpham, in Norfolk. 4. John, late a captain of dragoons. 5. Rev. Miles, late a judge of the court of Newton and Hethel, both in Norfolk; married, 1791, Mary Beevor, of Norwich, by whom he has a daughter. 6. Arthur, a captain of infantry, on half-pay. 7. The Rev. George, rector of Cove and Willingham, in Suffolk; married, 1791, Jane, daughter of the reverend Arthur Branthwaite, of Skipton, in Yorkshire.—The name of Beevor is of considerable antiquity in the parish of Peniston, in Yorkshire; but, the register of that place being destroyed, the pedigree cannot be traced higher than William Beevor, esq. who died 1666. He left two sons: William, ancestor to the Beevers in Yorkshire; and Abraham, who was of Heckmumwayke, in Yorkshire, esq. and died 1666.—Family Seat, Hethel, Norfolk.

LOMBE, of Great Melton, Norfolk; created Dec. 10, 1783.—Sir John Lombe (formerly Hasie) was created a baronet as above, with limitation successively to his brother, Edward Mase, of Hall, in Norfolk, esq. (who died in May 1804) and to the heirs male of his issue, Virtue, wife of Richard-Paul Joddrell, of Saxlingham, in the same county, esq., who died March 25, 1806. From a younger branch of this family was descended Sir Thomas Lombe, knt., an alderman of London, celebrated for his introduction into England, from Italy, the process of throwing off the mumps, for which purpose he erected the silk-mills at Derby, and received a reward of 14,000l. from parliament, in 1722.—Family Seat, Great Melton, Norfolk.

DURRANT, of Scottoe, Norfolk; created Dec. 19, 1783.—Sir Thomas Durrant, the second baronet, succeeded his father, Sir Thomas, in 1790, and in 1799 married Miss Steenbergen, and has issue.—Family Seat, Scottoe, in Norfolk.

PEEPS, of London; created Dec. 19, 1783.—Sir Lucas Peep, M.D., physician extraordinary to his majesty, was created a baronet, to him and his issue male, with remainder to his brother, William-Weller Peeps, esq. afterwards Sir William Weller, late one of the masters in the high court of chancery; he married, 1772, Jane-Elizabeth Leficke, in her own right countess of Rothes in Scotland, by whom he has had one son and two daughters: 1. Charles, born 1774; 2. Harriet, June 21, 1777, married, in 1804, William Courtenay, esq., eldest son of Reginald Courtenay, late lord bishop of Exeter. 3. Henrietta, born Sept. 21, 1783, deceased.—Family Seat, Box Hill, Surrey.

WOOD, of Barnsley, Yorkshire; created Dec. 10, 1783.—Sir Francis-Linley Wood, the second baro-
Ali, narrowly escaped from becoming his prisoners; Hyder Ali was, at the time, ravaging the Carnatic. During Mr. Macpherfon's stay at Madras, he became known to the nabob Mahomed Ali, who, finding that his pursuit was a voyage of literary and local inquiry, opened to him all the calamitous circumstances of the country, and charged him with a confidential communication to his majesty's first minister; a commission which afterwards led, in 1769, to the nomination of a British minister at the court of the mahomed. The Nabob Indiaman having been sent from Bombay to convey troops to the siege of Mangalore, Sir John, then about twenty-two years of age, as a volunteer at the forming of the Octagon fort, at the entrance of the harbour of Mangalore, and was charged by commodore Watfield, of the British forces, to carry his petition, to the account of its success to the earl of Shelburne. He arrived in England in the year 1768, in the Lion's Indiaman, and in the year 1770, he embarked a second time for India, having been appointed to the company's civil service, under the presidency of Fort St. George. In the year 1773, he was appointed paymaster to the company's soldiers under the command of all the projects of France against the British power in the Carnatic. It was in consequence of that confidential communication, that the secret orders of the 15th of April, 1778, were sent to India, directing the attack upon Pondicherry before any declaration of war had taken place. Had not those orders arrived in India at the moment they did, Hyder Ali, who had made a truce with the Marhats in order to join the French in the Carnatic, would have been in time to prevent the reduction of Pondicherry, and the consequent eventual discomfiture of all the projects of France against the British power in India. In January 1773, Sir John Macpherson was appointed by the court of directors, and confirmed under his majesty's commission, a member of the supreme council of Bengal, in the room of Richard Barrwell, esq. Having embarked for India in the fleet under the command of governor Johnstone, he was in the memorable action of the 15th of April 1781, in the Laccadive Sea, when his Indiaman, at Porto Praya, one of the Cape Verde islands; an action in which the attack of admiral Suffrein, who commanded five French ships of the line, was repulsed effectually. Arriving, in August 1781, at Madras, which was then invested by the forces of Hyder Ali, who had overrun the Carnatic, Sir Macpherson, in conjunction with Lord Macartney, governor of Madras, Sir Eyre Coote, commander of the forces on the coast, and Sir Edward Hughes, admiral of the fleet, opened a negotiation with the Marhattas government, a negotiation which, fortunately, led to an immediate cession of all the British government to the nabob, offers which aimed at the total overthrow of the British power in the Carnatic. If I am not to obtain any thing for myself; but, after all he had seen in his travels on the continent, to aid the cause of a general peace." He continued to sit till the dissolution of parliament in 1782. Since that period he has not appeared in any public situation.—Motto, Si jure bardi, Thus the bards have told.—Family Seat, Renc, Invernesshire.

COULHOUGH, of Lufs, Dumbartonshire; created baronet of Scotland, Aug. 4, 1823; and of Great Britain, June 10, 1785.—Sir James COULHOUGH, the second baronet, succeeded his father, Sir James, in 1787; married, Nov. 26, 1791, Elizabeth, daughter of Sir Andrew Smith, and is buried, Aug. 21, 1813, Miss Fraser, daughter of Sir Anthony Shirley, second son of Sir Thomas Shirley, who went to annoy the Spaniards in their settlements in the West Indies. He afterwards travelled to Peru, and returned thence in the fleet, then under the command of governor general and commander in chief of the forces in one person, when he was accordingly superceded by earl Cornwallis, in September 1786. During the period of the administration of twenty months, he conciliated the native states, maintained the company's dominions in their constitutional situation of one million and a half hundred thousand pounds sterling in the expenditures of the Bengal government, and concluded with the French governor-general of Mauritius, in April 1786, the convention, by which the hostile plans of the cabinet of England against India, were effectually counteracted and defeated. For these services he received the unanimous thanks of the court of directors and proprietors of the India company, and his majesty was pleased to raise him to the rank of a baronet in June 1786. After transferring the government general to earl Cornwallis, he remained several months in the supreme council. His health declining, he went for its recovery from Calcutta to Madras, and the Cape of Good Hope, and returned afterwards to Europe. In 1790, he finally resigned the company's service, and in the close of that year went to the continent, where he travelled till August 1793; having visited the principal capitals and courts of Germany, Italy and Spain. He was elected in 1796 member for the borough of Hornham, and elected unanimously by the freethinkers; having declared to the contending parties on the day of election, "that his object in becoming a member of parliament, was not to obtain any thing for himself; but, after all he had seen in his travels on the continent, to aid the cause of a general peace." He continued to sit till the dissolution of parliament in 1782. Since that period he has not appeared in any public situation.—Motto, Si je puis, If I can.—Family Seat, Rosedown, in Dumbartonshire.

DOUGLAS, of Springwood Park, Roxburghshire; created June 10, 1786.—Sir George DOUGLAS, the second baronet, succeeded his father, Sir James, in 1787; married, Oct. 16, 1786, Elizabeth, daughter of Sir David, third earl of Glasgow, and by her (who died Feb. 15, 1801) had issue, Elizabeth, Georgiana, born Sept. 20, 1784, died Aug. 22, 1795; Helen, born Dec. 1790, died Jan. 1791; John-James, born July 18, 1792.—The late baronet entered into the navy, and was knighted for bringing the government to the shore of Quebec, in 1759; he commanded a fleet at the Leward Islands, 1761; took Dominica, and had a broad pendant at the siege of Martinique, in 1751. He was created a baronet in 1786, and was elected representative of the Orkneys in 1774, and 1776.—Family Seat, Springwood, Roxburghshire, North Britain.

SHIRLEY, of Out Hall, Wivelishead, Suffex; created June 27, 1786.—Sir Anthony SHIRLEY, the second baronet, a lieutenant in the royal navy, was born in 1772, and succeeded his father, Sir Thomas.—Sir Anthony Shirley, second son of Sir Thomas Shirley, of Whifdon, in Suffex, was one of the gallant adventurers who went to annoy the Spaniards in their settlements in the West Indies. He afterwards travelled to Peru, and returned thence in the fleet, then under the command of governor general and commander in chief of the forces in one person, when he was accordingly superceded by earl Cornwallis, in September 1786. During the period of the administration of twenty months, he conciliated the native states, maintained the company's dominions in their constitutional situation of one million and a half hundred thousand pounds sterling in the expenditures of the Bengal government, and concluded with the
HERALDRY.

ny, and also sent ambassador from the sophi to James I.
Sir Francis, the elder brother, was unfortunate.
Thomas Shirley, of Preston, in Suff., esquire, married
Elizabeth, daughter of Drew Stapley, of London, by
whom he had six sons and five daughters, Anthony,
the second son, created a baronet, March 6, 1661,
and married Anne, daughter of Sir Richard Onslow, by
whom he had one daughter, Elizabeth, and a son, Sir Richard; whose eldest son died unmarried in 1702,
by which the title became extinct, and the estate went
to his sisters and co-heirs.

We now return to the issue of Thomas Shirley, esquire, mentioned above. Thomas, the second son, died 1683.
William, the third son, married a daughter of Mr. Oglander, by whom he had a son, William, who was a merchant in London; married Elizabeth, daughter of John Goodman, and died 1701. William, his son, was appointed, in 1742, governor of the province of Mass-
achusetts, died 1746. David Shirley, of Prestow, in Suff., who assumed the surname by his marriage to
Anne, eldest daughter of Thomas Westnorn, of Riven Hall, esquire, May, his wife, fifer and co-
heir of Sir Richard, the late baronet, under the former patent, by whom (who died in 1777) he had two sons: Thomas, who succeeded his father, Sir James, in 1787; and John, who married Norah, daughter of Sir Richard Coke, and has issue, William, the third son, married a daughter of Mr. Goodell, and died 1701. William, his son; was created a baronet, March 6, 1661, and married Anne, daughter of Sir Richard Onslow, by
whom he had one daughter, Elizabeth, and a son, Sir Richard; whose eldest son died unmarried in 1702,
by which the title became extinct, and the estate went
to his sisters and co-heirs.

ORDS, of Morpeth, in Northumberland; created July 11, 1792. Sir William Ord, 2nd baronet, is brother to Lord Bolton. He married, first, in 1786, Margaret, daughter and heiress of Sir John Ord, brother and heir of Richard Stephens, eqq. of St. Helena, in South Carolina, (who died in 1789) by whom he had one son, John, who died in his infancy. He married, secondly, Jane, the eldest daughter of John Fere, eqq. by whom he had a daughter, named Emma, born in 1801, and died Oct. 1685; and a son, named John, born 1803. Sir John, in 1766, first entered in the navy; in 1773, was made a lieutenant; in 1777, promoted to the rank of commander; in 1786, post captain; and in 1783, he was appointed governor of the island of Dominica. In 1796, he was created a baronet. In 1795, he was promoted to a flag; in 1797, he was made vice-admiral of the red; in 1801, vice-admiral of the blue; in 1802, vice-admiral of the red; Nov. 9, 1805, admiral of a blue squadron. M. P. for Yarmouth, Hants.—Residence, Gloucester Place, London.

MALLETT, of Wilbury House, near Ameybury, Wilts; formerly of St. Audries, in Somersetshire; created Feb. 12, 1791. —Sir Charles Warre Mallet, F.R.S. and A.S. in the year 1770 entered into the service of the East India company, and held several offices of great trust and responsibility. In 1785 he was appointed plenipotentiary to the court of the peshwa, or head of the Marhattas, previous to which he had visited the Great Mogul, and been created one of the nobles of his empire. He was created a baronet as above; left Bombay, in Feb. 1788, of which place he had been acting governor, and reached England in July of the same year; married, Sept. 17, 1799, Sufanna, eldest daughter of Mr. James Wales, a celebrated painter, who fell an untimely and much-lamented sacrifice to the ardour with which he devoted himself, in the climate of India, to the collection of subjects for his elegant pencil; and has five, five sons: Alexander; Charles-St.-Lo; William Wyndham; George-Grenville; and Arthur. —Malleus, Maule, or Mallet, was, while defensive armour was in use, and previous to the invention of muskets, one of the offensive weapons of a well-armed warrior, generally made of iron, and used like the mace, to destroy the enemy through or under armour that could not be penetrated by edged or pointed weapons. Thus Edward I. was called Malleus Scotorum, and the origin of this family-name is to be attributed to some similar cause, from its having been applied similarly to one person of the race, celebrated for his general prowess, or particular dexterity in the use of this weapon. For the origin of this family, though we have traces of its celebrity in Norway, as kings of that country, previous to the Norman settlement in France, yet, as connected with English annals, it is unnecessary in this place to establish the authenticity of its genealogy beyond the conquest; in which great enterprise, William lord Malet de Greville was one of the great barons that accompanied the Conqueror, and on Harold's being slain, was charged by the Conqueror with the guard and protection of the Norman Bench, from which court he afterwards resided at the Common Pleas. See the article BULLER, vol. iii. p. 503. —Family Seats, Churston Ferrers, and Ottery St. Mary, both in Devonshire; and Lupton House, Cornwall.

OAKLEY, of Shrewbury, Shropshire; created June 5, 1790. —Sir Charles Oakley was created a baronet as above. He was born Feb. 16, 1751; and married, Oct. 19, 1773, Henrietta, daughter and heiress of Robert Oakley, of Whitchurch, in Shropshire, esquire, by whom he has issue, Charles, born Sept. 9, 1774; Helen, March 24, 1776; Henrietta, Jan. 21, 1782; Georgiana, Feb. 19, 1785, married, Dec. 6, 1804, Roger Kynaston, of Witham Grove, Essex, esquire; Louisa, April 12, 1789, married, Nov. 26, 1805, George Reid, jun. eqq. of Watlington Hall, Norfolk; William and Henry, twins, Dec. 6, 1787; Amelia, Oct. 1, 1789; Herbert, Feb. 10, 1791; Emma, July 3, 1792; Edward, Nov. 9, 1792; William, May 12, 1795; Cornelius, June 16, 1801; and Frederick, Sept. 5, 1802. Sir Charles was in the civil service of the East-Indies company, and, after going through several important offices, was appointed governor of Madras in 1790, where he resided in 1794. —Family Seats, Shrewsbury.
to hold an eminent place in the nobility of Normandy, till the late revolution) acquired vast possessions in England, in which the whole wealth and celebrity of the family, at the general survey, possessed of thirty-two lordships in Yorkshire, three in Essex, one in Hampshire, twelve in Nottinghamshire, eight in Lincolnshire, and 221 in Suffolk, of which Eye was the chief. The fortunes of so great a family were maintained in the full prosperity of the crown and monarchy, and we find it elevated and displayed accordingly. To its above-mentioned great possessions were added others in Somersetshire, where it held twelve knights' fees, with baronial rank; in which character William Lord Mallet's (grandson of the first William) signature and arms are annexed to Magna Charta. In succeeding ages it has been frequently confirmed in the property and dignity of the family; the baronial rank and territory devolved by females to the families of Pointz, and Vivian, or Vivonia. Two branches, however, retained great property and respectability in the county of Somerset, viz. of St. Audries, and of Enmore, which were Enmore Castle, St. Audries, Sutton Mallet, Creek Mallet, Shipton Mallet, Poynington, Oak, Compton, Conquest, &c. all of which are now alienated.

KENNAWAY, of Eccot, Devonshire; created Feb. 29, 1791. —Sir John Kennaway entered into the service of the East India Company, in 1772, as a cadet, being then in his thirteenth year; and, after serving three years, 1781, 82, and 83, was appointed a midshipman to marquis Cornwallis. In 1788, he was appointed resident at the court of the Nizam, with whom, on the breaking out of the war with Tippoo Sultaun, in 1790, he concluded a treaty of alliance, for which service he was advanced to the dignity of the baronetage. Under the auspices of marquis Cornwallis he entered into the negotiations, and concluded the preliminary and definitive treaties of peace, between the allied powers and Tippoo, by which half the dominions of the latter were ceded, and 3,000,000l. paid to the allies; in 1796, the East India Company settled on him an annuity of 1,000l. He returned to England, 1794, and in Feb. 1795, married Charlotte, second daughter of James Amyatt, esq. by whom he has issue, John, Charles Edward, Charlotte-Eliza, and Maria-Lawrence. —Reference, Eccot, near Ottery St. Mary, Devonshire.

LUSHINGTON, of South Hill Park, Berkshire; created April 26, 1791. —Sir Henry Lushington, the second baronet, born Oct. 27, 1755, succeeded his father, Sir Stephen, Jan. 13, 1807. —The late baronet, Sir Stephen, was born June 17, 1753; in 1780, he was made a major of the East India Company, and more than once filled the chair with the highest credit. —Family Seat, South Hill Park, Berkshire.

JAMES, of Langley Hall, Berkshire; created June 31, 1791. —Sir Walter James (formerly Head) was created a baronet as above; warden of the Mint. He married, April 25, 1750, Jane, daughter of Charles Pratt, earl Camden, by whom he had seven children: Walter; Frances; Jane, married, in June 1803, John Trower, esq. Mary-Anne; Frances; Charlotte; and Elizabeth. —Motto, J'ayme à jamais, I love always. —Family Seat, Langley, Berkshire.

ERSKINE, of Torry, Fifeshire; created June 27, 1791. —Sir William Erskine, the second baronet, succeeded his father, Sir William, April 1795. —This family is a branch of the noble family of Buchan, being descended from William, second son of David, second lord Cardross, and first earl of Buchan. Lieutenant-General William Erskine, colonel of the twenty-sixth regiment, who was created a baronet as above, had received his majesty's commission to go to Ireland, to take upon himself the command of the troops in that kingdom, and was preparing for his departure, when he was seized with a spasm, and died, April 1795. He had been in the service of his country near fifty years, during which he was engaged in fifty campaigns. He will be long remembered and regretted, by the whole army, being as much beloved for his social qualities, as esteemed for his personal bravery and extensive military talents. He has left three sons, one of whom, John Drummond, is collector of Buncleand in Bengal; and four daughters. —Family Seat, Torry, near Alloa, in Fifeshire.

 MARTIN, of Lockynge, Berkshire; created June 21, 1791. —Sir Henry William Martin, the second baronet, born Dec. 20, 1765, succeeded his father, Sir Henry, Aug. 7, 1794; married, June 23, 1792, Catharine, daughter of Thomas Powell, of the Bench, in Middlesex, by whom he has had issue, Henry, who died young; and another Henry, born Oct. 3, 1801. —Martin of Toura was a general in the army of William the Conqueror; and, in 1777, conquered the cantred of Camoys and Dirlington, in Pembrokehire, where the barony of which was granted to the early Robert Fitz-Martin founded the abbey of St. Dogmael, within the barony of Kemoys, in the title of Henry I. William, Owen, and Martin, of Seaford, were his descendants. William, his eldest son, married Joan, daughter of Rees ap Griffith, prince of Wales. From them descended,
Heraldry.

the tenth generation, Jofiah Martin, who, in the reign of Elizabeth, went to Ireland in a military capacity, with experience to Chichester, from whom he received many favours. His grandforn suffered considerably on the adverse party gaining possession of Belfast, in which he was, in 1649, chief magistrate.—Crest, On a wreath, a Dexter hand, brandishing a flabe.—Motto to the crest, Pro patrio, For our country.

Under the arms, Auxillo ob alto, By help from above.—Family Seat, Lockynge, Berks.

ROUSE-BOUGHTON, of Route Lench, Worceftershire, and Downton Hall, Shropshire; created June 21, 1791.—Sir J ohn R OUSE-BOUGHTON was one of the commissioners for auditing the public accounts, was created a baronet as above; but, having since succeeded to the baronetage of his paternal ancestors, the Boughtons, his pedigree on that side is given in p. 693.—Maternally he is descended from the very ancient family of Rou, or Rufus, of Route Lench, of which family, Sir Thomas Roue, knight, was created a baronet, 1641; but afterwards sided with the parliament.

He married, first, Jane, daughter of Sir John Ferrers, bart. who died 1656; and he had issue by her, Edward, the second baronet; by his second wife, Frances, daughter of David Murray, esquire, he had Frances the third, and Thomas the fourth, baronet. These three died without issue; the baronetcy was extinguished about 1721.—Motto, Omne bonum Dei donum, Every good thing is from God.—Family Seats, Whiteford, near Calne, Wilts.; and Downton Hall, Shropshire.

HAWKINS, of Trewithian, Cornwall; created June 21, 1791.—Sir C H R I S T O P H E R HAWKINS was created a baronet as above; recorder of Grampound and St. Ives, and high lord of St. Michael's. Sir Christopher represented his county in parliament, and, in several parliamentary elections, was chosen for Grampound in 1796, 1802, and 1806.—Family Seats, Trewithian, and Trewin, both in Cornwall.

CALL, of Whiteford, Cornwall; created June 21, 1791.—Sir W I L L I A M - P R A T T CALL, the second baronet, born Nov. 1781; succeeded his father, Sir John, March 1, 1801; married, June 19, 1806, Louisa Forbes, daughter of George, fourth earl of Granard; and had issue, a daughter, born Dec. 1, 1807; died April 15, 1809.—Sir John Call, F.R.S. and A.S. the first baronet, was descended from a very ancient family, but latterly not very opulent, family, though formerly possessed of considerable landed property both in Devonshire and Cornwall, which was first reduced by the civil wars between the houses of York and Lancaster, and afterwards nearly annihilated by their attachment to the royal cause during the reign of Charles 1. It is supposed that the family of the Callings, confiding of three brothers, came into England from Saxony, towards the end of the eighth century. That one brother settled in Scotland, from whom is descended the clan of Mac Callins; a second settled in Norfolk, where the family continued till the beginning of the last century, and are mentioned in Sir John Penn's History of the Paffon Family; and a third settled in Cornwall, from whom the present baronet is descended, being descended, by the marriage of his father, John Call, of Launcells, in the north of Cornwall, with Jane Mill. Sir John went to India in 1730, where he was very successful as a military engineer, and in 1738 he held the offices of commissary general, military storekeeper, and accountant general of the revenues and expenses, under the presidency of Madras. He returned to England in 1770. In 1796, he was appointed one of the commissioners of the crown lands. In 1784, 1790, and 1796, he was elected member for Callington; and had two sons and four daughters.—Motto, Graita manu, With a thankful hand.—Family Seat, Whiteford, near Callington, Cornwall.

DUCKETT, late J ACKSON, of Corham, Wiltshire; created June 21, 1791.—GeORGE JACKSON, esquire, of Hartham House, in Wiltshire, married Grace, daughter and heir of Gwyn Goldstone, of London, merchant, by Grace, daughter and co-heir of George Davenport, of Hartham House, in Wiltshire, by will of Shaw House, in the parish of Melksham, in Wiltshire, esquire, by whom he had three children: George, died young; George, born 1777; and Esther, born 1779. He took the name and arms of Ducketts, and was created a baronet, June 21, 1791, by the title of Sir George DUCkett.—The Ducketts are lineally descended from Richard Ducket, who was a merchant in the 9th Henry III. 1224, and acted as such for the counties of Cambridge, Huntingdon, Bedford, Buckingham, Norfolk, Suffolk, Northampton, and Rutland.—Motto, je vous le droit, I will have my right.—Family Seats, Roydon, Essex; and Hartham House, Wilt.

WOODFORD, of Carleby, Lincolnshire; created June 21, 1791.—Sir R A L P H WOODFORD, formerly British resident at the Hanse Towns, and late minister extraordinary to the court of Denmark, married, May 19, 1773, Gertrude, daughter and co-heir of—Reenen, esquire, by whom he has Ralph James, and Elizabeth, married, June 14, 1801, John Hamlet, esquire. He was created a baronet as above.—Motto, Libertatia quietem, Eafe in liberty.—Family Seat, Carleby, Lincolnshire.

POLE, of Walthamstow; created June 21, 1791.—CHARLES VAN NOOY POLE was created a baronet by the second wife of Charles Pole, of Holcroft, in Lancashire, now a banker in London, by whom he had four sons: Peter; Charles; Abraham; and Henry; and a daughter, Susanna. He took the surname and arms of Pole, in virtue of the royal sign manual, dated March 7, 1787; and was created a baronet, by the name of Sir Charles Pole, bart. July 28, 1791, to him and his heirs male; and, in default of such issue, to Susanna Pole, his daughter, and her heirs male. He has the liberty of using his original name in his commercial intercourse.—Residence, at Walthamstow.

VAUGHAN, of Nannau, Merionethshire; created June 21, 1791.—Sir ROBERT-WILLIAMS VAUGHAN, the second baronet, M.P. for the county of Merioneth, succeeded his father, Sir Robert, in 1796; married, Sept. 1801, Anna Maria, daughter of the late Sir Roger, and sister of the present Sir Thomas, Motifyn, bart. and has issue.—This family is descended from Ynyr Vaughan, lord of Nannau, a descendant of Cadwgan, lord of Nannau, son of Bleydlyn ap Cynfyn, prince of Powis.—Family Seat, Hengwrt and Nannau, Merionethshire.

RICH, of Shirley House, Hampshire; created June 21, 1791.—Sir C HARLES-BOSTOCK RICH, of Waverley Abbey, near Farnham, in Surrey, in holy orders, L.L.D. married Mary Frances, only daughter and heir of lieutenant-general Sir Robert Rich, bart. by Mary, his wife, only daughter of Richard Ludlow, esquire, of Ardfallagh, in the county of Meath, in Ireland, and took the surname and arms of Rich, by virtue of the royal sign manual, dated Dec. 23, 1790, and was created a baronet, June 21, 1791. By her he has four sons: Charles, a captain in the 15th light dragoons, married, Nov. 1805, Frances Maria, youngest daughter of Sir John Lethbridge, bart. George, William John, Edwin, and Evelyn; and four daughters, Mary, Frances, Louisa, and Caroline.—Family Seat, Roffe Hall, Suffolk.

Baronets
daughter of Sir William Pepperell, bart. by whom she has a daughter, born Jan. 1804; George-Joseph; Harriet, married, Apr. 15, 1816, to John Richardson, esq. of Castle Temple; John-Samuel; Louisa, who died in 1803; and Mary-Anne, who died in 1803. Sir George Chad, married, secondly, Jan. 23, 1806, the eldest daughter of the late Peter Holford, esq.—late a major in Chancery.—Family Seat, Wanlip, Leicestershire.

TAPPS, of Hinton Hooke, Hants; created June 21, 1791.—Sir George-Ivison TAPPS was created a baronet as above. He married, June 29, 1790, Sarah, daughter of Barrington Biggin, esq.—Family Seat, Hinton, Hants.

CHAD, of Thursford, Norfolk; created June 31, 1791.—George Chad, of Thursford, esquire, married, secondly, Aug. 31, 1804, to John Richardfon, esq. of the Middle Temple; John-Samuel; Louifa, who died Nov. 1794, without issue.—Family Seat, Warfield, Berkshire.

George-WilI Chad, April 29, 1778; Charles, April 21, 1779; Cecilia-Rachel, May 2, 1777. This lady died Jan. 17, 1791.—Sir John Brograve, bart. of Thursford, Norfolk, was created a baronet as above. He married, first, Sarah, daughter of John. Rowlls, of Kingfton, in Surrey, esquire, by whom he had three sons: Robert-John, born April 29, 1778; Charles, April 21, 1779; George-William, July 6, 1771; and two daughters, Frances-Mary, born July 9, 1776, married, April 5, 1803, John Thom-linon, esq. of Cley, in the county of Norfolk; and Celia, May 2, 1777. This lady died Jan. 17, 1786; and Sir George married, secondly, Mary, only daughter of Richard Fletcher, of Richmond, in Surrey, who died Nov. 1794, without issue.—Family Seat, Thursford, Norfolk.

BROGRAVE, of Worded, Norfolk; created June 21, 1791.—Sir George-Berney BROGRAVE, the second baronet, succeeded his father, Sir Berney, in 1800; married, May 7, 1809, Emma-Louisa, youngest daughter and co-heir of Edward Whitwell, esq.—This family, in old deeds, wrote themselves Burgrave, and sometimes Boroughgrave; though afterwards, for the more easy pronunciation, their name was softened into Brograve. One of their ancestors was Sir Roger Brograve, knight, of Warwickshire, who lived in the reign of Edward I. and in whose favor he was created Baron Brograve.-One of their ancestors was Sir Roger Brograve, knight, attorney general of the duchy of Lancaster, custos rotulorum of the county of Herts, and knighted by James I. He married Margaret, daughter of Simeon Steward, esq. by whom he had three sons: Simeon, the eldest, who was grandfather of Sir Thomas Brograve, bart. and creator of the baronet as above, married, in 1790, Catharine-Rebecca, daughter of Sir John Brograve, bart., who died Nov. 1794, without issue.—Family Seat, Worded House, Norfolk.

KING, of Bellevue, Kent; created June 18, 1792.—Sir Richard King, the second baronet, created in the royal family in 1798, married his father, Sir Richard, in Nov. 1806; married, in Nov. 1803, the only daughter of Admiral Sir John-Thomas Duckworth.—The late Sir Richard King, created a baronet as above, born Aug. 10, 1730, entered early into the royal navy, and in 1758 accompanied his maternal uncle, commodore Curtis Barnett, commander in chief in the Mediterranean; afterwards, in 1774, in the Kaid Indies. In 1766, he was promoted to the rank of lieutenant. In 1759, he was made post. On the commencement of hostilities with Spain, in 1762, Lord Anson particularly recommended Captain King to his majesty, as an officer on whom he could depend to convey the earliest intelligence of that event to the East Indies. General (afterwards Sir Edward) Draper, who was appointed to command the land-forces against Manilla, embarked with him on-board the Argo, which failed from Plymouth Feb. 22. Captain King had the good fortune, which Lord Anson predicted, to make a very expeditious passage to India; which, as he had not expected, the enterprise against Manilla must have failed, the squadron found the only a few days previously to the changing of the monsoon. In 1763, he was appointed to the Grafton, 68 guns, in which he arrived in England. In 1770, he was appointed to the Exeter, 64 guns; and by the desire of lord Mulgrave, and Sir William James, the chairman of the East-India company, he was nominated to proceed as second officer in command under rear-admiral Sir Edward Hughes on the East Indies. After his arrival there in 1780, he was promoted to the rank of commodore. On this station he continued during the whole of the war, and was engaged in all the actions with the French squadron commanded by M. de Suffren. In 1783, he received the honour of knighthood. In 1789, he was promoted to the rank of rear-admiral of the white, and in 1790 he was appointed commander in chief in the Downs. In 1791, he was made rear-admiral of the red, and appointed to command the third division of the fleet at Spithead. In 1792, he was created a baronet, and appointed governor and commander in chief at Newfoundland. In 1793, he was promoted to the rank of admiral of the blue. In 1794, being vice-admiral of the red, he was appointed commander in chief at the port of Plymouth; and in June 1795, he was promoted to the rank of admiral of the red. In 1797, he became admiral of the white.—Residence, Devonshire Place, Middlesex.

STIRLING, of Uppal, Edinburghshire; created July 19, 1792.—Sir Gilbert STIRLING, the second baronet, a captain in the Coldstream, or second regiment of foot-guards, succeeded his father, Sir James, Feb. 1780. This armant is of great antiquity in the family of Stirling. In ancient times, before the competition for the crown between Bruce and Baliol, there were two considerable families of this name, which made a great figure in Scotland, viz. the families of Keir and Calder. It is suppos'd that the immediate ancestor of this baronet was Watterius de Streveling, who lived in the reigns of King David I. and Malcolm IV. In the fifteenth century, Thomas de Strivelcing, his grandson, a man of extraordinary parts and integrity, being bred to the church, became one of the greatest men in the kingdom. He was appointed lord high chancellor of Scotland by king Alexander II. and died anno 1227. From Robert, his elder brother, descended the present baronet.—Family Seat, Uppal, Edinburghshire.

GOULD, now MORGAN, of Tredegar, Monmouthshire; created Oct. 30, 1793.—Sir Charles-Gould Morgan, the second baronet, succeeded his father, Sir Charles, in Dec. 1806; representative in the last and present parliaments for the county of Monmouth; married Mary Magdalene, daughter of George Story, esq. and has issue, three sons and three daughters. His lady died March 24, 1808.—The family of Gould have for many generations been one of the most opulent families in Wales and Monmouthshire; which county has been almost constantly represented by one of that name, for above a century. The Right Hon. Charles Gould, LL.D. was bred to the law, and in June 1762 was appointed judge advocate general, and judge martial of the forces; which employment he held till Feb. 1806. In April 1779 he was knighted, and created a baronet as above. Sir Charles, in pursuance of the will of his brother-in-law, John Morgan, esq. obtained the royal license for affuming the name and arms of Morgan. He served for the fourth time as representative for the county of Brecon, and was appointed a privy counselor by Sir Charles, deceasing in Dec. 1806, was succeeded by his only son, sir Charles, the present baronet.—Family Seat, Tredegar, Monmouthshire.

MANNERS, of Hanby Hall, Lincolnshire; created Jan. 5, 1793.—Sir William MANNERS, created a baronet as above, married, in 1790, Catherine-Rebecca, youngest daughter of Francis Grey, esq. of Lahana, in Cork, and has issue, Lionel-William; Felix; Arthur; Caesar; Hugh; Louisa; Camilla; Emily; Caroline; Frances.—The father of the present baronet was John Manners, esq. son of lord William Manners, second son of the second duke of Rutland.—Family Seat, Buckminster, Leicestershire.
FORD, of Ember Court, Surrey; created Feb. 13, 1792.—Sir Francis Ford, the second baronet, was born Feb. 13, 1787; succeeded his father, Sir Francis.—Motto, Omnia verum vicissim. All things are subject to change.—Family Seat, Ember Court, Surrey.

BARING, of Larkbeer, Devonshire; created May 11, 1783.—Sir Francis Baring was born April 18, 1740; married Henrietta, daughter of William Henry, of Croyden, in Surrey, esq. cousin and co-heir of archbishop Henry, by her, who died Dec. 3, 1802, he has issue, Thomas, M.P. for Chipping Wycombe; Alexander, M.P. for Tamerton; Henry, married, in 1792, Mifs Bingham, daughter of the late William Bingham, esq. of Philadelphia; William; George; Henrietta, married Charles Wall, esq. Maria, married Richard Shainforth, esq. Dorothy-Elizabeth, married Thomas-Read Kemp, esq. Frances; Lydia, married, Dec. 20, 1806, Philip-Laycock Story, in holy orders, second son of the Rev. Philip Story, of Lockington, Hants. Sir Francis was elected for Calne in 1796, and in 1802 for Chipping Wycombe, Bucks.—Family Seat, Stratton Park, Hants.

SAXTON, of Circourt, Berkshire; created July 26, 1794.—Sir Charles Saxton, of Circourt, in Berkshire, the second baronet, was born in Wiltshire, esq. Sep. 1, 1793; married his cousin, Jane, only sister, and co-heir, in several royalties of the same name, and arms of Dryden, and was created a baronet as above.—Family Seat, Cannons Ashby, Northamptonshire.

PASLEY, of Craig-Dumfriesshire; now Dowdeswell, of Pull Court, Worcestershire; created Sept. 1, 1794.—Sir Dowdeswell Pasley, the second baronet, succeeded his uncle, sir Thomas Pasley, of Craig-Dumfriesshire, Nov. 29, 1806.—The late baronet, sir Thomas Pasley, was bred to the sea, and, after having served near half a century, with high reputation, was made a flag-officer, and had a command in the fleet of lord Howe on the glorious 1st of June 1794, in which engagement he lost a leg. He was soon afterwards created a baronet, with particularly flattering marks of his majesty's approbation. He married Mary, daughter of Thomas Heywood, esq. chief justice of the Isle of Man, by whom he had two daughters, Maria, married Thomas Dowdeswell, esq. of Pull Court, Worcestershire; and Magdalene, on the defendants of which ladies the dignity, by the patent of creation, was to devolve.—Motto, Pro rege et patria pugnam, Fighting for king and country.

CURTIS, of Gatcombe, Hampshire; created Sept. 10, 1794.—Sir Roger Curtis, admiral of the white, is the son of Roger Curtis, of Downton, in Wiltshire, gentleman, by Chriftabella Richford, this woman being knighted Nov. 29, 1752, for his gallant and judicious conduct at the siege of Gibraltar. He was on board the Royal Charlotte, with lord Howe, in the memorable engagement of the 1st of June 1794, after which he was created a baronet. He was commander in chief at the Cape of Good Hope, in 1801; married Sarah, youngest daughter and co-heir of Matthew Tate, of Gatcombe House, in the isle of Portsea, in Hampshire, esquire, by whom he has two sons: Roger, born March 1780, and Lucy, born June 3, 1786; and a daughter, Jane, born Dec. 1784.—Arms, Per fesse, wavy, argent and dable, in chief the rock of Gibraltar, surrounded by fortifications and the sea, and in base three fleurs-de-lis of the fifth, charged with a palm branch vert.—Crest: Out of a natural coronet or, an arm, habited azure, cuffed argent, supporting a flag-staff proper, thereon a flag azure, charged with a wolf's head or, in the canton, gyronny of four, gules and azure, a crest: On a/full colour argent, or, ensigned with a naval coronet, a sword, erect, proper, hilted and pomelled or, entwined with a palm branch vert.—Motto, Per ardua, Through difficulties.—Family Seat, Gatcombe House, Portsea.

WILLOUGHBY, of Baldon House, Oxfordshire; created Dec. 2, 1794.—Sir Christopher-William Willoughby, the second baronet, born Sept. 1, 1753, succeeded his father, sir Christopher, Feb. 5, 1808.—Family Seat, Baldon House, Oxfordshire.

PRESCOTT, of Theobald's Park, Hertfordshire; created Dec. 9, 1794.—Sir George-Bereton Prescott, the second baronet, was born Feb. 11, 1773; succeeded his father, sir George-William, July 22, 1801. Family Seat, Theobald's Park, Cheshunt, Hertfordshire.

STEPHENS, of St. Faith's and Horsford, both in Norfolk; created May 13, 1795.—Sir Philip Stephens, F.R.S., was born Oct. 11, 1723. He filled for many years with universal esteem the office of secretary to the board of admiralty, and on his resignation was appointed one of the lords commissioners. He has fat in nine parlaments, in the seven last of which he has represented the port of Sandwich. The baronetage is limited in succession to his late nephew, colonel Stephens. He was, and his male heirs.—The family of Stephens were of high respectability, and of very ancient establishment, in Gloucestershire. Ralph Fitz-Stephen, and William his brother, were high sheriffs of that county in 1771; and continued to exercise the office jointly during four years.—Family Seat, Fulham, Middlesex.

CHETWYND, of Brocton, Staffordshire; created April 11, 1795.—Sir George Chetwynd, the second baronet, was born July 17, 1799, was knighted Jun. 1787, and afterwards created a baronet. He married, June 6, 1783, Jane, daughter of Richard Bantin, of Little Farringdon, in Berkshire, by whom he has five children; George, married, Sept. 1804, Mifs Sparrow, daughter of — Sparrrow, esquire, of Staffordshire; Caroline, William-Fawkener, James-Read, and Henry.—Family Seat, Grendon, in Warwickshire.

DRYDEN, of Canons Ashby, Northamptonshire; created April 11, 1795.—Sir John-Edward Dryden, the second baronet, succeeded his father, sir John, in 1797.—Eraunus Dryden, esq. was created a baronet, Nov. 15, 1619. He was grandfather to John Dryden, the very celebrated poet. This baronetcy failed in the fourth generation for want of male heirs, when Elizabeth Dryden, the heir and representative of the family, married, June 14, 1783, to John Turner, esq. (brother to the late sir Gregory-Pye Turner, bart.) who assumed the name and arms of Dryden, and was created a baronet as above.—Family Seat, Canons Ashby, Northamptonshire.

SALSBURY, of Llanwen, Monmouthshire; created April 21, 1795.—Sir Robert Salisbury, created a baronet as above, was born Sept. 10, 1736; married Sarah-Catherine, daughter and co-heir of David Llanwen, esquire, by whom he had seven children: Thomas, died young; Robert, born May 18, 1783; Charles, Feb. 4, 1792; Sarah-Catherine; Charlotte-Gwen; Elizabeth-Jane; and Henry. Sir Robert is member in the present and two last parliament for Brecon.—This family is conjectured by some to be a junior branch from Walter de Ewras, earl of Rothen and Mante, who accompanied William the conqueror into England, and was rewarded with the lordships of Salisbury and Aberbeufly, in Wiltshire. Other genealogists deduce the family from Adam de Salisbury, a younger son of the duke of Bavaria, who came into Wales, and was captain of the garrison of Denbigh, whereby he became settled in land there. Thomas, a descendant of his, having valiantly behaved against the Cornish rebels, headed by lord Audley, was knighted at the bridge foot, upon the king's entering London, after the battle of Blackheath, 12 Hen. VII. Henry Salisbury, the eleventh in descent from him, was created a baronet, 1619; but the title was extinguished in his son. —Family Seat, Llanwern, Monmouthshire.

GAMON, of Minchenden, Middlesex; created April 21, 1795.—Sir Richard G ammon, created a baronet as above.
above, was born Aug. 14, 1734. He married, first, Grace, daughter of James Jefferys, by whom he had no issue; secondly, July 2, 1766, lady Amelia, relict of Thomas-Liev Cooke, esq, and daughter of the late and sifter of the present duke of Athol; and by her (who died Sept. 19, 1806,) he has an only child, Charlotte-Amelia, born April 12, 1777. Sir Richard resigned the office of one of the commissioners of the duties of wine, to which his majesty had been pleased to appoint him, at the earnest request of the citizens of Winchester, that he might be eligible to become their representative in parliament; which trust he had faithfully and disinterestedly discharged for the last twenty-three years. The patent of creation is limited, in failure of issue male, to his lineal descent, in fee simple, of the baronet; and to his female issue, in remainder, after the issue male of his brother, Ely. The patent of creation is limited, in failure of issue male, to his lineal descent, in fee simple, of the baronet; and to his female issue, in remainder, after the issue male of his brother, Ely.

WENTWORTH, of Parlot, Lincolnsire; created May 16, 1795.—Sir JOHN WENTWORTH, LL.D. late lieutenant governor, and commander of the forces in Nova Scotia, married Frances, daughter of Wentworth, of Boston, in America; by whom he has a son, Charles-Mary, born Jan. 18, 1775.—Family Seat, Parlot, Lincolnsire.

A.COURT, of Heytesbury, Wiltsire; created June 23, 1795.—Sir WILLIAM-PERCY-ASSY ACOURT, created a baronet as above, married, first, Catharine, daughter of lieutenant-colonel John Bradford, by whom he had no issue; secondly, Letitia, daughter of Henry Wyndham, of Salisbury, esquire, by whom he has had, Letitia; William, married Oct. 1805, Maria, second daughter of lady B. Bouverie; Annabella, married to Richard Beadon, esq. only son of the bishop of Bath and Wells; Maria and Caroline, twins; Edward-Henry, a lieutenant in the royal navy; Charles-Ahe, a captain in the 31st foot. Sir William was elected member for Heytesbury, in the room of his father; re-elected in 1784, and in 1799, soon after which he retired from parliament, but was again elected in 1806. He was many years in the army, and in the last war was lieutenant-colonel of the second regiment of Wiltsire militia.

—William A Court, a general in the army, colonel of the eleventh regiment, assumed the name of Ahe, pursuant to the will of his uncle, Edward Ahe; he represented the borough of Heytesbury in several parliaments, and was one of the members who voted for the peace in 1763; soon after which, he was dismissed from the lieutenant-colonelcy of the Coldstream regiment of foot-guards. On the Rockingham administration's coming into power, he was appointed to the command of the eleventh regiment of infantry, which he retained till his death, which happened on Augst 2, 1781. He was succeeded in his estates by his only son, who was created a baronet as above.—Family Seat, Heytesbury House, Wiltsire.

VANDEN-BEMPDE-JOHNSTONE, of Hacknefs Hall, in the North Riding of Yorkshire; created June 23, 1795.—Sir JOHN VANDEN-BEMPDE-JOHNSTONE, the second baronet, succeeded his father, sir Ruthland, July 14, 1807.—Family Seat, Hacknefs Hall, Yorkshire.

HAMLYN, of Clovelly Court, Devonshire; created June 23, 1795.—Sir JAMES HAMLYN, created a baronet as above, (formerly HAMMETT, esq.) took the name and arms of Hamlyn, by act of parliament, pursuant to the desire of his great uncle, Zachary Hamlyn, esq. He married Arabella, heir of the family of sir Rice Williams, of Edwinsford, in Carmanshire, by whom he had issue; 1. James, the member for that county, who assumed the name of Williams, and married Diana, daughter of Abraham Whitaker, of London, merchant, by whom he has three children, James, Charles, and Diana. 2. Zachary 3. Arabella, married to Ambrose St. John, esq. and died June 18, 1805.—Family Seat, Clovelly Court, Devonshire.

POORE, of Rufhall, Wiltsire; created July 8, 1795.—Sir JOHN-METHUE POORE, born June 5, 1745, was created a baronet as above, with remainder, in defect of issue male, to his brother Edward, and his issue male. This family originally spelt their name Peor, and is of great antiquity in the counties of Wilts and Gloucester. Richard Poer was high sheriff of the latter county in 1187; and there is a curious record in the Herald's College, that he was killed defending the Lord's day. This Richard Poore had two sons, Philip;
MURRAY, of Lanric, Perthshire; created July 25, 1795.—Sir John Murray, a lieutenant-colonel in the army, married Anne, daughter of Roderic Macleod, by a former marriage. —Sir lieutenant-colonel in the army, the race of Murray have, in the last two or three generations, assumed the name of Murray, they are in fact of the race of Mac Gregor. The royal descent of this most ancient clan may be traced from the chronicles of the Scottish kings to the remotest antiquity; but we shall carry it no further back than prince Gregor, third son of Alpin, fon of the celebrated Ralbus king of Scotland, who began to reign 787. The fifth in descent from him was Gregor Garubh, or the Stout, who married a daughter of the ancient house of Lochow, predecessor of the family of Argyll. He fought under Duncan 1. in his battles against the Normans and Danes, highly renitent of the murder of that monarch by Macbeth, and was a powerful promoter of the reformation of his son, Malcolm prince of Cumberland. In the early part of the seventeenth century, these happened great animosities between the Macgregors, and the Colquhouns, Buchanans, and Gramees, which produced several bloody conflicts; and, their adversaries having favour of court, the Macgregors were perfecuted with great fury. A great part of ferocity and murders carried, that a price being set upon the heads of the clan, by the privy council, two of their enemies, who had shared considerably of their estates, got bloodhounds, with which they hunted them, devouring and mangling them wherever they were found. So keen and powerful were the conductors of their destruction, that a very severe and bloody war was made against them, whereby their name was proscribed, and all persons were at liberty to matr slate or slay them without being liable to law; may, encouraged to it by a promise of their moveable goods and gain. In this situation the Macgregors continued till the time of the solemn league and covenant, which, as their principal enemies were interred in it, afforded them a reprieve. They were much courted to join the confederacy, upon promises of future friendship; but rebellion against majesty had ever been detestable to them, and they declared, "That, as they bore the crown on the point of their sword, they would not fail to use the latter in support of the former." Patric Macgregor afterwards joined Montrose, in support of the royal cause, with above a thousand of his men. Mr. Nibet, in mentioning the loyalists, says, "The Macgregors also, a clan inferior to none in bravery and activity, followed their chief." Patric was in particular esteem with Montrose, two of whose letters are carefully preferred, addressed to "His Special and Trusty Friend, the Honourable Patric Macgregor," that great man, in the strongest terms, exprest his hearty approbation of his unshaken loyalty, and allured him, that "His majesty's affairs being once upon a permanent footing, the grievances of his family and clan should be effectually redressed." But their chief hopes died with this great hero, though they were, in consequence of their loyalty, returned to their name by act of parliament in the reign of Charles II.

Patric married Marian, daughter of Macdonald of Anachtrichatan, chief of the most powerful tribe of Macdonalds in Glenco, by whom he had three sons: John; James, a major in the army, who went to America, where he had married and acquired a great estate; he was at last killed by a party of rebel Indians, but some of his pottery still flourished near New York; Duncan, died unmarried. John, the eldest son, was a steady loyalist. He married Anne, daughter of Macgregor of Rofs, by whom he had a son, John, and several other children. John Macgregor, alias Murray, married Cathearine, eldest daughter of Hugh Campbell, of Lix, esquire, descended from some of the first families of Scotland, by whom he had five sons. Robert, of Glencairn, the eldest son, assumed the name of Murray, was attached to the interest of the Stuart family, and had the command of a regiment of his own clan in 1745. The duke of Cumberland sent to allure them that if they would lay down their arms and return home they should be restored to their name and other. what they were wont to enjoy under the government of Charles the Third, that their commanders should have the same rank, and their promotion be esteemed the peculiar care of his royal highness. This message produced a spirited but polite refusal; and after the battle of Culloden the Macgregors marched in a body to their own country with flying colours, and then diffiered into small parties. The present baronet is the seventh son of John, and brother of Robert, in whose regiment he was a major, and suffered exceedingly in the same cause. He was afterwards appointed an officer in the 33rd regiment, and served in Germany with distinguished gallantry. John, his eldest son, was created a baronet as above. —Motto, "Da sacro, but spirit nocht." —Family Seat, Lanric, Perthshire.

BURGES, of Burville, Berkshire; created Oct. 31, 1795.—Sir James Bland Burgess, LL.D. was born at Gibraltar, on the 8th of June, 1752. He was called to the bar in 1777. In 1783, he was chosen member for Helifon, and re-elected in 1790. From Augu 1783 to October 1795, he was under secretary of state for the foreign department; and for some months was a joint under secretary for holding the privy seal. On his resignation of the former office he was created a baronet, and appointed marshal of his majesty's household for life. He married, first, June 15, 1777, the honourable Elizabeth Noel, second daughter of Edward viscount Wentworth, who died in 1799, without issue; secondly, Dec. 15, 1795, Anne, third daughter of lieutenant-colonel Charles Montolieu, baron of St. Helyme, whom he had issue, James George, born Sept. 6, 1781, who died young; Clara Maria, born Dec. 12, 1783; Charles-Montolieu, July 8, 1785; Osborne, January 13, 1788, who died young; Emilia-Charlotte, April 12, 1789; Caroline-Eliza-Anne, November 5, 1790; Wentworth-Noel, Nov. 27, 1793; Sophia-Anne, Dec. 30, 1793; Somerville-Waldemar, March 9, 1794; Julia-Ol', March 13, 1797. —This family has long been settled in Berkshire, in which county it possessed considerable estates, a part of which is still remaining, though the greater part was sequestrated by the parliament, during the civil war in the 17th century, in consequence of the active part taken in favour of king Charles I, by the gallant officer particularly distinguished as the only person who successfully resisted Oliver Cromwell, whom he repulsed in his attack on Farringdon. —Motto, "Latius ut patientia, Patience makes ills light." —Family Seat, Wetlow, Cambridgeshire.

FARQUHAR, of Codogan House, Chelsea, Middlesex; created March 1, 1796.—Sir Walter Farquhar, M.D. physician to the prince of Wurttemberg, who is above, was born in 1750; married, in 1771, Anne, fourth daughter of Alexander Stephenson, esq. of the island of Barbadoes, who died in 1797. By this marriage he has issue, 1. Thomas-Harvey, banker in London, born 1755. 2. Robert-Townshend, some time commercial resident at Aboyma, and at the peace of Amiens, in 1802, was appointed commissioner to the British dominions in the Moluccas, and to deliver up those islands to the Batavie republic. 3. Walter, some time commercial resident at Ternate, and at the peace of Amiens appointed secretary to the above-mentioned commission; married, at Calcutta, March 6, 1805, the eldest daughter of Sir John-Adley Doyley, bart. 4. John, died young. 5. Catharine, married, Nov. 6, 1805, to William Maitland, esq. of the island of Jamaica. 6. Anne, married...
married to the reverend James Hook, D.D., prebendary of Winchester, F.S.A., rector of Ewphow, and domestic chaplain to the prince of Wales. 7: Charity-Graeme, married, July 13, 1807, the reverend Anthony Hamilton, son of archdeacon Hamilton, D.D. chaplain in ordinary to his majesty, precentor of St. Paul's, and vicar of St. Martin's-in-the-fields. 8: Elizabeth-Margaret. His family is descended from the ancient family Galloway and Guider, earls of Galloway, and from Frankfort Fastagh, of Len- turk in Alford, in the county of Aberdeen, was provost of Aberdeen in 1631, and created by Charles II. on his visit to that city a knight banneret.—Motto, *Mente magni, With heart and hand.*

PELLIK, of Trevergy, Cornwall; created March 5, 1796.—Sir EDWARD PELLEW, rear-admiral of the red, was created a baronet as above, in reward for his gallant and active services in the navy during the late war. He married Sufan, daughter of James Frowd, esq., by whom he has, Powall-Jaffard, Pallawood, George, Emman Julin.—Sir Edward entered early into the royal navy; and, in 1750, was made a lieutenant. In 1782, whilst commanding the Resolution cutter of 12 guns and 75 men, in the channel, he fell in with the Flying, a Dutch privateer of 14 guns and 68 men; a sharp engagement, which lasted for an hour and a half; ensued in the close of which, one of the Dutchmen was killed, and five were wounded. In May in the same year he received his post-captain's commission; and at the close of the American war, in 1783, he commanded the Dicta- tor of 64 guns, at the Nore. In 1793, he obtained the command of La Nymph frigate, of 36 guns; and he was not long prevented the opportunity of displaying a striking proof of his professional gallantry. In 1793, being on a cruise in company with the Venus frigate, commanded by the present rear-admiral Faulkner, he fell in with the French national frigate La Cleopatra of 40 guns and 320 men, captain Jean Mullon, three days from St. Maloe's; and, after a severe action, which lasted with unabated fury for upwards of fifty-five minutes, the former surrendered to Sir Edward, having lost her captain, three lieutenants, and forty men wounded. In the conduct of Sir Edward, on this memorable occasion, the ancient spirit of chivalry seemed to have enjoyed a temporary revival: he may be said to have fought *con amore,* solely for the glory of his country, and for his own fame. His gallantry was not unrewarded. On the 25th of the same month, accompanied by his brother, captain Israel Pellew, he had the honour of being introduced to his majesty by the earl of Chatham, (then first lord of the admiralty,) and of receiving his majesty's thanks. His majesty was pleased to confer upon him the honour of knighthood, and to promote his brother to the post of captain. March 5, 1796, his majesty was pleased to create him a baronet of Great Britain. On April 23, 1804, he was promoted to the rank of rear-admiral of the red; and, in Dec. 1806, was promoted to be rear-admiral of the red.—Motto, *Faci, Deus tuiter, God helping. Under the arms, Deus, non fortuna, From God, not from fortune._Refidence, Taddington, Middlesex.*

BELLINGHAM, of Castle Bellingham, Ireland; created March 16, 1796.—Sir WILLIAM BELLINGHAM, created a baronet as above, with remainder, in default of Issue male, to the heirs male of his father, Allan Bellingham, in the county of Louth, Ireland, esquire, F.A.S. He married, in 1783, Frances, daughter of the honourable and reverend Robert Cholmondeley, second son of George earl of Cholmondeley.—The Bellinghams received their surname from a place in Northumberland. The title with is Richard de Bellingham, who was father of Eudo de Bellingham, who was sheriff of Welling moreland 8 and 9 Rich. I. The sixth in descent from him was Sir Robert Bellingham, of Bellingham, who was made knight banneret at the battle of Stoke, 1485, 2 Hen. VII. He married Mabel, daughter of Sir Vol. IX. No. 673. Thomas Middleton, knt. by whom he had Sir Robert, who had eight sons. Alan, the eighth, was treasurer of Berwick, and deputy-warden of the marches. After four more descents, was Henry, who was created a baronet in 1629, and married Dorothy, daughter of Sir Francis Bellingham, esq. by whom he had three daughters, and a son, James, who married Catharine, daughter and coheir of Sir Henry Willoughby, bart., in the lifetime of his father, without issue; and the baronetage became extinct.—Family Seat, Castle Bellingham, Ireland.

HIPPISELEY, of Warfield Grove, Berks; created April 30, 1796.—Sir JOHN-COX HIPPISLEY, LL.D. P.R.A.S., recorder, and one of the representatives in parliament for the borough of Sudbury, a bencher of the honourable society of the Inner Temple, and a manager of the Royal Institution. Sir John married, first, in 1788, Marg- aret, second daughter of Sir John Stuart, bart. of Al- lanbank, in the county of Berwick, by whom he died 24th Sept. 1799, he has one son, John Stuart, and three daughters: Margaret-Frances, married to Thomas-Strang- wass-Horner, esq. of Mills Park, in the county of Sove- mer; Windham- Barbaras; Louisa-Anne. Sir John married, secondly, Elizabeth, daughter of the late Tho mas Horner, esq. of Mills Park, and relift of Henry Hip- pisley Cotes, esq. of Stone-Easton House, M.P. for the county of Somerset. In the years 1779 and 1780, being then in Italy, Sir John Hippisley was engaged in many important communications to government. On his return to England, in the following year, in consequence of his services, he was reimbursed a part of the large expenses by lord North, then at the head of the treasury, to the court of directors of the East India company; in consequence of which he was immediately appointed to that service, with the advanced rank of four years. He re- signed his employments in 1787, having held offices of great trust and importance in the kingdom and privy council during the war with Hyder Ali, and his son Tippoo Sultain. In 1799, he was appointed recorder of Sudbury, which appointment was confirmed by his majesty on the 6th of July following. At the general election in 1795, he was elected one of the representatives for that borough, for which he has served in four parliaments. Sir John returned to Italy in the year 1799, where he continued till 1795, in which interval he was employed in many important negotiations, the beneficial results of which were acknowledged in the most flattering manner by his majesty's ministers. On his return to Eng- land, his majesty was pleased, in consequence, to confer upon him the dignity of a baronet of Great Britain. In 1799, the indence of the present election of the reigning duke of Wirtemburg, then hereditary prince, he was engaged in the negotiation of his marriage with the princess royal of Great Britain; an alliance which was then considered as eventually of great importance, his sene highness being the brother-in-law of the emperors of Germany and Russia. In consequence of the, bey of that negotia- tion, the reigning duke, by his majesty's command, granted to Sir John Hippisley, and his poletity, the right of bearing the arms of the house of Wirtemburg, accompanied with the device or inscription of the great order of Wirtemberg, viz. *Amicitia vertutissima fadus.* This grant his majesty was graciously pleased to confirm, by his sign manual, commanding it to be registered in his College of Arms. On the marriage of the hereditary prince with the princess royal, his majesty, in conjunction with the reigning duke of Wirtemberg, was also graciously pleased to appoint Sir John Hippisley, together with the duke of Portland, lord Grenville, and Mr. Chancellor Pitt, one of the commissiorners, and a trufr of her royal highness's marriage-feal, as his private secretary. The bea- ngoles, the marriage-feal, as his private secretary. The bea- ngoles, the marriage-feal, as his private secretary. The bea- ngoles, the marriage-feal, as his private secretary.
York were originally notified to his majesty in con-
sequence of the letters addressed to Sir John Hippleby by
the cardinal Borgia; and, the transmutation must necessa-
rially be considered as forming an interesting epoch in the
history of our country. Sir John Hippleby served the
office of high sheriff of the county of Berks in the year
1820, and in the same year was named in the charter of
the Royal Institution of Great Britain, one of the first
managers of that corporation. He is also a fellow of the
Royal and Antiquarian Societies, and a member of the
government committee of the Turkey Company.

The family of Hippleby is traced from an early period
as seated in Somersetshire: the principal branch has been
chiefly resident at Camely, and afterwards at Stone-
Rudolph, Richard Hippleby, born the 14th Aug.
refided at Camely, when that manor and many other
lordships were granted to him. In the 36th of Hen.VIII.
the present baronet.—Family Seats, Kettlethorpe Park,
the 26th of Sept. 1807. M.P. in the present parliament for
the borough of Retford.—Sir Wharton Hippleby—created
a baronet as above.—Family Seat, Dunstable House,
whom he had an only daughter, Anne, who married
Sir Edmund-Cradock Bunney, now Sir Edmund-Cradock
who married Sarah, daughter and co-heir of captain
John, a captain in the Coldstream regiment of guards;
Wharton Hippleby, Lord of the Manor of Mayley, elder
by his lady, Sir Edmund—created a baronet as above.—Family
of London and M.P. for that city, died April 1722,
by Sarah, his wife; a worthy descendent for his
and his mother deservedly esteemed for her piety,
defervedly respected for his professional ability, can-
positively distinguished for his classical knowledge,
died at that university without issue in 1772. 2.
William, the present baronet, and eight daughters; (fee
Sir John Hippleby, p. 234.) Lady Hippleby deceased
July 1, 1800, his daughter, Miss Hippleby, assumed the
name and arms of Hippleby. Sir Wharton married, secon-
dy, Oct. 1800, Miss Amelia Campbell, of Withy,
in Northumberland, and had issue, a daughter, Sophia-
Louisa-Emerson, born in 1800. Sir Wharton represented
the borough of Retford in 1796, and 26th of Sept., 1807, was
succeeded, agreeable to the above limitation, by his grandson, Sir William,
the present baronet.—Family Seats, Kettlethorpe Park,
Lincolnshire.

BAKER, of Upper Dunstable House, Richmond,
Surrey; created May 11, 1796.—ROBERT BAKER, born
April 20, 1756, was created a baronet as above; married,
Aug. 28, 1783, Dinah, daughter and co-heiress of George
Hayley, esq. of Shidwell and M.P. for that city, to
him who had four sons and three daughters: Robert,
born Nov. 13, 1785, at Paris, died June 20, 1802, at
Richmond, then a cadet in the Woolwich academy;
Henry-Lorraine, born Jan. 3, 1787, at Nancy in Lorraine,
a lieutenant in the royal navy; George-Augustus,
born Aug. 8, 1795; Mary-Hayley, born at St. Omer's, Nov.
5, 1794; Louisa, born at Richmond, June 28, 1793;
Emma, born at Richmond, June 1, 1797.—This family
is ancient and respectable in the West of England.
James Baker, of Buckland house, near Taunton,
several manors in the counties of Somerset and Devon,
to which last county this family removed in the sixteenth
century, had four sons: Christopher, who died without
issue, and of whom a monument in Sampford Arundel
church thus observes:—"Sacrificed to the memory of
Christopher Baker, who was high sheriff for the county
of Somerset in the year of our Lord 1724. He was eldest
son and heir of James Baker, of Culmstock, in the county
of Devon, and of Buckland, in this county, esquire,
died young; by Sarah, his wife, a worthy descendent for
his candor and generosily, and of a very honourable
life; and his mother deservedly esteemed for her piety,
no.44. He pfouit Joanna Baker, frater amantifimum."
James, who died also without issue, July 31, 1747.
George, of Brockenhurst Houfe, Hants, barrister-at-
law, and a member of the Inner Temple, a man of such
elegant manners and person, that he was honoured with the poet of mafier of the
revels when the late prince of Wales honoured the society of the Inner
Temple with his company: he married the widow of— Vanfittart, eq. died without issue 1770,
and was buried in the parish church of Brockenhurst, Hants. 4. John Baker of Richmond, in the county of
Surrey, M.D. a disciple of the celebrated Boerhave,
and deservedly respected for his professional ability, can-
dor, benevolence, and sterling integrity; married Sarah,
daughter and co-heir of Robert Wood, LL.D. brother
of Thomas Wood, eq. of Littleton, in the county of
Yorkshire, died at Richmond, and was buried in the
parish church of Brockenhurst, Bath, by whom he
had issue, three sons and a daughter, who died young:
1. George, a fellow commoner of King's College, Cam-
bridge, particularly distinguished for his classical know-
ledge; died at that university without issue in 1772. 2.
John, a captain in the Coldstream regiment of guards;
Widow of Vanfittart, esq. died without issue 1770,
and was buried in the parish church of Brockenhurst,
Surrey. He is also a fellow of the Royal and Antiquarian
Societies, and a member of the Inner

TURTON, of Starborough Castle, Surrey; created May 13, 1756.—Sir Thomas Turton, M.P., in the last and present parliaments for Southwark, created a baronet, as above, clerk of the juries in the court of Common Pleas, born Sept. 27, 1754, married Mary, daughter and heir of John Michell, clerk, rector of Thornhill, in Yorkshire; by whom he has issue, Thomas-Edward-Michell, born Nov. 8, 1759; Mary, born June 1, 1787; Anna, born Sept. 14, 1788; Sarah, born Sept. 24, 1793; Lucy, born Jan. 6, 1791; Elizabeth, born Sept. 12, 1792.—Family Seat, Starborough Castle, Surrey.

HAYES, of Westminster, Middlesex; created Feb. 6, 1797.—Sir John-Magnacama Hayes, M.D., having been bred to medicine, was physician to his majesty's forces, serving in North America, during the whole of that war. Sir John married, on May 1, 1787, Ann, only daughter of Henry White, one of the council of New York, and has issue, Thomas Pelham, born in 1794; John Warren, born in 1799; and Henry William, born in 1803, died in Jan. 1806; Anna Maria; and Selina; his two youngest daughters, Eliza and Margaret-Anguita, both died infants.—This family has been settled in Ireland ever since the period of the civil wars in that kingdom, when Edward Hayes, the ancestor of the present baronet, went over with Cromwell's party, and attained to the rank of colonel in his army; but whether he was of English or Scotch extraction, has not hitherto been ascertained. He married into one of the most distinguished families in the county of Clare; his wife being one of the daughters of O'Bryan, of Mayore. Their issue was Daniel Hayes, of Mayore, a captain in the army at the battle of the Boyne. He married Bridget, daughter of Edmund Burns, by whom he had issue, John, who married Margaret-de la Lauze, of an ancient family in the province of Quercy, Jan. 27, 1643. Samuel, only son of Jean-Horace Pechell, was born at Montauban in 1644, married marquise Théry de Sabonniers, of the same place, where he had resided, with many other defendants of those noble protestants who had placed Henry IV. on the throne, and on the revocation of the edict of Nantes, by Louis XIV, this couple were objects of severe persecution, and, after having suffered almost unheard-of cruelties, Mont. Pechell was at length embarked, with felons, for the West Indies, from whence he effected his escape, first to Jamaica, and then to Ireland, where he obtained a pension from King William, and a commission in a regiment commanded by marquis de St. Sardos. His wife, with her only son, Jacob, fled to Geneva; there she remained, until, hearing of her husband's arrival in Ireland, she found means of joining him, where they lived for many years, having had the good fortune to receive several considerable remittances from France. Their two daughters were objects of tender solicitude, before they left their native country, placed in a convent, brought up to the catholic religion, and some years afterwards obtained a grant of all their father's lands, by virtue of a letter from Louis XIV. of which their heirs are at this time in possession. One of them married M. de Caluzie, the other M. de Sardos. Jacob Pechell, above mentioned, born in 1659, embraced the military profession, and served in different corps in Spain and Flanders, with peculiar credit. He married Jane, daughter of John Boyd, of Dublin, esquire, and aunt to the present baronet of that name; he had a numerous issue; four of which only arrived at the age of maturity, viz., Samuel, born Jan. 7, 1756, one of the medallists of the chancery, died without issue; George, a lieutenant of marines, who was killed at the attack of Fort St. Lazare, in Carthagena; Paul; Mary, wife of brigadier-general Caillaud, of Aiton Rowant, in Oxfordshire. Paul, the third son, was born Nov. 12, 1724, served as a cornet in the royal dragoons in Flanders, and was wounded at the battle of La Ferté in 1747; he was advanced to lieutenant-general Hawley, and afterwards to the honourable lieutenant-general Sir George Howard, K.B. after having arrived at the rank of lieutenant-colonel, he retired in 1747, and was created a baronet as above.—Family Seats, Pagglesham, Elysex; and Twickenham, Middlesex.

Pechell, of Paggleham, Elysex; created May 1, 1797.—Sir Thomas Brooke Pechell, the second baronet, lieutenant-colonel in the army, and late captain in the second regiment of horse-guards, was born Jan. 23, 1755; succeeded his father, in Paul, Jan. 13, 1800; and on the death of his mother, in the same year, obtained his majesty's licence to take the additional name of Brooke, prefixed to that of Pechell, in conformity to her will. He married, in April 1783, Charlotte, second daughter of lieutenant-general Sir John Clavering, K.B., by lady Diana Weel, youngest daughter of John, first Earl of Delawar; and she has issue, Thomas—Brooke, born July 9, 1791, died Aug. 7th, 1799; Samuel John, born Sept. 13, 1785, a lieutenant in the navy; George—Richard, born June 30, 1791; Charlotte Diana, born May 14, 1791, died Oct. 25, 1803; Frances Catherine, born Nov. 30, 1793.—This family has been, from a long series of generations, established at Montauban, in the province of Languedoc, in France. By a reference to a patent,figured by Henry IV. July 15, 1759, full extant, we are informed that Jean—Horace was appointed to the offices of a justice of peace, and an deputy of the king, which were created by the charter of the Board of Trade, in 1579, still extant, we are informed that Jean—Horace, who enjoyed that eminent station longer than any other in the French empire, was the ancestor of the present baronet; went over with Cromwell's party, and attained to the rank of colonel in his army; and was created a baronet as in the year 1641.—Family Seats, Starborough Castle, Surrey.

THOMPSON, of Virhees, Suffolk; created June 13, 1797.—Sir Norborne Thompson, the second baronet, born March 23, 1785; succeeded his father, Sir Charles, in 1803.—This family is maternally descended from the noble family of Berkeley.—Residence, at Southampton.

PARKER, of Harburn, Warwickshire; created June 21, 1797.—Sir William—George Parker, the second baronet, born Augt. 19, 1787; succeeded his father, Sir William, in 1804.—Family Seat, Harburn, Warwickshire.

ONSWOL, of Altham, Lancashire; created Oct. 30, 1797.—Sir Richard Onglow, an admiral of the fleet, to the earl of Onglow, was born June 23, 1714; married Anne, daughter of commodore Matthew Mitchell, of Chitten, in Wilts, by whom he has issue, Matthew—Richard, married, Nov. 30, 1803; the eldest daughter of the late Hugh Seton, Esq., lieutenant-governor of Surat; Henry, second captain of the royal artillery, married, Feb. 7, 1807; Caroline, daughter of the late John Bond, Esq., of Mitcham, Surrey; Cranley, and Roger, died infants; Anne; Elizabeth; Harriet; John; James; and Fanny, married admiral Sir Hyde Parker, bart. Sir Richard has greatly distinguished himself in the naval service, and was second in command in the memorable victory over the Dutch fleet at Camperdown, Oct. 11, 1797, for which he was created a baronet, and received the unanimous thanks of both houses of parliament.—Sir Robert's grandfather was Arthur Onglow, the celebrated speaker of the house of commons, who enjoyed that eminent station longer than any of his predecessors, and executed the trust with equal firmness and superior abilities to those who preceded him; and received the unanimous thanks of both houses of commons, for an unwearying attendance in the chair during the course of above thirty-three years, in

K N I G H T L E Y, of Fawley, Northamptonshire; created Dec. 30, 1797. — Sir John Knightley, in holy orders, M.A. created a baronet as above, with remainder, in default of issue male, to his nephew, Charles Knightley Clark, esq. was born Feb. 17, 1746; married Mary, daughter of John Baines, esq.—The Knightleys are originally from Staffordshire, taking their name from a small turret at Fawley. For this offence his sovereign, his attachment to puritanism grew till his zeal exceeded his prudence, and certain libels against the church were with difficulty discovered to have been printed in a small turret at Fawley. For this offence he was a privy councilor, and M.P. in the present parliament for the borough of Anstruther, North Britain; created May 18, 1798.—The Right Hon. Sir John Anstruther, a privy councilor, and M.P. in the present parliament for the borough of Anstruther, North Britain; created May 18, 1798.—The Right Hon. Sir John Anstruther, a privy councilor, and M.P. in the present parliament for the borough of Anstruther, born March 27, 1753, was bred to the law, and in 1789 was appointed chief justice of the supreme court of judicature in Bengal, where he officed he determined in 1806. Sir John is the second son of the late Sir John Anstruther, bart. of Anstruther, Fife, and married Maria, daughter of Edward Bicker, of Berton's freest, esq. by whom he has two sons, John and Wyndham; and a daughter, Marianne.—This family is of great antiquity in the county of Fife, and the first of this family upon record was designed de Candella dominus de Anstruther. Williamus de Candella lived in the reigns of David I. and Malcolm IV. in the twelfth century, and took the name of his estate. He was the undoubted proprietor, 1153, of the lands and barony of Anstruther; but how long his ancestors possessed them before him, cannot at this distance be ascertained. Sir James Anstruther, the twelfth in descent from Sir John, was appointed heritable carver to James VI. 1589, and was constituted one of the master households to his majesty, 1592, with all the profits and privileges belonging to those offices, which are hereditary in the family: he died in 1605, and was succeeded in his offices by his eldest son, Sir William, who was appointed one of the gentleman of the bedchamber to James VI. and upon his accession to the crown of England he accompanied him, and was created K.B. at his coronation: he was also gentleman usher to Charles I. had no issue, died in 1649, and was succeeded by his nephew, Sir Philip, son of his brother, Sir Robert, who was often employed in negociations of the highest importance: in 1620 he was sent ambassador extraordinary to the court of Denmark; and in 1627 to the emporer and states of Germany: he was afterwards plenipotentiary to the diet at Ratibon, and 1739 ambassador at the meeting of the princes of Germany, at Hailbrun, and in all these negociations he acquitted himself with fidelity and honour. Sir Philip, his son, was taken prisoner at the battle of Worcester, had one son, who died young, and the dying implored upon him by Oliver Cromwell, and his estate sequesterated till the restoration in 1660. He married Christian, daughter of major-general Lumfdain, by whom he had five sons. Sir William Anstruther, of that ilk, bart. eldest son of Sir Philip, member of the Scots parliament for Fife, in 1681, married Helen Hamilton, daughter of John fourth earl of Haddington, by whom he had Sir John Anstruther, bart. appointed master of his majesty's works in Scotland, July 16, 1717. He married Margaret Carmichael, eldest daughter of James second earl of Hyndford, by whom he had two children, who died young. Sir John, born Dec. 27, 1718, late M.P. for the burghs of Anstruther, Crail, &c. married. Oct. 17, 1730, Janet, daughter of James Ell, of Dunbar, in East Lothian, esq. by whom he had, Philip, born at Edinburgh, Jan. 13, 1752, who married, Feb. 19, 1778, Anne, daughter of Sir John Paterion, bart. succeeded his father in 1799, and died without issue, Jan. 5, 1808, by which Sir John succeeded to the family estate, and to the Scots title of 1641; for John, the present baronet; James, and William, died young; Robert, colonel of the Tay fencibles; Margaret, died young; Jean, wife of Charles Parker, by whom the had one son and four daughters.—Motto, Periign mi perilign. We had perished until we had perished.—Reference, Elie House, Fife, North Britain.

D A L L A S,
DALLAS, of Petfall, Staffordshire; created July 21, 1798.—Sir GEORGE DALLAS, bart, married, June 1788, the honourable Catharine, youngest daughter of Sir John Blackwood, bart, of Ballyleidy, Downshire, by Dorcas baronet's Dufferin and Clancboy, sister to the present Lord Dufferin and Clancboy, by whom he has, William, Creameel, born April 7, 1793; George, born Dec. 22, 1797; Catharine-Sophia, born Aug. 31, 1769; Marianne, born Aug. 6, 1790.—Family Seat, Petfall, Staffordshire.

WILLIAMS, of Bedleylyddan, Flintshire; created July 24, 1798.—Sir JOHN WILLIAMS, created a baronet as above, born Dec. 23, 1761; married, Oct. 21, 1791, Margaret, daughter and heir of Hugh Williams, of Tilney, born 1755; by whom he has a son, John, born Jan. 11, 1794; and two daughters, Harriet and Emma.—Family Seat, as above.

CALLANDER, of Welferton, Stirlingshire; created Aug. 1, 1798.—Sir JOHN CALLANDER, bart, a colonel in the army, born Sept. 1739; married, Feb. 2, 1786, Margaret, daughter of John Romer, of Chervich, in Northumberland, eqq, relief of Bridges Kearney, eqq.—This family is lineally descended from the earls of Chervich, with the command of the reinforcement sent of his majesty's fleet.—Vice-admiral fir Robert Callander, upon the death of his uncle, George, third earl of Littleghow, succeeded to his estate and honours, whereby both earls and dukes were united in his person. But, being engaged in the rebellion in the year 1715, he was attainted, and his estate and honours forfeited. He dying without issue male, his brother, John, succeeded to the title, and, having no heirs of his body, his third brother, John, succeeded to the title; and, had it not been forfeited, Sir John, would now have been earl of Callander.—Motto, above the crest, I mean well. Under the arms, Et domi et foris, At home and abroad.—Family Seat, Welferton, Stirlingshire.

CALDER, of Southwick, Hampshire; created Aug. 22, 1798.—Sir ROBERT CALDER, bart, a vice-admiral of the white, born July 2, 1745, knighted 1797, created a baronet as above; married, May 24, 1779, Amelia, only daughter of John Michell, of Bayfield, in Norfolk, eqq, late M.P. for Bolton, in Lincolnshire. Sir Robert Calder is the fourth and youngest son of the late Sir James Calder, bart, viz. a knight baronet of the kingdom of Scotland, which title he inherited at the death of his father, Sir Thomas Calder, (his father, James, having been so created Nov. 5, 1786,) who died at Edinburgh, Jan. 1760. Sir Robert was too young to be a very early age, and on the 27th of August 1780, he attained the rank of post-captain; in the year 1795, was appointed first captain to the commander in chief on the Mediterranean station; and he sailed from Spithead with admiral Sir John Jervis, K.B. (now earl of St. Vincent,) having been fo created 1780, and, having arrived in the Mediterranean, the admiral shifted his flag into his own, as the victor of the battle of Cape St. Vincent, on the 21st of February 1797. By order of the king, he was presented with a gold medal, to be worn round his neck, suspended to a blue-and-white ribbon. On the 17th of the same month of March, he sailed from St. Helen's, in the Ville de Paris, with the command of the reinforcement sent to the squadron under the command of admiral Sir John Jervis. On the 2nd of August 1798, Sir Robert was created a baronet of Great Britain. On the 14th of February 1799, he was advanced to the rank of rear-admiral of the blue; and on the 23rd of April 1804, he was further advanced to the rank of vice-admiral of the blue, and two days after the 2d of August 1812, he was advanced to the rank of vice-admiral of the royal navy, by the late king's majesty; Sir Robert Calder is lineally descended from Hugh Calder, of All
1800.—Sir Robert-John Buxton, representative in the parliaments of 1796, and 1802, for Great Bedwin, was born Oct. 27, 1753; married, May 22, 1777, Juliana Mary, second daughter of Sir Thomas Beevor, bart. by whom he has one son, John-Jacob, born Aug. 13, 1785, and three daughters: Anne, eldest daughter, born Jan. 31, 1782, married, in March 1806, F. Bevan, esq. and Juliana Frances, born July 28, 1791.—Family Seats, as above.

ELFORD, of Bickham, Devonshire; created Nov. 26, 1800.—Sir William Elford, bart. F.R.S. recorder of Plymouth, and M.P. for Rye, lieutenant-colonel of the South Devon militia; married Mary, daughter of the Rev. John Davies, of Plympton, Devonshire, and has issue, William, born Feb. 6, 1784; Grace, born Oct. 4, 1786; Geo. John, born May 23, 1788; Elizabeth, April 13, 1788, married, Dec. 29, 1805, the Rev. William Cockburn; Emily, born Jan. 10, 1791; Jane, born Nov. 27, 1800.—Sir Nathaniel Daniel, esq., M.P. for East Grinstead, took the name of Holland by royal sign manual, and was created a baronet as above. He married Harriet, daughter of Sir Cecil Billop, bart. and widow of Thomas Dummer, of Cranbury, in Hampshire, esq., George Dance, esq. architect to the city of London, died Dec. 17, 1768, aged twenty-five for the marriage of Elisabeth, daughter of Mr. Gould, of Hackney, who died 1763, by whom he had Issue, James, who married Miss Hooper, by whom he had, 1. Nathaniel, captain of the Earl of Arundell of Cornwall; 2. Elizabeth, born Feb. 15, 1794; and by her, who died June 8, 1806, in childbed, had Issue, Walter-George, born March 15, 1802; Mary, born June 17, 1782; and Anne, died young. Sir Robert married, secondly, Oct. 18, 1805, Clerke, daughter of Sir William Clere, bart. of Bury, Lancashire.—Family Seats, Bury, Lancashire; and Drayton Park, Staffordshire.

STIRLING, of Falkite, Lanarkshire; created Nov. 4, 1800.—Sir Walter Stirling, lord of the honour of OUNDLE, in Kent, created a baronet as above, F.R.S. and A.S. served the office of sheriff, and is a deputy lieutenant of the county of Kent, and member for St. Ives in Cornwall; married, April 28, 1794, Sufanna, daughter and sole heir of George-Trenchard Goodenough, esq. (descended from the family of William of Wykeham, bishop of Winchester, which entitles his heirs to their education at Winchester-college, as kin of the founder;) and by her, who died June 7, 1806, in childbed, had Issue, Walter-George, born March 28, 1795; Dorothy-Georgiana, born Feb. 27, 1798; and Sufanna-Maria, born May 31, and died June 7, 1806.—Henry, the third son of David earl of Huntingdon, brother to king William the Lion, in 1165, assumed the name of Stirling, because he was born in Stirling. The family afterwards took the name of Stirling, or Strawlin, and seated themselves at Calder, from which branch Sir Walter, the present baronet, is descended. It is worthy of remark, that there are now living four branches of this name: Sir Thomas Sterling of Ardock; Sir John Sterling of Gloriat; Sir Gilbert Sterling of Upper; and Sir Falkite Sterling of Lower. —Motto, Gang forward.—Residences, Pall Mall, London; Shoreham Castle, in Kent; and Falkite, Lanarkshire.

VAYASOUR, of Spaldington, and Melbourne, in Yorkshire; created March 20, 1801.—Sir Henry Vayasour, bart. so created as above, formerly Henry Nought, esq. lieutenant-colonel in the army, assumed the name and arms of VAYASOUR by royal license in 1795, agreeable to the will of his wife's ancestor, Thomas Vayasour, of Spaldington, esq. He married Jane, born March 28, 1795; Dorothy-Georgiana, born Feb. 27, 1798; and Sufanna-Maria, born May 31, and died June 7, 1806.—Henry, the third son of David earl of Huntingdon, brother to king William the Lion, in 1165, assumed the name of Stirling, because he was born in Stirling. The family afterwards took the name of Stirling, or Strawlin, and seated themselves at Calder, from which branch Sir Walter, the present baronet, is descended. It is worthy of remark, that there are now living four branches of this name: Sir Thomas Sterling of Ardock; Sir John Sterling of Gloriat; Sir Gilbert Sterling of Upper; and Sir Falkite Sterling of Lower. —Motto, Gang forward.—Residences, Pall Mall, London; Shoreham Castle, in Kent; and Falkite, Lanarkshire.

MILMAN, of Levaton, in Woodland, Devonshire; created Nov. 28, 1800.—Sir Francis Milman, M.D. and F.R.S. physician to his majesty, was created a baronet as above: he married Frances, daughter and heir of William Hart, of Stapleton, Gloucestershire, esq. by whom he has three sons, William-George; Francis-Miles; and Henry-Hart; and one daughter, Frances-Emily.—This family is said to be descended from John de Malamans, one of those officers sent by William the Conqueror to subdue the refractory monks in the isle of Ely. It is supposed that this man was left-handed, and from that circumstance took this name of Malman, which appears likely, as his arms are three fistfuls of corn.
nineteenth in descent from Manger le Vavafour, who first settled in England, married Dorothy, daughter of Sir Ferdinando Leghe, of Middleton, knt., who died in 1769, fettling his estate on his sole daughter, Mary Va-

favour, and her descendents take the name and arms of Vavafour.—Family Seats, Spaldington, and Melbourne Hall, both in the East Riding of the county of York.

MILNES, of Gaultey, Leicestershire; created March 21, 1801.—Sir Robert Sobey Milnes, bart. fo created as above; born 1747; married, Nov. 13, 1783, Charlotte Frances, third daughter of John-Albert Bent-
tineck, esq. captain in the royal navy; and has issue, John Bentincke, born Sept. 17, 1786; William Henry, born March 8, 1788, a lieutenant in the first regiment of foot-guards; Henry Banks Oldenburgh, born Oct. 17, 1790; Charlotte Harriet Martineau, born June 23, 1798; and Sophia Mary Anne, born Oct. 9, 1799. Sir Robert was, in the early part of his life, an officer in the royal regiment of horse-guards blue; in 1795, governor of the Charlotte Frances, third daughter of John Albert Bentincke, esq. of Penhill, Surrey; Stephana Anne, born July 6, 1785; Mary Louisa, born Dec. 28, 1788, secondly, May 8, 1793; Mary, only surviving daughter and heir of George Wil-

fon, esq.; Sir Hugh went to the East Indies in 1762, and returned in 1775; was chosen a director of the East-India company in 1783; deputy chairman in 1799 and 1800; and chairman in 1803 and 1804; colonel of the second regiment of Royal East-India Volunteers in 1796; and M.P. for Altrincham in 1803. The surname of Inglis, according to Douglas, is of great antiquity in the south of Scotland; it appears from the records, that there were several free barons of the name in that country: above five hundred years ago, we find Walter de Inglis, John de Inglis, Philip de Inglis, men of rank and property in the high court of Chancery, created a baronet as above; married Mary, daughter of Vincent Spry, esq. of Norwich, and William Spry, esq. of Weftminister; and has issue, William Earle, M.P. for Grantham, married Williamina, daughter and heir of William Spry, esq. governor of Barbadoes; Penelope, married Thomas Augustus Northmore, of Cleve, in Devonshire, esq. and died in 1792. Sir William married, secondly, Elizabeth, relict of Thomas Williamason, esq. of Newton, Lincolnsire, and daughter and heir of Robert Cope, of Spondon, in Derbyshire, esq. by whom he has issue, Thomas Earle; Charles Cope Earle; Montague Earle; in holy orders; Richard Earle; John Earle; Catharine; Elizabeth; Eleanor Charlotte; Maria Rebecca; and Selina Charlotte; deceased. The family of Welby

PEPYS, of London; created June 23, 1801.—Sir William Weller Pepys, late one of the masters in the high court of Chancery, created a baronet as above; married Elizabeth, eldest daughter of the honourable William Dowdewell, chancellor of the ex-

chequer; and has issue, William Weller; Christopher Charles; Henry; Maria Elizabeth; Sophia Isabella; and Louisa Anne. Sir William is descended from Rich-

ard Pepys, lord chief justice of the court of King's Bench in Ireland, 1664. Samuel Pepys, sixth in descent from William Pepys, of Cottenham, in Cambridgeshire, married Hannah, re-

lict of Alexander Weller, esq. by whom he had issue, Sir William Weller, the present baronet; and Sir Lucas Pepys, baronet, physician to his majesty. Motto, Mau-

censique est qui jus est. Every man has his own opinion.

BALL, of Blofield, Norfolk; created June 24, 1800.—Sir Alexander John Ball, bart. fo created as above, rear-admiral of the blue, obtained his majesty's command to accept the rank of commander of the order of St. Ferdinand, and of Merit, conferred on him by the king of Naples; he was commander of the blockade of Malta, and, since its capture, was governor; married, July 7, 1785, Mary Smith, daughter of John Willon, gent., of Weftminster; and has issue, William, and Sophia, William Keith, born Oct. 27, 1786. Family Seat, Blofield, Norfolk.

BENSELEY, of St. Mary-le-bone, Middlesex; created June 21, 1801.—Sir William Benseley, created a baronet as above; married Mary, daughter of Vincent Biscoe, esq. of London; in the female line, grand-daugh-
ter of Edward duke of Somerset. Sir William entered early into the royal navy, and leaving that service went to the East Indies; he returned to England in 1777, and was chosen one of the directors of the East-India com-

pany, an office he continues to hold. Residence, Ber-

nier's-freet, St. Mary-le-bone.

WELBY, of Denton Houfe, Lincolnshire; created June 27, 1801.—Sir William Earle Welby, created a baronet as above; born August 1734; married, first, Perelope, daughter of Sir John Glyunes, of Hawarden Caile, in Flintshire, bart. and by her, who died in 1771, had two children, who died infants; William Earle, M.P. for Grantham, married Williamina, daughter and heir of William Spry, esq. governor of Barbadoes; Penelope, married Thomas Augustus Northmore, of Cleve, in Devonshire, esq. and died in 1792. Sir William mar-

ried, secondly, Elizabeth, relict of Thomas Williamason, esq. of Newton, Lincolnsire, and daughter and heir of Robert Cope, of Spondon, in Derbyshire, esq. by whom he has issue, Thomas Earle; Charles Cope Earle; Montague Earle; in holy orders; Richard Earle; John Earle; Catharine; Elizabeth; Eleanor Charlotte; Maria Rebecca; and Selina Charlotte; deceased. The family of Welby
Welby is of great antiquity in the county of Lincoln, deriving its name from the manor of Welby, near Grantham, which manor is now the property of Sir William. John lord of Caftleton, ancestor of all the Welbys, came over in the time of William the Conqueror, and the family originally spelt their name Welle.

The female branch is equally ancient; their name was Towers, and they came over about the same time with the male branch; being direct descendants of the De la Tour family. Several of the Welbys have had the honour of representing their native county in Lincoln in parliament. Christopher Baynes, 6th Henry V., Richard, 12th Edw. IV., and William, in 1654 and 1656.

Many of them have served in public offices, particularly Sir James-Michael, a captain in queen Elizabeth's reign; he, among other offices, purchased Mohill, &c. in the county of Leitrim, and having left to his only son, whose grandson, Sir William Keane, is the present baronet, is the son of William Baynes, late of the first baronet, is the son of William Baynes, late of Kilburn, in the county of York, who had issue, Hugh, who married Anne, daughter of William Gregory, esq. of Kilburn, in the county of York, esq. and of Mary, daughter of Christopher Roberts, esq. a descendant from Hugo de Bath, married, in 1754, Bridget, daughter of Major Hugh Morgan, of Dublign; and had issue, Hugh, who married Annæ, daughter of George Crofton, of Liburn, in Roscommon, and had issue, Morgan, who was created a baronet as above; and, dying soon after, was succeeded by his son, Hugh, the present baronet. —Motto, Da beata incertitudinem, God gives the increase. —Family Seat, Mohill House, Leitrim, Ireland.

DE BATHE, of Knightstown, Meath, Ireland; created July 7, 1801. —Sir James-Wynne-Butler De Bathe, of Knightstown, Cavan, and Laryrath, the second baronet, was born Oct. 25, 1792; and succeeded his father, Sir James-Michael, Feb. 1808. —This family came into England with William the Conqueror. Hugo de Bathe accompanied earl Strongbow into Ireland, and was the 9th of the name, in 1172, and was created a baronet as above; he married, in 1656, a daughter in the counties of Dublin, Meath, Louth, and Drogheda. By degrees the de was dropped, and the name became plain Bathe. Peter Bathe, esq., the fifteenth in descent from Hugo de Bathe, married, in 1754, Bridget, daughter of Edmund de Fonte, of Boyle, in Roscommon, esq. by whom he had issue, Sir James-Michael, of the second. Thomas Barrett-Lennard, lord Dacre, was born 1716, married Anne, daughter of Sir John Pratt, bart. of Clowance, Cornwall; and had issue, Thomas, John, George, Henry; Edward-Pomery; Dacre; and Dorothy-Anne. —The name, (i.e. De Bathe,) and was created a baronet as above; married, in 1787, Dorothy, daughter of sir John Pratt, bart. of Clowance, Cornwall; and had issue, Hugh, who married Anne, daughter of William Gregory, esq. and of Mary, daughter of Christopher Roberts, esq. a descendant from Hugo de Bath, married, in 1754, Bridget, daughter of Major Hugh Morgan, of Dublign; and had issue, Hugh, who married Annæ, daughter of George Crofton, of Liburn, in Roscommon, and had issue, Morgan, who was created a baronet as above; and, dying soon after, was succeeded by his son, Hugh, the present baronet. —Motto, Da beata incertitudinem, God gives the increase. —Family Seat, Mohill House, Leitrim, Ireland.

MONTGOMERY, of Stanhope, Peeblesshire; created July 16, 1801. —Sir James Montgomery, created a baronet as above; pretor of signatures in the court of Exchequer in North Britain, and M.P. for the county of Peebles; married Margaret, daughter and co-heir of Robert Scott, of Killeam, near Glasgow, esq. and had issue, Sir James-Michael, of the second. Six John married, secondly, in 1804, Dorothy, daughter of sir John Pratt, bart. of Clowance, Cornwall; and had issue, Hugh, who married Anne, daughter of William Gregory, esq. and of Mary, daughter of Christopher Roberts, esq. a descendant from Hugo de Bath, married, in 1754, Bridget, daughter of Major Hugh Morgan, of Dublign; and had issue, Hugh, who married Annæ, daughter of George Crofton, of Liburn, in Roscommon, and had issue, Morgan, who was created a baronet as above; and, dying soon after, was succeeded by his son, Hugh, the present baronet. —Motto, Da beata incertitudinem, God gives the increase. —Family Seat, Mohill House, Leitrim, Ireland.

DOUGLAS, of Caffie Douglas, Kirkcudbright, North Britain; created July 17, 1801. —Sir William Douglas, created a baronet as above; president of signatures in the court of Exchequer in North Britain, and M.P. for the county of Peebles; married Margaret, daughter and co-heir of Robert Scott, of Killeam, near Glasgow, esq. and had issue, Sir James-Michael, of the second. Six John married, secondly, in 1804, Dorothy, daughter of sir John Pratt, bart. of Clowance, Cornwall; and had issue, Hugh, who married Anne, daughter of William Gregory, esq. and of Mary, daughter of Christopher Roberts, esq. a descendant from Hugo de Bath, married, in 1754, Bridget, daughter of Major Hugh Morgan, of Dublign; and had issue, Hugh, who married Annæ, daughter of George Crofton, of Liburn, in Roscommon, and had issue, Morgan, who was created a baronet as above; and, dying soon after, was succeeded by his son, Hugh, the present baronet. —Motto, Da beata incertitudinem, God gives the increase. —Family Seat, Mohill House, Leitrim, Ireland.

Boreetsy.

[Caption in Latin and English, indicating heraldic devices and their symbolic meanings.]

Index to the coats of arms, with appropriate illustrations and descriptions.
Dorothy, relief of Philip-Champion Crespigny, efg. by whom he has issue, George-Michael.—Family Seats, as above.

HOMAN, of Dunlim, Wealfmeath, Ireland; created Aug. 1, 1801.—Sir WILLIAM-JACKSON HOMAN, knt. was created a baronet was above, married, June 12, 1792, Lady Charlotte Stuart, daughter of John marquis of Bute.—Motto, Homae fuen, I a man am.

CHATTERTON, of Castle-Mahon, Cork; created Aug. 3, 1801.—Sir ARTHUR CHATTERTON, the second baronet, born in 1787, succeeded his father, Sir James, April 9, 1806.—Motto, Loyal a mort, Loyal to death.

HARDING, of Lurran, Fermanaghshire, Ireland.—Sir RICHARD HARDING, created a baronet as above, with remainder, in default of his issue male, to the heirs male of his father, Nicholas Harding, efg., late of Canterbury, deceased; married Mary, daughter of Ralph Gore, earl of Ros, by whom he has no issue.—Family Seat, Belle, Fermanaghshire.

FITZGERALD-JUDKIN, of Lisheen, Tipperary; created Aug. 5, 1801.—Sir THOMAS FITZGERALD, colonel of the ancient Irish regiment, assumed the surname and arms of JUDKIN, and was created a baronet as above; married Elizabeth, second daughter and heir of Joseph Capel, efg., and has issue, John-Judkin, born in Aug. 1799; Joseph-Capel, born in Aug. 1801; and Robert-Uniacke, born in 1792.—Family Seat, Lisheen, in Tipperary.

KELLET, of Lota, Cork, Ireland; created Aug. 6, 1801.—Sir RICHARD KELLET, knt., born May 16, 1761, created a baronet as above; married, Feb. 9, 1788, Jane, daughter of John Galway, efg., of Weftcourt, in Kilkenney and his issue, Richard, born May 16, 1792; and William, born Oct. 10, 1794.—Motto, Auxilium ab alto, Help from above.—Family Seat, Lota, near Cork, Ireland.

GOOLD, of Old Court, Ireland; created Aug. 8, 1801.—Sir FRANCIS GOOLD, created a baronet of England as above.—The family of Goold has been long resident in the county of Cork, but suffered by its adherence to the cause of James II. William Goold, efg., was mayor of Cork in the reign of Henry VI. The precise period of this family migrating to Ireland is not ascertained; but it is presumed, the lineal ancestor became resident in the county of Cork as early as the reign of Henry VI. William Goold filled the office of mayor of Cork in the years 1442 and 1443; the same office was filled in 1493, 1494, and 1513, by John Goold, and in 1523, 1543, and 1501, by William Goold; and in 1503 and 1550, by Edmund Goold.—Motto, Deus mihi providet, God will provide for me.—Family Seat, Old Court, Cork.

SYNGE, of Kiltough, in Meath, Ireland; created Aug. 12, 1801.—Sir EDWARD SYNGE, the second baronet, succeeded his father, Sir Robert, in 1804, born April 4, 1786.—Of this family, (whose original name was Millington,) which flourished at Bridgenorth in Shropshire, for many centuries, was — Millington, denominated Saga, from the circumstance of his being a canon, or chantry priest. This explanation is the more necessary, because the unfortunate addition of an e might seem to refute the name into (a French) word of a very different meaning.—Motto, Celestia quantum, We fly heavenly things.—Family Seat, Kiltough, in Meath.

POLE, of Wolverton, Hampshire; created Sept. 12, 1801.—Sir CHARLES-Maurice POLE, baronet, admiral of the blue, had the command of the channel-fleet in 1801. In 1802 he was appointed president of the committee for inquiring into the abusés of the navy; and is one of the equerries of his royal highness the duke of Clarence, and M.P. for Plymouth. He married, June 10, 1792, Henrietta Goddard, daughter of John Goold, efg., of Woodford Hall, Eifex, and niece of Henry Hope, efg., late of Amsterdam, by whom she has issue, unmarried; Maria-Henrietta; Anna-Marie.—The present baronet is a younger branch of the family of Pole of Sluice, in the county of Devon, which was raised to the honour of the baronetage Sept. 12, 1638, the present representative of which is Sir William-Templer Pole, bart. Sir John, the third baronet, who died March 13, 1792, married Anne, the youngest daughter of Sir William-Mottice, knt. of Werrington in Devonshire, one of the principal secretaries of state to king Charles II. by whom he had issue, four sons and four daughters. Carulus, the fourth son, was colonel of the Blue, had the command of the channel-fleet in 1801. The Right Hon. Sir EVAN NEPEAN, of Bothenhampton, Dorsetshire; created July 10, 1802.—The Right Hon. Sir EVAN NEPEAN, of Bothenhampton, Dorsetshire, late a representative of which is John Littlehales, of Winchelsea, Sussex; created Sept. 2, 1802.—Sir EDWARD BAKER LITTLEHALES, late a lieutenant-colonel in the army, created a baronet as above, for various important services, both civil and military; married, July 22, 1805, Mary Fitzgerald, daughter of William-Robert, second duke of Wellington, K.P.—Sir Edward is descended from an ancient family in the neighbourhood of Bridgenorth, Shropshire, the representative of which is John Littlehales, of Winchelsea, M.D. whose father had the rank of lieutenant-colonel.
colonel in America.—Motto, Finis coronat opus. The end crowns the work.—Family Seat, Ashcombe, Suffex.

DICKSON, ofHardingham, Norfolk; created Sept. 21, 1802.—Sir WILLIAM DICKSON, the third baronet, (a minor), succeeded his father, Sir Archibald Collingwood, in 1803.—Motto, Fortuna fortuna juvat, Fortune favours the brave.—Family Seat, Hardingham, Norfolk.

BRATHWAITE-BOUGHTON, of Porton Court, in Herefordshire; created Dec. 18, 1802.—Sir GEORGE-CARLES BRATHWAITE-BOUGHTON, the second baronet, succeded his father, Sir John, Aug. 16, 1803; a major-general in the army; assumed the surname and arms of Boughton, by royal sign manual, in August 1798; married, in June 1801, Eliza, daughter of the late Sir Edward Boughton, of Porton Court, Herefordshire, baronet, and has issue, a daughter, born June 10, 1807.—This family has been long resident in the county of Welfmoreland. John Brathwaite, born in 1606, governor in chief of the African company's factories on the south coast of Africa, was killed on board the Baltic merchant-veffel, in an engagement off Scilly, with a Spanish privateer. He married, Silvia, daughter of Coles, esq. of Amsterdam, by whom (who died in 1799) he had issue, Silvia, married to Bonnel-Thorton, esq. Caroline, married to Robert Armitage, esq. and John, born in 1739, a major-general, and commander in chief of the East-India company's forces on the coast of Coromandel in 1793, who held the chief command and received repeated testimonies of the approbation of government. When retiring from this distinguished situation, the general and field-officers of the army recommended him to accept the record of their esteem, affection, and respect, in a valuable service of plate, which they presented to him. In public life, he was a strict observer of discipline, zealous, diligent, brave, and of unshaken fidelity. He was created a baronet as above; and, deceasing Aug. 1803, was succeeded by his only surviving son, sir George-Charles, the present baronet.—Family Seat, Porton Court, in Herefordshire.

WHITE, of Tuxford, Nottinghamshire, and of Wallingwells, Yorkshire; created Dec. 20, 1802.—Sir THOMAS-WOOLASTON WHITE, born Jan. 20, 1757; created a baronet as above, with remainder, in default of issue male, to the heirs male of his brother, Taylor, and his sister Laurence White; married, Jan. 30. 1787, Elizabeth, daughter of Thomas Blagg, of Tuxford, esq. and has issue, Thomas-Woolaston, Elizabeth, and Sarah. Sir Thomas raised, armed, and clothed, at his own expense, a corps called the Sherwood Rangers.—Family Seat, Wallingwells, near Workhop, Nottinghamshire.

METCALFE, of Chilton, Berkshire; created Dec. 21, 1802.—Sir THOMAS-THEOPHILUS METCALFE, a major in the army in the East Indies, late M. P. for Abingdon, a director of the East-India company, created a baronet as above; married, in 1788, Sophia-Susannah-Selina, daughter of John Deboaire, of the Cape of Good Hope, esq. relict of major John Smith, and has issue, Theophilus-John, born Jan. 30, 1785; Charles-Theophilus, born Jan. 6, 1789; two daughters, who died young; Emily-Theophilus, born June 16, 1790; Georgina-Theophilus, born Jan. 30, 1792; Thomas-Theophilus, born Jan. 2, 1795; and Henry-Theophilus, died in July 1804.—Metcalfe is a very ancient name. Honourable mention is made of a captain Metcalfe, who served in the field of Agincourt, in the fifteenth century. Sir Thomas Metcalfe was mayor for the county of York, and was attended to the assizes by one hundred and fifty Metcalfes mounted on white horses. The Metcalfes have intermarried with several noble families. Sir Christopher Metcalfe, in 1550, married lady Elizabeth, the daughter of the earl of Cumberland, baron Clifford and Vefey, by Margaret, daughter of the earl of Northumberland. Thomas Metcalfe, of Routh Park, married Anne, daughter of lord Hardwicke, father of the first earl of Hardwicke. Frances, daughter of Sir Thomas Metcalfe, married Sir William Robinson, the ancestor of the barons Grantham. The present baronet, sir Thomas, is the son of Thomas Metcalfe, fifth in descent from Thomas Metcalfe, son or nephew of Thomas Metcalfe, chancellor of the duchy of Lancaster, and cousin of Richard the first earl of Holdernesse. The late Mrs. Thomas was a captain in the army, and died in 1778.—Motto, Conquista, I am satisfied.—Family Seat, Fern Hall, Berkfhir, Town-houfe, Portland Place.

SMITH, of Hadley, Middlesex; created Dec. 22, 1802.—Sir CULLING SMITH, created a baronet as above, born July 10, 1768; married, Sept. 22, 1792, Charlotte-Elizabeth, second daughter of Sampfon lord Ernley, by whom he has issue, Charlotte-Elizabeth, born Oct. 24, 1793; and Louisa-Selina, born Jan. 21, 1794.—The ancestors of sir Culling, of the name of Le Fevre, came from France in the reign of queen Elizabeth, settled in England, and assumed the name of Smith. Mr. Thomas Smith, of Hadley, and of London, merchant, who died in 1744, married Culling, sifter and co-heir of Edward Constable, esq. by whom he has issue, William, born March 2, 1740; George, born March 25, 1743; that time the christian name of Culling has been kept in the family.—Motto, Spes decus et robur, Hope, honour, and strength.—Family Seat, Hadley Middlesex.

CURTIS, of Cullas's Grove, Southgate, Middlesex; created Dec. 23, 1802.—Sir WILLIAM CURTIS, alderman of Tower Ward, lord-mayor of London in 1795, M. P. for the city of London, created a baronet as above, born Jan. 14, 1752; married, Feb. 7, 1757, Anne, pothumous daughter and co-heir of Edward Constable, esq. by whom he has issue, William, born March 2, 1757; George, born March 2, 1759; John, born Aug. 8, 1768; that time the christian name of Culling has been kept in the family.—Motto, Gredatur muniamus, We conquer by degrees.—Family Seat, Cullas's Grove, Southgate, Middlesex.

PEACOCK, of Barntic, Clareshire; created Dec. 24, 1802.—Sir JOSEPH PEACOCK, created a baronet as above, born 1734; married, 1761, Elizabeth, only daughter of Thomas Cuffe, of Grange in Kilkenny, esq. (a younger branch of the Defert family, and half-sister of lord Caffeconte, and lieutenant-general sir Eyr Coote), and has issue, 1. Nathaniel-Levett, born Oct. 5, 1769, a lieutenant-colonel in the army, married, July 20, 1803, Henrietta, daughter of John Morris, esq. of Portman-square, and has issue, Elizabeth, born April 22, 1797; John, born April 28, 1798; Mary, born Feb. 7, 1794; married, in 1802, J. O'Beirne, esq. brother of the lord bishop of Meath. 4. Grace. 5. Philippa. 6. Mary, married colonel Daniel O'Meara, late of the 12th West-India regiment. 7. Catharine, married, in 1797, Frances Gore, esq. of Dormore in Clare. 8. Georgiana. 9. Alicia.—Motto, Vincit veritas, Truth prevails.—Family Seat, Grange, county, of Limeric, Ireland.

STRONGE, of Tynan, in Armagh; created June 14, 1803.—Sir JAMES-MATTHEW STRONGE, the second baronet, born 1786, succeeded his father, the Rev. Sir James, A.M.—Family Seats, Tynan, Armaghshire, and Thornhill, county of Dublin.

DE-CAPELL - BROOK, of Great Oakley, in Northamptonshire; created June 14, 1803.—Sir RICHARD-BROOKE DE-CHAPELL-BROOK, created a baronet as above, in 1792, major-general of the Northampton town militia, F. R. S., married, Aug. 18, 1758, Mary, only child and heir of major-general Richard Worg, and has issue, Mary-Anne, born May 11, 1799; Arthur-Brooke, born Oct. 22, 1791; Sophia, born Nov. 20, 1792; Frances, born in 1794, died in 1795; Caroline, born Dec. 4, 1795; Richard-Worge, died in 1803.
William Broke, ancestor of the Oakley branch, was living anno 1595. It appears, by the visitations in the College of Arms, that Sir Nicholas Broke, the 2nd of that name, married the daughter of Sir John Buteh, and that he married the daughter of Sir John Buteh, and that he was buried there on the 10th of September 1731; and that William Broke possessed the manors of Aftwell Fawcott, and Wappenham, in Northamptonshire, which he exchanged on the 24th of April, 16 Edw. IV, with Thomas Lovett (whose daughter he married), for the manors of Aftwell and Aitken and of Sandbach. Sir Thomas Broke married Judith, daughter of John Shugburgh, of Nafeby, descended from Guy earl of Warwick, and William the Conqueror. Edward Broke, brother of Sir Thomas, was master-marter general of Ireland, where he settled; he married the daughter of Sir William Pelham, knt. Arthur Brooke, son of Sir Thomas, married Dorothy, eldest daughter of Sir Thomas Neville, of Holt, descended from Neville, lord high admiral to William the Conqueror. Thomas Brooke, son of Arthur, married Margaret, daughter of Sir John Walter, of Oxfordshire, lord chief baron of the Exchequer. Arthur, his son, and great grandfather of the present baronet, married Jane, daughter of Sir William Stewart, of Caste Archdale, in Fermanagh, esq. and by her, who died 1795, had issue, Mary, born 1791; Hugh, born March 1793; and Mervin, born 1799.—About the year 1621, Andrew Stewart, commonly called captain of Mountjoy Castle, in the county of Tyrone, (James was in the navy, and married a daughter of Clodely Shovel.) Hugh had issue, Andrew, Hugh, James, and John. Andrew, Hugh, and James, died without issue. John married Mary Kennedy, and had two sons, Hugh and James, and several daughters. Hugh married Sarah, youngest sister of Henry Hamilton, of Castel Conyngham, in the county of Donegal, esq. and by her had issue, John (now Sir John), Andrew, and Henry. In the year 1801, John was appointed by his majesty to the office of attorney-general of Ireland, and then called to the privy council; in 1805 he was elected one of the representatives for the county of Tyrone; and in the year 1807 created a baronet by his majesty George III.

Arms. Quarterly, first and fourth, Or, a lion rampant azure, within a double trefure counterfoily vert; second and third, Or, a fesschecky argent and azure; in the chief of the second and third quarters, a portcullis or, and in the middle of the first and fourth quarters, a portcullis gules. On the crest, an unicorn's head couped or, corned and erined argent. —Motto, Stemnata quid faciunt. —The above arms are borne by Sir J. Stewart as being descended from John, Lord Ochiltree, Lord Castletewart in Ireland; the portcullis was by his majesty granted to Sir John and his descendants exclusively, on his being appointed attorney.
BARLOW, of Port William, Bengal; created June 25, 1803.—Sir George-Hilaro Barlow, K.B. created a baronet as above, was appointed governor-general of India in the death of Charles marquis Wellesley, Dec. 5, 1803, and May 13, 1807, appointed governor of Fort St. George, Madras; married, in April 1789, at Calcutta, Elizabeth, daughter of Burton Smith, of Welfmeath, esq. and has issue, George-Ulric, born Oct. 8, 1791; William, Dec. 18, 1793; John-Henry, Dec. 7, 1795; Robert, Sept. 24, 1797; Charles, Elizabeth, born Feb. 19, 1798; and other issue, all born in Calcutta.—Sir Robert Barlow, kn. the baronet's elder brother, a captain in the royal navy, a brave, active, and diligent officer, commanded the Phobe frigate in 1797, and captured, after a desperate engagement, la Nereide, French frigate, of 36 guns. In 1801, in the same frigate, he most gallantly fought and captured, after a severe action, near Gibraltar, the Afri¬caine, French frigate, of 40 guns; for his courage and good conduct on this occasion, he was knighted at the queen's house, June 16, 1801, and appointed to the command of the Triumph, of 74 guns.—Residence, Fort St. George, Madras.

WEDDERBURN, of Ballendean House, and Black¬nefs, Perthshire; created Aug. 15, 1803.—Sir David Wedderburn, second baronet, born Dec. 5, 1777, in default of issue male, to the heirs male of his father, Sir John Wedderburn, bart. M.P. for St. Andrew's, North Britain.—Family Seats, Ballendean Seat, East Sheen, Surrey. Sizing its prey, proper.—Motto, Sculo divino.—Family Seat, East Sheen, Surrey.

PRICE, of Spring Grove, Richmond, Surrey; created Feb. 2, 1804.—Sir Charles Price, created a baronet as above, alderman of Parringdon ward-without, in the city of London in 1802, 1806, and 1807, and colonel of the 4th regiment of the city volunteers; married Mary, daughter of William Rugge, esq. of Conduit¬street, Hanover-square; and has issue, Charles, born in 1776, married Mary-Anne, daughter of William King, of Kingstreet, Covent Garden, Sept. 20, 1796; Charlotte Savery, daughter of the late col¬lonel Sir John Savery, bart. D.D., married, Oct. 12, 1805, Elizabeth, daughter of Henry Heyman, esq. George-Rugge, Thomas; Mary-Anne, married William More, esq. proctor, of Doctors' Commons; Lucy-Henrietta, married, Nov. 2, 1807, John Harrison, esq. Anne-Catharine; Elizabeth; and Sarah.—Family Seat, as above.

MAXWELL, of Cardine’s Kirkcudbright, North Britain; created May 12, 1804.—Sir David Maxwell, bart. so created as above, a lieutenant-colonel in the army, married Henrietta, daughter of his uncle, David Maxwell, of Kamfoor, in Kirkcudbright, (who died July 29, 1793) and has had issue, William, drowned in his passage to Minorca, Feb. 17, 1801; David, captain in the first regiment of foot-guards, born June 18, 1773; Alexander, married, in 1795, a daughter of the late colonel Wedderburn, of Kamfoor, and has had issue, William, captain in the 39th regiment of infantry; Nicholas; Agnes, married Alexander Blair, esq. writer to the signet, in Edinburgh, and has issue two daughters; Har¬riet; Grace.—This family is descended from William, second son of Sir Gavin Maxwell, of Calderwood, a family of great antiquity in North Britain, the fifth descen¬dant of Sir John Cumine, lord Cumine, who died in 1749, as a baronet as above.—Motto, above the crest, Think on.

CUMING-GORDON, of Altyr, and Gordonflown, in Elgin; created May 12, 1804.—Sir William-Gordon Cuming-Gordon, the second baronet, born July 20, 1787, succeeded his father, Sir Alexander-Fennofe, Feb. 10, 1806.—The family of Cuming is said to be de¬scended from the ancient family of the Cuminas in France. Sir John Cuming, lord of Badenoch, who died in 1299, left two sons: 1. John lord of Badenoch, his successor. 2. Robert progenitor of the family of Altyr. The male line of John is now extinct, as he died 19 Edw. II. "I have Joane, wife of David de Strathbolgie earl of Athole, then 30 years of age, and Elizabeth, her fitter, 26 years of age, his fitters and next heirs, which Elizabeth afterwards became wife of Richard Talbot." (See Dugdale's Baronage, i, 686.) It seems that from this Eliza¬beth the earls of Shrewsbury have assumed, and to this day bear, the title of lord Cuming of Badenoch, deriving from the female line, to the prejudice of the heirs male of Robert, second fon of Sir John Cuming lord of Badenoch, and last heir of the family of Cuming in Scotland, ? Sir John Cuming of Altyr is now the undoubted represen¬tative and lineal descendant; it is presumed, therefore, that Sir William has a claim to the title of lord Cuming of Badenoch superior to that of the earl of Shrewsbury.—Motto,
LEES, of Black Rock, near Dublin; created June 21, 1804.—Sir John Lees, baronet, so created as above, born Feb. 17, 1739; married, Oct. 20, 1766, Mary, eldest daughter of Robert Cathcart, of Glendusk in Ayrshire, esq. and has issue, Harcourt, born Nov. 29, 1776; John, born Oct. 21, 1777; married Mary, daughter of Robert Shaw.
Myers, of Joningham, King's County, Ireland; created June 25, 1804.—Sir William James Myers, the second baronet, succeeded his father, Sir William, in 1805; born Nov. 27, 1783; a lieutenant-colonel in the army, and lieutenant-colonel of the 7th regiment of foot.

—Family Seat, as above.

O'Malley, of Roshehill, in Mayo; created June 21, 1804.—Sir Samuel O'Malley, baronet, fo created as above, born Dec. 26, 1782.—Motto, *Terti marique potens, Valiant by sea and land.* —Family Seat, Roshehill, in Mayo, Ireland.

Clarke, of Creffes Green House, near Cork; created June 23, 1804.—Sir William Clarke, knight, a major-general in the army, and lieutenant-colonel of the 84th regiment of foot, created a baronet as above, born Sept. 1, 1763; married at Bombay, in 1795, Maria, daughter of Prendergast, of Dublin, esquire, and has issue, William, born Aug. 3, 1801; and Guy-Henry, born Sept. 10, 1802.—Family Seat,Creffes Green House, Cork.

Rae, of Eskgrove, Mid Lothian; created June 27, 1804.—Sir David Rae, created a baronet as above, born in 1729; married, in 1761, Margaret, daughter of John Stewart, esq. of Blair Hall, by lady Anne Stewart, daughter of Francis, the eighth earl of Moray, by Jane, youngest daughter of John Elphinstone, lord Balmerino; and by her (who died in 1799) had issue, David, lieutenant-colonel of the western battalion of Devonshire militia, married Mary, daughter of Oliver Colt, of Aldham, esquire, and has issue, four daughters; William, advocate of the Court of Session, and steward of the estate of Orkney and Zetland; married Mary, daughter of Christopher Stuart, of Annfield, a lieutenant-colonel in the army; Margaret, married Thomas-Phipp Howard, esq. a captain in the 3rd regiment of dragoons. Sir David was, in 1751, admitted an advocate at the bar of the court of Session, in North Britain; in 1782, he was promoted to the rank of judge of Session, with the title of lord Eskgrove; in 1785, a judge of the high court of judicature; and in 1795, lord justice clerk of the same court. Sir David is the son of David Rae, of St. Andrew's, clerk, M.A. son of Patrick Rae, of Ely, in Fifeshire, esquire, by Abigail, daughter of Sir David Forbes, bart. of Newhall, and heir of William Douglas, of Garvabout.—Family Seat, Eskgrove, Mid Lothian.

Bruce, of Down Hill, Londonderry; created June 29, 1804.—Sir Henry-Hervey-Aston Bruce, in holy orders, B.A. created a baronet as above; married, Nov. 10, 1786, Letitia, daughter of the late Rev. Dr. Henry Barnard, of Bovagh, in Londonderry; (second son of William, late bishop of Derry,) by whom he has issue, Frederic-Hervey, born Aug. 20, 1787; James-Robertson, born Sept. 4, 1788; Henry-Wilson, born Feb. 12, 1792; Letitia, born Feb. 2, 1796; Henrietta-Mary, born Nov. 20, 1797; Frideswold-Sarah, born Aug. 20, 1799; Stewart-Craufurd, born Jan. 20, 1801; and Frances-Elizabeth, born July 13, 1806.—This baronet derives his descent from the Robert de Burgw, a knight of the garter, to Ireland, as lord-deputy, created him a peer. Thomas Lord Burroughs, who, in some others, in England and Ireland, which now bear the names of De Burgh, Burgh, Burke, Boroughs, Burrough, and Burroughs, derive their origin from Robert de Burgh, who came from Normandy with William the Conqueror, and in 1068 was created earl of Cornwall, and his brother, Odo de Burgo, bishop of Bayeux, was created earl of Kent. One branch of Robert de Burgh's family went to Ireland in the reign of Henry II. and there gave rise to the noble families of Clancry, card, Mayo, and several other families of distinction, in that kingdom. Another branch, from which the present baronet is descended, settled in Lincolnshire, and was advanced to the dignity of the peerage by queen Elizabeth, who, on sending Sir Thomas Burroughs, then a knight of the garter, to Ireland, as lord-deputy, created him a peer. Thomas Lord Burroughs, who, in some others, in England and Ireland, which now bear the names of De Burgh, Burgh, Burke, Boroughs, Burrough, and Burroughs, died in the government without issue male, when the title became extinct, and his estates in Lincolnshire passed into the Newcastle and Gainborough families. He was accompanied to Ireland by a collateral relation of the same name, who acquired a large landed property in the county of Wicklow, and was the immediate ancestor of the present baronet; who, when at the bat, married Letitia Newburgh, as above: and, after having been involved in a great lawsuit for a large estate, claimed by his wife and by her father as coheirs of their brother, William Perrot Newburgh, sir William went to India, where he was appointed advocate-general in Bengal, by marquis Cornwallis, the governor-general of India; and for his public services in that country, was, in 1804, created a baronet; on the same occasion he also received a grant, making an addition to the family arms.—Motto, *Audaces fortuna juvat, Fortune favours the bold.* —Residence, Calcutta, Bengal.

Cotterell, of Gannow, in Herefordshire; created Oct. 5, 1805.—Sir John Gers Cotterell, of Gannow, in the parish of Uptonward, county of Hereford, created a baronet as above, M.P. in the present and last parliament for the county of Hereford; born Sept. 25, 1757; lord of the manors of Mansell Gamage, Shuttlebury, Brobury, Kilkington, Bridge Sollers, and Hathfield, in the county of Hereford; a colonel in the army,
arney, 1796; colonel of the Herefordshire militia, from 1796 to 1803; colonel of two battalions of Herefordshire volunteers, consisting of 2000 men. Sir John married, Jan. 4, 1794, Frances-Isabella, only daughter and heir of Henry-Michael Evans, of St. George's Hanover-square, by his wife Mary, daughter and heir of Benjamin Wellington, esq. of Heriord, by whom he has issue, John-Henry, born April 15, 1800; Henry, born Jan. 13, 1801. He married, Jan. 3, 1800, Anne, Mary, daughter and co-heir of Thomas; and Caroline. This family is descended from Edmund Cottrell, of Saintbury, in the county of Gloucester, esquire, whose only daughter, Anne, married John Brookes, of Broadway, in the county of Worcester, esquire, whose fourth son, John Brooke, assumed the name and arms of Cottrell, purporting to be the will of his uncle, Thomas, of Saintbury, esquire, and married Mary, daughter of Thomas Jackson, esq. of Wellsbourn in Warwickshire, by whom he had six children, John, who married Jane, daughter of John Geers, esquire, of Garmons; John Geers Cottrell, the present baronet. —Motto, Non rapuit, sed recipit. I stole not, but received. —Family Seats, Garmons, in Herefordshire; and Farncombe House, Worscester-terhile.

LOPES, of Marillow House, Devonshire, created Oct. 5, 1805. — Sir MANASSÉH-MASSÉH LOPES, of Marillow House, in the parish of Tamerton Foliot, in the county of Devon; a magistrate for the county, and a lieutenant-colonel of the Rotherham volunteers; born in Jamaica, Jan. 27, 1755; married Charlotte, daughter of John Yates, esq. of Monmouthshire, in addition to that of Lopes, and was created a baronet as above, with remainder to his nephew, Ralph Franco, only son of his late sister, Charlotte, wife of Abraham Franco, deceased. —This family has been for many generations of great respectability in the island of Jamaica, where they reigned for more than a century, till about the year 1772, when Mordet Lopes, the 20th, of the present baronet, came over to this country to take possession of a large estate left him by a near relative, and resided at Clapham Common, in Surrey, till he died in 1796, leaving issue by his late wife, Rebecca, (who died in April 1795,) Manasseh-Masséh, his only son, created a baronet as above, and two daughters; Rachel, who married Isaac Pereira, of Jamaica, deceased, and has four sons and four daughters; and Ester, who died 1795, having married Abraham Franco, who died in 1796, and left issue Ralph, born at Wexford, Jan. 23, 1852, has issue, Robert, M.P. for, New-Roche, a director of the East India Dock Company; William and Camden; he was appointed a brigadier-general on the staff in 1773; was sent to Gibraltar, and afterwards served in Egypt under Sir Ralph Abercromby, K. B. and his successor, Lord Hutchinson; on his return to England, he was appointed major-general on the staff, and made lieutenant-governor of Guernsey; in 1809, he was promoted to the rank of lieutenant-general, and obtained his major's permision to wear the order of the crescent. —Sir John is descended from an ancient family long resident in Ireland; his father was eminent in the profession of the law. William, his eldest son, (brother to Sir John,) was a king's counsel, and a master in the Court of Chancery; two others died abroad, in the service of their country, a fourth is a dignitary of the church; Welbore-Ellis Doyle died in 1797, a major-general in the army, colonel of the 53rd regiment, and commander in chief in the island of Ceylon. —Motto, Fortitudine vincit. Fortitude overcomes. —Reference, at Guernsey.

Wigram, of Waltham House, Essex, created Oct. 5, 1805. — Sir Robert Wigram, born at Wexford, Jan. 39, 1744, created a baronet as above; lieutenant-colonel commandant of the sixth regiment of Loyal London volunteers; married, first, Catharine, daughter of Francis Broadhurst, of Mansfield in Nottinghamshire, esquire, and by her, (who died Jan. 28, 1753,) has issue, Robert, M.P. for Power, one of the directors of the Bank of England, major of the sixth regiment of Loyal London volunteers, F. R. and A. M. R. I. A. and M. I. Catharine married Charles Tottenham, of Ballicurry, esquire, cousin to the marquis of Ely; John, a director of the East India Dock Company; William, M. P. for the City of London, the London Assurance company; and Maria, Sir Robert married, secondly, Eleanor, daughter of John Watts, of Southampton, esquire, by whom he has fourteen more children. —This family is descended from Patrick Fitz-Wigram, one of the citizens of Wexford, who befieged, and made prison of, Robert Fitz-Stephen, and delivered him to King Henry II. John Wig-ram, born at Wexford, was canon of Windor in 1538; the sixteenth in descent is Sir Robert Wigram, the present baronet. —Family Seats, as above.

De Crestdigry, Champion Lodge, Camberville, Surrey. created Oct. 5, 1805, — Sir Claude-Cham-pon de Cresigny, L.L.D. was created a baronet as above; born Dec. 19, 1724; married, in 1765, Mis Cletter,
Clerke, daughter and heir of Joseph Clerke, esq. and had issue, William Champion, born Jan. 1, 1765, married, Aug. 4, 1786, lady Sarah Windsor, daughter of Other-Lewis, fourth earl of Plymouth, by Catharine, eldest daughter of Thomas lord Archer, and has issue, Claude, born 1787, William-Other-Robert, born July 7, 1789; Augustus-James, born at Nice, 1791; Heaton-Champion, Frances, died infant; Patience, Mary-Catharine; Emma-Honor. —This is a very ancient family. Maheus Champion, chevalier, who died in 1350, married Mademoiselle Burnell, only daughter from whom descended Sir Claude Champion de Crespiniguy, the present baronet.—Family Seat, Champion Lodge, Camberwell, Surrey.

GREEN, of Milnrow, Yorkshire; created Nov. 30, 1750. —Sir Charles Green, knight, created a baronet as above; a major-general in the army, and colonel of the York light-infantry volunteers, born Dec. 18, 1745. —Motto, Aequum ferae mentem. To preserve a steady mind.

PREVOST, of Belmont, Hants; created Nov. 30, 1805. —Sir George Prevost, baronet, so created as above; born at New York, May 19, 1767; a major-general in the army, colonel-commandant of the 60th regiment, and lieutenant-governor of New York; married, May 19, 1789, Catharine, daughter of John Phipps, esq. a major-general, and colonel of the royal engineers; and has issue, George, born Aug. 20, 1804; Anne-Eleanor; and Henrietta. —Sir George's father, Augustine Prevost, esq. of Geneva, in Switzerland, settled in England, and was promoted to the rank of a major-general in the British army, and died in 1786, aged 63, having married Anne, daughter of chevalier George Grand, of Amsterdam, knight of the order of Gustavus Vasa; and had issue, Sir George, the present baronet; James; and William-Augustus, a lieutenant-colonel in the army, and a lieutenant-colonel in the 67th regiment of foot. —Family Seat, as above.

BROMHEAD, of Thurlby Hall, Lincolnshire; created Feb. 4, 1806. —Sir Gonsville Bromhead, baronet, a brigadier-general of his majesty's forces, was born Sept. 30, 1758; married, July 18, 1787, to the honourable Jane French, youngest daughter of the late Sir Charles French, bart. by his wife, Rofe, in her own right baronets French, since deceased, and sibor to lord French; by whom he has issue, Edward-Thomas-French, born March 26, 1790, Edmund-Gonsville, born January 28, 1791; Catharine, born Oct. 39, 1792, since deceased; and Charles, born May 18, 1795. —Of this family were Henry and Thomas Bromhead, brothers, who are mentioned in Thornton's History of Nottinghamshire, the former, as being by inheritance possessor of considerable landed property at Bole and North Wheatshire; the latter, who is an heir of that branch of the family which settled in Derbyshire, of a good estate at Wheately. Henry died 1655, leaving one son, Anthony, who served with distinguished reputation as an officer, supporting the cause of Charles I., and was killed at the battle of Newark, and buried in the church of that place which he purchased, as well as that of Balingham. He died 1702, and was buried in the church at Thurlby, leaving several children. His eldest son, Edward, who was born at Bole, 1653, married Anne Eyre, of Eastwell, in Leicestershire, and died 1718, and was buried in the church at Thurlby, as was also Anthony, his wife, who died young; Benjamin, his eldest surviving son, married Margaret, daughter of James Bordman, esq. of Lynn, in Norfolk; by whom he had issue fourteen children, seven of whom died young; and his eldest son, Edward, an officer of dragoons in the king's service, was killed at the battle of Palkirk. Benjamin died 1782, and was buried in the church at Thurlby. Of his children who survived him, Bordman, born 1728, married, 1756, Frances, only child of William Gonville, esq. who was the half of the male issue of that ancient family which founded Gonville college, Cambridge, 1543; Bordman died 1802, leaving by his wife, Frances, who died 1801, the present baronet, and niece of the Rev. John Wood, D. D. rector of Martin in Bedfordshire. —Motto, Concordia cresemus. We thrive by harmony. —Family Seat, Thurlby Hall, near Lincoln, Lincolnshire.

HARDY, of Holcott, Northamptonshire; created Feb. 4, 1806. —Thomas-Masterman Hardy, captain of the Victory, lord Nelson's flag-ship, in the glorious and decisive victory off Cape Trafalgar, was created a baronet as above, for his gallant conduct on that distinguished occasion; born April 5, 1769; married, 1807, Anne-Louisa, daughter of the honourable vice-admiral George-Cranfield Berkeley, only brother of Earl Berkeley, and niece of Charles duke of Richmond and Lennox. —Family Seat, as above.

CHOLMELEY, of Easton, Lincolnshire; created Feb. 25, 1806. —Sir Montague Cholmeley, created a baronet as above; married Elizabeth, daughter of John Harrison, of Norton Place, in Lincolnshire, esq. and has issue, Montague-Augustus, Henry, and Selina, who died young. —Family Seat, as above.

HASTINGS, of Willeley Hall, Leicestershire; created Feb. 28, 1806. —Sir Charles Hastings, of Willeley Hall, in the county of Derby, and of Harley-street, in the county of Middlesex, son of Francis Halings earl of Huntington; born the 11th of March, 1752; lieutenant-general in the army, and colonel of the fourth guards battalion; married Parnell Abney, daughter and heir of Thomas Abney, of Willesley Hall, in the county of Derby, who was son of Sir Thomas Abney, justice of the Common Pleas; he has issue, Charles, born October 1792; Frank, born Feb. 14, 1794; and Selina, who died young. —Family Seat, as above.

SHELLEY, of Castle Goring, in Sussex; created March 5, 1806. —Sir Bysshe Shelley, of Castle Goring, in Sussex, created a baronet as above; born June 23, 1758; married, first, Mary-Catharine, daughter and heir of the Rev. Theobald Michell, of Horsham, in Sussex, and had issue, Helen, married Robert Parker, of Maidstone, in Kent, esq. Mary-Catharine, died unmarried; Timothy, born in September 1753, M.P. for New Shoreham; married, in October 1788, Elizabeth, daughter of Charles Willpool, of Horsham, and has issue, Percy-Bysshe, Margaret, and John. By his second lady, Sir Bysshe had, Ariana, married Francis Aikin, esq. captain of the fifth regiment of dragoon guards. John, of Penhurst, who assumed the name of Sidney, as heir to his mother, and married Henrietta-Frances, seventh daughter of the late sir Henry Hunloke, of Wingerworth, in Derbyshire, and has issue, Emily-Elizabeth, and Philip-Charles. Eliza-Jane-Caroline, married the Rev. Joseph Harris, of Turville, Bucks. Philip, died unmarried, Percy-John, died young, Robert, captain of the 56th regiment of foot. —Family Seat, as above.

SUTTON, of Moulehy, Surrey; created March 5, 1806. —Sir Thomas Sutton, created a baronet as above; married Lucy, daughter of Thomas-Adamson, esq. and of Adamson Smith, esq. of Sed- worth, in Hampshire, and has issue, Lucy, and Caroline-Mary-Selina. —Residence, as above.

LOUIS, of Cheflon, Devonshire; created March 26, 1806. —Sir John Louis, the second baronet, a captain in the royal navy, succeeded his father Sir Thomas, May 17, 1807; married, October 15, 1807, Miss Kirkpatrick, daughter of William Kirkpatrick, esq. lieutenant
HERALDRY.

Baronets.

[Plate XCVI.]
nant colonel commandant of the eighth regiment of native infantry, Bengal.—Sir Thomas, created a baronet as above, for his gallant and distinguished services, February 6, 1806, in admiral sir John-Thomas Duckworth's squadron off the Island of St. Domingo, rear-admiral of the white, knight of the order of Maria Theresia, and of St. Ferdinand, and of Merit; married in 1772, Margaret, daughter and heir of Edward Whitby, esq., of Shutt-end, in Staffordshire, and has issue two sons and one daughter. Sir Joseph was high sheriff of the county of Stafford in 1779. The ancient family of Scott has been seated at Great Barr, in the county of Stafford, from the reign of Edw. I. In 1695, the ancestor of the present baronet, who was in the suite of John Balliol king of Scotland, when that monarch was detained a prisoner in London, and forbidden, with the rest of his countrymen, from paling to the north of the river Trent, under pain of losing their heads, fixed himself as near that fortress as the thick forest of Cannock (now indeed fruited of its woods) would allow; from that period to the present, the family have lived in a substantial and honourable independence, intermarried with divers families of good note, occasionally dividing itself into various heads and collateral branches, as appears from a manuscript of Sir Simon Degge, who wrote Observations on Staffordshire Families in the year 1669, of which the following is an extract: "At Barr are the seats of several families of the Scotts, whereof Thomas le Scott, the principal, is owner of a pretty gentleman's estate, and has issue, Sir John, his successor; Thomas; Matthew-Belfield; and Anne; Jane; and Jacquetta. Sir Thomas died on board the Canopus, in Egypt.—Motto, In canope ut ad canopum.—Family Seat, as above.

SCOTT, of Great Barr, Staffordshire; created March 31, 1806.—Sir Joseph Scott, born 1752, created a baronet as above; married, 1772, Margaret, daughter and heir of Edward Whitby, esq., of Shutt-end, in Staffordshire, and has issue two sons and one daughter. Sir Joseph is high sheriff of the county of Stafford in 1779. The ancient family of Scott has been seated at Great Barr, in the county of Stafford, from the reign of Edw. I. In 1695, the ancestor of the present baronet, who was in the suite of John Balliol king of Scotland, when that monarch was detained a prisoner in London, and forbidden, with the rest of his countrymen, from passing to the north of the river Trent, under pain of losing their heads, fixed himself as near that fortress as the thick forest of Cannock (now indeed fruited of its woods) would allow; from that period to the present, the family have lived in a substantial and honourable independence, intermarried with divers families of good note, occasionally dividing itself into various heads and collateral branches, as appears from a manuscript of Sir Simon Degge, who wrote Observations on Staffordshire Families in the year 1669, of which the following is an extract: "At Barr are the seats of several families of the Scotts, whereof Thomas le Scott, the principal, is owner of a pretty gentleman's estate, and has issue, Sir John, his successor; Thomas; Matthew-Belfield; and Anne; Jane; and Jacquetta. Sir Thomas died on board the Canopus, in Egypt.—Motto, In canope ut ad canopum.—Family Seat, as above.

The family of Ramsay of Balmain is of great antiquity. Alexander Bannerman, of Elfick, a Nova-Scotia baronet, created a baronet as above; married, 1772, Margaret, only daughter of David Jenkins, esq., and the heirs male of his body lawfully begotten; born July 30, 1758; March 1, 1806, when the title became extinct, was created a baronet as above; married, 1782, Elizabeth, daughter and co-heir of Sir Alexander Bannermon, of Ellick, a Nova Scotia baronet; and his issue, Elizabeth; Alexander, born Feb. 11, 1785; Thomas; Robert; Edward; Marmaduke; William; Edwin; Hewgill; Catharine; Helen; Mary; Isabella; and Frances; which five last died young. The family of Ramsay of Balmain is of great antiquity. One of them, sir John Ramsay, was by James III. of Scotland created lord Botwella, but was attainted by the first parliament of James IV. From him the late Sir Alexander Ramsay aforesaid was lineally descended.—Motto, Apura, I aspire.—Family Seat, Balmain, Kincardineshire.

LOCKHART, of Lee and Carnworth, North Britain; created May 24, 1806.—Sir Alexander-Macdonald Lockhart, created a baronet as above; married Jane, daughter of Daniel MacNeill, of Galleochaily, in Argyllshire, esq. and has issue, Charles; Alexander; and Norman, twins, died young; Daniel; Alexander; and two daughters, deceased. The family is descended from Stephanus Lockard, a peron of considerable rank, who lived in the reign of King David I. and Malcolm IV. anno 1153. Sir Alexander is the
the eldest surviving son of Charles Lockhart, brother of James Lockhart, a general in the Austrian service, knight of the military order of Maria Theresa, a baron of the hereditary dominions of the house of Austria, and a count of the Holy Roman Empire; who was son of Sir George Lockhart, of Carnwath, knight, second son of Sir James Lockhart, of Sorn, who died 1714.—Motto, above the crest, *Corda fortea pande,* I opened the locked hearts, (in allusion to the name.) Below the shield, *Semper paratus magnare pro patria,* Always ready to fight for our country.

NUGENT, of Waddesdon, Berks; created Nov. 11, 1806. —Sir George Nugent, created a baronet as above; M.P. for Aylesbury, a lieutenant-general in the army, colonel of the fifth regiment of foot, and governor of St. Malo, Carnwath, was married, at Belfad, Nov. 11, 1806, the eldest surviving son of Charles Lockhart, brother of daughter of James Farquharson, of the city of London, of the Holy Roman Empire; who was son of Sir George Lockhart, of Carnwath, knight, second son of Sir James Farquharson, of the city of London, attorney-general of New Jersey, North America; married, at Belfad, Nov. 11, 1806, Maria, seventh daughter of Cortland Skinner, esq. attorney-general of New Jersey, North America; has issue, George, Edmund, born in Jamaica, Oct. 22, 1802; and Louisa-Elizabeth, born in Jamaica, Sept. 9, 1803.—Motto, *Deceptris.* —Family Seat, as above.

BATEMAN, of Horton Hall, Derbyshire; created Nov. 11, 1806. —Sir Hugh Bateman was created a baronet as above, with remainder, in default of issue male, in the year 1664, whose daughter, Catharine-Julia, and Amelia-Anne, were the eldest surviving daughter, of Sir Anthony Bateman, knt. representative in parliament for the county of Norfolk, 1701; and Robert Bateman, created by king James I. of Scotland, lord Frazer of Lovat, the thirty-eighth chief of the Frazer family, and descended lineally, the lords Bruce and Balfour, anno 1291. From lord Hugh Frazer, of Farraline, by a marriage with the only daughter of Sir Richard Frazer, auditors of the exchequer, called Hudan Ogg, father of William Frazer, esq. a merchant, and had issue by her four sons, viz. William; James-John; Robert-George, who died an infant; Keith; and twelve daughters, viz. Eliza-Anne, who died an infant; Eliza-Anne-Roberta; Jemima-Maria; Jean-Helen; Mary-Anne; Mary-Jane; Mary-Octavia; Elizabeth-Amelia; Emma; Louisa-Albina; Georgiana-Harriet-Julia. The family distinguished by the surname of Frazer, are of great antiquity in Scotland, although they are unquestionably of Celtic or Gaelic origin, and came from Provence and Languedoc at one era, and from Brittany and Normandy at another; married to other men, by whom they bear the name of Berrie, on the 10th of April 1721, presented Charles Montagu, of Au Bergne, near Brubboun, a basket of ripe strawberries, which were so much thought of, that he gave him the surname of *Fraike,* afterwards written Fraize, and Fraize, in France, by the great families of Griffe and Priorzeller, dukes of that kingdom, the marquis Montagu, and many others, whose armorial bearings are distinguished by strawberries on their shield, in like manner as they are sculptured, and remain to this day, on the crofs of Peebles. Sir George McKenzie, lord advocate of Scotland, and other antiquaries, fully lay, that one of this family came into Scotland with the earls of Douglas from Charleville, 1277, and subsequent the first Thane of Man, the linear ancestor of Oliver Frazer, or Frizel, thirteenth Thane of Man, who built Oliver Castle, in Tweed's Muir, and erected it into a confabulatory, and is to this day first called over in the roll of Peckythes. Sir Simon Frazer, having thrice saved the life, and remounted king Robert de Brus in the battle of Methven, had the three crowns quartered into his armorial bearings. The loyalty, fidelity, and martial achievements, of the Frazer's, at Robin Inversnes, Perth, Edinburgh, Bannockburn, &c. are well recorded in history, and led to the alliance with king Robert's family, who was twice married; by which marriages, Sir John Campbell, ancestor of Argyll, and Sir Alexander, son of Sir Simon Frazer, ancestor of Loveth, were uterine brothers, and related to all the nobility of both kingdoms, as appears by the grants and charters preferred and described by Mr. Robertfon, in the register office, Edinburgh, p. 19, regisler No. 145, charters of king Robert de Brus: *"Marie, sponsee Alexandri Frazer, missitis, foroni nostre dilecte, et Johanne Campbell, filio suo nepoti noster, pro hernagio et servitio, onmes terras,"* for the advancement of the public, exerted himself much to preserve Sir Thomas Bateman's house from the flames. Sir Thomas died without issue, and the title became extinct. Richard, the fifth in descent from Hugh Bateman, married, for his second wife, in 1755, Catharine, daughter of William Fitzherbert, of Tissington, in the county of Derby, esquire; (father of the present lord St. Helen's,) and left issue, Sir Hugh, the present baronet; and Richard, a barrister at law, born March 11, 1757.—Motto, *Sidus adfit amicurn,* Let my friend fix be present.—Family Seat, Hartington Hall, Derbyshire.

FRASER, of Leadclune and Morar, county of Inverness; created Nov. 11, 1806. —William Fraser, F.R.S. and one of the eldest brethren of the Trinity House, created a baronet as above; was brought up in the naval service of the East-India Company, and commanded two of their ships, the Lord Mansfield, in 1772, lott coming out of Bengal River in Sept. 1773; and the Earl of Mansfield, from 1777 to 1785. He married Elizabeth, daughter of James Farquharson, of the city of London, merchant, and has had issue by her four sons, viz. William; James-John; Robert-George, who died an infant; Keith; and twelve daughters, viz. Eliza-Anne, who died an infant; Eliza-Anne-Roberta; Jemima-Maria; Jean-Helen; Mary-Anne; Mary-Jane; Mary-Octavia; Elizabeth-Amelia; Emma; Louisa-Albina; Georgiana-Harriet-Julia. The family distinguished by the surname of Frazer, are of great antiquity in Scotland, although they are unquestionably of Celtic or Gaelic origin, and came from Provence and Languedoc at one era, and from Brittany and Normandy at another; married to other men, by whom they bear the name of Berrie, on the 10th of April 1721, presented Charles Montagu, of Au Bergne, near Brubboun, a basket of ripe strawberries, which were so much thought of, that he gave him the surname of *Fraike,* afterwards written Fraize, and Fraize, in France, by the great families of Griffe and Priorzeller, dukes of that kingdom, the marquis Montagu, and many others, whose armorial bearings are distinguished by strawberries on their shield, in like manner as they are sculptured, and remain to this day, on the crofs of Peebles. Sir George McKenzie, lord advocate of Scotland, and other antiquaries, fully lay, that one of this family came into Scotland with the earls of Douglas from Charleville, 1277, and subsequent the first Thane of Man, the linear ancestor of Oliver Frazer, or Frizel, thirteenth Thane of Man, who built Oliver Castle, in Tweed's Muir, and erected it into a confabulatory, and is to this day first called over in the roll of Peckythes. Sir Simon Frazer, having thrice saved the life, and remounted king Robert de Brus in the battle of Methven, had the three crowns quartered into his armorial bearings. The loyalty, fidelity, and martial achievements, of the Frazer's, at Robin Inversnes, Perth, Edinburgh, Bannockburn, &c. are well recorded in history, and led to the alliance with king Robert's family, who was twice married; by which marriages, Sir John Campbell, ancestor of Argyll, and Sir Alexander, son of Sir Simon Frazer, ancestor of Loveth, were uterine brothers, and related to all the nobility of both kingdoms, as appears by the grants and charters preferred and described by Mr. Robertfon, in the register office, Edinburgh, p. 19, regisler No. 145, charters of king Robert de Brus: *"Marie, sponsee Alexandri Frazer, missitis, foroni nostre dilecte, et Johanne Campbell, filio suo nepoti noster, pro hernagio et servitio, onmes terras,"* for the advancement of the public, exerted himself much to preserve Sir Thomas Bateman's house from the flames. Sir Thomas died without issue, and the title became extinct. Richard, the fifth in descent from Hugh Bateman, married, for his second wife, in 1755, Catharine, daughter of William Fitzherbert, of Tissington, in the county of Derby, esquire; (father of the present lord St. Helen's,) and left issue, Sir Hugh, the present baronet; and Richard, a barrister at law, born March 11, 1757.—Motto, *Sidus adfit amicurn,* Let my friend fix be present.—Family Seat, Hartington Hall, Derbyshire.
Guthroy, who was descended from the family of Iggylp:—second and third argent, three antique crowns, gules. Crest, on a wreath of the colours, a buck's head, erased, gules. Supporters, Two stag, proper, armed and unguled, charged with flowers, and pendant from each collar an inescutcheon, gory of eight, or and fable, each supporter reposing the foot on an anchor fable. Ratified and confirmed to the present baronet by patent from the Lyon office, dated Jan. 3, 1807, by the Lord Lyon king of arms of Scotland.—Motto, Je fait prête, Fam.ready.—Family Seat, Ray Lodge, Woodford; Town-house, Queen-Square, Bloomsbury.

THOMPSON, of Harthbourne Manor Place, Kent; created Nov. 11, 1806. —Sir THOMAS BouldeN THOMPSON, knt, created a baronet as above, M.P. for Rochefelter, a captain in the royal navy, and comptroller of the navy.

BERRY, of Cotton, Norfolk; created Dec. 12, 1806. —Sir EDWARD BERRY, a captain in the royal navy, so created as above, for his brilliant naval services; born April 17, 1768; married, Dec. 12, 1797, Louisa, daughter of Samuel Forster, D.D. of Norwich. Sir Edward was promoted to the rank of post-captain March 16, 1797, for his distinguished bravery, in boarding the San Nicholas of 80 guns, and the San Joseph of 112 guns, the 14th February, off Cape St. Vincent, with lord Nelson, being the first person that boarded both these ships, under cover of small arms; received the honour of knighthood, Dec. 12, 1797; commanded the Vanguard at Trafalgar. Sir Edward was captured by the French, French 74, when charged with the dispatches on-board the Leander, after a severe action; in 1798 was appointed to the command of the Foudroyant of 80 guns; was present at the capture of the fai'd Generux, and the Guillaume Tell of 80 guns. In 1805 Sir Edward made an extraordinary escape from the French squadron off Cape Finisterre in the Agamemnon, in which ship he was, in the civil service of the East India company, deputy-lieutenant, and captain in the militia, had issue, Harford-James, of the Whit-laude, of Hereford, M. D. leaving by him two daughters, Lucy, died April 3, 1755, had issue, Harford Jones, of Bostbury, in the county of Hereford, esq. and by her, who died in the year 1650, leaving iffue by her Elizabeth, daughter and co-heir, who married Sir Francis Cornwallis, of the county of Suffolk, knt. by whom she had issue Thomas Cornwallis, of Abermarles, &c. whose representative is the present proprietor of that ancient seat of the family of Jones. From John-Thomas ap Griffith, of Abermarles, esq, the eighteenth in descent of the same name by one of the daughters of Thomas Vaughan, &c. was descended Sir Thomas Jones, of Abermarles, knt. and Griffith Jones, of Trevererne, in the county of Radnor, the younger brother, who was high-sheriff of Radnorshire in the year 1553, and most of whose descendants were also high-sheriffs of the same county. Griffith Jones, of Trevererne, esq. the fourth in line, is descended from the above Griffith, a justice of the peace, deputy-lieutenant, and captain in the militia, had issue, Griffith Jones, who died unmarried; colonel James Jones, of whom hereafter; John Jones, who left office; Mary, who married Henry Bull, of Dunfield, in the county of Hereford, &c. by whom she left issue; Elizabeth, who married Ezekiel Welton, of Walton, in the county of Radnor, &c. by whom she left issue, and another daughter, who died unmarried.

Colonel James Jones entered into the army at an early age. He greatly distinguished himself in several battles, particularly in the battle of Blenheim, under the duke of Marlborough, when he lost his arm, and his regiment was nearly cut to pieces; on his return home he was personally presented by queen Anne with an elegant sword, which has been preserved by the family, inscribed “The gift of queen Anne.” In 1707 he was colonel of the queen's regiment, with which he embarked for the Leeward Islands. During his command there, he received a number of official and private letters all addressed to the noble Jones, &c. &c. having been one of his majesty's council at Antigua, by which it appears that he was highly respected as a man of great ability and honour, and of great public and private worth. He returned to England in 1711; died at Kingston, in the county of Hereford, in 1713, aged upwards of sixty; and was buried, pursuant to his will, at Radnor, near his father, Griffith; having married, first, Mifs Suan Borne, who had ciphers in Ely, by whom, who died soon after marriage, he had no issue. Secondly, on Feb. 16, 1694, Anne, daughter of — Greenstreet, of Kent, &c. by whom he had issue, Mary, who died March 3, 1712, aged 16; and — Greenstreet-Jones, and Henry, who died infancy. Thirdly, on March 7, 1706, Mary, sole daughter and heir of Bridgstock Harford, of Bobbury, in the county of Hereford, &c. member of parliament for the city of Hereford, by Elizabeth, daughter of Thomas Bridges, of Old Colwell, in the county of Hereford, &c. born Oct. 14, 1655; Harford, who died April 3, 1755, (having secondly married Edward Brightman, of Kingston, in the county of Hereford, M. D. leaving by him two daughters, Lucy and Mary,) he had issue, Harford Jones, of the Whiteman, in the county of Hereford, &c. born Jan. 28, 1707, high-sheriff of Radnorshire in 1729, married, about 1739, Elizabeth, daughter of William Brydges, of Old Colwell, in the county of Hereford, &c. by whom he had issue, Harford Jones, born March
March 2, 1738; Elizabeth, who died April 15, 1797, at Portsmouth, with whom John White, born May 21, 1758; married, Aug. 14, 1773, Peggy, daughter of Francis Malbone, of Newport, Rhode Island, in North America, &c., and has issue, Edwin-Francis, born at Bath, Dec. 25, 1793; Peggy, born at Newport, Rhode Island, June 6, 1785; Catherine, born at Maydeacon, Kent, July 5, 1788; Anne-Ellis, born at Hartsop, July 22, 1789; Caroline, born at Bath, May 4, 1792, and died July 22, 1800. Sir Henry-Eddy Stanhope is the only son and heir of Edwy-Francis Stanhope, &c., late gentleman-usher to the queen, by lady Catharine Brydges, his wife, daughter and co-heir of John Bridges, constable of Castle Howard, &c., and was created a baronet as above, in pursuance of a petition which lasted nearly three months in the year 1797. In the year 1790 he represented the borough of Shrewsbury in several parliaments, &c., and was created a baronet as above. The arms and supporters of this family were granted by James II. of Scotland to Sir Andrew Wood, of Largo, for a naval victory gained over the English fleet. The crest is a harp, and over it the motto, Tullus in undis, Sapiens in splendor, each ray inflamed, or.—Motto, Deus pascit corvos, Let the sun be witness.—Family Seats, Stanley Hall, in the county of Donegal; created Sept. 24, 1808.

JONES, of Stanley Hall, Salop; created Sept. 24, 1808.—Sir Thomas Jones, F.R.S., F.A.S. representen the present parliament for the borough of Shrewsbury, after two very strong and remarkable contests of twelve days poll each, with the intervention of a petition which lasted nearly three months in the year 1807. In the year 1790 he represented the borough of Weymouth; in 1796 the contributory boroughs of Denbigh, Ruthin, and Holt; in 1803, the borough of Athlone in Ireland. He is a deputy-lieutenant for the counties of Salop and Shrewsbury; and a governor of the Welch charity school. Sir Thomas was born Sept. 1, 1755; married, April 23, 1791, Rebecca, fourth daughter of Edward Williams, of Newmarket, Salop, &c., by whom he has had seven children: Thomas-John-Tyrwhitt, heir apparent, born July 12, 1793; Edward-Booth, born Sept. 3, 1794, died an infant; Harriet-Emma, born Oct. 16, 1795; Charlotte, born Nov. 7, 1793; Charles-Tyrwhitt, born March 21, 1801; Edmund-Tyrwhitt, born April 4, 1804; and a daughter, born May 10, 1805, only lived two hours. Sir Thomas Jones (formerly Thomas Tyrwhitt, &c.), took the surname and arms of Jones only, by the king's sign manual, in 1790; in pursuance of the will of his cousin, the late Sir Thomas Jones, knt. of Stanley-hall, in the county of Salop, whose ancestors represented the borough of Shrewsbury in several parliament, &c., and of which family he is the present representative.—This is an ancient and respectable family. The immediate ancestor was Thomas Jones, &c., chief justice of the Common-Pleas and M.P. for Shrewsbury, 1660. There was also a more ancient baronetcy in the family, which became extinct on the death of the late Sir Philip Tyrwhitt, bart. of Steinfeld, Lincolnshire, whose representative is now T. Tyrwhitt, &c., &c., &c., &c. Let the sun be witness.—Family Seats, Stanley Hall, in the county of Lincoln; created Sept. 10, 1808.

CAMPBELL (Sir Ilay), of Succoth, Dumbartonshire; created Sept. 24, 1808.

BULLER (Sir Edward), of Tramont Park, Cornwall, rear-admiral of the blue; created Sept. 24, 1808.

WOOD, of Gatton, Surrey; created Sept. 24, 1808.—Mark Wood, &c., was created of

The arms and supporters of this family were granted by James II. of Scotland to Sir Andrew Wood, of Largo, for a naval victory gained over the English fleet. The crest is a harp, and over it the motto, Tullus in undis, Sapiens in splendor, each ray inflamed, or.—Motto, Deus pascit corvos, Let the sun be witness.—Family Seats, Stanley Hall, in the county of Donegal; created Sept. 24, 1808.
Shrewbury, afterwards prior of Chich in Effex, founded A.D. 1120 by Ralph de Beaumont, bishop of London. Cral. iffue William Corbet, of Wattleborough and Caus Corbel) was a monk of the above-mentioned abbey at Castle, and Everard. Their cousin William (often called Corbeau, or Corbet, a noble family of the earls of Huntingdon is descended from Alice, another daughter of Sir Robert, who was created a baronet as above, married Mary, daughter of Thomas Taylor, of Lymme-hall, in the county of Chester, esq. by whom she has issue, Andrew-Vincent, Judith, Robert, and Roger.

The antiquity of this family in England, it is well known that Corbeau, or Corbet, a noble Norman, who, being of a brave spirit, (as historians mention,) put himself in arms with some of the barons who grew discontented by reason of so many Poictouins and other strangers being advanced into places of power and trust; and he, being freely assisted by the said earl was a prudent and moderate man, a great lover of equity, and of different and modest persons; and he, being frequently allied by the wisdom and courage of the said Corbet, and his two sons Robert and Roger, (among other principal persons,) was as glorious amongst the greatest nobles as any other family in the whole province in peace.

Roger, one of the sons of Corbet before mentioned, in the said reign, gave Wentelage to the monks of the said abbey Nute-nore, with the tithes of that town, and the tithes of Jochehulle, as also the town of Lochstone. At the same time Robert his brother beftowed on the monks of the said abbey Nute-nore, St. Peter and St. Paul; but by Rapin and others, from the Benedictine order who possessed it, frequently called the priory of St. Martin, and put there monks of the Holy Trinity to Christ Church, which last name continues to this day. And whereas Wicred king of Kent had, A.D. 666, founded a college of secular prelates at St. Martin's, Dover; "who (as archdeacon Harpsfield tells us) were careless in the performance of the aforesaid college, and waited the goods, and mispent the profits or income of the church," this archbishop, seriously considering what means a stop might be put to this evil, built a new church, with all lodgings and accommodations necessary for men professing a monastical life, which he dedicated to the honour of St. Martin, the tutelary saint of the aforesaid college, and filled it in the priory of St. Martin, and put there monks of his own order, out of whom Richard was, A.D. 1171, elected archbishop of Canterbury in the room of Thomas-a-Becket. The aforesaid Roger, died 1126. Sir Richard Corbet of Moreton Corbet, and Sir Corbet Corbet, had also two sons, Thomas of Wattleborough, and Robert of Causs. Thomas, the eldest son, who travelled into foreign countries, left his lands in custody to his brother Robert of Causs. From said Thomas of Wattleborough are descended the present Sir Andrew Corbet of Moreton Corbet, and Sir Corbet Corbet of Stoke and Adderley; and from Robert of Causs the Corbets of Leigh and Hope did, and the Corbets of Newton, Leighton, Sundorn, and Longnor, do, derive their descent. Said Sir Robert Corbet was charged with twenty marks aneivalment for a trefpafs in the king's forest, 11 Hen. III. He had five sons; and gave his mill of Wenteouer, with the meffuage thereto adjoining, to the abbey of Buildwas, in the county of Salop; as also Hulmore, with the whole marsh and uplands near unto it, fet forth by mete and bound; likewise his lordship of Ritton. In 6 Rich. I. at the collection of scutage for the king's redemption, he answered four pounds, and twenty shillings more for one knight's fee.

Sir Richard Corbet is in the register of those noblemen and gentlemen who accompanied king Richard I. to the siege of Acon; since which time we find nineteen of this family in the rolls of those who served in the several battles, sieges, and actions, following, viz. at Agincourt, Grealton, taking of Cadiz; and in the several wars against the Welsh, Scotch, French, and others, in the reigns of Henry III. Edward I. II. and III. Henry V. Edward IV. Henry VII. and VIII. In 4 Rich. I. Sir Fulke Corbet was knighted; between which time and 1 Car. I. we find seventy-one knights of this family, in the rolls of those who served in the several battles, sieges, and actions, following, viz. at Aeon; since which time we find nineteen of this family, in the rolls of those who served in the several battles, sieges, and actions, following, viz. at Agincourt, Grealton, taking of Cadiz; and in the several wars against the Welsh, Scotch, French, and others, in the reigns of Henry III. Edward I. II. and III. Henry V. Edward IV. Henry VII. and VIII. In 4 Rich. I. Sir Fulke Corbet was knighted; between which time and 1 Car. I. we find seventy-one knights of this family, in the rolls of those who served in the several battles, sieges, and actions, following, viz. at Aeon; since which time we find nineteen of this family, in the rolls of those who served in the several battles, sieges, and actions, following, viz. at Agincourt, Grealton, taking of Cadiz; and in the several wars against the Welsh, Scotch, French, and others, in the reigns of Henry III. Edward I. II. and III. Henry V. Edward IV. Henry VII. and VIII.
To the said Thomas, among other barons-marchers, 22 Hen. III., did the king send his precept, dated March 2, at Tewkesbury, to attend him at Oxford, upon Tuesday next after the octave of Easter, there to consult touching prince Llewellyn's taking homage of the great men in Wales.

The said Thomas also attended the king, 41 Hen. III., in his expedition into Wales; and had command to鲎hibit all persons who were absent in preventing the incursions of the Welsh towards Montgomery; and in 42 Hen. III., to fit himself with horse and arms to attend the king at Chefter, on Monday next after the feast of St. John Baptist, thence to march against the Welsh then in hostility. The said Thomas, 44 Hen. III., had summons dated at Welfmip, on the third day after Epiphany, well accoutred received the king's precept, requiring him to be at Hereford in Wales.

The same Peter, baron, father of Roger Valletort, a great baron in the west, and other to Hugh, Corbet: which cell, estate of Packenhale, and prebends, upon the suppression of alien priories, were by archbishop Chicheley given to All-Souls college in Oxford, where the original grant remains, dated at Caus, Wednesday in Easter-week, anno 1263, 46 Hen. III. And July 22, same year, a writ issued, dated at Ambian, and directed to Philip Baffet, judicary of England, erecting a commission issued to Henry earl of Hereford, Roger Mortimer, Thomas Corbet, and others, barons-marchers, upon a report of the death of Llewellyn son of Griffin, in case of whose death the king's army was to rendezvous at Shrewsbury. And 47 Hen. III. he received the king's precept, requiring him to be at Hereford on the third day after Epiphany, well accoutred with horse and arms, to march against the Welsh, who had then pillaged themselves of divers lands belonging to the king's subjects in the marches; and in like manner to be at Ludlow upon the octave of the purification of the blessed Virgin.

The said Thomas (who married Isabel, daughter of Reginald, and sister of Roger Vallertott, baron of Huberton, her brother giving with her in free marriage thirty-three knights fees and a half belonging to the said barony) died 20 Edw. I. From him descended Peter Corbet, of Wattlefborough and Caus, who while he was on his travels left his lands in custody, of his brother Henry de Pomroy and Peter Corbet pray feifin of the manor of Tremington and the advowon of the church, together with the borough of Afh, the manor of Caliblock, and the advowon of the church, and fifty or fifty-four knights fees in Cornwall and Devonshire, which, by writ dated April 6, was sent to the judges, on which writ a grant from the king was presented for the premises, and of Sutton and Mackaton to Richard king of the Romans and earl of Cornwall, and to the heirs of his body, who dying without issue, the king entered upon his lands, against which they prayed relief, which judges remitted their complaint to the parliament, and the parliament remitted it to the judges. The said Peter gave his ancient seat of Rye called Brow Castle, a garrison to Caus, and the township thereto belonging, to his nephew Sir Robert Corbet, for his great and good services.

In 29 Edw. I. writs were issued, dated at Ramfay, for summoning persons to appear at Newcaife-upon-Tyne, the Monday after Ascension, to attend the king's service, in his expedition into Scotland, on which occasion Pryce Corbet of Caus was summoned among others.

A writ of Edward I. was directed to Philip king of France touching king Edward's right to that crown, on which occasion the said Sir Robert Corbet of Newton, going with the earl, had letters of protection, which protection was afterwards renewed by letters, dated at the Tower of London, May 23, 12 Edw. III. July 4, 19 Edw. III. the king summoned several to attend him with horse and arms, at the feast of St. Lawrence, and fail along with him into France; on which occasion a writ was directed to Hugh Courtois earl of Devon, &c. Roger Corbet of the manor of Salop, a knight, baronet, &c. and on the 5th of December, 37 Edw. III. Walter Corbet had letters of safe conduct to come to England, for one year, with two persons to attend him. 3 Hen. IV. Sir Robert Corbet was the king's chamberlain, and one of the proxies of lady Philippa, the king's daughter, for her marriage with Errick king of Denmark; the proxy was dated at the prince of Wales's castle, May 14, 4 Hen. IV. In 20 Hen. III. Bickmarsh, in Warwickshire, was the inheritance of a William Corbet, of Chaddesley Corbet, in Worcestershire. Queen Elizabeth, in the 17th year of her reign, made a sir Robert Corbet her envoy to the king of Spain, &c. Further particulars relative to the descent of the family of Moreton Corbet, the reader may be found not only at the Heralds' College, but among the respective documents and evidences of the several families, as well as in Collins's Baronage, Camden, Dugdale, and other authors, &c.

As the object of this statement is chiefly to point out the descent of the family of Moreton Corbet, the reader must revert to Thomas Corbet, the eldest son of William Corbet, of Wattlefborough and Caus, who while he was on his travels left his lands in custody of his brother Robert of Caus Caffe, as mentioned before. This said Thomas left issue for Roger, his only son, who by his first wife was father of Sir Richard Corbet, knt., who married Margaret, daughter and heir of Bartholomew Turrell of Moreton, and had issue, Richard Corbet, of Moreton, who gave Kinwilton to the monastery of Buildwas, father of Sir Robert, who married two wives: first, Matilda, daughter of the lord of Idchill, 35 Edw. I. and secondly, Catharina, daughter of the lord Strange, of Knocking. By the first marriage he had issue for Thomas Corbet, of Moreton, father of sir Robert, who died 49 Edw. III. Sir Roger, his son, married Margaret, daughter and heir of Eddington, the lord of Shawbury, and died 18 Rich. II. Robert, his son, married Margaret, daughter of Sir William Malleroy, knt., and died 17 Hen. VI. leaving issue for Roger Corbet, knt., who married Elizabeth, daughter and heir of Thomas Hano-
HERALDRY.

ton, (he afterwards married the earl of Worcester, and
its William, knt.) and had issue, for Richard, of More-
ton, knt., who married Elizabeth, daughter of Walter
tord Ferrars, of Chartley, (which Elizabeth surviving,
wards was married to sir Thomas Leighton, of Wat-
tlesborough,) and was father of sir Robert Corbet, who
married Elizabeth, daughter of sir Henry Vernon, of
Haddon, knt., and had issue, Roger, Richard, and Re-
ginald, with whom he had issue, and had issue, for
Andrew, the eldest son of the aforesaid sir Robert, married Anne, daughter of
Andrew lord Windsor: and had issue, for Andrew Corbet, knt., who married Jane, daughter of sir Robert Needham, knt. and had issue, for Robert Corbet, died without issue male; for Richard Corbet, K.B. died without issue; and for Vincent Corbet, knt., who married Frances, daughter of William Humfridton, of Humfridton; and had issue, for Andrew Corbet, of Moreton Corbet, knt., who married Elizabeth, daughter of William Bootby, esq. and had issue, for Sir Vincent Corbet, knt., created a baronet 1641. which title became extinct in 1633. 2. Sir Richard Corbet, of Shawbury, esq. and afterwards of Moreton Corbet, knt., died without issue, for Sir Vincent Corbet, knt., the last baronet under the extinct patent. He died in 1690, having married Grace, daughter of Sir William Noel, of Kirby Mallory, in the county of Leicester; and had issue, for Richard Corbet, of Moreton Corbet and Shaw-
bury, esq. who died in 1710, having married Judith, daughter of Sir John Bridgman, of Castle Bronwich, bart., by whom he had issue, Andrew, who died in 1757; he married Frances, daughter of William Prince, of Shrewbury, esq. and had issue, Andrew, who died unmarried, April 21, 1756; and Richard-Prince Corbet, esq. who died Jan. 30, 1759; having married Mary, daughter and heir of John Wicksteed, of Wen, in Salop, esq. by whom he had one son, Andrew, created a baro-
net as above; and a daughter, Mary, married to More-
ton-Aglionby Slaney, of Shiffnal, esq. — Motto, Deus
fut post cum, God feeds the ravens. — Family Seats, More-
ton Corbet, Salop; and Linfiede, Bucks.

MEDLYCOTT, of Ven House, near Milborne Port, Somerset; created Sept. 24, 1628. — Sir William Coles' MEDLYCOTT is of a respectable and opulent family, originally seated in the county of Salop, where they removed to Horden in Berkshire, and thence to Milborne Port in the county of Somerset, where they have been established ever since, representing in different parliaments that borough, and acting in the commission of the peace for Somerset and Dorset. An ancestor of the present baronet also represented the city of West-
minster, and was appointed a commissioneer for selling the forfeited estates in Ireland; from this branch was descended a family now living and possessed of considerable estates in Ireland. In possession of the present baronet is a gold medal, which was given by king William and queen Mary to Thomas Medlycott, esq. of Athington, a member of the council. "The arms of the ancient family of Medlicott, of Salop, are thus blazoned: viz. Quarterly gules and azure per fess indented, three lions rampant argent; and for his crest, being placed above a helmet, a demi-eagle displayed or, out of a mural crown gules, mantled gules, doubled argent, as is herein above depicted." — Entered parliaments that borough, and adding in the commission for selling the forfeited estates in the city of Cork, but was deprived of the situation on the king's recovery, in consequence of his having voted in favour of the prince of Wales being appointed regent. — Family Seats, Knapton and Kellyville, both in Queen's county, Ireland. — Family Seat, Sutton Hall, near York.

PERRING (Sir John), of Memland, in the county of Devon; created Sept. 24, 1628.

PIGOTT, of Knapton, in Queen's County, Ireland; created Sept. 24, 1628. — Sir GEORGE PIGOTT, formerly in the army, married Annabella, daughter of the Right Hon. Thomas Kelly, of Kellyville, in Queen's county, esq. and has four sons and five daughters: viz. Frances-Priscilla; Thomas; Annabella; Jane; George; Charlotte; William; Salisbury; and Wellesey-Pole. — John Pigott, the first of the Dyfart family, went over to Ireland in the reign of James I. He had three sons: Alexander died; John was slain in battle; Robert succumbed, and was knighted for some exploit: he was murdered at Dyfart in 1641, together with three of his protestant tenants and servants, by the Irish papists; his son Thomas, the rock of the family, was almost miraculously preferred by his nurse, (herself a papist,) and conveyed to England by her. The estates at pre-

tent enjoyed by this family in the liberties of the city and county of Cork were grants from Oliver Cromwell. Emanuel Pigott represented the city of Cork: his son, father of the present baronet, was many years a representative in parliament, and died M.P. for the borough of Middleton in the county of Cork, and a major-general in the army; he formerly was governor of the city of Cork, but was deprived of the situation on the king's recovery, in consequence of his having voted in favour of the prince of Wales being appointed regent. — Family Seats, Knapton and Kellyville, both in Queen's county, Ireland.

OUSELEY, (Sir George), of Claremont, in the county of Hertford; created Sept. 24, 1628.

BARONETS OF SCOTLAND, commonly called NOVA-SCOTIA BARONETS. Instituted in 1621.

Abercrombie, for George, Birkenbog; created 1679.

Molyneux, sir Capel, Castle Dillun, Armaghshire; 1730.

Moore, sir Emanuel, Dunmore, Corkshire; 1681.
The Most Noble Order of the Garter.

Instituted by Edward III. Jan. 19, 1344.

It will be seen, by a reference to our Table of Precedence, p. 455, that Knights of the Garter rank before all Barons, and even before Privy Counsellors who are not peers. They are placed here, therefore, merely, because the honour is not hereditary. The Armorial Bearings of such of the Knights as are Peers are given in their regular place in the Peerage; the rest will follow in order in the annexed Engravings.

The habit and ensigns of this princely order are, a furcoat, garter, mantle, hood, garter, collar, cap, and feathers; the four first alligned by the founder, Edward III. the others by Henry VIII. The motto on the garter and collar is, Honi soit qui mal y pense: "Evil to him who evil thinks." The garter, which is worn on the left leg a little below the knee, is of blue velvet, bordered with gold. The George is the figure of St. George on horseback, the patron of England, encountering a dragon with a tilting spear, and clothed in complete armour. The whole is of gold enamelled, and may be enriched with jewels, at the pleasure of the possessor; it is worn across the left shoulder, pendant to a dark blue ribbon. The collar is of gold, weighing thirty ounces troy-weight, and contains twenty-six garters, enamelled proper, in each a rose gules, and as many leaves, enamel'd proper, in each a rose gules, and as many

The Sovereign.

Earl of Carlisle

The Prince of Wales.

Duke of Buckingham

The Duke of York.

The Duke of Northumberland.

Earl of Pembroke.

The Duke of Devonshire.

Earl of Clarendon.

The Duke of Northumberland.

Earl of Pembroke.

The Duke of Devonshire.
by queen Anne, Dec. 31, 1703.—In 1714, George I. confirmed the privileges of queen Anne, and several others, particularly that of making rays of glory to surround the figure of St. Andrew, which is suspended to the collar; and his majesty was pleased to order, that in future, chapters of election should be held in the royal presence; and to confit of the sovereign, and twelve brethren, making in the whole thirteen; and four officers.

The star is worn on the left side of the coat or cloak, and consists of a St. Andrew's cross of silver embroidery, with rays going out betwixt the points of the cross; on the middle thereof a thistle of gold and green upon a field vert; and round the thistle and field a circle of gold, having on it the following motto, in letters of green: Nemo me impune lacessit: "No one provokes with impunity." The badge or jewel is worn pendant to a green ribbon over the left shoulder, and tied under the arm; it consists of the image of St. Andrew, with the crofs before, enamelled and chaced on rays of gold, the crofs and feet resting upon a ground of enamelled gold; and on the back, enamelled on a green ground, a thistle proper, with the before-mentioned motto round it. The collar consists of thistles, and spigs of rue going betwixt; and at the middle thereof hangs the image of St. Andrew, as above; the whole of gold enamelled. —The Royal Chapel, Holyrood-haute, Edinburgh, now in ruins, was anciently the chapel of this order; but, betwixt, and at the middle thereof hangs the image of the frflie proper, with the before-mentioned motto round it. The Royal Chapel, Holyrood-haute, Edinburgh, now in ruins, was anciently the chapel of this order; but, there being at present no installation, the collar and star are worn immediately after investiture.—The knights of this order are:

The Sovereign
Duke of Clarence, K.G.
Duke of Queenvberry
Earl of Rosbery
Earl of Gordon
Marquis of Lothan
Earl of Alberbury

The most illustrious order of the Bath

This order was instituted in England at the coronation of Henry IV. in 1399: revived by George I. and made the reward of merit or desert for naval or military provess, by statute, in 1725, to consist of the sovereign, a prince of the blood-royal, and fifty knights companions; but there have been lately supernumerary knights appointed. The badge of the order is a rose and thistle, enameled from a sceptre between three imperial crowns, surmounted with a trefoil (shamrock) proper, charged with three imperial crowns' or, within a circle of gold, with rays going out betwixt the points of the cross. The star is a cross saltier gules on a field argent, surmounted with a trefoil (shamrock) proper, charged with three imperial crowns; or, within a circle of gold, with rays. Each knight at installation is attended by three esquires.—The knights of St. Patrick are:

The Sovereign
Duke of Richmond, grand mafter
Duke of Kent, K.G.
Marquis of Drogheda
Marquis Wellesley, K.C.
Earl of Arran
Earl of Courtown

The knights of this order are installe in King Henry the Seventh's Chapel, Westminister Abbey, where their Banners are hung over their respective stalls, and their Arms and Supporters on a plate of gilt brass affixed over their seats.

THE MOST HONOURABLE MILITARY ORDER OF ST. PATRICK

Instituted by George III. Feb. 5, 1783; to consist of the sovereign, a grand maister, a prince of the blood-royal, and fifteen knights, making in the whole eighteen; and seven officers. —The lord-lieutenant or viceroy of the kingdom of Ireland, for the time being, is the grand maister. The star is a cross saltier gules on a field argent, surmounted with a trefoil (shamrock) proper, charged with three imperial crowns' or, within a circle of gold, with the motto, Quis separabit? mcclxxxiiii. all within a wreath of shamrock, the whole surrounded with eight rays of silver; and embroidered on the left side of the coat or cloak. The badge is worn pendant from a light green ribbon across the right shoulder. The collar is of pure gold, composed of six harps and five rosettes alternately joined together by twelve knots. In the centre before is a crown, to which is pendant the badge or jewel of the order, of gold, enamelled, similar to the star, except the rays. Each knight at installations is attended by three esquires.—The knights of St. Patrick are:

The Sovereign
Duke of Richmond, grand maister
Earl of Conyngham
Earl of Cavan
Marquis of Headfort
Marquis Wellesley, K.C.
Earl of Roden
Earl of Arran
Earl of Courtown

The knights of this order are installe in St. Patrick's Cathedral, Dublin.
II. KNIGHTS BY THE STROKE OF THE SWORD.

KNIGHT BANNERETS.

The origin of this order of knights, which is now entirely obsolete, is fully explained in our vol. ii. p. 605, that we have nothing to add to that article. However, after researches made on this account, and consulting the best authorities on the subject, it appears, first, that the natural acceptation of the word, in ancient authors, means generally a warrior who has been knighted on the field of battle by the king in person, immediately after, and for, some bold achievement which he had performed under the eye of his sovereign; and, secondly, that as for a long lapse of years, the happy superiority of England, in this respect, including the near allies, on which the motif of arms, and to lead them to battle, had a right to hold their banners on the turrets of their castles, as from the ban of war had been proclaimed by the lord-paramount.

KNIGHTS BACHELORS.

It is well known that this title, as well as others contained under the denomination of knighthood, is not hereditary, although it is conferred by the king himself, as a special compliment to a few persons, and in a state of peace, as a mark of particular distinction. In the introductory part of this article, p. 414, where we have mentioned the different occasions on which his majesty has been graciously pleased to grant this dignity to some of his worthy subjects, in the progressive advancement of a family. This order is certainly the most ancient, and can be traced up to the earliest ages under different denominations. The Roman knights, called Equites, Equesirisordo, formed a considerable body among the people, and in the army; and it is well known that they had a particular lot assigned to them in the army, or other parts of the amphitheatres. The times of Charlemain, record the knights under the old French appellation of Preux. As the title was originally granted to the well-deferving warrior for his personal courage and prowess, and did not descend to his posterity, it was characterized by the addition of the word Bachelor, implying that the dignity was conferred on the individual without any regard to his family. However this simple epithet of knighthood has sometimes been a step towards baronetcy, as baronetcy is to the peerage; and therefore carries along with it an undoubted right to consideration and respectability. See Knighthood.

When his majesty is pleased to confer the honour of knighthood, it is absolutely necessary for the new knight to disuse the signify's helmet, which he used with his crest and arms, as delineated on our first plate of the armorial bearings of Esquires and Gentlemen, and on Plate VIII. fig. 4, it no longer befitting his degree; and, in lieu of it, to bear the front helmet with his vísor open, as shown in the plate of the armorial bearings of Knights Bachelors, and on Plate VIII. fig. 5, and which is the only heraldical distinction. Several great legal characters, and others All enjoy this rank, and are to be seen without the front helmet, and therefore their armorial bearings most erroneously appear still to be that of esquires: an impropriety which seems chiefly to arise from the ignorance of too many of those who call themselves Herald-Painters, and Armorial Seal Engravers.

In the ensuing list of Knights Bachelors, P. K. B. signifies Proxy for a Knight of the Bath. We have remarked, p. 414, that every person, before he is invested with the insignia of any order, is made a Knight Bachelor, if not so before; the proxies, therefore, are included in the same rule. The eldest son of a knight has a right to the title of Esquire. If, after indefatigable inquiries and researches, any omission or incorrectness should be found in this list, it is hoped that it will be attributed to no other cause than the insuperable difficulty of obtaining the means of rendering it perfect in all points.

Achmuty, Sir Samuel, P. K. B. Major General in the Army, knighted May 4, 1803.
Ainslie, Sir Philip, of the city of London, Feb. 25, 1778.

Young; sir George, Vice Admiral of his Majesty’s Blue Squadron; Aug. 24, 1781.

**ESQUIRES AND GENTLEMEN.**

The title of Esquire is a dignity next below that of a Knight, as Gentleman is the next below that of an Esquire. These degrees of rank, according to the order of precedence, have been already amply explained in vol. vii. p. 203; and vol. viii. p. 326; to which we beg to refer the reader. We will here however remark, that as the origin of the dignity or title of Esquire, seems to have arisen from the appointment of a gentleman to be companion of the earl marshal and warlike attendant of a knight, and in virtue of such office to have been invested with coat-armour; it will follow, by the laws of Heraldry, that the eldest son of such esquire, and the eldest son of his poity for ever, may claim those armorial bearings as his inheritance, and the title of Esquire as his birthright.

So likewise the title of Gentleman, is defined to be one, qui arma gerit, who inherits coat-armour from his ancestors; as when an esquire leaves several sons, the eldest inherits the title of esquire, and his brothers that of gentlemen; all claiming an hereditary right to the same family arms, but distinguished by the devices which we have explained in p. 443, of this volume, and delineated in the correspondent Engraving, Plate VIII. The daughters are likewise entitled to the same coat of arms, to be borne on a lozenge.

From these ancient distinctions in society, we trace, to the present day, the laudable avidity with whichEsquires and Gentlemen have, from the earliest times, preserved and valued these insignia of an honourable descent, as marks which justly entitle them to the respect of mankind.—But then these insignia or arms must be hereditary,—not assumed—or, they must be granted by the Earl Marshal of England. Yet it is to be lamented that too many persons, to their shame and dignity, assume the armorial bearings of others, and thus take to themselves a mark or stamp of precedence, which never belonged to them, and which, when detected, cannot but terminate in their confusion. And this is the more to be regretted, because in a country where a College of Arms is one of its public establishments, all persons whose acquisitions in the community, whether by commerce, public or private fortunes to the state, such acquisitions or perseverance at home, have been such as to raise them to influence and distinction, and thereby entitle them to aspire to arms, may obtain them there, by ducting the particulars on which they found their claim. But to shew the folly and impropriety of assuming arms and crests, without having them first duly exemplified in the Herald’s Office, we may here quote the judicious remarks of the late Ralph Bigland, esq. then Somerford herald, since Garter king of arms, in his treatise on this subject, printed in 1764.

"To see arms or engravings of honour on seals, plates, coaches, or set forth in churches, public halls, dedications to books, &c. which are known to be the right of particular families, usurped, or taken by persons who never were legally invested with them, seems repugnant to reason, as well as to the ancient and present laws of arms, and indeed to the sense of the wisest nations; and if some care is not taken to check these abuses, great inconveniences may hereafter ensue to posterity. All nations have maintained that no peron can assume arms without lawful authority; and whoever presumption to bear them without the king’s licence, or having first obtained the earl marshal’s warrant to the proper officers established by patent under the great seal of Great Britain to grant the same, infringes upon the sovereign, the fountain from whom all honours should spring. The king’s children do not bear arms without a licence from the sovereign, their royal father, directed to the earl marshal, &c. neither can a person, though dignified with the title of Baronet, Knight, or Esquire, when created by the royal favour a peer of this realm, or nominated to be a knight companion of either of the honourable orders, have supporters to the arms he has used, unless he can prove a lawful right to them; and the same law is observed with regard to esquires to knights of the bath, &c. I mention this to shew, that however some, from an ill-judged opinion may esteem it, or as auldeavour to discomfitance, all things of this kind, there is a time when such distinctions must be legally settled; and as the present laws, relative to this subject, are found to be insufficient, persons who are not entitled to them, either by the laws of the land, or by any other honourable methods, is enabled to be a founder or restorer of gentility, and shall entail a coat of arms upon his family, has a real claim to honour, and stimulates his offspring to exert those laudable principles which have derived such distinction, and which are openly and freely granted to all persons in this great commercial and free country."—And on this subject we may further quote the following passage from Maitland’s valuable History of London:

"As to arms, no person who hath the least knowledge in our history or laws, can be ignorant of the value attached to them by our ancestors, as being marks of their noblest members: they are the most permanent and lasting honours whereby the memory of families is preserved; many of which, but for them, would be buried in oblivion. Lord chief justice Coke, speaking of arms, afferts, that every gentleman must be arma gerit; and that the best trial of a gentleman in blood is by bearing
Robert Farquhar, Esquire, of Gilmrys Croft, and Berners-street, London. —Arms: Argent, a lion rampant fable, armed and langued or, between three ducal coronets or.—Crest: a dexter hand gules, couped as in the Arms. —Motto, Sto cado fede et armis.

Edward Chinn, of Hampton Park, in the county of Gloucester, Esquire, and formerly of the Moat, in the same county.

Arms: Quarterly, 1st, Barry of six vair and gules, for Chinn. 2d, Azure, a pale between two eagles displayed argent, for Woodward. 3d, Argent, on a ducal coronet or, a greyhound sejant argent. —Motto, Apud nos capta mutas, An eagle does not catch flies.

Edward Chinn, of Hampton Park, in the county of Gloucester, Esquire, born in the parish of Newent, in the county of Gloucester, in Dec. 1758, married, Feb. 16, 1784, at Kingston, in the county of Hereford, Mary, daughter of Harford Jones, of the Whittam, in the county of Hereford, esquire, sister of the late Harford Jones, of Leigh, esquire, and cousain to the present Sir Jones, of Boulterbrooke, in the county of Radnor, esquire; by whom he has issue Lucy-Broughton Chinn, baptized at Newent, in the county of Gloucester.

The family of Chinn appears to have been continual landholders and residents of the Dean of Hereford; of the county of Gloucester, for upwards of four centuries. Sir John Chynche held the manors of Newent, Berckford, &c. leaving, by Margaret, Anne, sole daughter and heir.

Cheyne, a younger branch of the same family, who was living in 1840, had issue, William Cheyn, of Newnham, in the county of Gloucester, buried there Oct. 22, 1635, aged 62; who, by Joanna, buried there in 1585, had issue, Richard Chyn, of Newnham, buried there July 29, 1591, aged 68; who, by Margaret, buried there Nov. 10, 1651, had issue, Richard Chyn, of Newnham, buried there Jan. 2, 1597, aged 47; who, by Elizabeth, buried there Feb. 15, 1597, had issue, Robert Chyn, of Newnham, baptized May 10, 1602, died April 23, 1668, and was buried there; who, by Sarah, who died Oct. 20, 1663, and was buried there, had issue, Thomas Chyn, of Newnham, gentleman, only surviving son, baptized Nov. 22, 1634, died Aug. 26, 1700, and was buried there; who, by Sarah, who died Oct. 20, 1663, and was buried there, had issue.

Thomas Kington, of Charlton House, in the county of Somerset, Esquire. —Arms: Argent, guette de fang; on a chief wavy, per pale gules and vert, three ducal coronets or.—Crest: on a crescent azure, five guttes d'or, between two fprings of myrtle proper.—This family have it in tradition, that the first of the name in England, which was originally pronounced Kyneton, came over with William the Conqueror, and held a commission in his army. For many centuries the family possessed considerable landed property in the county of Wilts. Tagnham, Notton, Showells, Port-clofe, and other estates near Corsham, were, in the sixteenth century, enjoyed to the end of a long life by Richard Kington, esq., from whom the present representative of the family, Thomas Kington, esq., is lineally descended.

Arms of ESQUIRES and GENTLEMEN,

P atrons of the Work, as transmitted by themselves.

Thomas Kington, of Charlton House, in the county of Somerset, Esquire. —Arms: Argent, guette de fang; on a chief wavy, per pale gules and vert, three ducal coronets or.—Crest: on a crescent azure, five guttes d'or, between two fprings of myrtle proper.—This family have it in tradition, that the first of the name in England, which was originally pronounced Kyneton, came over with William the Conqueror, and held a commission in his army. For many centuries the family possessed considerable landed property in the county of Wilts. Tagnham, Notton, Showells, Port-clofe, and other estates near Corsham, were, in the sixteenth century, enjoyed to the end of a long life by Richard Kington, esq., from whom the present representative of the family, Thomas Kington, esq., is lineally descended.
Esquires and Gentlemen, Patrons of the Work.

London, Published as the Act directs Ed. 1792, by J. Wilwe.
tized at Newent, Oct. 2, 1703; and Anne, baptized there Dec. 30, 1703, and buried, in May 1738, at Westbury upon Severn, in the county of Gloucester, who married Mitchell Aylyberton, of Elton, in the parish of Westbury upon Severn, esquire, and had issue, Bridget, daughter and heir.

Edward Chinn, of the Moat, in the parish of Newent, in the county of Gloucester, esquire, who was baptized at Newent, Oct. 2, 1708; and Anne, baptized at Newent, Oct. 2, 1708, he had issue.

Edward Chinn, of the Moat, esquire, only son and heir, who was baptized at Newent, Aug. 12, 1735, died April 24, 1791, and was buried at Newent; married at Westbury upon Severn, in 1755, Bridget, daughter and heir of Michæl Aylyberton, of Elton, in the parish of Westbury upon Severn, esquire, by whom, who died July 12, 1801, he had issue the present Edward Chinn, heretofore of the Moat, but now of Hampton Park, esquire, fon and heir.

Walter Honywood Yate, of Broomberrow Place, in the county of Gloucester, esquire.—Arms: Quarterly, 1st, Azure, a lion passant gules, for Yate. 2d, Azure, a chevron between three annulets or, for Dobyns. 3d, Gules a chevron between ten crescents patté argent, for Berkeley. 4th, Gules, a buck's head caboshed or, for Box.—Crest: an elephant's head couped argent. Second Crest: an eagle, r"ding proper.—Motto, Que virtus vocat.

John Honywood, bart. the present Walter-Honywood Yate, esquire, married Caroline-Elizabeth, married to Richard Donovan, barrister at law, by whom she has several children.

Henry Daveney, of Coulby, in the county of Norfolk, esquire.—Arms: Argent, a chevron fane, between three nun's heads, couped at the shoulders proper. Impaling Parham, argent, on a chevron engrailed gules, three lions' gambs erected or, between three malts proper, within a bordure engrailed fable bezantée.

Richard Grindall, esquire, Rear Admiral of the White Squadron, in his Majesty's Navy.—Arms: Quarterly, or and azure, a cross quarterly ermine, and of the first, between four ring-doves counter-changed. Impaling quarterly, first and fourth argent, three fleas fable; on a canton or, an eagle displayed of the second; second and third vert, three flags statant, with a trefoil in chief.—Motto, Spero meliora.

Thomas Hankins, of the Greenhouse, in the parish of Dimock, in the county of Gloucester, esquire.—Arms: Quarterly, 1st and 4th, or, a lion pallant gules, in fells three bars wavy fable, on a chief azure three bezants, for Hankins. 2d and 3d gules, a fet of six, between three pelicans' heads erected or, for Machen. 4th, Azure, a fessory vair, bezants, for Hankins. 5th, Azure, a fessory vair, bezants, for Hankins.

The family of Hankius has resided at the Greenhouse for at least three centuries, and has regular pedigrees from Sir Thomas Hankyns, of the Greenhouse, vicar of Dimock, who was buried at Dimock, March 21, 1549; John Hankins, of the Greenhouse, esquire, who descend from him in a direct male line, died Sept. 10, 1728, aged thirty-nine, and left issue two sons: William Hankins, of the Greenhouse, esquire, who died Nov. 9, 1777, leaving issue, by Mary, daughter of Coventry Streight, of Wurcester, John, only child, who died, unmar¬ried, in 1775; and Thomas Hankins, of the Greenhouse, esquire, who died Sept. 1775, leaving issue, by Elizabeth, daughter of James Machen, esquire, the present Thomas Hankins, of the Greenhouse, esquire, only son and heir.

Philip Rashleigh, of Menabilly, near Fowey, in the county of Cornwall, esquire.—Arms: Sable, a croc or, between (viz.) in the first quarter, a Cornish chough argent, beaked and legged gules; in the second, a text & of the third; in the third and fourth, a crescent of the last; on the croc in chief a rose. "Ne timide nec temere" was the motto formerly, but has not been placed with the arms of late years.

The arms upon an old tomb of one of the Rashleigh family, dated 1636, and lately discovered in Mortlake Church, agrees with this description.

Carew, in his Survey of Cornwall, says that "the inhabitants of Fowey prospered so much by war, and the more civil trade of merchandize, that it is reported sixty tall ships did, at one time, belong to the harbour, and that they adrift at the siege of Calais with thirty-fever fail. The indignation of Edward IV. bereaved the town of this force, and its trade afterwards decayed greatly, but was once more revived through the commendable deferts of Master Rashleigh the elder, (de¬scended from a younger brother of an ancient house in Devon,) whose indolent judgement and adventuring (Continues Carew) in trade and merchandize, first open¬ed a light and way to the townsmen's new thriving, and
left his son large wealth and possessions. This family have ever since continued to be great supporters of the commerce of the town, and have large estates in the neighbourhood.

The family mansion house is at Menabilly, near Fowey, where Philip Raleigh, esq., the present owner, resides. He represented the borough of Fowey in several successive parliaments, and his ancestors had done so by force of the time of Cromwell. Mr. Raleigh's cabinet, at Menabilly, contains the most rich and magnificent collection of minerals of any in Cornwall, or perhaps in the whole kingdom.

PETER BARRFOOT, of Midlington Place, in the county of Southampton, Esquire, descended from a very ancient family, the ancestors of which came over to England among the Danifh chieftains, long prior to the Norman conquest; and had been seated for ages past in Hampshire. — Arms: Argent, a chevron gules, between three pellets. — Crest: a flag flant, ducally gorged. WILLIAM CHIPPENDALE, of Great Queen-Street, in the city of London, Esquire. — Arms: Azure, femme de lis or, the centre one sustained by two lions' gambes erased argent. — Impaling Armitage of Ireland, gules, a lion's head erased, between three crescents argent. — Crest: a lion's head erased holding a fleur-de-lis or. — Motto, Firmor ad fidem.

JOHN MEYRICK, Peterborough House, Fulham, in the county of Middlesex, Esquire. — Arms: Azure, a fess wavy erminois, fimbriated argent, between three mullets pierced of the last. — Crest: a tower or, pale, argent and erminois. FRANCIS MARSH, of Droxford, in the county of Southampton, Esquire. — Arms: Quarterly gules and argent; in the first quarter a horse's head couped at the neck of the last, Azure, a lion rampant gardant argent; a chief ermine. — Crest: in a mural coronet gules, a horse's head as in the arms, ducally gorged or. — Motto, Virtus mihifcutum.

G. H. WARREN, of Exeter, in the county of Devon. — Arms: Quarterly gules and argent; in the first quarter a horse's head couped at the neck of the last, Azure, a lion rampant gardant argent; a chief ermine. — Crest: in a mural coronet gules, a horse's head as in the arms, ducally gorged or. — Motto, Virtus mihifcutum.

E. PRECHARD, of Perton and Cholrey, in the county of Lancashire. — Arms: Argent, a dragon's head erased at the neck vert, holding in the mouth a sinister hand erased gules, issuant from it gutte de fang. — Crest: a dragon's head, as in the arms.

E. GREEN, of Titey Court, in the county of Hereford, Esquire. — Arms: Vert, a chevron per pale ermine and erminois, between three flags trippant, each per pale as the chevron. — Crest: a demi-flags trippant, per fess, ermine and erminois; on the shoulder an escutcheon of augmentation, viz. gules, a portcullis and argent, on a canton or, a lion rampant argent. — Motto, Faly Gallo.

JOHN WARD, of Hinckley, in the county of Leicester, Esquire. — Arms: Argent, a chevron gules; on a chief of the second, three mullets pierced of the first, a fess wavy embowed argent. — Crest: a sword in pale, embowed proper. RICHARD FOWKE, of Ellmuthere, in the county of Leicester, Esquire. — Arms: Argent, a chevron gules; on a chief of the second, three mullets pierced of the first, a fess wavy embowed argent, for Mackley of Lneckfield. — Crest: a sword in pale, embowed proper.

FRANCIS-NEWMAN ROGERS, of Cadbury House, in the county of Somerset, Esquire. — Arms: Quarterly, first and fourth, argent, a mullet fable, on a chief or, a fleur-de-lis gules, for Rogers. second and third, azure, three wolves' heads erased argent, for Mackley of Leckworth. — Crest: a talbot paffant proper.

The Reverend JELINGER SYMONS, of St. John's College, in the University of Cambridge. — Arms: Per fess fable and argent, a pale counterchanged, three trefoils slipped of the second. — Crest: an otter paffant, holding in the mouth a trefoil slipped. — Over the crest the motto Edificatur.

The Reverend WILLIAM HAYNE, of Honiton, in the county of Devon. — Arms: Or, on a fess inverted azure, a rote argent between two plates, in chief a greyhound current argent. — Crest: a tortoise argent, thereon an eagle displayed proper, beaked and legged gules, on each wing a plate, and on the breast a rote argent.

WILLIAM PEARSE, of Dulverton, in the county of Somerset, Esquire. — Arms: Argent, two bars sable, between six estoils sable, gules. — Crest: a dexter arm embowed in armour, holding in the hand a lance by the middle, point to the dexter, proper. — Motto, Cadenti furditur.

The Reverend R. HUNTLEY, of Boxwell Court. — Arms: Argent, on a chevron between three flags' heads erased fable, as many bugle horns flirred of the first. — Crest: a talbot paffant proper.

The Reverend D. F. PRYCE, of St. John's College, in the University of Cambridge. — Arms: Or, a lion rampant regardant, holding between his fore-paws a fleur-de-lis. — Crest: a lion, as in the arms.

W.C. JACKSON, of the city of Bath, Esquire. — Arms: Gules, a greyhound current in fess argent, collared azure, between three pheons or; on the shoulder a tecta. — Crest: a dove clofe proper, in the beak an olive-branch, on the breast a tecta.

Esquires and Gentlemen Patrons of the Work.
JAMES UNDERWOOD, of Dublin, Esquire.—Unerwood is the name of an ancient, rich, and respectable, family of Denbighshire, England; one of whom, James Underwood, went over to Ireland after the act of settlement in 1662; made large purchases of lands (three thousand acres) in the county of Wexford, and for his attachment and loyalty to king Charles II. obtained letters patent for several other parcels of land in the county of Galway and in the adjoining parts of the county of Wexford. All the said lands were settled on their family in the year 1692; but afterwards mortgaged. An unsuccessful lawsuit for upwards of forty-eight years was carried on in Ireland, for the recovery of the said lands, by the present James Underwood and his father, against the family of the Stopfords, now earl of Courtown.—Arms: Gules, on a fesse argent, a lion passant between a cross pattée flitches and two annulets in chief and in base, or. —Crest: on a wreath of their colours, a lion passant azure. —Motto, Non irritares teum, Do not provoke the lion. See Plate CXI.

PLATE CXI.—John Simpson, of Bounty Hall and Tilton Estates, in the parish of Trelawney in the island of Jamaica, and of Fair Lawn in the county of Kent, Esquire, was high sheriff for the county of Kent in the year 1807.—Arms: Party per bend sinister gules and or, a lion rampant counterchanged; on a chief wavy argent, a cross nuguely gules. —Crest: a dog argent, with front let disposed a fleed in the arms, without the chief. —Motto, Regi regnique salutis, Faithful to king and country.

ISAAC TITFORD, of Kent and Somerset, Esquire.—Arms: Gules, three lions’ heads erased argent; a crescent for a difference. —Crest: a demi-lion rampant argent.

SHEPHERD PLEKINGSTON PENNELL, of Sudbrooke Hall, in the county of Lincoln, Esquire; only son of the late Shelley Pennell, of the same place, esquire; a descendant of the ancient family of the Paynells of Boothby in the same county.—Arms: Gules, two chevronels argent. —Crest: a beak head proper.

Pierce Edgcumbe, of Plymouth in the county of Devon, Esquire; born August 18, 1783; appointed clerk of the robe-yard in his majesty’s dock-yard at Chatham in June 1809; and afterwards clerk of the survey at Plymouth dock; married Eleanor Yorke, by whom he has issue, Ellen Susanna, born Jan. 5, 1806; Emma Mary, Sept. 3, 1807; Richard Darke, June 4, 1811.

This ancient family was respectably situated in Milton Abbott in the county of Devon in the thirteenth century, as appears not only from an inscription over an old door in the family-manion denominated Edgcumbe House, in the parish of Milton Abbott aforesaid, viz. R. E. 1292, but also from certain writings now in the possession of Richard Underwood, the present possessor of the Edgcumbe estate, and to whom it has descended from that time in a right line; by one of whose writings, dated 17 Edw. II. certain lands are described as "heretofore belonging to John of Eggecombe, and extending from Churchetown home to Eggecombe, &c." At what time the name was first spelt Edgcumbe is uncertain; but that it has been so confiderably a time is evident from a tablet against the south wall in the church of Milton Abbott, wherein is inscribed, that Thomas Edgcumbe of Edgcumbe was there buried on the 19th day of July, 1589. The above-mentioned Richard Edgcumbe of Edgcumbe, in 1593, had three sons: 1. James, who died unmarried. 2. Richard, 3. Reginald, who is slated Clericus in a deed dated 10 Edw. II. Richard the second son had two sons: 1st, John; 2nd, William. From John, the heir, descended Richard Edgcumbe, who, succeeding his father at Edgcumbe in 1679, was great-grandfather both to Richard Edgcumbe, the present possessor of Edgcumbe, and to Pierce Edgcumbe, the subject of this article. Richard Edgcumbe, esquire, the elder branch, has four sons: 1. Richard. 2. Thomas. 3. John, a post-captain in 1807, and who in the Pyche frigate affiled with credit and reputation at the Vol. IX. No. 637. (882.)

late reduction of the isles of France and Java. 4. Edward. From William, the second son of the second Richard, who died in 1553 Hilaria daughter of Ralph de Cathele, is descended the present EARL OF MOUNT EDGCUMBE. —See p. 532.

Arms: Gules, on a bend or, a cross pattée flitches, or, three boars’ heads couped argent. —Crest: a boar paissant argent, with a chaplet of oak vert, fruited or, round the neck. —Motto, Au playant de Deire.

The Reverend John Francis, M. A.—Arms: Gules, a chevron or, between three doves volant argent. —Crest: a dove argent, holding in the beak a branch of olive vert. —Motto: Infinitos at celerum, Hamlime de die in die.

ROBERT FISHER, of Mitcham Cottage, Surrey, Esquire.—Arms: Argent, on a chevron cotitched gules, between three demi-lions guarded coupled gules, as many bezants. —Crest: out of a ducal coronet or, a demi-lion gules, holding between his paws a gauntlet proper. —Motto, Virtutem extendere fulis, Courage is proved by deeds.

CHARLES NUTT, of Coventry, Esquire.—Arms: Per fesse azure and ermine, a pale counterchanged, and three pheons, two and one, argent. —Crest: on a cap of maintenance gules, turned up ermine, a pheon or, between two wings expanded argent. —Motto, Spem meliora, I hope better things.

ROBERT YOUNG, of Bath, Esquire.—Arms: Per fesse azure and argent, three lions rampant guarded counterchanged. —Crest: a demi-fea-unicorn proper, armed or.

The Reverend Nathaniel D’Eye, of Eye, in the county of Suffolk.—Arms: Or, on a chief indented azure two mullets. —Crest: on a chapeau azure, turned up ermine, two wings or.

THOMAS ROBERTS, of London Colney, Herts, Esquire. —Arms: Or, a fesse wavy, between three bucks trippant fable, horned and hoofed or. —Crest: on a mount vert, a buck as in the arms. —Motto, Succesca a Deo.

JAMES BUNCE, of the Inner Temple London, Esquire.—Arms: Azure, on a fesse argent, as many eagles displayed of the field. —Crest: a demi-boar erect azure, transepted with a broken spear gules, headed argent. —Motto: Sic vivere ut velis, I live as I like.

The present James Bunce is lineally descended from Sir James Bunce, baronet, alderman of London, who in the troublesome times of king Charles II. affiled that unhappy monarch with sixty thousand pounds, an immense sum in those days; and also, at his own expense, raised, maintained, clothed, and paid, a troop of horse consisting of several hundred men, for the king’s defence; but the alderman, with many more of the king’s friends, were obliged to quit the country and retire into foreign parts with the exiled monarch; who, being at Falkland in Scotland on the fifteenth day of July, in the year 1659, his majesty there conferred on him the honour and title of a baronet of this realm; but, his estates having been sequestrated by Oliver Cromwell, though some parts were, on the happy restoration, referred to him upon his return to England, his property being much reduced, the patent never was taken out; though the original, under the sign manual of king Charles II. remained in the family, and is now in the possession of the present James Bunce, who is the only legitimate heir of the aforesaid alderman; and, in consideration of whose services, the king granted a pension of 400l. a-year, which was regularly paid until the early part of the reign of king George II. in the time of sir Robert Walpole’s administration, when the same was taken off, it being considered a gratuity, and not obligatorily to be paid. The family-crest is Called Crowthead, in the parish of Keming, in Kent; and in the church of which there is a vault belonging to the family.

HENRY ST. GEORGE GRIFFITHS, of the city of Hereford, Gent. born April 23, 1764; married Dec. 13, 1794, to Susannah Fletcher; and has issue, Robert-Thomas, born 9th May.
HERALDRY.

May 6, 1794; Sarah, born Feb. 23, 1797; Mary-Anne, born Jan. 20, 1803 and Jane, born April 23, 1808.—

Arms: Argent, on a fess dancetté of the same, fimbrited gules, three blackbirds fable; in chief a griffin segreant between two crickets of the second. — Crest: a wolf's head fable, fémé of efoles or.—Motto, Firmatis et janitas, Strong in body and mind.

NATHANIEL PARKINSON, of the city of York, Esquire; only son of Robert Parkinson, eqq., who was sherif of the city of York in the year 1809.—Arms: Gules, on a chevron, between three orich-fathers argent, as many mules gules—Felly: a cubit armed or, the hand proper, holding a feather as in the arms.

HILL DAWES, Esquire.—Arms: Quarterly; 1st or, on a pile gules, a chevron argent, between three crofs crofllets of the field; 2nd fable, two barrulets between nine martlets or; 3rd or, a fess azure, between three lions couchant gardeant fable; 4th gules, on a bend argent, cotiled or, three annulets fable.—Crest: a lion's paw fable, holding a fleur-de-lis or.

CHARLES WILLIAM DRURY, Esquire.—Arms: Argent, on a chief vert, a Tau betwixt two mullets or.—Crest: a greyhound current argent.

Captain S. J. BALLARD, R. N. married Maria-Anne, daughter of James Flint, of Judd House, in Kent, eqq.—Arms: Sable, a griffin segreant ermine.—Crest: a griffin's head ered argent.

R. LLOYD, of Llanerch Brockwell, Montgomeryshire, Esquire.—Arms: Gyrony of 4: in the 1st quarter or, a lion passant fable; 2nd purpure, three falcons or; 3rd gules, three hors's heads ered argent; 4th argent, a falcon fable or.—Crest: a horse's head fable, maned or.

TOWNSEND COMPTON, Esquire.—Arms: Sable, a lion passant guardant or, betwixt three helmelets argent.—Crest: on a mount vert, a beacon lighted proper.—Motto, Dum tibo tibo, Hope through life.

EDWARD CHAPMAN, of Whitby in Yorkshire, Esquire.—Arms: Per chevron argent and gules, a crecent counterchanged.—Crest: an arm in armour embowed proper, the hand holding a tilting-piear proper, palling through a wreath vert.

HARRY COLBATCH, of Gunsgrove Cottage, Wellespool, Esquire.—Arms: Per pale, two pale gules and vert, a fess dancetté argent, gutté de fang, between three fleurs-de-lis or.—Crest: a dexter arm embowed habited per pale indented vert and azure, the cuff turned de fang, between three flowers de liz or; and for their Crest, on a wreath or and gules, a dexter arm embowed, habited per pale, indented vert and azure, the cuff turned up ermine, holding in the hand a pine-apple downwards, leaved and flipp'd, all proper, as in the margin hereof.

R. SYLVESTRE FROST, of Whitby, Yorkshire, Esquire; a dove rising argent.

Edward Everard, of Lyn Regis, Norfolk, Esquire.—Arms: Or, a fess between three estoiles argent, a label azure for a difference.—Crest: a man's head couped at the shoulders proper; thereon a cap or, fretted fable.

Granville Sharp, of Manchester, Esquire.—Arms: Quarterly, 1st and 4th or, a pheon azure; 2nd and 3rd argent, three rooks fable.—Crest: on a ducal coronet a peacock in his pride proper.

Samuel Kingsford, of Kent, Esquire.—Arms: Azure, three bars wavy ermine; in chief an eagle displayed be tween two ducal coronets or.—Crest: an eagle displayed per fess gules and azure, crowned or, holding in his beak a rose argent, flipp'd vert, seeded or.

John Owen, of Orielton, in the county of Pembroke, Esquire, who succeeded to the estates of Sir Hugh Owen, bart. in that county, on the death of sir Hugh, on the 6th of August, 1809. He then relinquished the name and arms of Owen. He was created a baronet on the 3d of November, 1812.—Arms: Gules, a chevron between three lions rampant or.—Crest: a lion rampant, as in the arms.—Motto, Honos optima polita, Honesty is the best policy.

Reverend John Norris Ewen, of Reydon Hall, in the county of Suffolk.—Arms: Ermine, a bend cotiled or.—Crest: on a mount vert a curlew proper.

J ohn Breerton, of Bawtry in Cheffire, Esquire; a descendent of the ancient Cheshire family of Breerton, 3

Breerton,

VARTY, of Cumberland, Esquire.—Arms: Gules, three crowns moline or, a chief vair, fable and ermine.—Crest: a mailed head, full-faced, crowned or.—Motto, Spero nostra Deus, God is our hope.

THOMAS WALFORD, of Birdbrooke, Essex, Esq. F. A. & L.S.—Arms: Argent, a fess, in chief a lion gules.—Crest: out of a mural crown or, an orffich-feather argent.

SAMUEL FREEMAN, of Florence-Hall, Northamptonshire, Esquire.—Arms: Quarterly ermine and azure, a fess lozengé or.—Crest: out of a ducal coronet, a wolf's head proper.

MOORE, of Surrey.—Arms: Azure, a cross argent, charged with five martlets fable.—Crest: on a ducal coronet, an antelope argent.

BENJAMIN DIXON, of Coventry, Esquire.—Arms: Ermine, a cross flory sable, charged in the centre point with a leopard's head proper, issuing out of a ducal coronet or.—Crest: a demi-leopard or.—Motto, Hyfti honori invicta, The envy of a foe is honourable.

EDMONDSON, of Clare, in the county of Suffolk, Esquire.—Arms: Gules, a pale wyue ermine, between six escallops or.—Crest: a demi-lion sable, holding an escallop argent.

Mifs ELIZABETH DOUTHIT, of Bedford Row in the county of Middlesex, and of Stamford Hill in the county of London; descended from a very ancient family, the ancestors of which are supposed to have come over to England among the Saxon chiefs; and first settled in Devonshire. Philip Doughty, of Stamford Hill in the county of Lincoln, esquire, the great grandfather of Elizabeth, married Elizabeth, the sole heir of William Brownlow, of Bretton-Hall, in the county of Lincoln, esquire, second son of Sir William Brownlow, bart. by whom he had several children; and Henry Doughty, esquire, the father, married Anna Maria, only daughter of Gregory Byrne, of Hatton Garden, esquire, by whom he had issue, Henry, who died under age, and the said Elizabeth Douthit, who came into possession of the family estates on the death of her father.—Arms: Quarterly; 1st and 4th argent, two bars sable.—Crest: a cockatrice ermine, combed and wattled argent.

Colonel HOUTHON, of Farley Hall, near Northampton, Lincolnsire, Esquire.—Arms: Gules, three pheons azure.—Crest: a cockatrice ermine, between two eagles' heads erased argent.

NATH. WRIGHT, Esquire.—Azure, a chevron engrailed between two unicorns heads erased or, and a bugle-horn or, three rose gules, leaved and seeded proper.—Crest: a crest in ermine, the hand holding a bugle-horn sable, garnished or, stringed argent.

PLATE CXV.—EDWARD DADLEY, Citizen of London.—Arms: Argent, a chevron or, between three flags' attires sable.—Crest: an arm embowed holding a bunch of lily, all proper.—Motto, In malos cornua, In the hand of those who are above the stars.

JAMES M. BELL, of Newcastle upon Tyne, Esquire.—Arms: Quarterly; 1st and 4th gules, a fess ermine, between three church-bells argent; an annulet for a difference. Second and third argent, two battle-axes in falter sable.—Crest: a cockatrice ermine, between two covered cups sable, in the hand proper a battle-axe sable.—Motto, Non fere labores, Not without pains.—These arms were granted, March 21, 1756, to John Furnell, of Bristol, merchant; "to be borne by him and his descendants; and also by his four younger brothers, Peter, Organ, William, and Algernon, and their respective descendants." Jacob Furnell above-named deceased July 30, 1810, without issue male, but leaving three daughters, minors, co-heirs: Mary, born Mar. 20, 1795; Louisa Jane, July 15, 1796; Elizabeth, Jan. 13, 1798.

HABBUR, of Manchester, Esquire.—Arms: Azure, a chevron or, between three eagles' heads erased of the same, the head of the first argent, on the breast of the same a crest: an eagle's head, as in the arms.—Motto, Solam jero, I bear the sun.

THOMAS HUXLEY, of March, Cambridge-shire, Esquire.—Arms: Ermine, on a bend crested gules, three crescents argent.—Crest: a wolf's head erased proper, gorged, with a collar crested gules, charged with three crescents, as in the arms.—Motto, la Deo omnes, All in God.

THOMAS COLTMAN, of Hagnaby, near Bolingbroke, in the county of Lincoln, Esquire; an active magistrate, and many years chairman of the general quarter-feetions for the district of Lindsey.—Arms: Azure, a cross fleury or, between four mullets pierced argent.—Crest: a stag's head erased sable, mailed and bridled argent, tailed or.

JOHN MADDOCK, of Grimby Hall, near Louth, in the county of Lincoln, Esquire.—Arms: Argent, two battle-axes in falter sable.—Crest: a cabaret of ermine, holding in the hand proper a battle-axe sable.

WILLIAM BLAND, of Sittingbourne, in the county of Kent, Esquire.—Arms: Argent, on a bend sable, three pheons of the first.—Crest: out of a ducal coronet, a lion's head sable.

WILLIAM WELFITT, of Manby, in Lincolnshire, Esquire.—Arms: Per fess or and gules, two bendlets in bendlets as in the arms.—Motto, Sumper-ferlde, Always faithful.

WILLIAM SELBY, of Somerfield, in lincolnshire, Esquire.—Arms: Quarterly, a lion and two bezants.—Crest: a lion's head erased azure, gorged with a collar sable and charged with three torses.

THOMAS OLDFIELD, of Saltfleetby, Lincolnshire, Esquire.—Arms: Sable, a chevron between three owls argent; on a chief the second three roes gules.

JOHN GREENALL, of the city of London, Esquire.—The name is originally Danish, where it is spelt as above; but in the books of the heralds' College it is spelt Greenhalgh, as appertaining to the Lancastrian branch of the family.

—Arms: Argent, on a bend engrailed sable, three bugle-horns mounted and ringed or.—Crest: a bugle-horn as in the arms, stringed gules.

JOSHUA PRICE, of the county of Kent, Esquire.—Arms: Argent, a cross between four pheons azure.—Crest: out of a mural crown gules, a lion's head proper.—These arms were granted to the family of Price of Gloucester in 1573.

—Arms: Azure, a fess argent, between three crois-s-croisets fitched or, three and three.—Crest: on a mullet argent, a heart gules, inflamed proper.—Motto, Super jadera votum, My desires are above the stars.
Having thus completed the series of Armorial Bearings throughout the different orders of precedency; and having introduced precedent of this article, from the great legal authority of Mr. Justice Blackstone, the original right of Peerage, and also the mode by which Peers are now created; we cannot close the consideration of this important subject, in a manner more suitable to the Science of Heraldry, than by explaining these points, the investigation of which, in a more early stage of the subject, we conceived it right to defer, that the mind of the heraldist might be prepared to receive that elucidation, which, from the intricacy of the matter, no writer seems as yet sufficiently to have explained; and to which we therefore now direct the attention of the reader.

DESCRIPT OF HEREDITARY TITLES OF HONOUR.

If we attentively consider the pedigrees and families from whence the original honours of the peerage of the united kingdom are derived, we shall frequently observe an apparent want of uniformity in the line from whence those honours have descended; and in several instances perceive a deviation which, unless explained, must leave the mind in doubt, whether the general law of descent is applicable to the honours of the peerage; and in what instances those general and established maxims form an exception. Cases occur, wherein the honour has descended in right of a female; others wherein the son has succeeded to a peerage in right of his mother, and taken precedence of his father; and in many wherein the sons of peers have been summoned to parliament in the lifetime of the legal possessor of the honour by which the new baron afterwards takes his seat; and other peculiar circumstances, which we shall proceed to explain and illustrate.

To have a correct conception of the subject, it is material to have well impressed upon our minds, two very important considerations. The one, that of the general law of descent; and secondly, the original institution of the peerage, and the subsequent changes and alterations which have taken place in the mode of creation.

Upon the first head, we must refer our readers to the article "Descen," in our fifth volume; and which we shall very briefly recapitulate, in order to illustrate the subject, with a reference to a general table of descent. It is very material that the reader should bear in his mind, that during the whole of the following explanation, we are searching for the heir of the person last seised, whether of an estate in fee-fimple, or of an estate incapable, herein in fee. For in other cases in any other person, as his heir, a new order of succession must be observed upon the death of such heir; since he, by his own seisin, now becomes an ancestor or isipes, and must be put in the place of the person last seised.

We are at first to presume, that the PROPOSITUS in our Table of Descent given on the annexed Engraving, is the person last seised of an hereditable honour, or other estate, in fee. In the first place succeeds his eldest son, or his issue, (No. 1.) If his line be extinct, then his other sons successively respectively, in order of their birth or their issue, (No. 2.) In default of these, (in the case of an estate in fee-fimple,) all the daughters together, or their issue, (No. 3;) and whereby in law an estate in coparcenary is created; but in the case of an hereditable honour, the same is in abeyance; a term used to signify, that the barony is not vested, but is in expectancy, remembrance, of intendence of the law, and which we shall have occasion more fully to explain, by some general rules and maxims. On the failure of the descendants of the propositus in the table, the issue of his parents is called in. First the eldest brother of the whole blood, or his issue, (No. 4;) then of the other whole brothers respectively in order of birth, or their issue, (No. 5;) Then, in the case of an hereditable honour, the brothers of the half-blood, ex parte paterna. Then

Vol. IX. No. 677.
or in chief. Their number at first was not so great, but that they might all attend together for the dispatch of business; for at the time of the Conqueror there were not more than a hundred in capite, who, with the bishops, abbots, &c. under the king, held all the lands in the kingdom; and under whom all others held. And even of the above tenants in capite, the referred service of a great part of them was but petit seigniery, as that of rendering to the king some small implement of war, a bow, a sword, an arrow, or of the like; consequently the number of the tenants holding per comitatus, vel baroniam, could not be very large. Although the first barons, or rather the first baronial services, were instituted by common consent; there is another consideration which is derived from the circumstance of the power that the kings had over their crown lands or demeine. It was by grants only, that it was possible to increase the number of feudal baronies; as, at the conquest, all the other lands were either portioned out to certain individuals attached to the fortune of the Norman, or by him confirmed to certain Saxon proprietors. It therefore obviously follows, that during the time the barons were feudal, it was not possible for the crown to increase the number of baronies; for all the land, except what was preferred in demeine, being granted out to be held by different services, the crown had no land to dispose of, but only such as should effect by the death of any of those grantees, without heirs, or forfeiture, &c. When baronies escheated into the king's hands, the baronies were not dissolved, but sufficed as baronies hereditamenta regis, and as such were to be granted. They always retained their nature and name, and were accounted for as such in the exchequer. But it sometimes happened that the king could increase the number of baronies, in the event of a person polsefing several dying without issue, &c.

The same baronies to which the record of writ of summons is considered sufficient evidence to constitute a lord of parliament, Sir Edward Coke says, "If the king calls a layman to the high court generally by his writ, that he is thereby (provided he once acts) to be granted as baron, and were accounted for as such in the exchequer. When the same baronies were afterwards dissolved, and as far as we are acquainted, has not been used since.

Sec. Sec. 1342. The invenitute used at the creation of Sir John de Beauchamp of Holt, and of whom it is affirmed he was the first baron created by letters patent, was by the king in person, who put on the scarlet robe and mantique, with a hood furred with, &c. &c. The same form continued until the 13th of James I. A. D. 1614, when Sir James Hay was advanced to the dignity of a baron; and on that occasion the ceremony was first dispensed with, and the letters patent delivered over, which was considered sufficient; and as far as we are acquainted, has not been used since.

Mr. Justice Dodridge, in his "Treatise of Nobility," considers the writ of summons, and which is the only just criterion, as entirely personal to the man to whom it is directed; that it is to far from creating a barony to him and his heirs, that neither the words baron, barony, nor heirs, are to be found in it. And it is agreed, that the king cannot, by his letters patent, create any man a baron or peer, either for life, in tail, or in fee-simple, without express words of creation, in the patent, for that purpose; and in all the patents that have passed since the 20th of Henry VIII. there is not only a special clause inserted for creating the patentees barons, &c. but also for enabling them and their heirs, or as the limitations may be, to hold and possess a seat and place in parliament. That we may be able better to judge how far the direction of a writ of summons to any man who was not a tenant per baroniam could create him a baron in parliament,
ment, either for life, or to him and his heirs, we shall state a few particulars that appear upon the consideration of the writs of summons that are extant. If it be true, that every man (though he be not a baron by tenure) hath a right upon the death of a baron to enjoy the dignity and honour of a baron, why have not the many abbots and priors summoned in 29 Henry III. been reckoned among the spiritual barons? Nor is it in a sufficient reason that their baronies were, by their own consent, defeated and taken away. In the case of vicars and prebends, the title is admitted as a sufficient evidence of the tenure. Blackstone.

It is very important to draw a material distinction between the persons to whom the writ of summons is now directed, whether to the elder sons of peers, summoned by the title of some barony actually in the father, or directed to persons who have no right of succession to the peerage whatever. As to the latter, if it operates at all, it will operate by way of creation for life. It is near one hundred and fifty years since any peron was so summoned; and in regard to those who are considered as barons by writ of summons, it must be observed, that all the ancient writs of summons have uniformly run "in fide, et homaggio, quibus nobis tenemini." Lord Coke, and Sir Henry Spelman, both assert that perons summoned to parliament as peers, have been barons only by tenure: and if so, it follows, that there could not possibly be any barons by writ in the sense we now use the term, before the time of 25 Edw. III. since all the writs antecedent to that period, have that phrase regularly inserted in them.

In regard to the writ of summons when directed to the eldest or other son of a peer:—Every peer has precedence in the house of lords according to the seniority of his creation. If the writ operated by way of creation, then the eldest son of a peer, as well as any other heir, when summoned to parliament, would be the proper baron, and give place to all others; but the contrary is the usage of parliament. If the eldest son of a peer is summoned by writ, it is generally by the style of some barony that is in the father, and his place in the house is regulated according to the antiquity of that barony. In the 26 of Charles II. Henry Howard, Lord Mowbray was placed as the first baron of England. In the 6th of Henry VIII., in the case of the earl of Surrey, who claimed precedence in parliament above all the earls, as son to the duke of Norfolk, it was resolved, that he should be ranked only according to the time of his being created earl of Surrey.

We shall now proceed to inquire whether the writ of summons has the effect of creating a new barony by the same title or not. This question has been agitated before the lords; and wherein their lordships, after great and full consideration, decided, that the writ of summons did not enlarge the barony. The writ of summons must, therefore be considered more in the nature of, not as, an instrument of conveyance, or method of transferring a barony or honour from one person to another. When, therefore, the eldest son of a nobleman is summoned to the house of peers by the title of his father's barony, there is no new barony created; but by the operation of the writ, the eldest or other son of a peer is regarded as a peer, and the barony of the father is transferred to the son. An objection has been started, that the writ cannot operate by way of conveyance of the father's barony to the son, because it did, the father could have no barony left whereby he could be entitled to sit in the house; and that, therefore, the writ must operate by way of creation. In answer, there is a material distinction between the writ being directed to the eldest son of an earl, &c., and to the eldest son of a baron: for, although an earl be possessed of only one barony, yet his eldest son may be summoned by that title, and the father still retain in himself all the rights of a barony; for, notwithstanding the single barony be transferred to the son, yet the earldom, which implies a barony, still remains with the father; but a baron must regularly have several baronies centering in him, to enable his eldest son to be called by writ; because that in that case, although one of them be transferred to the son, yet a barony still nominally remains with the father.

The practice of summoning the eldest sons of peers, is not of very long standing. The first instance is in the 2d of Edward IV. A.D. 1481, in favour of Thomas Arundel, eldest son of Richard Fitzalan earl of Arundel, who was summoned to parliament by the name of lord Maltravers. The summoning of the eldest sons of
ears has been very common; but the eldest sons of barons have seldom had that honour; there being but two instances, and in both the fathers had in the lifetime baronies. The first was William Parker, the eldest son of Edward lord Morley and Mountegle, by the name of lord Mountegle. The second was the eldest son of lord Darcie, Meynill, and Conyers, by the name of lord Darcie.

The practice became in general use towards the middle of the last century; and as it may gratify the curiosity of some of our readers to be informed of some of the early cases, we shall notice two or three. The first we shall mention is the barony of Townfend; and which was granted in the year 1664, together with the title of viscount Townfend, to Sir Horatio Townfend, baronet. The eldest son of his son Charles, the second viscount, in 1723, was summoned to parliament by the title of baron Lynn, of Lynn Regis; and on the death of his father, in 1728, became viscount Townfend. He had issue George, created marquis Townfend; and whose eldest son, created earl of Leicejler, is the present marquis; he succeeded his father in 1807, and in the lifetime of his father was summoned to the house by the title of baron De Ferrars of Chartley; to which title he succeeded on the death of his mother, the only child of James the fifth earl of Northampton, in 1770. His lordship was afterwards, May 18, 1784, advanced to the earldom of Leicejler. The barony of De Ferrars of Chartley was originally by tenure; the writ of summons in the year 1298.

The next in order of time is the barony of Olborne, which was created by letters patent in the year 1298. In the barony of Bruce of Worlton: Charles, the son and heir of the second earl of Ailelbury, was summoned to parliament in 1711, by the title of lord Bruce of Worlton; a title which had never before existed in the family. In the following reign, there were but two patents passed. In the reign of Henry VII. A.D. 1485, there is not one instance of a baron being created by patent other than in parliament; and during the whole of the last-mentioned period, there were but fifteen patents passed for this purpose. The following are the names and titles of the persons so created:

1. Rich. II. John de Beauchamp
2. Hen. VI. Sir John Cornwall
3. Sir Ralph Botiller
4. Sir John Cornwall
5. Rich. II. John Talbot
6. Sir John Stourton
7. Sir John Beauchamp
8. Sir John Southy
9. Sir Richard Wydvil
10. Sir Thomas Grey
11. Sir Thomas Hoo
12. Sir Thomas Percy
13. Sir Richard Fenys
14. Sir Humphrey Stafford
15. Sir Walter Blount
16. Sir Edward Grey

These are all the patents for baronies that passed previous to the reign of Henry VII. and they were all passed for brevi de privato sigillo, et de aulhoritate parliament. It is proper to remark, that in many cases, and indeed generally so, many of the baronies ascribed to the nobility are not vested, but all baronies to which the peer has only a claim as a co-heir with others; and, there cannot exist a doubt, but that the crown, in all such cases, can summon to parliament as many of such co-heirs as there are different and distinct baronies. It is however not to be supposed that the crown would exercise this power, either to its full extent, or even partially; but that, where two baronies are actually vested in one person, the crown will not exercise the power of disuniting them, farther than extends to the elder son of the existing peer; and in that case it is evident that the future possessor of the father's honour, must necessarily be the heir to the son, and consequently the ancient titles will again vest in the immediate heir of both. We shall now proceed to the remaining consideration of the subject, viz. a creation by patent.

Upon examining the creations that passed in the time of Edward III. and until the conclusion of the reign of Richard III. nearly all have been passed by the authority of, and in, full parliament. It was common for the
The above short extract from the genealogical table of the family, will set the doctrine of abeyance in an obvious point of view. On failure of issue male of the father of the present lord, his daughters would inherit, but not in co-partnership. The honour is therefore in abeyance, and the king can summon any of the claimants, or withhold at his pleasure. On the death of the countess of Albermarle, in the lifetime of George, the son by the first daughter, he will be entitled to claim the barony, in right of, and as heir to, his mother. But in the event of his death in the lifetime of the countess, the barony is then in abeyance between the two daughters of Sophia, and the son of the countess of Albermarle. The son of the countess of Albermarle cannot inherit in the lifetime of either of the daughters of the viccountess Sydney. Nor can either of the said last-mentioned daughters inherit in the lifetime of any children of the countess of Albermarle. And in the event of the above-mentioned George or his sister Sophia having issue, either male or female, the descendants of Sophia and Elizabeth being the males, would be equally precluded.

It is therefore, clear that the legal claimant of an honour once in abeyance, must be the male heir, descended from the eldest surviving co-heir, at the death of the last possessor; all others standing in equal degree of consanguinity with such co-heir, to the last possessor, and their descendants, being also dead. This will give some idea to our readers of the possibility of a barony being...
being in abeyance, even for centuries. For the son of Catharine, the eldest daughter, may, on his death leave issue several daughters, and die in the lifetime of the commission of the lords, on the claim of Sir Cecil Bishops. We have only to add that the barony of Zouche became in abeyance, on the death of Edward lord Zouche, who died without male issue upwards of two centuries ago.

It is however necessary to remark, in regard to the descent of the crown, that although it in general corresponds with the feudal path of descent, a regular pedigree of six lineal generations. As in common descents, the preference of males to females, and the right of primogeniture are generally adhered to. Thus Edward V. succeeded to the crown in preference to Richard his younger brother, and Elizabeth his eldest sister. Like lands and tenements, the crown, on failure of the male line, descends to the issue female, according to the usual rule of descent, that although it in general corresponds with the common law of succession; yet there are one or two material exceptions, which we shall briefly notice. Like estates, the crown will descend lineally to the issue of the reigning monarch, as it did from king John to Richard II. through a regular pedigree of six lineal generations. As in common descents, the preference of males to females, and the right of primogeniture are generally adhered to.

Thus Mary I. succeeded to Edward VI., and the line of Margaret queen of Scots, the daughter of Henry VIII. succeeded on failure of the line of Henry VIII., his son. But among the females the crown descends by right of primogeniture to the issue of the latter, and not of the male issue of the former. Thus Mary I. succeeded to Edward VI., and the line of Margaret queen of Scots, the daughter of Henry VIII., his son. But among the females the crown descends by right of primogeniture to the issue of the latter, and not of the male issue of the former.

Thus Mary I. succeeded to Edward VI., and the line of Margaret queen of Scots, the daughter of Henry VIII., his son. But among the females the crown descends by right of primogeniture to the issue of the latter, and not of the male issue of the former. Thus Mary I. succeeded to Edward VI., and the line of Margaret queen of Scots, the daughter of Henry VIII., his son. But among the females the crown descends by right of primogeniture to the issue of the latter, and not of the male issue of the former.
ce to explain the fame. The first Table contains the material parts of the pedigrees of the illustrious families of the Nevilles, earls of Abergavenny; the Fanes, earls of Welfmoreland; and the Stapletons, lords of Dafbwood.

Ralph, the fifth lord Neville of Raby, created earl of Welfmoreland by Richard II. A.D. 1398, and who was defended from Robert Fitzwalter Maldred, lord of Raby, and lineal heir male to Uchtred earl of Northumberland, in the line of Edmund furnamed Ironside, is the common ancestor from whom these families descends, and therefore occupies the first place in the Table, marked (No. 1.) This nobleman had three wives; by the first, who was Margaret, the daughter of Hugh earl of Stafford, (No. 2,) he had two sons; John (No. 3), who died in the lifetime of his father; and Ralph, (No. 4), ancestor of the Nevilles, lord Ferrars of Overfey. The eldest son had issue Ralph, (No. 5) he was the second earl of Abergavenny; he had issue by his father, (No. 6,) and Thomas, (No. 7,) John was killed A.D. 1561. Ralph the second earl died without issue, and was succeeded by Ralph, (No. 8,) the son of John, and who died A.D. 1523. He was succeeded by his grandson Ralph, (No. 9,) who died 1 Edward VI. A.D. 1543, having married Catharine, daughter of Henry, (No. 10,) and by whom he had issue seven sons; the eldest of whom, Henry, (No. 11,) succeeded his father. He married Ann, daughter of Thomas Manners earl of Rutland, (No. 12,) and died A.D. 1625, leaving issue an only son Charles, (No. 13,) and who, in the 13th year of Elizabeth, A.D. 1570, being attacked by smallpox, died the same day that his father. He left issue by Anne, daughter of Henry Howard, earl of Surrey, (No. 14,) four daughters. By the second wife of the first earl, viz. Joan, daughter of John of Gaunt, duke of Lancaster, (No. 15,) the earl had two sons, Richard, (No. 16,) and William, (No. 17,) Richard married Alice daughter of the earl of Suffolk, (No. 18,) by whom he had issue George, (No. 19,) John, (No. 20,) and George, (No. 21,) and the last named Richard married Anne, daughter and heirress of Richard Beauchamp earl of Warwick, (No. 22,) and by whom he had two daughters, Isabella, (No. 23,) and Anne, (No. 24,) The former married George, duke of Clarence, brother of Edward IV. king of England, (No. 25,) and the latter married, 1 Henry VI. A.D. 1425, Isabella, daughter of Sir Hugh de Wale, (No. 26,) and they had issue George, (No. 27,) who married William Courtenay Earl of Devonshire, (No. 28,) whose son Henry, (No. 29,) was created marquis of Exeter, in the 17th of Henry VIII. and who was beheaded A.D. 1538. He left a son, Edward, (No. 30,) who died A.D. 1566, without issue; and the titles of earl of Devonshire, and marquis of Exeter, became extinct. We now refer back to John, the eldest son of Richard, who died A.D. 1426, and who was created marquis of Beverley, (No. 31,) and afterwards earl of Northumberland; and which title being afterwards reformed to the Percy's, he was created marquis of Montacute. George, the son, (No. 32,) of the last-mentioned John, was created duke of Bedford, and deprived of his titles by act of parliament. (Vide the preceding page.) William, the second son, by the marriage of the first earl, married Joan, the daughter of lord Falconberg, (No. 33,) who was afterwards created earl of Kent. He succeeded to the title of Falconberg, and died A.D. 1463, without issue male. On his death both titles became extinct. The third son, George, (No. 34,) died A.D. 1468, without issue. By the third marriage of the first earl with Elizabeth, (No. 35,) daughter of William Latimer, lord Latimer, his two eldest sons were, George, (No. 36,) and Edward, (No. 37,) George married, daughter of ——, (No. 38,) by whom he had a son, Henry, (No. 39,) who sole Richard, (No. 40,) succeeded his father; and he left a surviving son, John, (No. 41,) who married, first, Dorothy, sister and co-heiress of John earl of Oxford, (No. 42,) by whom he had no issue male; and, secondly, Catharine, (No. 43,) daughter of sir Thomas, afterwards lord Parr and Rolls. By his first marriage he had issue, John, (44,) and also a daughter, who married, first, Lucy, (45,) and also a daughter, who married, secondly, Richard, (46,) who had issue, George, (47,) daughter of Henry earl of Worscester; by which marriage, the title of Latimer, &c. descended to the Percy family. King Henry VIII. (44,) married the widow of John, the father of the last lord Latimer. We now proceed to Edward; the second son by the third venture, (No. 36,) who married Elizabeth, (No. 37,) daughter of Richard Beauchamp, earl of Worscester, baron Bergavenny, or Abergavenny, and baron Le Defpencer. His son George, the second lord, (No. 49,) who married Margaret the daughter of sir Hugh Fenne, (No. 50,) by whom he had issue George, the third lord, (51,) and by whose second wife, Mary, (52,) daughter of Edward duke of Buckingham, (53,) he had issue, Edward, (54,) the eldest son; and who married Frances, (55,) daughter of Thomas earl of Rutland; by whom he had issue an only daughter, Mary, (56,) who married sir Thomas Fane. The pedigree of sir Thomas Fane is in part shown as follows: John, (57,) great grandson of Henry Fane, or Vane, who lived in the time of Edward III. (and who was defended from Horace, lord Vere, (58,) who had all his paternal estates confiscated. He left issue by Anne, daughter of Henry Howard, earl of Surrey, (No. 59,) four daughters. By the second wife of the first earl, viz. Joan, daughter of John of Gaunt, duke of Lancaster, (No. 60,) the earl had two sons, Richard, (No. 61,) and William, (No. 62,) Richard married Alice daughter of the earl of Suffolk, (No. 63,) by whom he had issue George, (64,) and Edward, (65,) ancestor of the earls of Darlington; and Richard, (66,) the father of George, (67,) the father of the last-mentioned sir Thomas Fane, (68,) Sir Thomas married Elizabeth, (69,) daughter of sir Thomas Coke, by whom he had issue, George, (70,) and Anne, (71,) the only daughter of the fourth lord Le Defpencer. Sir Thomas, in 1604, married, in right of his wife, the baroness of Bergavenny and Le Defpencer. But by the peers it was resolved, that the former barony was vested in the heirs male, and that the latter was a barony in fee, and consequently went to the heir general. We now proceed with the descendants of sir Thomas Fane, and afterwards shall return to Edward, (72,) the great grandson of Edward, (53,) the first lord Abergavenny of the Neville family.

The eldest son, (Francis,) of sir Thomas Fane, was created, A.D. 1624, baron Burghersh, and earl of Welfmoreland; from whose third son, Francis, descended the grandfather of the present earl of Welfmoreland, by the following descent: The first earl, (73,) in the Fane family, married Mary, (74,) daughter of sir Philip Mildmay, and by her issue, Vere, (75,) and Frances, (76,) who on the death of his father became the second earl; and Francis, (77,) The former married Grace, (78,) daughter of Thomas viseount Bindon; by whom he had Charles, the third earl, (79,) By his second wife, Mary, the daughter of Horace lord Vere, (70,) he had Vere, (80,) the fourth earl; who married Rachel, daughter of sir Thomas Coke, (81,) who married William Vere; Thomas; and John; who were successively earls of Welfmoreland, (71, 75, 76,) and who died without issue. Upon the death of Thomas, the seventh earl, (76,) without issue male, the earldom went to another branch of the family. We shall, however, proceed to explain the remaining branches from the fourth earl, (76,) to the earliest of the family. On the death of her brother, she succeeded to the barony of Le Defpencer, and died without issue, John, (82,) the next daughter of the fourth earl, married ——. William.
William Paul, esq. (53,) by whom he had a daughter, Catharine, (84,) which last-mentioned Catharine married Sir William Stapleton, bart. (85,) Sir William was the grandson of William Stapleton, (86,) created a baronet in A. D. 1674, and was the second William, (87,) who married Mary, the daughter of Henry Fane, esq. (91,) The present lord Le Despencer is a son of the last-mentioned Thomas, (93,) His lordship by Augusta, (92,) daughter of Samuel Elliott, esq. has a son, and hereafter will be the barony of Le Despencer, (94,) We now return to the issue of the brother of the second earl; Francis, the elder son, (95,) and Henry, the younger son, (96,) The former married Hannah, (96,) daughter of John Ruffworth, esq. by whom he had issue a son, Francis, (98,) who died A. D. 1753; the latter, Anne, daughter of John Scope, esq. (99,) The issue of this marriage was Thomas, (100,) and Henry, (101,) Thomas, the eighth earl, married Anne, daughter of William Swymmer, esq. by whom he had two sons, the elder of whom was John the ninth earl, (104,) who married Augusta, daughter of Montagu Bertie, esq. by whom he had the first duke of Ancaster, (105,) The issue of this marriage was John the tenth earl, (106,) and Thomas, (107,) who married Rachel, daughter of John Lennard, esq.
Samuel Rolle, esq. (5) who had an only daughter Margaret, (6) married to Robert earl of Oxford, (7) The baronets Clinton and Saye had also an only daughter Bridget, (8) who married Francis Trefuifs, esq. (9) and from whom, in a direct line, descended Samuel, (10) Robert, (11) and Robert Cotton Trefuifs, (12) The last mentioned had two sons: Robert, (13) who died unmarried; and George-William, (14) father of Robert-Cotton-St. John Trefuifs, (15) the present baron Clinton and Saye.

We now return to Theophillus, earl of Lincoln; he had only daughter Margaret, (16) who married Hugh Boscawen, (17) His only daughter Bridget, (18) was the first wife of Hugh Fortescue, (19) the ninth in descent from the lord-chancellor Fortescue. By this marriage he had two sons, (No. 20 and 21;) the younger See the pedigrees of each of these noble families, corresponding to this Table, among the Peers, in the preceding pages of this article.

The ceremony of introducing a baron into the house of lords has been stated in our second volume, under the head Baron; and we have to add, that by a late act of parliament, the following stamp-duties are imposed on the creation of every peer, according to the rank and scale therein mentioned. The whole expenses, and fees of every description, paid, as well at the Heralds'Office as at the House of Lords, are also subjoined.

The following Table will show the Progres and Incrage of the Baronial Honours in each Reign, from the Commencement of William the Conqueror, to the Clofe of the Reign of the late King.

**HERAT,** a town of Western Hindostan, once the famous city of Aris, through which Alexander pursued his Indian expedition and conquests. It was during many ages a city of great strength and an emporium for commerce, to which the princes and merchants resorted, in their route from Candahar to the Caspian Sea. It repeatedly suffered, and as often emerged, from those fatal calamities to which the cities of the east are peculiarly incident. In 1740, many foundations of the ancient city were cleared and ploughed up, and town with grain; and out of its magnificent ruins the present town was built. Aftrabad was its port.

**HERARD,** a town of Persia, in the province of Chorasan, situated on a river of the same name, surrounded with walls and ditches, and defended by an old castle. The neighbouring country produces excellent fruit; and roses are in such plenty, that it obtained the name of Sargulzar, or City of Roses. Lat. 35. 30. N. lon. 60. 50. E. Greenwich.

**HERAT,** a river of Persia, which runs into the Caspian Sea near Zawch.

**HERAUD,** or HERALD, (Didier,) in Latin Heraldus, a civilian and man of letters, and an advocate in the parliament at Paris; died in 1649. He was extremely attached to ancient literature, and published several works much esteemed. Of these the principal are: [Notes upon Tertullian's Apology, Minutius Felix, Arnobius, and Martial. 2. Adversaria; various works on legal subjects. He was probably a Hugonot, as his son was minister of the Wallon church in London, and wrote a volume of sermons.

**HERALD,** a river of France, which rises in the Cevennes Mountains, and runs into the Mediterranean a little below Aigle.

**HERAULT,** a department of France, bounded on the north by the departments of the Tarn and the Averon, on the north-east by the department of the Gard, on the south by the Mediterranean, on the south-east by the department of the Aude, and on the west by the department of the Tarn. It takes its name from the river so called, which croffes from north to south nearly in the centre. Montpellier is the capital.

**HERB,** f. [herbes, fr. herba, L.] Herbs are those plants whose stalks are soft, and have nothing woody in them; as grnas and hemlock. Lokes.—If the leaves are of chief use to us, then we call them herbs; as sage and mint. Watts.

With sweet-smelling herbs
Expoued Eve deck'd first her nuptial bed. Milton.

**HERB BENNETT.** See GUEM.

**HERB CHRISTOPHER.** See ACTEA.

**HERB PARIS.** See PARIS.

**HERB ROBERT.** See GERANIUM.

**HERBA,** a town of Africa, in the desert of Sahara: fifty miles south-east of Gardeia.

**HERBA PARIS.** See PARIS.

**HERBA SANCTI STEPHANI.** See CIRCEA.

**HERBACEOUS,** adj. [from herb, L.] Belonging to herbs.—Ginger is the root of neither tree nor trunk, but an herbaceous plant, resembling the water lily in appearance. Brown.—Feeding on vegetables; perhaps not properly.—Their teeth are fitted to their food; the raptorial to catching, holding, and tearing their prey; the herbaceous to gathering and comminution of vegetables. Derham.—Herbaceous Plants are those which have succulent stems or stalks that lie down to the ground every year. Of herbaceous plants, those are annual, which perish with the root every year; biennial, which复活ity from their roots for a series of years, a new item being produced every spring.
In law, he that hath herbage of a forest by patent, may have trespass for the grafs, but not for trees, or the fruit of them; and he may take bees, damage, and so. But, though he that hath herbage may inclose, yet he that hath reasonable herbage cannot. Dyce, 2 Ro. Rep. 536. Grantee of herbage on a park cannot disarm it. G всё., 419. A lease was made of a manor with all gardens, orchards, yards, &c. and with all the profits of a wood, excepting to lefior forty acres, to take at his pleasure; per Dyce. The wood is not compromised within the lease, but the lease shall only have the profits, as pannage, herbages, &c. 4 Leon. 8. HERBAGE, adj. Covered with grafs.

Delicious is your shelter to the foun, As to the hunted hart the sallying spring. Thomson.

Herbal, f. [from herb.] A book containing the names and description of plants. We leave the description of plants to herbals, and other like books of natural history. Bacon.—For a selection of the most valuable aromatic and medicinal herbs that grow in England, you may refer to Culpeper's Herbal. Dr. Mead. HERBALISM, f. The knowledge of herbs. Scott.

HERBALIST, f. [from herbal.] A person skilled in herbs;—herbalists have distinguished them, naming that the male, whose leaves are lighter, and fruit rounder. Brown.

HERBALMAREA, a town of Arabia, in the province of Hadramant: 146 miles south of Amansfaridin.

HERBARIOSUS, adj. Pertaining to herbs. Scott.

HERBARIST, f. [from herbal.] One skilled in herbs.

HERBATIC, adj. Belonging to herbs;

HERBAULT, a town of France, in the department of the Loire and Cher, and chief place of a canton, in the district of Blois: eight miles west of Blois.

HERBE, f. [French, grafs.] A kind of reward given to a servant for the good performance of his duty.

HERBE, a town of Italy, in the Veronefæ, belonging to the state of Venice: fifteen miles south of Verona.

HERBEDE, a town of Germany, in Westphalia: two miles east-north-east of Blankenftein.

HERBELET, f. [Diminutive of herb, or of herbula, L.] A small herb.—These herblets which we upon you lower, Shakespeare.

HERBELOT (Bartholomew d'), a learned French professor of oriental literature, born at Paris in 1625. After passing through a course of general study, he made a particular application to the Hebrew language, and took a journey to Italy in order to converse with the Orientalists who frequent its ports; and at Rome he contracted an intimacy with Lucas Holstenius, and Leo Allatius, two of the most learned men of his age. His reputation soon acquired him the notice of many persons of eminence, particularly of Ferdinand II., grand-duke of Tuscany, who purchased for him a valuable collection of Eastern manuscripts, with the title of the court; he then commenced his Bibliothèque Orientale, and upon being recalled to Paris by the express orders of Colloque, a pension was settled upon him to enable him to continue his labours. By the recommendation of the chancellor Pontchartrain, he was nominated to the royal professorship of the Syriac language, in which post he died in 1655, at the age of seventy. He was a man of general erudition, and of an estimable private character. His great work, La Bibliothèque Orientale, Paris, 1697, folio, since reprinted in Holland, is a vast collection of every thing relative to the history, biography, manners, and customs, of the Eastern nations. A supplement has since been added to it from the papers of messieurs Videlon and Galland, Hague, 1779.

HERBEMONT, a town in the duchy of Luxembourg, situated on a mountain near the Semoy: twenty miles west of Arlon.

HERBERSTEIN, a town of Germany, in the duchy of Stiria: five miles west of Hardcbourg.

HERBERT, [of hepe, an army, and beophr, Sax. bright, q. d. the glory of an army; Verflagean derives it of hepe, Sax. and berichs, Teut. inducted, q. d. an expert soldier.] A Christian and fummary.

HERBERT (William), earl of Pembroke, and Mary, countess of Pembroke, both decorously celebrated in the republic of letters. See the article Heraldry in this volume, p. 493.

HERBERT of CHELBURY (Edward), a nobleman eminent for his high character and writings. He was born at the castle of Montgomery in 1581, and attained so early the rudiments of learning that at the age of twelve he was sent to University college in Oxford. His abode at that seminary was terminated by the death of his father, Richard Herbert, esq. in 1598. In 1602 he came to London, and shortly after the accession of James I. was created a knight of the Bath. He served the office of high-sheriff of Montgomeryshire, and divided his time between the country and court; till at length, about 1608, he set out on his travels to the continent. His advantageous person and manners, and the reputation for courage which he acquired, gained him many friends, among whom was the comely Margaret. At a feast of this nobleman he passed a summer, practising horsemanship and other manly exercices, in which he was found singularly expert. He returned to England the following year; which he quitted again in 1610, in order to serve in the English forces sent to affit the prince of Orange at the siege of Julliers. Here he signified himself by a valour which surpassed all his competitors. After the siege, he visited Antwerp and Bruxelles, and then returned to England, whither his reputation had preceded him, and where he stood as one of the conspicuous characters of that age. In 1614, he went again into the Low-countries, to serve under the prince of Orange. The account of this campaign contains few instances of his personal valor, and all the respect paid to him by great men. After its conclusion he made a tour in Italy; and at Turin he engaged with the duke of Savoy to conduct from France a body of Protestantists into Piedmont for his service. This enlistment being forbidden by the French court, he was arrested by the governor of Lyons, but soon obtained his liberation. He passed the next summer with the prince of Orange, and then returned to England. In 1616, he was sent ambassador to the court of France. A man of his aspiring disposition was not likely to suffer such an honorable office to be degraded in his possession through want either of splendor or of spirit; and the observations he has left respecting the characters of Louis XIII., and his favourite Luynes, display much political sagacity. It was at Paris that, in 1614, he printed his famous book De Veritate prout disayingur a Revelationis, which he had planned and begun in England; where, on his return, in 1625, he was created an Irish peer, and afterwards an English baron, with the title of the earl of Pembroke in Shropshire. Nothing more is heard of him in public life; and, as he hints in his Memoirs at disappointments, it is probable that, after the death of his friend, the duke of Buckingham, he left his interest at court. He seems to have chiefly occupied himself in
study, and to have entirely suppressed the fire which distinguished his earlier years. At the breaking out of the civil war he adhered to the parliament. We do not find, however, that he took any active part, and we only hear of his loyalties from the demolition of Montgomery- castle by the king's troops, for which he received a compensation from the parliament. He died in London in 1648, and was buried in the church of St. Giles's in the field. His epitaph particularly records him as the author of the book De Veritate.

The character of lord Herbert is strongly marked in his "Memoirs," which come no lower than his final return from the French embassy. Of his other writings, the work De Veritate has the first place for learning and logical argument. Its purpose is to assert the sufficiency, universality, and absolute perfection of natural religion, with the view of proving the uselessness of revelation. Its first appearance was at Paris in 1624, but he reprinted it at London in 1633 and 1635, and distributed it among the learned throughout Europe. It was answered by Gascardus. He soon followed this performance by a piece entitled De Religione Gentilium, errorumque apud eos causas, in which he enquired into those causes which misled the simple and fages of heathenism in their notions of the Divine Being. Soon after his return he published his "History of the Life and Reign of Henry VIII." 1546, folio. This, in its style of composition, was esteemed one of the best historical works in the language. The English style of lord Herbert is strong and manly, and free from the quaintness and pedantry which infected the age. A collection of his poems was published by his son, in 1665. His entertaining Memoirs remained in MS. in his own family, till they were first printed by Mr. Wallpole in 1764.

HERBERT (George), an eminent divine and poet, brother of the preceding, born in 1593. He was educated at Westminster school, whence he was elected a scholar of Trinity college, Cambridge. He attended very closely to his studies, was made fellow of his college, M.A. and in 1619 chosen orator of the university. He was made a deacon in 1626, and was presented to the prebend of Layton Ecclesia, in the diocese of Lincoln. His first work was to rebuild, partly at his own cost, and partly by means of contributions, the decayed church of the place. He married the daughter of a Wiltshire gentleman of family and fortune, and all who have mentioned him, confirm what his brother lord Herbert has said of him: "His life was most holy and exemplary, insomuch that about Salisbury, where he lived benefited many years, he was little les than sainted." He died of a decline in 1633. After his death, his friend, the pious Nicholas Ferrar, published a translation of some books of the Commentarii Rerum Moscovitarum, which appeared at Bassil in 1561, under the title of Commentarii Rerum Moscovitarum, folio. He was made commandant of all the Stirian cavalry; and was afterwards rewarded with the title of knight, and the dignity of court-councillor. He was employed in various embassies to Denmark, Poland, and Muscovy, and was created a privy-councillor, and president of the Austrian chamber. He went in 1541, as ambassador to the grand-signior, then with his army before Suda. He had various other honourable employments; and at length, after having served four emperors, retired from public life, and died in 1566. The baron Herbstein occupied his leisure in composing a history of Muscovy, which appeared at Bassil in 1561, under the title of Commentaria Rerum Moscovitarum, folio. He also published, in Latin and German, a history of his own life, and of the origin of his family.

HERBICID, adj. [herbicidus, Lat.] Covered with herbs.

HERBIES, a town of France, in the department of the Vendée, and chief place of a canton, in the district of Montaigut: two leagues and a half south-west of Mortagne and four and a half south-east of Montaigut.

HERBIVOROUS, adj. [from herbivora, Lat. herb, and fem, to bear.] Bearing herbs; producing herbs.

HERBIGARE, v.a. [from herbigare, herbiga, hope of, saxon. a house of entertainment.] To harbour, to entertain: hence our harbinger, or harbinger, who provides harbour or house-room, &c.

HERBIGNAC, a town of France, in the department of the Loire, and chief place of a canton, in the district of Guerande: three leagues north-east of Guerande.

HERBINUS (John), a German Lutheran divine, born at Bitphen, in Silesia, on the borders of Poland, in 1633. In 1672 he was nominated minister of the Lutheran church at Wilna, in Lithuania; but he relinquished that situation for a church at Grandets, a small
small town in Prufia. In that place he died in 1676, in the forty-fourth year of his age. He was the author of,
1. Terre Matlis & Quærit Examen, 1655, 12mo. 2. Dis-  
pupatio de Fornicionum Illuvirum Eruditione, 1657, quarto.  
3. Historia fefante Annis 1657, & 1667, folio and quarto.  
4. Tragoediae Medici & Ludi innovati de Iuliano Imperatore  
Apolatro, Ecclesiarum & Scholiarum Eternum, 1668, quarto.
5. Admiranda Michaelis Korsnbirgh in Regem Polonic Electo,  
1669, quarto. 6. Difputatio de Paradiso, quarto. 7. Dif-  
peratio de admirandis Mundi Caracteris super & sub- 
terraneis, &c. nec non terrefri ac primitivae Paradisui  
Locus Signum versus in Palefina repititor, &c. 1678, in  
quarto; distinguished by much learned and curious  
research. 8. Religio Rijovinens, crypta, fie Rijovia fub-  
terranea, &c. 1675, octavo; which is a singular perfor- 
mance, and taken from a Scavonian work by Neftor, 
a Multivele liitorian. 9. Traditio de Siculo Ecclefarum  
Augustanis Confessiones in Polonia, 1679, quarto.

HERBIVOROUS, adj. from herba, Lat. an herb, and  
toros to devour. Devouring herbs; living on grafs.  

HERBIVOROUS ANIMALS, those which feed only 
on vegetables.

HERB'WOMAN, a woman that sells herbs.

HERB'WOMAN, a woman that sells herbs.

HERMIN, adj. [from herbe, Lat.] Abounding with 
herbs or herbs.

HERBS, f. [herbas, Lat.] Full of herbs or herbs.

HERBS'ITY, f. [herbasitas, Lat.] Abundance of 
herbs or herbs.

HERBRAM, a town of Germany, in the circle of 
Weftphalia, and biphorphic of Paderborn: four miles 
from the west of Dringenberg.

HERSTEIN, a town of Germany, in the circle of 
the Upper Rhine, and biphorphic of Fulda: thirteen 
miles west of Fulda, and twenty-six east-south-east of 
Marburg.

HERB'LOYNT, adj. [from herbola, Lat.] Containing 
herbs.

HERB'WOMAN, a woman that sells herbs.

HERBY, adj. Having the nature of herbs. No sub-  
flance but earth, and the procedures of earth, as tile 
and stone, yieldeth any more or herb's substance. Bacon.

HERCULANEUM, one of the names of Jupiter.

HERCULANEUM, a city of Campania, in Italy, 
which, with its neighbouring city Pompeii, was faid to 
have been swallowed up by an earthquake, produced 
from an eruption of mount Vesuvius, August 24. A.D.  
79, in the reign of Titus. After being buried under 
the lava for more than 1600 years, these famous cities 
were discovered in the beginning of the eighteenth cen- 
tury: Herculaneum in 1713; and Pompeii about forty 
years after. But, according to the observations of C. 
Du Theil, published in a Memoir presented to the 
National Institute in Paris, at the fitting in October 
1821, it appears that the above epocha of the delirftion 
of these two cities is not correct; for they role again from 
their ruins under the reign of Titus; and they still ex-  
isted, with some remains of splendour, under Adrian. 
The masses of solid matter which were traced out on 
the base of the equefrian statue of M. Nonius Bal- 
bus, fon of Marcus, are an evident proof of its exifence 

at that period. They were found under the reign of 
the Antonines; for the account of Trimalchio's feast, 
in the famelic romance ascribed to Petronius Arberis, 
furminifies everal evidences of the exifence of Pompeii, 
and of some of the buildings of Herculaneum, under 
the reign of these princes. In the geographical monum-  
ent, known under the name of Peutinger's Chart, which is 
of a date posterior to the reign of Conflantine, that is to 
say, in the commencement of the fourth century, Her-  
culaneum and Pompeii were still flanding, and then in- 
habited; but in the Itinerary improperly ascribed to 
Antoninus, neither of thefe two cities is noticed; from 
which it may be conjecrated, with some degree of foun-
dation, that the entire ruin of Herculaneum and Pom- 
peii must have taken place in the interval between the 
time when Peutinger's Chart was constructed and that 
when the above itinerary was composed.

The eruption which took place in 471 occasioned the 
most dreadful ravages. If we can give credit to Mar- 
cellinus, the ashes then thrown up by Vesuvius covered 
all Europe. They were carried as far as Constantinople; 
where, according to this chronicler, an anniversary fef- 
ival was instituted in remembrance of that ftrange phe- 

tomenon. It is very probable that the cities of Hercu- 
laneum and Pompeii disappeared at that period, but that 
no more traces of them were left. This conjecture is 
supported by a letter written by Caflidorus in the name of Theodoric, who reigned between 493 and 526. 
On this authority, C. Du Theil is inclined to think, 
that after the fatal eruption of 471, fuch of the inhabi- 
tants of Pompeii as had the good fortune to escape 
alone, retired to Nola in Campania, and that those who 
escaped from Herculaneum took fielter at Naples. The 
quarter where the latter eftablished themselves was de-  
tached from the other parts of the city. This may ierve 
to explain the denomination Regio Herculanum, or the 
Quarter of the Herculaneans, which has been observed 
on several monuments of stone dug up at Naples, and alfo in several inferences which have been collected 
and published by learned Neapolitan antiquaries.

The site or situation of Herculaneum was where Por- 
tici now stands, about six miles to the eastward of Naples. 
The thickens of the heap of lava and ashes by which 
the city was overwhelmed, has been much increased by 
ferp fittings vomited fince that fatal catafrophe; and 
forms a mafs twenty-four feet deep, of dark grey stone, 
which is easily broken to pieces. By its non-adhesion 
to foreign bodies, marbles and bronzes are preferred in 
it as in a cafe made to fit them, and exact mofts of the 
faces and limbs of statues are frequently found in this 
subflance. The exact situation of this devoted city was 
not known till the year 1713, when it was accidentally 
found by some labourers, who, in digging a well, 
struck upon a flatue on the benches of the theatre. 
Many others were afterwards dug out and sent to France 
by the prince of Elbeuf. But little progress was made 
in the excavations till Charles infant of Spain ascended 
the Neapolitan throne; by whose efforts and liberality 
Herculaneum and Pompeii has been explored, and fuch treasures of antiquity drawn 
out as form the moft curious museum in the world, and 
have furpflled materials for eight imperial folio volumes, 
published under the direction of the late king of Na-  
ples. These curiosities confit not only of statues, busts, 
altars, interfeptions, and other ornamental appendages 
of Greek elegance and luxury; but also comprehend 
entire affortment of the homeftic, musical, and furgical, 
instruments; tripods of elegant form and exquifite exe-  
dance, and taken from a Sclavonian work by Neftor, 

f. Iherberg, HER'BOROUGH, a town of Germany, in the circle of 

f. Iherbostas, HER'BOS, in ancient geography, an inland town 
of a date pofterior to the feign of Cauftantine, that is to  

one of the four cities is hot correct; for they role again from 
their ruins under the reign of Titus; and they still ex-  
isted, with some remains of splendour, under Adrian. 
The masses of solid matter which were traced out on 
the base of the equefrian statue of M. Nonius Bal- 
bus, fon of Marcus, are an evident proof of its exifence 

Vol. IX. No. 68.
pletely fitted up with copper pans lined with silver, kettles, cisterns for heating water, and every utensil necessary for culinary purposes; specimens of various sorts of combustibles, retaining their form though burnt to a cinder. The favours of the gods were going to be reëdred to light, and that a new mine of science was on the point of being opened. But the difficulty of unrolling the burnt parchment, of parting the fragments on a flat surface, and of deciphering the obscuré letters, have proved such obstacles, that very little progress has been made in the work. When these famous cities were founded, this part of Italy was named Magna Graecia, from its having been peopled by Grecian colonies. After the fall of the Grecian empire it assumed the name of 

Magna Graecia

Hercules, by the will of Jupiter, was subjected to the power of Eurystheus, and obliged to obey him in every respect, Eurystheus, jealous of his success and rising power, ordered him to appear at Mycene, and perform the labours which by priority of birth he was empowered to impose upon him. Hercules hesitated to obey, to punish his disobedience, rendered him so dolorous, that he killed his own children by Megara, supposing them to be the offspring of Eurystheus. When he recovered the use of his senses, he was so struck with the misfortunes which had proceeded from his infancy, that he concealed himself, and retired from the society of men for some time. He afterwards consulted the oracle of Apollo, and was told that he must be subject for twelve years to the will of Eurystheus, in compliance with the commands of Jupiter; and that, after he had achieved his most celebrated labours, he should be reckoned in the number of the gods. So plain and expressive an answer determined him to go to Mycene, and to bear with fortitude whatever gods or men imposed upon him. Eurystheus seeing him thus totally subjected to him, and apprehensive of his powerful enemy, commanded him to achieve a number of enterprises, the most difficult and arduous ever known, hence called the twelve labours of Hercules. The favours of the gods had completely Armed him, when he took these labours. He had received a coat of mail and helmet from Minerva, a sword from Neptune, a shield from Jupiter, a bow and arrows from Apollo, and from Vulcan a golden cuirass and brazen buckler, with a celebrated club of brazen, according to the opinion of most writers.

The first labour imposed upon Hercules by Eurystheus was to kill the lion of Nemea, which ravaged the country near Mycene. The hero, unable to destroy him with his arrows, boldly attacked him with his club, pursued him to his den, and after a close and sharp engagement, caught him by the throat, and choked him to death. He carried the dead beast on his shoulders to Mycene, and after ever clothed himself with the skin. Eurystheus was so astonished at the sight of the beast, and at the courage of Hercules, that he ordered him never to enter the gates of the city when he returned from his expeditions, but to wait for his orders without the walls. He even made himself a brazen veil, into which he retired whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he retired whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he retired whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he retired whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he retired whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. He even made himself a brazen veil, into which he returned whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he returned whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he returned whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he returned whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but to wait for his orders without the walls. He even made himself a brazen veil, into which he returned whenever Hercules returned.—The second labour imposed upon Hercules was to catch the child Cerberus, which had ravaged the neighbourhood of Erymanthus. In this expedition, but
by slight woundings, and lessening its swift-
ness. As he returned victorious, Diana snatched the
doe from him, and severely reprimanded him for mo-
dling an animal which was sacred to her. Hercules pleaded necessity, and, by representing the commands of Eu-
rytus, who appeared the goddes, and obtained the
death. —For his fifth labour he was ordered to kill the
carnivorous birds which ravaged the country near the
lake Stymphalis in Arcadia. —In his sixth labour Her-
cules was ordered to cleanse the stables of Argus,
where 5000 oxen had been confined for many years.—
In his seventh labour he brought alive into Argos
a prodigious wild bull, which fed upon human fles.
He killed Diomedes, and gave him to be eaten
by his mares, which he brought to Eurytus. They
were sent to mount Olympus by the king of Mycenae,
where they were devoured by the wild beasts; or, ac-
tording to others, those were consecrated to Jupiter, and
where they existed in the age of Alexander the
Great.—For his ninth labour he was commanded to go
on-board the Argo in quest of the golden fleece, and
bring home the girdle of the queen of the Amazons.—
In his tenth labour he killed the monster Geryon, king
of Gades, and brought to Argos his numerous flocks
which fed upon human flesh. —The eleventh labour
was to conquer the three-headed dog Cerberus.—The
twelfth labour was to obtain apples from the garden of
the Hesperides, which was guarded by a dragon. —Be-
side these arduous labours, which the jealousy of Eu-
rytus had imposed upon him, he also achieved others
of such a character as to stamp his name on eternity.
He accompanied the Argonauts to Colchis, before he de-
ivered himself up to the king of Mycenae. He affi-
lated the gods in their wars against the giants; and it was
through him alone that Jupiter obtained a victory.
He conquered Laomedon, and pillaged Troy.
When Iole, the daughter of Eurytus, king of Op-
haus, of whom he was deeply enamoured, was refused
to his entreaties, he became the prey of a second fit
of infinity, and he murdered Iphitus, the only one of
the sons of Eurytus who favoured his addresses to his fitter.
He was some time after purified of the murder, and his
infinity ceased; but the gods persecuted him the more,
and his condition was more miserable than that of the
poor captive, whom the gods permitted them to apply to the oracle of Delphi for relief. The coldness
with which the Pythia answered his enquiries, irritated
him; and he resolved to plunder Apollo's temple, and
carry away the sacred tripod. Apollo opposed him,
and a severe conflict was begun, which nothing but the
interference of Jupiter with his thunderbolts could have prevented. He was upon this told by the oracle, that
he must be fold as a slave, and remain three years in the
most abject servitude, to recover from his disorder. He
complied, and Mercury, by order of Jupiter, conducted
him to Omphale, queen of Lydia, to whom he was fold
as a slave. Here he cleared all the country from rob-
ers, and Omphale, who was astonished at the greatness
of his exploits, restored him to liberty, and married him.
Hercules had Agelaus, and Lamon according to oth-
ers, by Omphale, from whom Creus, king of Lydia,
was descended. He became also enamoured of one of
Omphale's female servants, by whom he had Alceus.
After he had completed the years of his servitude, he re-
turned to Peloponnese, where he re-established on the
throne of Sparta Tyndarus, who had been expelled by
Hippocon. He became one of Dejanira's suitors, and
married her, after he had overcome all his rivals. He
was obliged to leave Calydon, his father-in-law's king-
dom, because he had inadvertently killed a man with a
blow of his fit; and he was on account of this expulsion
the father of Lichas. Sometimes he is represented at the
feasting of the Nemean boar. From Calydon he retired to the court of
Ceyx, king of Trachinia. In his way he was stopped
by the swollen dreams of the Erythraeus, where the centaur
Euilenus attempted to offer violence to Dejanira, under
the perfidious pretence of conveying her over the river.
Hercules perceived the diftres of Dejanira, and killed
the centaur, who as he expired gave her a tunic in
recompense of her husband from unlawful love. Ceyx, king of Trachinia, received
him and his wife with great marks of friendship, and
purified him of the murder which he had committed at
Calydon. Hercules was still mindful that he had once
been refused the hand of Iole; he therefore made war
against her father Eurytus, and killed him, with three
of his sons. Iole fell into the hands of her father's murderer, and found that she was loved by Hercules as much as before. She accompanied him to mount Oce,
where he was going to raise an altar, and offer a solemn
sacrifice to Jupiter. As he had not then the tunic in
which he arrayed himself to offer a sacrifice, he sent
Lichus to Dejanira, in order to provide himself a proper
dress. Dejanira, informed of her husband's tender at-
tachment to Iole, sent him the tunic which she had re-
cieved from Neifen; and Hercules, as soon as he had
put it on, fell into a desperate distress, and found the
poison of the Lernaean hydra penetrate through his bones.
He attempted to pull off the fatal dress, but it was
impossible; and this disease he inveighed in the most bitter imprecations against the credulous
Dejanira, the cruelty of Eurytion, and the jealousy
and hatred of Juno. As the diftempor was incurable, he
implored the protection of Jupiter, and gave his bow
and arrows to Philoctetes, and erected a large burning
pile on the top of the mount Oeta, He spread on the pile
the skin of the Nemean lion, and laid himself down upon it as on a bed, leaning his head on his club. Phi-
 photocetes, or, according to others, Pean or Hyllus, was
ordered to set fire to the pile, and the hero laid himself
on a sudden surrounded with the flames, without betraying any marks of fear or astonishment. Jupiter saw
it from heaven, and told to the surrounding gods that
he would raise to the skies the immortal parts of a hero
who had cleared the earth from so many monsters and
tyrants. The gods applauded Jupiter's resolution, the
burning pile was suddenly surrounded with a dark smoke,
and after the mortal parts of Hercules were consumed,
he was carried up to heaven in a chariot drawn by four
horses, the thunderbolts of which were his only weapons.
He spread on the pile the skin of the Nemean lion, and
after the mortal parts of Hercules were consumed,
he was carried up to heaven in a chariot drawn by four
horses, the thunderbolts of which were his only weapons.
Cupid, who infolently breaks to pieces his arrows and his club, to intiate the passion of love in the hero, who himself attempts to be himself to be himself and rid himself of Omphale, who defied her self in his armour while he was sitting to spin with her female serving. The children of Hercules are as numerous as the labours and difficulties which he underwent; and indeed they became so powerful soon after his death, that they alone had the courage to invade all Peloponnesus. See Racine. He was father of Bicorus and Therimachus, by Megare; of Cepheus, by Afydamia; of Palemon, by Antone; of Ereses, by Parthenope; of Glyciferes, by Gyneus, and Odites, by Dejanira; of Tityra of Lycia, by Auroene; of Eurytus, by Parthenope; of Glyriferes, by Echidna, &c. Such are the most striking characteristics of the life of Hercules; who is said to have supported, for a while, the weight of the heavens upon his shoulders, and to have separated, by the force of his arm, the celebrated mountains which were afterwards called the boundaries of his labours; which opened a communication between the Mediterranean and Atlantic seas, now the strait of Gibraltar; on each side of which, on the mythological points, his pillars were erected. See GIBALBAIAR, vol. viii. p. 555.

Heracles, in astronomy, is a constellation of the northern hemisphere, and one of the forty-eight old constellations mentioned by ancient writers. It is not known by what name it was distinguished by the Egyptians and others before the Greeks. The latter, per-
In a summer's day,
Heat with the glorious sun's all-purging ray,
In the calm evening leaving her faire flokke.
W. Brown.

A female tending a herd:
As a herd'se in a summer's day,
Heat with the glorious sun's all-purging ray,
In the calm evening leaving her faire flokke.
W. Brown.

A company of men, in contempt or detestation:
Survey the world, and where one Cato diines.
—To accoit; to be acquainted; Norris.

However great we are, honed and valiant.

But who shall judge the wager won or lost?
That shall yonder herd-groom, and none other.
Spenser.

To HERD, v. n. To run in herds or companies.—It is the nature of indigency, like common danger, to endeavour men to one another, and make them herd together, like fellow-sailors in a storm. Norris.—To associate; to become one of any number or party:
I'll herd among his friends, and seem
One of the number.

To HERD, v. a. To throw or put into a herd:
However great we are, honest and valiant,
Are herded with the vulgar.
Johnson's Catiline.

HERD'ESS, /. A female tending a herd:
HERD, f. [hoeppt, Sax.] A number of beasts together. It is peculiarly applied to black cattle. Flocks are sheep, and herds oxen or kine.

There find a herd of heifers, wandering o'er
The neighbouring hill, and drive them to the shore.
Addison.

A company of men, in contempt or detestation:
Survey the world, and where one Cato diines.
—To accoit; to be acquainted; Norris.

However great we are, honed and valiant.

But who shall judge the wager won or lost?
That shall yonder herd-groom, and none other.
Spenser.

HERD'GROOM, /. A keeper of herds.

HERD'IVESCHE, /. A female tending a herd:
HERD' ICHE, or HERD'ICHE, a town of Germany, in the circle of Westphalia, and county of
Vol. IX. No. 668.
Mark, situated on the Ruhr, containing three churches for the different religions, and a noble secular abbey for ladies, both Roman-catholic and Protestant: four miles north-west of Schwerte.

HERD'TIN, a town of Denmark, in the circle of Koeber, of six miles south-east of Truanen.

HERD'MAN, or HERDSMAN, f. One employed in tending herds: formerly, an owner of herds.—That to the faithful herdman's art belongs. Milton.

There oft the Indian herdman, shunning heat,
Shelters in cool, and tends his parfuring herds
At loop-holes cut through thick'd flade.
Milton.

HERD'TRICH (Christian), a learned Flemish Jesuit, who was particularly conversant in the literature, history, and customs, of the Chinese. He was selected, by order of Louis XIV. to draw up and publish a work entitled Consecutius Sinarum Philosophiae, sive Scientiae, Sinens Latinæ exposita, &c. 1687, folio. The author has been accused of occasional deficiencies in point of accuracy, but, notwithstanding its blemishes, the work is replete with profound erudition, and curious and valuable information.

HERD'WEECH, or HERD'WERCHE, f. Herdman's work, or culuminary work done by the shepherds, herdsmen, and other folodary tenants, at the will of their lord.

Here, adv. [hen, Sax. hier, Dut.] In this place.—Today is ours, we have it here. Cowley.

Before they here approach,
Old Siward, with ten thousand warlike men,
All ready at a point, was setting forth. Shakespeare.

In the present state.—This shal be happy here,
More happy herafter. Bacon.—It is used in making an offer or attempt.—Then here's for earthen. Dryden.—In drinking a health.—Here's to thee, Dick. Cowley.

However, friend, here's to the king, one cries;
To him who was the king, the friend replies. Prior.

It is often opposed to there; in one place, distinguished from another.—'Tis neither here nor there. Shakespeare.

Then this, then that, man's aid, they crave, implore;
Pest here for help, seek there their followers. Daniel.

Here seems, in the following passage, to mean this place:
Bid them farewell, Cordelia, though unkind;
Thou lovest here a better where to find. Shakespeare.

HEREABOUDTS, adv. About this place.—I saw hereabouts nothing remarkable, except Augustus's bridge, Addison on Italy.

HEREAFTER, _ed_. In time to come; in futurity.

Hereafter he from war shall come,
And bring his Trojans peace.
Dryden.

In a future state.—You shall be happy here, and more happy hereafter. Bacon.

HEREAFTER, f. A future state. This is a figurative noun, not to be used but in poetry:
'Tis the divinity that dirs within us;
'Tis heaven itself that points out an hereafter,
And intimates eternity to man. Addison's Cato.

HEREAT', ed_. At this.—One man coming to the tribunal, to receive his donative, with a garland in his hand, the tribune, offended hereat, demanded what this singularity could mean? Hooker.

HEREABANUM, f. [Dope, exercitus, and ban, Sax. edilitum, multa.] A multt, instituted under the feudal government, for not going armed into the field, when called forth. Spelman. Under the feudal policy, every free man was under an obligation to serve the state.

If, upon being summoned into the field, any freeman refused to obey, a full herabannum, i.e. a fine of sixty
9 T

T.
crown, was to be exacted from him, according to the law of the Franks. This fine was levied with such rigour, that, if any person be inolvent, he was reduced to the condition, and continued to that state until such time as his labour should amount to the value of the fine.

The emperor Lotharius rendered the penalty more severe, by confiscating the goods of the person refusing, and banishing him.

**HEREBOTUS, f. [Dene, and bode, Sax. a messenger.]**
The king's edict commanding his subjects to join the field.

**HEREBY, adv.** By this. The acquisition.

**HEREITABLE, adj. [hereditare, Lat.]** Whatever may be occupied as inheritance.—Adam being neither a monarch, nor his imaginary monarchy hereditable, the power which is now in the world is not that which was Adam's.

**HEREITAMENTS, f. [hereditamenta, Lat.]** A term in law for all such immovable things, whether corporeal or incorporeal, which a man may have to him and his heirs by way of inheritance; and which, if they are not otherwise devised, descend to the executor and the beneficiaries; by the grant of hereditaments in conveyances, manors, and other foids of all sorts, rent, services, advowsons, &c. pass. Hereditamenta sive quod juris hereditario ad heredem transfert. Hereditaments are of two kinds, corporeal and incorporeal. Corporeal hereditaments consist wholly of subfiantal and permanent objects, all which may be comprehended under the general denomination of land.HEN. VIII. c. 2. It is a word of very great extent, comprehending whatever may be inherited or come to the heir; be it real, personal, or mixed; and though it is not holden, or lieth not in tenure, Co. Lit. 6. 16. And by the grant of hereditaments in conveyances, manors, houses, lands, and all sorts of rents, services, &c. pass. Hereditamenta sive quod juris hereditario ad heredem transfert. Hereditaments are of two kinds, corporeal and incorporeal. Corporeal hereditaments consist wholly of substantial and permanent objects, all which may be comprehended under the general denomination of land. 1 Inst. 4. It legally includes all such buildings, houses, and other buildings; because they consist of land, which is the foundation; and the structure thereupon: so that, if I convey the land or ground, the structure or building passeth with it. Water is also considered as a species of land; and such is the strictness of the law, that one cannot bring an action to recover possession of a pool, or other piece of water, by the name of water only; but he must bring his action for the land that lies at the bottom, and must call it land covered with water. Brown. 142. Land hath also, in its legal signification, an indefinite extent, upwards as well as downwards. Cujus est solis, ejus est usque ad celum, is the maxim of the law; upwards, therefore, no man may erect any building, to overhang another's land; and downwards, whatever is in a direct line, between the surface of any land and the centre of the earth, belongs to the owner of the surface; as is every day's experience in the mining countries. So that the word land includes not only the face of the earth, but everything under it or over it. And therefore if a man grants all his lands, he grants thereby all his mines of metal and other foils, his woods, his waters, and his houses, as well as his fields and meadows. Not but the particular names of the things are equally sufficient to pass them, except in the instance of water; by a grant of which nothing passes but a right of fishing. Co. Lit. 4. But the capital distinction is this; that by the name of a castle, medinas, toft, croft, or the like, nothing else will pass, except what falls with the utmost propriety under the term made use of; but by the name of land, which is nonum generalissimum, every thing teretial will pass. 1 Inst. 4, 5, 6.

An incorporeal hereditament is a right issuing out of a thing corporate, whether real or personal, or concerning, or annexed to, or exercizable within, the same. Co. Lit. 20. It is not the thing corporate itself, but something collateral thereto; as a rent issuing out of lands, &c. or an office belonging to jewels, &c. These incorporeal hereditaments are rated by Blackstone in his Commentaries, to be principally of ten sorts; Advowsons; Tithes; Commons; Ways; Offices; Dignities; Franchises; Corodies, or Peasantry; Annuities; and Rents. As to all which fee those several titles in this Encyclopedia.

**HEREDITARY, adj. [hereditarius, Fr. hereditarius, Lat.]** Possessed or claimed by right of inheritance; defending by inheritance:

He shall ascend
The throne hereditarily, and bound his reign
With earth's wide bounds, his glory with the heavens.

**HEREDITARILY, adv.** By inheritance. Here is another, who thinks one of the greatest glories of his father was to have distinguished and loved you, and who loves you hereditarily. Pope.

**HEREFARE, f.** A military expedition; the act of going on a military expedition. Scott. An old word.

**HEREFORD, an ancient and opulent city, the capital of Herefordshire, situated on the north bank of the river Wye, nearly in the centre of the county. It is twenty-eight miles distant from Worcester, thirty-two from Gloucester, four from Monmouth, thirteen from Leominster, and a hundred and thirty from Ironbridge. The adjacent country affords a great variety of beautiful prospects, being diversified with an intermixture of hills, vales, meadows, corn-fields, and orchards. The municipal government is vested in a mayor, six aldermen, a common-council consisting of thirty-one members, a high steward, and a recorder. The name of the city is pure Saxon, signifying "the ford of an army," which perfectly agrees with its situation on the river Wye, which falls into the Severn, and forms part of the barrier between England and Wales. As the two nations were for ages at war with each other, this city was generally the quarters of such Saxon or English forces as were stationed in the neighbourhood to defend the frontier; and here both armies probably forded the river when they passed out of England into Wales, or out of Wales into England. Some, however, have supposed the name of Hereford to have been derived from Ericona, the ancient Briton name of the county; and others have imagined, that both the Briton and Saxon names were derived from Arctonium, an ancient town near this place, mentioned in the Itinerary of Antoninus, which is said to have been destroyed by an earthquake, and Hereford to have been erected upon its site. It is likewise said to have been founded by king Edward the elder; though others suppose that it was founded about the Saxo-Norman era, when the Saxo-Norman era, 878, was at its height, and first became considerible, about the year 854, on account of a church built here by Milred, king of the Mercians, to the memory of Ethelbert, king of the East Angles, who was murdered by the queen of king Offa, while courting her daughter. This church was soon after elevated to the rank of a cathedral, and Hereford was made the fee of a bishop; but in the reign of Edward the Confessor, Griffin, prince of Wales, sacked the city, destroyed the cathedral, and carried the bishop away prisoner. Hence this city was, at the era of the Norman conquest, in ruins, and there were not above one hundred and three men within the city and suburbs; the conqueror, however, rebuilt both the city and cathedral, and also erected a castle, which, though long since in ruins, Leland says, was in his time the fairest, largest, and strongest, in England. This city has lent members to parliament ab origine.

Hereford was formerly surrounded with a wall and a deep ditch, and defended by the before-mentioned castle, which, as well as a great part of the wall, and three of the gates, are demolished. The streets in general are wide, and the buildings, within the space of a few years, have been greatly improved. Some of the principal streets unite in a kind of square, called the High Town.
The arched roof of the upper cross aisle is well worthy to be studied; it was newly paved, and several parts repaired. The sculptured walls are numerous coats of arms of that family, finely incised. The altar-piece is sumptuous and elegant, and the service (till continued to be performed; till, on Easter Monday, 1786, about seven o'clock in the evening, the bells of the cathedral were stopped, and the notice of all persons that visit this church; it is supported by one pillar, as in Salisbury, Wells, and some other of our majestic cathedrals. On the east side of the south door leading into the choir, was formerly a celebrated monument of St. Ethelbert; the depredations of Algar, earl of Griffin, prince of Wales, added to the ravages of time, prevent us from recognizing the place at present, any other way than by report. The library, at the east end of the church, which was formerly a chapel dedicated to the Virgin Mary, contains a great many curious brasses, and some other monuments of note, in a handsome apartment of very fine workmanship; and, notwithstanding it was much defaced during the civil wars in the reign of Charles I., the shelves are now pretty well filled with books, many of them valuable. On the south side of the library is a very beautiful chapel founded by bishop Audley, about the year 1495. On the removal of that bishop to Salisbury, he built in that cathedral a chapel, in all respects similar to that at Hereford, and which is there also known as the Audley chapel.

The bishops of Hereford, in addition to their spiritual functions, were invested with very important temporal powers. Amongst the privileges of the city, the bishop of Hereford is entitled the Bishop's Fee; within this district the secular prelates have enjoyed very considerable authority; and, on particular occasions, their authority has altogether superseded that of the civil magistrate, by extending over the whole city. As lords of this fee, they exercised the ancient rights denominated (from the Saxon) infangenthef and infangenthef, by which they administered justice within their limits, and committed offenders to the custody of their own officers in their own peculiar prison, which was situated within the walls of the episcopal palace. By Chol and Cheam, or Theame, they restrained and judged bondmen and vassals, with their children, goods and chattels; and by Sac and Soke their tenants were excused from the payment of customary burdens and impositions. They also held an annual fair, for the sale of merchandise, within their fee; during its continuance their power extended to all the usual places to that appointed by the bishop, and a porter was sworn at each of the city gates, to collect the tolls for his use. A bailiff was annually elected to carry the burgage rolls, together with certain persons, to keep watch and see that all offenders to the custody of their own officers in their own peculiar prison, which was situated within the walls of the episcopal palace. By Chol and Cheam, or Theame, they restrained and judged bondmen and vassals, with their children, goods and chattels; and by Sac and Soke their tenants were excused from the payment of customary burdens and impositions. They also held an annual fair, for the sale of merchandise, within their fee; during its continuance their power extended to all the usual places to that appointed by the bishop, and a porter was sworn at each of the city gates, to collect the tolls for his use. A bailiff was annually elected to carry the burgage rolls, together with certain persons, to keep watch and see that all offenders to the custody of their own officers in their own peculiar prison, which was situated within the walls of the episcopal palace.

The bishop's see included the parishes of all Saints, St. Peter's, and St. Nicholas's. The cathedral was founded by Mildred, a Saxon princess, about the year 825, and rebuilt by bishop Athelstan between the years 1012 and 1056; but the body of the present fabric, the pillars of which are Saxon, was certainly erected by bishop Robert de Lofing, the second Norman prelate, in the reign of William I. in 1107, and the choir is in a fair manner finished in the times when the see was held by the four subsequent bishops. But though this cathedral was thus erected by piece-meal, and has undergone considerable mutilations, yet it is at this time a very lofty, though irregular, structure, notwithstanding it suffered very much latterly by the fall of the old tower, which was effeemed as a part of the ancient architecture. As this tower was extremely well built, it would not have gone to ruins for many centuries, had it not been very injudiciously erected upon flight arches, which were only designed for the support of the roof. An attempt was made to strengthen these arches a little before they gave way, but they were too far gone to admit of any repairs. It may not be improper to inform the reader, that this noble tower, which was 255 feet high, began to give some warnings of its fall, about a fortnight before it happened. Notwithstanding which, divine service still continued to be performed; till, on Easter Monday, 1786, about seven o'clock in the evening, the bells of the cathedral were stopped, and the notice of all persons that visit this church; it is supported by one pillar, as in Salisbury, Wells, and some other of our majestic cathedrals. On the east side of the south door leading into the choir, was formerly a celebrated monument of St. Ethelbert; the depredations of Algar, earl of Griffin, prince of Wales, added to the ravages of time, prevent us from recognizing the place at present, any other way than by report. The library, at the east end of the church, which was formerly a chapel dedicated to the Virgin Mary, contains a great many curious brasses, and some other monuments of note, in a handsome apartment of very fine workmanship; and, notwithstanding it was much defaced during the civil wars in the reign of Charles I., the shelves are now pretty well filled with books, many of them valuable. On the south side of the library is a very beautiful chapel founded by bishop Audley, about the year 1495. On the removal of that bishop to Salisbury, he built in that cathedral a chapel, in all respects similar to that at Hereford, and which is there also known as the Audley chapel.

The bishops of Hereford, in addition to their spiritual functions, were invested with very important temporal powers. Amongst the privileges of the city, the bishop of Hereford is entitled the Bishop's Fee; within this district the secular prelates have enjoyed very considerable authority; and, on particular occasions, their authority has altogether superseded that of the civil magistrate, by extending over the whole city. As lords of this fee, they exercised the ancient rights denominated (from the Saxon) infangenthef and infangenthef, by which they administered justice within their limits, and committed offenders to the custody of their own officers in their own peculiar prison, which was situated within the walls of the episcopal palace.
Bristol, and other places; and, by means of the same navigation, the city is supplied with coals from the foreland of Deane. A great market is held upon St. Andrew's day for cattle, horses, &c. Three markets are also held each week, on Wednesdays and Saturdays for poultry, butter, eggs, &c. and on Fridays for live stock. There are annually four fairs, to wit, on the first Tuesday after the 2d of February; on the Wednesday in the Easter-week; on the 1st of July; and on the 20th of October. At the October fair, besides a great number of cattle, horses, &c. a considerable quantity of salted butter is brought from the adjacent counties of Wales. On the north side of the city, at a small distance from Calle-green, Hereford infirmary is placed, in a very airy and commodious situation; and is most liberally supported by the voluntary subscriptions of the charitable and humane, both in the city and county at large. Among other small hospitals in the environs, is one known by the name of Coningsby's hospital for old soldiers, situated at a small distance from Widemarshgate, near which is a remarkable ancient stone pillar, which never fails to excite the attention of the curious traveller. There are several other hospitals well endowed for the support of old and decayed citizens, both male and female. There is also a school, called Blue-school, without Byefler's Gate, supported by subscription, for the clothing and teaching a certain number of boys and girls. Hereford gave long the title of earl to the noble family of the Bohuns; then of duke to Henry of Lancaster, afterwards Henry IV. king of England; after him, of earl to Stafford earl of Buckingham; then of viscount to Devereux earl of Ely, which a collateral branch of this family still enjoys, and is thereby the premier viscount of England. See the article HEREFORD, p. 545 of this volume.

HEREFORDSHIRE, an inland county of England, situated on the borders of Wales; having to the north the county of Salop or Shropshire; to the west the counties of Radnor and Brecknock, the latter separated by the Hatterel hills, or Black Mountain; to the south the county of Monmouth and Gloucestershire, the former separated by the river Munnaw; the latter, in part, by the Wye; and to the east Worcestershire. It is almost of a circular form; having its circumference made irregular by many windings and indentations. During the Saxon heptarchy, this county was included in the kingdom of Mercia. It is now in the province of Canterbury, the diocese of its own name, and in the Oxford circuit; being forty-six miles long, forty miles broad, and 220 miles in circumference, containing 1200 square miles, or 760,000 acres; divided into eleven hundreds, 176 parishes; one city, Hereford; and seven market-towns, viz. Leominster or Lemster, which gives the title of viscount to the family of Fennor, and sends two members to parliament; Ross, which gives the title of baron to the Berthon family; Weobley, which sends two members to parliament; Pembroke, Ledbury, Bromyard, and Kineton. Its rivers are the Wye, Lugg, Minnow, Arrow, Frome, Dore, Leddon, and Tame. The most noted places are Marsha Hill, Malvern Hills, Hatterel Hills, Frome Hill, Black Mount, Golden Vale, Bringwood Chase, Hawood and Dereford Forests, Creden Hill, and Brynmawr Wood. Before the conquest, this county was reckoned a part of Wales; and, being then a frontier between England and Wales, it had twenty-eight strong castles, a few only of which now remain. Herefordshire is one of those counties which most happily unite the rich and fertile with the picturesque and romantic. The poet Dyer's description of the ancient Siluria, of which it formed a considerable part, paints it in beautiful colours:

Pleasant Siluria, land of various views,
Hills, rivers, woods, and lawns, and purple groves
Pomaceons, mingled with the curling growth
Of tenderl hops, that flaunt upon their poles.

The fertility and pleasures of this country are greatly owing to the fine rivers by which it is watered. The principal is the Wye, which, entering on the western side, almost crosses the country, meandering to the south-east; when, turning directly south, it reaches the boundary of Gloucestershire, and then bending westward, arrives at the borders of Monmouthshire. The romantic beauties of the Wye, which flows in a deep bed between lofty rocks clothed with hanging woods, and here and there crowned by hail long, of Shropshire, have employed the descriptive powers of the pen and pencil, and can never too frequently engage the curiosity of travellers.

The Lug is also a considerable stream, which, rising in north-west, on the confines of Radnor, after flowing across great part of this county, and receiving many rivulets from the north and east, falls into the Wye a little below Hereford, and compels it to take its southward direction. The Munnaw above mentioned as forming the limit on the Monmouthshire border, springs from the Hatterel-hills; and, after receiving the Dour, flowing out of a valley, called from its superior fertility the Golden Vale, goes on to join the Wye at the ancient town of Monmouth. The northern extremity of the county is also crossed in two places by the Tame.

Two products render Herefordshire particularly famous—its cider and its wool. Hops also form a considerable part of its agriculture. The apples producing cider grow in greater abundance here than in any other county in Great Britain, being plentiful and spontaneous even in the hedge-rows. Of these the fruits are of various kinds, yielding liquors of different strength and qualities. The most celebrated is the red-streak, said to be peculiar to this county, and hence claims the distinctive appellation of Herefordshire cider. The Styer cider is remarkable for a strength and body unparallel to this liquor, and has hence been complimented with the superior title of English champain.

The steep of Herefordshire are small, affording a fine silky wool, in quality superior to that of the favourite Suffolk breed. The Leminster wool has long been famous, as well as that from the district called Inchinnfield, near Ross. The grain of this fruitful county is not less excellent than its other products. The wheat of its vales, and the barley of its high grounds, are equal to the best in England.

As the employments of agriculture are so successfully followed here, it cannot be expected that the inhabitants should turn their industry to manufactures. The towns of Herefordshire are therefore inconsiderable in that respect.

HEREGATE, or HEREGELD, Saxon; Pecunia seu tributum alendo exercitui collatum.] A tribute or tax levied anciently for the maintenance of an army; similar to our modern Subsidy, which fee.

HEREIN', adv. In this.—My best endeavours shall be done herein. Shakespeare.

HEREINTO, adv. Into this.—Because the point about which we strive is the quality of our laws, our first entrance herintia cannot better be made than with consideration of the nature of law in general. Hooker.

HEREMITICAL, adj. [It should be written eremite,- from eremita, of eremita, a hermit; eremita, eremite, a hermit.] Solitary; suitable to a hermit.—You describe so well your hermitical state of life, that none of the ancient anchorites could go beyond you for a cave in a rock. Pope.

HERENCIA, a town of Spain, in New Castile; forty miles south-east of Toledo.

HERENDITZ, a town of Austria; six miles south-west of Shinn.

HERENTALS, a town of the duchy of Brabant, on the Little Nethe, built in the year 1299, by Henry IV, duke
The duke of Brabant, and surrounded with walls in the year 1400: sixteen miles north-east of Malines, and sixteen east of Antwerp.

HERRENALS (Peter de), a learned ecclesiastic, who derived his surname from Herrenals, in Brabant, where he was born. He became a canon of the regular church of Premontré, and flourished about the year 1534. He was the author of 1. Catena in Pianus Penitentialis. 2. Catena in XV. Canḍa Graduum. 3. Collectaneum in IV. Evangelia. 4. Chronicon ab urbe Condita. &c. And the Lives of popes John XXII, Benedict XII, Clement VI, Innocent VI, Urban V, Gregory XI, and Clement VII, which were published by M. Huntington in 1605.

HEREOF, adv. From this; of this.—Hereof comes it that prince Harry is valiant. Shakespeare.

HERFON, adv. Upon this.—If we should strictly interpret, the possibility might fall into question. Brown.

HEREOUT, adv. Out of this place.—All the words composed of here and a preposition, except hereafter, are obsolete; or obsolecens; never used in poetry, and seldom in prose, by elegant writers, though perhaps not unworthy to be retained. Johnson.

A bird all white, well feather'd on each wing, Here-cut up to the throne of God did fly. Spenser.

HERES (Mount), in Palaestina, situated in Aijalon, in the tribe of Dan: here part of the Amorites fled, after the conquest of Canaan, where they remained impregnable. Judges. 15.

HERKH, [Heb.] A man's name.

HERIESARCH, s. [Heresarchus, Fr. heresiarche, Gr. heresiarch.] A leader in heresy; the head of a herd of heretics.—The pope declared him not only a heretic, but an heresiarch. Sifting feet.

HERESIOGRAPHER, s. A writer of heresies.

HERESIOGRAPHY, s. [from the apostate, Gr. heresiarch, and γραφή, to write.] A treatise of heresies.

HERESIOLOGY, s. [from the apostate, Gr. heresiarch, and λόγος, a description.] A discourse of heresy.

HERESY, s. [heresia, Fr. herésie, Lat. heresia, Gr.] An opinion of private men different from that of the orthodox church.—Let the truth of that religion I profess be repulsed from her judgment, not in the odious disguises of levity, schism, heresy, novelty, cruelty, and disloyalty. King Charles.

HERESY, in law, an offence against Christianity, consisting of a denial of some of its essential doctrines. It seems difficult precisely to determine what error shall amount to heresy, and what not; but the statute 1 Eliz. c. 1, which erected the high-commission court, having reference to this end, as are either determined by scripture, or by one of the four first general councils, or by some other council, by express words of scripture, or by parliament, with the assent of the congregation: these rules are at present thought the best directions concerning this offence. 2 Hatch. P. C. c. 2.

By the common-law, one convicted of heresy, and reduced to abjure it, or falling into it again after he abjured it, might be burnt, by force of the writ de heretics comburendo, which issued out of chancery upon a certificate of such conviction; but he forfeited neither lands nor goods, because the proceedings against him were only pro falute animae. F. N. B. 269. 3 Inq. 43. This writ of 1740, is thought to be regular in the common-law itself. However it appears from thence that the conviction of heresy by the common-law was not in any petty ecclesiastical court, but before the archbishop himself, in a provincial synod; and that the delinquent was delivered over to the king to do as he should please with him; so that the crown had a control of his punishment; and might pardone the convict by issuing no process against him; the writ de hereticis comburendo being not a writ of course, but issuing only by the special direction of the king in council.

But in the reign of Henry IV, when the eyes of the Christian world began to be opened, and the seeds of the Protestant religion took deep root in this kingdom; the clergy taking advantage, from the king's dubious title, to demand an increase of their own power, 9 Stat. 1 Hen. IV. c. 15, which sharpened the edge of persecution to its utmost keenness; for by that statute the diocesan alone, without the intervention of a synod, might convict of heretical tenets; and unless the convict abjured his opinions, or if after abjuration he relapsed, the heretic was bound to the bishop of the diocese, to commit the unhappy victim to the flames without waiting for the consent of the crown. Thus the relentless spirit of persecution was from time to time carried on, and numbers of innocent persons devoted to the flames upon flight or feigned charges of heresy, until the reign of Queen Elizabeth, when the reformation came to be finally established. By Stat. 1 Eliz. c. 14, all former statutes relating to heresy were repealed, which left the jurisdiction of heresy as it stood at common-law viz. to the infliction of common censures, in the ecclesiastical courts; and in case of burning the heretic, in the provincial synod only. 5 Rep. 23. 12 Rep. 36. But the writ de hereticis comburendo remained till in force, and was not abrogated until the Stat. 29 Car. II. c. 9, declared it to be null and void. Thus in one and the same reign our lands were delivered from the slavery of military tenures; our bodies from arbitrary imprisonment, by the habeas corpus act; and our minds from the tyranny of superstitious bigotry, by demolishing this last badge of persecution in the English law. 4 Comm. 46.

It seems to be now agreed, that regularly the temporal courts have no cognizance of heresy, either to determine what it is, or to punish the heretic as such, but only as a disturber of the public peace; that therefore, if a man be proceeded against as an heretic in the spiritual courts, pro falute animae, and think himself aggrieved, his proper remedy is to bring his appeal to a higher ecclesiastical court, and not to move for a prohibition from a temporal one. 25 Hen. VIII. 146. 5 Co. 58. Yet a temporal judge may incidentally take knowledge whether a tenet be heretical or not; as where one was committed by force of Stat. 1 Hen. IV. c. 15, for saying that he was not bound by the law of God to pay tithes to the curate; another for saying, that though he was excommunicated before men, yet he was not so before God; the temporal courts, on an habeas corpus in the first case, and in an action of false imprisonment in the other, adjudged neither of the points to be heresy within that statute, and the king's courts will either take the point, or be ordained by statute. 3 Inq. 42. 2 Bull. 300. In quare impedit, if the bishop plead that he referred the clerk for heresy, it seems that he must set forth the particular point, that it may appear to be heretical to the court wherein the action is brought. 5 Co. 58. 3 Lea. 314.

HERETICAL, s. [from heresia; Gr. here-]

HERETICAL JURISDICTION, in Scotland. The feudal grievance of these jurisdictions is removed by Stat. 20 Geo. II. c. 43. Vide Dalrymple of Fould, 295. See also Stat. 20 Geo. II. c. 50, which abolished the tenure of ward-holding, equivalent to the ancient tenure of knight-ferwice in England.

HERETIC, s. [heretikos, Fr. herétique, Gr.] One who propagates his private opinions in opposition to the orthodox church.—These things would be prevented, if no known heretic or schismatic be suffered. Bacon.

No heretics desire to spread Their wild opinions like these epicsures. Davies.

It is used ludicrously for any one whose opinion is erroneous:

I rather will suspect the sun with cold Than thee with wantonnefs; thy honour stands. Davies.
HERETICAL, adj. Containing here, or.—Conflanta-808
pöle, was in an upshot, upon an ignorant jealousy that
these words had some heretical meaning. *Decay of Priy.
HERETICALLY, adv. With here, or.—
HERETO, adv. To this; add to this.
HERETOCHS, or HERETCHS, f. Among our Sax-
ian ancestors, signified the name with dukes or duces, de-
noting the commanders or leaders of their armies. It
appears, from Edward the Confessor's laws, that the
military force of this kingdom was in the hands of the
dukes or heretochs, who were constituted through every
province and county in the kingdom, being selected out
of the principal nobility, and such as were most remark-
able for being *sapiences, fides, &c: having. Their duty
was to lead and regulate the English armies; and, because
of the great power, lord was to be elected by the people
in their full assembly, or folkomere, in the same manner
as heriffs were elected.
HERETOFORE, adv. Formerly; anciently.—So near
is the connection between the civil state and religious,
that herefore you will find the government and the
priesthood united in the same person. *Swift.
HERFORD, or HERFORDEN, a town of Germany,
in the province of Eastphalia, and county of Ravenberg, Situated on
the Werra and Aë, which divide it into three parts: it
contains about $80 houses, between which are large
spaces and gardens, four Lutheran and one Calvinist
churches, two chapels, and a convent. This town was
formerly imperial, but the troops of Brandenburg compel-
led the inhabitants to pay homage to the elector in
1652. On a mountain near the town stands the abbey
of Herford, a free and secular foundation, erected in 789
or 790. Since the reformation, it has become Lutheran.
HERFILS, a man's name; a philosopher who
wrote the history in elegant Latin. *Locke.
HERICOURT (Louis de), a learned French writer,
born in 1687 at Soissons, where his family had long
been distinguished. He applied himself to the study of
jurisprudence, and was received advocate in the parlia-
mament of Paris in 1712. In 1719, appeared his valuable
work, *Les Lieux Eclefiales de France mis dans leur Ordre
naturel, of which several editions have been given.
The work is much esteemed for its method and clear-
ness. He also wrote a Treatise on the Sale of Im-
moveables by Decree, 4to. an Abridgement of the Disci-
pline of the Church by P. Thomassin, 4to. and other
works. He died in 1755, a character of great work,
and industry. His most famous Works, four
volumes 4to. were printed in 1759.
JULIAN DE HERICOURT, grandfather of the above
named writer, was a man of learning, and principal
*Coroner of the academy of Soissons, of which he wrote
the history in elegant Latin.
HERICY, a town of France, in the department
of the Seine and the Maine, on the Seine: five miles north-
west of Fontainebleau.
HERIOT, f. [heriots, Lat. *heredum, Sax. *heorios
apparatus; from *heer, exercitus, an army, and *efer, *ffufus.
A tribute originally given to the lord of a
manor for his better preparation for war. By the laws
of the Conquest, Edward the Confessor's laws, that the
military force of this kingdom was in the hands of the
dukes or heretochs, who were constituted throughout
the provinces and counties in the kingdom, being selected
out of the principal nobility, and such as were most remark-
able for being *sapiences, fides, &c: having. Their duty
was to lead and regulate the English armies; and, because
of the great power, lord was to be elected by the people
in their full assembly, or folkomere, in the same manner
as heriffs were elected.

especially the pattern of a town or fortresses, to secure those passages which must of necessity be often opened.

HERISTAL. See Hastings.

HERITABLE, adj. [Lat., Fr.] A person that may inherit whatever may be inherited. —By the canon-law this son shall be legitimate and heritable, according to the laws of England. Hale.

HERITAGE, f. [Lat., Fr.] Inheritance; estate devolved by succession; estate in general. The wife man considers that his property alone and heritage be in another world, and therefore regards the events of this with the indifference of a guest that tarries but a day. Rogers. —In divinity; the people of God. —O Lord, save thy people, and blest thin heritage. Common Prayer.

HERITIERA, f. [So named in honour of Charles Louis Heritzer.] In botany, a genus of the class monoand, order monadelphia, (lygenesia, Schreber.) The generic characters are:—I. Male flowers smaller than the females. Calyx: perianthium one-leafed, bell-shaped, five-toothed. Corolla: none. Stamina: in the centre of the calyx, columnar, conic-fabulate, below the tip surrounded by antahes (five to ten), minute, united into a cylinder.—II. Female flowers in the same panicle with the males. Calyx: as in the males. Corolla: none. Stamina: filaments none; antherae ten, inserted into the receptacle at the base of the gomus, two between each, thin, minute, perhaps barren. Filillus: gomus five, semi-ovate, compressed, smooth; styles conical, short, in flowering-time diverging at the tip; digmas club-shaped; Pericarpium: drupes juicicells, spreading very much, oval, flat, smooth; convex underneath, keeled and winged, one-seeded. Seeds: solitary, subglobular, large. This character is formed from dried specimens, compared with Koenig's manuscript descriptions, made from living plants on the spot —Eternal Character. Calyx five-toothed; corolla none. Male. Antherae ten, without filaments. Female. Gomus five; drupes with one subgubular feed.

Heritiera littoralis, or looking-glafs plant, a single species. It is a tree with alternate, oval-oblong, obtuse, perennial, thick, veined, smooth, quite entire, petioled, leaves. Native of the East India islands; found at Ceylon by Koenig, and at Pulico Condore by Mr. David Nefion. Introduced in 1750, by sir Joseph Banks, bart.

HER, a town of Germany, in Welfphalia, and bishopric of Liege: twenty miles north-west of Liege.

HERKEMER, a town of the American States, in Welfphalia, and bishopric of Liege: twenty miles north-west of Liege.

HERISTAL. See Hastings.

HERKEMER, a county of New York, divided into twenty townships, viz. Greenwich, Flats, Warren, Franklin, and Litchfield, formed out of German Flats in February 1796. Herkemer, Fairfieal and Norway, formed out of Fairfield, February 1796. Schuyler. The following were comprehended originally in Whitetown, viz. Paris, Sangerfield, Hamilton, Sherburn, Brookfield, Cazenovia, Wefmoreland, Mexico, Rome, Steuben, and Floyd. By the state census of 1796 this county contains 25,573 inhabitants, of whom 3,966 are electors. It is bounded north by part of Lower Canada and the river St. Laurence; north-west by the east end of Lake Ontario, and the river St. Laurence; south by Otsego county; east by Connecticut, and part of Washington county, HERKEMER, a town of the American States, in the above-mentioned county, situated on the north side of Mohawk river. The township includes the Little German Flats, and the celebrated plain called German Flats; with a court-house, gaol, and a Dutch church. It is eighty miles north-west by west of Albany, sixteen miles west of Fort Schuyler, and is the direct route from White-town. The township is named in honour of general Herkemer, who was mortally wounded in the American war. It contained in 1796, by the state census, 2,073 inhabitants; of whom 338 were electors.

HERKENRODE, a town of Germany, in Welfphalia, and bishopric of Liege; two miles west of Haileit.

HERKLA, or HERAKLA, a town of Africa, in the
kingdom of Tunis, situated on the east coast: fifty miles south of Tunis.

HERLE, a town of the duchy of Limburg: six miles east-north-east of Fauquemont.

HERM (L'), a town of France, in the department of the Upper Garonne, and chief place of a canton in the honour of Hermes, or Mercury. One of them was celebrated by the Phenicians in Arcadia; a second by the Cylileans in Elia; and a third by the Tamagras, where Mercury was represented with a ram upon his shoulder, because he was said to have walked through the city in that manner in time of a plague, and to have stood upon a rock; in memory of which, it was customary at this festival for one of the most beautiful youths in the city to walk round the walls with a ram upon his shoulder. A fourth festival of the same name was observed in Crete, when it was usual for the servants to fit down at the table while their masters waited; a custom which was also observed at the Roman Saturnalia.

HERMÉUM, in ancient geography, a town of Arcadia.—Also a promontory at the east of Carthage, the most northern point of all Africa, now Cape Bon. Litt. HERMAGNÉS, a man's name; a rhetorician who taught at Rome. HERLE, a town of Germany, in Westphalia, and bishopric of Liége, situated near the Meuse: three miles south-south-west of Viset.

HERMAL, a kingdom of the island of Borneo, with a town of the same name, situated near the sea-coast.

HERMAN, [of hre, Sax. an army, and man.] A proper name of men.

HERMAN MESTIZ, a town of Bohemia, in the circle of Chrudim, near which are quarries of different-coloured marble; three miles west of Chrudim.

HERMANCE, a river of Savoy, which runs into the Lake of Geneva at the town of the same name.

HERMAN (James), a Swiss mathematician and divine, born at Basle in 1678. He pursued his studies at the university in his native city; and, having been admitted to the degree of M.A. went through a course of divinity, and was received into the ministry in 1701. His principal attachment, however, was to mathematical studies, in which he profited by the instructions of the celebrated James Bernoulli, and proved one of his most distinguished disciples. So early as the year 1700, he had become such a proficient, that he produced an able defence of the principles of the differential calculus, against the objections of the famous Nieuwentynt; in a piece entitled Refponfio ad Confidcrations Jecundae celeberrimi Hermanni, circa principia Calculi differentiales. He travelled for improvement through Germany, Holland, England, and France; and on his return to Basle, he devoted himself with renewed ardour to the mathematical sciences. In 1707, upon the recommendation of M. Leibnitz to the curators of the university of Padua, he was appointed mathematical professor in that seminary; in 1708 he was chosen a member of the Institute at Bologna, and in 1710 of the Academy of Sciences at Berlin; from whence he removed to Frankfort on the Oder, where M. Leibnitz had obtained for him the chair of mathematical professor or from the king of Prussia. Here he published, in 1716, De Phoronumia, five de Viribus Atmofphariam trajicimtium, &c. Besides the pieces already enumerated, he was the author of, 1. Difputatio disput. de curvatura radiorum Pifarum, 4to. 2. De nova Acceleratione Lege, quid gravitas versus Terram feratur, 8vo. 3. Difputatio de Vibratis in Chordarum tenforum. 4. Solatio Problennatis de Trajectoriarum Curvarum inventione.

HERMANN (Paul), an eminent botanist, native of Halle in Saxony. He profecuted physic in the island of Ceylon, and at the Cape of Good Hope, and in 1679 was made professor of botany at Leyden, and curator of the botanical garden. He obtained great reputation in the science, and died in 1713. His catalogue was a Catalogue of the Plants in the University Garden, printed in 1657, 8vo. in which are described several new and rare species, with figures. His Flos Lagunae-Batavae flora, printed under the name of Zumbach, in 1696, contains his method of botanical classification, which was founded upon the nakedness of the seeds, or their enclofure in the seed-veffels. The method of Boerhaave deviated little from that of Hermann. His Paradys Batavus, continens plus centum Plantas officinarum aeri incfas, 4to. 1698, was a poihumous work, edited by Sherard. The other works of this author are: 1. Mufci Indici Catalogus, continens varin Exotica Animalia, Infidias, Vegetabilia, Mineralia, 1711, 8vo. 2. Lapis Lydias Materna medica, 1704, 8vo. in this the new characters of plants established by Hermann are applied to illustrate their medicinal properties. He left at his death four hundred and fifty very fine drawings prepared for a Museum Cylum: and also a vaft collection of dried plants, which served for the basis of the Flos Cylumae of Linnaeus. His new and rare vpecies of Plants of the Cape of Good Hope, with drawings of several; but they have been unfortunately lost to the public.

HERMANNIA, f. [named by Tournefort, in memory of the above-mentioned Paul Hermann.] In botany, a genus of the clafs monadelphia, order pentandria, natural order of commonmiffes, (tiliaceae, Juss.) The generic characters are—Calyx: perianthium one-leaved, five-cleft, roundish, inflated, the little clefts bent in, permanent. Corolla: pentapetalous, spiral against the fun; claws the length of the calyx, with a little membrane on each side converging into a cowled nectarious tube; broad spreading, broadish, blunt. Stamina: filaments five, broadish, very slightly coalescing at bottom into one body; antherae upright, acuminate, converging. Pistillum: germ roundish, five-fided, five-cornered; styles five, filiform, approximating, subulate, longer than the stamina; stigma simple. Pericarpium: capsule roundish, five-fided, gaping at the top. Seeds: very small, egg-shaped, glossy.—Essential Character. Styles five; capitule five-celled; petals semi-tubular at the base, oblique.

Species. 1. Hermannia althaeifolia, or marsh-mallow-leaved hermannia: leaves ovate, crenate, pilatcd, tomentofo; flowering calxes bell-shaped, angular; flIules oblong, leafy. This seldom rises more than two feet and a half high; the branches are soft and slender. The flowers are produced in loose panicles at the ends of the branches; they are
HERMANNIA.

H. capillaris, or planted-leaved hermannia: leaves cordate-ovate, toothletted, plaited, tomentose; flowering calyxes oblong-ovate, sublyrical. Found at the Cape by Mr. Maslin, and introduced in 1774. It flowers in November and December.

3. Hermannia candicans, or white hermannia: leaves ovate, subcordate, blunt, tomentose; flowering calyxes subample, serrate-serrate; flowers drooping. This also was found at the same place by Mr. Maslin; and was introduced at the same time. It flowers from April to June. The whole plant is covered with a very white down; the leaves are ferrate, except near the base.

4. Hermannia falvifolia, or sage-leaved hermannia: leaves oblong-lanceolate, tomentose, wrinkled underneath, the lower ones truncate and toothletted; calyxes pinnatifid; and angular. Found at the Cape by Mr. William Paterfon, and introduced in 1780 by the countess of Strathmore. It flowers most part of the year.

5. Hermannia alnifolia, or alder-leaved hermannia: leaves linear; peduncles one-flowered. - Native of the Cape of Good Hope.

6. Hermannia triquera, or three-notched hermannia: leaves lanceolate, unequal, ferrate, crested; flowers drooping. Found at the Cape by Thunberg.

7. Hermannia plicata, or plaited-leaved hermannia: leaves wedge-shaped, marked with lines, plaited, crested-emarginate. The leaf is shown on the Botany Plate IV. fig. 33. and the perianthium, Plate VIII. fig. 2.

8. Hermannia odorata, or sweet-scented hermannia: leaves oblong-lanceolate, tomentose, wrinkled underneath, the lower ones truncate and toothletted; calyxes pinnatifid, and angular. Found at the Cape by Mr. William Paterfon, and introduced in 1770 by the countess of Strathmore. It flowers mott part of the year.

9. Hermannia hylophyllos, or hylophorous hermannia: leaves ovate, truncate, blunt, and marginatay; flowering calyxes oblong-ovate, sublyrical; petals subulate. Found in a terminating raceme, alternate, hanging down, mostly solitary. Pedals blue, leaves ciled and covered with hairs.

10. Hermannia lavendulifolia, or lavender-leaved hermannia: leaves lanceolate, pinnatifid; petals entire and gashed; stems upright, even. 20. Hermannia diflusa, or diffuse hermannia: leaves lanceolate, pinnatifid; petals entire and toothed; peduncles capillary, two-flowered; stems procurrent. Found at the Cape by Thunberg.

11. Hermannia herba, or herbute hermannia: leaves simple and ferrate, hirsute, sessile. This rises with a hairy stalk about two feet high, sending out many side branches, which grow very erect. Leaves oblong, veined, orile, or in threes; in the latter case the middle leaf is largest. The flowers are produced towards the end of the branches; they are large, and of a deep yellow colour, with large, swollen, hairy, calyxes.

It continues flowering most part of the summer. Mr. Miller raised this from seeds which came from the Cape of Good Hope.

Propagation and Culture. These plants are all propagated by planting cuttings of them, during any of the greater part of the year. This is done in pots filled with light fresh earth, into which they are set, but so as not to be crowded. They are afterwards set in a shady situation till they have taken fresh root; after which they may be exposed to the open air, with nurseries, geraniums, &c. until the middle or end of October, when they must be removed into the green-house, observing to place them in the coolest part of the house, where they may have as much free air as possible; for, if they are too much drawn in the house, they will appear very faint and sickly, and seldom produce many flowers; whereas, when they are more freely exposed to the fresh air, and have a great share of free air, they will appear strong and healthy, and produce large quantities of flowers in April and May, during which season they make a very handsome appearance in the green-house: they must also be frequently watered, and will require to be new potted at least twice every year, i.e. in May and September; otherwise their roots will be fo matted, as to prevent their growth.

These plants rarely produce good seeds with us, except in the ninth and twenty-first fortnights, which ripen their seeds every year in England; the others rarely producing any, which may be accounted for by their having been long propagated from cuttings; for those plants, which
which have been raised from seeds have been fruitful two or three years after, but those plants which have been propagated by cuttings taken from these, have soon become barren: the same thing may be observed in many other plants; therefore those who are desirous to continue their plants fruitful, should constantly raise them from seeds. These, as all those which are obtained in this way, must be grown upon a moderate hot-bed; and when the plants come up, they must be planted into small pots, and plunged into another very moderate hot-bed, in order to promote their rooting; after which they must be hardened by degrees, to endure the open air in summer, and may then be treated as the old plants.

HERMANNIA PINNATA. See Mahernia.

HERMANNBURG, a town of Germany, in Lower Saxony, and principality of Luneburg Zell: fifteen miles north of Zell.

HERMANNST, a town of European Turkey, in the province of Romania: thirty-four miles west-north-west of Adrianople.

HERMANNSTADT, or Szebeny, a free town of Transylvania, and capital of that country, fortified with a double wall and a deep moat; it is situated on the side of the Szeben, which soon after runs into the Aluta: 147 miles north-east of Belgrade, and 300 south-east of Vienna. Lat. 46. 15. N. Lon. 41. E. Ferro.

HERMANNST (Godfrey), a learned French ecclesiastical writer, born at Beauvais in 1617. He exhibited early evidence of excellent natural abilities; and before he was thirteen years old, M. Augustin Potier, bishop of Beauvais, sent him to Paris, to study rhetoric under the Jefuits. He obtained the degree of bachelor of divinity in 1649; was admitted a member of the society of the Sorbonne in 1642; and was promoted to a canonry at Beauvais in 1643. In 1644 he was chosen prior of the Sorbonne; and two years afterwards admitted licentiates, and nominated rector of the university. He died at Paris in 1690, in the seventy-fourth year of his age. His principal works were, 1. A Translation of St. Chryfodom's Treatise on Providence, 1658, 12mo. 2. The Life of St. John Chryfodom, under the name of Menar, 1664, 4to. 3. The Life of St. Athanafius, 1671, 2 vols. 4to. 4. A Translation of the Afcetics of St. Basil, with Remarks, 1673, 8vo. 5. The Lives of St. Basil, and St. Gregory Nazianzen, 1674, 2 vols. 4to. 6. The Life of St. Basil, 1678, 4to. 7. A Life of St. Jerome, written on St. Matthew and St. Mark, 1690, 3 vols. 12mo. 8. Clavis Difciplinae Ecclefiæ, seu Index universalis totius juris Ecclefiatici, 1693, folio.

HERMANT (John), a French ecclesiastic, born at Caen in 1590. In 1655 he was preferred to the benefice of Malrot, in the diocese of Bayeux, and died there in 1725. He was the author of numerous works, the principal of which are, 1. The History of the Councils, 4 vols. 12mo. 2. History of the Establishment of the religious Orders, and of the regular and secular Congregations of the Church, 2 vols. 12mo. 3. History of the Military Orders of the Church, and of the Orders of Chivalry, throughout Europe, 2 vols. 12mo. 4. History of Heresies, 4 vols. 12mo. 5. History of the Diocese of Bayeux, 4to, together with Sermons, Homilies, &c.

HERMAPHRODITE, f. [hermaphrodiz, Lat. from Herm. Mercury, and Aphrod. Venus.] Any being partaking of both sexes; for the physiology of which specific of his nature, see the article Anatomy, vol. i. p. 623, and the correpodent Engraving.—It is laid down at common law, that, as hermaphrodites partake of both sexes, they may give or grant lands, or inherit as heirs to any, and shall take according to the prevailing lex. Co. Litt. 2, 7.

HERMAPHRODITE, adj. In botany, the term hermaphrodite is applied to all those plants as have both the male and female parts of fructification on the same flower.
many-leaved, lanceolate, short, permanent; partial of one or two leaves, lanceolate, the length of the partial umbel, of a more wiry nature, emarginate, five-toothed. Corolla: universal Rosaceous; of the proper, petals five, oblong-obovate, upright, flat, entire, equal. Stamina: filaments five, filiform, shorter than the petals; antherae barren, oblong. Filifillum: germ inferior, compressed, larger than the corolla; styles two, filiform, upright, longer than the corolla; stigmae obtuse. Pericarpium: manner. Fruit orbicular, margined at the base, gaping at the angles. Seeds: two, cordate-ordicular, compressed, flat, margined, marked with a single longitudinal elevated fissure. 1. Male, umbo lateral, later, of the same plant. Calyx: umbel universal as of the hermaphrodites; partial many-rayed; the rays all flower-bearing; involucres as in the hermaphrodites; perianthium scarcely any. Corolla: as in the hermaphrodites. Stamina: filaments five, filiform, length of the corolllet; antherae pollen-bearing, oval, nearly twin.—Essential Character. Hermaphrodite, umbel terminating; involucres universal and partial; umbels with truncate rays, the central one biserous; petals five; stamina five, barren; seeds in pairs, subsessile. Male, umbo lateral, with universal and partial involucres; umbels many-flowered; petals five; stamina five, fertile.

Species. 1. Hermas depauperata, or naked hermas: stem thrusty; leaves oblong, embracing, toothed, villose. 2. Hermas gigantea, or large hermas: leaves lanceolate-ovate, lanuginose above, underneath tomentose, entire. Leaves radical, petioled, obtuse crenate, a foot in length and a span in breadth, the upper surface villose, the lower very cloely white-tomentose. Stem four feet high, with a small leaf or two towards the lower part. The wool scraped from the leaves is used for that which the Cape of Good Hope, as that from Armenia is in China and Japan. 3. Hermas capitata, or capitate hermas: stem tomentose; leaves subcordate, serrate; umbels capitata. Leaves petioled, radical, bluntish, an inch long, veined, white-tomentose underneath. Scape leafless, pubescent, half a foot high. 4. Hermas quinquedentata, or five-toothed hermas: stem smooth; leaves ovate, five-toothed, tomentose underneath, umbel solitary. This is very distinguishable from the rest by its small leaves, with five nice deep ferratures.

5. Hermas ciliata, or ciliate hermas: stem smooth; leaves ovate, ciliate, tomentose underneath, umbels several. This, with all the rest, are natives of the Cape of Good Hope; where the two last were discovered by Thunberg. For the Propagation and Culture, see Buckwheat. 5. HERMA THENA, A. A statue which represented Mercury and Minerva in the same body. This statue was generally placed in schools where eloquence and philosophy were taught, because these two deities presided over the arts and sciences. 6. HERMES BACH, A town of Germany, in Weifphalia, and distant of Julifers; seventeen miles south of Julifers. Lat. 50.42. N. Long. 24. 2. E. 7. HERMS DORF, A town of Germany, in the district of the Puy-de-Dome, and chief place of a canton, in the department of the Puy-de-Dome, and chief place of a canton.
HERMIS'ANAX, an elegiac poet of Colophon, son of Agonetus; who, for his writings, was publicly honored with a statue. Pausanias.

HERMIS'TA, J., in botany. See Browne.

HERMIS'TIC, or HERMETICAL, adj. [from Hermes Trismegistus, the imagined inventor of chemistry; hermetique, Fr.] Chemical. An hermetical seal, or to seal anything hermetically, is to heat the neck of a glass bottle or jar till it is just ready to melt, and then with a pair of hot pincers twist it close together. Quincy.

HERMETICALLY, adv. According to the hermetic or chemical art. He suffered those things to putrify in hermetically-sealed glasses, and vessels close covered. Bentley.

HERMETRA, one of the smaller western islands of Scotland, a little to the north-east of North Rona.

HERMENEBIL, a town of France, in the department of the Meuse, and chief place of a canton, in the district of Eftain; two leagues and a half from Verdun, and three-quarters south-west from Eftain.

HERMANI, or HERMANI'TES, a sect of heretics in the second century, thus called from their leader Hermias. They were also denominated Seleucians, or Seleucians.

HERMIAS, the founder of the sect called Hermianites, and sometimes Seleucians, after Seleucus, who taught the same opinions. Hermias concurred with Hermogenes concerning the eternity of matter; maintained that God himself is material, in the same sense with the souls; and with them he also agreed in opinion concerning the nature of the soul. He denounced the use of water in baptism; and denied the doctrine of the resurrection, in the sense received by Christians in general, holding that the succession of one generation to another, by the entrance of human beings into the world, is the only resurrection, &c.

HERMIAS, a Christian philosopher, who lived at an early age of the church; but in what country, and at what precise time, cannot now be ascertained. Some have thought him a writer of the fourth or fifth century, and Lambecius has advanced the conjecture, that he was the same person with Hermias Sozomen, the ecclesiastical historian, who flourished under the reign of the younger Theodosius. Cave, Dupin, and Lardner, have placed him in the last year of the second century; which is certainly the most rational conjecture. The work which has transmitted his name to posterity, is entitled Hermias's Riddle of the Gentile Philosophers. It contains no incoherent composition of the Greek philosophers, and with great ability, the discordant opinions of the philosophers, concerning God, the soul, &c. It was first printed in Greek and Latin, at Basile, in 1553, and was corrected by Fronten de Duc, in the first volume of his Exegetum. The best edition of it was published by William Worth, at Oxford, in 1700, 8vo, together with Tatian's Oration to the Greeks, and illustrated with notes by the editor, as well as those of the learned Dr. Thomas Gale.

HERMIN'UM, /. in botany. See Ophry's Monochis.

HERMIN'IUS, a man's name; the name of several illustrious men of antiquity.

HERMIONE, a considerable city of Argolis. It was in ruins in the time of Pausanias; who says that the new city was at the distance of four stadia from the promontory on which the temple of Neptune stood. It gave its name to the Sinus Hermionicus, a part of the Sinus Argolicus.

HERMIONE, in mythology, the daughter of Mars and Venus, who married Cadmus. The gods, except Juno, honored her nuptials with their presence; and she received, as a present, a rich vest and a splendid necklace which had been made by Vulcan. She was changed into a serpent with her husband Cadmus, and placed in the Elyrian fields. Ovid.—Also the name of a daughter of Menelaus and Helen. She was privately promised in marriage to Orestes the son of Agamemnon; but her father, ignorant of this pre-engagement, gave her hand to Pyrrhus the son of Achilles, whose services he had experienced in the Trojan war. Pyrrhus, at his return from Troy, carried home Hermione and married her; but Hermione, tenderly attached to her cousin Orestes, looked upon Pyrrhus with horror and indignation. According to others, however, Hermione received the addresses of Pyrrhus with pleasure, and even reproached Andromache, her concubine, with fealing her affections from her. Her jealousy of Andromache, according to some, induced her to unite herself to Orestes, and to destroy Pyrrhus. She gave herself to Orestes after this murder, and received the kingdom of Sparta as her dowry. Homer.

HERMION'IUS, in ancient geography, a city near the Riphean mountains.

HERMIONICUS SIMUS, a bay on the coast of Argolis, near the city of Hermione.

HERMIPPUS, a freed-man, disciple of Philo, in the reign of Adrian, by whom he was greatly esteemed. He was the author of five books upon dreams.

HERMIT, f. [hermite, Fr. contraced from hermitage, square, Gr.] A solitary; an anchoret; one who retires from society for contemplation and devotion: A wither'd hermit, fivescore winters worn, Might shake off fifty, looking in her eye. Shakespeare.

A headman; one bound to pray for another. Improper.

For thofe of old, And the late dignities head'd up to them, We reft your hermits. Shakespeare.

Paul the Egyptian, surnamed the Hermit, is said to have been the first who thus secluded himself from the society of his fellow men. The cause is thus stated by Milner, in his History of the Church of Christ:—"In the Lower Thebais, during the persecution of Decius, there was a young man named Paul, to whom, at fifteen years of age, his parents left a great estate. He was a person of much learning, of a mild temper, and full of the love of God. He had a married sister, with whom he lived. Her husband was base enough to design an information against him, in order to obtain his estate. Paul, having notice of this, retired to the desert mountains, where he waited till the persecution ceased. He lived at length made solitude agreeable to him; he found a pleasant retreat, and lived there four-score and ten years. He was at the time of his retirement twenty-three, and lived to be 113 years old. This is the third distinct account of an hermit in the Christian church."—Such seems to have been the circumstance which in subsequent times gave rise to the various orders and congregations of religious distinguished by the title of hermits; as, the hermits of St. Paul, of St. Augustine, of St. John the Baptist, of St. Jerome, &c. all of whom had hermitages erected in recluse situations, annexed to some large abbey, and of which the superior was called hermita.

HERMIT'S BAY, a bay of the island of St. Christopher, on the north coast, a little to the south of Mada'in's Point.

HERMIT'S ISLANDS, a cluster of small islands on the south coast of the island of Terra del Fuego.

HERMITAGE, /. [hermitage, Fr.] The cell or habitation of a hermit.—About two leagues from Fribourg we went to see a hermitage: it lies in the prettiest solitude imaginable, among woods and rocks. Addison on Italy.

Then may at last my weary age
Find out the peaceful hermitage.
The hairy gown and mossy cell
Of every star that heaven doth throw.
And every herb that sips the dew.
—Milton.

HERMIT, f. A hermit.

HERMITAGE, a hill of France, on the side of the Rhone, opposite Tournon, celebrated for the wine made from its vineyards.

HERMITIAN, n. A chapel or oratory belonging to a hermitage.

HERMOCRATES, a man's name; a famous sophist.

HERMODACTYLUS, f. [from Ἡρμόδακτυλος, Mercury, and δακτύλος, Gr. a finger; or more justly from Hermes, a river in Asia, upon whose banks it grows, and dactylus, Lat. a date, which it resembles; the Arabsians call it two years after Hermes, the date of his finger.] In the materia medica, a root brought from Arabia, and formerly of great repute among the ancients as a cathartic. It is the root of the Arabian variety of the Iris foemintia, which see.

HERMODACTYLUS, f. In botany. See Iris.

HERMODORUS, a man's name; a scholar of Plato.

HERMOGENES, [Greek.] A Scripture name. 2 Tim.

HERMOGENES, the first and most celebrated architect of antiquity, born, according to Vitruvius, at Alabaia, a city of Caria. He built a temple of Diana at Magnesia; another of Bacchus at Tros; and was the inventor of several parts of architecture. He composed a treatise called the seven books, which has been long lost.

HERMOGENES, a celebrated rhetorician, in the second century, the best editions of whose Rhetorica, are that of Sturmius, 3 vol. 12mo. Argent. 1571, and Laurentius, Genev. 1614. He died A.D. 161, and it is said that his body was opened, and his heart found hairy, and of an extraordinary size. At the age of twenty-five, as is reported, he totally lost his memory.

HERMOGENES, a heretic of the second century, whose creed was a compound of Stoicism and Christianitv, flourished in Africa in the reign of Marcus Antoninus, who died in the year 180. He was educated in the Christian faith; but with his Christian principles, he combined the doctrine of the Stoics, concerning the eternity of matter, and the materiality of the Supreme Being. In this he adopted the tenets of Hermes and Silenes; whence his followers were frequently clasped with them. We are still in possession of a work written with them. They are still in possession of a work written by Tertullian, the chief design of which is to confute the leaders of the heretics of Africa, for the purpose of averting the same productions of that country. He formed a great collection of figures of plants and other objects at a vast expense, and wrote an account of their nature and properties; and his work was published in the Spanish language at Mexico, in 1615, by Francis Ximenes, and under his name. The manuscripts of Hernandez were afterwards purchased by Francis Celi, head of the academy of Lyncei; and at length there appeared at Rome a work entitled Historia naturalis Nova Hispaniae seu Mexicana, by F. Hernandez, a Nardo Antonio Reecho digesta, cum notis & additis, 4to. fol. 1651. folio. This work laid the foundation of the science of botany in the American climates of America to Europeans. Of the ten books, eight relate to botany. The original papers and drawings of Hernandez perished in a fire of the Escurial. To this author is ascribed a history of the church of Mexico, and other performances.

HERNANDÉZ (Francis), a celebrated botanist, physician to Philip II. King of Spain, was sent into Spanish America, for the purpose of ascertaining the productions of that country. He formed a great collection of flowers by pairs, lateral in each umbel. Calyx: involucre partial, four-leaved, three-flowered; leaflets ovate, obtuse, spreading very much; perianthium none. Corolla: petals six, subovate, spreading; the three inner ones narrower; stamens six, filand, round-headed, placed

HERNANDEZ, Francis, a celebrated botanist, physician to Philip II. King of Spain, was sent into Spanish America, for the purpose of ascertaining the productions of that country. He formed a great collection of flowers by pairs, lateral in each umbel. Calyx: involucre partial, four-leaved, three-flowered; leaflets ovate, obtuse, spreading very much; perianthium none. Corolla: petals six, subovate, spreading; the three inner ones narrower; stamens six, filand, round-headed, placed
round the filaments. Stamina: filaments three; shorter than the petals, inserted into the receptacle; anther: upright, oblong, large. II. Female flower intermediate. Calyx: involucre common with the males; perianth, petaloid, bell-shaped, entire, petitioned (inflated, Gartner.) Corolla: petals eight, of which four are interior and narrower, all sitting on the germ; (petals, fix, G.) nectarary, glands four, obovate, alternate with the interior petals. Pitillum: germ roundish; style filiform; stigma oblique, somewhat funnel-shaped, large. Pericarpium: drupe dry, ovate, eight-surfaced, inequilaterally, included in a very large, inflated, roundish, fleshy, coloured perianth, with the mouth entire. Seed: nut globular, slightly depressed.—Essential Character. Male. Calyx, three-parted; corolla, three-petalled. Female. Calyx, truncate, quite entire; corolla, fix-petalled; drupe hollow, with an open mouth, and a moveable nucleus. (Nur superior, clothed with the calyx inflated; seed globular, bony, Gartner.)

Species. 1. Hernandia foronora, or whirling hernandia: leaves peltate. This is an upright lofty tree, with an elegant head. The flowers are of a pale yellow colour, in panicked racemes; the calyces of the fruit are yellow. It is very common in the West Indies, in gulleys, near hills of water; the English there call it Jack-in-the-box, and the French, myrodon. If it be Rumphius's plant, it is also a native of the East Indies. It has also been found by the late circumnavigators in the Society and Friendly islands. Dr. Patrick Browne says, it is common in Barbadoes and Montserrat, where it grows to a considerable size; but that he had not seen it in Jamaica, though he had been credibly informed that it is frequent in the parishes of Portland. He attributes the whirling noise to the cups that sustain and partly envelope the nuts; these, he adds, are very large, and as they move in the wind, produce sound enough to alarm unwary travellers. The seeds are very oily. It was cultivated in 1714, by the duchess of Beaufort.

2. Hernandia ovigera, or egg-fruiting hernandia: leaves ovate, petioled at the base. Gartner thus describes the fruit from a specimen in the collection of Sir Joseph Banks: It is a nut, within the enlarged, membranaceous, inflated, calyx; in substance coriaceous and hard; in form from a swelling base narrowing upwards like a pitcher; marked with eight prominent ribs, and a convex knob, ending at the top in eight swellings or ripples; black, smooth, not opening by valves; shell larger than the seed, very thick and spongy near the knob, in other parts thin, separate all round from the seed, and filled with a thin cellular substance. Seed one, large, globular, (lightly depressed. Calyx: perianth one-celled; capsule: drupe dry, ovate, eight-surfaced, one-celled, the seeds again irregularly into several other smaller ones; the cotyledons, when ripe, adhere together pertinaciously, the interior and narrower, all fitting on the germ; (petals fix, five, the sepals of the preceding species, the basipetal.) Pericarpium: capsule small, in the bottom of the calyx, covered, scarcely gaping. Seed: solitary, ovate-acuminate, shining.—Essential Character. Calyx, five-parted; corolla, none; stamens, five, barben, besides the fertile ones; capsule one-seeded.

Species. 1. Hernandia glabra, or smooth rupture-wort: herbaceous, and smooth. This species is chiefly distinguished from the second by the smoothness of the habit. The flanks are trailing and many, forming a little tuft, the length of a finger, or at most six inches, round, with many alternate branches. Leaves ovate-lanceolate, something like those of wild thyme, opposite, sessile or sub-sessile, smooth, bright green, quite entire, sharpish at the habit, the lanceolate or linear lamina, with a roundish base, one to a half in length, and above a line in breadth. Flowers axillary, glomerate, sessile, fix or eight together, at the joints of the stem and branches. Seed dark-purple, shining, deeply emarginate at the top. According to Scopoli, the flowers are usually solitary, and on short peduncles. It is common in Switzerland in sandy soils, in Sweden, Denmark, Germany, France, Italy, Carriola; with us in England, at the Lizard Point, Cornwall; flowering in July. This plant was formerly in some reputation, not only for curing ruptures, but the stone gravel, and dropsy; it was also given in disorders of the eyes. It has now fallen into utter disuse. Withering and Parkinson say, it is insitious and astringent; increases the secretions by the kidneys; and that the juice takes away fecks in the eye. According to Krokker, it is agreeable to the sheep.
the same opinion before; and Dr. Stokes follows the great judges; Trew also has made one specie of them. But publicence is certainly an equivocal specific distinction. Haller acknowledges the genus, but Dr. Stokes affirms that they are not more difficult than those of the smooth sort. Pollich adds, that it is of a darker green colour. Whether specifically different or not, it is easily known by the whole plant being hairy. It is a native of Germany, Swiflerland, Italy, Carmolat; and with us has been found by Colesy-Hatch, near Barnet. It flowers in July and August.

3. Herniaria fruticosa, or shrubby rupture-wort: stems shrubby, flowers four-cleft. Remembles the last both in leaves and flowers. It is a native of Spain.

4. Herniaria lenticulata: stems somewhat shrubby; leaves ovate-oblong, hairy. In habit it approaches very near to common hernia, but is very soft. Linneus had not seen the flowers, but received the character of the fructification from Aymen. It is a native of the East Indies, and the Cape of Good Hope; and is said to have established itself in Spain and the south of France.

Propagations and Culture. The two first, being annual plants, must be permitted to their seeds, whereby they are better preferred than if wont. The third, being perennial, may be propagated by cuttings; but, as none of them are plants of any beauty, they are rarely preserved in gardens. See Buxonia, Illecebrum, Patertia, and Polychnemum.

HERNICKI, in ancient geography, a people of Campania, celebrated for their inconstant enmity to the rising power of Rome.

HERNIOUS, adj. [from herina, Lat.] Belonging to a hernia; afflicted with a rupture.

HERNOSAND, or HERNOSUND, a feaport town in Sweden, in the province of Angermania, situated on an illa. On the Gulf of Bothnus, divided from the continent by a narrow channel, over which a bridge is thrown. On the north side of the harbour the water is deep enough for the largest vessels to come up and unload at the warehouses. Hernosand was formerly a staple town, and has still a considerable trade, especially in linen. In the years 1719, 1743, and 1749, this town was burned by the Russian fleet. N. B. There is another place called Hernia, in Catalonia.

HERNSHAW, or HERNSHAW, f. [probably contracted from heronshaw.] A heron. —I know a hawk from a heronshaw. Shakespeare.

As when a calf of fuetons make their flight
At an heronshaw, that lies aloft on wing,
The whyles they strike at him with heedleffe might
The warie foule his bill doth backward wring.
Spenser.

Upon whose tops the heronshou bred her young,
And hoary mo He upon their branches hung.
W. Browne. 

HERO, f. [heros, Lat. tæos, Gr. i.e. semi-deus, or demi-god.] A man eminent for bravery:

These are thy honours, not that here thy bill
Is mix'd with heroes, or with kings thy duk.
Pope.

A man of the greatest acquisitions in any pursuit; as, a hero in learning.

The Greeks and Romans not only erected columns and other monuments over the tombs of their heroes, but exhibited a kind of worship in honour of the names both of their heroes and heroines. They worshipped, however, between the worship paid to their heroes, and that solemnly offered to their gods. The former was only a kind of funeral honour, in which they celebrated their exploits, and rehearsed their battles and heroic

achievements, in which they hoped their rising youth might emulate them. But in their religious worship they prostrated themselves before the deity, to implore his protection; thanked him for his favours, and acknowledged their low condition and dependance. Prayers were addressed to the deity at the commencement of every undertaking. These were offered up in the morning and in the evening, at the rising and the setting of the sun and moon; sometimes they preferred themselves, at the temple with devout eyes and united devotion; others, when they lifted the ground; and they offered up their prayers standing, on their knees, and prostrate; and holding branches in their hands, which they lifted up towards heaven, or extended towards the statue of the god, after applying it to their months. When their worship was directed to the infernal deities, they struck the earth with their feet or hands; when to their ancestors, it was to invoke them to infiit into their hearts and minds a similar portion of courage, fortitude, and perseverance, in all their warlike conflicts and enterprises. See Hom. IIad. 9, v. 564.—The origin of placing heroes among the constellations, might have arisen from the opinions of the ancient philosophers, who taught that the souls of great men were often raised to the stars, and introduced among the immortal gods. According to the notions of the ancients, the ancient heroes inhabited a pure and fenere climate, situated above the moon.

HERO, a beautiful priestess of Venus, at Sellos, greatly enamoured of Leander, a youth of Abydos. These lovers were so faithful to one another, that Leander in the night escaped from the vigilance of his family, and swam across the Hellespont; while Hero in Sellos directed his course by holding in her hand a burning torch, on the top of a high tower. After many interviews of mutual affection and tenderness, Leander was drowned in a tempestuous night as he attempted his usual course, and Hero in despair threw herself down from her tower and perished in the sea. Virg. G. 3. v. 258. —The mutual affection of these lovers has furnished the substance of a favourite romance, which bears their names.

HERON, the name of two celebrated ancient mathematicians, whose works have reached modern times, and who are distinguished from each other by the epithets elder, and younger. The first was a native of Alexandria, in Egypt, and the disciple of Ctesibius, who flourished under the reigns of Ptolemy Philadelphus, and Euergetes. He distinguished himself by his skill in mechanics, and particularly in the construction of machinery. He wrote a treatise De Construktioni & Mensura Manubalijla, of which a fragment was first published in Greek, by Bernardino Baldi; and it was afterwards printed, accompanied with a Latin version, and plates, in the grand Louvre edition of The ancient Mathematicians, printed in 1693, folio; De Telis Conjiciendis & Tolerandis, published with a version and notes, by Frederic Commandine, in 1575, and to be found in the Louvre collection; and De Automato- rum Fabricia, Lib. II. of which an Italian version was published by Baldi, in 1590, 4to. and the original Greek, accompanied with a Latin version, was given in the Louvre collection.

The younger Hero is placed under the reign of the emperor Heraclius. He was the author of, 1. De Machinis Bollatis, Liber, of which Francis Barocci published a Latin version, with notes, in 1572, 4to. 2. Geodafus, translated into Latin, with notes, by Barocci, and annexed to the preceding. 3. Liber de Oblatione Repellenda & Toleranda, published in Greek, at the Louvre, in 1650, and to be found in the collection of The Ancient Mathematicians. 4. De Vocabulis Geometricis & Stereometricis, published in the original Greek, and separately in Latin, with the first book of Euclid's Elements, by Conrad Dasypodius, at Strauburg, 1571, 8vo. In 1688 the Benedicines pub-
HEROD (South), an island in the same lake, belonging to Chittenden county, Vermont, is a township and port of entry, and contains 537 inhabitants. It is fourteen miles long, and three and a half broad. Numerous small isles surround the Heroes. This island produces good crops of wheat and other grain. In it is a quarry of bluish-grey marble, which has the appearance of being a petrification of calcareous, a species of shell common in the vicinity of the lake, together with the common earth of the shore, which is of a marly substance.

HEROD (furnamed the Great, or the Alcalonite), king of the Jews, second son of Antipater the Idumaean, born in the year 71 before Christ. At an early age he was made governor of Galilee; and in the civil war between the republican and Cæsarian parties, Herod, with his elder brother Phasael, joined the Roman general Cassius, and was made governor of Cœle-Syria. When Marc Antony arrived victorious in Syria, Herod and his brother found means to ingratiate themselves with him, and were appointed to govern Judea as tetrarchs; but an invasion of Antigonus, son of Ariobarzus, who was favored by the Jews, obliged Herod to make his escape from Jerusalem, and retire into Idumea, and then into Egypt. His brother Phasael, who was made prisoner, put an end to his own life. Herod escaped to Rome, where he was received with great kindnese by Antony, and nominated by the senate to the crown of Judea. He had, however, his way to the throne, which was in possession of Antigonus. He marched against him, and, acting with great vigour, recovered all the country to the walls of Jerusalem, to which, with the assistance of a Roman army, he held siege. Meantime, he conterminated his marriage with Mariamne, grand-daughter of Hyrcanus, of the royal Asmonean family, to whom he had long been betrothed; Jerusalem, after a siege of six months, was taken by form; and Antigonus was made prisoner by Herod, who thus gained possession of his kingdom before Christ 37. When the war broke out between Marc Antony and Augustus Cæsar, Herod raised an army for the purpose of joining the former; but he was obliged first to engage with Malchus, king of Arabia, whom he defeated, and then to sue for peace. After the battle of Actium, his great object was to make terms with the victor. His preliminary step was to put to death the aged Hyrcanus, the only surviving male of the Asmonean family. He then embarked for Rhodes, where Augustus at that time was. He appeared before the master of the Roman world in all his regal ornaments except his diadem; and with a noble confidence related all the faithful services he had performed to his benefactor Antony, concluding that he was ready to transfer the same gratitude to a new patron, from whom he should hold his crown and kingdom. Augustus was struck with the magnanimity of this defence, and replaced the diadem on his head; and Herod knew well how to ingratiate himself with the imperial court, that he remained the most favoured of the tributary sovereigns. When Augustus, in his way to and from Egypt, passed through Syria, he was entertained with the utmost magnificence by Herod; in recognition for which he rewarded him all his revenues and dominions, and augmented them. His good fortune was, however, poisoned by domestic broils, and especially by the insuperable aversion of his wife Mariamne, whose high spirit would not suffer her to dainteble her feelings of the injuries he had inflicted on her family, and his bloody designs against herself. Before his interview with Augustus, he had given an order against her life, and his suspicions of her chastity with propriety to Sohemus, his guardian, inflamed by the arts of Salome his sister, put him on the alert that public trial and condemnation which was soon followed by execution. She submitted to her fate with all the intrepidity of heavenly innocence; and was avenged by the remorse of her husband, who seems never after to have enjoyed a tranquil hour. Unable by dissipation to banish her from his memory, he frequently called aloud upon her name, and even sent his attendants to bring her into his presence, as if unwilling to forget her, her life was no more. Projects of kingly magnificence, however, now took their turn; and no prince of such confined dominions ever distinguished himself more by works of cold and splendour. He built at Jerusalem a stately theatre and amphitheatre in the Roman style, in which he celebrated games in honour of Augustus Cæsar, to the great displeasure of the Jews, who discovered Gentle professions in these theatrical spectacles. A conspiracy against him on this account was detected, and punished with merciless severity. He next rebuilt Samaria, which he named Sabaste, and adorned it with the most sumptuous edifices; and for his greater security he built several strong fortresses throughout the country of which the principal was called Caesarea, in honour of Augustus. In his palace near the temple of Jerusalem, he lavished the most costly materials and curious workmanship; and his palace of Herodion, at some distance from the city, was the marvel of the world, and one of the finest productions of the Roman style, together with the magnificent palace of Herodias, queen of Phœnas, of the royal Asmonean family, to whom he had married a new wife of the same name, the beautiful daughter of a priest, whom he raised to the supreme pontificate. In order to acquire credit with the Jews, he undertook the vast enterprise of rebuilding the temple of Jerusalem; and by the labour of a whole army of workmen, he carried on the structure with so much expedition, that the holy place, or temple, was finished with great magnificence within a year and a half. The dedication of his new city of Caesarea soon followed, at which he displayed such profuse magnificence, that Augustus Cæsar exclaimed, "his soul was too great for his kingdom."

The unnatural enmity between Herod and his two sons by the first Mariamne, underwent various fluctuations, and at length proved fatal to the unfortunate princes. Upon proofs of several attempts upon their father's life, he obtained permission from Augustus to have them tried at Berytus, before the governors of Syria and the neighbouring provinces, where he folemnly pleaded their innocence against them in person. They were condemned to death, and strangled. Their trial seems to have been fair; and the paternal care taken by Herod of the two sons whom each of them left, appears to acquit him of that want of natural affection with which he has been charged on the occasion. Domestic dissensions, however, still banished peace from the house of Herod. His brother Phœnas, and his favourd son Antipater, entered into a conspiracy against him. Soon after its discovery, the former, who experienced much kindness from Herod, died; the latter went to Rome. That important event, the birth of Jesus Christ, which he solemnly celebrated in the thirty-third year of Herod's reign, before Christ 5 of the vulgar era. See the article Chronology, vol. iv. p. 551. It was soon followed by that act of cruelty, the massacre of the children at Bethlehem, prompted by jealousy of this king of the Jews in a spiritual sense, whole life, to use the expression of the St. Matthew's Gospel, c. ii. About this time his son Antipater, returning from Rome, was arrested, and charged with treasonable practices. His trial was held before Quincilatus Varus, governor of Syria; and he was found guilty of conspiring against the life of his father. These calamities,
Critics and commentators have been much divided with regard to them. St. Jerom, in his Dialogue against the Luciferians, takes the name to have been given to such as owned Herod for the Messiah; and Tertullian and Epiphanius are of the same opinion. Yet the name Jer- 

...eriod, in his Comment on St. Matthew, treats this opinion as ridiculous; and Aldus, who gave the appellation by way of ridicule to Herod's soldiers who paid tribute to the Romans; agreeably to which the Syrian interpreters render the word by domes-

...icaramusius in Caria, in the first year of the seventieth Olympiad, or before Christ 424. He departed from his native place while it was under the tyranny of Lygdamis grandson of queen Artemisia, and travelled for the acquisition of knowledge into various parts of Greece, Thrace, Scythia, Melopotamia, Syria, and Egypt, collecting everywhere all the information he could obtain concerning the history and origin of nations. He is supposed to have retold the tale of Samos for the composition of his his-

...tory, and afterwards to have revisited Halicarnassus, and affixed to the island of Samos for the composition of his his-

With respect to those great trans-
and a recent French version by Larcher, is much esteemed.

Although very different opinions have been entertained by the learned concerning the credit due to Herodotus, it may perhaps be affirmed with truth, that his history has of late been rising in reputation. The cen- sures prefixed on this historian by Plutarch, in his tracts "On the Malignity of Herodotus," which appear to have had, for a long time, too much influence on the public judgment, have been discovered, on more accurate examination, to be, for the most part, ill-founded. The principal charge which Plutarch brings against Herodotus, viz. that of falsely accusing the Thibans of defecting the common cause of the Greeks in the Per- iotic war, described, with much probability, as the actuality of the critic for his own native country. This point, with the rest of Plutarch's strictures, has been fully examined by the abbé Genes, in three distinct dissertations on the subject, contained in the Memoirs of the Academy of Inscriptions and Belles Lettres. The charge of credulity, so often brought against Herodotus, appears also to have little foundation; for, though many parts of his narrative be marvellous and incredible, he commonly takes care to inform his readers, that he relates tales of this kind on traditionary authority alone; and he often intimates, that he himself doubts of their truth, and considers them as entirely fabulous. Major Rennell, in his Observations on Park's Journey in Africa, has the following remarkable passage in vindication of the accuracy of Herodotus: "Mr. Park has demonstrated, from ocular observation, that the course of the Niger runs from west to east, dividing Africa in like manner as the Danube does Europe. These were the very words of Herodotus, (Cteuterpe, c. 32.) twenty-two centuries ago, in his description of this great river. Yet M. de la Lande and Mr. Bruce have both erroneously inferred, agreeably to common report, that its course was from east to west; so that, after a lapse of twenty-two centuries, Mr. Park, in detecting this vulgar error, has firmly established the veracity of the venerable Father of History." Ciceron, Dionytus of Halicarnassus, and Longinus, are unanimous in their encomiums on the richness and harmony of his diction; and the latter speaks of him as, in this respect, so perfect an imitator of Homer, as to deserve the appellation of Oμηγερ νοβονία. Another very pleasing instance of the accurate description of the country by this historian, is given by A. Dureau de Lomal, in his Géographic Phyfique de la Mer Noire, published at Paris in 1807; in which we have the following translation from Herodotus:

"The country occupied by the Perians, extends even to the Erythrean sea. Above them, towards the north, live the Medes and the Sapires. Beyond the Sapires are the Colchidians, who border on the sea into which the Phasis empties itself. These four nations reach from one sea to the other. In going thence towards the west, are found two opposite peninsulas, which border on the sea. The one on the north commences at Phasis, and extends towards the sea along the Kuxine, quite to the promontory of Sigeum, in the Traed. On the south, this peninsula begins at the Myriandric gulf adjacent to Phoenicia, and reaches to the promontory of Trion- peum. It is inhabited by thirty different nations. The other peninsula begins on the confines of Peria, and extends to the Erythrean sea; and along this sea it comprehends only three nations, the Phoens, Ailavys and Arabia. It borders on the Arabian gulf at the place where Darius had a canal opened to communicate with the Nile. From Phenis to Phoenicia, the country is vast and extensive. From Phoenicia, the fame peninsula runs along this very sea by Syria of Palestine, and Egypt, on which it comprehends only three nations. The countries towards the east above the Perians, the Medes, the Sapires, and the Colchidians, are bounded on this side by the Erythrean sea (here the Phenis gulf), and on the north by the Caucian sea and the Araxes, which takes its course towards the east.

"The greater part of Asia was discovered by Darius. This prince, wishing to know into what part of the sea the Indus threw itself, embarked in vessels men of veracity and confidence, and among others Sclavys. They defended the river towards the east and the south; then, having arrived towards the west, they arrived at length, on the thirtieth month after they had set out, at the very port at which the Phoensians had formerly embarked by order of the king of Egypt to navigate round Lybia. After that circumnavigation was finished, Darius subdued the Indians, and made use of this sea. It is thus that it was discovered that Asia, except the oriental part of it, on the whole resembles Lybia."

"Lybia immediately succeeds Egypt, and makes part of the second peninsula, which is narrow on the confines of this province. In fact, from the Mediterranean to the Erythrean or Red sea, the distance is only about one thousand fadias; but from this narrow place the peninsula becomes spacious and more expanded. Lybia itself shows that it is surrounded by the sea, except on the side on which it borders on Asia. Nechos, king of Egypt, is the first who proved this fact. When he had finished the excavation of the canal which was designed to convey the waters of the Nile to the Arabian gulf, he sent out in his ships, with orders to enter on their return by the pillars of Hercules into the northern sea, and to come back that way to Egypt. The Phoensians, having embarked on the Red sea, failed into the southern ocean; and, after a navigation of two years, they doubled the pillars of Hercules, and returned into Egypt. They mentioned, on their arrival, that, in failing round Lybia, they had observed the sun on their right; and thus for the first time Lybia became known."—The experience of navigators and travelers for upwards of two thousand years, has here again proved the accuracy and fidelity of this great historian. HTROESS, f. [from here; heras, Lat.] A heroine; a female hero. Not in a j.

In which were held, by sad difafe.

Heroes and heroines.

HEROIC, adj. [from here; herois, Fr.] Productive of heroes.

Bolingbroke.

From John of Gaunt doth bring his pedigree,
Being but the fourth of that heroic line. Shakespeare.

Noble; suitable to a hero; brave; magnanimous; intrepid; enterprising; illustrious:

Not that which justly gives heroic name
To perfon or to poem.

Verfe makes heroic virtue live,
But you can life to verses give.

Reciting the acts of heroes. Ufed of poetry.—An heroic poem is the greatefl work which the foul of man is capable to perform; the defign of it is to form the mind to heroic virtue by example. Dryden.

Me thinks heroic poetry, 'till now,
Like some fantafic fairy land did show.

Cowley.

Ufed in heroic poetry.—In this contemplation they found the heroic foot (which includes the sponde, the dactyl, and the anapæt) to be majectic and grave. Harris's Phil. Inquiries. These verses are all long or heroic verses, that is, of tenyllables. Chofierfeld.

HEROICAL, adj. Beciting a hero; noble; illustrious; heroic.

HEROICALLY, adv. After the prowefs of a hero; suitable to a hero.

Free from all meaning, whether good or bad; And, in one word, heroically mad.

Dryden.

HEROICLY, adv. Suitably to a hero. Heroically is more frequent and more analogical:

Samson
Samson hath quit himself.
Like Samson, and heroically hath finisht'd
A life heroic.

HER'OINE, s. [from hero; heroine, Fr.] A female hero. Anciently, according to English analogy, heroës:
Then shall the British stage
Move noble characters expose to view,
And draw her finisht heroine from you.

HER'OIS, a festival, celebrated every 9th year by the Delphians, in honour of a celebrated heroine. There was in the celebration a great number of mysterious rites, with a representation of something like Semele's sacrifice. More noble characters expose to view.

HER'OISM, s. [herosis, Fr.] The qualities or character of a hero. If the Odyssey be left noble than the Iliad, it is more instructive; the Iliad abounds with more heroës, this with more morality. Broome.

HER'OLD'SBERG, a town of Germany, in Franconia, and territory of Nurenberg; seven miles north-north-east of Nurenberg, and eight south-south-east of Hamburg.

HER'ON, s. [heron, Fr.] A bird that preys upon fish; for the different species and natural history of which, see the article ADELA, vol. ii. p. 131-156; and the correspondent Engravings. —The heron, when the soareth high, shoveth winds. Bacon.

So lords, with sport of flag and heron full,
Sometimes we see small birds. —Sidney.

It is now commonly pronounced hern.
The tow'r hawk yet letter future poets fing,
Who terror bears upon his soaring wing;
Let them then view the frighted dark survey,
And lofty numbers paint their airy fray.

HER'ON CREEK, a creek of the American States, in Massachusetts, a little to the west of Cape Malabar.

HER'ON PASS, a strait of the American States, at thirty-two miles north-north-west of Burgos.

HER'ON-RA, a town of Spain, in Oldcastle; thirty-two miles north-north-west of Burgos.

HER'ONRIA TORESIL'LAS (Antony), a Spanish historian, born in 1565; was made secretary to Vespasian de Gonzaga, viceroy of Navarre and Valencia; after whose death, Philip II. king of Spain, appointed him royal historiographer for the Indies. In this capacity he wrote his general history of the Indies, under the title of Historia general de los Hechos de los Castellanos en las Islas y Tierra Firma de Mar Oceano, 4 vols. folio. This work, with a description of the West Indies, relates all the important transactions of the Spaniards in those distant countries, from 1492 to 1554. It is noticed by Dr. Robertson, as a work "fulfilling the fullest and most accurate information concerning the conquest of Mexico as well as every other transaction of America." He also composed a General History of his time, from 1554 to 1598, 3 vols. folio; and died in 1645.

HER'REDA (Ferdinand de), a Spanish poet of the sixteenth century, native of Seville. He published in 1564, a collection of lyrical and heroic poems, which were reprinted in 1619. They acquired for him a considerable reputation; and he is accounted one of those who attained the greatest excellence in the lyric poetry of Spain. He published likewise an edition of Garcilaso de la Vega, with notes; the Life of Sir Thomas More; and a Narrative of the War of Cyprus, and of the battle of Lepanto.

HER'RENSDEN, a town of Germany, in Franconia, and Lichnoph of Archers, situated on the Altmuhl; five miles south-west of Ansbach, and twelve north-north-east of Dunckelbuhl. Lat. 49° 31' N. long. 15° 11' E. Population 642.

HER'RING, s. [hareng, Fr. haring, Sax.] A small fish; for the different species of which, see the article CLupea, vol. iv. p. 686-693; and the correspondent Engravings. The sale of herrings is regulated by the following acts of parliament: It is unlawful to buy or sell herrings at sea, before the fishermen come into the haven, and the sale of the ship be drawn to the land. 31 Edw. III. fl. 2. No herrings shall be sold in any vessel, but where the barrel contains thirty-two gallons, and half-barrel and firkin accordingly; and they must be well packed, of one time's packing and salting, and be as good in the middle as at the ends, on pain of forfeiting 3s. 4d. a barrel, &c. by 22 Edw. IV. c. 2.

The vessels for herrings are to be marked with the quantity, and place were packed; and packer are to be appointed and sworn in all fishing-ports, &c. under the penalty of 100l. 13 Car. II. c. 16.

HER'RELING, adj. Belonging to a herring, used in fishing for herrings.

HER'RELING (Thomas), archbishop of Canterbury, distinguished by his ardent attachment to the interests of civil and religious liberty, was the son of a clergyman at Walloken in Norfolk, where he was born in 1693.
He obtained his grammar-learning at Wisbech, in the Isle of Ely; and, in 1710, was entered of Jesus college, Cambridge, whence he afterwards removed to Benet college, of which he obtained a fellowship in 1716. In 1722, Dr. Fleetwood, bishop of Ely, made him his chaplain, and presented him to the rectories of Rettendon in Essex, and Barkley in Hertfordshire. Two years afterwards he proceeded B.D. and in 1726 was chosen fellow to the honourable society of Jesus college; where his sermons were listened to by the learned auditor with the highest approbation; for seldom did the worthy author introduce matters of a political nature into them, but employed himself in enforcing the fundamental duties of Christianity with many fene, great point, and unqualified eloquence. In 1731, he was presented to the rectory of Blechingley in Surrey; and in the same year was promoted by the king to the deanery of Rochester. On these preferments he resolved alternately till the year 1737, when the king was pleased to advance him to the episcopal bench, by nominating him to the see of Bangor, with which he held his deanship in commendam. In 1743 he was translated to the see of Chester, with which he held his deanship for six years; and, in 1750, was presented by the king to the church of Ely with its annexed benefices. In 1753, he was made a member of the most reverend Dr. Thomas Herring, &c. to the see of York, and, in 1764, was removed to the see of Canterbury. On the death of Dr. Herring, Dr. Herring now stood deservedly high in public estimation; and upon the death of Archbishop Potter, in 1747, he was translated to the see of Canterbury. Of the temper and disposition of mind with which the archbishop was favored, on the discharge of his office, a pleasing idea may be formed from a letter written by him at that time to Dr. Benfon; in which, after speaking of the anxiety which his elevation had occasioned him, he says: "I hope I have an honest intention, and, for the rest, I must rely on the grace of God, and the counsel and affection of my friends. I think it happy," he adds, "that I am called up to this high station at a time when spirit, and rancour, and narrowness of spirit, are out of countenance; when we breathe the benign and comfortable air of liberty and toleration; and the teachers of our common religion make it their business to extend its essential influence, and join in supporting its true interest and honour." In 1753, his grace was attacked by a violent fever, which gradually wore down his constitution; and he died in 1756, when about sixty-three years of age. The literary productions of Dr. Herring are unfortunately but few; for, in a languid anxiety which his elevation had occasioned him, he says: "I hope I have an honest intention, and, for the rest, I must rely on the grace of God, and the counsel and affection of my friends. I think it happy," he adds, "that I am called up to this high station at a time when spirit, and rancour, and narrowness of spirit, are out of countenance; when we breathe the benign and comfortable air of liberty and toleration; and the teachers of our common religion make it their business to extend its essential influence, and join in supporting its true interest and honour." In 1753, his grace was attacked by a violent fever, which gradually wore down his constitution; and he died in 1756, when about sixty-three years of age. The literary productions of Dr. Herring are unfortunately but few; for, in a languid moment, he condemned all his manuscripts to the flames. The whole of which were left were collected by Mr. Duncombe, and published in one volume octavo, under the title of Seven Sermons on public Occasions, 1763, with a preface, containing some memoirs of the author's life. In 1777, the public were presented with Letters from the late most reverend Dr. Thomas Herring, &c. to William Herring, &c. prefixed, from the year 1748 to 1757, with notes and an appendix, octavo; which afford a happy model for a polite correspondence between men of learning and piety.

**HERRING-BAY**, a bay on the west side of Chesapeake Bay, Maryland, twenty-six miles south of Annapolis.

**HERRING-BUSS**, f. A small ship employed in the herring fishery.

**HERRING-FISHERY.** See the article Fishery, vol. vii. p. 413.

**HERRING-FOX**, f. A large kind of sea-fish which preys upon herrings.

**HERRING-SILVER**, f. Formerly a composition in money, instead of paying such a number of herrings for the provision of a religious house.

**HERRIOT**, a town of Scotland, in the county of Edinburgh; ten miles south of Dalkeith.

**HERRN'HUTH**, or **HERRN'HUGH**, a town of Lusatia, and principality of Gorlitz, founded in the year 1722, by some Moravian brethren, who settled there in lands belonging to count Zinzendorf, and afterwards became the metropolis and chief nursery of the religious of that persuasion, who considered count Michael Lewis, of Zinzendorf, as their father; five miles north of Zittau, and about fifty east from Dresden.

**HERRN'HUTT** (New), a Moravian town or settlement in Greenland.

**HERRN'WERTH, or HERRN CHIMSEE**, a town of Germany, in Bavaria: twenty-seven miles west of Salzburg, and ten west of Traunstein.

**HERRN'STADT**, a town of Silefia, in the principality of Wohlau: six miles north-north-east of Wintzigt, and thirteen north of Wohlau.

**HERRN'STRUCK**, a town of Germany, in Franconia, and territory of Nuremberg, situated on the Pegnitz; fifteen miles east of Nuremberg, and eight south-west of Velden.

**HERRN'STETTEN**, a town of Germany, on the Upper Rhine, in the county of Sponheim: twenty-two miles west of Creutzach.

**Herrn**, pron. The female possessive used when it refers to a subjunctive going before: as, this is her house, this house is hers. See Her.

How came her eyes so bright? not with salt tears; If, on my eyes: are oftener walt'd than hers. Shakespeare.

**HER'SAL, f.** [used by Spenfer for] Rehearsal: With this sad herfall of his heavy strelle The warlike damzell was empasion'd fore. Spenser.

**HER'SCHEDE**, a town of Germany, in the circle of Weftphalia, and county of Mark: six miles south-east of Lunsche.

**HER'SCHEL**, the name by which the French, and most other European nations, call the new planet, discovered by Dr. Herschel in 1781. Its mark or character is E. The Italians call it Uranus, Urania, but the English, the Georgium Sidus, or Georgian Planet. See the article Astronomy, vol. ii. p. 391-393.

**HER'SCHEFELD**, a town in the marquiseate of Lusatia, situated on the river Neisse: four miles north of Zittau.

**HER'SHE**, f. [her's]. Low Latin; supposed to come from *herian*, Sax. to praise. This is likewise written *herse*; see Herse. A temporary monument raised over a grave. The carriage in which the corpse is drawn to the grave:

When mourning nymphs attend their Daphnis' herse. Who does not weep that reads the moving verse?

- *Reynolds*.

On all the line a sudden vengeance waits. And frequent herse's shall beget your gates. Pope.

A funeral eulogy:

What mufe, what powre, or what thrice-facred herse, That lives immortal in a well-tun'd verse. Can lend me such a sight, that I might see. A guilty conscience true anatomy? W. Brown.
The word in this sense was used as a title to any literary composition in memory of the dead; as, to the funeral sermon on the earl of Effex, who was the long parliament's general. Majen. Suppl. — [Used by Spenser for] herbal or herbalical.

For the fair damzell from the holy herse her love-sick heart to other thoughts did steal. Specif.

To HERSE, v. a. To inclose as in a herse.

The house is herse'd about with a black wood, Which nods with many a heavy-headed tree.

HERSE, f. In fortification, a lattice or portcullis, in the form of a arrow, beset with iron spikes, to block up a gateway, &c.

HERSE, in mythology, a daughter of Cercrops, king of Athens, beloved by Mercury. The god disdained her love to Aglauros, Herse's father, in hopes of procuring easy admission to her; but Aglauros, through jealousy, discovered the amour. Mercury was so offended at her behaviour, that he fruct her with his caduceus, and changed her into a hune. Herse became mother of Cephalus by Mercury; and, after death, she received divine honours at Athens. Diod.

HERSE, P. P. E. A female individual, as distinguished from others:

The jealous o'er-worn widow and herself, Since that our brother dub'd them gentlewomen, Are mighty goddesses in this monarchy. Shakespeare.

Being in her own power; mistress of her own thoughts: more she looks, the more her fears increase. Dryden.

The oblique case of the reciprocal pronoun; as, she herse. — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the.

F. — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the.

The more she looks, the more her fears increase. At nearer sight; and she's hei'self. Exodus.

herself, — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the.

herself, — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the. — The daughter of Pharaoh came down to herself the.

herself; and of their productions the most esteemed were

Hersil'eike, adj. Funereal; suitable to funerals. Paus.

HERSIL'IA, one of the Sabines carried away by the Romans at the celebration of the Consualia. She was given and married to Romulus; and, being prevented with immortality by Juno, received divine honours under the name of Ora. Livy.

HERSIL'TON, f. In fortification, a plank armed with iron spikes, for the same use as the herse, and also to impede the march of the infantry or cavalry.

HER'SIN, a town of France, in the department of the Straits of Calais, and chief place of a canton, in the district of Bethone: two leagues south of Bethone.

HER'SO T'URKA, a town of Chinefe Tartary. Lat. 43. 26. N. lon. 142. 15. E. Ferro.

HER'STAL, or Her'ostal, a town of Germany, in Westphalia, and bishopric of Liege, on the Meuze, with a castle, which belonged to Pepin, father of Charles Martel. It was fold to the king of Pruffia in the year 1741: four miles north of Liege.

HER'STE LE, a town of Germany, in Westphalia, and bishopric of Paderborn: eleven miles caft-north-east of Warburg.

HERTFORD, the county town of Hertfordshire, pleasantly situated on the river Lea, distant twenty-one miles from London, to which city the river is navigable, and contributes much to the opulence of the town. The affizes for the county are held here, as are the quarter-feifions and county-counts. The election of the knights of the shire is likewise at this town; and there is a noble county-hall, which was built in 1788, by Mr. Adam, the architect of the Adelphi.

Hertford was called by the ancient Britons, Duracoborias, or Red Ford, from the supposition that the gravel at the ford over the Lea was red; whence some have thought the present name derived from the Saxon Herudford, or Herotford, which has the fame significations; but Dr. Gibbon derives Hertford from a hart, this county formerly abounding with deer; and the arms of the town being a hart couchant in the water, seems to confirm the opinion; besides, the soil in this part of the country is not red; for these reasons some choose to write the name Hertford. It is situated in a dry vale, celebrated for its fertility and salubrious air. It was of considerable note in the time of the ancient Britons. The Saxon kings often kept their court here; and, upon the first division of the kingdom into counties, it was made the county-town. King Alfred built a castle here, to defend the neighbourhood against the Danes, who in their light pinnaces came up from the Thames, here, to defend the neighbourhood against the Danes, who in their light pinnaces came up from the Thames, and the arms of the town being a hart couchant in the water, seems to confirm the opinion; besides, the soil in this part of the country is not red; for these reasons some choose to write the name Hertford. the castle from king John; but Henry III. recovered it. Edward III. gave the town a charter for a market on Thursday next after St. John Baptist. At the time of the battle of Poictiers, in his grandaunt's time, it was called, "the Honour of Hartford." The town sent members to parliament as early as the reign of Edward I. but after the 9th of Henry V. the bailiff and burgesses defiring to be excused on account of their poverty, its representation was discontinued till the 9th of Henry VI. Here in 1430, ordained by his charter, confirming their market, that no other should be kept on the same days within seven miles, on pain of having the goods seized by the bailiffs of Hertford. This charter being then part of Queen Margaret's jointure, the courts were held in her name, and she appointed a horse-fair to be kept in what part of the town the king or his grantee, in the name of the bailiffs, might appoint. In the reign of Henry VII. the standard of weights and measures was fixed here; and Queen Mary rendered it a corporation, by the name of bailiffs and sixteen burgesses. In the 23rd and 35th years of Queen Elizabeth, when the plague raged in London, Michaelmas term was kept here; and a new charter was granted by that queen, by the style of a bailiff, eleven capital burgesses, and sixteen aliens; but the town is now governed by a mayor, a high steward, recorder, nine aldermen, a town-clerk, chamberlain, ten capital burgesses, sixteen aliens, and two sergeants at mace.

Here was once a monastery, and five parochial churches, which were reduced to two, and St. Andrew's. There is a noble free-school; the salary is 40l. a-year for the master, and 20l. for an alien, with a good house and premises. Here is also a large school, called "the buildings," for the boys and girls belonging to Chirill's Hospital in London; to it belong a master, two mistresses, twenty nures for the boys, and a proportionate number for the girls. Here is also a charity-school for boys and girls, under the guardianship of the mayor and alderman. At one end of the town is the county-gaol, and a penitentiary-house, newly erected. It has four fairs in the year: the first is on the second Saturday before Easter Sunday; the second Old May-day; the third Midsummer-day; and the last is on the 8th of November; for horses, cows, sheep, hogs, &c. Market-day, Saturday. The chief commodities of its market are wheat, malt, and wool; and it is said to send five thousand quarters of malt to London weekly by the river Lea.

HERTFORD, a county of the American States, in Edenton district, North Carolina; bounded north by the state of Virginia, south by Bertie county, east by Chowan, and west by Northampton; and contains, by the census, 5828 inhabitants. Chief town, Wynton.

HERTFORD, a port-town of the American States, North Carolina, in Edenton district, and capital of Gates county, situated on the west side of Perquimans's river. It contains a court-house and gaol; and is eighteen miles north-north-east of Wilmington, and thirty-eight fourth-by-west of Suffolk in Virginia.

HERTFORDSHIRE, an inland county of England, bounded on the north by Bedfordshire and Cambridgeshire, and on the east by Essex, the south by Middlesex, and on the west by Buckinghamshire and Bedfordshire. During the Saxon heptarchy, it belonged part to the kingdom of the East Saxons, and the other part to the Mercians. It is now included in the province of Canterbury, in the dioceses of Lincoln and London, and in the north circuit. Its form is nearly circular, being 35 miles from east to west, 37 miles from north to south, and not less than 190 in circuit; containing 660 square miles, or 424,400 square acres, divided into eight hundreds, having eighteen market-towns, viz. Hertford, the county-town, which gives the title of earl to the Conway family; St. Alban's, which gives the title of duke to the Beauchamp family; part of Royston, which gives the title of viscount to the family of York; and part of Barnet, with Ware, Hitchin, Baldock, Bishop's Stortford, Berkhamstead, Buntingford, Hemel Hempstead, and Bishop's Stortford. It contains 356 parishes, 54 vicarages, and 950 villages. The principal rivers are the Lea, Coln, Stort, Gade, Bean, Tame, and Rib; besides the New River, which supplies London with water. This county sends six members to parliament, viz. to the house of Commons, St. Albans, who kept a county-court in his time; and the other five to the house of Lords. Here is a very beautiful racecourse, called the Royston race-course, a few miles from the town.

The Lea, which is its principal river, rising out of Low Moor moor, in the south of Bedfordshire, flows obliquely to the eastern side, washing the towns of Hertford and Ware, from both of which places it is navigable to the Thames. It collects in its course all the streams of the northern and eastern parts. On the south-western side, the Coln unites various streams, and conveys them out of the county near Rickmanworth. The wheats -fair, at the pleasant situation of Hertfordshire, added to its vicinity to the metropolis, have rendered it a favourite residence for persons of rank, both in ancient and modern times; hence it possesses many country seats of the present nobility, and affords various remains of antiquity. Its towns, however, are without manufactures. The great business of the county is the traffic of corn, and the malting trade; which latter is carried on to a great extent in the towns of Hertford, Hitchin, Baldock, Royston, and Ware. The latter town sends a greater supply of malt to London than any other market. The Hertfordshire malt is not, however, all grown in the county; but large quantities of barley are purchased in the fun of the four rivers, after being malted in these towns, is sent to London by the navigation of the Lea. In this county, near St. Alban's, were fought two of the principal battles in the bloody wars of York and Lancaster. That in 1455 was the first conflict between the parties, and terminated in favour of the Yorkists. The valiant Clifford, and the great earl of Somerset, were slain in it, and King Henry VI. taken prisoner. The second battle, in 1461, ended in a complete victory to Queen Margaret, at the head of the Lancastrians. Near St. Alban's are the vestiges of the ancient town of Verulam, so famous in the time of the Romans. The field of Barnet, between St. Alban's and London, was also the scene of a bloody battle, in those destructive wars of the two houses, which battle proved decisive in favour of Edward IV. for therein his great foe, the king-making earl of Warwick, was slain. It was fought on Easter-day in the year 1471.

HERTSPOTT (Marquard), or, as he was more commonly called, John-James Hertford, a learned Benedictine, born in 1664, at Fribourg. In his twentieth year he entered into the order of the Benedictines of St. Blaise; and, having passed through various degrees of promotion, died in Vienna in 1762. He is author of the following work, which will be a lasting monument of his learning and diligence: Genealogia diplomatica auger gentis Habsburgicae, from II. vol. III, Vienna, 1737, folio.
H E R V O R D E N

folio, with twenty-six plates. This useful collection towards the history of the house of Austria having been recently published under the approbation of the author, who was induced to undertake another large work, entitled Monumenta Aug.

Domus Austriaca, &c. which was patronized by the emperor Charles VI, and by the illustrious empress-queen Maria-Theresa. According to Hertzott's plan, the first part was to contain the seals and various marks of honour; the second, the most celebrated prodigies, prodigies, in the fourth, monuments; and the fifth, inscriptions from churches, palaces, &c. The first three parts were published in the life-time of the author, who, in consequence of his great age, associated with himself in this labour, father Ruffen Herr, who completed the fourth part; but this, having been burnt with the rest of his MSS. in the library of Blaise, in 1768, was recomposed by Gerbert, prince-abbot of St. Blaise, and published in two volumes folio, under the title of Topographia Principum Austriæ, qua est Pars I. et II. tom. W. et ultimi, Monumentorum Domus Austriaca, St. Blasi, 1772. The fifth part, though promised, was never published.

HÉRIT, or HERTA, in mythology, a goddess among the Germans, supposed to be the same as the Earth. She had a temple and a chariot dedicated to her service in a remote island, and was supposed to visit the earth at stated times, when her coming was celebrated with the greatest rejoicings and festivity. Tacit.

HÉRITIUS (John-Nicholas), an eminent German jurist, born in 1651, at Oberkle, near Gieflen. He graduated in the university of Gieffen; and was made advocate in ordinary to the regency, and professor of law and politics. He died in 1710. He published various works concerning the law and history of Germany; the principal of which are, 1. Notitia Vites Francorum Regum, Gieffen, 1710, 4to. containing an account of the early periods of the monarchy of the Franks, to the reign of Louis the Pious. 2. Commentationes & Opuscula ad Historiam & Geographiam Antiquae Germaniae Speulantia, Francol. 1713, 4to.

HÉRVIGSWALD, a town of Sileia, in the principality of Nienfe; four miles north-north-west of Patchkau.

HÉRTZBERG, a town of Germany, in Upper Saxony, and electorship of Saxony: twenty-four miles south-east of Wittenberg, and forty-six south of Potzdam.

HÉRTZFELD, a town of Germany, in Westphalia, and bishopric of Munster: five miles south-west of Stromberg.

HÉRTZHELM, See Hertzhelen.

HÉRTZHORN, a town of Germany, in the duchy of Holstein: four miles east of Glückstadt.

HÉRTZGOL/ARACH, a town of Germany, in Franconia, and bishopric of Bamberg: five miles south-west of Erlang, and twenty-two south of Bamberg.

HÉRTZGEBURG, a town of Germany, in the archduchy of Austria: nine miles south-east of Mautern, and four north of St. Polten.

HÉRTZGO/ABKEN, a river of Silefia, which rises near Obich, and runs into the river Schwarwalder in the principality of Glogau.

HÉRTZGO/ABLEN, a town of Germany, in the archduchy of Austria; six miles north-north-west of Ottenheim, and thirteen south-west of Aigen.

HÉRTZGO/ABLE, a town of Silefia, in the principality of Neufce: three miles north of Grotkau.

HÉRVEY (James), an ingenious divine of the church of England, and a very popular writer, born in 1714, at Hampton, in Oxfordshire. He received his classical education in the free grammar-school at Northampton; and in 1731 was sent to Lincoln college, Oxford. Besides his other studies, he learned anatomy from Dr. Keil; natural philosophy from Dr. Derham's Physico and Astro-theology; and, for his improvement in style and composition, he paid particular attention to Mr. Spence's elegant and judicious Essay on Pope's Odyssey. He also began to learn the Hebrew language, in 1772. Without a teacher or approbation, the author was induced to undertake another large work, entitled Monumenta Aug.

Domus Austriaca, &c. which was patronized by the emperor Charles VI, and by the illustrious empress-queen Maria-Theresa. According to Hertzott's plan, the first part was to contain the seals and various marks of honour; the second, the most celebrated prodigies, prodigies, in the fourth, monuments; and the fifth, inscriptions from churches, palaces, &c. The first three parts were published in the life-time of the author, who, in consequence of his great age, associated with himself in this labour, father Rufsen Herr, who completed the fourth part; but this, having been burnt with the rest of his MSS. in the library of Blaise, in 1768, was recomposed by Gerbert, prince-abbot of St. Blaise, and published in two volumes folio, under the title of Topographia Principum Austriæ, qua est Pars I. et II. tom. W. et ultimi, Monumentorum Domus Austriaca, St. Blasi, 1772. The fifth part, though promised, was never published.

HÉRVI, or HERTA, in mythology, a goddes among the Germans, supposed to be the same as the Earth. She had a temple and a chariot dedicated to her service in a remote island, and was supposed to visit the earth at stated times, when her coming was celebrated with the greatest rejoicings and festivity. Tacit.
HERVORDEN. See HERFORD.
HERY, a town of France, in the department of the Yonne, and chief place of a canton, in the district of St. Florentin; eight miles north of Auxerre.

To HERY, v. a. [hopen, Sax. to praise, to celebrate.] To hallow; to regard as holy. Not in yj.

But were thy years green as now be mine, Then wouldst thou learn to carol of love, And lory with hymns thy lady's glove.

Spenfer.

HERZBERG, a town of Germany, in Lower Saxony, and principality of Grubenhagen, situated near the Harz mountain, with manufactures of arms and iron tools: fourteen miles south of Gollar.

HERZGOVNA, or St. SABA, a town of Turkish Dalmatia, which gives name to a duchy; it is fortified, and the residence of a Turkish governor; great part of the duchy belongs to the Venetians: eighty miles south-west of Belgrade.

HESANUS, in ancient geography, a mountain near Peonia.

HES'DIN, a town of France, and seat of a tribunal, in the department of the Straits of Calais, situated on the Canche, built in the form of a regular hexagon, strongly fortified, and almost surrounded with marshes. This town was built by Philibert Emanuel, duke of Savoy, general to the emperor Charles V. in 1554, after destroying Old Hesdin. In 1559, it was taken by Louis Quidi, who invited at his kingdom after the peace of the Pyrenees: four leagues south-east of Montreuil, and nine west of Arras. Lat. 50. 42. N. lon. 19. 42. E. Ferro.

HES'DIN (Old), a town of France, in the department of the Straits of Calais, destroyed by the troops of Charles V. in the year 1554: one league south-east of Hesdin.

HES'EB, [Hebrew.] A man's name.

HES'BON, [Heb. invention.] A city of Palestine, belonging to the tribe of Reuben; and one of the cities of the Levites of the family of Merari. This city was taken by Israel from the Amorites, during their journey from Egypt to Canaan; at which time it was the seat of Sihon king of the Amorites, who had formerly taken possession of the land from the Canaanites: forty miles south-east of Belgrade.

HESH'MON, a city of Palestine, belonging to the tribe of Judah; situated in the southern part of that province near the border of Edom.

HES'USIUS (Tilemannus), a German Lutheran divin, born at Wefel in 1524. Such were his abilities, and early proficiency in literature and theology, that when very young he was appointed professor of divinity at Breslau, and also preacher in the church of the Holy Ghost. While discharging the duties of these offices, he became involved in a violent ecclesiastical controversy, which eventually deprived him of these benefices. Upon this he retired into Saxony, where he opposed the progress of Calvinism in Germany, by different writings, which he published at Jena. From this place, however, he was expelled in 1611, and was invited into Prussia, and appointed professor of theology at Königsberg; where he taught till the year 1577, and was appointed bishop of Samia. But, haviing written against Beza, he was banished the country, as were all the other ministers who took his part; in consequence of which he retired with his family to Lubeck, and afterwards to Helmsfadt, where he was appointed professor of divinity. Though he was a zealous Lutheran, yet he differed from the doctrine of the most rigid of his party. He died at Helmsfadt in 1588. His writings are,

1. Commentaries on the Psalms, in folio; and also, in folio; on all the Epistles of St. Paul, in 8vo. 2. A Treatise on the Lord's Supper, and on justification, in 8vo.

HESIOD, an ancient Greek poet, by some supposed coetemporary with Homer, others a century later, born at Cuma in Aëolia, but removed in his infancy with his father to Africa, a small town in Raetitiae. Very little is known concerning his life; and the traditions preferred respecting him are in many respects fabulous. Hesiod is the first who wrote a poem on agriculture. This composition is called, The Works and the Days; and, besides the instructions which are given to the cultivator of the field, the reader is pleased with many moral reflections worthy of a refined Socrates or a Plato. His Theogony is a miscellaneous narration executed without art, precision, choice, judgment, or connection; yet it is the more valuable for the faithful account it gives of the gods of antiquity. His Shield of Hercules is but a fragment of a larger poem, in which it is supposed he gave an account of the most celebrated heroes among the ancients. Hesiod, without being master of the fire and fulblimity of Homer, is admired for the elegance of his diction, and the sweetness of his poetry. Besides these poems, he wrote others, now lost. Pausanias says, that, in his age, Hesiod's verses were still written on tablets in the Temple of the Muses, of which the poet was a priest. If we believe Clem. Alex. 5. Strom, the poet borrowed much from Musaeus. One of Lucian's dialogues bears the name of Hesiod, and, in it, the poet is introduced as speaking of himself. Virgil, in his Georgics, has imitated the compositions of Hesiod, and taken his Opera & Dies for models, as he acknowledges. It is remarkable that the Greeks were so partial to his poetry and moral instructions, that they ordered their children to learn all by heart. Hesiod is said to have been murdered by the sons of Ganyctor of Naupactum, and his body thrown into the sea; and that some dolphins brought back the body to the shore, which was immediately known, and the murderers were discovered by the poet's dogs, and thrown into the sea. If Hesiod flourished in the age of Homer, he lived 907 years before Christ. The best editions of this poet are that of Robinet, 4to. Oxon. 1737. that of Loefner, 8vo. Lips. 1778. and that of Parma, 4to. 1785.

HES'TONE, a daughter of Laomedon, king of Troy, by Strymo, the daughter of the Scamander. It fell to her lot to be exposed to a sea-monster, to whom the Trojans yearly presented a marriageable virgin, to appease the resentment of Apollo and Neptune, whom Laomedon had offended; but Hercules promised to deliver her, provided he received as a reward fix beautiful horses. Laomedon contented, and Hercules attacked the sea-monster, whom he overthrew on the shore of Hesione, and killed him with his club. Laomedon, however, refused to reward the hero's services; and Hercules, incensed at his treachery, besieged Troy, and put the king and all his family to the sword, except Podarces, or Priam, who had advised his father to give the professed monsters to his father's deliverer. The conqueror gave Hesione in marriage to his friend Telamon, who had afflicted her during the war, and he established Priam upon his father's throne. The removal of Hesione to Greece proved at last fatal to the Trojans; and Priam, who remembered with indignation that his father had been forcibly given to a foreigner, sent his son Paris to Greece to reclaim the possessions of Hesione, or more probably to revenge his injuries upon the Greeks by carrying away Helen, which gave rise, soon after, to the Trojan war. Lycophron mentions, that Hercules threw himself, armed from head to foot, into the mouth of the monster to which Hesione was exposed, and that he tore his belly to pieces, and came out alive, only with the loss of his hair. See also the preceding article of HESITANCY. 7. Dubiousness; uncertainty; suspense.—Some of them reasoned without doubt or hesita-
tancy, and lived and died in such a manner as to show that they believed their own reasonings. Afterbury.

To HES'TATE, v. a. [hæft, Lat. after, Fr.] To be doubtful; to delay; to pause; to make difficulty.
Willing to wound, and yet afraid to strike, 
Just hint a fault, and hestate dislike; 
Alike refer'd to blame or to commend, 
A tim'rous foe, and a fujicions friend. — Pope.

HESTIATION, f. Doubt; uncertainty; difficulty made.—I cannot foresee the difficulties and hestations of every one: they will be more or fewer, according to the capacity of each peruser. Woodward.—Intermination of perplexity, and Ablution. Many clergymen write in so diminutive a manner, with such frequent blots and interlineations, that they are hardly able to go on without perpetual hestations. Swift.

HESTIVON, a town of Egypt; twenty-two miles south-south-west of Cairo.

HESTN, a town of Attica, Turkey, in the province of Dardania; six miles west of Tectrit.

HESTNAL-MAI, a small island and village of Egypt, in the lake of Tennis; twenty-five miles north-west of Tineh.

HESTNE, a river of France, which runs into the Scheldt, near Conde, in the department of the North.

HESTPER, f. The evening star, Venus when the Venus sets after the sun.

HESTPERIA, in ancient geography, a large island of Africa, once the residence of the Amazons. Diod. 3. It was a name common both to Italy and Spain. It is derived from Hesper, or Vesper, the setting sun, or the evening; whence the Greeks called it Hesperia, because it lay at the setting sun, or in the west. The same name, for similar reasons, was applied to Spain by the Latins. Virg. Æn. 1. 654.

HESTPERIAN, adj. Belonging to the Hesperides.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia. Hesperiades, in botany, the name of the forty-first order in Linnaeus's Systema Naturae, containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDAE, f. in botany, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia. This celebrated place or residence, fixed beyond the ocean by Hesiod, is more universally believed to be near mount Atlas in Africa, according to Apollodorus. This celebrated place of Hesperides was a name common both to Italy and Spain. It is derived from Hesper, or Vesper, the setting sun, or the evening; whence the Greeks called it Hesperia, because it lay at the setting sun, or in the west. The same name, for similar reasons, was applied to Spain by the Latins. Virg. Æn. 1. 654.

HESTPERIAN, adj. Belonging to the Hesperides.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in botany, the name of the forty-first order in Linnaeus's Systema Naturae, containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in botany, the name of the forty-first order in Linnaeus's Systema Naturae, containing only three genera, Citrus, Syrinx, Garcinia. This celebrated place or residence, fixed beyond the ocean by Hesiod, is more universally believed to be near mount Atlas in Africa, according to Apollodorus. This celebrated place of Hesperides was a name common both to Italy and Spain. It is derived from Hesper, or Vesper, the setting sun, or the evening; whence the Greeks called it Hesperia, because it lay at the setting sun, or in the west. The same name, for similar reasons, was applied to Spain by the Latins. Virg. Æn. 1. 654.

HESTPERIAN, adj. Belonging to the Hesperides.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in botany, the name of the forty-first order in Linnaeus's Systema Naturae, containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in botany, the name of the forty-first order in Linnaeus's Systema Naturae, containing only three genera, Citrus, Syrinx, Garcinia. This celebrated place or residence, fixed beyond the ocean by Hesiod, is more universally believed to be near mount Atlas in Africa, according to Apollodorus. This celebrated place of Hesperides was a name common both to Italy and Spain. It is derived from Hesper, or Vesper, the setting sun, or the evening; whence the Greeks called it Hesperia, because it lay at the setting sun, or in the west. The same name, for similar reasons, was applied to Spain by the Latins. Virg. Æn. 1. 654.

HESTPERIAN, adj. Belonging to the Hesperides.

HESTPERIDES, in mythology, the name of the forty-first order in Linnaeus's Fragments of a Natural Method; containing only three genera, Citrus, Syrinx, Garcinia.

HESTPERIDES, in botany, the name of the forty-first order in Linnaeus's Systema Naturae, containing only three genera, Citrus, Syrinx, Garcinia.
of June, between Salerno and Naples. This has been known to our gardens much longer than the other, for Gerarde, in 1597, speaks of it as being then found in gardens for the beauty of the flowers. And Johnson adds, 1653, that, by the industry of some of our florists, within these two or three years hath been brought into our gardens, a very beautiful kind of these dame's violets, having very fair double white flowers. The names in Gerarde are dames violets, winter gillyflours, rogue's gillyflours, and easter flowers. Parkinson adds queen's gillyflours.

3. Hesperis Rubra, or Siberian rocket, is so much the handsomest plant, in its way, with the common garden-rocket, that it may fairly be looked upon as a variety. It differs however in having a stalk of twice the height; the corolla is purple, not white, and the claws of the petals are twice as long as the calyx; the border is blunt, and fearfully, if at all, margined; it has however the same little prominent point which that has. The leaves are longer, narrower, and more serrate. But Siberia produces many plants which are larger than the same species in Europe. Mr. Miller says, it has a strong branching stalk between two and three feet high, and very hairy: oblong heart-shaped leaves, ending in acute points, fitting close to the stalk, four inches long; and an inch and a half broad at their base; the upper part of the stalk divides into two or three branches, with small leaves of the same shape with the others, and terminated by loose panicles of large, single, purple flowers, very fragrant. It flowered at the end of June 1757.

4. Hesperis Africana, or African rocket: stem very much branched and diffused, leaves lanceolate, petioled, sharply toothed, fleshy, filices feffile. The leaves, leaves, and pods of this plant, are rough with three-barbed hairs. The flowers are flesh-colored, with narrow, sublanceolate, bafilifh, petals. The pods are feffile, stiff, round, somewhat flatted, blunt with a sharp point. It is an annual plant, with a very branching stalk, about nine inches high, terminated by a number of small purple flowers, which appear in June and July, and are succeeded by long pods fitting close to the stalks, and filled with small seeds, which ripen in September. It is a native of Africa.

5. Hesperis verna, or early flowering rocket: stem upright, branched, leaves cordate, felme-clafping, fera-rate, villose. This also is an annual plant, fishing out several heart-shaped leaves from the root, which spread on the ground. The stalk rises nine inches high, branchi-}

6. Hesperis lacera, or torn rocket : leaves runcinate, filices tricuspidate. Leaves naked, narrow. Flowers of a dull colour and unpleafant smell. It is a low annual plant, with pointed leaves, having the borders indented as if torn. The corolla is purple. It is a native of Portugal, and the south of France; and occurs twice, under this name, and that of Chènranthus laceraus.

7. Hesperis laciniata, or jagged rocket: stem branch-}

8. Hesperis inodora, or scentlefs rocket: Item Ample,
plur, coal, bole, pipe-makers' clay, marble, and alba-
eter, with several salt springs, mineral waters, and
medicinal baths. The principal rivers, besides the Rhine
and the Main, are the Lahn, Schwalm, Fulda, Werra,
and Diemel, which five rivers give name to five districts
or divisions: other rivers are the Lumb, Olm, Eder,
Ems, &c. The Hefts are divided from the ancient
Causing the derivation of Hefts, and the
Eder, but others say it is derived from the river Ehrs,
which runs into the Fulda; but the whole territory was
the seat of the Cattians. In the year 921 there were
counts of Hefts; and one of them became king of Ger-
many. In 1292, Hefts became a principality of Germany,
though it infensibly after this, the counties were
communally termed a landgraviate. The territories were at-
vised under Philip the Generous, from whom the modern land-
graves are descended. In his will he divided his domi-
nions among four sons, but the eldest had half; from
him descended the house of Hefts Caffel: the young-
est received half one quarter part, and was the founder
of the house of Hefts Darmstadt. The two other brothers
dying without heirs, their territories were divided be-
tween the two surviving branches; but this division oc-
casioned long disputes, and many violent contentions.
The rank between the two landgraves is alternate. Thus
in Hefts are two sovereign families, namely, Caffel and
Darmstadt; between which the Heftsian territories are
divided; but several articles of sovereignty continued in
common. The right of primogeniture has been intro-
duced and confirmed by former emperors. In both
houses are princes appanaged: those of Hefts Caffel are
Hefts Philipsthal, and Rothenburg, or Rhinels. Hefts
Homburg is the only appanage of Hefts Darmstadt. The
annual revenue of Hefts Caffel is estimated at about
1,200,000 rixdollars. Those of Darmstadt at 600,000.
The military establishment for Caffel, before the late
revolution, consisted of three regiments of foot-guards,
ten regiments of infantry, a regiment of life-guards,
a regiment of gendarmes, three regiments of cavalry,
two of dragoons, a corps of hussars, a corps of chafleurs,
another of artillery, and seven regiments in garrison.
That of Darmstadt, since the revolution in Germany, of
a regiment of foot-guards, two squadrons of dragons,
two regiments of infantry, and four battalions of militia.
Hefts is divided into Upper and Lower, and subdivided
into five districts, which take their names from rivers,
which have appeared on the setting of the sun. It was
called Phicist or Lucifer, when it preceded the sun.
Cic. de Nat. D. 1, c. 2.

HESPERS, a river of France, which runs into the
Sambre five miles below Landrecy.

HESPIN, a river of Wales, which runs into the
Ems; and Diek, which five rivers give name to five dis-
tricts.

HESPERITIS, in ancient geography, a country of
Africa. Died. 4.

HESPERUS, in mythology, a son of Japetus, brother
To Atlas. He came to Italy, and the country
received the name of Hesperia from him, according to
some accounts. He had a daughter called Hesperis,
who married Atlas, and became mother of seven daugh-
ters, called Atlantides or Hesperides. Died. 4. The
name of Hesperus was also applied to the planet Venus,
which first appeared after the setting of the sun. It was
called Phicist, or Lucifer, when it preceded the sun.

HESPOS, a town in the duchy of Guelderland: five
miles east of Bommel.
against the protestants are held in high estimation by the catholic, men of
Hesychius; afterwards, bishop of Ghent, to attend the council of Trent; and he died of a stroke of apoplexy in 1566, when only in the forty-
fourth year of his age. The most considerable of his works is his large Catechism, which is not merely a succinct exposition of catholic opinions, but a body of moral theology, taken from the fathers, and particularly from St. Augustine. It was first printed in 1578, 8vo; and afterwards much enlarged, in 2 vols. 1595. He was also, the author of Commentaries on St. Matthew, 1577, 8vo, on the First Epistle to Timothy, and on the First Epistle of St. Peter, 1565, 8vo, on the Canonical Epistles of St. John, 1599, 8vo &c.
HESSEI AN FLY, f. A mischievous insect in North America, often very destructive to the crops of wheat in that country. It was supposed to have been first carried into America by the Hessian troops at the commencement of the American war, in their bread-corn, or flour wheat, as it never had before been noticed on that continent; and its depredations upon the wheat crops commenced in Long Island, where the Hessian army landed. The name of He fian fly has been derived from Hefian, the name of the bishopric which may probably be a species of Cur c ul o, or of Thr ipsis, which fee.

HEST, f. [h word, Sax. ] Command; precept; injunction. Commonly written he:
Thou shalt afflict the not devourer,
As him that doth thy lovely lefts depife.

HES T ER, or E A T H E R, a woman's name.
HES TER, a town of Sweden, in the province of East Gothland: twenty-five miles westward of Linkoping.
HES T I A E, in ancient geography, a town of Enbera.
HES T R A, a town of Sweden, in the province of Smaland: fifty-five miles west of Wexio.
HES T Y, among the Gauls, the name of the Mars of the Romans, Lucus.
HES YCA TH S IES, f. [ 

H E S Y C H IUS, of Alexandria, a celebrated lexicographer, placed by different writers in the fourth, and at the end of the sixth century: and some have supposed him to be the same person as the patriarch of Jerusalem of that name. From the infusion of scriptural words in his Dictionary, it is concluded that he was a Christian, unless those paffages should have been added by another hand. The work of Hesychius, which has reached our times, is a Greek lexicon or vocabulary, accounted by several critics as one of the most valuable treatises on Greek language. It has been enriched by the learned notes of Daniel Heinsius and others. The best editions are those of Schrevelius, 4to. 1665, and of Alberti, Leyd. 2 vols. folio, 1746.

H E S Y C H IUS OF MIL ETUS, flourished under the emperors Julian and Julianus. He composed an Universal History from the reign of Belus to the death of Ammianus; and two books, De Viris doctris clari, and De R ebus Patris Conflantinopolitanis, both in Greek. The two latter works were edited in Greek and Latin by Meursius, who added his own notes, with those of Adrian Junius and Henry Stephens. This edition was printed at Leyden in 1613, 12mo. The style is elegant, and the narration bears the marks of veracity.

HET ER A R CHA, f. [ f rom φρετος, Gr. a friend, and βασιλις, government.] The head of a religion house; the head of a college; the warden of a corporation. Scott.

H E T E R O C L I T E, f. [from κλίτις, Lat. clitus and κλείω, Gr.] Such nouns as vary from the common forms of declension, by any redundancy, defect, or otherwise. Clarke. —The heteroclite nouns of the Latin from which this word is derived in the first letter of the rudiments of the tongue. Watts. —Any thing or person deviating from the common rule. —He is a heteroclite, for he wants the plural number, having only the single quality of words. Overbury.

H E T E R O C L I T I C, adj. [from the fubft. Singular. —It is impossible for a man of fenee to guard against the mortification that may be given him by fools, or heteroclite characters, because he cannot foretell them. Shufemone.

H E T E R O C L I T I C A L, adj. Deviating from the common rule. —In the mention of fins heteroclitical, and such as want either name or precedent, there is oft times a fin, even in their histories. Broome.

H E T E R O CR ANY, f. [from ηόρσος, Gr. another, and κραν δος, the head.] With physicians, a pain in one part of the head. Scott.

H E T E R O DOX, adj. [heterodox, Fr. τρόξασις and ηιζες. ] Deviating from the established opinion, not orthodox. —Partiality may be observed in some to vulgar, in others to heterodox, opinions. Locke.

H E T E R O D O X Y, f. An opinion peculiar. —Not only a simple heterodoxy, but a very hard paradox it will seem, and of great absurdity, if we say attraction is unjustly appropriated unto the loadstone. Broome.

H E T E R O D O X Y, f. The quality of being heterodox. Heterodoxy and heterodox are nearly synonymous, and differ much more from orthodoxism than orthodoxy and orthodoxy.

H E T E R O D R O M U S V E C T I S, or LE VER, f. In mechanics, a lever in which the fulcrum, or point of suspension, is between the weight and the power; being the same as what is otherwise called a lever of the first kind.

H E T E R O G E N E A L, adj. [heterogenus, Fr. τροξασις and ηιζες, Gr.] Not of the same nature; not kindred. —The light whole rays are alike refrangible, I call simple, homogeneal, and similar; and that these rays are some more refrangible than others, I call compound, heterogeneous, and dissimilari.

H E T E R O G E N E I T Y, f. [heterogeneit, Fr. from heterogeneus.] Opposition of nature; contrariety or dissimilitude of qualities. Opposite or dissimilari part.

H E T E R O G E N E O S, adj. [from τροξασις and ηιζες, Gr.] Not kindred; opposite or dissimilari in nature. —I have observed such heterogeneous bodies, which I found included in the mals of this landstone. Woodward.

H E T E R O G E N E O S B O D I E S, are such as have their parts of unequal density. It has been supposed that different bodies have been conjoined together as to greater and lefs; being of such different colours.

H E T E R O G E N E O S L I N E, is that which consists of parts or rays of different refrangibility, reflexibility, and colour.

H E T E R O G E N E O S N U M B E R S, are mixed numbers, consisting of integers and fractions.

H E T E R O G E N E O S P A R T I C L E S, are such as are of different kinds, natures, and qualities; of which generally all bodies confit.

H E T E R O G E N E O S Q U A N T I T I E S, in mathematics, are those which cannot have proportion, or be compared together as to greater and lefs; being of such different kind and consideration, as that one of them taken any number of times never equals or exceeds the other: As lines, surfaces, and solids, in geometry.

H E T E R O G E N E O S S U R D S, are such as have different radical signs: as √ and √ 2 ; or √ 0 and √ 20.

H E T E R O S C I I, f. [of φρετος, Gr. another, and σκευ, a shadow.] In geography, are such inhabitants of the
the earth as have their shadows at noon projected always the same way with regard to themselves, or always contrary ways with respect to each other. Thus, all the inhabitants without the torrid zone are Heterociti with regard to themselves, since any one such inhabitant has his shadow at noon always the same way, viz. always north of him in north latitude, and always south of him in south latitude; or these two situations are Heterociti each other, having such shadows projected contrary ways at all times of the year.

HETEROSPERMUM, j. [Gr. from σπερμον, another, and ωνομα, a number.] A medical term applied to a pulse which is not proper or natural to the age of the patient.

HETEROUSIANS, j. [from ους, another, and σως, Gr. substance.] A branch of the Arians, who held that the Son was of a substance different from that of the Father. Dith. of Arts.

HEU'RA, or EU'RA, a celebrated country of Italy, situated on the west of the Tyber, which was peopled by colonies from Greece, and thence named Magna Graecia. It originally contained twelve different nations, which had each its respective prince or chief. Their names were Victantes, Chlun, Perunthus, Cortenetus, Arretini, Vetulonon, Volaterrani, Ruffellani, Volsci, Tarquinii, Falisci, and Casretani. The inhabitants were particularly famous for their confidence in omens, dreams, auguries, &c. They proved powerful and relentless enemies to the rising empire of the Romans, and were not finally subdued, but after much effusion of blood, by' the hands of Hellenic arms. They were conquered only after much effusion of blood.

Mr. Bryant says, that, "when the Hetrurians settled in Italy, they founded many places of strength, and were reputed to have been the first who introduced the art of fortification. They worshipped the Sun, fyled Zen, and Zeeon; whose temples were called Tur-Zeeon: and in consequence of one of the principal names by which their country was distinguished, was Turzenia. The Hetrurians occupied a large tract of sea-coast; on which account they worshipped Poseidon. They erected upon their shores towers and beacons for the safety of navigation, which they called Tur-Aim; whence they had a full farther denomination of Tur-Aim, and their country was named Tur-Aim: the Tur-Aim of the later Greeks. All these appellations are from the same object, the towers which they erected. They were thought to have been the inventors of trumpets; and in their towers upon the sea-coast there were people appointed to be continually upon the watch both by day and night, and to give a proper signal, if any thing happened extraordinary. This was done by a blast from a trumpet, and Triton was hence termed to have been Neptune's trumpeter. He is accordingly described by Nonnus, L. 17, 2. Heuchera dichotoma, or dichotomous heuchera: stem branched; peduncles two-flowered, axillary; leaves linear-lanceolate, opposite, entire on the stem. This is a species which recedes a little in point of the appearance of the flower from the characters of the genus; yet not so much as to justify the institution of a new genus for it. The whole plant is hairy; the stem at first profusely covered with hairs; but little known; and people were obliged to make use of what was nearer at hand, the conches of the sea, which every fish afforded. By founding these they gave signals from the top of the towers, when any ship appeared; and in the manner in which they are the instruments is the instrument which was termed Triton. It is described thus by Nonnus: "Triton was hence termed to have been Neptune's trumpet."
HEU'CHIN, a town of France, in the department of the Straits of Calais, and chief place of a canton, in the district of St. Pol: two leagues and a half north-north-west of St. Pol.

HEU'DICOURT, a town of France, in the department of the Meuse, and chief place of a canton, in the district of St. Mihiel, and four and a half west of Pont-a-Mousson.

HEU'DICOURT, a town of France, in the department of the Somme, and chief place of a canton, in the district of Péronne: three leagues north-north-east of Péronne.

HEVE'A, f. in botany. See Siphonia.

HEVE'LIUS (John), a celebrated Polish astronomer, born at Danzig in 1611. He studied the mathematics under Peter Cruger, and soon made a rapid proficiency in them. In 1630 he set out on his travels for improvement and spent four years in Holland, England, France, and Germany; where he formed connections with many philosophers and mathematicians in those countries. On his return to his native city, he built an observatory upon the top of his house, and constructed excellent telescopes himself, with which he began diligently to observe the heavens. He was the first who observed that phenomenon called the libration of the moon; and he made several important observations on the other planets. He drew up a large catalogue of the stars; and collected many of the unformed ones into new classifications of his own formation. The first of his publications appeared in 1647, entitled Seientographia, sive Lune Descriptio; etque accurata tam macularum ejus quam motuum diversiorum, aliarumque omnium Vicissitudinum Phaenomena, Tabulae,isque Opt deprekenfarum, Delineatio, &c. The second part of this work was published in 1654, with numerous copper-plates engraved by himself. In 1654, he published two epistles, in Latin; one to Riccioli, Concerning the Libration of the Moon; the other to Bullialdus, On the Eclipse of both Luminaries. From 1656 to 1666, he made several important observations on the other planets; and in 1661, he published treatises On the Aspect of Saturn and his Phænomena, as discovered in the Sun's Disk, May 3, 1661; and the History of a New Star in the Neck of Cetus, and another in the Beak of Cygnus. An Illustration of some astronomical Discoveries of Mr. Horrox, in his Treatise on Venus, as discovered on the Sun's Disk, November 24, 1659, with Observations on some extraordinary Parallels and Parheles, seen by himself at Danzig; and other astronomical pieces set forth in the Philosophical Transactions for 1673. In 1668 he published his Cometographia, five Tractatus de Comets, &c. folio, representing the nature of comets; with a history of all the comets from the beginning of the world down to the present time; illustrated with a curious engraving of his invention. In 1673 he published the first part of his Machina Caelis, continens Organographiam, five Instrumentorum astronomicorum omnium accuratum Deductiones, &c. folio, as a specimen of the exactness both of his instruments and observations; which had been questioned in England by the ingenious Mr. Hooke. In the following year that gentleman published Astronomiae Veteris et Literarum Huius Parte del Machina Caelis, &c. in which he treated Hevelius in a very unbecoming manner, and threw out unhandsome reflections upon him, which were greatly resented. In short, the dispute grew to such a height, that in 1679 Dr. Halley went, at the request of the Royal Society, to examine Hevelius's instruments, and the observations he had made with them. Dr. Halley gave a very favourable account of them in a letter to Hevelius; while Hooke managed the controversy so negligently, that he was universally condemned, though the reference has been made in such a false and a half long, very spreading. Native place uncertain.

Propagation and Culture. It is propagated by parting the roots in autumn, and should be planted in a shady situation. There is little beauty in this plant, but being hardly enough to thrive in the open air in England, it is preferred in some gardens for the sake of variety. Native place uncertain.

HE'PDUM, a town of Holland, on the Linge: four miles and a half north-north-east of Gorcum.

HEULL'ILY-LE-GRAND, a town of France, in the department of the Upper Marne, and chief place of a canton, in the district of Langres: two leagues south-east of Langres.

HEUM'AN (Christopher-Augustus), first professor of history and theology in the university of Gottingen, born at Alftadt in Weimar, in 1651. He studied theology and philosophy at Jena; and in 1717, he was nominated professor in the Gymnasia of Gottingen; in 1728, he took the degree of doctor of theology at Halle; and continued to discharge the duties of his office with great zeal and fidelity till 1743, when he requested and obtained leave to resign his employment. He gave as a reason for wishing to retire from his academic labours, that he had long considered the doctrine of the Lutheran church, in regard to the sacrament, erroneous, and had adopted that of the reformed church. He threw his ideas on this subject into the form of an essay, and sent the manuscript to a learned friend, with a request that it might be published after his death, which took place in 1764, when he had attained to the age of eighty-three. As he carefully preserved all his letters, they were collected after his death, and deposited in the royal library at Hanover. His works most deserving of notice are as follow: 1. De Anonymis & Pseudonymis Libri duo, Jena, 1711, 8vo. 2. Parerga Critica, 1712, 8vo. 3. Alia Philosophorum, Hales, 1715-1727, 3 vols. 8vo. 4. Concellus Republicae litterariae, sive Via ad Historiam litterariam, Han, 1718, 8vo. 5. Nova Sylloge Dissertationum Rostochii, 1721, 8vo. 6. Parerga Critica, 1725, 8vo. 7. Parerga Critica, 1731, 8vo. 8. Sylloge Dissertationum, Goett, 1752. 10. De Prudentia Christiana, Liber, 1761, 8vo.

HEUR'NIUS (John), an eminent medical professor, born at Utrecht in 1543. He studied at Louvain, and then at Paris, where he was the medical disciple of Duret. He then visited the schools of Italy, and took the degree of doctor of medicine at Turin. Returning, after an absence of twelve years, to his native country, he was made physician to the counts of Egmont, and had a place in the council of Utrecht; but he quit the advantage in 1578, upon an invitation to undertake the
the medical professorship at Leyden. This post he occupied with great credit for twenty years; when he died of the stone, in 1601. He published several works of Hippocrates, with commentaries, and occasionally with a new version. Of his own compositions, the principal are: 1. Praxis Medicinae nova Ratio, 1587, several times re-published. 2. Influtuiones Medicinae, 1592. 3. De Morbis Capitis Humani, 1594: a very learned performance, and containing some rare observations of his own. 4. De Morbis Oculorum, Aurium, Nafii, Dentium, & Oris, 1602: these are posthumous works, edited by his son Otho; as was likewise a book, De graefffus Morbis Mulierum, & De Morbis
novis & mirandis Hysteriae, 1607.

HEUSDEN, a town situated on the borders of Brabant. It is built in the midst of morailles, nearly surrounded by a branch of the Meule; yet fortified with a castle, battions, and hornworks. The jurisdiction of the magistrate extends over several villages, almost to Bois-le-Duc. On the 28th of July, 1680, the lightning set fire to the powder-magazine, which killed many people, and did considerable damage to the town. The quantity of powder blown up was seventy thousand pounds, besides some thousands of grenades. It is fifteen miles north-east of Breda, and seven south-east of Gorcum. Lat. 51.45. N. lon. 22.34. E. Ferro.

HEUSZDORF, a town of Germany, in Upper Saxony, and principality of Weimar: eight miles north-east of Weimar.

To HEW, v. a. part. hewn, or hewed. [Beaan, Sax. hauen, Dut.] To cut by blows with an edged instrument; to hack:—Thou hast hewed it quite in twain. Spenfer.

Upon the joint the lucky feel did light,
And made such way that hew'd it quite in twain. Spenser.

To chop; to cut:
He from deep wells with engines water drew,
And ured his noble hands the wood to hew. Dryden.

To cut, as with an axe; with the particles down, when it signifies to fell; up, to excavate from below; off, to separate:
He that depends
Upon your favours, swims with fins of lead,
And hews down oak's with rubies. Shakespeare.

Scarce can I speak, my choler is so great:
Oh! I could hew up rocks, and fight with flipt. Shakespeare.

Yet shall the axe of justice hew him down,
And level with the root his lofty crown. Sandys.

To form or shape with an axe; with out.—Thou haft hewed thee out a felpucure here, as he that hewed him out a felpucure on high. If. xxii.—To form laboriously:
The gate was adamant; eternal frame;
Which hew'd by Marshmefelf, from Indian quarries came,
The labour of a god. Dryden.

HEW, f. Hewing:
Then to the rest his wrathfull hand he bend's:
Of whom he makes such hauick and such hews,
That swarms of damned foules to hell he tend's. Spenser.

HEWER, f. One whose employment is to cut wood or stone.—At the building of Solomon's temple there were fourscore thousand hewers in the mountains. Brown.

HEWING, f. The act of cutting with a keen instrument.

HEWSON (William), an ingenious anatomist, born in 1739. He wrote Inquiries into the Properties of the Blood, and the Lympfic System, 2 vols. 8vo, and disputed with Dr. Monro the discovery of the lymphiac system in oviparous animals. He died in 1774.

HEXA., Adj. in botany, having fix feeders.

HEXACHORD, f. in ancient music, a concord called by the moderns a sexth. See Music.

HEXAGON, f. [hexagon, Fr. & Jagona, It. hexagonum, Lat. hexagonus, Gr.] In geometry, a figure of fix sides, and consequently of so many angles. When these are equal, it is a regular hexagon. The angles of a hexagon are each equal to 120°, and its sides are each equal to the radius of its circumfcribing circle. Hence a regular hexagon is inscribed in a circle, by setting the radius off six times upon the periphery. And hence also, to describe a regular hexagon upon a given line, describe an equilateral triangle upon it, then the vertex of the centre of the circumfcribing circle. The side of a hexagon being s, its area will be $2s^2\sqrt{3}/2$.

HEXAGONAL, adj. Having fix sides or corners.—As for the figures of crytal, it is for the most part hexagonal, or fix-cornered. Brown.

HEXAGONY, f. A figure of fix angles.—When I read in St. Ambrose of hexagonies, or fixangular cells of bees, did I therefore conclude that they were mathematicians? Bramhall.

HEXALYRIA, f. [from 6, fix, and φιλή, a woman.] In botany, one of the orders in the ninth and thirteenth classes of the Linnaean system; containing those plants which have fix ftyles in the flowers. See vol. iii. p. 257.

HEXAHEDRON, f. [from εξαεδρον, Gr.] One of the five regular or Platonic bodies; being indeed the same as the cube; and is so called from its having fix faces. The square of the side of a hexahedron is equal to the square of the diameter of a sphere, and hence the diameter of a sphere is to the side of its inscribed hexahedron as $\sqrt{3}$ to 1. In general, if $A$, $B$, and $C$, be put to denote respectively the linear side, the surface, and the solidity of a hexahedron or cube, also $r$ the radius of the inscribed sphere, and $R$ the radius of the circumfcribing one; then we have these general equations or relations:

1. $A = 2r = \sqrt{3}B = \frac{1}{2}B = \frac{1}{2}C$.
2. $B = 2\sqrt{3} = \frac{1}{2}A = \frac{1}{2}C = 3\sqrt{3}$.
3. $C = 8\sqrt{3} = \frac{1}{2}A = \frac{1}{2}B = 2\sqrt{3}$.
4. $r = 3\sqrt{3} = \frac{1}{2}A = \frac{1}{2}B = \frac{1}{2}C$.
5. $r = 6\sqrt{3} = \frac{1}{2}A = \frac{1}{2}B = \frac{1}{2}C$.

HEXAHEDRON, a town or European Turkey, in the province of Romania; twelve miles south of Gallipoli.

HEXAMETRON, or HEXAMETRUM, f. A celebrated wall, built by the emperor Emanuel, in the year 1433, over the iliuus of Corinth. It took its name from its 6, fix, and μέτρον, which in the vulgar Greek signifies a mile, as being six miles long. Its use was to defend the Peloponnesus from the incursions of the barbarians. Amurat II, having raised the siege of Constantinople in 1424, demolished the hexametron, though he had before concluded a peace with the Greek emperor. The Venetians restored it in the year 1463, by 30,000 workmen employed for fifteen days. The Turks made several attempts upon it, and were as often repulsed; they at length, however, succeeded in totally demolishing it.

HEXANDRIA, f. [from 6, Gr. 6, and στέργα, a man.] In this way, the name of the six chief classes in Linnaeus's system; comprehending those plants which have hermaphrodite flowers with fix equal ftyles. This is a natural.
HEXAPETALOUS, adj. [from hex., six, and petal., a petal.] In botany, flowers having six leaves in the corolla.

HEXAPHYLLOUS, adj. [from hexa., six, and phyllo., a leaf.] Compounded of six leaves; having six leaves.

HEXAPEATEOUS, adj. [from hexa., six, and petal., a petal.] In botany, flowers having six leaves in the corolla.

HEXAPHYLLOUS, adj. [from hexa., six, and phyllo., a leaf.] Compounded of six leaves; having six leaves.

HEXAPLUM, a very ancient town in the county of Northumberland, celebrated as the Axedunum of the Romans.

HEXAPOD, f. [Gr. and L.] An animal with six feet.—I take these to have been the hexapoda, from which the greater sort of beetles come; for that sort of hexapoda are eaten in America. Ray.

HEXASTIC, or HEXASTICUS, f. [hex., six, and stic., a stick.] A syloid of sixes.

HEXASTYL, or HEXASTYLOUS, adj. [from hexa., six, and stylos., a staff.] In grammar, a noun declined with six cases.

HEXASSTIC, or HEXASSTICUS, f. [hexa., six, and stic., a stick.] In botany, a kind of barley with six rows of ears in the ear. Phillips.

HEXASTYLOUS, f. In architecture, any building decorated with six columns in front.

HEXHAM, a very ancient town in the county of Northumberland, celebrated as the Axedunum of the Romans.

The approach to this town is very pleasing, the cultivated vale spreading itself on every hand, painted with all the happy emblemage of woods, meadows, and corn-lands, through which flows the river Tyne, the northern and southern streams, having united, forming upon the valley various broad canals, by the winding of its course. At the conflux of the rivers lies the beautiful retreat of Nether Warden, defended from the north-west by lofty eminences, and facing the valley towards the east, hallowed to the churchmen, as being the site of St. John of Beverley, a bishop of Hexham in So distant an age as 684. A little further, and opposite to Hexham, on an eminence, stands the church of St. John Lee, beneath whose feite the banks for near a mile are laid out in agreeable walks, formed in a happy taste, appertaining to the manor of the Jurin family, a modern building, erected at the foot of the defcent, and trending towards Hexham, having a rich lawn of meads between it and the river. From thence the vale extends itself in breadth, and is terminated with a view of the town of Corbridge. The hills, which arise gradually from the plain on every hand, are well cultivated, and adorned with the seats of many distinguished families. This town is 86 miles from London. Its population is computed at two thousand souls. The market-place, near the centre of the town, is a large square, in which is a convenient piazza for the markets, which are held twice in the week, on Tuesdays and Saturdays; and two annual fairs, August 3 and November 8.

This town is not incorporated, but governed by a bailiff and the jury of the manor. It had a monastery, founded in 1122, with liberties so large as procured it the name of a shire; and by an act of parliament in the reign of Henry VIII. it was of itself made a county-palatine. It also was the seat of a bishop in 674; but the diocess was so harassed and ruined by the Danes that no one would accept the bishopric, and therefore it was united to Lindisfarne in 883. The original church was raised by workmen brought from Italy, and is said to have been extended in by the builders of Hexham, who were of English; no part of which now remains. The present church is however a noble structure, containing many ancient tombs; and is attributed to its first prior. The architecture is a mixture of Saxon and Gothic. This church possessed that ignominious privilege called function, till taken away by a law, for the floor of peace is still preferred here. Whoever took possession of it was sure of reunion, and its privilege extended a mile from the church, in four directions, the extent of which was marked by a cros; and heavy penalties were levied, with excommunication, on whoever should dare to violate the sanctuary. In the choir was a beautiful altar, now converted into a pew. On the screen, at the entrance of the choir, are some strange monastic paintings, called the Dance of Death. The interior ornaments of the church are highly finished in the Gothic taste; the pillars clustered, but heavy; in the vault are several Roman altars, that have been used in the walls and ceilings, which supports the idea of a Roman station having occupied this spot. At the west end of the church are the remains of the priory. It was a spacious building with an adjoining cloister. The refrectory is still perfect, and serves as a room of entertainment at public times; it is spacious, with a roof of oak. The cloisters show them to have been elegant, richly embellished with pierced work of fruit and foliage. The town and priory were destroyed by the Scots in 1396, and pillaged again in 1346.

There are two ancient stone towers in Hexham: the one used as a court or salmons house, anciently an exploratory-tower, and belonging to the bishops and priors of Hexham; the other situated on the top of the hill towards the Tyne, of remarkable architecture, being square, containing very small apertures to admit the light, and having a course of corbels projecting a long way from the top, which seem to have supported a hanging gallery, and be speak the tower not to be at present near its original height. The founders of these places are not known.

The town, besides other charities, has an excellent grammar-school, well endowed. The town was, in 1571, annexed to the county of Cumberland; but only in civil matters; for its ecclesiastical jurisdiction is not the same with the rest of the county, it being still a peculiar archbishopric, belonging to the bishops of York, which was marked by a cros.

There is a very ancient town in the county of Northumberland. This defeat, which followed in the train of many other calamities, rendered the cause of the English altogether desperate. The town, besides other charities, has an excellent grammar-school, well endowed. The town was, in 1571, annexed to the county of Cumberland; but only in civil matters; for its ecclesiastical jurisdiction is not the same with the rest of the county, it being still a peculiar archbishopric, belonging to the bishops of York, which was marked by a cros.

HEXHAM has been unhappy in civil bloodshed; the daughters made by the Richmondshire military on the colliers, in their insurrection, is remembered with horror; no troops in the world could have stood with greater steadiness and military propriety than they did, sustaining the infults of an enraged crew of subterranean seavers, whilst the timorous magistrates delayed their command for defence, till the arms of the soldiers were entirely disarmed by the treachery of their officers; and an officer was shot at the head of his company, as he was remonstrating with the mob. Here is abundant bufliness for the antiquary; every part shows ruined castles, Roman altars, inscriptions, monuments of battles, of heroes killed, armies routed, and the devastating hand of war.
queen Margaret entirely desperate, as the cruelties practiced upon all her adherents made it very dangerous to her.

St. Oswald’s is an ancient hamlet north of Hexham, on the Picts’ wall. Here Oswald totally defeated Cedd-wall, a British usurper, who was killed on the first onset, and here Oswald, who was afterwards slain, set up the first cross in the kingdom of Northumberland.

Reapington, on the River Read, near Readmouth, where it falls into the Tyne, has been almost washed away by its river. It has many remains of antiquity, particularly inscriptions; many of which were copied about anno 1606 by Sir Robert Cotton, as well as since. It has many remains of antiquity, particularly inscriptions; many of which were copied about anno 1606 by Sir Robert Cotton, as well as since.

Steward’s Castle is near Hexham. Little now remains of it but a ragged gateway, which was defended by a drawbridge and portcullis, and some ruined walls on the south side, but a ragged gateway, which was defended by a drawbridge and portcullis, and some ruined walls on the south side. Here have been formerly a gate through the Picts wall. From hence to Chollerford the wall is yet entire in some places; but hence to Halton Slees there is only the middle of it seen.

Haydon is well of Hexham. Here is an ancient castle greatly in decay; the situation is formidable, and, from the solemnity of its ruins, it is at this time strikingly awful. It is situated on the well side of a deep glen, on a square old tower is yet standing; here having been formerly a gate through the Picts wall. From hence to Chollerford the wall is yet entire in some places; but hence to Halton Slees there is only the middle of it seen.

Heydon is governed by a mayor, a recorder, nine aldermen, and two bailiffs, who have the power of choosing Sheriffs, and are justices of the peace. It is from the borough, or by an honorary gift, at the discretion of the chief officers for the time being. The mayor is the returning officer.

Heydorff, a town of Germany, in Bavaria, and principality of Neuburg: twenty-three miles south of Nuremberg, and twenty-two miles north of Neuburg.

But friendly females meet with many graces.
And light-foot nymphs can chase the lingering night With lighter gestures, and tripe abound in sport.

Heydingfeld, a town of Germany, in Franconia, and bishopric of Wurzburg, situated on the Main: two miles south of Wurzburg.

Hey-Don, a pleasant well-built town, in that part of Yorkshire called Holderness, leated on a river that falls into the Humber. It is mentioned in the Domesday Book, and in 1742, great alterations were made. Here is an ancient castle, and county of Lippe: four miles north of Detmold.

Heydons, a pleasant well-built town, in that part of Yorkshire called Holderness, leated on a river that falls into the Humber. It is mention
of England, born at Burford in Oxfordshire, in the year 1600. He was instructed in grammar-learning in the free-school of that place; and in 1613 was entered of Hart-hall, now Hertford college, in Oxford. In 1620 he succeeded M. A. and was in the following year published his Microcosm, or a Description of the Great World, 400, which contains the substance of his public lectures on Cosmography. It was dedicated and presented to prince Charles, who received it and the author very graciously. By the public it was universally approved, and so speedily bought up, that the author was encouraged to prepare it for a new edition, with considerable additions, in 1624. In 1625 he was admitted to holy orders; and in 1625 he made a short tour to France, of which he published an account thirty years afterwards. In 1628 he accompanied the earl of Danby, in the capacity of chaplain, to the isle of Guernsey, of which his lordship was governor, and upon his return to England, after a short stay, wrote an account of his voyage, which was afterwards published with his relation of his excursion to France, above-mentioned. During the following year he took the degree of bachelor of divinity, and, through the interest of his noble patron, was made one of the chaplains in ordinary to his grace. He was in his favour with the bishop of Bath and Wells, on account of the zeal which he displayed for the support of the king's prerogative, and the claims of the clergy; and about this time he published his History of that most famous Saint or Saint, viz. St. George of Cappadocia, &c, 400, to which he subjoined, The Institution of the most noble Order of St. George, named the Garter, and a Catalogue of all the Knights of the Garter from the first Institution, &c. This work was graciously accepted by his majesty, who presented him to the rectory of Hemingford in Huntingdonshire, a prebend in the collegiate church of Welfminster, and the rich rectory of Houghton-le-Spring, in the bishopric of Durham; which he afterwards exchanged for the rectory of Alresford, in Hampshire. And so rapidly now was his career in public life, that in 1633 he was created doctor of divinity; in 1636 made treasurer of the cathedral church of Welfminster; and was also prebended by the prebendaries to the rectory of Hlip, near Oxford. This he exchanged, in 1638, for the living of South Warnborough in Hampshire, for which county he was then made one of the justices of the peace. In 1639 he was employed by archbishop Laud to translate the Scotch liturgy into Latin; and he was also chosen by the college of Welfminster their clerk, to represent them in convocation. On the breaking out of the war, Dr. Heylin withdrew to Oxford, where king Charles then held his head-quarters. In consequence of his loyalty, he was deprived of his curious and valuable library, and lost all his household furniture; besides being stripped of the profits of his preferments; so that for some time he wandered about from place to place, both himself and family suffering much from these distressing circumstances. In 1648, he went to Minster-Lovel in Oxfordshire, the seat of his elder brother, which he farmed for six or seven years of his nephew, colonel Heylin, and spent there much of his time in writing and study. He at length purchased his temporal estate, for which he compounded with the commissiorners at Goldsmiths-hall; and, quitting his nephew's farm, took up his abode at Abingdon in Berkshire. Upon the restoration of Charles II. he was reappointed to all his spiritualities, and in addition was made dean of Welfminster; and died in 1662, in the sixty-fourth year of his age. H. was a man of considerable commonplace, for which he compounded with the commissioners at Goldsmiths-hall; and, quitting his nephew's farm, took up his abode at Abingdon in Berkshire. Upon the restoration of Charles II. he was restored to all his spiritualities, and in addition was made dean of Welfminster; and died in 1662, in the sixty-fourth year of his age. Heylin was much delighted with his wit, and skilful in music. When his patronesses, queen Mary, came to the crown, he became a favourite at court; but on the accession of Elizabeth, he retired to Mechlin in Flanders, where he died in 1665. He wrote...
wrote several plays; 500 epigrams; A Dialogue in Verfe concerning English Proverbs; and The Spider and Fly, a Parable, in 4to. He left two sons, both of whom became Jesuits, and eminent men: viz. Ellis Heywood, who lived some time at Florence under the patronage of cardinal Pole, and became so good a master of the Italian tongue, as to write a treatise in that language, entitled *Il Moro*; he died at Louvain about the year 1572. His other son was Jasper Heywood, who resided at Oxford: he translated three tragedies of Seneca, and wrote various poems and devils; some of which were printed in a volume entitled *The Paradise of Dainty Devices*, 4to. He died at Naples in 1597.

**Heywood (Eliza), a celebrated novel-writer, born about the year 1695.** In the early part of her life, her pen, whether to gratify her own disposition, or the prevailing taste, dealt chiefly in licentious tales, romances, and memoirs. The celebrated Atlantus of Mrs. Manley served her for a model. She also attempted dramatic writing and performance, but did not succeed in either. Whatever it was that provoked the resentment of Pope, he gave full scope to it by distilling her as one of the prizes to be gained in the games introduced in honour of Dulness, in his Dunciad. Nevertheless, it seems undeniable that there is much spirit and ingenuity in the first part of her works, which the friends of virtue may perhaps with she had never meddled with all. But, whatever offence she may have been convinced of, and endeavoured to stone for, in the latter part of her life; as no author then appeared a greater advocate for virtue. Among her riper productions may be specified, 1. The Female Spectator, 4 vols. 2. Betty Thoughtles, 4 vols. 3. Jenny and Jenny Jelfamy, 3 vols. 4. The Invisible Spy, 4 vols. She died in 1759.

**Hezekiah, [Heb, the strength of the Lord.] A man's name.**

**Hezron, or Hazor.** See Hazor.

**Hezronite, y. A descendant of Hezron.**

**Hezekiah, [Heb, the strength of the Lord.]** A man's name.

**Hezekiah, y. A descendant of Hezron.**

**Hiba, a town of China, of the third rank, in the province of Chian-fi: ten miles south of Fuen-tcheou.**

**Hibaque, a district of North America, in the province of New Navarre, between Mayo and Sonora.**

**Hibastown, a town of the American States, in New Jersey: thirteen miles north-easterly of Trenton, and fourteenth north-west of New Brunswick.**

**Hibation, f. [from hio, Lat.] The act of gaping.**

**Hibatus, [Latin.] A chasm or gap; an aperture, or breach.**—Those hibatus's are at the bottom of the sea. *Woodward.*—The opening of the mouth by the succussion of the tongue to a final vowel. A defect in a manuscript copy, where none of it is lost or torn.

**Hibar.** See Ibarr.

**Hibb, a town of Hungary, sixteen miles north-east of Rolenburg.**

**Hibernial, adj. [hibernus, Lat.] Belonging to the winter.**—This star should manifest its warming power in the winter, when it remains conjoined with the sun in its hibernial conversion. *Brown.*

**Hibernia, the ancient name of Ireland.**

**Hibernia Nova.** See New Ireland.

**Hibernian, f. [from Hibernia, the ancient name of Ireland.] A native of Ireland.**

**Hibernian, adj. Belonging to Ireland.**

**Hibiscus, f. in botany, a genus of the class monandria, order polyanthia, natural order of columniferas, (malvacæ, fæfum.) The generic characters are—Calyx: perianthium double; outer many-leaved, permanent; leaflets linear: more rarely one-leaved, many-cleft; inner one-leaved, cup-shaped, half-five-cleft, permanent, or five-toothed, deciduous. Corolla: petals five, round-oblong, narrower at the base, spreading, fastened at the bottom to the tube of the stamina. Stamina: filaments very many, united at the bottom into a tube, at the top (in the apex and surface of this) divided and lost in antheric kidney-form. Pistillum: gyno round-oblong: style filiform, longer than the stamens, five-cleft at the top: stigmas headed. Pericarpium: capsule five-celled, five-valved; partitions contrary, doubled. Seeds: solitary or several, ovate-kidney form.—Effential Character. Calyx double, outer many-leaved; capsule five-celled, with many seeds.**

*Species.*

1. Hibiscus mohcheutos, or musk-hibiscus: leaves ovate, acuminate, ferrate: filaments very simple, petioles floriferous. Root perennial; falk single, two feet high or more; flowers large, purple. The native place is in Virginia and Canada. Cornutus affirms, and from him Ray and Morison, that it came from the woods of Africa; and we are informed by the latter, that it was introduced into the royal garden at Paris in 1644.

2. Hibiscus palusfris, or marsh-hibiscus: stems herbaceous, very simple; leaves ovate, slightly three-lobed, tomentose underneath; flowers axillary. Stems a foot and a half in height, unbranched and annual. The flower is very large, and of a bright purple colour. Native of Virginia and Canada, in moist ground. Flowers here in July and August.

3. Hibiscus micranthus, or minute-flowered hibiscus: leaves roundish, entire, ferrate; corollas reflex, obtuse. Root annual; stem round, upright, simple, a foot in height. Native of the East Indies, where it was found by Koenig.

4. Hibiscus micropyllos, or minute-leaved hibiscus: leaves oval, rough-haired, ferrate in front; stem shrubby. 5. Hibiscus urens, or turnip hibiscus: tomentose; leaves kidney-shaped, crenate; calyces woolly. Found at the Cape of Good Hope.

5. Hibiscus præmorbus: leaves roundish, shrubby hibiscus: leaves roundish, tooth-ferrate, reticul. This is a beautiful shrub. The leaves are usus were truncate in the middle, crenulate, five-nerved, and soft. The flowers are small and yellow.
of the Cape of Good Hope; gathered there by Mr. Francis Maffon, and introduced into the royal garden at Chiew in 1774. It flowers from June to August.

8. Hibiscus cordifolius, or heart-leaved hibiscus: arborescent, entire; leaves cordate, dentate, pubescent; flowers white, large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of South America, where it was observed by Mutis.

9. Hibiscus rosasinensis, or round hibiscus: leaves cordate, rounded, entire; calyx acute, spreading; flowers white, large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of China, where it was introduced by Mr. Joseph D. Seubert. It flowers from June to August.

10. Hibiscus coccineus, or scarlet hibiscus: flowers large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of Brazil.

11. Hibiscus suaveolens, or rose-leaved hibiscus: leaves cordate, rounded, entire; calyx acute, spreading; flowers white, large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of China, where it was introduced by Mr. Joseph D. Seubert. It flowers from June to August.

12. Hibiscus mutabilis, or changeable rose-hibiscus: leaves cordate, five-angled, obtuse, coarsely dentate; flowers white, large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of China, where it was introduced by Mr. Joseph D. Seubert. It flowers from June to August.

13. Hibiscus indicus, or Indian hibiscus: flowers white, large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of India, where it was introduced by Mr. Joseph D. Seubert. It flowers from June to August.

14. Hibiscus rosa-sinensis, or China-rose hibiscus: leaves ovate, acuminate, serrate; flowers white, large, round, with a bough of the corolla reflex, twisted, and in a cluster at the top. Native of China, where it was introduced by Mr. Joseph D. Seubert. It flowers from June to August.
HIBISCUS.

Hibiscus.
HIBISCUS.

long and the same breadth; these are indented at their extremities; but the lower segments are not much more than an inch long, and have stalks four inches long. The flowers are produced from the wings of the flanks toward the top, spreading on short peduncles; they are composed of five large sulphur-coloured petals, which, when open, spread five inches wide; they have a dark purple bottom; and are succeeded by large, pyramidal, five-cornered, erect, teed-vessels, which are filled with pretty large seeds, having little smell or taste. In Japan they use the mucilage of the root for giving confidence to paper, as Thunberg informs us. Native of China and Japan.

30. Hibiscus abelmoschus, or target-leaved hibiscus; or muk-mallow: leaves subpetulate, cordate, crenate, and hispid. This sort grows naturally in the East Indies; the Society Iles; and also in the West Indies, where it is commonly known by the title of maf/; the French cultivate these plants in their American islands, the seeds of which are annually sent to France in great quantities, so that they certainly have some way of rendering it useful, as it seems to be a consider fore branch of trade. It rises with an herbaceous stalk about nine or four feet high, sending out two or three side-branches, garnished with large leaves cut into six or seven angles, which are acute; they stand on long footstalks, and are placed alternately. The stalks and leaves are very hairy. The flowers come out from a kind of stalk upon pretty long peduncles, which stand erect; they are large, of a sulphur colour, with dark purple bottoms, and are succeeded by pyramidal, five-corned capsules, filled with large seeds of a very mucify odour. A few of these seeds are sufficient to perfume a whole room. They may undoubtedly be used in fortifying powders and pomatums, instead of the animal musk, which is a scarce and dear commodity; and are accordingly put to that use abundantly at Paris. In Arabia and Egypt they grind these seeds, and mix the powder with their coffee, to render it more agonizable to the head and stomach. The official names are cbed.

31. Hibiscus albus, or white hibiscus; or white mul of the Congo. This is an annual; stern upright, round, a foot high, nearly the thickness of a finger; stem unarmed, flowers drooping. Root perennial. Stem three feet high, narrow. It grows near Venice, in marshy places; and was found by Lycere near Atract on. In 1774, by Malfon; and flowers here in August.

32. Hibiscus Virginicus, or Virginian hibiscus: leaves cordate, acuminate, ferrate; stem unarmed, flowers drooping. This is an annual; stem upright, round, and a half in height, nearly the thickens of a finger; green, somewhat tomentose, rough with a few minute dagger-points. Native of the East Indies.

33. Hibiscus Zeilanicus, or Ceylon hibiscus: leaves cordate-haftate; peduncles alternate, one flowered, jointed. Native of the island of Ceylon.

34. Hibiscus blissonis, or Virginia hibiscus: leaves cordate-haftate; peduncles alternate, one flowered, jointed. Native of the island of Ceylon.

35. Hibiscus prunifolius, or vine-leaved hibiscus: leaves five-angled, sharp, serrate; stem unarmed, flowers drooping. This is an annual; stem upright, round, and a half in height, nearly the thickens of a finger; green, somewhat tomentose, rough with a few minute dagger-points. Native of the East Indies.

36. Hibiscus pentacarpus, or five-seeded hibiscus: leaves five-angled, sharp, serrate; stem unarmed, flowers drooping. This is a shrub the height of a man and upwards. Stem upright, branching, leafy, serrated, which are not very thick; the flowers are not great, but rarely, in the island of Jamaica, in coppice near the coast. Its common name there is Cone mo; the negroes affirming that it came originally from Africa. Sir Hans Sloane says it grows on the Red Hills very plentifully.

37. Hibiscus vitifolius, or vine-leaved hibiscus: leaves five-angled, sharp, serrate; stem unarmed, flowers drooping. This is an annual; stem upright, round, and a half in height, nearly the thickens of a finger; green, somewhat tomentose, rough with a few minute dagger-points. Native of the East Indies.

38. Hibiscus albus, or white hibiscus; or white muss, from the Arabic ab-el-maf/; this signifies grain or seed of milk; and bamma mofckus, to the head and stomach. The officinal names are cbed.

39. Hibiscus Althaeus, or broad-leaved hibiscus: leaves cordate, angular; lower subhaftate; upper subtubate, Raceme terminating. The whole of this is hoary with a white pubescence. Native of the Society Iles.

40. Hibiscus fraternus, or brotherly hibiscus: leaves three-lobed, outer calyxes with round rays, mucronate and concave at the tip. Stem herbaceous, smooth and even, as is the whole plant. Native of Surinam.

41. Hibiscus Ethyopicus, or dwarf wedge-leaved hibiscus: leaves subulate, slightly three-toothed; the upper ones opposite; flowers terminating. Native of the Cape of Good Hope, where it was observed by König. It was introduced into the royal garden at Kew in 1774, by Malfon; and flowers here in August.

42. Hibiscus trionum, or bladder hibiscus; leaves three-lobed, girted, partitioned, annual plant, growing naturally in some parts of Italy and Austria. It has been long known in the English gardens by the title of Venice mallow. Gerarde (who cultivated it in 1566) and Parkinson call it also mallow or flower of an hour, and good night at noon, or good night at nine; for Gerarde affirms that it opens about eight of the clock, and flits up again at nine. On the 16th of August 1756, the day being dry and fine, the thermometer at 66°, the barometer nearly at 306, sunshne and clouds alternately, with a cool gentle breeze at north-east; the plants in a southern exposure, but open, in the border of a shrubbery, the flowers began to open soon after daybreak, and the year good, and were not finally closed till after four. Being observed every day to the 6th of September they continued opening usually at nine or soon after, if the weather was fair. The 31st of August being wet, they did not open all day. The 5th of September being very cloudy, they did not open till after ten, and were never quite expanded all day; they closed from four to half after five, according to the weather; and, the afternoon of September 5th, being very fine, they did not close till half after fix. The flowers certainly are of short duration, and in hot weather continue but few hours open; however there is a succession of them daily for a considerable time, in June, July, and August.

43. Hibiscus elatus, or lofty hibiscus: leaves cordate, roundifh,
The Target-leaved Hibiscus, or Musk Mallow.
roundish, entire; peduncles very short, one-flowered; calyx ten-toothed. This is a tree growing to a con- siderable height; the wood is dark olive color; the bark pretty smooth; the trunk tall and straight. The flowers are large and open, not unlike those of the yellow lily, either in size or appearance. It is reckoned an excellent timber. All the tender parts of the tree abound with a delicate mastic, which may be used indifferently for the same purposes as the gum of Myrrh. The bark is made into ropes of all sorts. Native of Jamaica, where it is called maho, or mahoe-tree.

42. Hibiscus clandesinus, or modest hibiscus: stem virgate, rough with hairs, shrubby, however three-toothed; flowers minute, cloved. Stem round, branched, icabrous, three feet high; covered with little, sharp, divaricating, bristles, growing by threes. Native of Senegal.

43. Hibiscus tomentosus, or rough hibiscus: leaves heart-shaped, angular-serrate, tomentose; stem woody, seven or eight feet high, sending out many side branches towards the top, covered with a whitish bark. Leaves about four inches long, and three broad towards their base, ending in acute points, and covered with little, sharp, divaricating, bristles, growing by threes.

44. Hibiscus cordifolius, or cordate-leaved hibiscus: leaves heart-shaped, hispate, crenate; flowers lateral; calyx five-toothed. This is a perennial root, but an annual plant. The roots were sent from the Bahamas islands, and succeeded in the Chelsea garden, where the plants produced plenty of flowers, but did not ripen their seeds. It rises with several stalks from the root, four feet high; with leaves, ending in acute points, of a light green on their upper side, but hoary on their under, and slightly indented on their edges, standing upon long footstalks; the flowers are produced at the top of the stalks; they are very large, and of a purple colour with dark bottoms, and are succeeded by short capsules ending in acute points.

45. Hibiscus Bahamensis, or Bahama hibiscus: leaves oblong-cordate, smooth, toothless, hoary underneath; with very large flowers. This has a perennial root, but an annual plant. The seeds were sent from the Bahamas islands, and succeeded in the Chelsea garden, where the plants produced plenty of flowers, but did not ripen their seeds. It rises with several stalks from the root, four feet high; with leaves, ending in acute points, of a light green on their upper side, but hoary on their under, and slightly indented on their edges, standing upon long footstalks; the flowers are produced at the top of the stalks; they are very large, and of a purple colour with dark bottoms, and are succeeded by short capsules ending in acute points.

Propagation and Culture. The greater part of this genus are natives either of the East or West Indies, and must be treated accordingly. The first, second, twenty-second, thirty-fifth, thirty-sixth, and fortieth, are hardy enough to bear the open air in England. But of these, the first, second, and thirty-fifth, seldom flower in the open air here, unless the summer proves very warm, though the roots will live, if they are planted in a sheltered situation.

The only way to have these plants flower in this country, is to keep the roots in pots, and to shelter them under a frame in winter, and in the spring plunge them into a gentle hot-bed, which will cause them to put out their stalks early; and when the stalks are so high as to reach the glusses, the pots may be removed into a glasse-cave; where, if they are duly supplied with water, and have plenty of air in hot weather, they will flower very well in July, and in warm seasons will ripen their seeds.

The bladder hibiscus, No. 40, is propagated by seeds, which should be sown where the plants are designed to remain, for they do not bear transplanting well; if the seeds are sown in autumn, the plants, coming up early in the spring, will flower in the summer, and those which are sown early in the spring will succeed them; so that, by sowing them at three different seasons, they may be continued in succession till the frost stops. These require no other culture but to keep them clean from weeds, and thin them where they are too close; and, if the seeds are permitted to scatter, the plants will come up full as well as when sown, so that it will maintain its situation unless it is weeded out. The fifth, sixth, twenty-fourth, twenty-eighth, and thirty-ninth, require the protection of the greenhouse, cape-cave, or glasse-cave; these being natives of the Cape of Good Hope, except the twenty-eighth, which is from South Carolina. The red, being the far greater number, or three-fourths of the whole, must be kept in the darkroom, where some of them will make a splendid figure; particularly the fifteenth and nineteenth, and the middle of the latter end of March, in pots filled with light earth, and plunged into a gentle heat, will take root; but the plants so raised are not so good as the seedlings. The several varieties may be increased by grafting upon each other, which is the common method of propagating those with striped leaves.

HIBISCUS.
good hot-house; for those which will not, we must have recourse to the countries where they grow naturally. Many of them are perennial, and may also be propagated by cuttings; particularly the China rose, which is the most ornamental of all them.

HIBISCUS MALVAVISCUS. See ACHANIA.

HIBISI, a town of Asia Minor, in the province of Carmania: eighty miles west of Satalia.

HIBRAN, or St. Mary, an island in the Indian Ocean, near the island of Madagascar: fifty miles long and fourteen wide. Lat. 16. 32. S. lon. 72. 48. E. Ferro.

HIBRID, or HIBRIS, [Lat.] A mongrel or mule; also one born of parents of different countries.

HICCIUS DOC'CIIUS, [Corrupted from heic of abitus; this, or here, is the learned man; used by jugglers of the same. A cant word for a juggler; one that plays fast and loose.

HICCOUGH, or SINGULTUS, [A spasmodic affection of the stomach, oesophagus, and muscles subservient to deglutition, arising from some temporary oppression of the stomach, oesophagus, diaphragm, &c., and sometimes from a general affection of the nervous system.

HICETAS, or NICETAS, the Syracusan, an ancient philosopher and astronomer, who taught that the sun and the stars were fixed, and that the globe of the earth had a rotatory motion, like a wheel. From a comparison of his opinions with those of other ancient philosophers, Copernicus appears to have derived the main part of his true system of the universe. He flourished about 160 years before Christ.

HICKERY, a town of the American States, in Pennsylvania: twenty miles north-east of Fort Franklin.

HICKERY, f. in botany. See Juglans.

HICKES (George), a learned English divine, and a bishop among the nonjurors, born at Newhall, Yorkshire, in 1642. He was educated in the rudiments of grammar at North Allerton; and in 1659, was admitted grammar at North Allerton; and in 1662. He afterwards received the degree of B. A. in 1662. He afterwards became a servitor at St. John's college, in Oxford. Soon after he was made a fervitor at St. John's college, in Oxford. Soon after which the king collated him to the deanery of Worcestershire, in 1692. He was educated in the rudiments of grammar at North Allerton; and in 1659, was admitted grammar at North Allerton; and in 1662. He afterwards was appointed new bishops, and nominated to that office by the deprived bishops, Dr. Lloyd of Norwich, Dr. Turner of Ely, and Dr. White of Peterborough, at the Rev. Mr. Giffard's house, in Southgate. On this occasion Dr. Hickes was consecrated suffragan bishop of Thetford, in which dignity he continued during the remainder of his life. He lived above twenty years after his consecration, and died in 1715, when in the seventy-fourth year of his age. He was a man of very extensive learning, and particularly skilled in the old northern languages and in antiquities. Of his integrity he afforded abundant evidence, by the sacrifices to which he submitted rather than suffer his conscience to be violated; and his moral conduct is said to have been unexceptionable and exemplary. The principal of his works were, 1. Institutiones Grammaticae Anglo-Saxonicae & Methodicae, &c. 1659. 4to. 2. Antique Literaturae Septentrionalis Libri duo, &c. 1705, folio, which is held in high estimation on the continent, as well as in this country; and three volumes of Sermons, the last of which was published after his death. Besides these, Dr. Hickes wrote a multitude of treatises in defence of himself and the rest of the nonjurors, and their religious tenets.

HICK'LING, a small town of Norfolk, with a weekly market on Saturdays; situated in a marshy ground, not far from the sea, 119 miles from London.

HICK'MANS, a settlement of the American States, in Fayette county, Kentucky, on the north side of Kentucky river: ten miles north of Danville, and twenty-two south of Lexington.

To HICK'UP, v. n. [corrupted from hiccough.] To sob with a convulsed stomach; to be affected with the singultus:

Quoth he, to bid me not to love,
Is to forbid my pulse to move,
My beard to grow, my ears to prick up,
Or, when I'm in a fit, to hickup.

HID, or HIDDEN, part. pass. of hide:
Thus fame shall be achiev'd, renown on earth;
And what most merits fame, in silence hid.

Nature and nature's laws lay hid in night;
God said, Let Newton be; and all was light.

HID'DAGE, /. [hidagium, Lat.] An extraordinary tax payable anciently to the kings of England for every hide of land. This taxation was levied not only in money, but in provision, armour, &c. and, when the Danes landed at Sandwich in 994, king Ethelred taxed all his lands by hides; so that every 310 hides found one ship furnished, and every 200 hides a hide of store, and one saddle, to arm for the defence of the kingdom, &c. Sometimes the same word, or the word hidegild, was used for the being quit of that tax.

HID'ALGO, f. A title given in Spain to an inferior order of nobility. See the article Spain.

HID'DIKEL, the name of the third river of Paradise.

HID'AGE, /. [hidagium, Lat.] An extraordinary tax payable anciently to the kings of England for every hide of land. This taxation was levied not only in money, but in provision, armour, &c. and, when the Danes landed at Sandwich in 994, king Ethelred taxed all his lands by hides; so that every 310 hides found one ship furnished, and every 200 hides a hide of store, and one saddle, to arm for the defence of the kingdom, &c. Sometimes the same word, or the word hidegild, was used for the being quit of that tax.

HID'ALGO, f. A title given in Spain to an inferior order of nobility. See the article Spain.

HID'DIKEL, the name of the third river of Paradise.

HID'ALGO, f. A title given in Spain to an inferior order of nobility. See the article Spain.
A certain quantity of land. [hide, hyde, Fr. hide, barbara¬
ous Lat. as much as one plough can till.] A plough¬
hid, a hide or plough-land, a yard-land,
which, in some old manuscripts, is laid to be
sixty miles wide. See Spelman.

It is now almost obsolete in all its uses:

HIDE, v. n. [Diegan, Sax.] To hide; to go in
haste.—The youth, returning to his mistress, took
Graves.

HID'DEBOUND, adj. A horde is said to be hidebound
wherewith to harden his ribs and back, that
you cannot pull up or loosen the one from the other. It
sometimes comes by poverty and bad keeping; at other
times from over-riding, or a forfeit. [In trees.] Being
in the state in which the bark will not give way to the
growth:

Like fented hidebound trees, that jult have got
Sufficient sap at once to bear and rot.

Swift.

And still, the harder and hidebound
The damfels prove, become the fonder.
Hudibras.

HIDE,/. _hideux_, Fr.] Horrible; dreadful;
Horribly; dreadfully; in a man¬
ner that shocks:
Sirike.

HIDES, n. He that hides.
HIDE,/. A place to hide in.

HI-EN-TANG, a town of China, of the third rank, in
the province of Hon-kuang: forty miles south of
On-tang.

HIERACI'UM, f. [from _hierax_, Gr. pertaining to hawks;
because hawks were supposed to sharpen their fight with
the juice. Hence also the English name.] Hawkweed;
In botany, a genus of the class syncephalum, order polygo-
"nate, natural order of composite femifolocule.
(Cichoraceae; _H. j^f^j_). The generic characters are—Calyx
common imbricate, ovate; scales several, linear, very un-
equal, longitudinal, and incumbent. Corolla: compound,
imbricate, uniform; corollules hermaphrodite, nume-
rous, equal, proper monopetalous, ligulate, linear, trunc-
cate, five-toothed. Stamina: filaments five, capillary,
very short; antherae cylindric, tubulous. Pistillum:
Germination subovate; style filiform, the length of the stamens;
figs two, bowcd back. Pericarpium: none; calyx
converging, ovate. Seeds: solitary, obtusely four-cor-
cered, short; down capitillary, fepala. Receptaculum
naked.—Effential Character. Calyx imbricate, (or calyce-
late;) ovate; down simple, fepala; receptaculunm naked.
Species. I. With a one-flowered fcape. 1. Hieracium
inacanum, or hoary hawkweed: leaves quite entire, some-
what toothletted, lanceolate, scabrous. Root thick,
 perennial, blackish on the outside, white within. Stems
round, upright, twice or thrice the length of the leaves,
with only one or two subfetaceous leaflets on them,
and a single flower at the end. Leaves all next the root,
narrow-lanceolate, somewhat attenuated at the base into
the petiole, from two to six inches in length, eretic,
thickish, hoary on both sides, with a close nap of white
hairs flatelie at the tip; the stem also has the fame form
of fettate hairs, only fettile. Calyx hispid, with like
hairs, ascendine; the scales of the calyx are acuminate.
Corolla yellow. The receptacle is clothed with
v hairy
Hieracium, though it be a higher plant and bears more flowers in their properties? Pollich is of the same opinion; feeling that this is scarcely a distinct species from H. dilution, or creeping hawkweed: leaves ovate; petioles dilated; scapes with one or two flowers.

Hieracium alpinum, or alpine hawkweed: leaves oblong, entire, toothed; scape almost naked; calyx hairy. This species is principally distinguished by the whole of the plant, especially the calyx, being covered with long white hairs; and the scales of the calyx being remarkably loose. The root is perennial and fibrous. The root-leaves are many, varying in form from bluntly-ovate to ovate-lanceolate; they are most frequently entire about the base, but sometimes they are slightly toothed; they are always sprinkled on both sides with white woolly hairs. The flower is generally about five inches high, with hairs scattered over it, which are white, except at the base, where they are fuscous; it is usually quite naked, or has only a small lanceolate bracte or two at the top. It is terminated by one large flower, sometimes two, seldom more; calyx swelling, before it opens globular, black, with white hairs standing out; corolla pale yellow. Seeds oblong, five-corrugated, rough or brown, crowned with a few, fillet, brittle, white. Native of Lapland, Swisserland, Dauphiné, Savoy, Carniola, Siberia, and the mountains both of Wales and Scotland; flowering in July and August.

Hieracium taraxaci. See Aspargia taraxaci, vol. i.

Hieracium alpestrum: leaves lanceolate, toothed, smooth; scape with a leaf and a flower or two; calyx hirsute, cylindrical. Native of Austria and Siberia. Perennial.

Hieracium venosum, or vein-leaved hawkweed: leaves wedge-shaped, rough with hairs; scape very thick, upright. Leaves radical, marked with blood-red veins. Flowers yellow, small. Native of Virginia and Maryland.

Hieracium pilosella, or mouse-car hawkweed: leaves quite entire, ovate, tomentose underneath; stem thowing out runners. Mr. Woodward remarks, that he has never observed the mouse-car with more than one flower on a peduncle: Haller says that it has rarely two flowers; but Pollich affirms that it is sometimes found with two or three. According to Linnaeus, the flowers commonly open at eight in the morning, and close about two in the afternoon. An infect of the coccus or cochineal kind is found at its roots; but it has not been observed in England. It differs from other milky plants of this class, in having a calyced, not an imbricate, calyx: hence Gouan has inserted it in the genus Crepis, Nat. of Austria, Carniola, the Palatinate, &c. on mountains; flowering in May, and ripening its seeds in June.

Hieracium pulmonium, or lung-leaved hawkweed: leaves ovate; petioles dilated; scapes with one or two flowers. See Crepis pungens, vol. i. p. 448.

Hieracium cymosum, or small-flowered hawkweed: leaves lanceolate, entire, hairy; scape almost naked, hairy at the base; flowers in a kind of umbel. Flowers almost umbellate, but with the pedicels branched; in which circumstance it differs from H. praemorsum: it is different from H. auricula, in not having the leaves smooth on the upper surface. Haller has two species numbered fifty-one; this is the second of them. He describes the leaves as having short hairs, and as being blunt at the end; in number two or three on the stalk; which is two feet high, not branched, except the peduncles be considered as branches, hirsute all over. Flower very small, yellow, with the calyx hirsute, in which it differs from the foregoing No. 51, or H. praemorsum. According to Monf. Villars, this species is easily distinguished. The stem is upright, about a foot high, terminated by a cyrne of flowers so close that the peduncles are seen with difficulty, though they are branched. Leaves oblong, hairy, reddish, rough, and entire; the flower-stalk has one or two at the base; it is hairy, and marked with reddish glands, from which the hairs take their rise; the calyx is also hairy. He mentions two varieties; one with red flowers, and another with from three to four to six scattered flowers, as large again as the common form. Native of Ruffia, Denmark, Germany, Swisserland, Dauphiné; flowering in June.

Hieracium praemorsum, or truncate-root hawkweed: leaves ovate, somewhat toothed; scape branched, the upper flowers coming out first. Kroller distinguishes this from the foregoing species, by the leaves not being quite entire, but somewhat toothed, and also broader than in that, being five or six inches in length, and an inch or an inch and a half in breadth. Pollich describes the leaves as ovate, acuminate, very slightly sinuate-toothed, running down into the petiole, three or four inches long, somewhat pubescent on both sides. This herb watches from seven o'clock in the morning to six in the evening, when the panicule of flowers all nods. Native of Sweden, Germany, Swisserland, and Siberia; and flowers in May and June.

Hieracium aurantiacum, or orange-flowered hawkweed: leaves entire; stem almost naked, quite simple, hairy, corymbose. Root perennial, creeping. Stem scarcely branched, (except with the peduncles,) bearded with white hairs placed on black glands; according to Monf. Villars, the flowers are borne on a foot and a half, or two feet high. Native of Austria, Swisserland, Silefia, Dauphiné, Piedmont. It flowers from June to autumn. It varies much in the colour of the flower, from red to orange, and several shades of yellow. It is called by our old writers golden mouse-ear; and, when of a dark colour, Grim the collier.

Hieracium Gronovii, or Gronovius's hawkweed: stem paniced, almost naked; root-leaves obvate, quite entire, hairy. Native of Virginia.

Hieracium Gmelini, or Gmelinin's hawkweed: stem paniced; root-leaves ovate, ferrate, smooth. Stem a long span in height, round, firm, upright, undivided for the two-thirds of the length, then dividing into subhirsute branches of various lengths, forming a sort of umbel. Native of Siberia: found by Steller.

Hieracium sanctum, or Palefin hawkweed: leaves lyrate, blunt, toothed. It differs much from hypochaeras, in having naked, but not falcate, peduncles; from hieracium, in having a calyced, not an imbricate, calyx; hence Gouan has inserted it in the genus Crepis. Native of Palefin, the south of France, and the county of Nice.

Hieracium Capenae, or Cape hawkweed: lower peduncles higher; leaves oblong, toothed, fuscous. See
Scape a foot high, even, with a few very small awl-shaped leaves, thinly scattered over it. Native of the Cape of Good Hope.

3. With a leafy stem. 17. Hieracium montanum, or mountain hawkweed: stem with one or two flowers; leaves lanceolate, toothed. Stem single, undivided, straight, from a foot to two and even three feet in height, in a fertile soil. Linnaeus made it a Hypochaeris, but it appears to have no calyx, and the loft of the leaf is not much into this genus. Mons. Villars makes it an Andryala, on account of the silky hairs of the receptacle. Native of the mountains of Savoy and Dauphiné, in pastures.

18. Hieracium paniculatum, or panicked hawkweed: stem upright; leaves alternate, lanceolate, naked, toothed; pedicel capitular. Stem a foot high, round, woolly-white at the bottom, smooth at the top. Observed in Canada by Kalm.

19. Hieracium porrofifolium, or leek-leaved hawkweed: stem branched; leaves lanceolate-linear, almost entire. Stem a foot high, round, almost naked, having only a single leaf or two on it, and very few leafless branches. The whole plant, according to Villars, has the smell of the wild lettuce, in a greater degree than any of the hawkweeds. Native of the south of France, the Valais, Silefsia, Italy; perennial; introduced by Drs. Pictain and Fothergill, in 1775.

20. Hieracium chordroilides, or gum-fuccory hawkweed: stem branched; leaf-stems elongate-toothed, furrowed, smooth; leaf-stems lanceolate. Stem to four feet high, even. Native of the south of France, Austria, and Silefsia; flowering in June and July.

This plant varies exceedingly, as appears from the different figures which are given of it. The general appearance is as follows: Root single, producing one slender stem, a foot or fifteen inches high, cylindrical, having soft hairs scattered over it, slightly fringed, reddish towards the base; sometimes naked, or nearly so, sometimes clothed with leaves similar to the others, only more acute. The root-leaves vary considerably, but the most usual form is oval-lanceolate, pointed at both ends, and marked with a few large teeth towards the base, entire upwards, hairy on both surfaces, but the footstalk and midrib mossy.

Flowers in a branched panicul on separate peduncles, with each an awl-shaped bracte; corolla yellow. Seeds nearly cylindrical, furrowed, smooth, dark purple, crowned with a sessile down, as long as the peduncle, the length of the calyx. Linnaeus observes, that the flowers open about six in the morning, and close about two in the afternoon. Lightfoot informs us, that about eighteen days elapse between the first expansion of the flower and the ripening of the seed. It is a perennial plant, found in woods, on old walls, on hasty banks, &c. and flowers in June and July, sometimes in May. By our old authors it is called French or golden lungwort.

8. H. Sylvaticum. In this variety, which is made a distinct species by Gouan and Villars, the root-leaves are narrower, and more slightly toothed. Villars says, that it frequently has the height of three or four feet; that the stems are frondate, leafy, and terminate in several branches; that the leaves are oblong, lanceolate, often toothed, dusky green, a little ash-coloured, and soft to the touch. The peduncles have two scales near the calyx, as in the common plant, but the calyx is larger; the seeds are smooth, bellied, very dark purple, shorter than the other sorts, very like those of H. fabandium, which bears much resemblance to this plant in other respects. The root or down is short, yellowish white or brown, brittle, and fragrant. Johnson relates, that it was found by Mr. Coote, in the old Roman camp at Sidmonton, near Newberry.

7. H. macrocaulis. With very narrow leaves, on rocks by the rivulet between Shap and Anna-well, in Westmoreland.

2. H. rotundifolia. With roundish-ovate leaves; thus described by Mr. Woodward: Root thick, woody, running deep among loose fones, terminating in long dark-brown fibres the thickness of packthread. Stem about six inches high, naked, bearing one flower on the summit, and two imperfect stellate ones a small way beneath it. Leaves small, lanceolate, the lower part of the stem is slightly hairy, the upper part and calyx more so. He gathered this elegant variety on Coazick Scar, near Kendal, in Westmoreland: and it has been found at several other places in the north.

22. Hieracium humile, or dwarf hawkweed: stem few-flowered, febrly higher than the lower leaves, which are hirsute and gilded.

23. Hieracium paludosum, or marsh hawkweed: stem panicked; leaves clasping, toothed, smooth; calyxes hispid. Stem from one to two feet high, hollow, furrowed, smooth, generally bright purple at the base. Flowers single, smaller than in H. murorum; they open at fix in the morning, and close at five in the afternoon.

Native of many parts of Europe, in moist meadows and woods, and by the sides of mountains, rivers, and rivulets; with us in several parts of the northern counties of England, and in Scotland.

24. Hieracium lurratum, or Siberian hawkweed: stem many-flowered; leaves lanceolate, smooth; calyx and pedicels hispid. This is nearly allied to the foregoing. It is a native of Siberia.

25. Hieracium cerinthoides, or honeywort hawkweed: root-leaves obovate, toothed; stem-leaves oblong, half-clasping. Stem eighteen inches high, branched at the top, bearded at the base only, or between the flaths of the root-leaves, with long white hairs, closely crowded together, in other parts quite smooth, glaucous, shining, slightly fringed. Leaves thin; the bottom ones of various sizes, from three inches to a foot in length, from an inch and a half to two inches in breadth, feldom frayed, narrowing into the petiole and dentacert, with a few very small teeth from the base only to the middle, thence always quite entire to the end; the younger ones are greener, only with white hairs underneath; those which are more advanced are quite bald, except at the base of the petioles and along the midrib, of a yellowish green, or glaucous. Gouan remarks, that it varies in its native place, with a stem scarcely a hand in height, with two flowers, and very few leafless branches, with two flowers, and many leafless branches, with two flowers, and many leafless branches.

26. Hieracium amplexicaule, or leaf-clasped hawkweed: leaves stem-clasping, heart-shaped, somewhat toothed; peduncles one-flowered, hispid; stem branched. Allied to H. villosum, and still more to pyrenaicum. The whole plant has hairs glandular at the tip, thinly scattered over it. Stem a foot high, fringed; branches usually two-flowered from the upper axis. Leaves cordate (the lower ones oblong), green on both sides, finely toothed. Native of the Pyrenean mountains. Gouan, who makes the next a variety of this, says that no species varies more, but that it may easily be distinguished by its pleasant balsamic smell whilst young, and by the upper leaves being two awl-shaped bracte; corollae at the end. According to Villars, the constant characters of the species in all the varieties are, the great quantity of glandular hairs, which give it the smell of baum or new honey; the opennes of the lower scales of the calyx; the ruflet colour of the whole plant; the smooth root; and the hairs of the egret brittle, and elbowed at the base.

27. Hieracium pyrenaicum, or Pyrenean hawkweed: leaves stem-clasping, obovate-lanceolate, toothed backwards; stem simple; calyxes loose. This species also varies so much as not easily to be determined. It partsakes of this genus, Crepis, and Picris; and seems very nearly allied to Crepis spinosa, vol. v. p. 349. Seeds oblong;

Hieracium.
Hieracium molle, or soft-leaved hawkweed: leaves lanceolate, obtuse, with the lower ones petioled; flowers on peduncles, forming a kind of corymb. Root perennial, blackish, thick, and furnished with long white round fibres; it produces, annually, a simple, upright, filated, purplish, somewhat hairy, leafy stem, of about a foot or two in height; the top of which is divided into a few single-flowered or two-flowered footstalks, of about an eich and a half long, and a little hairy. The leaves are oval, obtuse, quite entire, villose on both sides, and soft. Seeds filiated, ruffecent, crowned with a feffile down, which appears toothed when magnified. It grows about the borders of the subalpine woods, flowering in July, and producing feeds in Auguft; but, when cultivated in a garden, it flowers about the end of May and beginning of June, and grows more branchy from the bosomes of the leaves; but in other respects does not change its habit. Native of Austria; discovered also in Scotland, in the year 1789, by Mr. Dickfon.

Hieracium fipitatum, or fiped hawkweed: stem branched, with only a leaf or two; leaves toothed; down filated. This plant grows a foot high, or higher, on billy meadows, flowering in June, and teeding in July. From a perennial, bident, oblique, from the length of an inch and a half, and the thicknesses of a quill, of a palfi brown colour, and increased by small fibres, it produces annually a solitary, round, fowm hat filated, fililuicious stem, smooth below, and above rather hifpid, with scattered dark hairs; it is either furnished with one leaf, or elfe is quite aphyllous, and divided into two, three, or four, fingle-flowered footstalks, which are upright, and have each a small leaf or fipule beneath. It recedes from Hieracium in the footstalk of the down; fo that it might feem to confitute a fingular genus. Native of Austria.

Hieracium villofum, or villofe hawkweed: stem branched; leaves hisifute; root-leaves lanceolate-ovate, toothed; stem-leaves clapping, heart-shaped. This species varies, fays Jacquin, fo much in different foils, that it is difficult to give such a defcription as will agree with every individual. Root knobbled, unequal, blackifh, perennial, with round whitifh fibres. Stem upright, round, hairy, about half a foot in height, greenish ah-colour, often dotted with brown; it has fiew leaves on it, and is commonly quite simple, terminated only by a fingle flower, with sometimes, but very feldom, another peduncle or two from the upper axils. The flower is large, handfome, and yellow; calyx loofe, with black dots, with white wool; the effeifte egret, appearing toothed with a magnifer. The heads on this plant are almost all very white, long, and feathery; fhere are fome, however, shorter, and terminatfed by a gland. Native of Dauphine, Switzerland, Austria, Bofhemia, Silefia, in mountain-paffures. Found also on moif rocks on Ben-Nevis mountain, in Scotland, by Mr. James Dickfon, in 1789. There is a variety, which rifes eighteen inches high.

Hieracium glutinofum, or clammy hawkweed: leaves lanceolate, runcinate, somewhat fcareous; flowers in umbels. This has the habit of Crepis tectorum, vol. v. p. 349.

Hieracium Kalmii, or Kalm’s hawkweed: stem upright, many-flowered; leaves lanceolate, toothed; peduncles tomentose. Stem erect, narrower than in H. fabaudum, even. Flowers small, terminating, upright. Found by Kalm in Pennsylvania.

Hieracium undulatum, or wavy-leaved hawkweed: stem branched; leaves elliptic, toothed, waved, hairy; height about a foot. Native of Spain; introduced in 1778, by Meffrs. Kennedy and Lee.

Hieracium fprengerianum, or branched hawkweed: stem branched; leaves half-film-claping, oblong, re-
47. Hieracium Liottardi, or Liottard's hawkweed: leaves lanceolate, toothed; stem upright, two-flowered. This plant is cottony, like the last, and small. It is distinguished by its lanceolate toothed leaves. Native of Dauphiné.

48. Hieracium Jacquinii, or Jacquin's hawkweed: leaves pinnatifid at the base, hispid, green, cylindrical hairs glaucous, pinnatifid at the base, hispid, green, cylindrical hairs glaucous. Stem at the base; this is allied to the preceding in its habit and leaves, to No. 35 in its flowers, and to No. 26 in its glandular hairs. Stems from a foot to two feet in height, firm, villose, flat, with some auxiliary bifidivided branches. Native of Dauphiné; perennial.

51. Hieracium albidum, or white hawkweed: leaves glaucous, quite entire; root-leaves elliptic, white, quite entire. Root perennial, long, oblique, simple, woolly. Stem about a foot high, commonly divided into two, and sometimes into three, elongated unequal peduncles. Flowers reddish on the outside, pale yellow within. Seeds short, brown crowned by a feafer eget of simple hairs, but with a long ruffle. The whole plant is rough, of a yellowish green, covered with glandular hairs, that give it a disagreeable smell. Native of Dauphiné and Savoy, on high mountains, in sunny pastures.

58. Hieracium florentinum, or flowering hawkweed: leaves lanceolate, glaucous; stem branched, stiff. This species is intermediate between H. porrifolium and murorum. Leaves middle-flowered, lanceolate, smooth, with black or brown spots, on a glaucous or ash-coloured ground, very finely toothed. Stem firm, branched, a foot or eighteen inches in height, having little, oval, acuminate, fessile leaves at the division of the branches. Native of Dauphiné.

53. Hieracium chloroamines, or transparent hawkweed: leaves lancolate, glaucous, and hairy; stem oblique, hoary, and hoary, few-flowered. Stem from a foot to two feet in height, a little inclined at the base, terminated by two or three solitary flowers. The leaves vary much; their shining cinereous colour and pointed extremity are their most constant characters; they have a few long hairs, especially at their base and on their back, with which are gathered some length of the stem. They are blacker. Native of Dauphiné and the Alps, in the beds of torrents in Austria, if it be Jacquin's plant.

56. Hieracium Linarii, or Linnaeus hawkweed: leaves roundish, quite entire; stem almost naked; receptacles brown, cars wide, cottony, ash-coloured. Stem thin, a few inches high, terminated by two or three flowers. Native of Dauphiné and Italy.

58. Hieracium awl-leaved: leaves lanceolate, toothed; stem leaves clasp, white. Stem about a foot high, with an upright stem, not putting out runners. Flowers small, heaped on the top of the stem. Perennial; native of Swifterland, the Valais, and Piedmont.

62. Hieracium florentinum, or flowering hawkweed: leaves lanceolate, glaucous; stem branched, stiff. This species is intermediate between H. porrifolium and murorum. Leaves middle-flowered, lanceolate, smooth, with black or brown spots, on a glaucous or ash-coloured ground, very finely toothed. Stem firm, branched, a foot or eighteen inches in height, having little, oval, acuminate, sessile leaves at the division of the branches. Native of Dauphiné.

66. Hieracium Limbeyi, or Limbey's hawkweed: leaves densely tomentose, curlied or finulate at the base; stem spreading. Leaves oval, pointed, curled at the edge, which renders them slender, pointed, like the bowl of a spoon; they have also infinutes more or less deep at their base; they are entirely white with the down that covers them; this is composed of hairs a line in length, with little branches on them at right angles with the main hair. Stem low, divided into two or three branches of the same length with the main hair. This is terminated by a flower; the calyx and stem have hairs on them of the same kind. Native of Dauphiné.
remain; the following summer they will flower and produce ripe seeds, and the roots will continue some years, if they are not planted in a rich moist soil, which frequently occasions their rotting in winter. They may also be propagated by parting the roots in autumn. See Andryala, Apacria, Crepis, Hedypnus, Hyoseris, Hypochaeris, Lapsana, Leontodon, Pectis, Picris, Senecio, Seriola, Sonchus, and Tragopogon.

HIERANOSOS, s. [from οἶς, Gr. holy, and οἶος, a god.] The suppositio, so called because it is supposéd to be that disorder which our Saviour cured in thóse who were said to be posseled of devils.

HIERA PICRA, s. [from οἶς, Gr. holy, and πέπεσος, pierced.] A composition of focotrine aloes mixed up with honey; and this named from its supposéd divine virtues.

HIERAPOLIS, in ancient geography, a town of Phrygia, abounding in hot springs; and deriving its name from the number of its temples. There are coins exhibiting figures of various gods who had temples here; and of this place was Epictetus the stioic philosopher. It is now called Bambukaliyé; and it is situated near the Scamander, on a portion of Mount Nefogis, distant fix miles from Laodicea. Its site appears at a distance as a white lofty cliff; and upon arriving at it, the view which it presents is truly wonderful. Dr. Chandler's description of it is as follows:— "The vast slope, which at a distance we had taken for chalk, was now beheld with wonder, it seeming an immense frozen cascade, the surface wavy, as of water at close fixed, or in the headlong course of a torrent. Round about us were many high, bare, stony, ridges; and one with a wide basis, and a slender rill of water, clear, soft, and warm, running in a small channel on the top. It is an old observation, that the country about the Meander, the soil being light and friable, and full of faults generating inflammable matter, was undermined by fire and water. Hence it was bordered in hot springs, which, after passing under-ground from the reser voir, appeared on the mountain, or were found bubbling up on the plain; and hence it was subject to frequent earthquakes; the mirous vapour comprized in the cavities, and sublimed by heat or fermentation, furting its prifon with loud expolations, agitating the atmosphere, and shaking the earth and waters with a violence as extensive as destructive; and hence, moreover, the peiifional grottos, which had subterraneous communications with each other, derived their noifome effluvia; and, serving as smaller vents to these furraces or hollows, were regarded as the apertures of deadly fumes rising up from the bowels of the earth. One of the most famous was that which fpace was filled with black thick mud, fo that the bottom could be scarcely discerned. The air, to those who approached it, was innocent on the outside of the fence, being clear of the miti in ferene weather, it remaining then within the boundary; but there death abode. Bulls, as at Nysa, were Saved to have dropt down, and were dragged forth without life; and some Iparrows which Strabo let fly, infantly fell faneels. But ennuiis the priests of Magna Mater, or Cybele, could go in quite to the aperture, lean forward, or enter it, unharm'd; but they held their breath, as their vifages testified, and sometimes until in danger of suffocation. Strabo was in doubt whether all eunuchs cou'd do this, or only they who had the temple; and the temple was defended by a wide ditch and fentinels. Thus, as in a thousand other inftances, the more effects of natural caufes were made subfervient to the craft and fordid views of the priesthood.

HIERAPOLIS, or BAMBUKALIYÉ, a city of Syria Proper, remarkable for the temple of the Syrian gods of Algarati, or Magog, who was fliged to have the face of a woman
Hierarch, f. [hieros, sacr. and acheron, Gr. hierarch, Fr.] The chief of a sacred order.

Hierarchial, adj. Of an hierarchy. — The great hierarchial standard was to move. Milton.

Hierarchical, adj. [hierarchique, Fr.] Belonging to sacred or ecclesiastical government.

Hierarch, f. [derived from the Greek words hieros, sacr., and archon, authority, or government; or the power of taking the lead and giving direction.] The Greeks used the terms Hipparchia, "Hipparchy," for the government of the horse; 
Nearchia, "Nearchy," for the Government of ships and fleets; 
Tetrarchia, "Taxarchy," for the command of ranks in the army; 
Pentarchia, "Triarchy," for the command of ranks; 
Gendarmerie, "Phylarchy," for direction over a tribe. So Tetrarchia, "Hierarchy," the government of religious and civil things, sacred. Every department in life requires order; and order implies distinction of place; according to which, some must point out what is to be done, and others must execute. Where there exists not such arrangement, all must be in confusion. Man is by nature a religious being. Hence, societies of men are religious. As such, they have among them religious institutions. Of whatever denomination they may be the persons, who take the lead in conducting the serious and sacred concerns of those institutions; whether they be styled prelates, or elders, or ministers, or priests, or bishops; such persons do virtually, and according to the true and real meaning of the term, constitute a "Hierarchy." It is only by limitation of its just sense, and by partial application of it under such restriction, that "Hierarchy" is taken to mean "episcopal direction," to the exclusion of other "direction in things sacred." If we would speak correctly, and if we would follow the true import of the word, "Hierarchy" subsists as much among the chief ministers in the church of Geneva and Scotland, as in the church of Rome or of England. For wherever there is regular form and order of sacred things, there is "Hierarchy," the very essence of which, is conducting that regular form and order.

The plural of this word is often used by Milton, who expresses by it the pre-eminence of angels according to their different degrees in which they are supposed to be ranked. Thus, speaking of angels, he says, "Glory they sung to the most High; good will to future men; and in their dwellings peace; glory to Him, whose just avenging ire Had driven out th' Ungodly from His sight, And th' habitation of the just: to Him Glory and praise, whose wisdom had ordain'd Good out of evil to create; instead Of spiritual races, a better race to bring Into their vacant room, and thence diffuse His good to worlds and ages infinite. So fang the Hierarchies." Par. L. vii. 182.

Milton, like other writers, when treating of angels, might probably have in his mind the works attributed to Dionysius the Areopagite. But as those works are spurious, mystical, and fantastical, we shall not refer to them. If we view the history of the author, whoever he was, that assumed the name of St. Paul's illustrious convert at Athens.

Hieratic, C, adj. [from hieros, Gr. sacr.]. Set apart for sacred uses; belonging to a fine sort of paper used for sacred purposes.

Hierax, or Hieraca, a learned Egyptian, the founder of a class of heretics, called after him, Hieracites. He was a native of Leontopolis, and flourished about the year 302. He is said to have been well skilled in the sciences, particularly in medicine; possessed great acuteness of mind; and rendered himself illustrious by his sanctity and virtue. According to Epiphanius, he maintained, that the principal object of Christ's office and ministrations was the promulgation of a new law, more severe and perfect than that of Moses; and from hence he deduced, that the use of flesh, wine, wedlock, and of other things agreeable to the outward senses, which had been permitted under the Mosaic dispensation, was absolutely prohibited and abrogated by Christ. He excluded from the kingdom of heaven, children who died before they had arrived to the use of reason, upon the supposition that God was bound to administer the rewards of futurity to those only who had fairly finished their victorious conflict with the body and its lusts. He maintained that Melchizedec, king of Salem, was the Holy Ghost; and he also denied the resurrection of the body, expecting only a spiritual resurrection. It appears that he had many followers among the Egyptian ascetics. He lived to a great age, being, according to some accounts, upwards of ninety years old at the time of his death.

Hieres, a town of France, and principal place of a district, in the department of the Var, formerly a seaport town, where pilgrims bound for the Holy Land used to embark, but the sea is now retired to a considerable distance from that town. It is situated at the foot of a hill, in a delightful country, where it is perpetual spring. It is surrounded by the most beautiful gardens, in which is found the best fruit of France; oranges, citrons, and pomegranates, grow in the open air. Near the town are large salt-works, and partly from the waters of the sea, and partly from a salt lake near the town. The exhalations from the lake render the air frequently malignant, but this evil has been remedied by a canal cut from the lake to the sea. The Gulf of Hieres, between the town and the islands so called, is a famous road for vessels, with good anchoring-ground, and sufficient depth of water. It is three leagues east of Toulon, and six south of Briegnelle. Hierken, a town of Norway, in the diocese of Drontheim: forty miles south-east of Romsdal.

Hierarchical, adj. [hierarchique, Fr.] Belonging to sacred or ecclesiastical government.

Hierarch, f. [derived from the Greek words hieros, sacr., and archon, authority, or government; or the power of taking the lead and giving direction.] The Greeks used the terms Hipparchia, "Hipparchy," for the government of the horse; Nearchia, "Nearchy," for the government of ships and fleets; Tetrarchia, "Taxarchy," for the command of ranks in the army; Pentarchia, "Triarchy," for the command of ranks; Gendarmerie, "Phylarchy," for direction over a tribe. So Tetrarchia, "Hierarchy," the very essence of which, is conducting that regular form and order. Thus, speaking of angels, he says, "Glory they sung to the most High; good will to future men; and in their dwellings peace; glory to Him, whose just avenging ire Had driven out th' Ungodly from His sight, And th' habitation of the just: to Him Glory and praise, whose wisdom had ordain'd Good out of evil to create; instead Of spiritual races, a better race to bring Into their vacant room, and thence diffuse His good to worlds and ages infinite. So fang the Hierarchies." Par. L. vii. 182.

Milton, like other writers, when treating of angels, might probably have in his mind the works attributed to Dionysius the Areopagite. But as those works are spurious, mystical, and fantastical, we shall not refer to them. If we view the history of the author, whoever he was, that assumed the name of St. Paul's illustrious convert at Athens.
thought. On this principle he procured a ball of gold, and another of silver, exactly of the same weight with the crown; considering, that, if the crown were of pure gold, it would be of equal bulk and expel an equal quantity of water as the golden ball; and, if it were of silver, then it would be of equal bulk and expel an equal quantity of water with the ball of silver; but of intermediate quantity, if it consisted of a mixture of the two, gold and silver; which, upon trial, he found to be the case; and hence, by a comparison of the quantities of water displaced by the three balls, he discovered the exact portions of gold and silver in the crown.

Now, suppose, for example, that each of the three balls weighed 100 ounces; and that on immersing them severally in water, there were displaced 5 ounces of water by the golden ball, 9 ounces by the silver, and 6 ounces by the compound, or crown; that is, their respective or comparative bulks are as 5, 9, and 6, the sum of which is 20. Then the method of operation is this:

From 9
Take 6
Rem. 3
Therefore 4: 100:: 3: 75 oz. of gold,
and 4: 100:: 1: 25 oz. of silver.

That is, the crown consisted of 75 ounces of gold, and 25 ounces of silver.

Hierobotane, in botany. See Veronica.

Hierocesarea, in ancient geography, a town of Lydia, mentioned by Tacitus.

Hieroceresa, in ancient geography, an island near Paphos in Cyprus.

Hierocles, a cruel persecutor of the Christians, and a violent promoter of the persecution under Diocletian, whom he was asked to return to the Christian religion; in which he pretends to detect some inconsistencies in the Holy Scriptures, and compares the miracles of Apollo Pannias to those of our Saviour. He was refused by Laetus and Eusebius. The remains of his works were collected into one volume Octavo, by Bishop Pearson, and published in 1654, with a learned dissertation prefixed to them.

Hierocles, a Platonic philosopher of the fifth century, taught at Alexandria, and was admired for his eloquence. He wrote seven books upon Providence and Fate; and dedicated them to the philosopher Olympiodorus, who by his embassy did the Romans great services under the emperors Honorius and Theodosius the younger. But these books are lost, and we only know them by the extracts in Photius. He wrote also a Commentary upon the golden verses of Pythagoras; which is still extant, and has been several times published with those verses.

Hierodulum, in ancient geography, a town of Lydia.

Hierocloe, in botany. See Holcus.

Hieroglyph, or Hieroglyphic, f. Hieroglyph, Fr. hieroglyph, Gr. sacrés, and ρονταζ, to carve. An emblem; a figure by which a word was implied. Hieroglyph seems to be the proper substantive, and hieroglyphic the adjective. John.—A lamp amongst the Egyptians is the hieroglyphic of life. Wilkins.—The first writing man used was only the single pictures and gravings of the things they would represent, which way of expression was afterwards called hieroglyphic. Woodward.

Between the statues obelisks were placed, And the learnt walls with hieroglyphics grace'd, Pope.

The art of writing in pictures.—No brute can endure the task of strong liquor, and consequently it is against all the rules of hieroglyph to assign any animals as patrons of this art. So much.

Of the nature and origin of hieroglyphics, we have treated at considerable length in our article Egypt, vol. vi. p. 371-373; to which we refer the reader. In addition to those observations, we shall state the opinions of the following writers on this very abstruse subject.

Dr. Blair, in his Lectures on Belles Lettres, states as follows:—"It has been imagined, that hieroglyphics were the invention of the Egyptian priests, for concealing their learning from common view; and that, upon this account, it was preferred by them to the alphabetical method of writing. But this is certainly a mistake. Hieroglyphics were, undoubtedly, employed, at first, from necessity, not from choice or refinement; and would never have been thought of, if alphabetical characters had been known. The nature of the invention, which they aimed to have been one of those gross and rude essays towards writing, which were adopted in the early ages of the world; in order to extend farther the first method which they had employed of simple pictures, or representations of visible objects. Indeed, in after-times, when alphabetical writing was introduced into Egypt, and the hieroglyphical, was, of course, fallen into disuse, it is known, that the priests still employed the hieroglyphical characters, as a sacred kind of writing, now become peculiar to themselves, and serving to give an air of mystery to their learning and religion. In this state, the Greeks found hieroglyphical writing, when they began to have intercourse with Egypt; and found of their writers midook this use, to which they found it applied, for the cause that had given rise to the invention.

"As writing advanced, from pictures of visible objects, to hieroglyphics, or symbols of things invisible; from these latter, it advanced, among some nations, to simple arbitrary marks which stood for objects; though without any resemblance or analogy to the objects signified. Of this nature was the method of writing practised among the Peruvians. They made use of small cords, of different colours; and by knots upon these, of various sizes, and differently ranged, they contrived signs for giving information, and communicating their thoughts to one another."

"Of this nature also, are the written characters which are used to this day, throughout the great empire of China. The Chinefe have no alphabet of letters, or simple sounds, which compose their words. But every single character which they use in writing, is significant of an idea; it is a mark which stands for some one thing or object. By consequence, the number of these characters must be immense. It must correspond to the whole number of objects or ideas which they have occasion to express; that is, to the whole number of words which they employ in speech; say, it must be greater than the number of words; one word, by varying the sound within which it is made, may express several different things. They are said to have a thousand thousand of those written characters. To read and write them to perfection, is the study of a whole life; which subjects learning, among them, to infinite disadvantage; and must have greatly retarded the progress of all licence."

Concerning the origin of these Chinefe characters, there have been different opinions, and much controversy. According to the most probable accounts, the Chinefe writing began, like the Egyptian, with pictures and hieroglyphical figures. These figures being, in progress, abbreviated in their form, for the sake of writing them easily, and greatly enlarged in their number, passed, at length, into those marks or characters which they now use, and which have spread themselves through several nations of the east. For we are informed, that the Japanese, the Tonquinfe, and the Coreans, who speak different languages from one another, and from the inhabitants of China, use, however, the same written characters with them; and, by this means, correspondence intelligible to one another, even though ignorant of the language spoken in their several countries; a plain proof, that the Chinefe characters are, like hieroglyphics, independent of language; are signs of things, not of words."

We
We have one instance of this sort of writing in Europe. Our ciphers, as they are called, or arithmetical figures, 1, 2, 3, 4, &c., which we have derived from the Arabsians, are significant marks, precisely of the same nature with the Chinefe characters. They have no alphabetical figure, but each figure is a definite object; denotes the number for which it stands; and, accordingly, on being prefixed to the eye, is equally understood by all the nations who have agreed in the use of these cyphers: by Italians, Spaniards, French, and English, however different the languages of those nations. Thus then, before the invention of what we now call writing, the mode adopted for communicating ideas was either signs by representation, as the Mexican pictures; or signs by analogy, as the Egyptian hieroglyphics; or signs by institution, as the Peruvian knots, the Chinefe characters, and the Arabian ciphers.

Niebuhr, in his Travels through Arabia, states his opinion thus:—"Instead of characters expressive of the different sounds in their language, or signs marking each syllable, with a determinate idea affixed to it, such as the Chinefe use; the ancient Egyptians made use of certain general symbols or figures, which, though by a very forced and distant analogy. This is what we, after the Greeks, call hieroglyphic writing. As the relation between allegorical figures, and the ideas which they are employed to represent, cannot be at all times equally evident; and as they depend often upon the accident of the particular symbol by which the sign was invented, it is plain, that writing of this sort cannot be legible without a key to explain the original signification of the characters. Some of the ancients have, indeed, explained a few of those symbols; but we met with an infinite number of which nothing can be known. The hieroglyphics, therefore, cannot be deciphered, because we want the proper key.

"When the Tablet of Isis became first known in Europe, some learned men attempted to explain it by guelling from one figure the meaning of another; but their data were insufficient. Yet, I would willingly hope, that the key to those mysterious writings of the ancient Egyptians may yet be recovered. Various learned men have displayed astonishing sagacity and penetration in deciphering inscriptions in unknown languages, where there has been a considerable quantity of characters for them to exercise their conjectures upon. Travellers should therefore collect as many as possible of the little figures and symbols as they meet with; and when we may thus be furnished with more points of comparison for those symbols, through a great variety of combinations.

"The study of the ancient language of Egypt would be equally necessary for this purpose. I suspect that the true nature of the hieroglyphics has hitherto been mis-taken, while all the symbolical figures and characters have been supposed to be of the same fort. After copying a considerable number of hieroglyphics from obelisks, sarcophagi, urns, and mummies, I began to think I could perceive plainly that the large figures were emblematical, with the smaller might afford an explanation. I thought I could also distinguish, in those figures hieroglyphics, some marks of alphabetic characters, or at least of a mixed species of writing, bearing some resemblance to the alphabetical. Wherefore, by the study of the language of the Pharaohs, we may come, with more ease, to decipher these small characters. These hieroglyphics, therefore, are found strictly to be Egyptian, where all the monuments, and even the walls of those superb temples, which are standing, are covered with inscriptions of this sort. It is no less common among the tombs of the mummies at Sakara. The embalmed bodies have covers full of hieroglyphics; and the sepulchral urns are marked with them. Such as have been painted upon wood and cloth are in as good a state of preservation as those which are engraved upon stone.
regard of Ptolemy Soter, three hundred years before the Christian era. I consider that immense quantity of hieroglyphics, with which the walls of the temples, and faces of the obelisks, are covered, as containing so many astronomical observations. —See the article EGYPT, vol. vi. p. 348, and the correspondent Engraving.

I look upon these as the ephemerides of some thousand years, and that sufficiently accounts for their number. Their date and accuracy were indubitable; and whoever the authors were, they inhabited in the most public places, to be consulted as occasion required; and, by the deepness of the engraving, and hardness of the materials, and the thickness and solidity of the block itself upon which they were carved, they bade defiance at once to violence and time. I know that most of the learned writers are of sentiments very different from mine in these respects. They look for mysteries and hidden meanings, moral and philosophical treatises, as the subjects of these hieroglyphics. A sceptre, they say, is the hieroglyphic of a king. But where do we meet a sceptre upon an antique Egyptian monument? or who told us this was an emblem of royalty among the Egyptians at the time of the first invention of this figurative writing? Again, the serpent with the tail in its mouth denotes the eternity of God, that he is without beginning and without end. This is a Christian truth, and a Christian belief; but no where to be found in the polytheism of the inventors of hieroglyphics. Was Cronos or Ouranos without beginning or end? Was this the case with Osiris and Tot, whose fathers and mothers, births and marriages, are known? If this was a truth, independent of revelation, and imprinted from the beginning in the minds of men; if it was destined to be an eternal truth, which must have appeared by every man finding it in his own breast from the beginning; how unceasingly must the trouble have been to write a common known truth like this, at the expense of six weeks labour, upon a table of porphyry or granite?

"It is not with philosophy as with astronomy; the older the observations, the more use they are to posterity. A lecture of an Egyptian priest upon divinity, morality, or natural history, would not pay the trouble, at this day, of engraving it upon stone; and one of the reasons that I think no such subjects were ever treated as obelisks in miniature; yet before he had hastily adopted that explanation, he should have considered whether the Egyptian letters, fourteen centuries before Christ, corresponded so exactly with those of our English alphabet.

HEROGLYPHIC, or heroglyphical, adj. [hieroglyphiques, Fr. from the Gk. ΧΙΕΡΟΓΛYPHΙΚ, Fr. from the Gk. ΧΙΕΡΟΓΛYPHΙΚ] Charged with hieroglyphical sculpture. —In this place lands a flaccy hieroglyphical obelisk of Theban marble. Sandys. —Emblematical; e.xpressive of some meaning beyond what immediately appears: Th' Egyptian serpent figures time, And, stripp'd returns into his prime:
If my affection, thou wouldst win,
First call thy hieroglyphic kin.

Cleveland.

HEROGLYPHICALLY, adv. Emblematically. —Others have spoken emblematically and hieroglyphically, as the Egyptians; and the phoenix was the hieroglyphic of the sun. Brown.

HEROGRAMMATEI, f. [from μέθος, Gr. fáced, and γράμμα, a letter.] The priests among the Egyptians who were to explain the mysteries of religion.

HEROGRAMMATIST, f. One of the order of the hierogrammatoi.

HEROGRAMS, f. Sacred writings.

HEROGRAPHER, f. A writer of divinity.

HEROGRAPHIC, or herographical, adj. Belonging to hierography.

HEROGRAPHY, f. [μέθος, and γράμμα.] Holy writing.

HEROMANCY, f. in antiquity, that part of divination which preceded future events from observing the various things offered in sacrifice.

HEROM, or Heroumy. See JEROME.

HEROME/NIA, f. in ancient chronology, one of the Athenian months, the Boedromion.

HEROMENON, f. Among the ancient Greeks, a delegate chosen by lot, and sent to the great council of the Amphictyons, where he was to take care of what concerned religion. The hieromnemonies were reckoned
ed more honourable than the other members of that as- 
fembly, the general meetings of which were always fum- 
momed by them, and their names were prefixed to the 
decrees made by that council.—The term is now ap-
plied to an officer in the Greek church, whose principal 
function is to fland behind the patriarch at the sacra-
cements, ceremonies, and other acts, performed by him, 
and the priests. In church history, an order of 
monks said to have been established by Saint Jerome: 
an order of hermits founded in the year 1355. 
HIEROPHAN'TES, or HIEROPHAN'TA, s. [1690. Gr. 
holy, and  
fain, I appear.] In antiquity, a priest among the 
Athenians. The hierophant was the chief perfon 
that officiated in the eleusinia, or great solemnity faced 
to Ceres. 
HIEROPHAN'TIC, adj. [from hierophant.] Belong- 
ing to the hierophant. 
HIEROPHY'LAX, f. An officer in the Greek church, 
who was guardian or keeper of the utensils, veftments, 
&c. anfwering to our sacrist or vestry-keeper. 
HIEROS'COPY, f. [from 1690. Gr. sacred, and 
  
view.] A kind of divination; hieromancy. 
HIEROSOL'YMA, a celebrated city of Palestine, 
the capital of Judea, taken by Pompey, who, on that 
account, is furnamed Hierofyamus. Titus also took it 
anewly. 1670, Feb. 16, 1670, Sept. 9. A.D. 70, ac-
cording to Josephus 2177 years after its foundation. 
In the siege of Titus, 110,000 persons are faid to have per- 
fified, and 97,000 to have been made prisoners, and 
afterwards either fold for slaves, or wantonly exproted for 
the fport of their infolent victors to the fury of wild 
baits. John B. VII. vii. 16. 
HIEROSOLO'MYTAN, adj. Belonging to Jerufa-
lem, done at Jerusalem. Bailey. 
H'ERTING, or JET'TING, a seaport of Denmark, 
situated at the mouth of the Walde, with one of the beft 
harbours in North Jutland: twenty-two miles north-
west of Ripen. Lat. 55. 29. N. lon. 6. 52. E. Greenwich. 
HIG'DEN (Ralph), one of the English chroniclers, 
who was guardian or keeper of the utensils, veftments, 
&c. anfwering to our sacrist or vestry-keeper. 
HIGG'LESS, or HIG'GLESS, s. [contraction of 
Higgle, and as high as Africus fays, iignifies a 
Hugh, hence he is often cited as an original author. The belt 
creation to the year 1357. He is confidered valuable 
for his high and threatening language, and fent him word he 
would neither give nor receive quarter. Clarendon. 
Severe; oppreffive.—When there appeareth on either fide a 
high hand, violent profecution, cunning advantages 
and combination, then is the virtue of a judge 
seen. Bacon. Noble; illufrious;—True me, I am ex-
ceeding weary.—I had thought wearinesd furely not 
have attacked to high blood. It doth me, though it dis- 
courfe the complexon of my greatnefes to acknowledge 
Shakespeare. Violent; tempeftuous; loud. Applied 
to the wind. Spiders cannot weave their nets in a 
high wind. 
More chips in calms on a deceitiful coafs, 
Or unfeen rocks, than in high forms, are loft. Denham. 
Tumultuous; turbulent; un governable; 
Can heavy minds such high refentment show, 
Or exercise their fpite in human woes? 
Shakefpeare. 
High time now 'gan it wax for Una fair, 
To think of thofe her captive parents dear. 
Spenf. 
Railed to any great degree: as high pleafure; high lux-
ury; a high performance; a high colour: 
Solomon liv'd at eafe, and full 
Of honour, wealth, high fare. 
Milton. 
Advancing in latitude from the line. —They are forced 
to take their coure either high to the north, or low 
to the fouth. Abbot.—At the molt perfect flate; in the 
meridian; as, by the fun it is high; whence probably the 
foregoing expreffion, high time. —It is yet high day, 
neither is it time that the cattle should be gathered. Gen. 
xxix. 7. —Far advanced into antiquity. —The nominal. 
obervation of the feveral days of the week is very high, 
and as old as the ancient Egyptians, who named the 
fame according to the feven planets. Brown.—Dear; ex-
orbitant in price.—If they muft be good at fo high a 
price, they know they may be safe at cheaper. South. 
Capital; great; oppofite to little: as, high treafon, in 
opposition to petty.
servedly fall unpitied. Thus Milton, speaking of Eve, in allusion to original sin:

Thus Milton, speaking of Eve, in allusion to original sin:

Fairest of creation,
Left and best of all God's works,
How art thou fallen!
Lad and best of all God's works,
Dryden.

Dryden.
holy. The people, who professed this method of worship, enjoyed a soothed intimation, which attedned the gloom of superstition. The eminences to which they resorted were raised above the lower world; and fancied that they were brought into the vicinity of the powers of the air, and of the deity who resided in the higher regions. But the chief object for which they were frequented, was the Omphal, expressed by the Greeks, and interpreted as the name of a temple, and being a particular revelation from heaven. In short, they were looked upon as the peculiar places where God delivered his oracles. The people, who profecuted this method of worship, were raised above the lower world; and fancied that they were nothing in the high-places very contrary to the law, provided God only was adored there, and that no incense or victims were offered to idols. Under the judges they seem to have been tolerated; for Samuel offered sacrifices in several places besides the tabernacle, where the ark was not present. Even in David's time, they sacrificed to the Lord at Shilo, Jerusalem, and Gideon; but after the temple was built, and a place prepared for the fixed settlement of the ark of the covenant, it was no more allowed of to sacrifice out of elsewhere. Solomon, in the beginning of his reign, went a pilgrimage to Gibeon; but from that time we hear of no lawful sacrifices offered out of the temple.

HIGH POINT, a cape on the north coast of the island of Barbadoes. Lat. 13. 22. N. long. 38. 32. W.; Green.

HIGH-PRIEST, a priest of the superior order. See Pontiffex and Priest.

HIGH-PRINCIPLED, extravagant in notions of politics.—This seems to be the political creed of all the high-minded men I have met with. Swift.

HIGH-RED, adj. Deeply red. — Oil of turpentine, though clear as water, being digested upon the purely white sugar of lead, has in a short time afforded a high-red tincture. Boyle.

HIGH-RESOLVED, adj. Refolute:

With a power Of high-resolved men, bent to the spoil, They hitter march amain.

Titus Andronicus.

HIGH-RIG'GED, adj. Furnished with high rigging; formed with a shoulder as the head of an arrow.

HIGH-SEASON'D, adj. Piquant. — Be sprawling also of salt in the leaning of all his vicissitudes, and ule him not to high-feas'd meats. Locke.

HIGH-SIGHT'ED, adj. Always looking upwards:

Left high-fighted tyranny range on,
'Till each man drop by lottery.

Shakespeare.

HIGH-SPIR'ITED, adj. Bold; daring; insolent.

HIGH-STOM'ACHED, adj. Oblinate; lofty:

High-stomach'd are they both, and full of fire; In rage, deaf as the sea, hafty as fire.

Shakespeare.

HIGH-TAGER, f. in botany. See Verbascum.

HIGH-TAS'T'ED, adj. Goulful; piquant:

Flattery still in sugar'd words betrays, And poison in high-tasted meats conveys.

Denham.

HIGH-VICED, adj. Enormously wicked:

Be as a planetary plague, when Jove Will o'er some high-vic'd city hang his poion In the thick air.

Shakespeare.

HIGH-WATER, that state of the tides when they have flowed to their greatest height, and have ceased to flow or rise. At high-water the motion commonly escapes for a quarter or half an hour, before it begins to ebb again. The time of high-water of every day of the moon's age, is usually computed from that which is observed on the day of the full or change; viz. by taking 4-5ths of the moon's age on any day of the month, and adding it to the time of high-water on the full or change; then is the time of high-water on the month proposed. See the article Tide.

HIGH-WROUGHT, adj. Accurately finished; nobly laboured:

Thou triumph'd victor of the high-wrought day,
And the plea'sd dame, soft finling, lead it away. Pope.

HIGH-WYCOMB, an ancient town of Buckinghamshire, also called Chipping Wycomb, from cumm, a British word for valley or vale. It is a great thoroughfare from London to Oxford; twelve miles from Aylebury, fourteen from Uxbridge, and thirty-three from London. It has a market on Fridays, which is plentifully supplied with fish, flesh, and other provisions; fair Sept. 25. It is fed on a small river, which falls into the Thames. The church is a large Gothic structure, with a lofty bell-tower, and a freestanding bell at the churchyard end of the town. It was a market town for nine hundred years, and had a charter granted by King Henry VII. The town has a grammar school, and an almshouse for twelve old men and women. The market is on Saturdays; fairs, Feb. 5, March 7, May 1, June 28, Aug. 3, Sept. 25, and Dec. 25. The town is governed by a mayor, recorder, twelve aldermen, a town-clerk, &c. It has returned to parliament ever since 18 Edward I. The returning officers are the mayor and bailiffs.

HIGH-PAM-FERRERS, a pleasant healthy town in Northamptonshire, distant fifty-one miles from London. In the reign of Edward I., and in Mary, it was made a borough and corporation, consisting of a mayor, twelve aldermen, thirteen capital burgesses, and commonalty, with power to send one member to parliament. Higham-Ferrers, which signifies the high house of Ferrers, derives its name from a castle on a rising ground, anciently in the possession of the family of Ferrers. In the tenth year of Henry V., that prince granted a licence to Henry Chichely, archbishop of Canterbury, to found a college here (this being the place of his birth,) for eight secular chaplains, four clerks, and six choristers. It was incorporated by the name of the College of the Blessed Virgin, St. Thomas of Canterbury, and St. Edith, the Confessor. The bishop endowed it with lands in his life-time, and these were increased after his death by his brothers Robert and William, aldermen of London, his executors. Its annual value, at the suppression, according to Dugdale, was 1531. 2s. This town has a good free-school; and an almshouse for twelve men and one woman. The market is on Saturdays; fairs, Feb. 5, March 7, May 1, June 28, Aug. 3, Sept. 25, and Dec. 25. The town is governed by a mayor, recorder, twelve aldermen, a town-clerk, &c. It has returned to parliament ever since 18 Edward I. The returning officers are the mayor and bailiffs.

It has returned to parliament ever since 18 Edward I. The returning officers are the mayor and bailiffs.
was enlarged by Edwin Sandys, bishop of London, and a chapel added to it.

HIGHLANDS, a township of the American States, in Vermont, in Franklin county.

HIGHLANDER, f. An inhabitant of mountains; a mountaineer. The term is commonly applied to the inhabitants of the highlands of Scotland, for which see the Highland; and sometimes to the inhabitants of the Western Isles, for which see the article HEBRIDES, in this volume.

HIGHLANDS, an elevated tract of country in the American States, on the banks of Hudson's river, in the State of New York, between forty and sixty miles north of New York city. The passage on the river through these highlands, for the distance of about eighteen miles, is grand and romantic in a high degree. The opening seems to have been formed on purpose for the passage of this noble river. On these highlands are situated the important fortresses of West Point, Fort Montgomery, and Stoney Point. The most noted peaks are Thunder Hill, Ten Thousand Noses, Sugar Loaf, Butter Hill, and Break Neck Hill. After passing the two last, the country opens delightfully, and presents to the eye the pleasant villages of New-Windfor and Newburgh.

HIGHLY, adv. With elevation as to place and situation; aloft; in a great degree. It cannot but be highly requisite for us to enliven our faith, by dwelling often on the same considerations. Atterbury.—Proudly; arrogantly; ambitiously: What thou would'st highly, That thou wouldst holyly; wouldst not play falsely, And yet wouldst wrongfully win. Shakespeare.

With efeem; with estimation. Every man that is among you, not to think of himself more highly than he ought to think. Rom. xii.

HIGHMORE (Joseph), an eminent painter, born in London in 1632. On the first institution of the academy of painting, sculpture, &c. in 1650, he was elected one of the professors. In 1654 he published A critical Examination of those two Paintings [by Rubens] on the Ceiling of the Banqueting-houfe at Whitehall, in which Architecture is introduced, so far as relates to Perspective; together with the Discourses of a Question which has been the Subject of Debate among Painters: printed in 4to. In the solution of this question, he pronounces Rubens and several other great painters were mistaken in the practice, and Mr. Kirby and several other authors in the theory. Of the many portraits which Mr. Highmore painted, in a large practice of forty-six years, it is impossible and useless to defcribe to particulars. His capital work of the literary kind was his Practice of Perspective, on the Principles of Drs. Brook, Taylor, &c. published in 1673, in one vol. 4to. This not only evinced his scientific knowledge of the subject, but removed, by its perspicuity, the only objection that can be made to the system of Dr. Taylor. In the same year he published two small volumes of Essays, moral, religious, and miscellaneous; with a Translation in prose of Mr. Browne's Latin Poem on the Immortality of the Soul; selected from a large number written at his leisure, at different periods of life. He died at Canterbury, in March 1705, aged 88.

HIGHMORE (Nathaniel), a physician and anatomist, born in 1613, at Fordingbridge in Hampshire. He was educated at Christ Church, and entered Trinity college, and, entering on the phyfic-line, took his degree of M.D. in 1642. He then settled at Sherborne in Dorsetshire, where he became eminent in the practice of the profession. His principal work is Corporis Humani Dissectionis Anatomia, folio, Hag. 1651. The anatomical descriptions in this piece are brief and simple, and the reasoning copious. The figures are chiefly copied from Vesalius. Another work of Highmore's is The History of Generations, 1650. 1661, with good figures of the embryo in the incubated egg. He supports in it a notion of indefinable atoms in the animal frame, somewhat resembling the organic molecules of Buxton. He also wrote Exercitationes duae (i. de Paffione Hysterica; ii. de Hypochondriaca Affcidie.), 1663, 12mo. Thee about with physiological remarks and hypotheses, most of them erroneous and foiled. Dr. Willis having attacked some of his opinions, he printed, in 1679, Epistolæ Refponfioriæ ad T. Willis. He died in 1685.

HIGHMOST, adj. [an irregular word.] Highest; topmost:
Now is the sun upon the highmoft hill
Of this day's journey. Shakespeare.

HIGHNESS, f. Elevation above the surface; altitude; loftines. The title of princes; anciently of kings. Beauty and greatnes are eminently joined in your royal highness. Dryden.

How long in vain hath nature fiv'd to frame
A perfect prince; ere her highnes fcape came? Waller.

Dignity of nature; supremacy.—Destruction from God was a terror to me, and by reason of his highnes I could not endure. Job xxxi.

To HIGH, v. n. [Deut, to call, Sax. hiegen, Germ.] To be called:
The city of the great king high it well, Wherein eternal peace and happiness doth dwell. Spenser.
Within this homestead liv'd, without a peer For crowing loud, the noble Chanticleer; So high her cock. Dryden.

It is sometimes used as a participle passive; called named. It is now obsolete, except in burlesque writings. Hear he highes. Pope.

Among the rest a good old woman was, High mother Hubberd. Hubberd's Tale.

To HIGH, v. a. part. past, highes, [used by Spenser in some of the sense of] Belight. To entruit; to commit: The gates flood open wide, Yet charge of them was to a porter high. Fairy Queen. To direct; to intend.

But the sad féele feiz'd not where it was high
Upon the childe, but somewhat short did fall. Idem.

HIGHWAY, f. [via regia, Lat.] A public paflage in every part of the realm, which is always alike open and free for all his majesty's subjects, whence it is called the king's highway. As this accommodation contributes largely to the interests and advantages of the community, fo the legislature has, by many salutary laws, provided that the public, thus benefited by safe and substantial roads, shall contribute almost individually and confranitly, towards their support. There are (says Lord Coke) three kinds of highways: 1. A footway, called in Latin iter. 2. A packway, which is both a horse and footway, but not for sheep and cattle; called in Latin aditus. A cart-way, called zia, or aditus, which contains the other two, and also a cart-way; and is called via regia, if it be common to man and cattle; and communis strata, if it belong only to some town or private person. Co. Lit. 56 a. And it seems, that a way to a parish church, or to the common fields of a town or village, which terminates there, may be called a private way, because it belongs not to all the king's subjects, but only to the particular inhabitants of such parish, houte, or village, each of which may have an action for a nuisance therein. Palmes. 389. Co. Lit. 56. 1 Hawk. P. C. 76. If palfengers have used, time out of mind, when the roads are bad, to go by outlets on the land adjoining to a highway in an open field, such outlets then
then become parcel of the highway; and therefore if they are fown with corn, and the tract fowndered, the king's subjécts may go upon the corn. 1 Rol. Abr. 399. 2 Cro. Car. 366. 3 Hawk. P. C. c. 76.

A highway is laid to be the king's, yet this must be understood fo as that in every highway the king and his subje& are to have a path; and he must be free from the burthen of any future reparation. But the freethold, and all the profits, as trees, &c. belong to the lord of the foil, or to the owner of the lands on both fides of the way. Also the lord or owner of the folee is bound to have a path of trench for the ground, without licence or concen sentinel had or obtained. 1 Brownl. 42. Keiz. 141.

An ancient highway cannot be changed without an inquisition found on a writ of ad quod damnum; but if such change will be no prejudice to the public; and it is said, that if one change a highway without fuch authority, he may fhop the new way whenever he pleases; neither can the king's subje& in an action brought against him for going over fuch new way, justify generally as in a common highway, but ought to fhow specially, by way of excuse, how the old way was obstructed, and a new one set out; neither are the inhabitants bound to repair the new way, or to make allowances for a robbery committed in it. Yelv. 141. 1 Burr. 456. 1 Hawk. P. C. c. 76.

An owner of land, over which there is an open road, may inclofe it by his own authority; but he is bound to leave fufficient space and room for the road, and he is obliged to repair it till he throws up the inclofe. But, if he alter or change the road by the legal course of a writ of ad quod damnum, he is not obliged to repair the new road, unlefs the jury impose such a condition on him: for otherwise it stands juft as it did before, even though it was at ftrt open, and fhould be directed by the jury to be inclofed. And a private act of parliament for inclofing lands which inclofe a common path, will not render the default of the owner of the folee, for which they enjoyed no compensation. 1 Rol. Abr. 399.

As to private ways.—If one grants a way, and afterwards digs trenches in it to his hinderance, I may fill them up again. But if a way which a man has, becomes not paffable, or becomes very bad, by the owner of the land tearing it up with his carts, fo that the fame be filled with water, yet he who has the way cannot dig the ground to let out the water, for he has no interest in the foil. Godb. 53, &c. But in fuch cafe he may bring his action against the owner of the land for spoiling the way, or perhaps he may go out of the way, upon the land of the wrong-doer, as near to the bad way as he can.

But where a private way is fpooled by thofe who have a right to paff thereon, and the default of the owner of the land, they are equally liable. 1

In a writ of ad quod damnum, if one change a highway without fuch authority, the certificate is too late; for then he muft plead it specially; that therefore, if to an indictment against the parish, for not repairing a highway, they plead not-guilty, this fhall be intended only that the ways are in repair, but does not go to the right of redemption. 1 Mod. 115. 2 Keb. 301.

But if a way which a man has, becomes not paffable, or becomes very bad, by the owner of the land tearing it up with his carts, so that the same be filled with water, yet he who has the way cannot dig the ground to let out the water, for he has no interest in the foil. Godb. 53, &c. But in fuch cafe he may bring his action against the owner of the land for spoiling the way, or perhaps he may go out of the way, upon the land of the wrong-doer, as near to the bad way as he can. But where a private way is spoold by thofe who have a right to paff thereon, and the default of the owner of the land, they are equally liable. 1

In a writ of ad quod damnum, if one change a highway without fuch authority, the certificate is too late; for then he muft plead it specially; that therefore, if to an indictment against the parish, for not repairing a highway, they plead not-guilty, this shall be intended only that the ways are in repair, but does not go to the right of redemption. 1 Mod. 115. 2 Keb. 301.
mon-law: and, when the statute work is not sufficient, further rates and affimations are to be made. Dall. c. 26.

The statute-law for the permanent maintenance of the king's highways throughout the kingdom is briefly as follows: By stat. 13 Geo. III. c. 78, which repeals and consolidates the former statutes on this subject, occupiers of land of 50L a-year, keeping a team of three horses, shall send the same, and two men, to do statute-duty for six days in every year. And so for another six days in every year for every further 50L a-year. So also every person who shall occupy 50L in any other parish than where he resides. —Every person occupying 50L a-year, but not keeping a team, shall send a team, a person not keeping a team, but occupying under 50L a-year, either where he does or does not reside, to pay the surveyor in lieu of duty for every 20s. a-year 1d. for every day's duty. —A person keeping a team, and not occupying 50L a-year, shall only send one man with the team. The livings of the clergy are also liable as other estates. Walf. 42: 1 l. p. 286.

Whoever shall keep a cart and horse, and not a team, shall send the same, and one labourer, or pay the composition, at the option of the surveyor. —Persons above 18, and under 60, not occupying 50L a-year, not being apprentices or menial servants, if they have not otherwise performed or committed, shall, by statute-duty, send six days in every year for every further 50L a-year. —A person keeping a cart or carriage, and not occupying 50L a-year, shall pay 18. 1-day for each horse, or the composition before mentioned, at the option of the surveyor. —If the carriages required are not necessary, the owners shall send three men, or pay 45. 6d. —The labourers shall furnish themselves with proper instruments for the statute-labour; and shall, with the teams, &c. work eight hours a-day. —If persons do not send a sufficient labourer besides the driver, or if the labourers disobey the surveyor, he may discharge them, and recover the forfeiture against the master, as he might in case none had been sent at all. —A hand-cart and one horse to be reckoned half a team; a cart and two horses as two-thirds. —And if the duty require it, the surveyor may order it to be performed with a waggon.

The surveyor shall give four days' notice to the occupiers, &c. of the statute-duty required, and the days when. Persons making default in sending the team and men, to forfeit 10s. —In sending cart, horse, and man, 35. —In sending cart, horse, and two men, 55. —In sending a labourer, 15. 6d. —The forfeitures to be applied to the highways; the surveyor to be impartial. —The statute-duty may be compounded for, as the justices shall direct, at the rate of 45. 6d. for a team; 25. for a cart and horse; 35. for a cart and two horses; and 45. for a day's personal labour. —If a necessity should arise in any particular place, the justices may supersede the liberty of compounding, and order the statute-duty to be performed in kind; and lots shall be drawn which of the inhabitants shall do it perform it. —Where a draught or plough is kept, and no carriage, is. 6d. —The labourers shall be paid for their service. —And if such order is not complied with in ten days, the surveyor shall cut and prune at the expense of the owner of the land, who shall pay over and above 2s. for every twenty-four feet of hedge, and 4s. for every tree. —The surveyor shall also make proper ditches and drains, and keep them properlyflowered and in repair, on pain of 10s. And where the old ditches are not sufficient, the surveyor shall order new ones to be made. No small tree or bush whereby a man may lurk, shall stand within two hundred feet of a highway. —See stat. 15 Winch. 1. l. p. 15. c. 5. —Penalty for obstructing the highway for five days, so as to obstruct or injure the通行. —And this statute shall forfeit 10s. and if five days after notice by the surveyor, it shall be sold. —Obstructions by carriages, unreasonably used to unload, forfeit 10s. Penalties for damaging banks, causeways, mile-stones &c. from 10s. to 51. or commitment to the house of correction. —The statute provisions are made as to turnpike roads, by 15 Geo. III. c. 34. —The number of horses in the several carts and wagons, with wheels of various breadths, is settled by section 56 of the said stat. 15 Geo. III. c. 78. —The owner's name is to be printed on all carriages, on forfeiture of more than 51. for negligence or impertinent behaviour of drivers not more than 50s. if owners of carriages, or 10s. if not; who may be apprehended with or without warrant by a person seeing the offence committed. —This statute does not restrain the subject, who receives any injury by a driver, &c. of any carriage, from suing the owner thereof at common-law, or from punishing the driver for wilful offence, by indictment, as that is the case under the statute 13 Geo. III. c. 78. Every public carriage shall be twenty feet wide, and every horse or pack-horse eight feet wide. Two justices, upon view, may order highways to be widened or diverted; so as not to exceed
exceed thirty feet in breadth, and so as not to pull down any building, or encroach on any garden, court, or yard. The tolls shall be proportioned to the produce, and the liability of the owners for the ground which shall be necessary for such purposes. If the owners refuse to treat, or cannot be found, or will not accept the satisfaction offered by the surveyor, the feoffees upon certificate shall imprison a jury, who shall assess the value, not exceeding forty years' purchase; and upon tender thereof, or land, the whole of the work of the turnpike shall be for ever diverted and become a public highway.

But all subterranean property, which can be acquired without injuring the surface of the highway, is to be saved to the owners of the land. And all timber and wood thereon shall be felled within a month, and set aside upon the adjoining land for the benefit of the owner; and the seoffees may order a rate, not exceeding 6d. in the pound yearly, to pay for such purchase. The old highway to be fold, in such a preference is to be given to the occupiers of the adjoining lands; and if it lead to any land, house, or plate, the sale shall be subject to such right of passage. And, upon tender or payment of the money, the land shall vest in the purchaser, saving the right of all subterranean property to those who would otherwise have been entitled.

Two justices may divert any highway, not in the situation before described, if the owners of the land, through which the new road is to pass, will consent; and may purchase, from the owner of that land, the strips on both sides of the road, which shall be refunded or otherwise disposed of. Persons aggrieved by any such proceedings, or by any writ of ad quod damnum for this purpose, may appeal to the next sessions. New highways, which have been acquiesced in for twelve months, shall become incontrovertible. See W. Jum. 256. Id. Raym. 735. 3 Comn. 39.

It often happens that a highway lies in two parishes, and even frequently that the boundaries of parishes pass through the middle of highways, the flat. 34 Geo. III. c. 64, provides, that on complaint or application by a surveyor, two justices may determine what parts of highways lying in two parishes shall be repaired by each; for which purpose they may order boundary-fences to be erected, and annexe a plan of the highway and the division of it to their order, which plan is to be filed by the clerk of the peace; the costs of such order to be paid by both parishes.

The Turnpike Roads are placed under the management and direction of certain trustees, who are appointed by a majority of the proprietors; and the turnpike trustees are allowed to raise rates for the making and repairing particular roads. But, the powers of these acts being confined to separate and distinct objects, it was thought expedient to pass some general laws which should apply in common to all trustees and turnpike roads in general throughout the kingdom. The last general turnpike act, and that now in force, is the flat. 13 Geo. III. c. 84, and this act, by 21 Geo. III. c. 20, is extended to all acts of parliament made since it, or to be made hereafter, for the purpose of regulating particular turnpikes.

A trustee must poll at reality of 40l. a-year, or 50l. per annum. He must also be a resident within twelve miles of the road, or shall lose his office. The trustees, on penalty of 50l. and in an action it is incumbent on the trustee to prove his qualification. No publican shall be a trustee, or act under them as collector of tolls, &c. but he may farm the tolls, if he employs a person to collect them. Where the hrill or any other day of meeting has elapsed, any five trustees may appoint a meeting of the whole body, on giving twenty days notice. No meeting shall be adjourned longer than three months; and all business is to be done between ten A.M. and two P.M. If trustees exceed their power in erecting gates, the justices may order them to be removed.

Some trustees may farm out the tolls by auction upon one month's notice, describing the particular tolls to be let, and specifying their produce the preceding year. Farmers of the tolls shall not take more than the regular produce, and the penalty of 50l. or 40s. on the gate-keepers. Seven trustees, on a month's notice, may reduce or advance the tolls, as they see convenient; but if the toll be mortgaged, they must have the consent of four fifths of the creditors. Five trustees may direct consecration for nuisances at the expense of the trust; provided they can prove the fact by one witness. Two trustees may supply the vacancy of one of their number. Any one of the trustees may give notice of a general meeting. They shall hang up at the toll-gates tables of the rates of toll, and of the different weights and number of horses allowed to carriages. They shall erect mile-stones, direction-posts, flood-posts, &c. Five trustees may order weighing-engines to be erected at such gates, within the jurisdiction of the trustees, as they think proper. No lane to be erected, unless on order of nine trustees (being a majority present) on twenty-one days' notice; and no toll to be paid for passing only one hundred yards through the same, unless over some expensive bridge. The different burthens which carriages are allowed are settled at large, and the additional toll to be paid for extra weight is determined, by flat. 14 Geo. III. c. 82. And carriages employed in husbandry, or in carrying manure, are exempted from being weighed. Any trustee, officer, or creditor, may cause carriages not passed more than three hundred yards through any gate, to return and be weighed, on tendering 10s. for every 50l. which shall be refunded or otherwise disposed of. The toll keeper neglects to weigh suspected carriages, or to receive the additional toll, he shall forfeit 5l. The trustees shall place makes within three hundred yards of every gate, for carriages to turn.

-A list of the trustees and officers shall be hung in the house of every gate where there is a weighing-engine. A driver refusing to return shall forfeit 40s. and any peace-officer may drive the carriage back to be weighed. The quarter sessions, upon complaint, may order weighing-engines to be erected; and, when two roads meet, the trustees may erect one weighing-engine for both. No composition to be made for tolls, unless the carriages have fellowes six inches broad. The penalty for endeavouring to evade the tolls by unloading goods, &c. before the carriage arrives at the weighing-engine, is 5l. and the driver may be committed to the house of correction for a month. Penalty on endeavouring to avoid the weighing-engine; on the owner of a carriage from 10s. to 50s. on persons passing through gates without paying toll; on assaulting collectors, refusing cattle, &c. from 10s. to 50s. The flat. 15 Geo. III. c. 84, explains that large number of horses allowed to carriages according to the breadth of their fellowes; and the penalties on transgression is 5l. on owners, and 20s. on drivers. Two oxen equal to one horse. Carriages going on six-inch rollers may be drawn with any number of horses, and, by flat. 14 Geo. III. c. 82, shall only pay half-tolls. On prosecution for penalties, information must be made of the offence within three days, and action commenced within one month. Penalty for taking off horses and altering the distance of the wheels to avoid the toll, 5l. Penalty on persons passing through gates without paying toll; on assaulting collectors, refusing cattle, &c. from 10s. to 50s. Treasurers may allow a sufficient number of horses to draw up hills, rising more than four inches in a yard. And one justice may stop prosecution for penalties in drawing with a greater number of horses than allowed, if it appears necessary from deep snows, &c. No carriages with less than nine-inch fellowes shall be drawn by horses in pairs, but the return shall be as much as the fellowes; the owners of the horses shall be permitted by seven trustees, and except carriages drawn by two horses only. Justices in Wales may licence an increased number of horses. Any person may apprehend the driver of a carriage not marked, or drawn by too many horses, &c. No chaise, carriage, landau, berlin, coach, chair, or hearse, nor any real artillery or ammunition, can be carried in such carriages.
carriage; nor any cart drawn by one horse or two oxen; nor any carriage of nine-inch wheels, carrying one block of stone and piece of timber, &c. shall be subject to the tolls of this act for breadth of wheels, &c. No toll shall be taken for carriages working on the repair of highways or turnpike-roads. No toll shall be taken for any horses of soldiers or officers on their march or duty, nor for any baggage, or for any baggage-waggon; nor shall such carriage or waggon be disqualified at any engine. The mail-coaches are also exempted from toll by Stat. 25 Geo. III. c. 57. Persons taking fraudulent advantage of any exemptions, shall forfeit from 40s. to 51. 13 Geo. III. c. 84.

No surveyor shall gather or dig for stones, without the consent of the owners of the land, or of some person having a right in the same, to remove the same. The owner thereof shall have been summoned and refused to appear. If the overseer of any turnpike-road refuses to appear, he shall forfeit 40s. to 51. 13 Geo. III. c. 84. And as to nuisances by encroachments of other persons within thirty feet of the road, &c. a penalty of 40s. is imposed, in the same manner as by the highway act.

Subscribers, who shall sign any writing to advance money for the road, shall be bound by their subscription; and, on twenty-one days default, the treasurer may sue for the same. Stat. 13 Geo. III. c. 84. Mortgages of tolls, having power of alienation of the same, shall account, on oath, for all the money which shall come to their hands, after fourteen days notice from five trustees, or forfeit 10l. Penalty for a mortgagee holding over after his money is paid is double the money received, and treble costs. If a discharged gate-keeper refuses to deliver up the toll-house, &c. within four days after notice of a new appointment, any judge may order him to be removed, and put the new toll-keeper in possession. Gate-keepers and toll-gatherers on notice from five trustees, shall account for money received by them, on penalty of 51.

No person residing in a toll-house, shall be removable by the said or any other person, unless by the process of law, and put the new toll-keeper in possession. Gate-keepers permitting horses or carriages, not allowed by the act, to pass the gates, shall forfeit 40s. All officers, their executors and administrators, shall, within ten days after notice by five trustees, deliver up all books, &c. on penalty of 51.

By Stat. 1 Geo. II. Stat. 2, c. 19, to destroy any public turnpike gate, or the rails or fences thereto belonging, full possession of the land to the sufferer to hard labour for three months, and to be publicly whipped. By Stat. 5 Geo. II. c. 33, on conviction at the assizes, the offender may be transported for seven years; and on a second offence, or on demolishing any turnpike house, he shall be guilty of felony, and transported for seven years. In both these cases the proclamation must be within six months; and, if the convict return from transportation before the expiration of the term, he shall suffer death. By Stat. 8 Geo. II. c. 20, persons guilty of the above offences, or destroying any chain, &c. placed to prevent persons from passing without paying toll, or refusing any offender, shall suffer death without benefit of clergy. These two last-mentioned acts are made perpetual by Stat. 27 Geo. II. c. 16. By Stat. 13 Geo. II. c. 84, if any person shall commit any of the offences aforesaid, or shall destroy any crane or machine for weighing carriages, &c. he shall be transported for seven years, or committed to prison not exceeding three years, at the discretion of the court. And by the last-mentioned act it is provided, that, unless the offender be convicted within twelve months, the hundred shall make satisfaction for the damages.

HIGHWAYMAN, f. A robber that plunders on the public roads.—'Tis like the friendship of pickpockets and highwaymen, that observe strict justice among themselves. Bentley.—For the apprehending and taking of highwaymen, a reward of 40l. is given by the statute of 4 and 5 Will. and Mary, to be paid within a month after conviction by the sheriff of the county; to which the statute 8 Geo. II. cap. 16. superadds 10l. to be paid by the hundred indemnified by such taking.

HIGH'ERA, a town of Spain, in the province of Andalucia; twelve miles north of Xeres de los Caballeros.

HIGH'EY, or ALTA GRACIA, a city in the south-east part of St. Domingo, or Hispaniola, the easternmost of all the settlements in the island, celebrated formerly for its fertility, and the quantity of sugar it produced. It was once the seat of Cayacoa, the most powerful of the islands, or province of all Cuba.

HIGH'AR, or IXAR, a town of Spain, in the province of Aragon; twenty-five miles from Saragossa.

HILA'RIA, f. in antiquity, feasts celebrated annually by the Romans, on the 8th of the calends of April, or on the 23rd of March, in honour of Cybele, the mother of the gods. This festival was solemnized with great pomp and rejoicing. Every person dedicated himself as he pleased, and took the marks or badges of whatever dignity or quality he had a fancy for. The statue of the goddess was carried in procession through the streets of the city, accompanied by multitudes in the most splendid attire. The day before the festival was spent in tears and mourning. Cybele represented the earth, which at this time of the year begins to feel the kindly warmth of the spring; so that this sudden transition from sorrow to joy was an emblem of the vicissitude of the seasons, which succeeded one another. The Romans took this fest from the Greeks, who called it Πάγος οτάσιος, q.d. Πάγος ατανα. The eve of that day was spent in tears and lamentations, and thence denominated it παγονατος, δεφανας. Afterwards, the Greeks took the name Παγοπαγος from the Romans, as appears from Photius, in his extract of the life of the philopoffer Iphidore.

HILA'RION, a faint in the Roman calendar, who first introduced monks in Palestine; born at Thebaste, a town near Gaza, in 291. His parents, who were pagans, having sent him to pursue his studies at Alexandria, he there inspired with an ardent desire of communicating the same faith to his parents and countrymen. But finding his parents dead, he distributed all his property among the poor, and withdrew into a desert, where he passed, in solitude and devotion, a high character for piety and sanctity, by the austerities to which he submitted. The number of his disciples soon became numerous, whom he distributed into different monasteries throughout Palestine and Syria, over which he exercised a superintendence, visiting each of them once every year. Afterwards he visited the islands of Sicily and Cyprus, in the latter of which he died in 371, when he had completed the eighteenth year of his age.

HILARITY, f. [hilaritas, Lat.] Merriment; gaiety. Averroes restrained his hilarity, and made no more there of than Seneca commendeth, and was allowable in Cato; that is, a sober incalculance for wine. Brown.

HILARIUS, a man's name. An ancient father of the Christian church, who flourished in the fourth century. He was born, as St. Jerome informs us, at Poitiers, of a good family; who gave him a liberal education in the pagan religion, and which he did not forsake till he was arrived at maturity. He was advanced to the bishopric of Poitiers in the year 333, according to Baronius; and became a most zealous champion for the orthodox faith, particularly against the Arians, who were at that time gaining ground in France. He assembled several councils, in which the determinations of the synods of Rimini and Seleucia were condemned. He wrote a treatise concerning synods; and a famous work in twelve books on the Trinity, which is much admired by the orthodox believers. He died in the latter end of the year.
year 367. His works have been many times published; but the late and best edition of them was given by the Edinburgh Bishops, in 1675.

Hilarodes, or Hilaro'di, s. A sort of poets among the ancient Greeks, who went about singing poems or fongs, accompanied with some instrument. From the streets they were at last introduced into tragedy, as the magodii were into comedy. They appeared dressed in white, and wore gilded crowns. At first they wore shoes; but in time they abandoned the crepida, being only a sole tied over with a strap.

Hilaro'di, s. A cheerful irregular kind of poem sung by the hilarodes.

Hilaro'trage'dia, s. [from σατρης, Gr. cheerful, and τραγωδία, a tragedy.] A kind of comic or cheerful tragedy; a tragic-comedy; a mock-tragedy.

Hilaro'dia, s. A sort of poets among the ancient Greeks, who went about singing poems or songs, accompanied with some instrument. From the streets they were at last introduced into tragedy, as the magodii were into comedy. They appeared dressed in white, and wore gilded crowns. At first they wore shoes; but in time they abandoned the crepida, being only a sole tied over with a strap.

Hilarodes, or Hilaro'dis, pope, who is also denominated a saint, is said in the Pontificales to have been a native of Sardinia. He signallised his zeal for the catholic faith, by opposing a design of the emperor Anthemius, to grant leave to the then various sedes of Christians to assemble publicly by themselves, to own openly the doctrines which they held, and to serve God in any manner which was most agreeable to themselves. But Hilary, to whose authority such a measure must ultimately have been fatal, was induced by his bold interference to oblige the emperor, and to take an oath that he would suffer no schismatical assemblies to be held at Ephesus. He died in the year 445, having filled the papal chair five years and ten months. Twelve of his letters, which are written with perspicacity and elegance, may be found in the fourth volume of the Collect. Concil.

HILARY, bishop of Arles in the fifth century, and a saint in the Roman calendar, was a native of France, and born about the year 401. He received a liberal education, and distinguished himself by his proficiency in the sciences, and the brightness of his genius. He was an eloquent and impregnable preacher, and freely reproved those who opposed a design of the emperor Anthemius, to grant leave to the then various sedes of Christians to assemble publicly by themselves, to own openly the doctrines which they held, and to serve God in any manner which was most agreeable to themselves. But Hilary, to whose authority such a measure must ultimately have been fatal, was induced by his bold interference to oblige the emperor, and to take an oath that he would suffer no schismatical assemblies to be held at Ephesus. He died in the year 445, having filled the papal chair five years and ten months. armed force, attacked the dukes of Brunswick and Lune-
burg; but in the year 1537, being put under the ban of
the empire, the dukes took the field part of his terri-
tories from him, left only enough to repair the cathedral, with a
few bailiwicks under the title of the latter bishopric. In
the year 1643, most of these possessions were restored to
Ferdinand, the then bishop. The inhabitants are partly
Lutherans and partly Roman-catholics. The matricular
affiliation for the bishopric is 156 florins; to the cham-
ber of Wetzlar the see pays 72 rixdollars 38 krucchini.
The principal towns are Hildesheim and Peina.
HILDESHEIM, a city of Germany, in Lower Saxony,
and capital of a bishopric of the same name, situated near
the Innerfie; it is pretty large, old-fashioned, and irreg-
ular, and confists of the Old and New Town, which were
united in the year 1533. The magistrates, as well as the
greater part of the citizens, are Lutherans; the rest are
Roman-catholics. The old town acknowledges the bishop
for his sovereign, but does no homage to him; but the
new town does homage to the provost of the cathedral.
The Roman-catholics are in possession of the cathedral;
the protestants have eight churches. Hildesheim was
formerly one of the Hanse-towns. It is seventy-two
miles west of Magdeburg, and twenty-six west-south-west
of Brunswick. Lat. 52.12. N. Lon. 27.28. E. Ferro.
HILDESLEY (Mark), a learned and exemplary
prelate of the church of England, born at Murston, near
Sittingbourne, in Kent, in 1698. He received his clafical
education at the Charter-house, in London; and was after-
wards admitted to Trinity-college, Cambridge; and in
1735, was elected a fellow of his college. Having been
admitted into holy orders, he in the following year was
appointed one of the preachers at Whitehall, by Dr.
Gibson, bishop of London; and was afterwards made
chaplain to lords Cobham and Bolingbroke. In 1730, he
was preferred by his college to the vicarage of Hitchin,
in Hertfordshire; and in 1735 was inducted into the rect-
ory of Holywell, in Bed fordshire, within three miles of
his vicarage. Upon the death of Dr. Wilfon, bishop of
Sodor and Man, in 1755, Mr. Hildesley was nominated
to that appointment. Before his consecration, he was
created doctor of divinity by archbishop Herring; and after taking an affective leave of his flock at Hitchin,
he entered upon his episcopal duties. The most effica-
cious endeavours with which he adopted the work of
the gospel in his diocese, was that of procuring an entire
translation of the Old and New Testament to be made
into the Manks language. This work had been projected
and begun by his predecessor, bishop Wilfon, who, at
his own expense, had printed the gospel of St. Matthew,
and had prepared for the press the other Evangelists,
and the Acts of the Apostles. These were delivered by
his son to bishop Hildesley, who undertook the laudable
task of completing the design. For this purpose he ob-
tained pecuniary assistance from the Society for promot-
ing Christian Knowledge, and many persons of eminence
and distinction who patronized the generous undertaking.
At first but limited, the New Testament, together with
the Book of Common Prayer, the Chriftian Monitor, and
Bishop Wilfon's Form of Prayer for the Herring Fithery.
But encouraged by the benefactions which he received,
and the very active and zealous co-operation of the clergy
in the island, he ultimately completed a version of the
whole Old Testament. He had no fewer than nine im-
pressions to take, and then he sunk under a stroke of
apoplexy, and died in December 1772, in the seventy-
fourth year of his age.
HILDING, f. [hibl, Sax.] signifies a lord; perhaps
HILDING means originally a little lord in contempt, for a man
that has only the delicacy or bad qualities of high rank;
or a term of reproach abbreviated from hindeling, degene-
rate. — Hugues.] A forry, paltry, cowardly, fellow:
He was fome hiding fellow, that had fhotn
The horfe he rode on.
Shakespeare.
HILDURIN, a French writer and divine, was made
abbot of St. Dennis about the year 814. Afterwards
he was appointed abbot of St. Medard at Soiffons, and
St. Germaine's at Paris. In 818 he was created chief
chapelain to the emperor Louis le Debonnaire, and was
admitted to a high degree of favour by that prince. In
835, by order of the emperor, he undertook to write the
life of St. Dennis, the patron-saint of France, which he
entitled Areopagiticus, feu de Robus Coelis & Scriptis S. Diony-
fi Areopagitis, from which, in his own country, he derived
no little reputation, though at the expense of truth. It
was designed to show, that Dennis, the legendary apoftle
of France, was no other person than Dionysius the Areo-
pagite. The time of Hildurin's death is uncertain, some
writers placing it in 858, and others in 842. His Areopagiticus
was first printed at Cologne, in 1562, with a letter from
the emperor Louis to him, and his answer; and it is pub-
lished by Surius among the Lives of the Saints.
HIL'KLA, or HIL'ZER, a town of Aireaux, in the
country of Sejillema.
HIL'LEN, or HIL'TON, a city of Palestine, belonging
to the tribe of Judah, situated in the mountains of that
province; and a city of the Levites of the family of Ko-
nehmen, Judges xvi. 13. 1 Chron. vi. 39.
HIL'KLA'YH, [Heb. the Lord is my portion.] A man's
name.
HILL, f. [hil, Sax.] An elevation of ground less
than a mountain:
My sheep are thoughts, which I both guide and ferve;
Their pasture is fair hills of fruitless love.
Sidney.
Jerusalem is seated on two hills,
Of height unlike, and turned side to side.
Fairfax.
HILL (Aaron), an English poet and miscellanous
writer, born in London in 1685. His father, a gentleman
of good paternal estate in Wiltshire, left him almost to-
tally unprovided. His adventurous spirit led him soon
after to take a voyage to Constantinople, where his rela-
tion, lord Paget, was the English ambassador. He was
received with kindness; and a tutor was provided for
him, under whose care he travelled through Palestine,
Egypt, and various parts of the east. In 1703 he re-
turned to England; and in 1709 he published A Hiftory
of the Ottoman Empire, from materials which he had
collected in that country. This piece met with succe-
s; and a poem, which he published in the same year in fa-
vour of the earl of Peterborough, introduced him to the
patronage of that nobleman. He married in 1710 a lady
of beauty and merit, with a handfome fortune; and,
about the fame time, was appointed manager of the
Drury-lane theatre. This circumstance turned his pen
to the stage, and he wrote his first tragedy of Alfed;
and an opera, entitled Rim. lo, the latter for the Hay-
market theatre, of which he had also the direction. Such
a situation would now be thought equally favourable to
fame and fortune; but upon some difference with the
duke of Kent, lord chamberlain, Hill threw up his thea-
drical management, which he had conducted highly to
the satisfaction of the public. But, though he had quitted
the management of the theatres, he continued to write
for them, and several of his pieces were brought upon the
stage. He also wrote poems, one of which, entitled
The Northern Star, a panegyric upon the great czar Peter,
was popular, and received a complimentary reward from
the
the empress Catharine. In 1724, he commenced a periodical paper, called The Plain Dealer. It was probably this exertion of his pen which gave him admission among the party-writers satirized in the Dunciad, which was first printed in 1729. He was, however, treated very respectfully; and it is probable that Pope's lines will perpetuate his memory with more credit than any of his own works. He is describing the diving-match in Fleet-ditch.

Then heлся; scarce vanish'd out of sight,
He buoy'd up instant, and returns to light;
He bears no token of the fabler dreams,
And mounts far off among the swans of Thames.

Hill, however, did not relish a compliment so mixed; and, in a piece entitled The Progress of Wit, he retaliated by some lines, which, for polished keenness, are worthy of Pope himself. The breach was afterwards healed, and they became friends. In 1731 he had the misfortune to lose his beloved wife, who had made him father of nine children, four of whom survived him. In that year he brought out his tragedy of Athelwold, which was his juvenile Elfrid, re-written; and the difficulty of perpetuating his memory, with more credit than any of his own works.

Then H— assay'd; scarce vanish'd out of sight,
He buoy'd up instant, and returns to light;
He bears no token of the fabler dreams,
And mounts far off among the swans of Thames.

The time when Hillel entered upon his presidency, was about a hundred years before the destruction of Jerusalem, and when he was eighty years of age. If we are to credit the Jewish writers, he occupied that post till he was an hundred and twenty years old, and discharged its duties with greater wisdom and justice than any who had filled it before him from the time of Simon the Just. Hillel is said to have educated above a thousand scholars in the knowledge of the law, of whom severall attained to a high degree of eminence among the Jewish doctors, and some became distinguished for their share in producing the Targums, or Chaldee paraphrases upon the Old Testament. Some Jewish writers maintain, that Hillel ought to be considered as the first author of the Mishna, since they say that he was the first who arranged their traditions in six Sedarim, or regular treatises. His descendants are said to have succeeded to the honour of president of the Sanhedrim, from father to son, for seven generations.

Hillel the Younger, governed the Jewish church in the third century of the Christian era, under the title of patriarch; and was a lineal descendant from the preceding, and a peron of great learning and merit. He was the first compiler of the present calendar of the Jewish year. He introduced into the cycle of nineteen years, to reconcile the course of the sun with that of the moon, by the help of seven intercalations. He was one of the principal doctors concerned in compositing the Gennar and died a profelyte to the Christian faith.

Hiller (Matthew), a learned German Lutheran divine, born at Stuttgart in 1646. After being initiated in the elements of learning at the schools in his native city, he went to the university of Tubingen in 1664, where he took the degree of master of arts in 1669. In 1677 he was made deacon of Herrnberg; and in 1685 preacher to the convent of Bebenhausen. Afterwards he was made professor of logic and metaphysics at Tubingen, and in 1692 was appointed to the chair of Hebrew professor. In 1692 he was created professor in ordinity of the Greek and Oriental languages, professor-extraordinary of divinity, principal of the pension of the prince, and visitor of the schools of Vinzburg above the Steig. Afterwards he was nominated abbot of Herrenalb, and in 1716 of the convent of Kamnichburg, where he died in 1725. At the age of four years he was the author of,

The Constructions of Timber from its early Growth, 1770, Svo. He had the degree of doctor of laws, at Cambridge; and, some time before his death, a present of his botanical works to the king of Sweden procured him the title of knight of the Polar Star. The patronage of lord Bute procured him the management of the royal gardens at Kew, with a handsome salary. He died of the gout in November 1775.

HILL-ROYALTY, A district of any country, bounding with hills; a Scripture term.

HILL-VOICE, a town of Sweden, in the province of Smaland; forty-two miles north west of Christiana.

HILDEBECK, a town of Norway, in the diocese of Agderhus; thirteen miles south-west of Christiana.

HILDEBRUN, a town of Sweden, in the province of Gotlandia; eight miles north of Gdthle.

Hillel the Elder, probably the person who is described by Josephus, as the presiding officer of the Jewish doctors; and, according to St. Jerome, flourished in Judaea not long before the birth of Christ. He was ordained on his mother's side from the family of David, and born in the Babylonish territory, where he lived till he was forty years of age. He was chosen a member of the great Sanhedrim; and, together with Shammai, another eminent doctor, constantly refuted the measures of that body for opposing Herod's elevation to the throne, and defending the city against his army. By this policy those men escaped the slaughter to which all the other members of the Sanhedrim were consigned, after Herod had become master of the city. Of the sanhedrim which was afterwards formed, Hillel was made president, and Shammai vice-president.

The time when Hillel entered upon his presidency, was about a hundred years before the destruction of Jerusalem, and when he was eighty years of age. If we are to credit the Jewish writers, he occupied that post till he was an hundred and twenty years old, and discharged its duties with greater wisdom and justice than any who had filled it before him from the time of Simon the Just. Hillel is said to have educated above a thousand scholars in the knowledge of the law, of whom several attained to a high degree of eminence among the Jewish doctors, and some became distinguished for their share in producing the Targums, or Chaldee paraphrases upon the Old Testament. Some Jewish writers maintain, that Hillel ought to be considered as the first author of the Mishna, since they say that he was the first who arranged their traditions in six Sedarim, or regular treatises. His descendants are said to have succeeded to the honour of president of the Sanhedrin, from father to son, for seven generations.

Hillel the Younger, governed the Jewish church in the third century of the Christian era, under the title of patriarch; and was a lineal descendant from the preceding, and a person of great learning and merit. He was the first compiler of the present calendar of the Jewish year. He introduced into the cycle of nineteen years, to reconcile the course of the sun with that of the moon, by the help of seven intercalations. He was one of the principal doctors concerned in compositing the Gennar and died a profelyte to the Christian faith.
HILLEROD, a town of Denmark, in the island of Zealand. This town was burned down in the year 1735, but rebuilt the following year: fourteen miles north-west of Copenhagen.

HILLESHEIM, or HUDESHEIM, a town of Germany, on the Lower Rhine, and electorate of Trier: thirty-six miles west of Coblenz, and thirty-one north of Trier.

HILLENSTIDE, a town of Germany, in the duchy of Holstein, two miles and a half west of Itzehoe.

HILL HOVES, in ancient geography, a people of Scandinavia. Play.

HILLIA, f. [so named by Jacquin, in honour of sir John Hill, M.D.] In botany, a genus of the class hexan-

HILLIESHEIM, or HUDESHEIM, a town of Ger-

HILLIER, a town of Germany, in the north-weft

HILLS, a river in the American States, which rises from Pathapowinnew Lake, and empties into Hudson’s Bay at York Port.

HILLSBACH, a town of Germany, in the palatinate of the Rhine: twenty miles east of Spire, and fourteen south-east of Heidelberg.

HILLSBOROUGH, a post-town of Ireland, in the county of Down, and province of Ulster, sixty-nine miles from Dublin. The town is pleasantly situated, and abounds in large trees, in view of Limerick, Belfast, and Carrickfergus bay; the church is magnificent, having an elegant spire, as lofty as that of St. Patrick’s in Dublin, and covered with painted windows. Here is a thriving manu-

HILLSBOROUGH, a small island near the east coast of Labrador. Lat. 52° 20° N. lon. 61° 20° W. Greenwich.

HILLSBOROUGH, a county of the American States, in New Hampshire, bounded north by Grafton county, south by the county of Merrimack, west by the county of Hillsborough, and east by Rockingham county. It is divided into thirty-seven townships, and four townships of land, which contain 35,571 inhabitants, all free people, who chiefly follow agriculture. The academy at Amherst has 800: funds, and another at New Ipswich of 1000. Chief towns, Amherst, and Hopkinton.

HILLSBOROUGH, a township of the American States, in the above county, situated on the northern head-branches of Contoocook river, about twenty miles west of Concord. It was incorporated in 1772, and contains 2798 inhabitants.

HILLSBOROUGH, a township of the American States, in Somerset county, New Jersey, containing 2201 inhabitants: fifteen miles west of Bridgewater, and eighteen northerly of Trenton.

HILLSBOROUGH, a town of the American States, on the eastern side of Cape Fear river, in Carolina county, Maryland; seated on the east side of Tuckahoe Creek, one of the chief branches of Choptank river; eleven miles south-east of Denton, nine north-west of Greensborough, and twenty-four south-west of Chester.

HILLSBOROUGH, one of the middle districts of North Carolina, bounded north by the flute of Virginia, south by the county of Halifax, west by the county of Rowan, and north by the county of Orange, containing 3360 inhabitants: chief town, Hillsborough.

HILLSBOROUGH, a post-town of the American States, in North Carolina, and capital of the district of its name, situated in Orange county, on the north side of Eno river, in a high, healthy, and fertile, country. It contains a court-house and gaol; and has an academy of students, patronized by the principal gentlemen of the state. The Eno unites with Little and Flat rivers, and forms the Neuse, about fifteen miles below the town. It is 180 miles west-north-west of Newbern, twenty-six south-west of Peron, forty by forty of Hills-Don, 110 east-north-east of Salisbury, and 452 south-west-by-south of Philadelphia.

HILLSBOROUGH BAY, a bay on the north coast of the island of Dominica, formed at the mouth of a river of the same name. Lat. 15° 42′ N. lon. 61° 22′ W. Greenwich.

HILLSBOROUGH BAY, a bay on the south coast of the island of St. John, in the Gulf of St. Lawrence. Lat. 46° 15′ N. lon. 62° 40′ W. Greenwich.

HILLSDALE, a township of the American States, in Columbia county, New York, having Claverack on its west, and Great Barrington, in Berkshire county, Massachusetts, on its east, and contains 4575 inhabitants.

HILLTOWN, a town of the American States, near the centre of Chester county, Pennsylvania; twenty-eight miles west of Philadelphia, and twenty-one north-west of Chester.—Also the name of a township in Bucks county, in the same state.

HILL’S LIM, f. [so named by the Egyptians.] A Jewish epithet of a mourning song, or of a mourning song, in New Hamphire, bounded north by Grafton county, south by the county of Merrimack, west by the county of Hillsborough, and east by Rockingham county. It is divided into thirty-seven townships, and four townships of land, which contain 35,571 inhabitants, all free people, who chiefly follow agriculture. The academy at Amherst has 800: funds, and another at New Ipswich of 1000. Chief towns, Amherst, and Hopkinton.

HILLY, f. Full of hills; unequal to the surface. — Hilly countries afford the most entertaining prospects, though a man would choose to travel through a plain one. Addison.

HILLY'S BAY, a bay on the north coast of the island of Dominica, formed at the mouth of a river of the same name. Lat. 15° 42′ N. lon. 61° 22′ W. Greenwich.

HILLY, f. Full of hills; unequal to the surface. — Hilly countries afford the most entertaining prospects, though a man would choose to travel through a plain one. Addison.
Himera by the Carthaginians; many of the inhabitants as Himera, in ancient geography, a city of Sicily.

And hides a sword from him. The word "hilt" runs to the north. After the destruction of the town of Jaen: twelve miles east of Ubeda. Remained settled in the same territory, not far from the mouth of the Eurotas.

The river in the country of the Sabines.

This was also the ancient name Hispala.

It is situated on the east side of the mouth of the river Guayanuco, sixty-four miles north-west of St. Domingo. Lat. 19° 3'.

Hinchinbrook Island, one of the New Hibernes, in the Southern Pacific Ocean, near Sandwich Island; about two leagues in circumference.

Hinkelley, a very ancient town in the county of Leicesters, situated on a rising ground, nearly on the borders of Warwickshire, from which it is separated by the Roman Watling-street road. It is distant from Coventry and Leicesters fifteen miles each, eleven from Lutterworth, and one hundred from London. It has been much larger than it is at present; the back lanes between the orchards were evidently streets originally. The traces of the town-wall and ditch are in many places yet visible.

There are vestiges of the two Roman works, viz. the mound near the river, and the ruins of a bath near St. Nicholas church. Telford's bridges have been built over the lower, the largest 1500. The stone wall is said to have been the temple of Janus. The castle was inhabited by John of Gaunt, but is now no more.
crepted on the spot in 1770. The steeple of the present church is built with some of the materials of the castle. The town is now divided into the Borough, and the Bond without the liberties. It enjoys a good market on Mondays, and a fair August 26. The chief manufacture is flockings, and fine ale. The town is said to contain about 750 houses. There are two churches, one chapel, and a place of worship for the Roman Catholics, where four meetings of the church is a neat large structure, with a modern tower and a spire. In 1808, an elegant new organ was erected. This town is said to be the middle, and highest ground, in England; and from it fifty churches may be seen, besides numerous gentlemen's seats. It received great damage by a fire Sept. 5, 1728.

HINCMAR, a learned French prelate, descended from a noble family, and educated in the monastery of St. Dennis, near Paris. He there distinguished himself by his proficiency in the literature of the times, the brightness of his parts, and his engaging manners. In the year 845 he was ordained archbishop of Rheims, and in 849 he presided at the council of Quire. Upon the irruption of the Normans into France, in 866, he opposed the nation to that of the face; opposed to face.—Bears, fighting with any man, fight upon their hinder feet. Sidney.

HIND, adj. That which is in a position contrary to that of the face; as, opposed to face.—What hinders have they been to the knowledge of what is well done? Dryden.—He must conquer all these difficulties, and remove all these hindrances out of the way that leads to justice. Atterbury.

Have we not plighted each our holy oath, One soul should both inspire, and neither prove His fellow's hinderance in pursuit of love? Dryden.

HINDER, f. Or that which hinders or obstructs.—Brakes, great hinderers of all plowing, grow. May. HINDERLING, f. One that comes after the rest; a paltry, worthless, degenerate, animal. HINDERMOST, adj. [This word seems to be less proper than hindmost]. hindmost; left; in the rear.—He put the handmaids and their children foremost, and Leah and her children after, and Rachel and Joseph hindermost. Gen. xxxiii. 2.

HINDERSOME, adj. Apt to hinder; troublesome; in the way. Scot.

HINDFAKE, f. [from hide, Sax. a servant, and pagan, to go.] The act of running away from a master. Scot.

HINDHAND, f. In the manage, the hinder parts of a horse; the hind-quarters. HINDIA, a town of Hindostan, and capital of a district of the same name, in the Condeifi, situated on the Neubudda; six miles west from Indore, and ninety north-north-east of Burghampour. Lat. 22° 35' N. Long. 77° 10' E. Greenwich.

HINDIAN, a small district of the Independent Arabs, bordering on the possessions of the tribe of Hid. It is governed by a chief of its own; and the Arabs who inhabit it live upon the produce of their lands, and propagate corn and cattle.

HINDMEND, a river of Persia, which runs into the Lake Zar, twenty leagues west of Parsa, in the province of Segistan.

HINDMOST, adj. The last; the lag; that which comes in the rear.—In me set thee by the way, and smite the hindmost of thee, even all that were feeble behind. Deut. xxxv.

HINDON, a borough town in the county of Wilts, distant ninety-six miles from London. It has a market on Thursdays, and fairs on Monday before Whitsunday, and October 29, for cattle, sheepe, &c. It is a general thoroughfare in the road from London to the northern parts of Suffolk and Norfolk; and is governed by a bailiff and burgesses. A fire destroyed 150 houses in this town on the 20th of July, 1754.

HINDOO, or INDIAN CACASUS, part of a long and lofty ridge of mountains in Asia, which separates Cabuia from Balk.

HINDOOSTAN, the aboriginal inhabitants of Hindostan, who profess the religion of the Brahmins, supposed to be the same with that of the ancient Gymnolophists of Ethiopia. See the article HINDOOSTAN, at the beginning of the ensuing volume.

INDEX
INDEX to the Article HERALDRY.

In this Index will be found, besides other matter, a complete List of the Nobility and Barons of the United Kingdom.

A BDY of Felix-hall, bart. 698.
Abbercorn, marquis of, 483, 669.
Abbercorn, baronets, 596.
Abdercrombie, earl of, 617.
Abbergevanny, earl of, 580; genealogy of that house, 793.
Abington, earl of, 584.
Abinger, earl of, 616.
A'Court, sir W. P. A. bart. 745.
Acland, sir T. bart. 703.
Acton of Aldenham, bart. 702.
Adare, baron, 688.
Adolphus duke of Cambridge, 457.
Affleck, sir G. bart. 733.
Aills, baron, 594.
Ainnfe, sir R. bart. 766.
Albermarle, earl of, 507.
Aldborough, earl of, 649.
Allen, vicount, 663.
Alleyne, sir R. A. bart. 726.
Alvanley, earl, 590.
Aftloun, baron, 584.
Aftloulbam, earl of, 517; baron, 565; sir W. bart. 710.
Afgill, sir C. bart. 723.
Alderson, rev. sir C. bart. 708; sir J. W. 750.
Allen, viceroy, 663.
Anderfon, rev. sir C. bart. 708; sir J. W. 750.
Anderston, baron, 574.
Anderston, earl of, 513.
Anderston, earl of (since dead), 639.
Aftley of Hill-Morton, bart. 704.
Afton of Alston, lord, 625; Afton of Alston, bart. 696.
Afttoun, baron, 584.
Aftlbecue, earl of, 507; since dead.
Aftl Brooke, earl of, 647.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlone, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftlton, lord, 625; Afton of Alston, bart. 696.
Aftloun, baron, 584.
Aftlbridge, earl of, 546.
Aftlton, lord, 625; Afton of Alston, bart. 696.

Wycombe (earl), son of the marquis of Landswon, 481.
Yarmouth (earl), son of the marquis of Hertford, 487.

The Editors have now the pleasure of informing their numerous Subscribers, that in the course of the ensuing Summer Months, they shall publish, in extra numbers, the ten title pages and superb classical frontispieces, to the first ten volumes of the work; together with a set of cancel leaves, explanatory of the additional plates, and of the new discoveries and improvements in science, since the first volume went to the press, whereby the several editions of those volumes will be made precisely alike, and perfect, in all respects, up to the date of the present year. The frontispieces, as far as the eighth volume, are already completed; the drawing for volume nine, representing heraldry, and that for volume ten, emblematical of horticulture and husbandry, are in the royal exhibition for 1809; after which they will be put into the hands of the engraver, in order to be published in succession with the others.
DIRECTIONS to the BINDER for placing the COPPER-PLATES to VOL. IX.

5. Gryllus, Plate III. Locusts of the fifth Division. - 58.
6. Guia culator, the Echium Vitreus Tree. - 64.

The Leaves in this Volume containing pages 595, 596, and 785, 786, are to be cancelled, and supplied by those given in No. 634, owing to the incorrecions of the Armorial Bearings, which must be rectified before they can be reprinted. The New Baronets, Sir Samuel Field and Sir David Baird, will be given in a future Sheet.

The Subscribers will readily perceive the utter impossibility of our publishing this Volume complete, in respect to its Plates. Great numbers of Plates, viz. Armory, Baronets, Knights, Esquires, Clergy, and Gentlemen, who are Subscribers to the Work, not having sent in their Armorial Bearings, and many having been received which require correction, the Editors propose to give a more precise Table of Directions for placing them, at the End of the Tenth Volume. And as the printed Matter under the Letters I, and K, is very brief, and almost destitute of Subjects for Engravings, the Editors will supply that defect by means of the most interesting Series of Plates relating to the articles Heraldry, All these Subscribers, therefore, who have deferred having their Names and Coats of Arms recorded, and placed after p. 786, in this Volume, by additional Leaves which will be hereafter printed and given, are requested to send them, with all convenient speed, to the Editors, (postage paid,) at No. 17, Ave Maria Lane, London.

END OF THE NINTH VOLUME.
